2. Local name for large flints found in the chalk in Norfolk: = FARAMOUDRA.

**1855** LYELL *Elem. Geol.* xvii. (ed. 5) 244 Huge flints, or potstones as they are called in Norfolk, occurring singly, or arranged in nearly continuous columns at right angles to the ordinary and horizontal layers of small flints... **potsy** ('pɒtsɪ), *sb.* *Northeast U.S.* Also *potsie*. [Etym. obscure, but cf. POT *sb.*<sup>1</sup> 11.] 1. *a.* The object thrown in the game of the same name. *b.* The name of a children's game similar to hopscotch.

**1931** *Recreation* Mar. 672/2 *Potsy* is an adaptation of Hop Scotch, which now rivals its progenitor in popularity. The 'potsy' is a piece of tin, a rock or a puck. **1932** *Sun* (N.Y.) 26 Mar. 18/3 As any New Yorker will recognize, the potsy refers to the piece of tin can, doubled and redoubled and stamped flat with the heel, which is kicked from flagstone to flagstone of the sidewalk by the hopping, juvenile player of the game potsy. **1943** B. SMITH *Tree grows in Brooklyn* xiii. 100 *Potsy* was a game that the boys started and the girls finished. A couple of boys would put a tin can on the car track and sit along the curb and watch with a professional eye as the trolley wheels flattened the can... Numbered

squares were marked off on the sidewalk and the game was turned over to the girls who hopped on one foot pushing the potsy from square to square. 1955 P. M. EVANS *Hopscotch* 5 Then you feel around and pick up your potsie without opening your eyes. 1956 S. BELLOW *Seize the Day* iii. 61, I sat down for a while in a playground... to watch the kids play potsy and skiprope. 1963 T. 2. The badge worn by a policeman or fireman. 1932 *Sun* (N.Y.) 26 Mar. 18/3, I recently bought a Sun which gave a vocabulary of firemen's slang, in which 'potsy' was the word for 'badge'. I have also found policemen and detectives who referred to their badges in this manner. 1936 *Baltimore News-Post* 18 Apr. 18/2 Most detectives in town never polish their gold badges (yellow potsys). 1948 MENCKEN *Amer. Lang.* Suppl. II. 750 *Potsy*, a fireman's badge. 1952 N.Y. *Herald Tribune* 24 Jan. 27/1 This boniface has been wearing his potsy as house dick for only a brief time. 1970 L. **Pott** (pot). *Med.* The name of Sir Percivall Pott (1713-88), English physician, used in the possessive to designate phenomena described by him, as Pott's disease, a form of paraplegia caused by tuberculous disease of the spine (described in *Med. & Philos. Commentaries* (1779) VI. 318-24); Pott's fracture, a fracture of the fibula close to the ankle, of a type described by Pott (in *Remarks on Fractures & Dislocations* (1769) 57-64) and due to eversion of the foot; loosely, any fracture of the lower fibula.

1835 *Lancet* 12 Sept. 775/1 Patients attacked by Pott's disease frequently die of other affections before the former has made much progress. 1897 T. L. STEDMAN *20th Cent. Pract.* XI. 600 The symptoms of Pott's disease may be divided into those referable to the diseased vertebræ, to the affected nerve roots of the spinal cord, and to the spinal cord itself. 1974 C. B. T. ADAMS in R. M. Kirk et al. *Surgery* xiv. 286 Tuberculosis (Pott's disease... of the spine) or a pyogenic extrathecal abscess may also cause cord compression. 1849 *Proc. Path. Soc. Dublin* II. 13 Mr. Robert W. Smith exhibited a remarkable specimen of Pott's fracture, taken from the body of a man, æt. 70, who had lately died in the hospital of the South Union Poor House. 1884 W. PVE *Surg. Handicraft* xiv. 209 It may be doubted whether a true Pott's fracture is ever so perfectly recovered from, that the movements of the ankle are quite free, and no deformity is noticeable. 1922 *Arch. Surg.* IV. 56 Pott's fracture, as described and pictured by himself, is a primary, nearly transverse, fracture of the fibula, attended by a subsequently produced 'partial dislocation' of the ankle joint internally. 1950 J. G. BONNIN *Injuries to Ankle* viii. 174 It has been denied by Ashurst (1922) and others that Pott's fracture, as Pott described it, ever existed... Pott's name is used more generally now to cover all fractures of the ankle by indirect violence. 1962 *Surgery* LI. 284/2, I believe that term to any and all fractures of the ankle due to external the term 'Pott's fracture' should be applied as a generic rotation violence.

**potwaller** ('pɒt,wɒlə(r)). [f. POT *sb.*<sup>1</sup> + *waller*, agent-n. from WALL *v.*, OE. *weallan* to boil.]  
*lit.* = *pot-boiler*, the boiler of a pot: the term applied in some English boroughs, before the Reform Act of 1832, to a man qualified for a parliamentary vote as a householder (i.e. tenant of a house or distinct part of one) as distinguished from one who was merely a member or inmate of a householder's family; the test of which was his having a separate fire-place, on which his own pot was boiled or food cooked for himself and his family.  
According to 18th c. statements, the test was at times abused by persons not householders, who in anticipation of an election and of receiving money for their vote, boiled a pot in the presence of witnesses on an improvised fireplace in the open air within the borough, and thus passed as potwallers.

Suppl.* 9 Feb. 141/3 The repeated word of the title, *pounamu*, however translucent to New Zealanders, will be opaque to the English reader. It means 'greenstone', a New Zealand form of jade, evocative of a past when it was the prized material of axe and ornament.

**pounce** (pauns), *sb.*<sup>1</sup> Also 5-8 pownce, 6 pounse, *Sc.* punse, punss, 9 *dial.* punce. [Etymology obscure: no corresponding *sb.* is known in French or other Romanic language. The various groups of senses are parallel to those of POUNCE *v.*<sup>1</sup>, the evidence for *vb.* and *sb.* beginning early in the 15th c., in one group the *sb.*, in two the *vb.* appearing first. The connexion of the various groups of senses is far from clear; there may have been more than one origin. But the senses correspond to a considerable extent with those of PUNCH *sb.*<sup>1</sup>, and still more with those of PUNCHEON *sb.*<sup>1</sup>, which is found much earlier than either *pounce* or *punch*, and corresponds in form and sense to F. *poisson* (also *†ponchon*), It. *†ponzione*, *punzione*:—L. or Com. L. *pondo* indecl. a pound (weight), orig. instr. abl. of \**pondus*, -um = *pondus*, -er- weight, in use short for *libra pondo* a pound by weight, a pound weight.]

I. 1. a. A measure of weight and mass derived from the ancient Roman *libra* (= 327.25 grams), but very variously modified in the course of ages in different countries, and as used for different classes of things; in Great Britain now fixed for use in trade by a Parliamentary standard. Denoted by *lb.* (*L. libra*).

Formerly used without change in the pl., a usage still sometimes retained after a numeral, esp. *dial.* and *colloq.*, also in *comb.* as a *five pound note*, a *twenty pound shot*.

