3. The public establishment, or branch of the public service, concerned with the supply of military stores and materials, the management of the artillery, etc.

Board of Ordnance, a board, partly military and partly civil, which had the management of all affairs relating to the artillery, engineers, and the matériel of the Army; it was under the direction of a Master-General, assisted by a Lieutenant-General, a Surveyor-General, a Principal Storekeeper, Clerks of the Ordnance, and various other officers. After having existed from the reign of Henry VIII, it was dissolved in 1855, most of its functions as regards matériel being now discharged by the *Army Ordnance Department*.

The organization of the Ordnance Department has undergone numerous transformations since 1855. From 1870 to 1887, the *Surveyor-General of Ordnance* was (with the Commander-in-Chief, and the Financial Secretary) one of three officers to whom the actual army administration was then delegated, his province being all civil administrative duties except the Pay Department, with the purchase, construction, and charge of matériel. After 1887 these duties were divided among various officials, e.g. the Commissary-General of Ordnance Stores, Director-General of Ordnance Factories, etc. In 1895 they were once more grouped under an *Inspector-General of Ordnance*, for whom a *Director-General* was substituted by an Order in Council of 7 March, 1899. ore² (ɔə(r)). Forms: *a.* 1 óra, 4 ore, 5-7 oore, 5-6 oure, 6 (ower, owre), ur, 6-7 ure; *β.* (1 ár), 3 or, 4 oor, 5- ore, (6 wore, 6-8 oare, 7-8 oar.) [Two types of this word are found from 14th to 17th c.: viz. (1) *oor(e, oure, owre, ur(e, of* which (as shown by spelling and by rimes) the regular mod. repr. would be *oor* (ʊə(r)), and which corresponds to OE. *óra* wk. masc. 'unwrought metal', 'ore', corresp. to Du. *oer*, LG. (E. Fris.) *úr*, of uncertain origin; (2) ME. *ôr*, in 17-18th c. *oar*, mod. *ore*, which answers phonetically to OE. *ár* (also *ær*) 'brass' = OS. *êr* (in *êrin* 'brazen'), MDu. *eer*, OHG., MHG. *êr*, ON. *eir*, Goth. *aiz* str. neut. 'brass' = L. *æs*, *ær*- 'brass', Skr. *ayas* 'metal'. It would appear that, about the 12th c., OE. *ár* began to be identified in sense with OE. *óra*, and that forms descended from both continued side by side until the 17th c., when the forms from *óra* became obs., or were levelled under those from *ár*. Thus the mod.Eng. word appears to derive its sense from OE. *óra*, but its form from OE. *ár* 'brass', which may have been extended to the sense 'metal', and thus to 'ore'. It is possible that, in very modern Eng., the form *oor* might itself have passed into (ɔə(r)), as in the spoken forms of *door, floor*, and southern pronunc. of *moor, poor*; but this would not explain the double forms from 13th to 17th c., nor the 16th c. *oar*.]

Orford (ɔ:fəd). The name of the Orford Copper Company of New Jersey, U.S.A., used *attrib.* to designate a process it developed for separating nickel from copper by making use of the difference in the solubilities of their sulphides in molten sodium sulphide.

1895 *Mineral Industry* III. 458 The Orford Copper Company was employed some time ago by the United States Navy Department to separate copper from nickel in a large quantity of Canadian matte purchased by the department, and to deliver nickel in the form of an oxide for use in alloying steel. In order to do this the company employed a new process, which may fairly be called the Orford process, and this has been from time to time improved until there is now produced from the Canadian mattes by a fire process metallic nickel which is from 99% to 99.3% pure. 1923 U. R. EVANS *Metals & Metallic Compounds* III. 183 Copper sulphide is soluble in fused sodium sulphide; nickel sulphide is not (the principle of the Orford process). 1967 J. R. In L., instrument, engine, musical instrument generally, pipe, in Christian writers also 'church-organ'. Augustine (c 400), on Ps. lvi, says 'All musical instruments are called *organa*. Not alone is that called *organum*, which is large and inflated by bellows, but whatever is fitted to accompany singing, and is corporeal, which he who sings uses as an instrument, is called *organum*.' To the same effect Isidore *Orig.* II. xx. In Eng. adopted first in the musical sense; in OE. in the more general sense of 'musical instrument', including, no doubt, that of 'church-organ'.]

2. *spec. a.* A musical instrument (in its modern form the largest and most comprehensive of all), consisting of a number of pipes, supplied with *wind* or compressed air by means of bellows, and sounded by means of keys, which on being pressed down admit the wind to the pipes by opening valves or *pallets*.

In the modern organ the pipes are distributed into sets or *stops* of various qualities of tone, the admission of wind to the several stops being controlled by handles or *draw-stops*, drawn in and out by hand or by mechanism worked by special pedals (*combination-pedals*); and the stops are arranged in groups, each separate group forming a *partial organ* (see d) and being controlled by a separate keyboard; these are usually from two to five in number, one of the keyboards consisting of *pedals* played with the feet, the rest being *manuals* played with the hands; these can be connected in various ways by *couplers* so as to sound together.

From its power and dignity of tone the organ has been distinctively the church instrument from early Christian times, and in modern times is also used in concert-halls and other buildings.

The instrument has of course undergone immense changes since the 4th c., when it is first referred to in L. writers, and even since the date of the earliest Eng. references. According to Grove's *Dict. Mus.* II. 576, 'At the commencement of the 8th c. the use of the organ was appreciated, and the art of making it was known in England'. But although mentioned from that period in Latin documents, no English quotes. specifically in this sense are known in OE. or Early ME.

c. Phr. *organic composition of capital* (Econ.): see esp. quot. 1887.

1887 MOORE & AVELING tr. *Marx's Capital* II. xxv. 625 The composition of capital is to be understood in a twofold sense. On the side of value, it is determined by the proportion in which it is divided into constant capital or value of the means of production, and variable capital or value of labour-power, the sum total of wages. On the side of material, as it functions in the process of production, all capital is divided into means of production and living labour-power... I call the former the *value-composition*, the latter the *technical composition* of capital. Between the two there is a strict correlation. To express this, I call the value-composition of capital, in so far as it is determined by its technical composition and mirrors the changes of the latter, the *organic composition* of capital. Wherever I refer to the

composition of capital, without further qualification, its organic composition is always understood. **1937** M. DOBB *Pol. organicism (ɔ:'gænsɪz(ə)m). [See -ISM.]

1. a. The doctrine that organic structure is merely the result of an inherent property in matter to adapt itself to circumstances.

1883 *Church Times* XXI. 154/2 The objection that organicism excludes design, on the ground that the living creature has properties necessary to the fulfilment of its functions, and that all is explained by these properties, which produce the organs and set them to work.

b. The doctrine that everything in nature has an organic basis or explanation; that everything in nature is part of an organic whole (in sense of ORGANIC *a.* 6 a).

1912 A. TRIDON tr. *Delage & Goldsmith's Theories Evol.* 163 In that respect, organicism is the perfect antithesis of Weismannism. **1928** *Jrnl. Philos. Stud.* Jan. 39 This is the

reason why modern organicism, the organic theory of nature, seems so important for modern biology. **1945** [see HOLISM]. **1960** *Encounter* XV. 11. 73 Mr. Tate and his friends... were accused of sentimental organicism, of naïvely hoping to revive the virtues of the antique world by restoring its economic forms. **1969** *Times Lit. Suppl.* 20 Nov. 1341 Organicism... holds that some organic properties are not reducible to those of smaller parts. **1976** *Nature* 3 June 439/1 Reductionism rests on the belief that the whole can be fully explained in terms of the parts whereas organicism (biological holism) asserts that the whole cannot be fully explained in this way.

2. Path. 'The doctrine or theory which refers all disease to a material lesion of an organ' (*Syd. Soc. Lex.*).

1853 DUNGLISON *Med. Lex.*, *Organicism*,... The doctrine of the localization of disease. **1893** VIRCHOW in *Standard* 17 Mar., In the second period... they endeavoured to find in a certain region the actual organ which might be considered as the seat of disease. Stud.* Jan. 29 That which was common to the organicists, said Delage, was that they regarded... life, the form of the body... as resulting from the reciprocal play or struggle of all its elements. *Ibid.* 39 The organicistic schema formerly covered the living world, and now covers also the world of the non-living. **1941** J. NEEDHAM in P. A. Schilpp *Philos. A. N. Whitehead* 251 About the historical origins of the organicistic viewpoint in biology a great deal could be said. **1941** W. M. -orial, a compound suffix, consisting of the suffix -AL¹, L. *-āl-is*, added to L. *-ōri-*, in *-ōri-us*, *-a*, *-um* (see -ORY). The termination is originally adjectival (substantival only by ellipsis), and app. arose in connexion with sbs. in *-ōrium*, *-ōrius*, Eng. -ORY; thus late L. had *territōri-āl-is* from *territōrium*. But it has been extended in Eng. to form derivatives from L. adjs. in *-tōrius*, *-sōrius*, from agent-nouns in *-tor*, *-sor*, as *cursori-al*, *dictatori-al*, *pictori-al*, *piscatori-al*, *procuratori-al*, *professori-al*, *sartori-al*, *senatori-al*, and others formed directly on agent-nouns themselves or on the cognate ppl. stem of the vb., as *equatorial*, *mediatorial*. In sense, these adjs. in *-orial* are usually identical with those in *-ory*, and the two forms are not rarely found side by side (e.g. *piscatorial*, *piscatory*); but the former is preferred for the adj. when there is a sb. in *-ory* (*purgatory*, *purgatorial*). Words in *-orial* from agent-nouns are chiefly of Eng. formation, the compound suffix being rare in Fr.

orichalc ('orɪkælk). Also 6 oricalche, 7 -chalch; and in Lat. form orichalcum (also 7 aurichalc(h)um). [ad. L. *orīchalc-um*, a. Gr. *ὀρείχαλκον*, lit. 'mountain-copper', f. *ὄρος*, *ὄρε-* mountain + *χαλκός* copper, applied to a yellow copper ore or brass. In later L. made into *aurichalcum*, after L. *aurum* gold, as if 'golden copper'.] Some yellow ore or alloy of copper, highly prized by the ancients; perhaps brass.

