5. A term applied to certain maintainers and abettors of thieves or freebooters.

In 9 Hen. V. it appears from the context to be applied to persons in Redesdale who maintained and fitted out thieves for depredations in the adjacent counties: cf. senses 3 and 4. Bp. Jackson seems to have understood and used it of persons who put out their neighbours' cattle or goods into places handy for thieves with whom they were in league: cf. OUTPUT *v.* 1 b, quot. 1615. But the *out-putters* of 1421 were not the neighbours of the persons robbed, but felons living beside the thieves in Tynedale and Redesdale.

Note. Rastell's Eng. transl. of the Statutes (ed. 1543) reads in the Act of 1421 'felons called yntakers and outparters', an obvious misprint, which was however repeated in all editions previous to that of Ruffhead in 1763 (which retains 'outparters' in the text with 'outputters' in the margin). Hence 'outparter' was accepted as a genuine word by Cowell, who in his *Interpreter* further identified the 'outparter' with the thief, with which erroneous explanation the bogus word has duly reappeared in the Law Dictionaries down to Wharton, as well in Phillips, Kersey, Bailey, Ash, Crabbe, Ogilvie's *Imperial Dict.*, *Century Dict.*, and Funk's *Standard Dict.*: it was eschewed by Johnson and Webster. As if one error were not enough, Wharton has also *Outputter*, with an explanation founded upon the latter part of Cowell's article, but making 'man or house' into 'manor-house' (!). This last blunder is taken over from Wharton by Cassell's *Encycl. Dict.*, Ogilvie, and *Century Dict.* (all professing to take it from Cowell). In Hodgson, *Hist. Northumbld.* pt. 11. l. 60, the 'outparters' of 1543 appear in a new guise as 'outpartners', erroneously said to be used in the Supplication of 1421, which has *Out-putters*.

1607 COWELL *Interpr.*, *Outparters*, anno 9. H. 5. ca. 8, seemeth to be a kind of theeues in Ridesdall, that ride abroad at their best advantage, to fetch in such cattell or other things, as they could light on without that liberty: some are of opinion that those which in the forenamed statute are termed out-parters, are at this day called out-putters, and are such as set matches for the robbing of any man or house: as by discovering which way he rideth or goeth, or where the house is weakest and fittest to be entred. See *Intakers*. **1658** PHILLIPS, *Outputters*, a sort of theeves about Ridesdale, that ride about to fetch in such cattell or other things as they can light on; [ed. 1706 adds, and make Matches for the robbing of Men and Houses]. **1823** CRABB *Technol. ouzo ('u:zəʊ). Also ouso. [mod.Gr. οἶζο.] A Greek spirituous drink flavoured with aniseed; a glass of this.

The etymology of the Greek name οἶζο is disputed. A popular etymology derives it from the Italian designation *uso Massalia* 'for the (commercial) use of Marseilles' stamped on packages of selected silkworm cocoons exported in the 19th century via Volos from the Thessalian town of Tyrnavos. The designation came to stand for 'superior quality', which the spirit distilled as ouzo was thought to possess; see A. Tzartanos in *Indogermanische Forschungen* (1932) LII. 217-20.

ovate (ˈɒvət), *sb.* [f. an assumed Latin plural *Ovātēs*, representing *Ovareīs*, *vātēs*, soothsayers, prophets, mentioned by Strabo, along with *Ἀρῦδαί* ‘Druids’, and *Βάρδοι* ‘Bards’, as a third order in the Gaulish hierarchy. Cf. EUHAGES.]
A term used as the English equivalent of Welsh *ofydd*, now applied to an Eisteddfodic graduate of a third order, beside ‘bard’ and ‘druid’; the name and its application being artificially affiliated to those of the Gaulish *Ovareīs* mentioned by Strabo.

Note. *Ovareīs* was Strabo's Greek transliteration of the Proto-celtic **vātis* (Stokes), pl. of **vātis* (or **vātis*) ‘soothsayer, prophet’ = L. *vātis*, OIr. *faith*, mod.Ir. and Gael. *faidh*. *Ofydd* occurs in Middle Welsh as a second element in some compounds, where it appears to have the sense of ‘lord’ (app. for *ddofydd*, mutated form of *dofydd*). It is also the Welsh form, in 14th c. bards, of the proper name *Ovid*. It has no connexion, etymological or historical, with *ovareīs*. The imaginary connexion appears first in Henry Rowlands in 1723. From him it was taken up by Edward Williams (Iolo Morgannwg) and W. Owen (Pughe) who introduced *ovate* as the English equivalent, (1792-4).

