noy (nɔɪ), *sb.*² *Physics*. [repr. the pronunc. of the first part of *noise*.] A unit of perceived noisiness, defined so that the number of noys is proportional to the noisiness of a sound, and one noy is equal to the noisiness of a sound of specified bandwidth and intensity (see quot. 1959).

1959 K. D. KRYTER in *Jrnl. Acoustical Soc. Amer.* XXXI. 1424/1 The following . . . steps were taken in arriving at the procedure suggested for the calculation of the perceived noise kind of a sound: Step 1. First, the word 'noy' was coined for the units on the scale of perceived noisiness. The numerical value of 1 was assigned to the perceived noisiness of the band from 910-1090 cps of random noise at a sound pressure level of 40 db *re* 0.0002 µ bar. **1963** JERRARD & MCNEILL *Dict. GOWING *Britain & Atomic Energy* xiii. 346 Sir John Anderson's forebodings about a nuclear arms race between competing power blocs were not the result of his concern over the specific problem of the French. 1964 J. H. ROTHCHILD *Tomorrow's Weapons* iii. 24 Nuclear warfare would include atomic (fission) bombs, shells, and mines, and hydrogen (fusion) bombs and missile warheads. 1965 H. threshold as follows: 'In efforts to limit violence, there is... a recognizable, qualitative distinction that both combatants can recognize and agree upon if they want to.' *Ibid.* 98 As Soviet nuclear capability has grown, the Soviets have... become less aggressive. *Ibid.* 297 A nuclear stalemate... exists when the balance of central war forces is such that neither side is capable of making a disarming first strike. 1967 *Listener* 11 May 607/2 The decision of certain powers to go nuclear would have the effect of making endemic regional conflicts totally insoluble. 1970 [see GO *v.* B. 44 a]. 1973 *Times* 22 Feb. 16/4 He was attacking the nuclear disarmers or some such, who had for a time been predicting that we would all be blown up or poisoned by the Bomb. *Ibid.* 9 Nov. 20/1 The nuclear umbrella is now demonstrably in shreds. 1974 *Sci. Amer.* July 46/1 India became the sixth member of the nuclear club on May 18 by carrying out what it called a 'peaceful nuclear explosion experiment using an implosion device'.

b. A proton or neutron; a sub-atomic particle of which these may be regarded as two distinct states, differing in the third component of isospin. [Orig. formed as *nuclon* (see quot. 1941).]

nucleophilic (nju:klɒ'fɪlɪk), *a. Chem.* [f. NUCLEO- + -PHILIC.] a. Having an affinity for atomic nuclei, and so reacting at an electron-deficient bond or atom in a substrate; anionoid.

1933 C. K. INGOLD in *Jrnl. Chem. 1935 HUGHES & INGOLD in *Jrnl. Chem. nucleoprotein (nju:klɒ'prəuti:n). *Biochem.* [a. G. *nucleoprotein* (E. Merck 1885, in *Patentschrift* 35,724), which was formerly rendered in Eng. as *nucleoproteid* (s.v. NUCLEO-):

see PROTEIN.] A combination of a protein and a nucleic acid such as occurs in living organisms.

nucleoside ('nju:klɒsaɪd). *Biochem.* [ad. G. *nucleosid* (Levene & Jacobs 1909, in *Ber. d. Deut. Chem. Ges.* XLII. 2475), f. after *glucosid* GLUCOSIDE: see NUCLEO-.] Any compound in which a sugar (usu. ribose or deoxyribose) is linked glycosidically to a purine or pyrimidine base; *spec.* such a compound derived from a nucleic acid by hydrolysis. (See quot. 1973.)

1911 [see NUCLEOTIDE]. 1911 [see ADENOSINE]. 1931 LEVENE & BASS *Nucleic Acids* vi. 126 The name 'nucleoside' was assigned to the substances of this group for the reason that . . . they contain sugar in a glucosidic union, and . . . the substances linked to the sugars are nucleic bases. 1946 *Nature* 24 Aug. 275/2 Miss Meijbaum has found . . . that the pentose contained in pyrimidine nucleotides (uridylic acid and cytidylic [read cytidylic] acid) and nucleosides (uridine) are not determined by her method. 1969 *New Scientist* 10 July 65/2 A nucleoside like adenosine or inosine. 1973 [see NUCLEOTIDE].

Hence **'nucleosidase** [-ASE], any enzyme which catalyses the hydrolysis of a nucleoside into its constituent base and sugar, or the reaction between a nucleoside and phosphate to yield a base and a sugar phosphate.

1911 LEVENE & MEDIGRECEANU in *Jrnl. Biol. Chem.* IX. 396 Under the influence of mineral acids nucleosides are readily hydrolyzed into their components. The same cleavage can be brought about by the action of enzymes present in the plasma of most of the organs tested in that direction. . . Since this reaction is brought about by an enzyme different from the other nucleolytic enzymes, it may be proper to refer to it under the name of *Nucleosidase*. 1935 *Biochem. Jrnl.* XXIX. 1100 If adenine nucleosidase is present it must therefore be only in relatively small amounts. 1955 CHARGAFF & DAVIDSON *Nucleic Acids* I. xv. 600 The enzymic cleavage of N-glycoside bonds of nucleic acid derivatives was first observed in nucleosides, and the term 'nucleosidases' . . . is still used. In the current literature this name tends to be replaced by the designations 'nucleoside phosphorylases' and 'nucleoside hydrolases'.

nucleotide ('nju:klɒtəɪd). *Biochem.* [ad. G. *nucleotid* (Levene & Mandel 1908, in *Ber. d. Deut. Chem. Ges.* XLI. 1907): see NUCLEO- and -IDE.] Any compound in which a phosphate group is linked to the sugar of a nucleoside; *spec.* any of the compounds of this type obtained by the partial hydrolysis of a nucleic acid, which are the individual monomers of which such acids are composed. (See quot. 1973.)

1908 *Jrnl. Chem. Soc.* XCIV. i. 587 It is suggested that the nucleic acids are composed of simpler complexes, the nucleotides, each formed of phosphoric acid, a carbohydrate, and a base. 1911 *Jrnl. Biol. Chem.* IX. 66 It was demonstrated that the molecule of the complex nucleic acids is composed of nucleotides and these of phosphoric acid, carbohydrate and base linked to one another in the order here given. . . It is possible to detach from the complex either phosphoric acid alone, giving rise to a nucleoside, or a complex of carbohydrate and base. 1937 *Nature* 30 Oct. 745/2 The co-ferments now described as phosphopyridine nucleotides, the nature of which has been at last worked out. 1952 *Sci. News* XXIV. 33 The complete nucleic acid molecules are generally considered as being built up of nucleotides, linked through the hydroxyl (OH) groups of the sugar and the acid groups of the phosphoric acid. 1957 *Times* 1 Nov. 10/3 The award to Sir Alexander Todd . . . of the Nobel prize for chemistry . . . for his work on nucleotides and nucleotide enzymes. 1968 *Observer* (Colour Suppl.) 10 Mar. 15/1 The DNA molecule . . . is a two-stranded helix. Each strand is built up of smaller molecules called nucleotides. *Ibid.* 15/2 There are only four kinds of nucleotide, each with a different chemical base. These bases are adenine, thymine, guanine and cytosine. 1971 J. Z. YOUNG *Introd. Study Man* iii. 47 The symbols of the genetic code . . . are the nucleotides arranged in the helical DNA molecules. 1973 HENDERSON & PATERSON *Nucleotide Metabolism* p. xiv, The terms 'nucleoside' and 'nucleotide' in the strictest sense refer to N-glycosides, and phosphorylated N-glycosides, respectively, derived from nucleic acids. The term is now used, however, in several broader ways. Thus, adenosine triphosphate (ATP) is not derived from nucleic acids, but is quite legitimately a nucleotide through its relation to adenosine monophosphate (AMP), which is so derived. Other N-ribosides, such as nicotinamide mononucleotide (NMN), are called nucleotides only by extension and analogy, and nicotinamide-adenine dinucleotide (NAD⁺), nicotinamide-adenine dinucleotide phosphate (NADP⁺), etc., are called dinucleotides only by a similar process. Flavin mononucleotide (FMN) is a step still further removed, as it contains ribitol instead of ribose, and flavin-adenine dinucleotide similarly extends the meaning of dinucleotide. N-glycosides such as orotidylate (OMP) and adenylosuccinate are called nucleotides through their close relationship to the 'true' nucleotides. *Ibid.* i. 10 In animal cells, a few nucleotides with sugars other than ribose and deoxyribose are known.

Hence 'nucleotidase [-ase], any enzyme which catalyses the hydrolysis of a nucleotide to a nucleoside and phosphate.

1911 LEVENE & MEDIGRECEANU in *Jrnl. Biol. Chem.* IX. 395 The enzymes performing this cleavage [of nucleotides to phosphoric acid and carbohydrate-base complex] may be referred to as Nucleotidases. **1932** *Jrnl. Biol. Chem.* XCVI. 462 The optimal activity of the nucleotidase is at a pH > 11. **1970** R. W. The term is used in numerous English and mod.L. combs. distinguishing the various different nuclei.