Applied by Strabo to brass, though some Greek writers treated *ὀρείχαλκον* as a fabulous metal; in the Middle Ages, *aurichalcum* is often mentioned as a very precious metal known only by report.

orichard, obs. variant of ORCHARD.

oriel ('ɔəriəl). Also 5 oryel, oriell, 5–6 oryall, 6–8 oriall, 7 orial, oryal, 7–8 oriol, (9 oriole). [ME. *a.* OF. *orior* (*eurieul*, *oeurieul* (in Godefroy) 'porch, passage, corridor, gallery', med.L. (?) from Fr.) *oriolum* (in Matt. Paris, *a* 1259) 'porch, entrance-hall, antechamber'.

Of unknown origin: for the conjecture that the F. or med.L. might be altered from L. *aureolum* 'golden, gilded', in sense 'gilded chamber', there is no historical foundation; the Fr. forms in *eu*, *œu* point to an original *ō* not *au*.]

Although much research has been expended upon the history of this word, and esp. upon the development of the current use in *oriel window*, the sense-history remains in many points obscure and perplexed. Mr. W. Hamper in an exhaustive article in *Archæologia* XXIII. (1831) 114, asserts, and app. proves, for *oriel* the senses, penthouse, porch (attached to an edifice), (detached) gatehouse, loft, upper floor, gallery (for minstrels). It is also shown in Parker's *Domest. Archit.*, that the name was applied to a gallery or upper chamber in the west end of a domestic chapel, or to a small private apartment having a window looking into the chapel (see also *Bentley's Qu. Rev.* 1860 Jan. 497). The earliest sense known is that of 'portico, passage, corridor, gallery', assured from OFr. (Godef.) and med.L., and it is probable that 'oriel window' meant at first 'window in a gallery or balcony'. Most of the earlier senses claimed by Mr. Hamper are found only in L. context, examples in Eng. being scarce. The modern Cornish use of *orrel* is however an important link.

|| orihon (ˈɒrɪhɒn). [Jap., f. *ori* fold + *hon* book.] A book formed by folding a printed roll alternately backwards and forwards between the columns, and usu. fastening it with cord down one side.

1907 C. DAVENPORT *Book* ii. 28 The Chinese and Japanese.. by help of the ancient device of 'stabbing' the flattened roll along one of its sides,.. produce a form called an 'Orihon', easy to consult, strong. 1910 *Encycl. Brit.* IV. 216/2 A roll [of vellum, paper, etc.] of this kind can be folded up, backwards and forwards, the bend coming in the vacant spaces between the columns of writing. When this is done it.. becomes a book, and takes the Chinese and Japanese form known as *orihon*—all the writing on one side of the roll or strip of paper and all the other side blank.. The earliest fastening of such books consists of a lacing with some cord or fibre run through holes stabbed right through the substance of the roll, near the edge. Now the *orihon* is complete, and it is the link between the roll and the book. 1951 S. JENNETT *Making of Bks.* xi. 155 This form of book was much used throughout the East, and was known as an *orihon*. 1960 G. A. GLAISTER *Gloss. The roll was then folded, the margins having the effect of a closed fan. 1968 E. G. TURNER *Greek Papyri* 173 It has been suggested that the codex evolved out of an intermediate form of leather or skin roll in which stitches were inserted in the spaces between every second column, the skin being folded on itself at the intervening column, so that the whole roll was folded concertina-fashion. Books of this kind (termed *orihon*) are still in everyday use in China and Japan.

The pronunciation varies with the place of the stress; when the primary stress falls on the following element, there must be a secondary stress on *ornitho-*, which according to the etymology ought to be *or,nitho-*, and is so pronounced by most English scholars in learned words; but conformation to *ornithology*, *ornithologist*, has established *ornitho'logical* (instead of *or,nitho'logical*), the analogy of which has introduced *ornitho-* into other words in popular use.

1909 H. R. MILL in *Geogr. Teacher* V. 75 Placing this established fact of the dependence of the annual rainfall on the height or the configuration of the land side by side with the equally established fact of the complete independence of heavy cyclonic or thunderstorm rains on terrestrial conditions, we are obliged to divide rain into two classes; one greater in intensity but shorter in duration, and, in aggregate, trifling in amount, which we may call meteorological rain (in thunderstorms and cyclones), and the other kind of rain, of less intensity but greater frequency and duration, we may call orographical rain. **1921** *Geofysiske Publikationer* II. iii. 9 The effects of orographical rain are strongly restricted by the tendency of all stable air currents to curve round the mountains horizontally. **1947** *Q. Orphism (ˈɔːfɪz(ə)m). [*f.* ORPH-IC + -ISM.]

1. The system of mystic philosophy embodied in the Orphic poems, and taught to the initiated in the Orphic mysteries.

1880 *Ch. Q. Rev.* 244 The whole system of what M. Girard designates under the name of Orphism, which... inculcated the strict necessity on the part of man to shake off the low elements of his nature. 1884 W. M. RAMSAY in *Encycl. Brit.* XVII. 128/2 The spirit of Orphism was that of the Oriental Phrygian cultus.

2. A movement within Cubism, identified by Guillaume Apollinaire (1880–1918) and pioneered by a group of French painters calling themselves *Le Section d'Or*, which emphasized the lyrical use of colour in pure abstract designs.

1914 A. J. EDOY *Cubists & Post-Impressionism* (1915) xiv. 207 Superficial Impressionism leads naturally to the painting of pure color effect—color music, orphism, compositional painting. 1915 *Forum* (N.Y.) Dec. 663, I have always held that Orphism and Simultaneism are merely extended Impressionism. 1959 H. REAO *Conc. Hist. Mod. Painting* III. 91 Robert Delaunay... was responsible for another deviation from orthodox Cubism... This deviation Apollinaire christened Orphism. 1959 BROWN & SLATER tr. *Pasternak's Safe Conduct* xi. 259 In its symbolism, that is to say, in everything in the imagery verging on orphism, the romantic view of life is devastatingly vivid and it is incontrovertible. 1971 J. WILLET in A. Bullock 20th Cent. x. 235/1 Expressionism... was an all-absorbent force which sucked up every other new tendency since Fauvism (Cubism, Futurism and Delaunay's near-abstract Orphism). 1976 *Telegraph* (Brisbane) 20 Oct. 2/3 Apart from orphism, futurism and several other arty isms, the doc is an expert on early Australian painters.

Hence **Orphist** (less commonly **Orphiste**) *sb.* and *a.*

1914 A. J. EDOY *Cubists & Post-Impressionism* (1915) v. 60 Today we have the 'Neo-Impressionists',... the 'Futurists', the 'Orphists', [etc.]. *Ibid.* 64 A form of dramatic representation that is essentially Cubist, Futurist, and Orphist in its expression. 1915 *Blast* July 41 Less interesting... is the Orphiste movement. Delaunay is the most conspicuous Orphiste. 1959 J. GOLOING *Cubism* i. 39 Léger... whose art was now becoming more obviously divergent, is also sometimes referred to as an Orphist. 1959 *Listener* 13 Aug. 253/2 After 1911... he [sc. Chagall] begins to place his figures among arbitrary arcs of colour which are like caricatures of Orphist forms. 1970 C. BARRETT *Op Art* i. 9/2 Delaunay... and... other Orphists were familiar with Chevreul's theory of simultaneous contrast.

2. A succulent herbaceous plant, *Sedum Telephium*, with smooth fleshy leaves and corymbs of numerous purple flowers; a native of Britain, and also a well-known inmate of the cottage garden, being esteemed as a vulnerary. From its tenacity of life, one of its popular names is *live-long*.

The connexion between this and the preceding sense is not clear; it has been conjectured that the name *orpine* was given first on account of their colour to one or more of the yellow stonecrops, was extended to the genus *Sedum* as a whole, and was subseq. restricted to *S. Telephium*. In support of this, Littré gives *orpin* as a generic name for *Sedum*, and calls *S. Telephium*, *orpin reprise*, and *S. acre* (Wall Pepper) *orpin acre*; but Hatzfeld and Darmesteter know only the former as *orpin*.

orthicon (ɔ:'θi:kən). [abbrev. of next.] A kind of television camera tube similar to the iconoscope

but having a transparent target plate, so that the scanning beam can be made to strike normally the opposite side to that on which the image is projected, and employing low-speed electrons for the beam, resulting in increased sensitivity and an absence of the spurious signals associated with the iconoscope. See also *image orthicon* (IMAGE sb. 8).

The term was registered in the U.S.A. as a proprietary name in 1940, but it is now a generic term in the public domain.

1939 [see next]. **1942** *Electronic Engin.* XV. 127 Because of the greater light sensitivity of the orthicon it is expected that the equipment will fill a need for lightweight equipment to be used under adverse light conditions. **1955** G. M. GLASFORD *Fund. Television Engin.* iv. 98 The disadvantages of the orthicon have encouraged the search for better tubes in spite of the improvement over the iconoscope in the matter of increased sensitivity. The orthicon suffers from a very poor contrast scale with a very small range of intermediate grays as compared with the iconoscope. **1968** *Brit. Med. Bull.* XXIV. 261/2 Tubes such as... orthicons integrate the light energy incident upon each part of the tube over the entire frame-scanning interval.

orthiconoscope (ɔ:'θaɪ'kɒnskəʊp). Now *rare* or *Obs.* [f. ORTH(O- + ICONOSCOPE; see quot. 1939.) = prec.