1723 H. ROWLANDS *Mona Antiqua* 65 Different Classes and Fraternities, which, as Strabo (lib. iv) reckons, were three, that is *Ἀρῦδαί*, *Drudau* or *Drudion*; *Ovareīs*, *Offwyr* or *Offyddion*; and *Βάρδοι* *Beirdd*. Ammianus Marcellinus (lib. xv) gives the same reckoning... ‘inchoata per Bardos, Euvates, & Druidas’, i.e. ... begun and set by *Bards*, *Euvates*, and *Druids*. — *Ibid.* Of these, says Strabo, the *Bardi* were Singers; the *Ovates*, Priests and Physiologers; and the *Druids* to Physiology added Ethicks and Moral Learning. *Ibid.* 251 Their *Ovates*, so call'd by Strabo and Ammianus Marcellinus, ... must express some Name they had at that Time on one of their Orders, sounding like *Ovydd* or *Offydd*. **1792** W. b. The OE. use, in quot. 893, is sometimes expressed in ME. and mod.Eng. by *over* following the time phrase; as in *all the year over, the whole day over*. Cf. the corresponding local use in sense 7 d. In the temporal use, *over*, being appended to a phrase which is itself an adverbial adjunct, may with equal propriety be viewed as an advb.: cf. 'he works in the field all day', with 'he sings at his work all day over', i.e. all day from beginning to end.

'**over, sb.**² [Absolute use of OVER *adv.*]

The number of balls (four, five, or six) bowled from either end of the wicket before a change is made to the other end; the portion of the game comprising a single turn of bowling from one end. Since 1900, an 'over' has normally consisted of 6 balls, except in Australia, and recently occas. elsewhere, where it is 8. Also *attrib.* Cf. MAIDEN a. 4 b

over (ʔuʋə(r)), *a.* Forms: *a.* 1 *ufera*, -e, 2-3 *ufere*, 3 *uere* (= *uvere*) (*mod. dial.* *uuver*). *β.* 3-5 *ouere*, 4-7 *ouer*, 5- *over*. [OE. had *ufer(r)a*, -e, *yfer(r)a*, -e adj., the former of which survived in early ME. *ufere, uvere* (written *vuere, uuere*), for

which in writing *over(e)* was substituted bef. 1300. (Cf. OHG. *obaro*, MHG. *obere*, Ger. *ober*, which represents an OTeut. **ubarō-*, while the OE. forms repr. the types **ubarōzo-*, **ubirōzo-*.)

Dialectally, the form *uover* (ʰʌʋ(ɹ)) is still widely current for the adjective (see E.D.D.); so that the ME. spelling *over(e)* (as in the later Layamon text for the earlier *uvere*) may originally have been only graphical, *ov* (*ou*) for *uv* (*uu*, *vu*), as in *above*, *dove*, *love*, etc. But in ME. the adj. fell together in use with *OVER-adv.* in comb., from which indeed it cannot always be separated, many important examples being written either way; thus, the OE. *ufera lippa*, in mod. dial. *uverlip*, occurs in Chaucer MSS. as *over(e) lippe* and *overlippe*. This would naturally tend to level the pronunciation of *over* from *ufera* with that of *over-* from OE. *ofer-*, a result prob. completed in Standard Eng. during the ME. period. And this identification led further to the adjectival use of the adverbial prefix in other senses: e.g. 3, 4.

Although originally itself a comparative form, *over* having no positive of its own has been in some respects treated as positive, and has been compared with *OVERER*, *OVEREST* (so OHG. *obarōro*, *obarōst*, mod.Ger. *oberer*, *oberst*), and *OVERMORE*, *OVERMOST*, only the last of which is now in (occasional) use. See these.]

over- is used with adverbial, prepositional, and adjectival force, in combination with sbs.; with adverbial and prepositional force in comb. with verbs; with adverbial force in combination with adjs., advbs., and prepositions. Its combinations are therefore exceedingly numerous, and, from the wide range of its meaning, very diverse in character. The following are the chief classes; but many words have senses falling under two, three, or more of these, and there are individual words in which the original sense of the prefix is so modified that it is difficult to assign them to any class. In some of its uses, moreover, *over* is a movable element, which can be prefixed at will to almost any verb or adjective of suitable sense, as freely as an adjective can be placed before a substantive or an adverb before an adjective. Although usually hyphenated or even written as one word, such combinations are hardly dictionary facts; they are really syntactic combinations which make the use and construction of *over* in the particular position more clear and obvious. In some of these combinations, however, there is a closer unification of sense, and others have a long history which it is desirable to show. All important combinations of *over-*, therefore, including such as occur in more than one sense, and all such as seem to require explanation, are treated as Main words in their alphabetical places; of the unimportant or obvious ones, examples are here given under the classes to which they belong, with a few illustrations; but no attempt is made to enumerate all that have been used, much less all that are possible.

Ofer- (like *ufar-* in Gothic, *ubar-* and *ober-* in OHG., *obar* in OS., *über* in Ger., *over* in Du., *yfer-*, *ofr-*, *of-* in ON.) was already in OE. used in comb. with vbs., as *oferclimban*, *ofercuman*, *oferðon*, *oferdrincan*, *oferlibban*; with sbs., as *oferældorman*, *oferbrū*, *ofersegl*, *oferþof*, *oferwrit*, *oferlufu*, *oferbitenes*; with adjs., as *ofergylden*, *ofermæte*, *ofermōðig*, *oferblāde*, *oferfull*, *ofermicel*; also in advbs. formed from adjs., and in derivatives of phrases, as *ofersælic*, *ofersæwisc* from *ofer sēa*. Many of the OE. compounds are still in use, but the more part failed to live into ME., and the great majority of existing *over-* combinations are of later formation, chiefly since c1550.