1828 J. QUAIN *Elem. Anat.* x. 622 If a vertical section be made of one of the lobes of the cerebellum, in such a way as that two-thirds of its breadth shall lie external to the incision, an oval nucleus of grey substance (*corpus dentatum*, vel *rhomboidum*) will be exposed. **1856** *Ibid.* (ed. 6) II. 493 Another division passes directly up, its fibres embracing the olivary nucleus. **1875** *Encycl. Brit.* I. 878/1 The upper mass of grey matter projects into the lateral ventricle, and is called the intra-ventricular portion or nucleus caudatus. **1881** MIVART *Cat* 271 The third pair of nerves... arise deeply from a grey nucleus... close to the origin of the fourth nerve. **1896** CLELAND & MACKAY *Anat.* 614 The superior peduncles... turn down... and reach the red nucleus. **1899** [see *HYPOTHALAMUS*]. **1968** PASSMORE & ROBSON *Compan. Med. Stud.* I. xix. 12/1 Masses of grey matter are called nuclei, some of which, e.g. the basal nuclei, are large and embedded in the depths of the brain. **1972** *Sci. Amer.* Dec. 73/1 A sensory pathway consists of peripheral sense organs and several clusters of nerve cells called nuclei. Sensory information is processed in several stages, so that each nucleus receives input from the preceding one, processes the input and sends an output to the next nucleus.

7. Biol. A cell organelle present in most of the cells of all organisms except the most primitive, usu. as a single subspherical structure, and consisting (except when undergoing division) of a membrane enclosing a ground substance (the nuclear sap) in which lie the chromosomes, one or more nucleoli, etc., and functioning as the repository of genetic information and as the director of metabolic and synthetic activity of the cell. Hence, by extension, applied by some writers to an organelle in some of the more primitive organisms, esp. bacteria, which is analogous in function but structurally simpler (cf. *NUCLEOID a. B. b.*).

1831 R. BROWN in *Trans. Linn. Soc.* (1833) XVI. 710 This areola, or nucleus of the cell as perhaps it might be termed. **1842** CARPENTER *Hum. Phys.* §735. 618 At first having but one nucleus and afterwards presenting several; these nuclei... it is probable... are to be regarded as cytoblasts. **1847-9** TODD's *Cycl. Anat.* IV. 120/2 No cell, or nucleus-stage having pre-existed. **1849** BALFOUR *Man. Bot.* §16 Each cell is found to contain, at some period of its existence, a small body, called a nucleus. **1857** G. BIRD's *Urin. Deposits* (ed. 5) 362 A regularly organized body, consisting of a granular membrane enveloping transparent nuclei; being in fact a nucleated cell. **1861** BENTLEY *Man. Bot.* 18 Almost all

young cells contain one or more bodies called Nuclei or Cytoblasts... In cells of the higher classes of plants the nucleus consists of a rounded or lenticular granular-looking body. **1880** BASTIAN *Brain* 35 Nerve cells are more or less granular bodies, each of which contains a large nucleus. **1882** VINES tr. *Sachs' Bot.* 551 In most Monocotyledons the large central nucleus divides, and two fresh nuclei make their appearance. **1888** ROLLESTON & JACKSON *Anim. Life* Introd. p. xxii, The nucleus is limited externally by a nuclear membrane. **1889** [see *NUCLEOID a.*]. **1962** *Brit. Med. Stud.* I. xxvi. 2/1 The mature red [blood] cell... appears as a biconcave disc with no nucleus. **1970** AMBROSE & EASTY *Cell Biol.* v. 163 This may also explain how acridine dyes penetrate the nucleus without staining the cytoplasm.

8. Chem. An arrangement of atoms, esp. a ring structure, characteristic of a number of organic compounds.

1845 W. GREGORY *Outl. Chem.: Org. Chem.* 512 Laurent considers benzole as in some measure the fundamental compound, or nucleus, and calls it phene. **1886** E. F. SMITH tr. *V. von Richter's Chem. Carbon Compounds* 465 The azo-group, N=N, decomposes, each nitrogen atom remaining attached as NH₂ to a benzene nucleus. **1932** *Jrnl. Chem. Soc.* 1132 Table III summarises the effect of varying the nature of the side-chain halogen in the compounds with an unsubstituted phenyl nucleus. **1951** I. L. FINAR *Org. Chem.* x. 185 If one acetic acid nucleus is blocked off, the fragment required is ethyl chloroacetate. **1971** *Nature* 7 May 25/1 Many psychoto-mimetic substances possess an indole nucleus.

9. A particle on which crystals, droplets, or bubbles can form in a fluid.

1857 MILLER *Elem. Chem., Org.* ii. §1 (1862) 90 Small pieces of wood are then introduced to act as nuclei upon which the crystals of lactose are deposited. **1886** *Proc. R. Soc. Edin.* XIII. 79 If this were the case, no nucleus would be absolutely requisite for the formation either of liquid from vapour or of vapour from liquid. **1906** [see *NUCLEATION*]. **1939** *Q. Jrnl. R. Meteorol. Soc.* LXV. 411 If supersaturation is attained the fogs may thicken considerably owing to the deposition of water on the sea-salt nuclei. **1952** *Industr. & Engin. Limnol.* I. ix. 583 In a free volume of water containing no minute masses of gas that can act as nuclei, an enormous excess tension is needed for bubble formation. **1967** [see *NUCLEATION*].

10. A small group of bees, including a queen, used as the foundation of a new colony.

1886 F. R. CHESHIRE *Bees & Bee-keeping* II. vii. 306 These small nuclei will sustain themselves, in average seasons. **1915** E. F. PHILLIPS *Beekeeping* iii. 39 A mere handful of bees (perhaps 200) may constitute a small colony (usually called a nucleus). **1952** H. MACE *Bee-Keeper's Handbk.* xxxiii. 154 Nucleus hives can be purchased or made, either to hold a single nucleus up to four combs, or two or more separate nuclei, separated by partitions. **1963** F. G. SMITH *Beekeeping* vii. 60 A nucleus is a very small colony of bees. It consists of a queen and up to four or six frames of brood and food, well covered with bees.

11. Physics. The positively charged central constituent of the atom, comprising nearly all its mass but occupying only a very small part of its volume and now known to be composed of protons and neutrons.

In Rutherford's 1911 paper called merely a 'central charge'. In the examples in the first paragraph *nucleus* is used for various speculative notions concerning the atom.

[**1844** FARADAY in *Phil. Mag.* XXIV. 141 If, in the ordinary view of atoms, we call the particle of matter away from the powers *a*, and the system of powers or forces in and around it *m*, then in Boscovitch's theory *a* disappears, or is a mere mathematical point... To my mind... the *a* or nucleus vanishes, and the substance consists of the powers or *m*. **1851** W. J. M. RANKINE in *Phil. Mag.* I. 443 The fundamental suppositions of the hypothesis of molecular vortices are the following:—*First*. That each atom of matter consists of a nucleus or central physical point enveloped by an elastic atmosphere, which is retained around it by attraction. *Ibid.*, If an indefinitely extended vibrating medium... consist of a system of atomic nuclei. **1900** *Rep. Brit. Assoc. Adv. Sci.* 1900 619 The material atom must be some kind of permanent nucleus that retains around itself an æthereal field of physical influence. *Ibid.*, If... the distances at which they [sc. atoms] are kept apart are large compared with the diameters of the atomic nuclei. **1903** O. LODGE *Mod. Views on Matter* 5 If the charge of electricity usually associated with a single monad atom of matter were concentrated on to a spherical nucleus one hundred-thousandth of an atom's dimension in diameter, it would thereby possess a mass about one-thousandth of that of the lightest atom known... Such a hypothetical concentrated unit of electricity it has become customary to call an 'electron'.]

1912 E. RUTHERFORD in *Phil. Mag.* XXIV. 461 In a previous paper [sc. *Phil. Mag.* (1911) XXI. 666] I have given reasons for believing that the atom consists of a positively charged nucleus of very small dimensions, surrounded by a distribution of electrons in rapid motion, possibly of rings of electrons rotating in one plane. **1919** *Conquest* I. i. 36/2 An atom is a sort of solar system in miniature, and comprises a central core or nucleus... and a number of particles, called corpuscles, circulating round the nucleus. **1942** J. D. STRANATHAN 'Particles' of *Mod. Physics* xi. 417 The nucleus must be very small, not larger than 10⁻¹² cm. **1955** C. G. DARWIN in W. Pauli *Niels Bohr* 6 In 1911 he [sc. Rutherford] tried the idea of a heavy central electric charge repelling the *α*-particle—it was I think several months before it was called the nucleus—and at once the whole theory of the nuclear atom emerged. **1962** H. D. BUSH *Atomic & Nuclear Physics* iii. 62 The hypothesis that every nucleus consisted of protons and neutrons, was first suggested by Heisenberg (1932).

12. a. Phonetics. The syllable of a word (spoken in isolation) that bears the primary

accent; in an utterance, the syllable or syllables given particular emphasis.

1922 H. E. PALMER *English Intonation* ii. 7 Each Tone-Group contains a Nucleus, which is the stressed syllable of the most prominent word in the Tone-Group. The nucleus corresponds to what is usually called sentence-stress. *Ibid.* 8 In Southern English there are four characteristic Nucleus Tones. **1924** — *Gram. Spoken Eng.* 6 If...tonetic transcription is used, the syllable ['] will be replaced by the appropriate nucleus-symbol. *Ibid.* 14 Instead of the rise taking place in the nucleus-syllable itself, it is distributed over the nucleus and tail. **1941** *Language* XVII. 224 The present study...will deal with junctures, stresses, and consonants only in summary, and then devote itself to the syllabic nuclei. **1942** *English Studies* XXIV. 157 In combinations of noun + adjective (like French master, black bird) the marking of the nucleus tone (i.e. the point at which the pitch begins to rise or fall) is an excellent device to bring home to students the two meanings such combinations may express. **1962** A. C. GIMSON *Introd. Pronunc. Eng.* x. 244 The primary accent (or accents) in a sentence is shown by initiating a change of pitch direction, with the nucleus (falling, rising, or a combination of the two) on the appropriate syllable of the word (or words) on which attention is particularly to be concentrated. **1962** S. STUBELIUS in F. Behre *Contrib. Eng. Syntax* 151 The main features of intonation, particularly whether the sentences studied had a falling or a rising end intonation (nucleus). **1973** *Archivum Linguisticum* IV. 21 Tonality, tonicity, and tone, which refer to the number of tone-groups, the location of the tonic, or nucleus, and the choice of tone used, respectively.

b. Linguistics. The main word or words in a combination, phrase, or sentence; also = KERNEL *sb.* 1 8 b.