This pound consisted originally of 12 ounces, corresponding more or less to that of TROY weight, q.v., which contains 5760 grains = 373.26 grams. This is still used by goldsmiths and jewellers in stating the weight of gold, silver, and precious stones; but as early as the thirteenth or fourteenth century a pound of sixteen ounces was in use for more bulky commodities. This was made a standard for general purposes of trade by Edward III, and known as the pound *aveir de peis*, i.e. of merchandise of weight, now called AVOIRDUPOIS, q.v. This pound of 16 ounces, containing 7000 grains = 453.6 grams, has been since 1826 the only legal pound for buying or selling any commodity in Great Britain. In former times the pound varied locally from 12 to 27 ounces, according to the commodity, pounds of different weight being often used in the same place for different articles, as bread, butter, cheese, meat, malt, hay, wool, etc. See a list in *Old Country and Farming Words* (E.D.S.) 174-5. The Scotch pound of 16 ounces of Troy or Dutch Weight consisted of 7608.9496 grains; the Tron pound kept at Edinburgh = 9622.67 grains. *Pound* is also used to translate foreign names of weights, of cognate origin or representatives of *L. libra*. These vary greatly: in Italy between 300 and 350 grams, in Spain and Portugal, the Netherlands, and some German states between 459 and 469 grams, in other German states, Denmark, etc. between 477 and 510.22 grams. But the standard German *pfund* is now 500 grams, i.e. half a kilogram.

The yard and pound units to be used in trade are the imperial units laid down in the Weights and Measures Act, 1878. *Ibid.* 81 With regard to the pound, the values currently in use ... are: 1 imperial standard pound = 0.453 592 338 kgm.; 1 Canadian pound = 0.453 592 43 kgm.; 1 United States pound = 0.453 592 427 kgm. There is evidence that the imperial standard pound has diminished by about 7 parts in 10 millions since 1846. 1961 [see LB]. 1963 JERRARD & McNEILL *Dict. Sci. †1. *trans.* To weigh. *Obs. rare*—0.

**1570** LEVINS *Mamþ.* 220/45 To *Pound*, *ponderare*.

2. *Coining.* To test the weight of coins (or of the blanks to be minted) by weighing the number of these which ought to make a pound weight (or a certain number of pounds), and ascertaining how much they vary from the standard.

From the earliest times, in the Indenture under which the Master of the Royal Mint produced coins for the King, a limit was assigned within which the weight was to be maintained; and as it was impossible to make every coin of the exact weight, it was customary, before 1870, to fix the number of grains variation permissible in each pound weight, taken at random from the mass of coins, this variation being termed 'remedy for the Master'. Thus, for gold coins, in which 20 troy pounds of standard gold made 934½ sovereigns, the Indenture of 1817 allows a margin of 'twelve grains in the pound weight and no more'. By the Coinage Act of 1870, the 'remedy' was fixed on the piece, as ¼ grain on each sovereign, each of which is now separately tested by an automatic weighing apparatus of great delicacy.

**1890** *Cent. Dict.* s.v., *Pounding* in *coining*. **1907** *Let. fr. Royal Mint*, The present law is far more stringent, but (for particular purposes) we still constantly resort to *pounding* in the Mint, and always in the case of bronze coins.

1907 *Lett. to Editor fr. Cheshire*, The weight of salt contained in one gallon of brine ... is usually about 2 lb. 10 oz.; if it is as little as 2 lb. 8 oz., the brine is not worth working. The poundage is measured by a graduated hollow glass instrument, similar to that used in ascertaining the specific gravity of a fluid. (The gallon is not the imperial, but the old wine gallon. The standard poundage is thus more than 3 lb. to the imperial gallon.) The word is in constant use at the Cheshire and Staffordshire Salt Works, but is never used at Droitwich.

(and still dial.) = (paʊə(r)), proved by the spelling *powre, power*, and by rimes in all the poets from Pope to Tennyson and Swinburne (these last have also pɔə(r)): see illustration of Forms. But the spelling *pore* is found in some 15th c. writings, and *poor* (perh. = pur) in Palsgrave and Shaks. The late 18th and 19th c. III. 8. Special uses with *adv.* or *prep.*

For general uses with *forth, out*, etc., see prec. senses.

†a. Pour on (in ME. with indirect passive). To overspread with something poured, to suffuse fully. [= L. *suffundere*.] *Obs.*

[Note. It has been suggested that ME. *pour-en* was an irregular representative of F. *pur-er*:—L. *pūrāre* to purify (with religious rites). F. *pur-er*, now 'to scum', had in OF. the senses 'to purify, clarify, cleanse, rinse'; also in Norman 'to drip' (Lajoie revint tant moullé, qu'il puroyt de toutes parts, c 1560 in Godef.), so still in Guernsey (J'o l'cidre qui pure dans l'auge, 'I hear the cider dripping or pouring into the trough' Moisy), and in mod. Norman and other dialects 'to drip, drop, ooze, or flow out', in Burgundy, etc., 'to press, wring, or squeeze juice or water out of anything' (Godef.). English shows no trace of an original sense 'purify', nor even of 'press or squeeze out', and the intransitive sense 6, which comes near that of 'drip or flow out', is not of early appearance; so that the historical connexion of sense is not evident. The phonology also presents difficulty; it is doubtful whether Eng. has any certain instance of *ou* (or even *a, oo*) from Fr. *u*:—L. ū.]

The *γ* forms show the early reduction of *pouertē* to *pouretē*, and so to *poorty* (cf. POOR). The same reduction of the first syllable is seen in the *Sc.* form *purteth*, POORTITH, from OF. *pouretet*.

Here, as in the early forms of POOR, the ambiguity of *u* (*v*) before the 17th c. makes the pronunciation of many early forms uncertain. Some mod.F. dialects have *pouretē*, *paureté*, and the original *v* was prob. vocalized or suppressed in some forms of OF., as the *γ* forms and the doublet POORTITH show that it was from the 14th c. in some ME. dialects.]

**præ-**, in med.L. also *pre-*, a L. prep. and adv., meaning 'before'; a very frequent prefix and combining element. In other words *PRE-* is now the usual form.

There are some 17th century words that became obsolete before the *pre-* form became predominant, which are found only with the spelling *præ-*. This spelling has also been deliberately used by some writers in words commonly spelt with *PRE-* and so entered in this dictionary.

HARTSHORNE et al. *Coll. Papers C. S. Peirce* V. p. v, Pragmaticism (Peirce's term to indicate his divergencies from other pragmatists) was thus Peirce's way of insisting that abstractions must give an account of themselves. 1946 B. 1898 W. JAMES *Philos. Concept. & Pract. Results* 5 The principle of practicalism or pragmatism, as he [C. S. Peirce] called it, when I first heard him enunciate it at Cambridge [Mass.] in the early '70s, is the clue...by following which...we may keep our feet upon the proper trail. *Ibid.* 6 To attain perfect clearness in our thoughts of an object, then, we need only consider what effects of a conceivable practical kind the object may involve... Our conception of these effects, then, is for us the whole of our conception of the object, so far as that conception has positive significance at all. This is the principle of Peirce, the principle of pragmatism. 1900 W. CALDWELL in *Mind* Oct. 436 In this so-called Pragmatism or Practicalism of Prof. James. 1902 F. C. S. b. *Politics.* Theory that advocates dealing with social and political problems primarily by practical methods adapted to the existing circumstances, rather than by methods which have been conformed to some ideology.