1939 *Electronics* July 11/1 On June 7th Albert Rose and Harley Iams of the RCA Manufacturing Company Research Laboratories at Harrison, revealed... the details of a new developmental television pick-up tube which... is one of the most significant advances in television electronics since the advent of the iconoscope itself. The new tube's formal name is 'Orthiconoscope' ('Orthicon' for short) from the Greek root *ortho* meaning 'straight' and iconoscope for 'image-viewer'. The name derives from the fact that the curve between input light and output current is a straight line, in contrast to the similar curve of the iconoscope which is not linear. **1940** D. G. FINK *Princ. Television Engin.* iii. 111 The orthiconoscope displays no spurious signal, and there is accordingly no background shading defect to be compensated. **1953** AMOS & BIRKINSHAW *Television Engin.* I. 81 The orthicon (orthiconoscope in full) was developed by Rose and Iams in America and used in that country immediately before the Second World War for outside broadcasts.

orthid ('ɔ:θɪd). [f. mod.L. *Orthidæ*, f. *Orthis*, f. Gr. *ὀρθός* straight: see -ID².] A member of the *Orthidæ*, or genus *Orthis*, of fossil bivalves.

2. In Chemistry. a. **Ortho-** is used to distinguish one class of acids and their salts from another denoted by the prefix **meta-**, which contain the same elements in different proportions, the **meta-** acid containing a molecule of H₂O less than the **ortho-** acid, the **ortho-** salt being also the more basic and the **meta-** salt the less basic. Thus **orthophosphoric acid** H₃PO₄, **metaphosphoric acid** HPO₃; **sodium orthophosphate** Na₂PO₄, **sodium metaphosphate** NaPO₃. So **orthosilicic**, **orthotungstic**, **orthosilicate**, **orthotungstate**, etc. This use of **ortho-** originated with Prof. Odling in 1859, **meta-** having been introduced by Graham in 1833. b. With the names of isomeric benzene derivatives, **ortho-** is applied to those in which two consecutive hydrogen atoms are replaced by another element or radical, as distinguished from **meta-** and **para-** derivatives, in which the two atoms are not consecutive, but unsymmetrically or symmetrically dispersed respectively. Examples: **orthodibromobenzene**, **orthobromotoluene**, **orthopropylphenol**; **ortho-xylene**, an isomer of xylene that is a

colourless mobile liquid and is now obtained from petroleum naphtha for use esp. as a source of phthalic anhydride. (This was introduced by Körner, 1867, in *Brussels Acad. Sc. Bull.* XXIV. 166–185.)

As *ortho-*, although usually prefixed without a hyphen, has always its own distinct meaning, chemical names in *ortho-* are not separately treated in this Dictionary.

3. Physics and Chem. Of, pertaining to, or designating the form of some homonuclear diatomic molecules in which (as in orthohydrogen) the two nuclei have parallel spins (see also quot. 1940²); also more widely, characterized by the presence of parallel spins. Also as an independent word.

orthocephalic (ˈ*o*θəʊsɪ'fælk), *a.* *Ethnol.* [f. ORTHO- 'right, correct' + Gr. κεφαλή head + -IC: cf. *cephalic*.] Applied to skulls of which the breadth is from about $\frac{3}{4}$ to $\frac{4}{5}$ of the length (intermediate between *brachycephalic* and *dolichocephalic*); or, according to some, of which the height is from $\frac{7}{10}$ to $\frac{3}{4}$ of the length, or of which the height is $\frac{4}{5}$ of the breadth.

Orthoceras (ˈ*o*θɒsərəs). *Palæont.* Pl. orthocerata (ˈ*o*θəʊsə'reɪtə). [f. ORTHO- 'straight' + Gr. κέρας, pl. κέρατα horn.] An extinct genus of cephalopods, having long straight (or nearly straight) chambered shells; a fossil shell of this genus.

orthochromatic (ˈ*o*θəʊkrəʊ'mætk), *a.* *Photogr.* [f. ORTHO- 'correct, proper' + Gr. χρωματικός relating to colour, CHROMATIC.]

1. Representing colours in their correct relations, i.e. without exaggerating the deepness of some and the brightness of others (as in ordinary photography). In mod. use, having a sensitivity which is more nearly uniform throughout the visible range than that of silver

halide used alone, but which is relatively low in the red and high in the blue part of the spectrum (cf. PANCHROMATIC *a.*).

The emulsions, etc., orig. called 'orthochromatic' were in fact orthochromatic in this mod. sense.

1887 *Athenæum* 26 Mar. 421/1 The colours were purposely selected to test as severely as possible the capacity of the plate used—a Dixon's orthochromatic. **1889** *Pall Mall G.* 21 Aug. 7/1 We want photography to be orthochromatic, or colour-correct. **1890** AGNES M. CLERKE *Syst. Stars* 30 'Orthochromatic' plates absolutely free from colour-preferences can be produced by special processes. **1903** A. PAYNE *Pract. Orthochromatic Photogr.* vi. 88 Orthochromatic plates possessing additional sensitiveness to the yellow and green rays only may be handled in a red light possessing abrupt absorption... Plates... sensitive to the whole of the spectrum... require to be treated in darkness. Such plates are occasionally termed panchromatic. **1919** *Conquest* Nov. 24/1 Plates known as 'orthochromatic' or 'isochromatic' are sensitive to some of the greens and yellows... Nevertheless, even with these plates, the delicate greens of springtime, the yellow of the gorse, and many other colours in nature, are rendered unsatisfactorily, while the red leaves of autumn photograph as black [*sic*]. **1920** *Jrnl. Photographer* 11 Mar. 60/1 As positive film is orthochromatic (that is, it is not sensitive to the red component of the visible spectrum), it can be handled under a red photographic safelight.

2. Biol. Exhibiting or characterized by the same colour as that of the stain used.

1899 *Jrnl. R. Microsc. Soc.* 379 Orthochromatic macrocytes which are without nuclei and appear late in embryonic life and in anæmia. **1930** MAXIMOW & BLOOM *Text-bk. history of Modern English have relied mainly upon the Orthoepists. 1927 R. E. ZACHRISSON *Eng. Pronunc.* 1500-1700 I. ii. 193 The tendency to regard the spelling reformers as primarily interested in teaching 'correct pronunciation'... may be due to the difficulty of finding a term to cover all the sixteenth- and seventeenth-century writers on pronunciation; 'grammarians' is clearly inexact except in a few cases, and so the term 'orthoepists' has been widely accepted. 1969 A. C. PARTRIDGE *Tudor to Augustan English* viii. 173 On their own admission, orthoepists were students of language who sought to establish the principles of correctness in speech. 1972 M. L. SAMUELS *Linguistic Evol.* vii. 144 For Early Modern English, there is much orthoepist, phonetic and other evidence. 1975 *Language* LI. 747 It would be of great value if a presumably accurate report of upper-class speech of the period [sc. 1968 L. PAULING in *Science* 19 Apr. 265/1, I have reached the conclusion...that another general method of treatment, which may be called orthomolecular therapy, may be found to be of great value... Orthomolecular psychiatric therapy is the treatment of mental disease by the provision of the optimum molecular environment for the mind, especially the optimum concentrations of substances normally present in the human body. 1970 [see *megavitamins* s.v. MEGA- a]. 1971 *Nature* 15 Oct. 452/2 The term 'orthomolecular psychiatry' introduced by Professor L. It's called the orthomolecular approach. 1977 *National Observer* (U.S.) 22 Jan. 11/5 Megavitamin, or orthomolecular therapy, is sometimes used to treat mental retardation, psychoses, hyperactivity, autism, dyslexia, and other learning disorders.

orthomorphic (ɔ:θəʊ'mɔ:ɪk), *a.* [f. ORTHO- + Gr. *μορφή* form + -IC.]

†1. *Biol.* (See quotes.) *Obs. rare.*

1866 BRANDE & COX *Dict. 2. Preserving the true or original shape of infinitesimal parts; applied to a class of map-projections in which small areas retain their correct shapes.

orthomorphic transformation, or *orthomor'phosis* (*Math.*), a functional transformation which expresses the representation of one geometrical plan by another of which the infinitesimal parts retain their accurate form.

1882 T. CRAIG (U.S. Coast Survey) *Treatise on Projections* 33 It will be convenient to use the term given by Germain to such projections, and so we shall call them *orthomorphic*. 1891 CAYLEY *Wks.* XIII. 191 The author [Schwartz] considers the orthomorphic transformation (or, as I call it, the orthomor'phosis) of a square into the infinite half-plane, or into a circle. *Ibid.*, It is easy to deduce the orthomor'phosis of the rectangle into a circle. 1900 C. F. CLOSE *Sketch of Map Projections* 10, *Orthomorphic* (or *conform* or *conformable*): in these the scale is the same in all directions round a point in its immediate neighbourhood. *Ibid.* 17. 1910 [see CONFORMAL *a.* 2]. 1937 *Jrnl. 1941 R. V. CHURCHILL *Fourier Series* iii. 35 The symbol {*φ_i*} will be used to denote an orthonormal set whose vectors are *φ₁*, *φ₂*, and *φ₃*. 1881 *Standard* 11 July 3/5 Some disgust has been created amongst the Snider men by a regulation which is to come into force this year prohibiting the use of the 'orthoptic'. 1882 *Pall Mall G.* 15 July 8/2 The advantage derived from the use of the orthoptics is that the eyesight is concentrated, and the sights on a rifle or gun are defined with great clearness. 1890 *Daily News* 27 Jan. 2/5 The use of orthoptics will be forbidden in all competitions in which uniform is ordered to be worn.

