II. 4. a. A public teacher or instructor of the highest rank in a specific faculty or branch of learning; *spec.* one who holds an endowed or established 'chair' in a university or one of its colleges. Also frequently applied to the tutors or lecturers on the staff of theological and other professional or technical colleges, academies, and seminaries.

In the mediæval European Universities, at first simply a synonym of *Magister* or *Doctor* (degrees being originally qualifications to teach); but in this use not common as an English word. The right originally possessed by any Master or Doctor to teach publicly in the schools of his Faculty was gradually restricted to an inner circle of teachers, and the term *Professor* came eventually to be confined to the holders of salaried or endowed teaching offices, or to the highest class of these, such appellations as *Reader*, *Lecturer*, *Instructor*, being given to teachers of lower rank. In the old English Universities the ancient usage survives in the letters S.T.P. (*Sacrae Theologiae Professor*) for D.D.; the modern use is largely due to the creation of five *Regius* or *King's Professors* by Henry VIII (a number in recent times increased to seven). The endowed teachers of some other subjects were at first called *praefectors*, but this has gradually been superseded by *professor*. See Rashdall *Univ. Europe Mid. Ages* I. 21, etc.

**1890** in *Century Dict.* **1941** *Jrnl. Amer. Ceramic Soc.* XXIV. 229 The closest approach to this was a profilograph which had been constructed by Abbott at the University of Michigan and a somewhat similar device which had been built in Germany by Schmaltz. These instruments used a diamond stylus mechanically mounted on a mirror in such a way that movements of the diamond point in a direction normal to the surface of the material could be magnified by an optical lever system and the results recorded on a photographic film. **1963** *Engineering* 20 Sept. 360/1 The Bump-cutter employs 110 12 in diameter saw blades impregnated with natural diamonds. The design principle is based on a profilograph with the cutting head mounted on a 16 ft long frame supported by drive wheels at the rear and steering wheels at the front. **1976** ATTEWELL & FARMER *Princ. **profilometer.** [ad. F. *profilomètre* (Brocas); in Ger. *profilzeichner* (Hasting); f. PROFILE *sb.* + -OMETER.] 1. Any instrument or device for measuring the profile of the face.

**1895** in *Funk's Standard Dict.* **1939** *Jrnl. Amer. Med. Assoc.* 18 Nov. 1903/2 A description of Dr. Joseph Safian's profilometer is found in his book 'Rhinoplastic Surgery'.

2. Any instrument for measuring or recording the roughness of a surface; *spec.* (a) one in which a fine stylus is drawn over a metal surface; (b) one consisting of a wheeled frame for travelling along a road.

**1937** *Metal Cleaning & Finishing* May 426 During the past two years, a new instrument called the 'Profilometer' has been developed. This instrument supplements the earlier work in this field, and enables roughness measurements to be made rapidly with a portable instrument. **1938** *Times* 26 Nov. 9/4 The profilometer—designed and constructed at the Road Research Laboratory—has been used to measure the riding qualities of a number of experimental sections. This 16-wheeled machine compares irregularities in the surface by integrating the vertical rise and fall in profile of the road above a given datum, the results being recorded as 'inches per mile'. **1949** G. SCHLESINGER *Factory* xi. 219/1 Generally the Profilometer provides only 'average' readings... determining the roughness of the surface without producing conclusions as regards the waviness. **1958** H. M. SHERRARD *Austral. Road Pract.* xvi. 302 The profilometer consists of a wheel resting freely on the road surface whose vertical movement is traced on a ribbon of paper, thus giving a profile of the road. **1966** R. ASHWORTH *Highway Engin.* xii. 254 The profilometer consists of a 16-wheeled articulated carriage arranged so as to support the recording gear at a constant height above the continuously arranged level of the road surface at these 16 wheel points. **1976** [see PROFILOMETRY below].