1951 A. B. ULAM *Philos. Found. Eng. Socialism* iii. 77 It is true that the Fabian movement and British socialism in general have been built upon foundations quite different from those of Marxism. We have here first of all a sturdy spirit of pragmatism. 1966 *New Left Rev.* Jan.-Feb. 25 Thompson at one point calls the Communist Party the 'alter ego' of the Labour and trade union Left. But he fails to see the implications of this; that the two are not so very different in nature, for they are united by a common pragmatism, which has led so often to a day-to-day accommodation. 1976 *Times* 2 Apr. 8/4 Your struggle with Adolf Hitler, when Britain cast overboard the philosophy of pragmatism, or utilitarianism—the philosophy of recognizing any group of gangsters, any puppets, as head of a country as long as they were in control of its territory. 1976 *Survey* Summer—Autumn 156 Now that Mao is dead there will no doubt be a sharp reaction towards 'pragmatism'.

1. Action, practice; *spec.* *a.* The practice or exercise of a technical subject or art, as distinct from the theory of it (? *obs.*); *b.* Habitual action, accepted practice, custom.

*c.* A term used by A. von Cieszkowski in *Prolegomena zur Historiosophie* (Berlin, 1838), then adopted by Karl Marx *Zur Kritik der Hegelschen Rechtsphilosophie, Einleitung* in the *Deutsch-Französische Jahrbücher* (1844), to denote the willed action by which a theory or philosophy (esp. a Marxist one) becomes a social actuality. Also *attrib.* and *transf.*

This term, frequently translated as *practice, practical ability, or practical activity*, has been increasingly used since the 1960s, following the translation and availability of Marx's early writings.

1933 S. Hook *Towards Understanding K. Marx* II. ix. 76 That is why Marx claimed that only in practice (*Praxis*) can problems be solved. 1936 — *From Hegel to Marx* viii. 281 Practice (*Praxis*) was something much wider than *practicability*. It was selective behaviour... Marx's theory of the Praxis could explain what all other philosophers recognised but which they could not begin to account for, without writing fairy-tales, viz., how knowledge could give power. 1966 L. DUPRÉ-FOUND *Philos. Materialism* viii. 216 But for Marx, praxis is more than a principle of

consciousness: it is a prereflective unity of nature and consciousness which can be explicated in thought but not initiated. 1969 D. McLELLAN *Young Hegelians & Karl Marx* i. ii. 10 The main agent in this transformation was not to be thought, as in Hegel's philosophy, but will, which was the motive force for that synthesis of thought and action for which Cieszkowski coined the term, so influential later, of 'praxis'. 1971 R. J. BERNSTEIN *Praxis & Action* (1972) p. xi, Marx... went on to develop a thorough, systematic and comprehensive *theory of praxis*—a theory, which I shall argue, provides the key for understanding his basic outlook from his early speculations to his mature thought. 1974 *Times Lit. Suppl.* 31 May 582/5 'The embattled imagination' and 'maimed utopia', whose values are under threat in the praxis-obsessed intellectual climate of the Federal Republic. 1976 *Survey Summer-Autumn* 255 He ascribed to Marx, not a voluntarist doctrine as the negation of determinism, but a philosophy that conceived itself as historical praxis. 1978 *Daily Tel.* 23 Nov. 8/8 The new theology is seemingly based on the Marxian concept of praxis—the involvement of the oppressed in the historical processes of change.

*d.* Action that is entailed by theory or a function that results from a particular structure.

1953 E. L. ALLEN *Existentialism from Within* ii. 27 The Greeks did not speak of 'things' but of *pragmata*, implying that I have to do something (*praxis*) about them. 1962 MACQUARRIE & ROBINSON tr. *Heidegger's Being & Time* II. iv. 409 What is decisive in the 'emergence' of the theoretical attitude would then lie in the *disappearance of praxis*. *Ibid.*, And just as *praxis* has its own specific kind of sight ('theory'), theoretical research is not without a *praxis* of its own. 1966 B. HAIGH tr. *Luria's Human Brain & Psychol. Processes* i. 42 At first glance it may appear that lesions situated in very different parts of the brain may lead to a disturbance of praxis. 1968 J. M. HEATON *Eye* iii. 46 Thus, even at this early age, praxis has emerged, i.e. the activity of looking has become meaningful, an end in itself to the infant. 1970 E. PACI in J. M. Edie *Patterns of Life-World* 131 Since instruments are extensions either of the sensing body, or of the acting body, or of the body as organ of will and praxis, they represent a fusion of the self and nature in the body. 1972 PICCONE & HANSEN tr. *Paci's Function of Sci.* III. xix. 360 Science loses its function and society hides the meaning of praxis through technistic ideology.

**pre-** (pri:, pri) *prefix*, repr. L. *præ* *adv.* and *prep.* (of place, rank, and time) before, in front, in advance. This was commonly written *pre* or *pre* in med.L., and has become *pre-* in the modern Romanic langs. In Eng. the prefix was sometimes written *præ-* after the revival of learning, but is now regularly *pre-*. In a few words recognized as Latin, and their immediate derivatives, *præ-* is now usual, though even these are frequently, esp. in America, written with *pre-*. See PRÆ-.

In L. *præ* was prefixed adverbially to a great number of verbs, as *præ-acuere* to sharpen in front, *præ-ambulare* to walk before, *præcludere* to shut in front, *præcognoscere* to foreknow, *præcurrere* to run before, *præ-eminere* to stick out before, be prominent, *præiudicare* to judge or pass sentence beforehand, *præmordere* to bite off before the point or abruptly; also with verbal derivatives, as *præcentor* a leader in singing, *præcursor* a forerunner, *prædictio* foretelling, *præfatum* fore-speech, preface. Less often with adjs. and sbs., as *præcānus*, *præmatūrus* grey, ripe before (the time), *præuius* leading the way; *præminister* a servant standing before, *præmolestia* trouble beforehand, *prænomen* a forename or first name. Also very frequently prefixed as an intensive to adjectives, as *præaltus* high before or in comparison with others, *præclarus* pre-eminently clear or bright, *præpotens* exceedingly powerful, *prævalidus* very strong. In Latin *præ-* was rarely prefixed with prepositional force, as in *præcordia* the parts in front of the heart, *præripia* places in front of or near the bank of a river, *præmodum* *adv.* surpassing or beyond measure.