2. **orthoptics** (const. as *sing.*). The treatment (esp. by means of eye exercises) of defects in the action of the eye muscles, esp. those causing defective binocular vision.

1934 *Brit. Jnl. orthoroentgenography (ɔ:'θəu'rɒntgɛ'nɒgrəfi, etc.). *Med.* [f. ORTHO- + *roentgenography* s.v. ROENTGEN-.] A technique for producing radiographs showing the exact sizes of organs or bones by using a narrow beam of X rays perpendicular to the plate or film.

There are other pronouns. of this word and its derivs. analogous to those of ROENTGENOGRAPHY, -GRAM, etc.

1946 W. T. GREEN et al. in *Jnl. Bone & Joint Surg.* XLIV. 60 In a study of growth by the Harvard Infantile Paralysis Commission, it was found necessary to develop a method of measuring the lower extremities which would meet the following requirements... The method to be described has been designated 'orthoroentgenography'. 1972 M. O. TACHDIJAN *Pediatric Orthopedics* II. vii. 1486/2 The advantages of orthoroentgenography are that the true length of each bone can be measured, because magnification due to divergence of rays is eliminated by directing only perpendicular rays at the ends of the long bones.

Hence **ortho'roentgenogram**, a radiograph produced by orthoroentgenography; **orthoroentgeno'graphic** *a.*, (done by means) of orthoroentgenography.

1946 *Jnl. Bone & Joint Surg.* XLIV. 63 The true length of each bone can be measured directly from orthoroentgenograms without computation. *Ibid.* 65 Orthoroentgenographic measurement of a dissected adult femur, 45.7 centimeters long, gave a length of 45.5 centimeters. 1951 L. O. TACHDIJAN *Pediatric Orthopedics* II. vii. 1486/1 The technique [sc. teleoroentgenography] is not satisfactory for serial mensurations and bone detail is much less than that seen on spot orthoroentgenograms.

LORIMER *Homer & Monuments* 419 The actual remains of Geometric temples would lead us to expect a few courses of undressed stones (possibly with an outer facing of orthostats) supporting a wall of crude brick. 1970 *Encycl. Brit.* XVIII. 454/1 The practice of setting a series of stone slabs, called orthostates, at the bottom of a wall below the mud-brick upper parts became common in the Assyrian period and was seen again in Hittite architecture. 1972 Y. 1912 T. E. PEET *Rough Stone Monuments* p. iv, The first and most important principle, that on which the whole of the megalithic construction may be said to be based, is the use of the orthostatic block, i.e. the block set up on its edge. *Ibid.*, The orthostatic slabs were often deeply sunk into the ground where this consisted of earth or soft rock. 1926 D. Amer.* XXVII. 339/2 In the x-ray clinic, orthostereoscopic radiographs help to reduce error in diagnoses. 1941 R. M. ALLEN *Photomicrogr.* v. 236 It is not essential, especially for higher-power work with single objectives, that true orthostereoscopic effects be obtained. 1966 H. ASHER tr. *Valyus's Stereoscopia* ii. 94 Observation of these conditions ensures that an orthostereoscopic image is produced, i.e. one which shows a correct proportion in depth and undistorted perspective, and allows the visual fusion of the two stereograms into a single spatial percept.

Hence **ortho'stereoscope**, a binocular microscope giving orthostereoscopic images; **orthostereoscopically** *adv.*, in an orthostereoscopic manner; **orthostere'oscopy**, the production of orthostereoscopic images.

1892 *Jrnl. Quekett Microsc. Club* V. 52 If the two prisms were joined into one, it would . . make a very efficient orthostereoscope. 1928 B. J. LEGGETT *Theory & Pract. Radiol.* III. ix. 430 This process of orthostereoscopia has important practical bearings. 1937 *Jrnl. Optical Soc. ory, *a.*²: see ORE 5.

-ory¹, formerly -orie, a suffix forming sbs., originating in ONorm.Fr. and AFr. -orie = Central Fr. -oire, as in *glorie*, *gloire*, which became the form for the adaptation of L. words in -ōria, and subseq. of those in -ōrium, as *victoire*, *offertoire*, *oratoire*, *purgatoire*; these also took in Eng. the form -orie, later -ory, which thus came to be the normal Eng. repr. of L. -ōria, -ōrium, F. -oire. The most numerous of these are adaptations of L. neuter sbs. in -ōrium, from adjs. in -ōrius (see -ORY²), or formations of the same type. Usually, these denote a place or instrument used in some process, as *crematory*, *directory*, *dormitory*, *factory*, *laboratory*, *lavatory*, *observatory*, *oratory*, *purgatory*, *refectory*, *repository*, *stillatory*, *sudatory*; but occasionally they have other senses, as *auditory*, *promontory*, *territory*. In some learned or technical words the L. form in -ORIUM is retained; thus *auditorium* is differentiated from *auditory*, *crematorium* is more frequent than *crematory*. In a few words -ory is the suffix -y added to an agent-noun in -or, e.g. *orator-y* (the art of the orator), *rector-y* (the seat of a rector).

-ory², formerly -orie, a suffix forming adjs. (whence also sbs.), originating in ONF. -ori, -orie, and repr. (sometimes through OF. -oir, -oire) L. -ōri-us, -a, -um, itself a compound suffix consisting of the adj. formative -i-us added to derivative sbs. in -or (cf. *sorōr* sister, *sorōr-i-us* sisterly), chiefly agent-nouns in -tor, -sor (see -OR), but sometimes app. from the cognate ppl. stem in -t-, -s-; e.g. *accūsātōr-i-us*, *suasōr-i-us*, *dēcrētōr-i-us*. As an agent-n. in -or is possible from every L. vb., an adj. in L. -ōri-us, Eng. -ory is also always possible, and is often in Eng. use when no corresponding L. adj. is recorded, and even when no agent-n. occurs; thus, we have *compulsory*, *dispensatory*, *illusory*, *persuatory*, without the agent-nouns *compulsor*, etc., and *amatory*, *hortatory*, *perfumatory*, *predatory*, where the L. verb is not even represented in English. Instead of -ory, the Eng. adj. has often the extended form -ORIAL, less frequently -ORIOUS.

ose, obs. form of OOSE.

-**ose**¹, a suffix representing Latin *-ōsus*, forming adjs. from substantives, with the meaning 'full of', 'abounding in'; e.g. *ann-ōsus* full of years, *clam-ōsus* screaming, *cōpi-ōsus* rich, *pecūni-ōsus* moneyed, *religi-ōsus* scrupulous. As a living suffix *-ōsus* came down to OF. as *-os*, *-us*, later *-eus*, *-eux*, AF. and Eng. *-ous* (ME. also *-ovus*), which survives with pronunciation (-əs). But from the 15th c. onward there was a tendency to alter *-ous* words to *-ose* after L., as seen in such forms as *ambitiose*, *gloriose*, *malitiose*, *pompose*, *virtuose*, *zelose*. None of these displaced the earlier forms in *-ous*; but a few words formed directly from L. from the 15th c. onward have taken their place in the language, as *bellicose*, *globose* (15th c.), *jocose*, *morose*, *verbose* (17th c.), *otiose* (18th c.), *grandiose*, *pilose* (19th c.). In a few cases *-ous* and *-ose* forms are both in use, e.g. *acerous*, *acerose*, *acinous*, *acinose*, those in *-ose* being more technical. Originally these words have the stress on the suffix, *jo'cose*, *mo'rose*, but this is not always maintained in more recent usage, esp. in words of more than two syllables. Nouns of state from these adjs., as from those in *-ous*, end in *-osity*: *globosity*, *verbosity*.

-**ose**², *Chem.*, a suffix originating in the ending of the word *glucose*, and employed in forming the names of the related earbo-hydrates, *saccharose* and *cellulose*, with the isomers of these three, as *dextrose*, *lævulose*, *dambose*, *galactose*, *mannitose*; *lactose*, *maltose*, *melezitose*, *melitose*, *mycose*, *synanthrose*, *trehalose*; *amylose*, etc. Now extended to carbohydrates which are not isomers of glucose, saccharose, or cellulose, as *arabinose*, *rhamnose*, *ribose*, *xylose*, etc., and to classes of sugars, as *aldose*, *furanose*, *hexose*, *pentose*, *pyranose*, etc.

These formations are due to the French chemists, and the earlier of them appeared first as Fr. words. *Glucose* was so

named by the committee of the *Académie des Sciences* (Thénard, Gay Lussac, Biot, Dumas), who reported 16 July 1838 upon the mémoire of Peligot: 'il résulte que le sucre de raisin, celui d'amidon, celui de diabète, et celui de miel... constituent un seul corps, que nous proposons d'appeler *glucose*. (Note. γλευκος [mispr. -γος], moult, vin doux.)' *Comptes Rendus* VII. 106 (1838). *Glucose* was thus merely a frenchified representation of the Gr. word γλευκος 'must, sweet wine, sweetness', with *u* for *eu* and -*ose* for -*os*. (Littre's assumption that the term was derived from γλυκός sweet, in accordance with which he essayed to alter it to *glycose*, was thus historically erroneous.) The name *cellulose* was given by Brongniart, Pelouze, and Dumas, in reporting upon the mémoire of Payen, 14 Jan. 1839: 'En effet, il y a dans les bois le tissu primitif, isomère avec l'amidon, que nous appellerons *cellulose*, et de plus une matière qui en remplit les cellules, et qui constitue la matière ligneuse véritable.' *C.R.* VIII. 51 (1839). *Cellulose* was thus formed on *cellule*, but there is no evidence that its inventors thought of a L. adj. **cellulōsus*; and app. the ending -*ose* was given simply to match *glucose*. It appears from other statements that the actual author of *glucose*, and presumably also of *cellulose*, was Dumas, the *rapporteur* of the committees. The ending -*ose* was soon extended; contractions of *lævo-glucose* (Berthelot) and *dextro-glucose* (Kekulé) gave *lævulose* and *dextrose*, and the forms *lactose*, *melitose*, etc. followed.