For the original stress of verbal and nominal compounds respectively, and later modifications, see *OUT-*. As *over* is of two syllables, there is necessarily a subordinate stress on *o*, even in verbal compounds, where the main stress is on the root syllable. This rises in sense 27 to a distinct secondary stress, distinguishing e.g. *over-bend* 'bend too much' from *overbend* 'bend over'. In verse, the unstressed *over-* is often reduced to *o'er-*, a single stressless syllable, as *o'er-bend*, *o'er'shadow*; but *over-* with main or secondary stress is not properly reduced to *o'er-* unless the position allows the stress to be retained, as in *o'er-e'namoured*, *o'er-in'curious*, *o'er-a'ssumption*, *o'er-re'pletion*. See senses 27-30.

I. *over-* in spatial and temporal senses, and in uses directly related to these.

The compound verb is equivalent sometimes to the simple vb. with *over* adv., as in *OVERLAY*, to lay (something) over; or, more frequently, to the simple vb. (usually intr.) with *over* prep., as in *OVERHANG*, to hang over (something), *OVERLIE*, to lie over or above (something); but in many cases, as *OVERARCH*, it is difficult or impossible to distinguish these.

1843 LYTTON Last Bar. IV. iv, I have overtarr'd, my lord.

19. With the sense 'remaining over' or 'in addition or excess', 'surplus', 'extra'; as in vb. OVERLEAVE; in sbs. as OVERDEAL, OVERTIME; so *over-hours*, -matter, -wages.

1832 *Over hours [see OVER a. 3]. 1887 ROGERS in Contemp. Rev. May 686, I was astonished at discovering where the worst cases of over-hours were. 1887 Pall Mall G. 5 Feb. 5/2 It contains seven pages of *over-matter' put in type for 'Fors' but never before published. 1928 Daily Express 7 Feb. 3/6 Early buyers of lingerie had all the advantages, for most of the real bargains . . belonged to ranges that . . were 'overmatter' that had to be cast out of stock. 1967 Economist 2 Dec. p. iii/2 This one book is only a bit of overmatter from all his earlier over-writings. 1972 Observer 12 Mar. 16/8 Large quantities of titanium overmatter . . were just thrown into the dustbin. 1977 Oxf. So in verbal derivatives, as *overcrowed*, etc.

It is possible that *overburden*, *overcark*, *overload*, *overweigh*, and the like, belong originally here, rather than to 27.

1876 BLACKIE Songs Relig. & Life 202 To *Overbray The voice of grave authority. 1603 FLORIO Montaigne I. xxx. (1632) 102 We have altogether *overchoked her [Nature]. 1834 PRINGLE Afr. II. *over-* in the sense of 'over or beyond' in degree or quality; hence, of surpassing, excelling, exceeding, excess.

22. a. With the notion of doing some action over or beyond another agent, of going beyond, surpassing, or excelling in the action denoted by the simple vb. In verbs, as OVERBID 2, OVERLEAP 4, OVERRUN 9; so *overamble*, *-bandy*, *-bark*, *-blaze*, *-cackle*, *-chant*, *-cry*, *-perk*, *-ring*, *-ruff*, *-scream*, *-smite*, *-squeak*, *-stare*, etc.

II. i. 27*, I would *ore-stare the sternest eies that looke: Out-braue the heart most daring on the earth.

b. In verbs formed on sbs., with the sense of surpassing in, or in the rôle of, as *over-bulk*, *-multitude*; esp. in nonce-phrases, as *overgospel the gospel*, *over-Macpherson Macpherson*, *over-puppy*, etc. Cf. OUT- 21, 23. 1606 SHAKS. *Tr. & Cr. 23. In reflexive vbs., with the sense of surpassing oneself, i.e. one's former or ordinary achievements, one's capacity, strength, etc.; often with the sense of exhausting oneself by the action; sometimes merely of doing to excess or too much, as in 27: as OVERBLOOM itself, OVERDRINK, -EAT, -SLEEP oneself; so *over-bowl*, *over-plot*, *over-polk*, etc. Cf. also sense 27a.

1844 W. Lillywhite's *Illustr. Hand-bk. Cricket* 18 Do not *over bowl yourself by illudom bowling. 1886 *Daily News* 6 Sept. 3/4 He will over-bowl himself if he is not very careful. 1962 *Punch* 1 Aug. 152/3 A Cowdrey who would certainly not overbowl himself. 1748 RICHARDSON *Clarissa* (1811) IV. 57, I have *over-plotted myself. 1853 MISS YONGE *Heir of Redcl. xii*, She has *over-polked herself in London, and is sent here for quiet and country air.

24. a. In sense 'more than': with verbs, as OVERBALANCE, -FILL, -MATCH, -MATE, etc.; so *over-conquer*, *-empty*, *-equal*, *-fit*, *-overcome*, *-parallel*, *-satisfy*.