1934 [see DETERMINANT *a.* and *sb.* B. 2 c]. **1949** E. A. NIDA *Morphol.* (ed. 2) 83 The nucleus of a morphological construction consists of (1) a root or (2) a combination of roots... The nonnucleus is made up of nonroots. In the construction *boyishness* the element *boy* is the nucleus and *-ishness* constitutes the nonnucleus. **1961** R. B. LONG *Sentence & its Parts* i. 20 Isolates sometimes take adjunct modifiers, much as nucleuses do. *Ibid.* 497 Nucleuses, minimal sequences made up of subjects, predicates, and complements, or of such of these as occur... In *come in!* the nucleus is made up of the predicator *come* and the complement *in*. **1961** Y. OLSSON *Syntax Eng. Verb* iv. 77 The relationship between a group of nuclei (like *London*, etc.) and equivalent members of the paradigms based on them (like *London-er*, etc.) give rise to an expectancy which may or may not be met in the same way. **1968** J. LYONS *Introd. Theoretical Linguistics* viii. 334 The subject and the predicate together form the nucleus of the sentence.

Hence 'nucleus *v. trans.*, to make into a nucleus, to concentrate.

1899 KIPLING *Stalky* 252 They'd withdrawn all the troops they could, but I nucleused about forty Pathans.

nuclide ('nju:klaid). *Nuclear Physics.* [f. NUCLEUS *sb.* + *-ide* (f. Gr. *εἶδος* form, kind).] A particular kind of atom, as defined by the number of protons and the number of neutrons in the nucleus.

Synonymous with ISOTOPE in its broader sense, which the introduction of *nuclide* was intended to discourage in favour of the original stricter meaning of that word.

1947 T. P. KOHMAN in *Amer. J. Nat. Sci.* XV. 356/2 There is at present no word in the English language to express the concept of a particular species of atom, differing from all others in the constitution of its nucleus... *Nuclear species* and the German *Kernsorte*...refer to nuclei rather than to atoms... In recent years the word *isotope* has come into use for this purpose, less by design than by default... Evidently a new word is required, and *nuclide* is proposed... The new word and its derivatives should be used in such expressions as 'stable nuclides' and 'nuclidic weight'. **1955** R. D. EVANS *Atomic Nucleus* xvi. 522 Because it is the only naturally occurring nuclide which undergoes fission by slow neutrons, U²³⁵ has attained international fame even in lay circles. **1957** *Technology* June 139/3 β and γ ionization chambers for secondary standardisation of radioactive nuclides have been designed. **1961** G. R. CHOPPIN *Exper. Nuclear Chem.* 215 Na²², Na²³, and Na²⁴ are all isotopes of sodium... Na²² and C¹⁴ are nuclides but are not isotopic to each other. **1967** *Guardian* 17 May 3/2 There was less Strontium-90 and Caesium-137 in milk last year... Levels of both nuclides were lower than at any time since 1962. **1971** *Daily Colonist* (Victoria, B.C.) 9 July 9/3 The nuclear explosive was designed to reduce the amount of residual tritium, a radioactive nuclide.

1947 [see above]. **1955** R. D. EVANS *Atomic Nucleus* xvi. 519 In order to identify the new artificial nuclides, it was logical and essential to utilize the usual nuclidic notation, for example, ⁸³Bi²¹³. **1962** *Nature* 19 May 621/2 Modern methods make possible much more exact measurements of nuclidic masses. *Ibid.*, The atomic physicist is usually concerned with individual nuclidic species—the differences in their nuclear characteristics and the nuclear, as opposed to chemical, changes they undergo. **1973** J. YARWOOD *Atomic & Nuclear Physics* xv. 429 A useful method of correlating data about the nuclides is to plot a nuclidic chart of N, the number of neutrons in the nucleus, against Z, the atomic number.

nue, obs. form of NEW a.

||nuée ardente (nye ardât). *Geol.* Pl. nuées ardentes. [Fr., lit. 'burning cloud'.]

Introduced by A. Lacroix 1903, in *Compt. Rend.* CXXXVI. 874. In *La Montagne Pelée et ses Eruptions* (1904) 170 Lacroix says that he has since realised that the expression had earlier been used by the inhabitants of San Jorge in the Azores. He also says that by *ardent* he implies *brulant* 'burning' rather than *incandescent* 'glowing'. However the expression *nuée ardente* is usually rendered into English as 'glowing cloud' rather than 'burning cloud'.]

A hot, dense cloud of ash and fragmented lava suspended in a mass of gas, which typically is ejected laterally from the side of the dome of certain volcanoes (as Mount Pelée) and flows downhill at great speed like an avalanche. Also ellipt. nuée.

1904 A. HEILPRIN *Tower of Pelée* iv. 47 Professor Lacroix... refers to a number of discharges of the *nuée ardente* breaking out laterally from the base of the obelisk surmounting the crater-cone. 1912 *Amer. Jnrl. Rev.* I. 158 Large acid sheets might have a *nuée* origin. 1969 *Nature* 29 Nov. 864/1 Natural terrestrial examples of fluidized systems include certain quicksands... and the volcanic eruptions known as *nuées ardentes*. 1969 BENNISON & WRIGHT *Geol. Hist. Brit. Isles* v. 94 The ignimbrites... are the product of *nuées ardentes*—the fiery cloud of lava and gas which occurs when lavas are silica rich and viscous. 1972 G. A. MACDONALD *Volcanoes* viii. 146 The cloud was the conspicuous feature and led Lacroix to give the name 'nuée ardente' (glowing cloud)... The name 'glowing cloud' seems, therefore, to give too much emphasis to a relatively minor feature, and many volcanologists today prefer to call the phenomenon a glowing avalanche.

c. *Math.* and *Logic*. Of a class or set: having no members. Of a propositional function or relation: always false; having the null class as its range.

1903 B. RUSSELL *Princ. Math.* ii. 22 A propositional function is said to be null when it is false for all values of x; and the class of x's satisfying the function is called the null-class, being in fact a class of no terms. 1906 W. H. & G. C. YOUNG *Theory of Sets of Points* 288 The null-set. . contains no point. 1932 LEWIS & LANGFORD *Symbolic Logic* vii. 208 The universal function is expressible as $p \vee \sim p$. The null-function is the negative of this. 1941 O. HELMER tr. *Tarski's Introd. Logic* v. 90 We have . . in the calculus of relations two special relations, the universal relation \vee and the null relation \wedge , the first of which holds between any two individuals, and the second between none. 1948 AMBROSE & LAZEROWITZ *Fund. Symbolic Logic* x. 215 To say that a class is null, or empty, is the same as saying that there are no values satisfying its defining function. 1955 [see DOMAIN sb. 4 f]. 1956 A. CHURCH *Introd. Math. Logic* (rev. ed.) I. 31 If the range is given, . . there is only one null class. But, e.g., the range of the null class associated with the form $\sin x = 2$ and the range of the null class associated with the form $\epsilon < 0$ are not the same. . . We shall speak respectively of the 'null class of real numbers' and of the 'null class of positive real numbers'. 1966 S. BEER *Decision & Control* vi. 107 This does not matter; it simply means that the complementary set has no elements—and this is called a null set.

d. *Physics*. Existing between or joining points in space-time between which the interval is zero; *null cone* = *light cone* s.v. LIGHT sb. 16.

1928 *Phil. Mag.* V. 242 A null-surface is defined as an envelope of null-cones, . . while the characteristic lines on a null-surface prove to be geodesic null-lines. *Ibid.*, The history of a light wave in space-time is a null-surface. 1942 SYNGE & GRIFFITH *Princ. Mech.* xvi. 475 A null line represents the history of a flash of light traveling along the axis Ox of a Galilean frame. 1959 J. AHARONI *Special Theory of Relativity* i. 25 An interval ds between two events can be either real, zero, or imaginary. . . In the first case the interval is called space-like, in the second case a null-interval, and in the third case time-like. 1968 T. C. BRADBURY *Theoret. Mech.* xiii. 589 If the four-vector joins O and C, then $r^2 - c^2t^2 = r'^2 - c^2t'^2 = 0$. Such a vector is a null vector. Events separated by null vectors can be joined by light signals; in fact, the light cone is frequently called the null cone. 1972 J. EHLERS et al. in L. O'Riada *Gen. Relativity* iv. 75 In a normal hyperbolic Riemannian manifold, the distinction between the interior and exterior of the null cone N_p of a point p can locally be defined by means of the sign of the world function $\Omega(p, q)$, for q near p .

e. Statistics. *null hypothesis*, a hypothesis that is the subject of a significance test, esp. the hypothesis that there is no difference between specified populations (any apparent difference being due to sampling or experimental error).

1935 R. A. FISHER *Design of Experiments* ii. 19 The two classes of results which are distinguished by our test of significance are . . those which show a significant discrepancy from a certain hypothesis; namely, in this case, the hypothesis that the judgements given are in no way influenced by the order in which the ingredients have been added; and . . results which show no significant discrepancy from this hypothesis. This hypothesis. . is again characteristic of all experimentation. . . We may speak of this hypothesis as the 'null hypothesis', and it should be noted that the null hypothesis is never proved or established, but is possibly disproved, in the course of experimentation. 1973 *Jrnl. Genetic Psychol.* CXXIII. 86 The specific null hypotheses tested were as follows: 1. There were no differences in hostile press (fear of failure) score decreases between self-reinforcement, group therapy, and control groups. 2. Hostile press scores do not decrease significantly during the self-reinforcement condition. [Etc.] 1975 *Nature* 20 Feb. 607/1 The evidence. . for positive selection directing the evolution of early vertebrate haemoglobin is supported by a χ^2 test, performed to test the null hypothesis that sites where mutations produced acquired crucial functions did not evolve at a different rate from all other sites.