-osis, *suffix*, representing Gr. -*ωσις*, originating in the addition of the general suffix -*osis*, forming verbal nouns of action or condition, to derivative vbs. in -*ό-ω* from *adj.* and *sb.* stems or combining forms in *ο-*: e.g. *ἀμαύρωσις* darkening, obscuration of sight, amaurosis, f. *ἀμαυρό-ω* to darken, f. *ἀμαυρός* dark; *μεταμόρφωσις* transformation, f. *μεταμορφό-ω*, f. *μετά* + *μορφή* form. Many such words also were formed directly from the sbs. or *adjs.* themselves, or their compounds, without the intervention of a vb. in -*ό-ω*, e.g. *ἀνθράκωσις* malignant ulcer, anthracosis, f. *ἀνθραξ*, *ἀνθρακο-* coal, carbuncle, *ἐξόστωσις* outgrowth of bone, exostosis, f. *ἐξ* out + *ὀστέο-ν* bone.

Many of these Greek terms have been adopted in Latin ancient or modern, whence they have passed into English use, e.g. *anastomosis*, *apothecosis*, *metamorphosis*, rhetorical terms, as *anadiplosis*, *miosis*, and esp. medical terms, as *amaurosis*, *anchylosis*, *cyphosis*, *exostosis*, *scelerosis*, *thrombosis*, etc. On the analogy of these last, others have been freely formed in mod.L., Eng., and other modern langs., from Greek elements, as *chlorosis*, *cyanosis*, *ichthyosis*, *trichinosis*; less frequently from Latin, as *pediculosis*, *tuberculosis*. The stress is etymologically -*ōsis*; but popular use has shifted it in *meta'morphosis*; so *ana'morphosis*. The Ger. form of the ending is also -*osis*, the French is -*ose*.

1890 W. TURNER in *Jrnl. Anat. & Physiol.* XXV. 106 He [sc. Broca] has classified the Mammalia, in relation to the magnitude of their olfactory apparatus, into two groups: osmatic mammals, which possess a well-developed rhinencephalon with a keen sense of smell, and anosmatic mammals, in which the rhinencephalon and olfactory sense are either feeble or not developed at all. **1903** *Amer. osmazome ('ɒsməzəm, 'ɒz-). *Chem.* [a. F. *osmazôme* (1812 in Hatz.-Darm.), irreg. f. Gr. *δωμή* scent + *ζωμός* soup, sauce.] The name given by Thénard to that part of the aqueous extract of meat which is soluble in alcohol and contains those constituents of the flesh which determine its taste and smell.

1819 J. G. CHILDREN *Chem. Anal.* 307 Osmazome is obtained from muscle; it has a brownish yellow colour, and the flavour and smell of broth. . . osmophore ('ɒzməʊfɔ:(r)). [f. OSMO⁻¹ + -PHORE; in sense 1 a back-formation from OSMOPHORIC *a.*] 1. A chemical group whose presence in the molecules of a substance causes it to have a smell.

1919 *Perfumery & Essent. Oil Rec.* 21 May 105/1 Both Rupe and Majewski and Cohn point out that one osmophore can often replace another without distinctly changing the odour. 1944 R. W. MONCRIEFF *Chem. Senses* ix. 185 The ether group is only a weak osmophore and is easily overpowered by other features of the molecule. 1963 W. SUMMER *Methods Air Deodorization* i. 66 One and the same osmophore appearing with different molecules usually causes different odours.

2. [ad. It. *osmofofo* (G. Arcangeli 1883, in *Nuovo Giornale Bot. Ital.* XV. 75).] A scent gland found in the flowers of certain plants belonging to the families Orchidaceae, Araceae, Aristolochiaceae, and Asclepiadaceae.

1966 S. VOGEL in *Proc. 5th World Orchid Conf.* 254/1 We could find such glands, called osmophores, in many different orchidaceous groups... A genuine scent organ or osmophore... may be defined as a glandular, multicellular and clearly differentiated tissue within the floral region, which is well exposed to the atmosphere. 1967 *New Scientist* 22 June 725/2 Several orchids and a few other flowers have... developed glands (osmophores) producing scent substances (terpenes) in liquid form. 1974 C. L. WITHNER et al. in C. L. Withner *Orchids* vi. 305 The scent tissue is ultimately organized into scent glands, or osmophores.

osmund¹ ('ɒzmənd). Forms: 3-7 osemond, 5-8 osmond, (5-6 -monde), 5- osmund, (5-6 -munde, 7 osmound, 9 osement). [From Sw. or LG.: cf. OSw. The Eng. form from 1400 appears to be from Sw., but the earlier examples have the MLG. form (which, however, might be due to Hanseatic traders). osprey ('ɒspreɪ). Forms: 5-7 ospray(e, 7 aspray, osperaye, ospraie, -eie, 6- osprey. [First found in 15th c.; app. repr. L. *ossifraga*, lit. But the connecting ME. and OF. forms have not been found, and it is remarkable that the word is of so late appearance in both langs.

Pliny's *ossifraga* is identified by modern ornithologists with the Lammergeyer, but it was rendered by Du Ronet in F. *orfraye*, and by Holland 'orfraie or ospreie', and the transference of the name from the Lammergeyer to the Fish-hawk must have occurred at an early date, if *osprey* actually represents *ossifraga*. 2. A milliner's name for an egret plume worn as an ornament on a lady's hat or bonnet; sometimes, like *aigrette*, extended to an artificial plume or other ornament used for the same purpose. (It has been thought that this erroneous use arose from associating *osprey* with *spray*.)

osse, **oss** (ɒs), *v.* Now *dial.* [Found in w. midl. dialect in 14th c., and still common from the Welsh Border to Cumbria and Northampton; much affected by Ph. Holland in his versions of Latin authors, to render *ōminārī* and its synonyms, as is OSSE *sb.* to render *ōmen*. The latter has not been found in previous writers, though Holland (who, as Head Master of Coventry Free School, had opportunity of knowing the facts) refers to both *sb.* and *vb.* as old words well known in the North. (See OSSE *sb.* quot. 1600.) According to the known evidence, the *sb.* appears to be derived from the *vb.*, but the origin of both is involved in obscurity.

Holland was confirmed in his use of these words by believing them to be derived from Gr. *ὄσσα* 'ominous voice or sound, prophecy, premonition', the coincidence of which and its *vb.* *ὄσα-σθαι* 'to presage, foretoken, forebode' with *osse sb.* and *vb.* is certainly very remarkable; yet it is impossible that an English *vb.* in popular use in the 14th c. could be derived from Greek without many intermediate links, of which in this case none are found. The verb is also used in mod. colloquial Welsh as *osio* 'to give token of, show promise of', but in the opinion of Prof. Rhys and Dr. Silvan Evans, this is merely a recent adoption from the adjacent English dialects. (Ray's conjecture of identity with F. *oser* 'to dare' (founded on a modern dialect use), is phonetically and historically futile.)]

1. *a.* A very large ratite bird, *Struthio camelus*, the only species of the genus *Struthio* and the family *Struthionidae*, inhabiting the sandy plains of Africa and Arabia; it is the largest of existing birds.

The habits and peculiarities of the bird, real and fabulous, have afforded much scope for proverb and allusion; such are its indiscriminate voracity and its liking for hard substances, which it swallows to assist the gizzard in its functions; its supposed want of regard for its young, its eggs being partly hatched by the heat of the sun, which has led to the belief that it deserts its nest; and the practice attributed to it of thrusting its head into the sand or a bush when being overtaken by pursuers, through incapacity to distinguish between seeing and being seen.

† **other**, *conj.* and *adv.*² *Obs.* Forms: 2–5 *oþer*, 2–6 *other*, 4–5 *oþere*, *othire*, *othir*, -*yr*(e), 4–6 *uther*; 6 *oder*, -*ur*. *β.* 4 *oīþer*, *oīther*. [The OE. word for 'or' (F. *ou*, L. *aut*, and *sive* or *vel*, G. *oder*) was *oððe*, earlier *oððā* (also *eððā*) = Goth. *aīþþau*, OS. *eþþo*, *oððo*, OHG. *eddo*, *edo*, later *odo*, MHG. *ode*, *oder*, Ger. *oder*. The alternative 'either...or' was expressed by *oððe...oððe*. This form was superseded *c 1130* by *oðer* (first in O.E. Chron., anno 1127; last example of *oððe*, in a sentence in which *oðer* also occurs, 1131). The MS. of the OE. transl. of *Περί διδάξεων* (1200–1225) has regularly *oððer* for OE. *oððe*.