Hence **profilometry**, the use of such an instrument; **profilo'metric a.**

**1971** T. F. J. QUINN *Applic. Mod. Physical Techniques Tribol.* i. 32 This 'microscopic' approach must involve the use of as many methods of surface examination as possible. The more conventional methods of optical microscopy... and surface profilometry... are often too coarse for this approach. **1975** D. F. MOORE *Princ. & Applic. Tribol.* ii. 15 The profilometric, cartographic, and photogrammetric measurement techniques... deal with a complete representation of surface roughness. **1976** J. HALLING *Introd. Tribol.* ii. 21 The most usual method for the study of surface geometry is profilometry. In the profilometer a very fine diamond stylus... is drawn over the surface irregularities... The vertical movement of the stylus... is measured and amplified, usually electronically, so that the recorded output provides a picture of the actual surface.

**progeria** (prəʊ'dʒɪəriə). *Path.* [mod.L., f. Gr. *προγῆρ-ωσ* prematurely old + -IA<sup>1</sup>.] A fatal disease of children characterized by symptoms usually associated with senility.

**1904** H. GILFORD in *Practitioner* Aug. 210 The name progeria, for which I am indebted to Mr. James Rhoades

and Professor Arthur Sidgwick, is not only a far better word [than micromegaly], but is a true description of the distinguishing features of the two cases. *Ibid.* 217 The name progeria... has been given in recognition of the senile characters which form such a conspicuous feature of the disease from the beginning. **1927** Times (Weekly ed.) 28 Apr. 475/2 Cases of premature senility in children (goblins) described as progeria, the persistence in an adult (ateleioses) of child characters (elves). **1957** L. PRO<sup>-2</sup> 1 + GESTATION + -AL.] Relating to, promoting, or being part of the physiological preparations for pregnancy; applied *esp.* to substances whose physiological effects resemble those of progesterone; **progestational proliferation**, proliferation of the endometrium in preparation for pregnancy.

**1923** G. W. CORNER in *Physiol. **progestin** (prəʊ'dʒɛstɪn). *Physiol.* [f. PRO<sup>-1</sup> 5 + GEST(ATION + -IN<sup>1</sup>).] a. Progesterone, esp. an unpurified preparation of it. b. = PROGESTOGEN, GESTAGEN.

**1930** W. M. ALLEN in *Amer. Jnl. Physiol.* XCII. 174 We have as yet proposed no name for this hormone of the corpus luteum... In so far as we are acquainted with its physiological behavior, its chief action lies in its ability, by alteration of the endometrium, to aid gestation in the castrated rabbit; and for this reason we wish to propose for it the name *progestin*, i.e., a substance which favors gestation. **1935** [see ANDROSTERONE]. **1935** W. M. ALLEN et al. in *Nature* 24 Aug. 303/2 Heretofore, two different names have been used in the literature for this hormone (progestin, luteosterone). For the sake of international uniformity, we agree to use... the name *progesterone* for the pure hormone. **1936** Jnl. *Amer. Med. Assoc.* 23 May 1809/1 The Council adopted the following terms: (1) *progesterone* to indicate the chemically pure substance... (2) *progestin* as a general term to indicate the substance (and other chemically allied substances... in case any such compounds are subsequently discovered) without reference to the state of chemical purity. **1944** J. HOFFMAN *Female Endocrinol.* xli. 711 The term *progestin* is applied to crude extracts of corpus luteum tissue which possess progestational activity. The name progesterone describes the crystalline form of the luteal hormone. **1945** H. BURROWS *Biol. Actions of Sex Hormones* xxi. 389 More than one substance having the same kind of action as progesterone is known, and a generic name is therefore convenient. The author has used the term 'progestin' to denote chemical compounds having a biological action comparable with that of progesterone. [Note] 'Progestogen' has been suggested as an alternative generic name. *Ibid.* 390 The corpora lutea of the ovary are the chief natural source of progestin... The placenta is another source. **1961** J. ROCK in C. A. VILLEE *Control of Ovulation* xii. 228 The two artificial steroids are called 'progestins' because of the fact that their action resembles that of progesterone. **1966** New Scientist 15 Dec. 620/1 The synthetic progestins which are contained in all oral contraceptive tablets were in fact introduced for the wrong reason. **1976** Sci. *Amer.* Feb. 32/2 The steroid hormones... include the male sex hormones (collectively called the androgens), the female sex hormones (the estrogens and the progestins) and the hormones secreted by the cortex.