5. Passing into sb.: A condition of no signal; also, a direction in which no radiation is detected or emitted. *Freq. attrib.*

1926 *Bell Syst. Techn. Jrnl.* V. 295 The number of lobes is, of course, equal to the number of null directions. 1931 *Proc. IRE* XXXI. 1426 The nulls and maxima. . have been plotted in Fig. 16 for an element length of four wavelengths. *Ibid.* 1427 Figs. 15 and 16. . give the null points. These are seen to be 0, 30, and 90 degrees in Fig. 15. 1931 MOYER & WOSTREL *Radio Handbk.* xii. 601 A direct-current galvanometer, protected by a suitable shunt, is used as a null indicator. 1958 CONDON & ODISHAW *Handbk. Physics* iv. v. 66/2 Null determinations in d-c measurements are almost invariably made with a D'Arsonval-type galvanometer. 1962 *Newnes Conc. Encycl. Electr. Engin.* 94/2 The precision of a bridge measurement depends on the sensitivity of the null detector. 1968 M. WOODHOUSE *Rock Baby* xv. 150, I set up the loop of the D.F. set and plugged in the headset. When the signal came . . I got a clear null a little west of due

south. 1973 J. HULBERT *All About Navigating* vii. 96 It is much easier to pick out the softest point than the loudest point and so a null is used for direction finding. 1975 *Gramophone* Oct. 734/3 The many nulls and lobes beyond these angles are not too important, and are due to the interaction of the radiator with its housing and the corners of the cabinet.

1935 KRAEMER & LANSING in *Jrnl. Physical Chem.* XXXIX. 165 For heterogeneous materials, different

methods for determining molecular weights give different 'average' values. Thus, it may be shown that freezing point, osmotic pressure, and end-group methods, when applied properly to an ideal mixture, result in an average value defined by the expression $M_n = 1/\Sigma (f_i/M_i)$ where f_i is the fractional weight of the constituent of molecular weight M_i in the mixture, and the summation is to be applied to all constituents present. This average may be designated as a '*number-average molecular weight'. **1955** *Jrnl. nylon ('nailn). Also Nylon. [Invented word, with -*on* suggested by *rayon*, *cotton*.

There is no evidence to support the derivations freq. given for this word in popular sources. Cf. the following quot.: **1940** *Women's Wear Daily* 9 Feb. 22 The du Pont letter, written by John W. Eckelberry, covers the general status of nylon as follows: 'The word is a generic word coined by the du Pont Co. It is not a registered name or trademark. . . We wish to emphasize the following additional points: First, that the letters n-y-l-o-n have absolutely no significance, etymologically or otherwise. . . Because the names of two textile fibers in common use—namely 'cotton' and 'rayon', end with letters 'on'. . . it was felt that a word ending in 'on' might be desirable. A number of words. . . were rejected because it was found they were not sufficiently distinct from words found in the dictionary, or in lists of classified trademarks. After much deliberation, the term 'nylon' was finally adopted.'

1. 1938 *N. Y. Times* 28 Oct. 34/3 'Nylon' is a generic name, coined by the du Pont chemists, to designate all materials defined scientifically as 'synthetic fiber-forming polymeric amides having a protein-like chemical structure; derivable from coal, air and water, or other substances, and characterized by extreme toughness and strength and the peculiar ability to be formed into fibers and into various shapes, such as bristles and sheets'. **1940** *Times* 21 Mar. 5/5 Imperial Chemical Industries, Limited, announce that progress is being made in the erection of three factories for the manufacture of nylon in England. **1942** *Industr. & Engin. O

O (əʊ), the fifteenth letter of the alphabet in English and other modern languages, and the fourth vowel letter. **O** was the fourteenth letter in the ancient Roman alphabet, corresponding in form and value to the ancient Greek **O**, derived from the sixteenth letter of the Phœnician and ancient Semitic alphabet, **ʕ**, **ʕ**, **ʕ** (Heb. **ע**), called *ʕain*, i.e. 'eye'. The latter represented a peculiar articulation or consonant, the 'glottal catch' (modern Arabic **ع**, **ʕ**, a sound unknown to Greek, in which the symbol was appropriated to the vowel *o* (which the sound of Semitic *ʕain* in conjunction with *a* may have somewhat resembled). In early Greek, **O** was used for both short and long *o*; subsequently a new symbol **Ω**, **ω** (*O méga*, 'great **O**'), was added to the alphabet to distinguish long open *ō*; the original **O** *o* (now known as *O micrón*, 'little **O**') being then restricted to short *o*. From Greek times downward, this letter has regularly represented some variety or varieties of the 'mid-back-round' (or labial) vowel of Bell's Visible Speech scale. On account of its intermediate position, this vowel is (like *e*) liable to considerable variations of quality; and many languages distinguish, as practically different vowels, 'close' (or 'narrow') (*o*), and 'open' (or 'wide') (*ɔ*); the former tending to approach, and at length to pass into, the still closer sounds (*u*), (*ʊ*); the latter tending to fall into the still opener (*ɒ*).

In OE., short *o* and long *ó* were etymologically and phonetically distinct. Short *o* was originally both close and open. Short close *o* was normally derived from an original *u*, as in OE. *oxa* *ox*, Skr. *ukshán*, OE. *dohtor*, Gr. *θυγάτηρ*, Indo-European **dhughatér*. Short open *o* normally represented an earlier *a* before a nasal, as in OE. *on*, Goth. *ana*, Gr. *ἀνά*. This OE. *o* from *a(n)* is often distinguished for etymological purposes as *o*. OE. long *ó* corresponded generally to Com. Teut. long *ō*, in which were combined Indo-European *ō* and *ā*, as in OE. *bóc* *beech*, OTeut. **bōkā*, Dor. Gr. *φᾶγος*, L. *fāgus*; OE. *flód*, Goth. *flōdus*, Gr. *πλωτός* *swimming*. Long *ó* also arose out of a lengthening of short open *o* from *a(n)*, with *n* absorbed, as in *tōð* *tooth*, OTeut. **tanþ-*, Indo-Eur. **dōnt-*; *hón* *to hang*, OHG. and Goth. *hāhan* from OTeut. **hanþ-*, *χαηχ-*. Long *ó* was prob. originally both close and open, but in late OE. it must, from its subsequent history, have been close. In unstressed syllables, *o* was the ordinary OE. representative of the obscure vowel (*ə*); and in this capacity it often varied with *a*, *e*, *u*.

In the Middle English period the distinction between open and close short *o* is no longer discernible; and the vowel was apparently always open *o* before a consonant in the accented syllable. Of long *ō* ME. had two distinct sounds, open and close. Open *ō* was the normal representative (in midland and southern speech) of OE. long *á* (or lengthened *a*), which passed through the sound of (*ɔ*:) to that of (*ɔ*:), being sometimes written in the 13th c. *oa*, but, eventually, simply *o*, or *oo*: thus OE. *māre*, *nān*, *ald* (*eald*), ME. *moare*, *noan* (1257), *more*, *non*, *old*. It often represented long *ō* derived from Fr. or L., or arose out of an earlier short *o* in an open syllable, as OE. *hopa*, ME. *hōpe*. ME. close *ō* represented OE. *ó*. This *ō* must have been a very close sound, for about the end of the ME. or beginning of the mod. Eng. period it passed into the sound of (*u*:), usually with the spelling *oo*, though sometimes with the simple *o* spelling, as in the words *do*, *to*, *lose*. ME. open *ō* either continued into mod. Eng. as *o* (*bone*, *ore*, *hope*), or was, from 16th c., written *oa* (*oak*, *oar*, *coal*); but in sound it became at length close and quasi-diphthongal (*ou*) (now in southern British pronunciation usually (*əʊ*)), except before *r*, where it remains open (*ɔə*) (now usually (*ɔ*:)). In the 13th c., *o* began to be written in certain cases for *u*, esp. before *m*, *n*, *u* (= *v*), as in *some*, *son*, *loue* (= *love*), OE. *sum*, *sunu*, *lufu*. This, which

has largely survived into mod. E., was merely a *graphic*, not a *phonetic*, change.

The normal sound of short *o* is now (*ɒ*), low-back-round; but it frequently stands for (*ʌ*), as in *son*, *doth*, or (*ɜ*:), as in *word*; and in unaccented syllables sinks to (*ə*), as in *nation*. When original short *o* comes before *r* final, or *r* + consonant, as in *or*, *for*, *corn*, *sort*, it is now lengthened into the corresponding long sound (*ɔ*:) (*ɔ*:(r), *ʃ*:(r), *k*:n, *s*:t). A still more recent lengthening of *ō* often took place during the 19th century in southern English before certain consonants, as in *cross*, *off*, *moth*, *soft*; having never become general in standard English, it is here recorded as a variant (*ɔ*:) in the pronunciation of those words it affected.

The normal sound of long *ō*, as in *no*, *toe*, *bone*, is the quasi- or imperfect diphthong (*əʊ*); but before *r*, as in *bore*, *choral*, *story*, the sound is that of the open quasi-diphthong (*ɔə*). In London and the south of England, this *ō*, esp. when *r* follows in the same syllable, as in *ore*, *worn*, *porter*, is usually identified with the (*ɔ*:) mentioned above as arising from ME. short *o* before *r*. This is not the case, however, in the educated speech of the country as a whole, nor in America, and the sounds are still separated by most orthoepists (see Ellis, *E.E. Pronunciation*, I. 94-95), and in dictionaries generally; they are distinguished in this dictionary, as in *boarder*, *border* ('*bɔədə(r)*'), ('*bɔ:də(r)*'), *mourn*, *morn* (*mɔən*), (*mɔ:n*).