Though the date of the first appearance of this conj. is so narrowly defined, its actual source remains a debated question. It has been held to be identical with the adj. pron. OTHER (see prec.), and (more frequently) with the adj. pron. OUTHIR, OE. *āhwæðer*, *āwðer*, *āðer*. Both these pronominal words were indeed in OE. used anticipatively, to introduce the alternative *oððe...oððe*... (see OTHER *adj.* pron. B. 1 b, OUTHIR *adj. pron.* 1 b); but there is no trace in OE. of *āwðer* (*āðer*) or *oðer* taking the place of the first member of the alternative *oððe...oððe*..., much less of both members, and least of all of the simple conj. *oððe*. On the contrary, the simple conj. remained invariably *oððe*, and the alternative (so far as the evidence shows) *oððe...oððe*..., down to the abrupt substitution of *oþer* *c 1130*. It is true that in the 14th c., in northern, north-midl., and e.-midl. Eng., *awþer*, *ouþer*, began to take the place of *oþer* as first member of the alternative *oþer...oþer*..., or *oþer...or*... (the second remaining as *or*, less usually *oþer*), just as later still (in Wyclif and Chaucer) *either* became the midland form of the first member; but these were changes several centuries later than the substitution of *oþer* for *oððe* *c 1130*, with which they have no historical connexion. It seems more probable that the *oþer* or *oþer* of 1130 was a modification of *oððe* itself, due to some association with words in -*er*; *oððe* being a stressless word was probably reduced in pronunciation to *oðe* (cf. OE. *nalæs* from *nalles*, *sithen* (1140) from *siððan*, etc.). Thus we are reminded of the parallelism of development between HG. *eddo*, *edo*, *odo*, *ode*, *oder*, and OE. *eððā*, *oððā*, *oððe*, (**oðe*), *oþer* or *oþer*, and are led to suspect, for the *r* of German *oder* and of ME. *oþer*, the same or a similar explanation. The form *oððer* used by the early 13th c. scribe of *Περί διδάξεων* may either be his accommodation of the *oððe* of his original to the *oþer* of his own day, or an actual intermediate form. It does not seem possible to fix the quantity of the *o* in ME. *oþer*, even from Ormin's spelling; but, if derived from *oððe*, **oðe*, it was presumably short. Ormin's reduced form *oþþr* and *orr* (see *or conj.*), and the later *or*, had, of course, short *o*, from which the (3:) of mod. emphatic *or* is regularly developed.

III. As auxiliary of predication.

5. The general verb to express duty or obligation of any kind; strictly used of moral obligation, but also with various weaker shades of meaning, expressing what is befitting, proper, correct, advisable, or naturally expected. Only in pa. t. (indic. or subj.), which may be either past or present in meaning. (The only current use in standard Eng.)

The subject is properly the person (or thing) bound by the obligation, which latter is expressed by a following infinitive (with, formerly also without, *to*), sometimes omitted by ellipsis. Followed by a passive infinitive, it expresses obligation on the part of some undefined or unexpressed agent, the subject in this case being the person, etc. to whom the obligation is due (e.g. *parents ought to be honoured* = it is a duty to honour parents).

a. In past sense: = Owed it to duty; was (were) bound or under obligation (*to do* something). Usually, now only, in dependent clause, corresponding to a preceding past tense in principal clause: *he said you ought* = he said it was your duty. (Cf. c below.)

a. **c1200** *ORMIN* 19108 Annd tohh swa pehh ne cnew himm nohht þe werelld alls itt ahhte. **1297** R. GLOUC. (Rolls) 4135 Vor he truste to hom mest, as me pinceþ he wel aste. **c1300** *Havelok* 2787 Yif þat she aucte quen to be. **1382** *WYCLIF Isa.* v. 4. **c1425** *WYNTOUN Cron.* viii. ii. 52 Robert þe Brwys, Erle of Karryk Aucht to succeed to þe Kynryke.

Eng.* x. II. 592 To convince him that he ought to stay where he was. **1892** *Law Times* XCIII. 414½ He [the judge] did not think that the defendant ought to be kept in prison any longer.

b. In present sense: = Am (is, are) bound or under obligation; *you ought to do it* = it is your duty to do it; *it ought to be done* = it is right that it should be done, it is a duty (or some one's duty) to do it. (The most frequent use throughout. Formerly expressed by the pres. t., *OWE* v. 5.)

This appears to be orig. the pa. subj. (which in ME. and mod.Eng. has the same form as the indic.) used first in hypothetical or general cases; e.g. Ought one to tell the truth under all circumstances? If it should rain, he ought not to go. If he cannot go to-day, he ought to go to-morrow. Thence, in definite present sense, as Tell me what I ought to do now. The use of the pa. subj. softens the form of the expression; cf. the parallel *you should for it is your duty*; also *would you for will you; might I for may I; could you for can you*.

ourself (aʊə'self), *pron.* Forms: see OUR and SELF. [A parallel formation to next, with *self* instead of *selves*, appearing first in 14th c.

It may have arisen out of *our selven*, through *our selve*, *our selfe*, finally with *e* mute, as in the infinitive of vbs. (e.g. *holden*, *holde*, *hold*); but, on the other hand, it may have been a distinct formation, with the uninflected *self* (cf. *myself*, *ourselves*, with *my own*, *our own*.)]

Emphatic and reflexive pronoun, corresponding to *we*, *us*, originally not differing

in sense from OURSELVES; but subsequently differentiated, so as to be used mostly in those cases in which *we* refers to a single person or is not definitely plural; e.g. in royal, divine, or editorial utterance, or when used vaguely in the sense of *one, oneself*.

In mod. South Sc. *oursel* is collective, *oursels* is individual; e.g. 'we do everything *oursel*', but 'we'll settle it atween *oursels*'.

I. Emphatic. 1. Standing alone, as subject, as object direct or indirect, or in predicate after *be, become*, or the like.

-**ous, suffix**, repr. L. -*ōs-us* (-*a, -um*), forming adjs., with the sense of 'abounding in, full of, characterized by, of the nature of', e.g. *cōpi-ōs-us* plentiful, copious, *dolōr-ōs-us* full of sorrow, dolorous, *fām-ōs-us* famous, *gener-ōs-us* distinguished by descent, generous, *glōri-ōs-us* full of glory, glorious, *spin-ōs-us* full of thorns, thorny, spinous, *visc-ōs-us* of the nature of birdlime, sticky, viscous, etc. Latin stressed long *ō* passed in OFr. into a closer sound, intermediate between *ō* and *ū*, which was variously written *o* or *u*, less commonly *ou*; hence L. adjs. in -*ōsus*, which either came down in popular use, or were adopted at an early date, had in OF. forms in -*os*, or -*us* (-*ous*), e.g. *coveitos, -us, doleros, -us, envios, -us, glorios, -us, religios, -us*. In the 13th c. the vowel-sound had changed to (ø) written *eu*, so that the suffix had now the form -*eus* (*covoiteus, dolereus, envieus, glorieus*, etc.); and this still later was written in the masc. -*eux* (*convoiteux, envieux, glorieux*, with fem. however in -*euse*), as still in modern F. In Anglo-Fr. and early ME.

the forms were the same as in early OF. (*coveitos, -us, envios, -us, glorios, -us*), but the vowel was soon identified with OE. long *ū*, and like it written after 1300 *ou* (*covetous, envious, glorious*), the spelling ever since retained, though the sound has passed through (-*us, -us, -us*) to (-*as, -as*). This -*ous*, having thus become the form of the suffix in all words from Norman Fr., became the established type for all those of later introduction, whether adaptations of Fr. adjs. in -*eus, -eux*, or L. adjs. in -*ōsus* (but see -OSE¹), or new formations on the analogy of these, from Fr., L., or other elements.

These new formations are numerous in the Romanic languages. In French they have been formed freely, not only from L. sbs. which had no such derivative in ancient L., but also from French words themselves of L. origin, and from mediæval and modern words from divers sources. Many of these new formations have, in earlier or later times, passed (with change of -*eux*, etc., to -*ous*) from French into English. Such is the history, for example, of *advantageous, adventurous, courageous, dangerous, gelatinous, grievous, gummy, hazardous, hideous, joyous, lecherous, matinous, mountainous, orguillous, pulpous, ravenous, riotous, slanderous*. This process has been continued in Eng. itself, where new adjs. in -*ous* have been formed, not only on Latin, Greek, and Romanic bases, but also on native Eng. words and on some of obscure origin; e.g. *blusterous, boisterous, burdensome, feverous, murderous, poisonous, slumberous, thunderous, timous, troublous, wondrous*.

In some words in late or med.L. the ending -*ōsus* was added to an adj., or at least a form in -*ōsus* is found beside the simple adjective, e.g. *decōr-us, decorōs-us, dubi-us, dubiōs-us*, in It. *decoro, decoroso, dubbio, dubbioso*. In the Romanic languages a few new forms of this kind appear; e.g. L. *pi-us, F. pi-eux* (as if from **piōs-us*). But in English, this addition of the suffix has been greatly developed, and has become the ordinary mode of anglicizing L. adjs. of many kinds, esp. those in -*eus, -ius, -uus, -er, -ris, -āx, -āci, -ōx, -ōci, -endus, -ulus, -vorus, -ōrus*, e.g. *aque-ous, igne-ous, extrane-ous, herbace-ous, consci-ous, obvi-ous, vari-ous, ardu-ous, exigui-ous, adulter-ous, aurifer-ous, armiger-ous, alacri-ous, hilari-ous, illustri-ous, capaci-ous, feroci-ous, stupend-ous, garrul-ous, omnivor-ous, sonor-ous*.

This tendency to represent a L. adj. by an Eng. form in -*ous* may have been strengthened by the fact that the 'dictionary-form' of the L. adj. is the nom. sing. masc., and that this in the majority of adjs. ends in -*us*, the Eng. pronunciation of which is the same as that of the Eng. word in -*ous*, so that the latter to the cursory observer appears to be merely an Eng. spelling of the L. It is evident however that *igne-ous*, for example, answers not only to L. *igne-us*, but to *igne-a, igne-um*, etc., and that the -*ous* is an additional element. And in comparing *alacri-ous* with *alacer*, *hilari-ous* with *hilari-s*, *capaci-ous* with *capax, capāci-*, the suffixal nature of the -*ous* is manifest.

b. In some words, -*ous* is a corruption of another suffix, e.g. in *righteous, wrongous, courteous, gorgeous*; in others, as *bounteous*, a contraction of an earlier suffix has taken place before -*ous*: see -EOUS.

c. In *Chem.*, adjectives in -*ous*, formed on the names of elements, indicate acids and other compounds containing a larger proportion of the element in question than those expressed by an adj. in -*ic*: e.g. *chlorous acid, sulphurous acid, cuprous oxide, ferrous salts*, etc.: see -IC 1 b.

d. Nouns of quality from adjs. in -*ous* (however derived), are regularly formed in -*ousness*, as *covetousness, consciousness, gorgeousness, righteousness*; those from L. -*ōsus* have sometimes forms in -*osity*, as *curiosity, generosity, porosity, viscosity*; but this termination more frequently accompanies adjs. in -OSE¹.

out, obs. form of OUGHT, AUGHT.

out- in *comb.* is used with substantives, with verbs and their derivatives, and with other adverbs.