1602 CAREW *Cornwall* 64b, The women would be verie loth to come behinde the fashion, in new-fanglednes. . if not in costlynes, . . which perhaps might *ouer-empty their husbands purses. 1716 M. Soc.) 68 Nor shall [it] euer [be] *ouer-paralleled by any age succeeding. 1609 BP. HALL *No Peace w. Rome* §12 Who can abide that any mortall man should *ouer-satisfie God for his sinnes?

b. So in derivatives; also in other adjs., as OVER-DUE, OVERFULL, *overcomplete*, *overwomanly*.

1868 G. STEPHENS *Runic Mon.* I. 280 The alphabet thus inscribed being occasionally incomplete or *overcomplete. 1682 DRYDEN *Duke of Guise* 1. iii, Such an habitual *overwomanly goodness.

25. With the sense 'exceedingly, beyond measure, lavishly'. In verbs, often rendering L. *super-*, as OVERABOUND, -FLOURISH, -GLAD, -GRIEVE, -HIGH, -HOPE, -JOY, etc. In adjs., as OVERDEAR, *over-excelling*, *over-glorious*. Now obs. or *arch.*, the sense having usually passed into 27.

a 1656 BP. HALL *Invis. World* III. i, Those *over-excelling glories of the good Angels. 1633 FORD 'Tis Pity v. v, How *over-glorious art thou in thy wounds, Triumphant over infamy and hate!

26. With the sense 'to a greater extent, or at a greater rate, than is usual, natural, or intended; too far'. In verbs, as OVERACT, -BID, -BUY, -CARRY, -COUNT, -ENTER, -ESTEEM, -ESTIMATE, -HOLD, -LAUNCH, -LET, -PAY, -PRIZE, -RATE, -SELL, etc. In adjs., as OVERAWFUL, etc.

** With the sense 'in or to excess, too much, too'. Now a leading sense of *over-* in combination with verbs, adjectives, substantives, and adverbs.

In mod. Eng. very common with a negative (esp. in adjs. and their derivatives), as in *not over-brave*, *not over-obliging*, 'he was not over-pleased with the result'; in which *not over-* is said by litotes for 'not quite enough', 'somewhat deficiently': *not over-wise* = rather wanting in wisdom.

This sense was approached in Gothic by the adj. *ufarfulls* 'full to overflowing', and the vb. *ufarwalsian* 'to grow exceedingly' (repr. Gr. *ὑπερβαύειν*); it was frequent in ON.,

expressed by *ofr-*, *of-*, before adjs., nouns of quality and action, rarer with vbs.; occasional in OHG. (*ubarezzan*, *ubartrichan*, *-trenkan*, *ubarfulli*: cf. MHG. *ubervoll*). In OE. it occurs in many adjs., a few vbs., and numerous derivative or other sbs. In OE. and the cognate langs., *over* was in true combination; its generalized use in mod. Eng. renders it much more a distinct element, often merely in syntactical combination, so that, except in a few words of old standing, it is usually hyphenated to the word which it qualifies.

In verbs, there is a distinct secondary stress on *over-* which may, in case of antithesis or emphasis, become the main stress. Adjectives, substantives, and adverbs have normally even stress: *'over-apt*, *'over-abstemious*, *'over-worry*, *'over-often*; either stress being liable to be subordinated, according to the construction and emphasis. Thus, an *'over-apt scholar*, we think him *'over-apt*; we want *culture*, not *'over-culture*. In this sense, *over-* is rarely contracted in verse to *o'er-*, and properly only where the stress can be retained, as in *o'er-e-namoured*.

27. a. With verbs (or with sbs. or adjs. forming verbs). A few occur in OE., e.g. *oferdón*, *-drencan*, *-drincan*, *-fyllan*, *-sieman*, *-sprecan* (some of which however only approach this sense, or can be otherwise explained). ME. added to these, a 1300, OVERCARK, -CHARGE (F. *surcharger*); a 1400 OVERHEAT, -LADE, -PRAISE, -RUN, *over-dread*, *-sup*; a 1500 OVERDRIVE. In the 16th century they began to abound, as OVERBLOW, -BOIL, -BURDEN, -BUSY, -CLOY, -CRAM, -DARE, -EAT, -FEAR, -GORGE, -LABOUR, -LOAD, -LOVE, -PLEASE, -REACH, -ROAST, -WOO, *over-bake*, *-black*, *-cull*, *-dull*, *-itch*. By 1600 It had become allowable to prefix *over-* to any vb. whose sense admitted of it, so that we find, besides those entered as Main words:

a 1700 *over-afflict*, *-argue*, *-cherish*, *-chill*, *-cleave*, *-commend*, *-confute*, *-creed*, *-doze*, *-engage*, *-expect*, *-fancy*, *-feel*, *-fix*, *-gird*, *-grace*, *-grasp*, *-honour*, *-know*, *-linger*, *-loath*, *-magnify*, *-marl*, *-meddle*, *-mix*, *-moisten*, *-multiply*, *-nourish*, *-oblige*, *-pamper*, *-preface*, *-promise*, *-prove*, *-reward*, *-sauce*, *-sot*, *-store*, *-thick*, *-till*, *-vilify*, *-worship*, etc.