**progestogen** (prəʊ'dʒɛstədʒən). *Physiol.* Also **progestagen**. [f. as prec. + -O + -GEN; the variant spelling may reflect the influence of GESTAGEN.] = GESTAGEN.

**1941** DORLANO & MILLER *Med. Dict.* (ed. 19) 1171/2 *Progestogen*, a general term for any substance possessing progestational activity. **1945** [see PROGESTIN]. **1962** Lancet 12 May 1012/1 In those premature labours where relaxation of the cervix precludes uterine contractions, such measures as cervical suture and the administration of progestogens can prevent disaster. **1968** PASSMORE & ROBSON *Compan. Med. Stud.* I. xxxvii. 11/1 The principal ovarian hormones... fall into three broad functional categories, oestrogens, progestagens and androgens. *Ibid.* 14/2 A more useful pharmacological definition of a progestagen is a substance which induces secretory changes in an oestrogen-primed endometrium. **1968** Times 28 Nov. 14/4 Most oral contraceptive pills contain both a progestogen and an oestrogen. **1977** Lancet 21 May 1101/2, 7 women... used low-dose progestagen pills.

Hence **progesto'genic a.** = PROGESTATIONAL a.

**1949** H. E. NIEBURGS *Hormones in Clin. Pract.* viii. 176 The progestogenic preparations are mainly employed for the prevention and treatment of habitual and threatened abortion. **1969** Sunday Times 14 Sept. 54/3 The remedy may be a change to a more 'progestogenic brand' [of oral contraceptive]. **1973** Nature 9 Mar. 88/1 Administration of sex hormones or their analogues, whether androgenic, oestrogenic or progestogenic, can produce temporary remission in about one-quarter to one-third of patients with advanced breast cancer. **1977** Lancet 19 Nov. 1085/1 Evidence is accumulating to indicate that it is principally the oestrogenic and not the progestagenic component of combined oral-contraceptive preparations which causes the acceleration of blood-clotting.

**program, programme** ('prəʊgræm), *sb.* Forms: *a.* 7- program, (7- grame). *β.* 9- programme. See also PROGRAMMA. [In 17-18th c. Sc. use, in spelling *program*, ad. Gr.-L. *programma*, which was itself (c 1656-1820) also commonly used unchanged (see PROGRAMMA); about the beginning of the 19th c., reintroduced from F. *programme*, and now more usually so spelt (though not pronounced as F.); the earlier *program* was retained by Scott, Carlyle, Hamilton, and others, and would be preferable, as conforming to the usual English repr. of Gr. -γραμμα, in *anagram, cryptogram, diagram, telegram*, etc. However, *program* and *programme* have become established as the standard N. Amer. and British spellings respectively, with the exception that *program* is usual everywhere in connection with *Computing*. Instead the result was a routine action programmer with Cagney in rather restrained mood.

3. A device that automatically controls the operation of something in accordance with a prescribed programme; in quot. 1945 a part of an early electronic computer analogous to the control unit of later ones.

1945 J. P. ECKERT et al. *Description of ENIAC* (PB 86242) (Moore School of Electr. GLENN in *Into Orbit* 143 During the powered phase of flight... an electronic programmer inside the Atlas would guide it along the prescribed path. 1968 *McGraw-Hill Yearbk. Sci. & Technol.* 59 Until the mid-1950s this automation was in the form of special machines with mechanical programmers (cams, levers, and stops, operating in conjunction with powered lead screws) or tracer mechanisms, which cause the cutting tool to follow a path described by simultaneously moving a 'feeler' over a model of the part to be made. 1968 *Which? IV. 6. a. *Geom.* The drawing of straight lines or 'rays' according to some particular method through every point of a given figure, usually so as to fall upon or intersect a surface and produce upon it a new figure each point of which corresponds to a point of the original figure. Hence, each of such rays, or of such points of the resulting figure, is said to be the *projection* of a point of the original one; or the whole resulting figure is said to be the *projection* of the original.