Hence, in modern English, the normal sounds of *o* are

1. (*əʊ*) in *no*, *bone* (*nəʊ*, *bəʊn*)
2. (*ɔə*) " *ore*, *glory* (*ɔə(r)*, '*glɔəri*)
3. (*ɔ*:) " *or*, *north* (*ɔ*:(r), *nɔ:θ*)
4. (*ɒ*) " *rob*, *got* (*rɒb*, *gɒt*)

Exceptional sounds, due to special causes, and normally spelt otherwise, are

5. (*u*:/*ʊ*) in *to do* (*tʊ du*:)
6. (*ʌ*) " *son*, *other* (*sʌn*, '*ʌðə(r)*)
7. (*ɜ*:) " *word*, *worthy* (*wɜ:d*, '*wɜ:ði*)

No. 1 is also represented by *oa*, *oe* (final), *ou*, *ow*, *oh*, rarely *oo*; as in *load*, *hoe*, *soul*, *low*, *oh*, *brooch*.

No. 2, by *oa*, *ou*, *ow*, rarely *oo*; as in *boar*, *pour*, *Gower*, *door*, *floor*. In *broad*, *oa* has the sound (*ɔ*:).

The combination *oo* now normally represents long (*u*:), diphthongal (*əʊ*), short (*ʊ*), as in *moon*, *moor*, *good*; exceptionally, it has the sound of 'short *u*' (*ʌ*), as in *blood*, *flood*, or of 'long *o*' = Nos. 1 and 2 above.

Oi, *oy*, normally represent a true diphthong (*ɔi*), as *boil*, *boy*; or an imperfect triphthong, as in *Moir* (*mɔɪə(r)*).

Ou, *ow*, also normally represent a diphthong (*əʊ*), as in *out*, *house*, *now*, or an imperfect triphthong, as in *hour* (*əʊə*). But *ou* has also various other sounds, as in *soup*, *tour*, *through*, *you*; *soul*, *pour*; *brought*, *cough*, *enough*; in unstressed final syllables it is commonly (*ə*), as in *favour*, *pious*.

In unaccented syllables, all the sounds of *o* are liable to shortening and obscuration, and tend to sink to (*ə*), as in *tobacco*, *anatomy*, *dilatory*, *sailor*, *comfort*, *cannot*, *parrot*, *notion*, *random*.

The change of OE. *á* to *ō* in ME. was a characteristic of the southern and midland dialects, and thus of Standard English. But the northern dialects retained *a*, the presence of which instead of *o*, as in *stane*, *hame*, *mare* = *stone*, *home*, *more*, is one of the most distinctive features of northern English and Scotch. In later times this *a* is often written *ai*, or *ae*, and narrowed to *ea*, *e*, *ee* (*ē*, *e*, *ī*, *i*:). The change of OE. *ó* to (*u*:), *u*, is also proper to Standard English and its related dialects, the sound having become in Scotch one akin to German *ö* and *ü*, or Fr. *eu* and *u*. This, like the English (*u*:), *u* sound, is often written *oo*, but more distinctively *u* or *ui*, as in Eng. *good*, Sc. *good*, *gude*, *guid*. The northern dialects also retain the earlier (*u*:) for English (*əʊ*); this is often written in Scotch, as in ME., *ou*, *ow*; but in modern times sometimes *oo*, as in *coo*, *about* = *cow*, *about*.

The fancy, frequent in authors of the 16th and 17th c., that the shape of the letter **O** represented the rounded form of the mouth in forming the sound, is seen from the history of the letter to be without foundation in fact.

5. 1926 LANDSTEINER & WITT in *Jrnl. Immunol.* XI. 242 It has been pointed out by one of the writers... that the isoagglutinin reactions of human blood can be possibly explained by the simple assumption of only two different agglutinogens and agglutinins. Designating these by *a* and *β*, and the agglutinogens by **A** and **B**, the following symbols are obtained for the blood groups: I-*a*, *β*; II *A*, *β*; III *B*, *α*; IV *A*, *B*-; if we include the factors *A*¹ and *a*¹ in the scheme, and if **O** and *o* signify the absence of agglutinogens or agglutinins, then the signs are: I *O* *a*, *β*, *a*¹; II *A*, *β*, and *A*¹, *β*; III *B*, *a*, *a*¹; IV *A*, *B*, *o*. 1927 [see *A* II. 7]. 1929 L. H. SNYDER *Blood Grouping* i. 3 To try to obviate the confusion still existing from a reversal of groups I and IV in the two systems, a new system of nomenclature, based on the agglutinophyllic [*sic*] capacity of the cells, has been suggested. In this system, Jansky's group IV is known as *AB*, having the two agglutinogens **A** and **B**. Group III, containing agglutinin **B**, is known as group *B*, group II as group *A*, and group I, containing neither agglutinin, as group *O*. 1948 C. C. STURGIS *Hematol.* xxiii. 825 These characteristics in the erythrocytes may be present singly or together, or they can be absent. -o, suffix¹ of combining forms of words. On the analogy of Greek combinations (in which the combining stem usually ended in -o, as thematic vowel or its representative, or as an addition to a consonant stem), and their adaptations and imitations in Latin, late and mediæval, like *Syrophœnix*, *Gallogræci*, *Gallohispani*, *Anglosaxonicus*, etc., -o- has come to be, in modern Latin and in English, the usual connecting vowel in combinations, not merely in ethnic names as *Anglo-Saxon*, *Anglo-Indian*, *Indo-European*, etc., but in scientific terms generally; it is affixed, not only to terms of Greek origin, but also to those derived from Latin (Latin compounds of which would have been formed with the L. connecting or reduced thematic vowel, -i), especially when compounds are wanted with a sense that Latin composition, even if possible, would not warrant, but which would be authorized by the principles of Greek composition. Such are *concavo-*, *convexo-*, *cymbo-*, *dolicho-*, *oblongo-*, *ovato-*, *chloro-*, *iodo-*, *cirrho-*, *cumulo-*, *occipito-*, *pneumo-*, *dramatico-*, *economico-*, *historico-*, *politico-*, *joco-*, *serio-*, etc.

1. The primary and etymological function of a combining form in -o is to qualify adverbially the adj. to which it is prefixed; as, in Gr., λευκό-χλωρος 'whitely green', pale green; mod.L.

ovato-cordatus 'ovately heart-shaped', cordate with ovate modification; *Anglo-Norman*, Norman as modified in England. Such a comb. is, as it were, the adj. with adverbial qualification, belonging to a sb. with adj. qualification; thus, as to the qualified sb. *steady industry* (adj. + sb.) the corresponding qualified adj. is *steadily industrious* (adv. + adj.), so to *political economy* the corresponding adj. is *politico-economic*. Lord Campbell has used *lego-literary* in the sense 'pertaining to legal literature'.

2. But the use of these forms has been extended, so as to express, as by a kind of abbreviation, almost any manner of relation between the two components. *Anglo-French*, originally 'French of an English sort', 'French as established or spoken in England', is sometimes taken with the converse meaning of 'English settled in France', and commonly with that of 'English in alliance, conjunction, or partnership with French'; so *Franco-German* may even mean 'French in conflict with German', *Græco-Latin* 'common to Greek and Latin'; *pneumo-gastric*, 'communicating with both lungs and stomach'; *occipito-frontal*, 'reaching from occiput to forehead', or connecting these parts; *occipito-temporo-parietal*, 'including the occipital, temporal, and parietal (lobes of the brain)'; *gramino-carnivorous*, 'feeding on grass as well as flesh'.

3. This -o is used also, on Greek analogies, in word-formation. From its regular appearance before certain suffixal elements, as -cracy, -graphy, -logy, -meter, it tends to be treated practically as a part of these elements; hence, such expressions as 'the bureau-ocracy, shop-ocracy, trade-ocracy, and other -ocracies', 'a professor of all the -ologies', 'the last new -ology', 'galvanometers, lactometers, and other -ometers without number'.

-o, suffix². Perh. connected with *O int.* 3 and reinforced by the final syllable of abbrev. forms such as COMPO, HIPPO, PHOTO, etc. The use of the suffix is widespread in English-speaking countries but nowhere more so than in Australia (e.g. *afto*, *ARVO*, *COMMO*, etc.).

2. In English versions of the Bible, used also to render Heb. *ēlāh*, and one or two related words, now generally considered, since Gesenius, to mean the terebinth tree.

Five Heb. words have been rendered 'oak'; of which only two, *allōn* and *allāh*, are held to have certainly this meaning. The word *ēlāh* is in the LXX and Vulg. sometimes rendered *τερεβινθος* -*μυθος*, *terebinthus*, but in neither case regularly; Wyclif follows the Vulgate; the 16-17th c. versions have regularly 'oak'; the Revised Version has 'terebinth' in Isa. vi. 13 (1611 *teill tree*), Hos. iv. 13 (1611 *elm*), but elsewhere retains 'oak' with 'or terebinth' in the margin.