28. a. With adjectives, simple or derivative.

These appear already in OE. and the cognate langs. In OE. nearly 30 examples are recorded, including *oferblāde*, *oferceald*, *oferēald*, *oferfætt*, *oferfull*, *ofergrādīg*, *oferhēah*, *oferhlūd*, *ofermicel*, *oferranc*, *oferate*, *-etol*, *ofersprecol*, *oferglenged*, *ofermōdīg*, *ofermōdic*, etc. In OE. these were treated as true compounds. In ME. *over* was often written separately, and its use began to be extended beyond the words handed down from OE. Since c 1500, the tendency has been to treat *over* as a movable element which can be prefixed at will to any adj.; and in Sc. and north. Eng. dialects, where *ower*, *owre* is the regular equivalent of Standard Eng. *too*, it is always written as a separate word. In literary English it is usually hyphenated, exc. in a small number of combinations of ancient standing and frequent use, which are usually written as single words: e.g. OVERFOND, OVERFULL, OVERMUCH, etc. But even in literary Eng., *over* is sometimes treated as a separate word, and the consciousness that it is such is seen in the colloquial strengthened form *over and above*, 'not over and above particular'.

The more important of these are treated as Main words: see OVERACTIVE, -BITTER, -BOLD, -BUSY, etc. Other examples are: Of OE. age *overblithe*.

'over-bump, *v.* [f. OVER- 14 + BUMP *v.* 1. 3.] In bumping-races, to catch and bump (a boat ahead of a pair of other boats that have withdrawn after a bump), thus going up three places. So **'over-bump** *sb.*

'over'burden, *sb.* Also †-burthen. [OVER- 29 d, 1 d.]

1. Excessive burden; excess of burden.

1579-80 NORTH *Plutarch* (1657) 42 The vitall spirits not being... kept downe, or spreade abroad by the quantity or over-burden thereof [meat], do enlarge themselves. a 1618 SYLVESTER *Job Triumphant* iv. 440 Who hath dispos'd the upper Spouts and Gutters, Whereby the Aire his overburthen utters? 1893 *Daily News* 8 Feb. 5/1 The overburden of work in the House of Commons makes the effort to get real business done a mere struggle and scramble.

2. *Mining*, etc. a. The overlying clay, rock, or other matter which has to be removed in quarrying or mining, in order to get at the deposit worked.

1855 J. R. LEIFCHILD *Cornwall Mines* 25 The quantity of 'overburthen', or waste, removed, has been upwards of

200,000 tons. 1894 *Times* 27 Feb. 10/3 The overburden is a reddish clay soil of an average depth of 10 ft.

b. The material lying over any particular point underground, esp. over a tunnel or pipeline; also, the pressure due to the weight of this material.

1948 TERZAGHI & PECK *Soil Mech. in Engin. Pract.* ii. 68 With respect to the present overburden, the clay on the right-hand side is a precompressed soft clay, and that on the left-hand side is a normally loaded soft clay. 1968 G. N. SMITH *Elem. Soil. Mech.* iv. 88 The overburden pressure at a point in a soil mass is simply the weight of the material above it. The effective overburden is the pressure from this material less the pore water pressure. 1970 *Daily Tel.* 27 June 2/5 The pipeline was laid in December 1967... but the unexpectedly heavy scouring action of the bottom waves in the shallow North Sea soon removed the two foot overburden.

c. Loose, unconsolidated material lying above bedrock.

1955 *Proc. Colorado Sci. Soc.* XVI. 102/1 *Overburden*,... a term used by geologists and engineers in several different senses. By some it is used to designate material of any nature, consolidated or unconsolidated, that overlies a deposit of useful materials, ores, or coal, especially those deposits that are mined from the surface by open cuts. As employed by others *overburden* designates only loose soil, sand, gravel, etc., that lies above the bedrock. The term should not be used without specific definition. 1969 *Civil Engineering* (U.S.) June 43/2 A more detailed soil investigation of the upper 50 ft or so of the overburden... showed that the allowable bearing capacity was only about 200 to 300 psf, much too low for the proposed bridge foundations.

'over'burden, **'-burthen**, *v.* [OVER- 27.] *trans.* To put too great a burden or weight upon; to burden too much; to overload, overcharge.

overcure (stress variable), *v.* [OVER- 27.]

a. *trans.* To cure (plastic or rubber) for longer than the optimal period; to overvulcanize. Also *absol.* b. *intr.* To undergo overcuring.

1916 *Jrnl. Soc. Chem. Hence there may well be a question whether overfit streams exist. The reason... may be that a stream cannot long remain overfit, for an increase in volume will be accompanied by increased erosive power and rapid adjustment of valley size. **1968** R. W. 1937 *Radio Engin.* Mar. 17/1 The curves in Fig. 3 have been calculated to show the initial tracking angle which occurs with a conventional pickup arm as a function of the radius R of the playing circle, the length of the arm L, and the overhang D, which is the distance between the center of the turntable and the needle point when the needle point is in line with the centers of the base and turntable. **1945** *Electronics* Mar. 111/2 If the needle point overhang D is 13/16 inch... the tracking angle varies from 32 deg at 6 inches through 27 deg at 3 3/4 inches back to 32 deg at the 2-inch radius. **1953** G. f. In sound recording and reproduction, the (usu. undesired) continued oscillation of a system after the cessation of the signal causing it; *spec.* that of a loudspeaker, esp. in the bass when the cone is insufficiently damped near its resonant frequency. Cf. HANG-OVER, HANGOVER 3, *quots.* 1961, 1967.