In *central projection* (often called simply *projection*), the rays are all drawn from one point or 'centre'; in *axial projection*, a number of planes are similarly drawn from one line or 'axis'.

7. a. The drawing according to scale, and on mathematical principles, of a plan, chart, or map of a surface, or a diagram on the flat of a machine or the like; *spec.* the representation of any spherical surface on the flat, e.g. of the whole or any part of the surface of the earth, more fully called *map-projection* (see b).

LOW *Machine Draw.* (1892) 123 Whilst the notion of projection had been imparted, projection lines being drawn, yet the student had utterly failed to realise from the sketches the form of the object he was drawing.

b. *Chartography.* A representation on a plane surface, on any system, geometrical or other, of the whole or any part of the surface of the earth, or of the celestial sphere; any one of the many modes in which this is done.

The earlier modes were actually the result of geometrical projection; but the name has been extended to representations which lie quite outside the etymological sense.

The projections (in this extended sense) that have been used to represent the whole, the half, or parts of the earth's surface, are more than thirty; they have been classified by Major C. F. CLOSE (*Sketch of Map Projections*, 1901, *Text-bk. of Topogr. & Geogr. Surveying*, 1905, xi.) under the following heads: I. *orthomorphic* or *conformal* (conform, or conformable), preserving the *forms* of areas (but not their relative sizes); II. *equal area* (equivalent, or surface-true), in which equal areas of the surface are represented by equal areas on the map, but the forms of these, when large, are distorted; III. *perspective*, representing the surface as seen from some point of view at the centre, on the surface, or at various distances from it; IV. *zenithal* (q.v.) or *azimuthal*; V. *conical* (q.v.); VI. *cylindrical* (q.v.); VII. *conventional*, produced by arbitrary rules for convenience of drawing and the approximate representation of a number of properties; such is the *globular*, commonly used in school maps of the

two hemispheres. Another conventional projection is the *two-point equidistant*, showing accurately the distances from every point to each of two chosen points. Of the varieties in actual use, many belong to two, and some to three of these classes; thus *Mercator's projection* is orthomorphic and cylindrical. For *gnomonic*, *homolographic*, *orthographic*, *polyconic*, *sinusoidal*, *stereographic*, etc. *projections*, see these adjs. Many projections are also named after their inventors, as *Mercator's*, *Bonne's* (modified conical equal-area), *Sanson-Flamsteed's* (sinusoidal equal-area), *Airy's* (balance of errors), *Cassini's* (rectangular co-ordinate) used in the 1-inch Ordnance Maps of England, and 6-inch of Great Britain, the six different projections of *Lambert*; *Albers's*, a conical equal-area projection with two standard parallels; and *Clarke's*, projected from a centre outside the globe onto a diametrically opposite plane. Projections may be *interrupted*, so that the representation is not convex but lobate or partly dissected; and *transverse*, representing a globe rotated through a right or other angle from its conventional orientation. For these see the works cited above, and other special treatises.

HARRIS *Lex. Techn.* I. *Projection of the Sphere in Plano*, is a true Geometrical Delineation of the Circles of the Sphere, or any assigned Parts of them, upon the Plane of some one Circle; as on the Horizon, Meridian, Equator, Tropic, etc. *Ibid.*, *Polar Projection*, is a Representation of the Earth, or of the Heavens, projected on the Plane of one of the Polar Circles.