In English many Latin verbs and their derivatives in *præ-* have their representatives in *pre-*, and the use of this prefix has been greatly extended, so that it is now a living element, prefixable to almost any verb of Latin origin, and even sometimes prefixed to words of English or modern origin, as *pre-breathe*, *pre-embolden*, *pre-plot*, *pre-sift*. Its use with adjectives or substantives, other than verbal, is less common, and the L. intensive use in *præaltus*, etc., though retained in a few words taken or imitated from L., is not a living use in Eng. But the prepositional construction, in which *pre-* governs the second element, which was so rare in L., has in English received vast extension, so as to become the second great living use, *pre-* being preferred to *ante-* as the opposite of *post-* in new formations, and often substituted for it, as in *pre-baptismal*, *pre-Christian*, *prehistoric*, *pre-Darwinian*, *pre-reformation* instead of *ante-baptismal*, *ante-Christian*, *ante-historic*, *ante-Darwinian*, *ante-reformation*. This preference of *pre-* may be partly due to its superior shortness and neatness, but is prob. largely in order to avoid the oral confusion of *ante-* with *anti-*, as in *ante-Christian*, *antichristian*, *ante-Darwinian*, *anti-Darwinian*.

*Pronunciation.* In all English formations in *pre-*, and some of those formed in Latin or French, in which the sense of 'before' is felt, the prefix is pronounced with a clear *e*, long or short ([i:], [i]). In *nonce-combinations*, the vowel is regularly long, and more or less stressed, e.g. *pre-boil* (pri:'bɔil), *pre-Greek* (pri:'gri:k), *pre-telegraph* (pri:'teligro:f, -æf). In words of this class of more permanent standing and

more independent meaning, the *e* is long ([i:]) when stressed, and usually short ([i]), but capable of being long ([i:]), when not under stress primary or subordinate, e.g. *prea'damic* (pri-), *pre'adamite* (pri-). In words from Latin in which the sense 'before' is obscured or lost, *pre-*, when unstressed, is (pri-); when stressed, (pri-) or (pre-); thus, *pre'inct* (pri-), *pre'inct* (pri-), *pre'cipice* (pri-), *pre'cipitous* (pri-), *pre'fer* (pri-), *pre'ference* (pre-). But here also (pri-) is lengthened to (pri-) under rhetorical or factitious stress, as in 'Did you say "repair" or "prepare"?' 'not the "procession" but the "precession" of the equinoxes'.

**Use of Hyphen.** Nonce-words and casual compounds of English formation in *pre-* are usually hyphenated, as *pre-geological*, *pre-instil*, *pre-medicate*; compounds already formed in Latin or French, and their derivatives, are regularly written *indivisim*, as *precaution*, *predestination*, *prefigure*. But between these extreme types there are very many combinations in which the use varies, the hyphen being employed whenever its use appears to add to the clearness of the writer's meaning, or when it is desired to emphasize the function of the prefix, to contrast the compound with the simple word or with the analogous compound in *post-*, or the like. In this dictionary, such words are as a rule entered in the unhyphenated form, though the quotations will show that both forms are freely used. But in words in which *pre-* is prefixed to a word or element beginning with *e*, the hyphen is conveniently used to separate the two *e*'s, as in *pre-eminent*, *pre-engage*, *pre-exist*. (These are sometimes printed *preëminent*, etc.)

In this dictionary, all important and established words in *pre-* are treated as main words, and will be found in their alphabetical places. But compounds of rare occurrence, chiefly obsolete, and those of obvious meaning and regular formation, are given below, under their respective classes. Nonce-words and casual combinations can be formed at will, and are unlimited in number, so that only examples showing their formation and use are required.

[Arrangement. A. *pre-* adverbial. I. Of time or order: 1, with vb.; 2, with sb.; 3, with adj. II. Of place: 4, with adj. or sb. III. 5, Of order, rank, importance, quality, degree. IV. 6, Intensive. B. *pre-* prepositional. I. Of time: 1, with adj.; 2, with sb. or phr. II. Of place: 3, with adj.]

A. Combinations in which *pre-* is adverbial or adjectival, qualifying the verb, adjective, or substantive, to which it is prefixed.

I. Of time or order of succession.

In casual combinations better with hyphen; but often without. *Pre-stressed* (pri-).

c. In advb. relation to a vb.; in compounds formed in L., as PRECLUDE, PREFIX, PREMUNITE.

III. Of order, rank, importance, quality, degree.

5. In sense 'before in order or importance, above, in preference to, superior to, more than, beyond'.

B. Combinations in which *pre-* is prepositional, having as its object the sb. forming, or implied in, the second element.

I. Relating to time or order of succession: in which *pre-* = before; anterior, prior, or previous to; preceding, earlier than.

These may be formed for the nonce almost at pleasure; indeed, such combinations as *pre-Alfredian*, *pre-Reformation*, *pre-reformational*, *pre-Shaksperian*, *pre-free-trade*, are rather phrases than words: *pre-Shaksperian dramatists*, *pre-Reformation ritual*, *pre-free-trade conditions*, being only a compacter way of saying 'dramatists before Shakspeare', 'ritual before the Reformations', 'conditions (existing) before (the era of) free trade'.

All these are properly hyphenated, but the special compounds in 1 d are often written *indivisim*. *Pre-* is always stressed (pri:), and *e* long.

1. With adjectives (and their derivative adverbs and substantives), or f. *pre-* + a (Lat.) sb. + adjectival ending, as *pre-reformation-al*; forming adjectives, with derivative adverbs and substantives. Also with (Eng. or other) sbs. directly forming sbs., as *pre-cancer*, *-climax*, *-delinquency*, *-menarche*, *-myelocyte*, etc. (below). Also PREHOMINID, PREPUBERTY, etc.

Compounds of this type were not used in Latin, and they are of recent appearance in English. The earliest appears to be PRE-ADAMITE, formed in Lat. as a sb. 1655, whence in

Eng. as sb. in 1662, and as adj. in 1786; thence *pre-adamitical* in 1716; *prediluvian* occurs 1804, *preprandial* 1822, *prenatal* 1826, *pre-Christian* 1828, *pre-millennian* 1828, *pre-Gothic* 1831, *prehuman* 1844, *prehistoric* 1851, *pre-glacial* 1855, *pre-scientific* 1858, *pre-Georgian* 1861, *pre-Roman* 1863. (Some of these may have been used a little earlier.)