1971 J. EARL *How to choose Pickups & Loudspeakers* v. 126 When the cone oscillates at resonance it vibrates quite violently unless well damped. This can cause 'over-hang' effects at the bass end. **1975** G. J. KING *Audio Handbk.* ii. 34 A very low *R_s* in parallel with the loudspeaker inhibits overshoot and rings on transient type signal, and this is

particularly desirable at the loudspeaker's bass resonance frequency where, without such damping, the cone can oscillate vigorously when triggered by a transient, an effect which is responsible for 'over-hang' and 'boomy' bass. **1976** *Gramophone* Dec. 1028/3 The sound has warmth and resonance (the long overhang of the King's acoustic is expertly handled without the slightest muddying of the textures). **1977** *Ibid.* May 1774/3 Square wave response of all the cartridges showed virtually no overhang and an adequate rise time with little ringing.

overlap ('əʊvlæp), *sb.* [f. OVERLAP *v.*] 1. *a.* An occurrence or instance of overlapping; a partial superposition or coincidence; the part or place at which one edge or thing overlaps another; *spec.* in *Geol.* (see next, 3). Also *transf.* and *fig.*

1813 S. SMITH *Agric. Surv. Galloway* 85 (Jam.) b. In yacht-racing, a position in which a yacht overtaking another is debarred by the rules from passing one side, or in which the yachts concerned cannot turn toward each other without risking a collision.

1898 *Encycl. Sport* II. 585/2 If in rounding any mark in a race, or any obstruction, an inside yacht has an overlap, the outside yacht or yachts must give her sufficient room. **1935** *Encycl. Sports* 760/2 Provided that the overtaking yacht makes her overlap on the side opposite to that on which the overtaken yacht then carries her main boom, the latter may luff as she pleases [etc.]. **1958** *Times* 23 Sept. 14/2 The

American yacht then went smoothly forwards to establish an overlap.

c. *Phonetics.* Concurrence of the concluding sound of one phoneme with the opening of the next, as represented spectrographically; homonymy (as French /sã/, *cent* and *sans*).

1942 *Amer. Speech* XVII. 42 There is no over-lap between the length of this vowel when full grade... and its length when reduced grade. 1964 *Language* XL. 62 It is possible to raise the question of phonemic overlap... This instance of overlapping phonetic values... need not be regarded as a violation of phonemic principles.

d. *Linguistics.* (See quot. 1948).

1948 E. A. NIDA in *Language* XXIV. 431 Instances of 'overlap', i.e. forms which are in complementary distribution except at certain points where there is a contrast resulting from fluctuation of forms. 1973 *Archivum Linguisticum* IV. 12 /de/ and /bi/ and /bi/ and /na/ do have areas of overlap.

2. *Geol.* The extension of a stratum beyond or over the edges of younger underlying strata; also, the upper stratum; esp. = ONLAP (a *transgressive overlap*); also = OFFLAP (a *regressive overlap*); less commonly = OVERSTEP sb. 2.

1846 H. T. DE LA BECHE in *Mem. Geol. Survey Gt. Brit.* I. 24 Proceeding westward... the overlap of the Old Red Sandstone becomes such that from Middleton Hall to the vicinity of Caermarthen, it rests on the lower Silurian rocks, covering up the higher Silurian beds. A. C. RAMSAY in *Ibid.* 319 This... shows a tendency to a certain amount of contemporary depression of coast and sea bottom on the south to admit of an overlap during the formation of these deposits. 1857 JUKES *Stud. Man. Geol.* vii. 262 Overlap may take place in a perfectly continuous series, merely proving the fact of a depression of the area contemporaneously with that deposition. 1876 *Q. J. J. Geol. Soc.* XXXII. 377 By the term *overlap* no unconformity is here meant, but the concealment of lower beds by the extension, through a progressive subsidence, of those next in time upon the old rocks. 1883 [see OVERSTEP sb. 2]. 1906 A. W. GRABAU in *Bull. Geol. Soc. Amer.* XVII. 569 The types of overlap of sedimentary strata may be classified as follows: A. Irregular or discontinuous overlap. B. Regular continuous or progressive overlap. 1. Marine. a. Transgressive. b. Regressive. 2. Non-marine. c. Fluvatile. 1913, etc. [see OFFLAP]. 1947 *Bull. Amer. Assoc. Petroleum Geol.* XXXI. 1868 There is much confusion in the uses of the word 'overlap' in geological literature. In recent years it has often been used to describe... (1) the regular and progressive pinching-out of sediments above unconformities, and (2) the regular truncation of sediments below unconformities. 1962 READ & WATSON *Introd. Geol.* xii. 616 Stratigraphical traps are the result of unconformities, lensing, overlap and reflected buried hills. 1972 B. B. BROCK *Global Approach to Geol.* xvii. 224 The Lower Division forms remnants of a regressive overlap left by a contracting and retreating inland basin.