1706 PHILLIPS (ed. Kersey) s.v., Astrolabes, Quadrants, Sun-dials, Maps, &c., are Projections of the Sphere; which are of three sorts, viz. Gnomonick, Orthographic and Stereographic. 1796 MORSE *Amer. Geog.* I. 56 General maps...are projected upon the plane of some great circle...and from this circle the projection is said to be meridional, equatorial, or horizontal. 1866 PROCTOR *Handbk. Stars* 12 Note, The term projection has come to be applied in mapping to any mode of construction founded on some definite geometrical principle. 1867 DENISON *Astron. without Math.* 13 In Mercator's projection, which is a favourite one for maps, the globe is supposed to be stretched out on the inside of a cylinder which touches it all round the equator, and the cylinder is then cut and opened out flat or 'developed'. 1905 C. F. CLOSE *Topogr. & Geogr. Surveying* xi. 92 The term *projection*, though sanctioned by long usage, is an unfortunate one. The great majority of useful map projections are not obtained in any geometrical way. A map projection is to be treated as the representation on a plane, by any law, of the terrestrial meridians and parallels. 1910 J. I. CRAIG *Theory Map-Projections* v. 45 (*heading*) Transverse conical projection... This projection is of no practical importance. *Ibid.* 53 (*heading*) Zenithal or azimuthal projections. *Ibid.* 55 Lambert's equivalent azimuthal projection. 1910 *Encycl. 1912 A. R. HINKS *Map Projections* i. 6 There is a class of projections sometimes named azimuthal, from the fact that the azimuths, or true bearings, from the centre of the map, of all points, are shown correctly. *Ibid.* 7 The objection to the term *azimuthal* is that it is hard to pronounce, and several writers have followed German in calling always this class of projection *zenithal*. *Ibid.* iii. 26 Albers' conical equal area projection. 1922 C. CLOSE in *Ordnance Survey Prof. Papers* No. 5. 6 (*heading*) Two-point equidistant projection. 1927 J. A. STEERS *Introd. Study Map Projections* vi. 152 (*heading*) 'Interrupted' projections. 1969 G. C. DICKINSON *Maps & Air Photographs* i. 9 Distances...can be shown correctly from one, or two, but no more, chosen points on certain special projections. [Note] The zenithal equidistant and the two-point equidistant projections respectively. *Ibid.* 17 If a map can be broken in some areas that do not matter—the oceans if map is needed mainly for continental areas, or vice versa—and the meridians gathered together at several 'central' meridians the good qualities of the 'central' areas are more widely spread. Fig. 4F shows such an interrupted sinusoidal projection. *Ibid.* 20 Let us try projecting it [sc. the globe] onto a flat sheet of paper touching the globe, at the north pole to begin with, and furthermore see what happens when we move the source of light... The results form a group of projections known collectively as zenithal or azimuthal projections. *Ibid.* 24 If in relation to the parallels, the words 'their true distance apart' in the preceding specification is [sic] replaced by 'spaced so that the area between them is the same as that on the globe' we get Albers' projection. *Ibid.* 25 Suppose we want to make a transverse Mercator's projection based on (say) 90°W. and not the equator.

c. *Cryst.* The projection of a point in each face of a crystal upon an imaginary containing sphere, called the *sphere of projection*.

From the centre of the sphere a line is drawn perpendicular to each face of the crystal, so that to each of these there corresponds a point on the sphere: a plane map of the sphere showing all these points is called a *projection of the crystal*.

1878 GURNEY *Crystallogr.* 32 The diameter of the sphere of projection which is at right angles to the zone plane is called the zone axis. 1895 STORY-MASKELYNE *Crystallogr.* ii. 27 On the sphere of projection, and the principles of its stereographic representation. *Ibid.* 28 Fig. 9 represents in orthographic projection the faces and the poles of the cuboctahedron. *Ibid.* 29 The plane of projection thus bounded by a great circle of the sphere is represented by the plane of the paper on which the circle is drawn, which latter will be termed the *circle of projection* or primitive circle.