In OE. *út* adv. was already prefixed (1) to ordinary sbs. in the sense 'that is without', 'out-lying', 'external', as in *útlánd* a country that is out, a distant or foreign land, *úthere* an army belonging to or coming from without, a foreign army; (2) to verbal sbs. and nouns of action and agent-nouns derived from verbal roots, as *útfær*, *útfara*, *útfærelld*, *útgang*, going out, exit, departure, *útdræf*, expulsion, *útdræfere* one who drives out, *útlád* carriage out, exportation, *útryne* running out, excursion, expiry; (3) to elements forming adjs., either related to the sbs. in 1, as *útlende*, *útlendisc*, outlandish, foreign, or derived from vbs. (ppl. adjs.), *útiernende* out-running, purgative. In these 'nominal compounds' the stress was always on the prefix.

With verbs, *út* like other adverbs formed separable collocations or semi-compounds, in which the position of the adv. was shifted according to the construction of the sentence, as in the separable compound verbs of modern German (although in OE. the order was not yet so rigid). Thus, *út* followed the vb. in the imperative, as *gá út!* *adó út þone bēam*, and in the pres. and pa. indicative in the principal sentence, as *he cȳp út*, *he eode út*, *ða flugon hi út*. But in the dependent sentence, and in all other moods or parts of the vb., including the infinitive and pples., and all nominal derivatives, the adv. stood immediately in front of the vb.; thus *ða he út cȳp* when he comes out, *gif he út cȳme* if he come out, *nú wille we út gán* now will we go out, *út gangendum ðam mǫnþe* on the month going out. In OE. the adv. was regularly written separate; but in translations from Latin, compound verbs in *ex-* were sometimes rendered by compound vbs. in *út-* in which the adv. was not only joined, but even retained before the vb. in the principal sentence: e.g. Ps. xviii. 5, 'in omnem terram exivit sonus eorum', *Vesp. Ps.* 'út in all eorðan uteode swoeg heara'. The regular position of *út* before the vb. in the inf., gerund, and pples., naturally tended to make the collocation pass into a combination, esp. when these were used as sbs. or adjs.; and this is the cause why *outgoing*, *outgoer*, *outgone* belong in meaning to *go out*, *outstretching*, *outstretched* to *stretch out*, *outgrowing*, *outgrowth* to *grow out*, *outlook*, *outlooker* to *look out*. It is only in later Eng. that such collocations as a *going-out* dress, a *clearing-out* of cupboards, the *bringers-out* of a new play, a well *thought-out* article, have become possible.

As to the verbs themselves, in ME., usage became more lax. On the one hand, the adv. began to be placed after or away from the vb. in the subordinate sentence, the infinitive, etc.; on the other hand the older usage of the inf. in *út gán*, and the like, was often extended to the indicative, so that we find *he out yede*, *the blod out brast*. This was partly due to a general levelling and loss of old syntactical distinctions, so that beside *he sprang out* and *then sprang he out*, it became allowable also to say *he out sprang* and *out sprang he*, in both of which the adv. stands before the vb. These novelties in word order were especially employed by metrical writers as facilitating the exigencies of rhythm and rime, and it is chiefly in metrical compositions that they are found. But they also occur in translations from Latin, as e.g. in the works of Wyclif, in which L. vbs. in *ex-* are constantly rendered by Eng. verbs preceded by *out*. In ME. the elements were still commonly separated in writing; but modern editors have usually hyphened these collocations as compounds.

As a result of these various causes, there are numerous *quasi*-compound vbs. in *out-* in occasional use, chiefly poetical, in precisely the same sense as the ordinary prose form in which the simple verb is followed by the adv., e.g. *out-pour* = *pour out*. Not infrequently, moreover, where *out* stands before a vb. as a mere metrical or poetical inversion, as in 'A frightful clamour from the wall out broke', 'Out went the townsmen all in starch', the two words, though merely inversions of *broke out*, *went out*, are hyphened as if compounds. The tendency so to treat them is probably strengthened by the existence of *outbreak* (sb.), *outbreaker*, *outbreaking*, *outbroken*, *outcome*, *outcoming*, and the like. But in these latter the position of the adv. is original, and the stress is on *out*, while in *out broke*, *out went*, the stress is on the vb.

On these accounts it is difficult to deal satisfactorily with the hyphened *quasi*-compounds in *out-*. Such as seem of importance, or occur as senses of *out*-verbs having other senses, are given among the Main words (where it is often indicated that they are not true compounds, or are only poetical); others are given in this article, but no attempt has been made to exhaust them. The same is true of vbl. sbs., and ppl. adjs. in *-ing*, ppl. adjs. in *-ed*, *-en*, etc., and agent-nouns in *-er*, which are permanent possibilities from any verb that can be followed by *out*, as in *outgoing*, *outgone*, *outgoer*, from *go out*.

True compound vbs. in *out-* are those in which it imparts the sense of outdoing, surpassing, exceeding, or beating in some action, as in *outlive*, *outbid*, *outnumber*, *outface*, and the various extensions of these contained in C. II. These are of later origin: a very few (e.g. *outlive*, *outproffer* = *outbid*, *outpass*) appear in the end of the 15th c.; they increase gradually during the 16th c. (*outrun* in Tindale, *outcry*, *outeat*, *outgo*, *outride*, *outrime*, *outrow*, in Palsgr.), and become numerous only *c* 1600, being freely and boldly employed by Shakspere, who is our earliest authority for many of them, including the curious group typified by 'to outfrown frowns', 'to out-Herod Herod'. It is not very clear how this use arose, or to what sense of *out* it is to be referred. But the earlier of these *out*-compounds were in nearly every instance preceded by a form with *over-*. Thus *outlive* (1472)

was preceded in same sense by *overlive* (in OE.) = F. *survivre*; *outpass* in 'the Water of Thamys outpassynge his boundys' (1494), was preceded by *overpass* = F. *surpasser*. It would seem therefore that *out-* has here the sense of 'beyond'. It is possible however that in *outlive* there entered in some association with *out* 6 b, 23, as if it were 'to live to see another *out* or at an end'. One who *outbids* another, bids *beyond* his rival until he drives him *out* of the contest. Cf. also the relation of the two notions in 'the ship outrode the storm', and 'the horseman outrode his pursuers', or 'he outrode all competitors in the race'.

I. *Out-* in comb. forming sbs.

* in combination with ordinary sbs.

Of these a few existed already in OE., e.g. *útlánd* outside or outlying land, foreign land, OUTLAND, *útgársecg* the outer ocean (see OCEAN), *útgemære* extreme boundary, *úthealf* external side, outside, *útweald* outlying wood; *úthere* foreign army, *útwicing* foreign pirate or viking. The number of these has in later times been greatly increased. Those of longer standing are written as single words; in the more recent, the two elements are usually hyphened, but they are also sometimes written separately, in which case *out* functions as an adj. = 'external, exterior, outlying, outer': see OUT a. As the meaning is the same either way, the separation or hyphening of the two elements is in many cases optional. (Cf. BACK-.)

23. a. In most of the groups 18–22, the compound vb. in *out-* may be cognate with the object, being formed either on the simple verb belonging to the object, or directly on the object itself, usually unchanged, but sometimes with a verbal ending (e.g. *-ize*). The object may be a person or a thing, and the sense is 'to outdo the agent in his own sphere or work', or 'to exceed or surpass the action, quality, or other thing'. Our earliest examples of this are from Shakspeare, who has 'out-frowne Fortune's frowne', and 'out-villaind villanie'; it is rare in the 17th c., but greatly used in the 19th, when also those formed on adjs. appear. Thus, formed on vbs., *to out-cook all cookery, out-beg a beggar, out-blunder former blunders; out-compete competition or competitors, outfish fish, out-rival a rival or rivalry*. From adjs., *to out-old the old, out-royal royalty*. From sbs., *to out-ambush ambushes, out-balderdash balderdash, out-blarny blarny, out-calvinize Calvinism, out-faminize famine, out-fiction fiction, out-horror all horrors; out-bishop the bishop, out-devil the devil, out-fiend fiends, out-jingo the jingo, out-modern the moderns, outmonster the monstrosities, outrainbow the rainbow, out-saint the saint, out-usure the usurer*. A few examples are added in chronological order to show the development of this usage.

b. Hence esp. with proper names of persons, nations, sects, etc., in the sense of 'to outdo the person, etc., in question in his special attribute'. The classical example is Shakspeare's OUT-HEROD *Herod*; a few instances are found in the 17th c., esp. in Fuller, and in the 18th c. in Swift; but the vast development of this, as of so many other Shaksperian usages, belongs to the 19th c., in which such expressions have been used almost without limit. Examples are *out-Achitophel*, *-Alexander*, *-Bentley*, *-Boniface*, *-Bonner*, *-Brutus*, *-Darwin*, *-Milton*, *-Mormon*, *-Nero*, *-Ottoman*, *-Quixote*, *-Sternhold*, *-Timon*, *-Toby*, *-Trollope*, *-Turk*, *-Zola*, etc.; and, with verbal ending, *out-Calvinize*, *-Germanize*, *-Gothamize*, *-Hobbesize*, *-Pantagrulize*, etc. A few examples follow in chronological order to illustrate the growth of the usage.