Formed on proper nouns (or their adjectives), esp. on names of persons, races, nations, dynasties, and religions, as *pre-Alfredian*, *-Arnoldian*, *-Augustinian*, *-Baconian*, *-Caroline* [Charlemagne], *-Cavourian*, *-Chaucerian*, *-Columbian*, *-Constantinian*, *-Copernican*, *-Dantean*, *-Darwinian*, *-Evite* [Eve], *-Galilean* [Galileo], *-Georgian* [the four Georges], *-Hieronymian* [Hieronymus or Jerome], *-Hitlerian*, *-Hitlerite*, *-Kantian*, *-Keynesian*, *-Linnæan*, *-Listerian*, *-Malthusian*, *-Mendelian*, *-Messianic*, *-Mosaic*, *-Muhammadan*, *-Newtonian*, *-Patrician* [St. Patrick], *-Pauline*, *-Pharaonic*, *-Shakespearian*, *-Solomonic*, *-Solonian*, *-Victorian*, *-Virgilian*, *pre-Aryan*, *-Assyrian*, *-British*, *-Buddhist*, *-Canaanitic*, *-Celtic*, *-Doric*, *-European*, *-Fascist*, *-Gothic*, *-Greek*, *-Han*, *-Hellenic*, *-Hispanic*, *-Islamic*, *-ite*, *-Israelitish*, *-Jewish*, *-Mycenean*, *-Nazi*, *-Norman*, *-Norse*, *-Roman*, *-Saxon*, *-Semitic*, *-Soviet*, *-Vedic*, etc.

4. *N.Z.* An inhabitant of Canterbury Province before the settlement of 1850.

1930 L. G. D. ACLAND *Early Canterbury Runs* 1st Ser. i. 3 The old 'Pre-Adamites'... were those who had bought land from the New Zealand Company and settled here before the Canterbury settlers arrived. 1949 A. H. REED *Story of Canterbury* iii. 55 To the Hays and Sinclairs and other 'pre-Adamites'—as those few who had arrived before the 'Pilgrims' came locally to be called—these ships represented shops, schools, churches, roads and other amenities of which they had for so long been deprived. 1977 *N.Z. Herald* 8 Jan. 1-6/6 Any reader whose antecedents were among these 'Pre-Adamites', as they are called, is invited to send their names... to [address given].

B. *adj.* 1. That existed before Adam; belonging to the time previous to that of Adam; prehuman.

1786 tr. *Beckford's Vathek* (1883) 142 Upon two beds of incorruptible cedar, lay recumbent the fleshless forms of the Preadamite Kings, who had been monarchs of the whole earth. 1836 LANE *Mod. Egypt.* I. x. 283 The Ginn are said to be of præ-adamite origin, an intermediate class of beings between angels and men. 1851 RICHARDSON *Geol.* (1855) 271 The bones of the *Mastodon* and *Megatherium*—those terrestrial giants of the pre-Adamite earth. 1877 DAWSON *Orig. World* xv. 356 Our knowledge of pre-Adamite and present nature. 1916 *Nature* 25 May 259/2 For imitation, a pre-Adamite simian character, plays no small part in the ostensible development, mental, moral, and otherwise, of gregarious folk.

2. Relating to the time, or to a race, previous to Adam; belonging to the Pre-adamites (sense A. 2).

1882 OGILVIE, *Preadamite*, a... 2. Pertaining to the Pre-adamites: as the preadamite theory.

Hence **pre-adamitic**, **-ical** *adjs.* = PRE-ADAMITE B. 1; **pre-'adamitism**, the doctrine of the existence of pre-adamite man.

1716 *Gentleman Instr.* II. (ed. 6) 414 Upon what Memorials do you ground the Story of your Præ-adamitical Transactions? 1790 *Monthly Rev.* III. 543 The author adds a vindication of himself from an accusation of Pre-adamitism; . he insists on it, that, provided he excepts the human species, he may believe rational animals to have existed on the earth before Adam, without being guilty of this terrible heresy. 1799 KIRWAN *Geol. Ess.* 127 These, however, have been by some, ascribed to some fictitious Preadamitick periods. 1865 CDL. WISEMAN in *Ess. Relig. & Lit. Ser.* I. 26 How many human skeletons have been announced as found in preadamitick positions! Yet not one has yet been admitted as proved. 1880 A. WINCHELL *Preadamites* p. iii, The central idea of the work is human preadamitism.

**preadapt** (pri:'ædæpt), *v.* [PRE- A. 1.] *trans.* To adapt beforehand; *spec.* in *Biol.*, to adapt (an organism) for life in conditions not yet available to it. Hence **preadapted** *ppl. a.* [in *Biol.* tr. F. *préadapté* (L. Cuénot *La Genèse des Espèces Animales* (1911) IV. 291)].

1849 SEARS *Regeneration* I. ii. (1859) 27 The same propensities in men will . . . preadapt the organs to every shade of meaning. 1915 *Eugenics Rev.* VII. 56 By being warm-blooded, mammals and birds are enabled to maintain their normal activity throughout a wide range of temperature, and they may therefore be said to be preadapted to all temperatures within that range. 1947 *New Biol.* III. 90 For the most part cave animals are drawn from groups habitually living in damp, dim places, such as under stones or at the bottoms of streams; they are, so to speak, preadapted to life in caves before they enter them. 1952 *Ibid.* XIII. 25 An animal adapted to living in a small isolated volume would be preadapted to captivity. 1969 J. M. WELLER *Course of Evol.* ix. 467 The evolutionary development . . . of these advanced and more complex feathers, whose original function was insulation, preadapted the very early birds for flight. 1970 T. H. EATON *Evolution* viii. 121 In retrospect we can say that some thecodonts were 'preadapted' in certain ways for the life of birds. 1976 *Sci. Amer.* Aug. 38/2 Such a trend, may, however, have helped to preadapt the Egyptians to a ready acceptance of food production later.

Hence **prea'daptive** *a.*, causing or characterized by preadaptation.

1915 *Eugenics Rev.* VII. 50 One can call indifferent or semi-useful, characters in a species which become evident adaptations on removal to a new habitat or on the acquirement of new habits, preadaptive or prophetic characters, or more briefly, preadaptations. 1944 G. G. SIMPSON *Tempo & Mode in Evol.* vi. 186 The direct development of adaptations in one environment may be preadaptive for another. 1969 J. M. WELLER *Course of Evol.* i. 20 Potentially preadaptive mutations . . . are likely to accumulate within a population as recessives.

**preadap'tation**. [PRE- A. 2.] Adaptation beforehand; *spec.* in *Biol.* [tr. F. *préadaptation* (L. Cuénot *La Genèse des Espèces Animales* (1911) IV. 306)], the possession or acquisition by an organism of heritable features which adapt it to an environment or mode of life which only later becomes available to it.

1886 J. WARD in *Encycl. Brit.* XX. 73/1 The movements are only more definite than those simply expressive of pain because of inherited pre-adaptation. 1915 *Eugenics Rev.* VII. 56 Versatility is an attempt at universal preadaptation, indeed at complete independence of particular circumstances. 1934 *Biol. Abstr.* VIII. 289/2 'Preadaptation': the occupation of empty regions is made by neighbouring spp. already prepared in the sense of having a necessary and sufficient adaptation. 1942 *Tee Emm* (Air Ministry) II. 144 Wear the special pre-adaptation goggles which will provide you with your hour's synthetic night before you tackle the real one. 1953 G. G. SIMPSON *Major Features Evol.* vi. 188 The term 'preadaptation' has been applied to a great variety of real or supposed evolutionary phenomena, from the appearance of a small mutation with selective value in the population in which it occurs to the sudden appearance of a form monstrous in its parental population but miraculously, one might almost say, adapted to some quite different way of life. 1978 *Sci. Amer.* Sept. 51/1 If a favored mutation does appear, it can be viewed as exhibiting a 'preadaptation' to that particular environment: it did not arise as an adaptive response but rather proved to be adaptive after it appeared.