10. *Physiol. and Psychol.* The process whereby a stimulus is perceived as being located at a point other than where the sensation or perception occurs (see *quots.*).

1887 G. T. LADD *Elem. Physiol. Psychol.* II. vi. 387 The law of eccentric projection is generally stated thus: Objects are perceived in space as situated in a right line off the ends of the nerve-fibres which they irritate. 1890 W. JAMES *Princ. Psychol.* II. xvii. 41 The other cases of translocation of our sensations are equally easily interpreted without supposing any 'projection' from a centre at which they are originally perceived. *Ibid.* 42, I conclude...that there is no truth in the 'eccentric projection' theory. 1892 VAN LIEW & BEYER tr. *Ziehen's Introd. Physiol. Psychol.* iv. 77 By 'eccentric projection' we understand the fact that a sensation produced by the stimulation of the nerve-trunk instead of the nerve-ends is regularly attributed to irritation of the peripheral ramifications of the nerve. 1902 J. M. BALDWIN *Dict. Philos. & Psychol.* II. 358/2 *Projection*, the spatial objectivation of objects in sense perception... This usage is vague and descriptive, varying from the mere recognition of a spatial datum to the hypothesis of the spatial projection of

It is also complicated with the hypothesis...that nervous projection...to the periphery, sometimes extends out in lines at right angles to the sensitive surface. *Ibid.*, *Projection (nervous, or 'eccentric')*, the property of the nervous system whereby stimulations are referred to the periphery of the body or to the end-organs. **1972** *Encycl. 6. Having the power of projecting or throwing itself forward with energy.

1861 J. BROWN *Horæ Subs.* (1862) 155 His [Samuel Brown's] fiery, projective subtle spirit could not linger in the outer fields of mere observation.

7. *projective verse*, a term invented by C. Olson (1910-70), American poet and poetical theorist, to describe a brand of verse propelled by its inherent energy and composed according to a system of poetic values in which structure, lay-out, and breathing have an importance not accorded them in traditional forms. Hence *projective poet*, etc. Also *ellipt.*

1950 C. OLSON in *Poetry New York* III. 15 *Projective verse* teaches, is, this lesson, that that verse will only do in which a poet manages to register both the acquisitions of his ear and the pressures of his breath. *Ibid.* 20 Which gets us to... the degree to which the projective involves a stance toward reality outside a poem [etc.]. *Ibid.* 22 Eliot... has only gone from his fine ear outward rather than, as I say a projective poet will, down through the workings of his own throat to that place where breath comes from, where breath has its beginnings, where drama has to come from, where, the coincidence is, all art springs. 1962 E. MOTTRAM in *London Mag.* Dec. 7/1 Projective or open verse is a 'stance towards reality' as it brings the verse into being—'some simplicities that a man learns if he works in open, or what has been called *composition by field*, as opposed to inherited line, stanza, over-all form, what is the "old" base of the non-projective'. 1962 *Listener* 27 Dec. 1102/1 Of the 'projective verse' school, Ginsberg and... Olson] calls the Projective Open or Field verse (as opposed to the systematic Closed Forms of the past) is put to work, using line, syllable, breath, as principles he has preached. His one theme is energy—how a man's energy is expended in history and in space.

Very recent work has gone to show that this activity is, in fact, due to the co-operation of two separate hormones of the anterior pituitary—prolactin and glycotropin. 1952 [see LACTOGEN]. 1974 *Sci. Amer.* Sept. 53/3 There is probably a role for a third gonadotrophic hormone of the pituitary, prolactin, in maintaining the steroid-producing function of the corpus luteum for its usual 14-day life span, but there is some doubt whether this is true in humans. 1979 *Jrnl. COVE *Genetics* xi. 163 Mutations in the promoter region lead to a reduction in the rate of messenger synthesis from the whole operon. 4. *Nucl. Physics.* Of a neutron or gamma ray: emitted within a small fraction of a second as the direct result of a fission, as distinct from radiation due to the decay of fission products.