Oat differs from other names of cereals, ancient or modern, as *wheat*, *barley* (*bigg*, *beer*), *rye*, *rice*, *maize*, *millet*, and from its own synonym *haver*, in that, while these are (like *dust*, *sand*, *snow*), names of *substances* or *things* in the *mass*, the collective form of which is singular, they having in ordinary language no plural, *oat* is an individual singular, the collective or mass sense of which has to be expressed by the plural, e.g. 'Is the crop rye or oats?', 'wheat, barley, and oats are cereals'. Comparing this with *beans*, *peasens*, *potatoes*, and other names of similar grammatical form, it may be inferred that primarily *oat* was not the plant or its produce in the mass, but denoted an individual grain; cf. *groat* with its collective pl. *groats*. This may point to oats being eaten originally in the grains, not, like wheat and barley, in the form of meal or flour. But the scanty early evidence is not sufficient to show this.]

ob-, *pref.* The Lat. prep. *ob* 'in the direction of, towards, against, in the way of, in front of, in view of, on account of'. In combination with vbs. and their derivatives, the *b* is assimilated to certain consonants, becoming *oc-* before *c-*, *of-* before *f-*, *op-* before *p-*, and app. *o-* before *m-* (in *omittère*). In combination it has the following senses: a. In the direction of, towards; facing, in front of; as *obvertère* to turn towards, *obædire* to listen to. b. Against, in opposition, as *occurrère* to run against, *oppônère* to place against; often merely implying the injurious or objectionable character of an action. c. Upon or over; down upon, down; as *obducère* to draw upon or over, *obligare* to bind down, *occidère* to fall down. d. Completely; sometimes pleonastic, as *obdulcære* to sweeten (completely), *obdurære* to harden greatly; often with a colouring of sense a.

In English use, *ob-* (*oc-*, *of-*, *op-*, *o-*) occurs.

1. In combinations already formed in Latin in the senses above-mentioned; rarely in words formed in Eng. itself on Latin elements; e.g. a. *obedience*, *obversion*; b. *object*, *occur*, *opponent*, *opposite*; c. *obduce*, *occident*; d. *obdulcorate*, *obdurate*.

2. In mod. scientific Latin, and hence in Eng., in Botany, etc., *ob-* is prefixed to adjs. in the sense 'inversely', or 'in the opposite direction'; e.g. *obcordatus* (Linnæus), *obcordate*, i.e. cordate with the base or broad end presented; *obovate*, ovate or egg-shaped with the wider end presented; *obtriangular*, triangular with the apex downward. See below OBCLAVATE to OBTURBATE.

This is not an ancient L. use, where *ob-* was rarely combined with an adj., the chief example being *oblongus* OBLONG, which could hardly be in sense the model for these words. Apparently the prefix represents the *ob-* of the adv. *obversè* OBERSELY, and is an abridged representation of that word.

F. *obéir*:—L. *obēdire*, orig. *obādīre* to give ear, hearken, obey f. *ob-* (OB- 1a) + *audīre* to hear. Certain parts of the F. verb (e.g. pr. pple. *obéissant*, 3 pl. pres. *ils obéissent*) have the lengthened stem *obéiss-* (L. type **obēdisc-ēre*), whence the Eng. secondary verb OBEISH, OBEIS, as well as OBEISANCE, etc.

F. *obéir*, like L. *obēdire*, is an intransitive verb, construed with a dative pronoun, or the prep. *à*: *je lui obéis*; *nous obéissons au roi, aux lois*. When the vb. was taken into Eng., the dative and accusative were already levelled under the common object case, or objective; hence, the Eng. construction was either with a simple object, representing the dative, or with the preposition *to*, the vb. being thus syntactically, either trans. or intr. in the same sense. The const. with *to* has now become obsolete, and that with the simple object survived; an intrans. use, e.g. 'to obey is better than sacrifice', is now felt as an absolute use of the transitive. The trans. construction is here taken first, but it is to be remembered that the object was orig. a dative.]

6. *Metaph.* A thing or being of which one thinks or has cognition, as correlative to the

thinking or knowing *subject*; something external, or regarded as external, to the mind; the non-ego as related to, or distinguished from, the ego; also extended to include states of the ego, or of consciousness, as thought of or mentally perceived. (Cf. **OBJECTIVE** A. 2 b.)

7. *Gram.* A substantive word, phrase, or clause, immediately dependent on, or 'governed by', a verb, as expressing, in the case of a verb of action, the person or thing to which the action is directed, or on which it is exerted. Also, the word dependent on or 'governed by' a preposition, indicating that to which the preposition expresses a relation.

direct object of a verb: the word, etc., denoting that which is directly affected by the action (commonly expressed by the accusative, or case of direction *to*, in Latin and other languages); the word 'governed' by a transitive verb. So *indirect object* of a (transitive or intransitive) verb (commonly expressed by the dative case in Latin, etc.): see **INDIRECT** 3 c. *object clause*, a clause or subordinate sentence forming the object of a verb, as in 'we know (that) he is alive'. Also *object-case* = **ACCUSATIVE** a. 1; *object complement*, a word, usu. a noun or adjective, which complements the object of a verb, expressing the state or condition of the object at the time of, or resulting from, the action; cf. *objective complement*; *object-pronoun*, a pronoun, esp. a relative pronoun, which is the object of a verb or which introduces an object clause.

[1727-41 CHAMBERS *Cycl. s.v. Verb*, Verb Neuter, is that which signifies an action that has no particular object whereon to fall; but which, of itself, takes up the whole idea of the action.] a1729 CLARKE (J.), The accusative after a verb transitive, or a sentence in room thereof, is called, by grammarians, the object of the verb. [1824 L. MURRAY *Eng. Gram.* (ed. 5) I. 267 Verbs neuter do not act upon, or govern, nouns and pronouns. . . Gram.* (ed. 24) §369 The Direct Object denotes—(a) the Passive Object, or that which suffers or receives the action denoted by the verb. . . Syntax* 92 The large majority of verbs took the Accusative as Object, and thus there was a tendency for the Accusative to become the universal Object-case. 1906 G. R. CARPENTER *Eng. Gram.* II. 25 An object complement is a noun or adjective completing the meaning of a transitive verb. 1927 E. A. SONNENSCHNID *Soil of Grammar* 10 There is no ambiguity in sentences like the following, though the object-case has the same *form* as the subject-case: 'the lion beat the unicorn'. 1957 R. W. ZANDVOORT *Handbk. Eng. Gram.* III. vi. 165 *What* . . . may introduce a subject clause, an object clause. 1960 T. F. MUSTANOJA *M.E. Syntax* I. 205 Non-expression of the object-pronoun in a relative clause has not been attested in OE. 1963 F. T. VISSER *Hist. Syntax Eng. Lang.* I. iv. 550 Since these added adjectives or nouns do not affect the meaning of the verb, but are merely adjuncts to the object the term 'object complement' or 'objective complement' . . . seems preferable to the appellation 'predicative adjunct'. 1964 *English Studies* XLV. 386 The rapidly developing 'periphrastic genitive', in which object-case pronouns *h-r* and *h-m* (after *of*) contrasted. 1966 *Ibid.* XLVII. 55 Of special importance is the absence of the relative object-pronoun (e.g. *The spirits I have raised* abandon me), one of the most frequent idioms in coll. English. *Ibid.* 253 A third argument against calling the *that*-clause an object clause is that it lacks the noun characteristic of forming prepositional adjuncts.

Aristotle's first mover is not properly the efficient, but only the final and objective cause, of the heavenly motions.

2. *Philos.* Used of the existence or nature of a thing as an object of consciousness (as distinguished from an existence or nature termed *subjective*).

The Scholastic Philosophy made the distinction between what belongs to things subjectively (*subjectivē*), or as they are 'in themselves', and what belongs to them objectively (*objectivē*), as they are presented to consciousness. In later times the custom of considering the perceiving or thinking consciousness as pre-eminently 'the subject' brought about a different use of these words, which now prevails in philosophical language. According to this, what is considered as belonging to the perceiving or thinking self is called *subjective*, and what is considered as independent of the perceiving or thinking self is called in contrast *objective*. As to this transition of use (which primarily concerns the word *subjective*, and affects *objective* as its antithesis) resulting in what is almost an exchange of sense between the two adjectives, see HAMILTON *Reid's Wks.* 806 note, R. L. NETTLESHIP *Philos. Lect. & Remains* I. 193.

† **a.** Opposed to *subjective* in the older sense = 'in itself': Existing as an object of consciousness as distinct from having any real existence; considered only as presented to the mind (not as it is, or may be, in itself or its own nature). *Obs.*

The esse, or existence of such thing is said to be objective. **1744** BERKELEY *Siris* §292 Natural phenomena are only natural appearances. They are, therefore, such as we see and perceive them: Their real and objective natures are, therefore, the same.

b. Opposed to *subjective* in the modern sense: That is or belongs to what is presented to consciousness, as opposed to the consciousness itself; that is the object of perception or thought, as distinct from the perceiving or thinking subject; hence, that is, or has the character of being, a 'thing' external to the mind; real.

This sense is occasional in writers of the later 17th and early 18th c. (the early examples being more or less transitional); but its current use appears to be derived from Kant, and to appear in Eng. subsequently to 1790, and chiefly after 1817 (see quot. from Coleridge).

objective correlative. [f. OBJECTIVE *a.* 2b + CORRELATIVE *sb.* 1.] Term applied by T. S. Eliot to the technique in art of representing or evoking a particular emotion by the presentation of physical symbols of it, as surroundings, situations, sets of objects, etc., which become indicative of that emotion and are associated with it.