Hence **preadap'tational** *a.*, pertaining to or characterized by preadaptation.

1940 R. GOLDSCHMIDT *Material Basis Evol.* iii. 151 A return of the subspecies at one extreme end toward the starting point could only be accomplished by retracing the steps of preadaptational mutation to its original condition. 1944 G. G. SIMPSON *Tempo & Mode in Evol.* vi. 188 The field naturalist . . . is not likely to be satisfied in such cases with the preadaptational axiom that animals enter a new environment simply because they can.

**pread'mission**, *sb.* and *a.*.

1887 J. A. EWING in *Encycl. Brit.* XXII. 501/2 (*Steam-engine*) An effect of lead [i.e. the condition of the valve being to a certain extent open when the piston-stroke begins] is to cause *preadmission*, that is to say, admission before the end of the back stroke. *Ibid.* 502/1 The position of the crank at which preadmission occurs.

**1.** The holder of a prebend; a canon of a cathedral or collegiate church who holds a prebend.

Originally, each canon had a *præbenda* or share in the funds of the church to which the clergy-house was attached; in later times when the custom grew up of assigning a particular estate for the support of a particular canon, the latter received also the designation of *prebendary* from the estate so assigned, e.g. 'Canon of St. Paul's and Prebendary of Finsbury'. By act 3 & 4 Vict. c. 113 of 1840, the members of a cathedral chapter (except the dean) are now called *canons*; but in some chapters of the Old Foundation the name *prebendary* (with a territorial addition) is retained for the titular holder of a disendowed prebend, whose status is, in most respects, similar to that of the *Honorary Canons* in cathedrals of the New Foundation.

3. a. *Astron. precession of the equinoxes*, often ellipt. *precession* [*æquinoctiorum præcessio* (Copernicus): called by Hipparchus and Ptolemy *μετάπτωσης* mutation]: the earlier occurrence of the equinoxes in each successive sidereal year, due to the retrograde motion of the equinoctial points along the ecliptic, produced by the slow change of direction in space of the earth's axis, which moves so that the pole of the equator describes a circle (approximately: see NUTATION) around the pole of the ecliptic once in about 25,800 years. Hence commonly used to denote this motion of the equinoctial points, of the earth's axis, or of the celestial pole or equator; also the motion of the earth itself which manifests itself as the precession of the equinoxes.

As a result of the precession, the longitudes, right ascensions, and declinations of all the stars are continually changing, and the signs of the zodiac shift in a retrograde direction along the zodiac, so that they no longer coincide with the constellations from which they were named (cf. the statement s.v. CANCER *sb.* 2 b).

*lunisolar precession*: that part of the precession which is caused by the combined attractions of the moon and sun upon the mass of the earth (the remaining effect being due to the attractions of the other planets).

*planetary precession*, that part of the precession of the earth's axis caused by the gravitational attraction of the other planets.

ALTER et al. *Pictorial Astron.* (ed. 2) xlvii. 211/2 This gradual north-south drift of the Southern Cross is a consequence of the precession of the earth, which produces a slow movement of the celestial pole among the stars on a circle with a radius of 23½°. 1971 *BAKER & FREDRICK Astron.* (ed. 9) ii. 49 It is the lunisolar precession that has been described.. Planetary precession is the effect of other planets on the plane of the equator, so that its intersection with the ecliptic shifts slowly towards the east along the celestial equator. The result of the two precessions is the general precession.

b. *Physics*. Extended to any motion analogous to that of the earth's axis or the earth itself in the precession of the equinoxes; e.g. the slow rotation of the axis of a top spinning rapidly in a sloping position.

In general the precision of an estimator varies with the square root of the number of observations upon which it is based. **1965** R. predestination (pri'destɪ'neɪʃən). [ad. late L. *prædestinātiō-em* (Augustine), n. of action f. *prædestināre* to PREDESTINE: see -ATION. So F. *prédestination* (12th c. in Hatz.-Darm.).]

The action of predestinating, or fact of being predestinated; the ordaining or determination of events before they come to pass; pre-

appointment by, or in the way of, fate or destiny; foreordination.

1. *Theol.*, etc. The action by which God is held to have immutably determined all (or some particular) events by an eternal decree or purpose.

'Predestination is a theological term, sometimes used with greater latitude to denote the decree or purpose of God by which He has from eternity immutably determined whatever comes to pass; sometimes more strictly to denote the decree by which men are destined to everlasting happiness or misery; and sometimes with excessive strictness to denote only predestination to life or election' (Marcus Dods in Encycl. Brit. (1885) XIX. 668/1).

a. The action of God (held by Christians generally) in foreordaining or appointing from all eternity certain of mankind through grace to salvation and eternal life. (In this sense = election, and opposed to reprobation.)

KIDD 39 Articles II. ii. xvii. 157 The tenet of particular redemption, which held that God's predestination had reference not to mankind at large, but to this and that particular individual.

b. The action of God (insisted upon in some systems of doctrine, esp. those associated with the names of St. Augustine, St. Thomas Aquinas, and Calvin), in foreordaining the future lot and fate of all mankind in this life and after death (including their salvation or perdition); and, generally, His foreordaining of whatsoever comes to pass. 1785 *REID Intell. Powers v. i.* (1803) II. 178 Universals have no real existence. B. *sb.* In general sense: That which may be predicated.

1785 *REID Intell. Powers v. i.* (1803) II. 110 A predicable therefore signifies the same thing as an attribute. 1837 *HALLAM Hist. Lit. I. i.* iv. §79. 322 This method appears to be only an artificial disposition . . . of subjects and predicables, according to certain distinctions. 1906 *JOSEPH Introd. Logic* iv. 54 A predicable is merely that which can be predicated: viz. that which is universal, not an individual; all kinds, qualities, states, relations, etc., are predicable, and they are universal, because they may be exemplified in and belong to more than one individual subject.

b. *spec.* in Aristotelian Logic (in *pl.*, tr. Gr. *κατηγορικά*): The classes or kinds of predicates viewed relatively to their subjects, to one or other of which classes every predicated thing may be referred; grand intentions of predicates considered in relation to subjects.

Of these relations Aristotle (*Topica* I. iv, v) recognized four, viz. *genus* (γένος), *definition* (ὅρος), *property* (ἰδιον), *accident* (συμβεβηκόσ). Under *genus* he made the subdivision of *difference* (διαφορά). The list was subsequently modified by Porphyry and by the early Schoolmen, by the omission of *definition*, and addition of *species* (εἶδος), giving the 'Five Predicables', *genus*, *species*, *difference*, *property*, *accident*.