1947 *M. DEUTSCH in C. Goodman Sci. & Engin. of Nucl. Power* I. ii. 84 The average total kinetic energy of the two fission fragments from  $U^{235}$  is about 160 Mev. In addition, the prompt neutrons have kinetic energies totaling about 5 Mev. If the energy of excitation of the fission fragment immediately after its formation is insufficient to cause neutron emission, the nucleus may lose energy by the emission of prompt gamma rays. 1950 [see *delayed neutron*]. 1962 *H. D. BUSH Atomic & Nuclear Physics* vii. 140 'Prompt'  $\gamma$ -rays are also observed due to the excitation of the primary fission products. 1973 *Physical Rev.* VII. C. 1180/1 In Table 1 the energy emitted per fission event in the form of prompt- $\gamma$  radiation and the number of  $\gamma$  rays per fission are given for a number of energy intervals above 0.14 MeV. 1974 *S. E. HUNT Fission, Fusion & Energy Crisis* vi. 53 Reactors are operated so that if they relied on the neutrons emitted instantaneously on fission, on so-called 'prompt' neutrons, alone, the fission chain reaction would be subcritical, i.e. the reaction would die away.

**C. Comb.** of adj., as *prompt-witted*; of adv. as *prompt-paying* (that pays promptly); *prompt-critical* a. *Nucl. Physics*, critical even when the effect of delayed neutrons is neglected and

prompt neutrons alone are considered; hence *prompt-criticality*.

1954 *R. STEPHENSON Introd. Nucl. Engin.* ii. 64 When the  $k$  for a  $U^{235}$  reactor is exactly equal to 1.0073, there is sufficient reactivity to maintain the chain reaction by means of the prompt neutrons alone, and the reactor is said to be prompt critical. 1956 *S. GLASSTONE Princ. Nucl. Reactor Engin.* iv. 242 The rapid increase in the flux when the reactivity exceeds the prompt-critical value would make the reactor difficult to control, and special precautions must be taken that this condition does not arise in reactor operation. 1973 *D. R. INGLIS Nucl. Energy* IV. 120 Plutonium has only about one-third as many delayed neutrons as does uranium (about 0.23 percent of neutrons are delayed), and this provides only a narrow margin for adjustments below a prompt critical condition. 1954 *R. STEPHENSON Introd. Nucl. Engin.* vii. 269 This is the condition for prompt criticality. 1974 *S. E. HUNT Fission, Fusion & Energy Crisis* vi. 53 Prompt criticality would be even more serious in a fast reactor of the Dounreay type than in the more usual thermal neutron reactors, since the neutrons do not need to be slowed down between one generation of fissions and the next. 1899 *Daily News* 6 June 8/6 Good, prompt-paying, established tenants. 1594 *CAREW Huarie's Exam. The genesis of the verb is not clear; the first example (if certain) is earlier than any known instance of the use of the adj. in Eng., and suggests the prior use of a med.L. \**promptare* or F. \**prompter* = It. *prontare*, to make ready, to prompt; of this in Fr. or med.L. no example has been found, but its agent-n. *promptator* occurs in *Prompt. **pronoun** ('prəʊnaʊn). [f. PRO-<sup>1</sup> 4 + NOUN, after F. *pronom*, L. *prōnōmen*.] *a.* One of the Parts of Speech: a word used instead of a noun substantive, to designate an object without naming it, when that which is referred to is known from context or usage, has been already mentioned or indicated, or, being unknown, is the subject or object of inquiry.