3. *Railways.* The distance beyond a signal that must be unoccupied before an engine is allowed to approach it past the previous signal.

1925 TWEEDIE & LASCELLES *Mod. Railway Signalling* x. 145 To work without overlaps it would be necessary to have some system of positive speed control which would bring a train to a stand at a stop signal independently of the driver. 1956 *Railway Mag.* Mar. 351/2 The standard British block telegraph overlap of 440 yd. beyond the home... signal can be modified by special instructions. 1969 H. R. BROADBENT *Introd. Railway Braking* i. 6 The overlap beyond the stop signal is therefore a form of margin on the distance between the warning and stop signals to cover for contingencies.

4. *Computers.* The strictly simultaneous performance of two or more operations during the execution of a program.

1963 L. SCHULTZ *Digital Processing* xi. 239 In a machine with a modular memory... the execution of a program might be significantly speeded by locating variables in one module and instructions in another, and by providing an overlap in the time needed for executing one instruction and fetching the next. 1969 P. B. JORDAIN *Condensed Computer Encycl.* 365 I/O overlap is a great improvement over strictly sequential operations, but it still leaves the electronics waiting for the slower main memory.

5. *attrib.* overlap fault, an overthrust fault; overlap joint, a joint in which one edge overlaps the other, instead of merely butting against it.

over'steepened, *ppl. a.* *Physical Geogr.* [OVER- 22.] Steepened further; *esp.* (of a valley) having a greater steepness than running water would have caused owing to the predominantly downward erosive action of a glacier. So **over'steepening** *vbl. sb.*

1900 W. M. DAVIS in *Proc. Boston Soc. Nat. Hist.* XXIX. 308 In the same way, the waterfalls from the hanging valleys, the showering waste that forms the falls, and the

landslides from the basal cliffs, all show that the banks of the glacial channel—the lower walls of the existing valleys—are too steep; and they may be therefore called ‘oversteepened’. 1922 *Bull. U.S. Geol. Survey* No. 730. 13 In the Black Canyon. . the broad floor of the valley and the steep cliffs that rise precipitously 2,000 feet at its side suggest oversteepening of the walls by ice. 1942 O. D. VON ENGELN *Geomorphol.* xix. 462 That side of a valley reach against which the glacier current impinges is regularly oversteepened. 1964 *Amer. Jnl. ‘oversteer, sb. [OVER- 29 b.] A tendency in a motor vehicle to increase the sharpness of the turn when made to deviate from the straight. 1936 *Proc. Inst. Automobile Engin.* XXX. 759 This proportion of the total roll couple carried by the front and rear tyres is found to have a very marked effect on steering, and has to be proportioned by trial to avoid excessive effects in the direction either of ‘oversteer’ or ‘understeer’. 1957 *Which?* Autumn 25/2 Slight oversteer is noticeable if the boot is well loaded, but this is easily compensated by a slight increase of pressure on the rear tyres. 1972 *Sci. Amer.* Aug. 20/2 In a vehicle with oversteer the driver must turn the steering wheel away from the center of the turn as speed increases. 1977 *Hot Car* Oct. 23/2 The average driver can handle understeer more safely than oversteer.

oversteer, v. [OVER- 27.] *intr.* To exhibit oversteer. So **oversteering vbl. sb.** and **ppl. a.** 1936 *Proc. Inst. DEAN-AVERNS *Automobile Chassis Design* ii. 49 An oversteering vehicle when negotiating a bend above the certain critical speed of the vehicle for straight running will tend to run into its turn. 1959 *Motor Manual* (ed. 36) v. 147 When the slip angle is greater at the rear, the car oversteers (i.e. turns more sharply than the driver intends). 1962 *Times* 10 Apr. 6/5 Does this Volkswagen oversteer? 1962 *Which? overstep, sb. [f. the vb.] 1. An act of overstepping or passing beyond a limit. 1822-34 *Good’s Study Med.* (ed. 4) III. 64 This apparent overstep, be it what it may, in the march of insanity beyond that of the population of the country, is a real retrogression. 2. *Geol.* In an unconformity, the structural relationship between the lowest stratum of the upper series and the truncated ends of the underlying strata when, as is often the case, these have a different dip from the upper series (chiefly *British*). 1883 A. J. J. BROWNE in *Geol. Mag.* Decade II. X. 336 Both cases involve an unconformity, and. . the difference between them is really this: in overlap the basement member of the upper series has a limited extension, while in overstep the basement bed has a continuous extension. . . The unconformity between the two series will generally be much greater in the case of overlap than in the case of overstep, for in the latter the beds all dip in the same direction, and the existence of an unconformity is usually only made patent by the fact of overstep. 1937 *Q. Jnl. Geol. Soc.* XCIII. 120 In the two marginal parts of the Wealden trough. . there is a definite overstep, due to the fact that while the freshwater Wealden beds were being deposited in the central subsiding area the margins of the trough were being gently uplifted. 1948 *Bull. Amer. Assoc. Petroleum Geologists* XXXII. 2297 The word *overstep*. . in more than 60 years of existence. . has not succeeded in gaining any recognition among American geologists and very little in England. 1969 BENNISON & WRIGHT *Geol. Hist. Brit. Isles* i. 10 In the case of any angular unconformity the lowest bed of a series of strata is seen to rest on beds of differing ages. Such a phenomenon is known as overstep, and the post-unconformity bed is said to overstep onto successively older beds.