1551 *T. WILSON Logike* 3 b, I begin with the predicables because they shew how much every word doth comprehend in it self. *Ibid.*, They be called predicables because some one thing is spoken of an other. 1656 *BLOUNT Glossogr.* s.v., In Logick there are five Predicables, otherwise called Porphyries five terms. 1766 *GOLDSM. Vic. W. vii.* The essence of spirituality may be referred to the second predicable. 1864 *BOWEN Logic* v. 112 In his analysis of Judgments, Aristotle was led to consider how many kinds of Predicates there are, when viewed relatively to their Subjects; in other words, to determine the Second Intentions of Predicates considered in relation to Subjects. Thus was formed his celebrated doctrine of the Predicables . . . which was considerably modified, but not improved, by his followers, Porphyry and the Schoolmen. 1906 *JOSEPH Introd. Logic* iv. 92 The Porphyrian list of predicables substitutes *Species* for *Definition*. But that difference implies a change in the point of view. *Ibid.* 96 It would be well to

abandon the Porphyrian list of predicables in favour of the Aristotelian.

c. In the philosophy of Kant: see quot.

1902 *Baldwin's Dict. Philos.* II. 325/2 Kant undertook to set up his own 'predicables of the pure understanding', which were to be derivative conceptions under the categories.

Hence 'predicableness' (1727 in Bailey, vol. II); 'predicably *adv.*

1727-41 *CHAMBERS Cycl.*, *Predicably*, *prædicabiliter*, is used in the schools in opposition to *predicamentally*.—Thus, matter is said to be united to form *predicably*, or *per accidens*; to exclude the notion of a predicamental accident.

Trans.* XCI. 99 Bringing  $x/\sqrt{-1}$  under the predicament of quantity. 1864 *BOWEN Logic* v. 116 Having determined the Second Intentions of Predicates, which are the Predicables, Aristotle attempted to carry the analysis of Judgments one step farther by determining their First Intentions, and was thus led to form his celebrated list of the ten Categories or Predicaments, [in which] he inquired how many and what particular things may be predicated of any Subject.

2. a. *Gram.* The statement made about a subject, including the logical copula (which in a verb is expressed by the personal suffix). Sometimes restricted to the main verb and its object or complement, to the exclusion of any adjunct. Also in *Logic* and *Math.*, freq. in wider

use: an assertion or relation having one or more terms unspecified; a propositional function.

The grammatical predicate is either a simple verb, or a verb of incomplete predication with its complement. The generalization of *predicate* (G. *prädikat*) to include relations (many-place predicates) originated in Hilbert & Ackermann *Grundzüge der theoretischen Logik* (1928) 45: see quot. 1950.

Gram.* §§347-8. 92 Inasmuch as the personal terminations of a verb have no existence apart from the verb itself, it is usual (and convenient) in grammar to treat the copula as a part of the predicate. Thus in the sentence 'Time flies', time is called the subject, and flies the predicate. . . In using the word *predicate*, we mean the predicate and copula combined. In grammar, the terms *subject* and *predicate* are used in a more restricted sense than in Logic. **1874** SAYCE *Compar. Philol.* i. 9 Every predicate must have a subject. **1892** H. SWEET *New Eng. Gram.* I. 48 In language the logical connections between words extend over a wider area than the purely grammatical ones. Thus in such a sentence as *I came home yesterday morning*, the grammatical predicate to *I* is *came, home and yesterday* being grammatically connected with the predicate only, while *morning* is an adjunct to *yesterday* only. But in thought *yesterday* is as much part of the predicate as *came* itself, *came-home-yesterday-morning* being the logical predicate which, from a grammatical point of view may be regarded either as an extended predicate or a group-predicate. **1921** E. SAPIR *Language* ii. 37 The reduced sentence resolves itself into the subject of discourse—the mayor—and the predicate—is going to deliver a speech. It is customary to say that the true subject of such a sentence is *mayor*, the true predicate is *going* or even *is*. **1961** *Archivum Linguisticum* XIII. 81 The relative priority of such class concepts as noun and verb as against such as subject and predicate. **1968** J. [Note] Hitherto it has been customary in logic to call only functions with one argument place predicates, while functions with more than one place were called relations. Here we use the word 'predicate' in a quite general sense. **1965** HUGHES & LONDEY *Elem. ¶3. *Erroneously* = PREDICTION.

1862 N. BRIT. *Rev.* May 290 The foreknowledge and predication of events.

[In CAXTON *Gold. Leg.* 198 b/1 *predycacyon* appears to be misprinted for *perdyacyon*.]

**predi'cational**, *a.* [f. PREDICATION + -AL.] Of or pertaining to predication.

1894 J. VENN *Symbolic Logic* (ed. 2) ii. 59 It..concluded, in the predication form,—using 'is' instead of 'is identical with'. 1921 W. E. JOHNSON *Logic* I. xiv. 237 Giving added significance to the predication factor by bringing out the relation of an adjective to its determinable. 1922 *Ibid.* II. iii. 56 A function is called predication when the component that determines its form is the characterising tie, which unites two variants related to one another as substantive to adjective. 1953 K. BRITTON *J. S. Mill* vi. 194 I say 'This snow is white'... The predication form of sentence indicates this connexion [between whiteness and the other qualities of snow]: whereas 'There is snow and noise' does not—it is not asserted that the snow is noisy. 1955 [see *predicate calculus* s.v. PREDICATE sb. 3]. 1961 *Brno Studies in English* III. 15 The unwarranted assumption that any word taken by itself must possess an independent predication function. 1978 *Language* LIV. 90 Quantification is often predication (i.e. with adjectives) in Japanese.

**predicative** (prɪdɪkə'taɪvəl), *a.* [f. PREDICATIV(E) *a.* + -AL.] Of, pertaining to, or constituting a predicate. Also *ellipt.* as *sb.*

1891 H. A. STRONG et al. *Introd. Study Hist. Lang.* xvii. 290 A similar vacillation occurs in cases of the predicative noun or predicative attribute. 1937 A. H. GARDNER in *Mélanges de Linguistique et de Philologie offerts à J. van Ginneken* 310 Predicative examples are not very frequent, e.g. *She is very Boston*, *Surely that knock* (i.e. at the front door) is *John*. 1958 A. A. HILL *Introd. Ling. Struct.* xvi. 274 A verb consisting of an -ing form..will be defined as a predicative rather than as a predictor.

**predicative** (prɪ'dɪkətɪv, 'prɪdɪkətɪv), *a.* [ad. L. *prædicatīv-us*: see PREDICATE *v.* and -IVE; cf. F. *prédicatif*, -ive.]