[1850 W. ALLSTON *Lect. Art. & Poems* 16 No possible modification in the degrees or proportion of these elements [sc. air, earth, heat, water] can change the specific form of a plant... So, too, is the external world to the mind; which needs, also, as the condition of its manifestation, its objective correlative.] 1919 T. S. ELIOT in *Athenæum* 26 Sept. 941/1 The only way of expressing emotion in the form of art is by finding an 'objective correlative'; in other words, a set of objects, a situation, a chain of events which shall be the formula of that particular emotion; such that when the external facts, which must terminate in sensory experience, are given, the emotion is immediately evoked. 1946 *Sevane Rev.* LIV. 301 In that Eliot proposes the objective correlative, 'he accepts with the vast majority of his contemporaries the modern dogma that the artist is primarily concerned with emotion'. 1947 T. S. ELIOT *Milton* 7 Two or three phrases of my coinage—like 'objective correlative'—which have had a success in the world astonishing to their author. 1951 H. KENNER *Poetry E. Pound* viii. 66 It is easy to see why the objective correlative, the image as sensory equivalent of an emotion, the Aristotelian equation of a poem with an action, and Eliot's claim that emotions the poet has never experienced will serve his turn as well as familiar ones, should seem in such eyes impossibly muddle-headed. 1955 D. DAVIE *Articulate Energy* vii. 86 The use of the objective correlative, the invention of a fable or an 'unreal' landscape. 1957 WIMSATT & BROOKS *Lit. AMIS *Anti-Death League* ii. 176 This communicability...can work via an outward symbol or artefact, so that state-of-mind produces object which in turn produces state-of-mind. There are obvious analogies here with aesthetic theory, in particular with Eliot's notion of the objective correlative. 1971 *Times Lit. objectiveness. [f. as prec. + -NESS.] The quality or character of being objective; the quality of presenting itself as an object of sense (quot. 1677); existence as an object external to the mind; (of a person, work of art, etc.) the character of dealing with or representing outward things rather than inward feelings.

1677 HALE *Prim. Orig. Man.* i. i. 1 Is there such a motion or objectiveness of external Bodies which produceth light or colour...? the Faculty of Sight is fitted to receive that impression or objectiveness, and that objectiveness fitted and accommodated to that Faculty. 1834 COLERIDGE *Confess. Eng. Spir.* vii. (1840) 93 No man...can recognize his own inward experiences in such writings, and not find an objectiveness, a confirming and assuring outwardness, and all the main characters of reality, reflected therefrom on the spirit. 1856 FROUDE *Hist. Eng.* (1858) I. v. 391 The healthy objectiveness of an old English Chronicler is no longer possible for us. 1881 LE CONTE *Sight* 13 In smell, there is an equal commingling of subjectiveness and objectiveness.

objectivism. [f. OBJECTIVE *a.* + -ISM.]

a. The tendency to lay stress upon what is objective or external to the mind; the philosophical doctrine that knowledge of the non-ego is prior in sequence and importance to that of the ego; the character (in a work of art, etc.) of being objective. So *objectivist*, one who holds or advocates the doctrine of objectivism (also *attrib.*); *objectivistic a.*, characterized by objectivism.

1854 GEO. ELIOT tr. *Feuerbach's Essence Christianity* xxi. 203 Belief in revelation is the culminating point of religious objectivism. *Ibid.* xxiii. 224 Religious objectivism has two passives, two modes in which God is thought. 1872 W. G. WARD in *Dublin Rev.* Jan. 71 It is a favourite argument of Mr. Mill's, that objectivism keeps moral science in a stationary state. *Ibid.*, Objectivists hold as strongly as phenomenists, that the morality of actions is importantly affected by their consequences. 1876 MIVART *Less. fr. Nat.* 24 The dogmas which the objectivist philosophy enunciates. 1883 EDERSEIM *Life Messiah* (1886) I. 208 True religion is ever objectivistic, sensuous subjectivistic. 1954 *Mind* LXIII. 265 'Objectivism'...is so ambiguous that there are very few ethical theories which cannot claim to be in some sense 'objectivist'. 1966 tr. *Kotabinski's Gnosiology* ii. 68 The gap within idealist views between objectivism and subjectivism. 1972 PICCONE & HANSEN tr. *Paci's Function of Sci.* ii. 27 According to Husserl the struggle between objectivism and transcendentalism gives us the 'meaning' of the history of the modern spirit.

b. A derogatory term used in communist theory to describe an objective attitude towards existing conditions and acceptance of working

within their limitations, as opposed to the concern for changing them according to revolutionary theories. So *objectivist*.

1933 T. B. H. BRAMELD *Philos. Approach to Communism* xi. 156 An objectivism which tends to deny the significance of conscious men. 1957 R. N. C. HUNT *Guide to Communist Jargon* 99 Objectivism is thus the opposite of 'party-mindedness', and is a serious offence. 1960 tr. *Lenin's Coll. Wks.* I. 401 The objectivist speaks of 'insurmountable historical tendencies'; the materialist speaks of the class which 'directs' the given economic system. 1972 tr. *Marx et al. On Hist. Materialism* 708 [Editor's note] He [sc. Lenin] exposed their attempts to devoid Marxism of its revolutionary content and showed that their views were based on bourgeois objectivism which justified capitalism and glossed over class contradictions.

objectivity (əbdʒɪk'tɪvɪti). [mod. f. med.L. *objectiv-us*: see -ITY. Cf. F. *objectivité* (1878 in *Dict. Acad.*)] The quality or character of being objective; external reality; objectiveness.

1803 *Edin. Rev.* I. 258 In both these views it [philosophy] has relation only to their objectivity. [1812 SOUTHEY *Omniana* I. 220 A confusion of (what the Schoolmen would have called) Objectivity and Subjectivity.] 1848 J. H. NEWMAN *Loss & Gain* III. vi. (1858) 311, I am not denying...the objectivity of revelation. 1851 CARLYLE *Sterling* II. ii. (1872) 96 The principle of this difference...seems to be that well-known one of the predominant objectivity of the Pagan mind. 1884 F. TEMPLE *Relat. Relig. & Sc.* i. (1885) 16 Kant appears to have no escape from assigning this objectivity of space to delusion. 1950 W. H. BARBER tr. *Jolivet's Introd. Kierkegaard* III. ii. 98 'Objectivity', whose idolatrous worship has been propagated by the modern nationalists, might equally well be defined as 'positivity'. 1957 R. MAY et al. *Existence* i. 25 He [sc. Kierkegaard] was convinced not only that the goal of 'pure objectivity' is impossible but that even if it were possible it would be undesirable. 1966 K. HARTMANN *Sartre's Ontology* i. 7 Thus, the phenomena would cease to be moments of myself and would take on 'objectivity'. 1969 R. STRACHAN tr. *Malet's Thought R. Bultmann* i. 19 In its objectivity the other is only an extension of myself.

objectivization (əb.dʒektɪvaɪ'zeɪʃən). [n. of action from OBJECTIVIZE *v.*: see -ATION.] The action or condition of making or becoming objective; an instance of this; something external in which an idea, principle, etc., is expressed concretely.

1929 [see EXPRESSIONISM]. 1944 S. PUTNAM tr. *E. da Cunha's Rebellion in Backlands* II. 144 It [sc. Canudos] was the objectivization of a tremendous insanity. 1965 D. A. LOWRIE tr. *Berdyaev's Christian Existentialism* II. 33 The objectivization of the criterion of truth usually means that that is transferred to another's consciousness and conscience. 1969 W. GLEN-DOEPEL tr. *Metz's Theol. of World* III. 126 The de-privatization and de-existentialization, or, to put it positively, the 'new objectivization' of the Christian message. 1970 R. J. HOLLINGDALE tr. *Schopenhauer's Ess. & Aphorisms* 59 The will's objectivization.

objectivize (əb'dʒektɪvaɪz), *v.* [f. OBJECTIVE *a.* + -IZE.] *trans.* To render objective; to objectify. Hence *objectivized ppl. a.*

1856 MASSON *Ess., The Poetry* 432 Goethe's theory of poetical or creative literature was, that it is nothing else than the moods of its practitioners objectivized as they rise. 1874 BUSHNELL *Forgiveness & Law* Introd. 12, I...accounted for the word as one by which the disciple objectivizes his own feelings. 1899 *Westm. Gaz.* 8 June 3/1 The tendency to externalise and objectivise spiritual things. 1965 D. A. LOWRIE tr. *Berdyaev's Christian Existentialism* II. 34 Objectivized knowledge in all its levels is withdrawn from the existential subject, that is from man.

objectivo- (əbdʒɪk'taɪvəʊ), used as combining form of OBJECTIVE *a.*, in *objectivo-objective a.*, of the nature of an object-object; *objectivo-subjective a.*, of the nature of an object-subject.

1836-7 SIR W. HAMILTON *Metaph.* xxxix. (1859) II. 385 The cognition...is Objective, or rather Objectivo-Objective, when held to consist in an immediate perception of the power or efficacy of causes in the external and internal worlds; and Subjective, or rather Objectivo-Subjective, when viewed as given in a self-consciousness alone of the power or efficacy of our own volitions.

objectize ('əbdʒɪktaɪz), *v.* [f. OBJECT *sb.* + -IZE.] *trans.* To make into an object, render objective, objectify. So *objectization*, the action of making (something) an object of thought.

1668 WILKINS *Real Char.* II. ix. 227 Actions of the Understanding and Judgment...in the first Objectization of a thing; or the reflexive Thought about it. 1817 COLERIDGE *Biog. Lit.* xii. (1882) 134 The intelligence in the one tends to objectize itself, and in the other to know itself in the object. 1838 *Blackw. Mag.* XLIII. 193 Man objectifies himself as 'the human mind'.

object language. [OBJECT *sb.* + LANGUAGE *sb.*] 1. A language described or analysed in terms of another language (known as the metalanguage).

1935 *Mind* XLIV. 501 Formal syntax requires a language of which it is the syntax. This language is called the 'object-language' (*Objektsprache*) in distinction from the syntax language. 1937 A. SMEATON tr. *Carnap's Logical Syntax of Lang.* 4 We are concerned with two languages; in the first place with the language which is the object of our investigation—we shall call this the *object-language*—and, secondly, with the language in which we speak about the syntactical forms of the object-language. 1946 C. MORRIS *Signs, Lang. & Behavior* 179 So if we talked about French in English, French would be the object language and

English the metalanguage. **1947** A. J. AYER *Thinking & Meaning* 26, I am using English in a twofold aspect, as an object-language and as a meta-language in which I speak about the object-language. **1947** R. CARNAP *Meaning & Necessity* i. 4 In order to speak about any object language... we need a metalanguage. **1965** B. MATES *Elem. Logic* ii. 36 In the case of a Greek grammar written in English, Greek is the object-language and English is the metalanguage. **1977** J. LYONS *Semantics* I. i. 10 We may say that the language being described is the object-language and the language which is used to make the descriptive statements is the metalanguage.