X. 227, I have found it convenient. . to speak of this stratigraphical relation of unconformable beds to the various rocks immediately beneath as Overstepping. For example, I

overtake (əʊvə'teɪk), *v.* [Early ME. f. OVER- 14 + TAKE *v.*, q.v. for Forms.]

Overtake is the earliest exemplified of a small group of synonymous vbs., including *overnim*, *overhent*, *overget*, *overcatch*, in all of which the second element means *take* or *catch*; the original application being apparently to the running down and catching of a fugitive or beast of chase: cf. the synonymous 'catch up'. The sense of *over-* is not so clear. *A priori* we might explain it as 'to take by over-running, or by getting over the intervening space', and compare *overreach* = reach over or across a space. But it is doubtful whether this was the original notion. Beside these -take verbs, a fig. sense of *overtake* (viz. 4 below) was expressed before 1000 by *overgang* and *overgo*; but in these *over-* can be explained in the sense 'down upon' (OVER- 7), so that their orig. sense would be 'descend' or 'fall upon'. The sense of 'overtake' was expressed later also by *overhie*, *overrun*, *overhale*, *overhaul*; but these prob. imitated *overgo* or *overtake*. In Early ME. *overtake* and *overgo* had the parallel forms OFTAKE, OFGO, which seem to have been the

strictly southern equivalents (*oftake* being actually exemplified earlier than *overtake*): the relation between *of*- and *over*-here, as well as in OFTHINK, OVERTHINK, has not been clearly determined.]

1. *a. trans.* To come up with (a person or thing going or running in front of one and in the same direction); to come up to in pursuit; to 'catch up'. Now esp. of a motorist: to drive a vehicle past (another vehicle travelling in the same direction). Also *absol.*, and with the vehicle as subj.

1867 TYNDALL *Sound* iii. 117 The Germans embrace all such sounds under the general term *Overtöne*. I think it will be an advantage if we, in England, adopt the term overtones as the equivalent. 1879 G. PRESCOTT *Sp. Telephone* 7 Helmholtz succeeded in demonstrating that the different qualities of sounds depend altogether upon the number and intensity of the overtones which accompany the primary tones of those sounds. 1880 in *Grove Dict. UDDEN tr. *Bohr's Theory of Spectra* III. ii. 83 This apparent difficulty is explained by the occurrence in the motion of the hydrogen atom... of harmonic components corresponding to values of *r*, which are different from 1; or using a terminology well known from acoustics, there appear overtones in the motion of the hydrogen atom. 1937 JENKINS & WHITE *Fund. Physical Optics* xii. 283 If the charged oscillator is bound by a force which does not obey Hooke's law, ... it will be capable of re-radiating not only the impressed frequency, but also various combinations of this frequency with the fundamental and overtone frequencies of the oscillator. 1973 *Physics Bull.* July 421/2 The first overtone spectrum of HBr near 4.95 μ m has been obtained in this way.

b. In the General Assembly of the Church of Scotland, and in the supreme court of other Presbyterian churches: A formal motion proposing or calling for legislation.

In current use, an ouerture is a proposal to make a new general law for the Church or to repeal an old one; to declare the law; to enjoin the observance of former enactments; or generally to take any measure falling within the legislative or executive functions of the Assembly. Such a proposal must first be made in an inferior court (presbytery or synod), and, if there adopted, is transmitted by that court as its ouerture to the supreme court. If adopted by the supreme court as an ouerture, it is submitted to the various presbyteries for approval by them or a majority of them before it can be passed as an act.

a. intr. To produce ovules or ova; to discharge ova from the ovary. Said of an organism and of a Graafian follicle. Hence of an ovum: to be discharged.

1888 H. N. MARTIN in B. C. Hirst *Syst. Obstetr.* I. 92 Women who have never menstruated have borne children: they must have ovulated without menstruating. **1890** in *Cent. Dict.* **1928** *Q. The largest will ovulate first. **1968** D. W. WOOD *Animal Physiol.* xiii. 303 Many [mammals] ovulate spontaneously as part of the oestrus cycle, but others require the stimulus of copulation before they will ovulate. Such induced ovulators include the ferret, the cat and the rabbit. **1974** *Biol. of Reproduction* X. 199/1 Amphibia are good subjects for *in vitro* studies of ovulation, for mature ovaries can be maintained in simple salt solutions at room temperature and can be induced to ovulate by the addition of crude extracts of... pituitary glands.

b. trans. To discharge (an ovum).