[Early ME. *ūthēs*, whence later *outhes*, *-hese*, and (with shortening of unstressed second element) *outes*, *outis*, *outas*; also, in 13th c., *ūthest*. Common in 13th c. in legal documents in the Latin forms *uthesium*, *huthesium*, *hutesium*, and later *huesium*. These have been sometimes thought to be the source of the ME. word, and to be themselves of OF. origin, derived from *huer*, *huier*, to cry, *hu*, *huee* cry (*hu e cri*, hue and cry), which suits the sense perfectly. But *hutesium* cannot be etymologically accounted for from this source, nor is the word known in any form, Latin or vernacular, outside England. On the other

hand, *ūthēsium* as a latinization of ME. *ūthēs* is quite in order. It is very likely, however, that *hutesium* and (still more) *huesium* are Norman Fr. alterations, due to association with *hutz*, *hu*, *huē*. *Utheis*, *utheys* are also most easily explained as Anglo-Norman formations from *uthesium*. As to the sense, *ūthēs* could hardly mean 'outcry', but might well be the 'calling upon' people to the pursuit of a thief or other ill-doer, which is the sense in the oldest and other of the quotes. (Compare the expressions *levare clamorem*, *levare hutesium*, *lever le hu*.)

An outcry, raised against a thief or the like, hue and cry; also, outcry generally, clamour.

b. Astr. A solar radio emission of great intensity and several minutes' duration which occurs in conjunction with a solar flare.

1947 C. W. ALLEN in *Monthly Notices R. Astron. Soc.* CVII. 387 Besides steady noise and bursts, one can detect, rather rarely, sudden outbursts of radio noise, which last for a few minutes, fluctuating violently, and then disappear. *Ibid.* 394 It is this correlation between flares and outbursts that shows that an outburst has a particular physical significance. **1955** *Sci. Amer.* June 42/3 The more common type of burst is a brief surge of intensity lasting only a few seconds; we call this a 'radio flash'. During a week of intense activity on the sun, there may be 100 flashes. The second type, far less frequent, is a burst lasting several minutes; this is called an 'outburst'. The outbursts . . . come only during a solar flare. **1971** J. S. HEY *Radio Universe* v. 104 Large flares are often accompanied by very intense outbursts of radiation on metre wavelengths lasting between about 5 and 30 min. In a classification of radio bursts according to their characteristic properties, these outbursts have been designated as Type II radio bursts. *Ibid.* 108 The microwave outbursts, often called microwave Type IV, sometimes accompany large flares and are particularly interesting because of their association with solar cosmic rays.

† 'outfang, thief. *Old Eng. Law. Obs.* In 2 utfangene þeof, utfangentheif; 3 utefang-, utfangen-, 3, 4 utfangen(e)-, -fange-, -thef. [Answers to an OE. type *útfangenne þeof* (accusative case) 'out-caught thief'; but the expression appears to have come into use later, to match *infangenne þeof*, INFANGTHIEF, q.v.] A franchise of a lord of a private jurisdiction, more extensive than that of INFANGTHIEF; originally, the lord's right to pursue a thief (at least when the latter was 'his own man') outside his own jurisdiction, bring him back to his own court for trial, and keep his forfeited chattels on conviction. But the right was variously defined or circumscribed in the 13th c., when its meaning seems to have already become conjectural.

The term *infangenne þeof* occurs in several OE. Charters, but of *útfangenne þeof* no trace has been found except in an alleged charter of Egbert dated 828 (*Birch Cartul. Sax.* No. 395), which has the Latin phrase 'cum furis comprehensione intus et foris' the apparent equivalent of an OE. 'mid infangenum þeofe and útfangenum'. But this is extant only in the *Liber Roffensis* (1120-50), and may be spurious, or the phrase may be a 12th c. interpolation. The term is wanting from an Eng.-Fr. Glossary of Law Terms compiled 1122-1150 (*Wright Reliq. Antiq.* I. 33) which contains 'Infangenethef—larum pris ens nostre tere'. On the other hand, *utfangene þeof* occurs in the forged Charter of Edgar to Glastonbury (Birch, No 1277), which was in existence before William of Malmesbury made the third version of his *Gesta Regum* 1130-40 (in which the charter is given); and it may thus go back to 1100, or even earlier.

The etymological sense 'out-caught-thief', i.e. 'thief apprehended outside' (the jurisdiction), is that assigned to it in the Ripon record of 1228, in which the grant of 'infangethef et outfangethef' was explained as giving the grantee the right to try 'his own thief' *ubicumque captum*, whether within or without his territorial jurisdiction. But Bracton and *Fleta* explain it as the right to try thieves coming from *without*, and apprehended within the lord's jurisdiction; they both expressly deny that it meant a thief *taken outside*, or that such a thief might be brought back into the jurisdiction to be tried. *Fleta* however adds that, after his own thief had been condemned by the outside tribunal, the lord might bring him into his jurisdiction and hang him on his own gallows; and the right to do this appears to be all that Britton knows as 'the franchise of outfangenthef'.

Early legal use had forms identical with AFR.; but forms with *outlaw-*, conformed to the contemporary Eng. word also occur from 14th c.]

1. *a.* The action of putting a person out of the protection of the law, or the legal process by which a person is or was proclaimed or made an outlaw; the condition of one so outlawed. †In early use, often = exile, banishment.

'Outlawry, at first a declaration of war by the commonwealth against an offending member, [gradually] became a regular means of compelling submission to the authority of the courts, as in form it continued to be down to modern times'. 'Before the Conquest, outlawry involved not only forfeiture of goods to the king, but liability to be killed with impunity'. In the 13th c. 'outlawry loses some of its gravity; instead of being a substantive punishment, it becomes mere "criminal process", a means of compelling accused persons to stand their trial'. (Pollock & Maitland, *Hist. Eng. Law I*, 27, 459.) In the 14th c. the process was extended from cases of felony to misdemeanours and civil actions, so as to be a punishment for contempt of court in not appearing to answer an indictment or defend a personal action, or for disobedience to a judgement of the court. Outlawry for debt was frequent down to the 18th c. Along with this extension of the process, its conditions and consequence underwent continuous mitigation; in later times, in civil actions, it was reduced to the fact that the outlawed person was incapacitated from prosecuting an action for his own benefit, though he might still defend himself.

Clandestine Outlawries. In civil proceedings, outlawry has long been obsolete, and was formally abolished by the Civil Procedure Acts Repeal Act of 1879 (42 & 43 Vict. c. 59). While it was in use, great injustice was often done in consequence of the insufficiency of the machinery for giving public notice of the fact that a defendant in a personal action had, as a result of civil process, been made an outlaw. In 1588-9, Act 31 Eliz. c. 3 was passed 'for the auoyding of secret Outlawries in Actions Personall against the Queenes Subiects'. This being subsequently considered insufficient, amending measures were introduced; and one such bill has had the singular fortune to become the formal instrument of asserting the right of Parliament to proceed to business without reference to the immediate cause of summons, by being introduced and read a first time as the first business of every session, before the reading of the King's or Queen's Speech. This precaution goes back to early times, being referred to as an established practice in 1603. Formerly some one bill was used for the purpose on each occasion; but since 1 Dec. 1743, the means uniformly employed has been a Bill 'for the more effectual preventing Clandestine Outlawries in personal actions'; and this is still annually introduced, although the outlawries against which it is directed have long disappeared.

Du. has analogous uses of *uitlegger*, -ligger 'outlier'; but the later date of this prevents it (notwithstanding Dampier's

assertion: see sense 2) from being viewed as the source of the Eng. word.

Du. *uitlegger* 'outlier' appears in Kilian, 1599, only in the sense of 'stationary guard-ship lying out in front of a port, etc.' From 1671 (Witsen *Scheeps-bouw* 55 a) it is found in a sense akin to 1 below. The 'outrigger' of the Indian seas (sense 2) is described in Du. works from c 1600 without any name; in Valentijn *Oud en Nieuw Oost Indien* I. 2 (1724) it is called *vlerk* (*i.e.* wing), the name still in common use; but beside it the name *uitlegger* is found in Dutch dictionaries of the 19th c. (Twent *Zeemans Woordenb.* 147 b, 1813, etc.) Thus, so far as yet known, both uses of *uitlegger* are later than the corresponding senses of the Eng. word.]

out of ('autav), *prep. phr.* Also 1-4 *út of*, 4- out o, (7- o'), 4-7 out a; 4-6 oute, owt(e of. [orig., and still in writing, two words, viz. the adv. **OUT** followed by the prep. **OF** (in its primary sense = from). In analysis *out of* is precisely on the same level with the obs. *down of*, *up of*, and the current *forth of*, *out from*, *out to*, *down from*, and other instances of an adv. followed by a prep. which defines its relation to an object. But in OE. as in OS. and the Scandinavian langs. *út of* (OS., ON. *út af*, Sw. *ut af*, Da. *ud af*) became the regular equivalent of L. *ex*, Gr. *ἐξ*, *ἐκ* (while Ger. and Du. used the adv. itself as a prep.); *out of* has thus acquired a unity of sense and also of pronunciation, which entitle it to separate treatment, whereby also its own sense-development can be more distinctly exhibited.

The history of *out of* is partly parallel to that of *in to*, with the differences that the latter is now written *into* as one word, and that *out of* is the opposite, not only of *into*, but also of the static *in*. One reason why *out of* has not needed to be written as one word may be that the distinction now made between *into* and *in to* is in the case of *out* expressed by *out of* and *out from*; thus 'they came in to me, into my house', 'he went out from me, out of my house'.]