2. In the theories of Bertrand Russell: a language consisting only of words having meaning in isolation.

1940 B. RUSSELL *Inquiry into Meaning & Truth* iv. 63 There must... be a language of lowest type... I shall call this sometimes the 'object-language', sometimes the 'primary language'. **1954** E. BRANTH tr. *H. Spang-Hanssen's Recent Theories Nature of Lang. Sign in Travaux du Cercle Ling. de Copenhague* IX. 76 Object-words form an object-language, which is the primary language in a language hierarchy. **1963** J. LYONS *Structural Semantics* iv. 54, I do not accept... that there is a basic 'object-language', the elements of which are learnt in isolation and to which the rest of the vocabulary can be reduced.

3. *Computers*. A language into which a program is translated by an assembler or compiler. Cf. *object program* (OBJECT sb. 10).

1961 LEEDS & WEINBERG *Computer Programming Fund.* ii. 49 Just as in language translation, a type of dictionary is employed in translating from the source language to the object language. **1970** P. M. SHERMAN *Techniques Computer Programming* vi. 109 The result of the translation process is an object program in an object language or machine language.

objectless ('ɒbdʒɪklɪs), *a.* [f. OBJECT sb. + -LESS.] Devoid of an object or objects.

1. Having no object to which it is directed; not relative to something else as an object.

1805 SOUTHEY *Madoc* i. iii. His eyes... Fix'd lifelessly, or objectless they roll'd. **1868** G. MACDONALD *Seaboard Parish* I. xv. 224 Her eyes... had an infinite objectless outlook.

b. *esp.* Having no object or end in view; aimless, purposeless.

1818 BLACKW. *Mag.* III. 294 The dull and objectless mode of life adopted by too many of our nobility. **1846** TRENCH *Mirac.* Introd. (1862) 51 They must not be aimless and objectless, fantastic freaks of power. **1879** JULIAN HAWTHORNE *Laughing Mill*, etc. 36, I set off on an objectless tramp.

2. Devoid of (visible) objects; presenting no object to the view.

1820 BLACKW. *Mag.* VII. 263 As we were obliged to keep the glasses up, our drive for several miles was objectless and dreary. **1860** GOSSE *Rom. Nat. Hist.* 199 We trace the same bird far up in the solitudes of the sky, breaking into view out of the objectless expanse.

Hence 'objectlessly *adv.*,' 'objectlessness.

1652 GAULE *Magastrom.* 60 The object matter or signal means of divining (by things in heaven, or on earth).

2. The matter that is the object of some action or study; the matter dealt with or treated. (Usually coincident in sense with the more common *subject-matter*.)

1836-7 SIR W. HAMILTON *Metaph.* (1877) I. iii. 51 The first and second [definitions] define philosophy from its object-matter,—that which it is about. **1860** MANSEL *Proleg. Log.* iii. 93 To think actually we must think about something; this something, the object-matter of thought, must in the first instance be supplied through... the senses. **1884** tr. *Lotze's Logic* 28 A synthesis in which the... requirement would be completely satisfied in regard to any given object-matter.

'**objectness**. [f. OBJECT sb. + -NESS.] The state or quality of being objective or perceptible.

1933 *Mind* XLII. 510 This second relation... is a relation neither to the material object nor to 'objectness'. **1973** J. ELSOM *Erotic Theatre* ix. 179 The laws concerning static nakedness exactly illustrated the idea of 'objectness'. **1975** *Russ. Rev.* (N.Y.) XXXIV. 272 In futurism, in cubism, space is almost always cultivated, but its form, being connected with objectness, does not convey, even to the imagination, the presence of world space; its space is limited by the space which is shared by the things on the earth.

objector (əb'dʒektə(r)). Also 7 -er, -our. [f. OBJECT *v.* + -OR, the form being coincident with that of the L. agent-n. from *obicere* to OBJECT. But the Eng. form in -er has also been used: cf. *rejecter*.] One who objects or makes an objection; one who brings forward a reason or

† **ob'jectual**, *a.* *Obs.* [f. L. *objectu-s* a throwing against, an object + -AL¹.] Of the nature of an object; that is the object of some action, or that which is aimed at; that is a material or external object; objective.

3. Dentistry. The position assumed by the two sets of teeth relative to each other when the mouth is closed; the state of having the jaws closed and the teeth in contact.

1880 N. W. KINGSLEY *Treat. Oral Deformities* xxi. 525 In extreme pain (except in cases where the patient is suffering from periodontitis, when the occlusion of the jaws intensifies the suffering), the teeth are brought together with great force. **1904** V. 4. Phonetics. The act of closing, or the period of closure of, the breath passage during the articulation of an orally-released consonant, or of the mouth passage during the articulation of a nasal consonant.

1906 *Mod. Lang. Rev.* I. iv. 346 'Occlusion', was, if I remember aright, used by Wilkins in the seventeenth century, but this hardly justifies the employment of such a pedantic term instead of 'stoppage', 'closure', or 'stop'. **1926** *Germanic Rev.* I. i. 58 Here, 'occlusion' in the glottis does not mean glottal stop, but the partial occlusion in the articulation of voice sounds. **1935** J. S. KENYON *Amer. Speech XVIII*. 39 In pronouncing such phrases as 'Hello, Petel'... a British speaker ordinarily articulates the vowel of the final syllable, lifts his tongue to make the closure for the final consonant (applosion), holds it there from eight to twelve hundredths of a second (occlusion), and then breaks the closure with a sharp downward snap of the tongue which produces a clear 'pop' (explosion). **1966** B. TRNKA *Phonol. Analysis Present-Day Stand. Eng.* (rev. ed.) ii. 11 In producing *l*, the tip of the tongue forms an occlusion against the alveolar ridge.

Education XXIV*. 597/1 The term *occlusion* has been used to refer to contamination of a precipitate by the incorporation into the body of it during its formation of foreign substances whether or not the latter give rise to mixed crystal formation (solid solution)... It has been used to include both solid solution phenomena and contamination of the precipitate by adsorption...; it has been used to indicate contamination by basic salts and other substances not adsorbed and not in solid solution...; and I have heard a noted analytical chemist reserve the term to indicate the contamination of a precipitate by mechanically trapped solute or solvent ions or molecules. No doubt one could locate other senses in which *occlusion* has been used; the term is almost omnivorous. **1966** E. M. RATTENBURY *Introd. Titrimetric & Gravimetric Anal.* vii. 146 Sometimes water or mother liquor is imprisoned by occlusion. **1969** E. S. GILREATH *Elem. 7. Meteorol. The overtaking of the warm front of a depression by the cold front, so that the body of warm air between them is forced upwards off the earth's surface by two wedges of cold air; also, the occluded front so formed.

1922 BJERKNES & SOLBERG in *Geofysiske Publikationer* III. 1. 6 No boundary surface results when both branches meet during the occlusion of the cyclone. *Ibid.*, The occlusion then assumes the character of a cold front with a rather narrow rain zone. **1934** D. BRUNT *Physical & Dynamical Meteorol.* xviii. 311 The occlusion begins at the centre, where the cold front has a shorter path to cover before overtaking the warm front. *Ibid.*, There will still be a warm sector in the upper air for some time after occlusion has taken place at the surface. **1941** B. HAURWITZ *Dynamic Meteorol.* xv. 314 The part of the front where the cold front has caught up is called the occlusion. **1944** HEWSON & LONGLEY *Meteorol. [*Note.* The disuse of this verb in the 17th and most of the 18th c. is notable. Against 104 quotes. for 16th c., we have for 17th only 8, outside the Bible of 1611 (where it occurs 10 times), and for 18th c. only 10, all of its last 33 years. The verb occurs only twice (equivocally) in Shaks., is entirely absent from the Concordances to Milton and Pope, is not used by Gray; all Johnson's quotes., exc. 2, are from the Bible of 1611. It was again freely used by Cowper (13 instances in Concordance). This avoidance appears to have been due to its vulgar employment in sense 8; cf. **1597** SHAKS. 2 *Hen. 1. The vast body of water on the surface of the globe, which surrounds the land; the main or great sea. (Down to c 1650, commonly *ocean*

sea; before 1400 also *sea ocean*, *sea of ocean* = *L. mare oceanum* (Cæsar Bell. Gall. II. vii, Tacitus Hist. IV. xii); OF. *mer oceane*, *ocianne*, *oceanne mer*, where *oceane* was adj. fem. qualifying *mer*; and *ocean*-may sometimes have been viewed as an adj. in Eng.)

In early times, when only the one great mass of land, the Eastern hemisphere, with its islands, was known, the ocean was the Great Outer Sea of boundless extent, everywhere surrounding the land, as opposed to the Mediterranean and other inland seas.

2. One of the main areas or regions into which this body of water is divided geographically.

These divisions are partly natural, through the intervention of portions of land, partly arbitrary for geographical convenience. It is usual to reckon five of them, the *Atlantic*, *Pacific*, *Indian*, *Arctic*, and *Antarctic Oceans*, of which the first two are sometimes subdivided into Northern and Southern. But the Pacific, Indian, and Antarctic really form one great ocean, the 'South Sea'; of which the Atlantic and Arctic again form a smaller prolongation, divided from the larger basin only by an imaginary line drawn between the southern points of Africa and America. The name *ocean* was formerly given to smaller portions of some of these; the North Sea has still the synonym *German Ocean*.