1. a. Having the quality of predicating, affirming, or asserting; of, pertaining to, or constituting a predicate. Also *ellipt.* as *sb.*

1846 *Proc. Philol. Soc.* III. 10 Thus the formation called the *casus substitutivus*, answering to the *nuncupativus* or predicative case of the Finnish and Lappish grammarians, may be employed either as an adverb or the stem of a verb. 1860 MAX MÜLLER *Chips* (1880) I. xv. 358 Words which always conveyed a predicative meaning. 1885 J. FITZGERALD tr. *Schultze's Fetishism* vi. §7 These things are all predicative of the blue vault above our heads. 1892 WESTCOTT *Gospel of Life* 103 The Divine names which are proper to the Shemitic languages are predicative and moral. 1914 O. JESPERSEN *Mod. Eng. Gram.* II. xiv. 330 As a rule words that can be used as adjuncts (pre-adjuncts) can also be used in the same form as predicatives. 1925 E. KRUISINGA *Handbk. Present-Day Eng.* (ed. 4) II. 1. 235 Predicative Participles... The simple present participle is very frequently used with the copula *to be*, to form what is called the progressive. 1925 GRATTAN & GURREY *Our Living Lang.* xxi. 129 The following typical examples of Qualifiers and Predicatives. 1930 in J. T. Hatfield et al. *Curme Vol. Ling. Stud.* 46 A noun or pronoun in the subjective case may take a great variety of predicative cases. 1932 *Eng. Stud.* XIV. 129 By starting from the full meaning of the finite (or as it is now called: predicative) member of the group, the author compels us to look for a discussion of the progressive, perfect, etc., in the sections on *to be*, *to have*, etc. 1932 W. L. GRAFF *Lang.* ix. 328 If we emphasize the relationship of the referential parts to one another, it is noted that the Greenlandic sentence consists of a noun and its attributes, whereas the English one is formed by a subject and its predicate. Hence the further division into attributive or possessive languages and predicative ones. 1933 O. JESPERSEN *Syst. Gram.* 25 Some languages have a special case, or even two special cases in which predicatives are put:

shall we say that 'a teacher' is in the 'predicative' case in 'he is a teacher' and in the 'illative' in 'he became a teacher'? 1942 R. W. ZANDVOORT in *Eng. Stud.* XXIV. 2 Only 10 of these [sc. forms of *to do*] are finite (predicative) forms...; the rest are non-finite (non-predicative). 1959 M. SCHLAUCH *Eng. Lang. in Mod. Times* viii. 230 He [sc. Deutschbein] contrasts especially the predicative sentence, which may be complicated but is apprehended as an organic whole... and the attributive sentence. 1966 *Eng. Stud.* XLVII. 50 A discussion of intransitive verbs combined with a predicative 'apposition' (e.g. *he died young*; *he died an admiral*).

b. In various special collocations, as *predicative clause*, *syntagm*, etc.; *predicative adjunct*, *appositive* = *object complement* s.v. OBJECT *sb.* 7.

1963 Predicative adjunct [see OBJECT *sb.* 7]. 1963 F. T. VISSER *Hist. Syntax Eng. Lang.* I. ii. 182 Syntactical units of the type... 'he died a martyr' consist of a subject, a predicate in the form of an intransitive verb, and an adjunct (called 'predicative adjunct' in this study)... Jespersen uses the term 'quasi-predicate'; Curme the term 'predicative appositive' and F. T. Wood... the term 'pseudo-complement'. 1964 E. PALMER tr. *Martinet's Elem. Gen. Linguistics* iv. 116 The syntagm *il y avait*... is not autonomous but independent. We shall call it a *predicative syntagm*. *Ibid.* 119 The predicate comprises a predicative moneme, accompanied or not by modifiers. The predicative moneme is the element around which the sentence is organized, the other constituent elements marking their function by reference to it. 1965 *Language* XLI. 136 What Saxmatov called 'predicative-attributive relations'. 1966 *Eng. Stud.* XLVII. 50 Intransitive verbs combined with a predicative 'apposition' (e.g. *he died young*...). I should prefer this term to Visser's 'predicative adjunct'. *Ibid.* 262 It is permissible to... speak of subject clause, predicate clause, predicative clause.

2. = PREDICATORY *a.* I. *rare*.

1870 SWINBURNE *Let.* 19 Feb. (1959) II. 98, I trust you [sc. D. G. Rossetti] to 'cut close and deep'... if you find anything to pare away of the spouting or drawing, vociferous or predicative kind.

3. *Logic*. Of a function: of order only one greater than that of its argument of greatest order.

1906 B. RUSSELL in *Proc. London Math. Soc.* IV. 34 Norms... which do not define classes I propose to call *non-predicative*; those which do define classes I shall call *predicative*. 1910 WHITEHEAD & RUSSELL *Principia Math.* I. ii. 56 We will define a function of one variable as predicative when it is of the next order above that of its argument, i.e. of the lowest order compatible with its having that argument. 1936 *Mind* XLV. 498 The axiom of reducibility is adopted in *Principia Mathematica*. This axiom moderates the second part of the theory by asserting that for every propositional function there is a formally equivalent one which is predicative, i.e., has the lowest order compatible with its type. 1969 FEYS & FITCH *Dict. Symbols Math. Logic* v. 91 A property, of order only one greater than the order of what it applies to, is called by Russell a predicative property. Hence *predicatively adv.*, as a predicate.

1875 WHITNEY *Life Lang.* xii. 233 One step from nouns used predicatively. *Ibid.* 243. 1895 *Proc. 14th Conv. Instruct. Deaf* 81 A noun or pronoun used predicatively is in the nominative case.

**predica'tivity**, [f. *prec.* + -ITY.] The fact or quality of predicating.

1963 W. V. QUINE *Set Theory* §36.265 This predicativity restriction obstructs Cantor's theorem. 1966 *Philos. Rev.* LXXV. 384 For each system in turn we examine the status of predicativity.

**predicator** ('prɪdɪkətə(r)). [Early mod.E. *predycatour*, *a.* OF. *predicatour* (14th c. in Hatz.-Darm.), in 16th c. *prédicateur*, ad. L. *prædicātor* a proclaimer, praiser in public; in late and med.L. a preacher; agent-n. f. *prædicāre* to PREDICATE.] One who or that which predicates.

Speech* XLI. 204 All of the clauses here termed 'imperative' have as predictors verb forms which we can describe as present-tense subjunctives. 1966 G. N. LEECH *Eng. in Advertising* ii. 10 The elements of clause structure in English are:... P. Predictor (traditionally 'verb', but this term is needed for a class of word). 1969 *Eng. Stud.* L. 32 Clauses without a Predictor... can assume the status of independent clauses.

Hence *predicatress*, *rare*, a female preacher.

1669 MRS. BLOMER in Fox Bourne *Locke* (1876) I. v. 254 The impudence of the female predicatress.

1924 HENRI & TEVES in *Nature* 20 Dec. 895/1 The molecule can be modified in its internal structure: the atoms are driven apart, the bonds are weakened, the molecule becomes more reactive, and the rotational movements are no longer quantized. This first modification is a preliminary preparation of the molecule for its total dissociation, and it is necessary to introduce a new term for this change. We propose to denote it by the term predissociation of the molecule. 1930 *Physical Rev.* XXXV. 1028 (*heading*) Predissociation of diatomic molecules from high rotational states. 1944 GLASSSTONE *Theoret.