PERSONAL pronouns of the first and second persons (*I, you* (thou), *pl. we, you*, with their cases) stand instead of the names of the speaker and the person spoken to. Those of the third person (*he, she, it, they*, with their cases, originally demonstratives) avoid the repetition of a name already mentioned or indicated. INTERROGATIVE pronouns (*who? what? which?*) ask the name, etc. of a person or thing unknown. RELATIVE pronouns (*who, which, that*) combine the function of a personal or demonstrative pronoun with that of a conjunction, and subordinate one sentence or clause to another, as 'I met a friend *who* told me' for 'I met a friend, and he told me'. POSSESSIVE pronouns are adjectives arising out of the original genitive case of personal pronouns. In Eng., as in many other modern langs., they have developed two forms, one absolute or strictly pronominal (*mine, thine, ours, yours*, etc.), the other adjectival (*my, thy, our, your*, etc.).

In addition to these, several definitive adjectives are very commonly used absolutely or pronominally, and classed as *adjective pronouns* or *pronominal adjectives*. These include the DEMONSTRATIVES, *this* (pl. *these*), *that* (pl. *those*), *yon* (or *yonder*); DISTRIBUTIVES, *each*, *every*, *either*, *neither* (of which *every* as a pronoun is now archaic); INDEFINITE numerals, etc., *any*, *some*, *one*, *other* (*another*), *none*, to which some add *all*, *both*, *many*, *few*, *enough*, *such*, when used absolutely. *One* is often used as an indefinite personal pronoun (ONE 20); and the words *self* and *own*, used to strengthen the personal and possessive pronouns, are sometimes classed with them.

**1530** PALSGR. 74 Pronownes be suche as, standynge in the stede of substantives, may governe verbes to be of lyke nombre and parson with them. **1581** W. FULKE in *Confer.* III. (1786) 73 The Genuine Pronoun always stands by itself, affirming the Power of a Noun and supplying its place. **1827** HARE *Guesses* (1847) 187 They are strange and mighty words, these two little pronouns, *I* and *Thou*. **1904** ONIONS *Adv. Eng. Syntax* §62 Adjective Clauses are introduced by Relative Pronouns . . . , Relative Adjectives . . . , or Relative Adverbs . . . , referring to a noun or noun-equivalent called the Antecedent, expressed or implied in the Principal Clause. *Ibid.* §223 *We* is often employed colloquially, like 'you', as an Indefinite Pronoun = 'one'.

**b. Comb., as *pronoun-form*, -object.**  
**1933** L. BLOOMFIELD *Language* xvi. 269 Among the substantives are some pronoun-forms which, by over-differentiation, do not serve as actors: *me*, *us*, *him*, *her*, *them*, *whom*. **1973** *Word* 1970 XXVI. 81 In the first-person plural, the subject pronoun-form functions as an indirect object: *They give me the money*. **1957** R. VISSER *Hist. Syntax* I. iv. 425 The period of transition from Old to Middle English is characterised by a considerable number of remarkable changes in the form of most of the reflexive pronoun-objects.

The convex backs of the shells were ground down, and the hollows thus made filled up flat with red sealing-wax. Four of the shells were shaken in the hand or in a box, and thrown after the manner of dice on a table, the stake being won or lost according to the number of white or red sides coming up. 1955 *Proc. Brit. Weed Control Conf.* 1954 I. 183 The almost complete failure of the more insoluble propham, CIPC and CMU to give control of wild oats may also be connected with the inability of the material to reach the wild oats at the critical time at Site I, where TCA was successful.

prophase ('prəʊfeɪz). *Cytology*. [ad. G. *prophase* (E. Strasburger 1884, in *Arch. f. mikrosk. Anat.* XXIII. 250); see PRO-<sup>2</sup> and PHASE.] The first stage in a mitotic or meiotic nuclear division, preceding prometaphase, during which the chromosomes become visible

and shorten and the nuclear envelope disappears. Also *attrib.* or as *adj.*

Prophase of the first meiotic division is divided into LEPTOTENE, ZYGOTENE, PACHYTENE, DIPLOTENE, and DIAKINESIS, in that order.

1884 *Jrnl. R. Microsc. Soc.* IV. ii. 714 In both [plants and animals] we find that in the 'prophases' of nuclear division cytoplasm is collected at the future poles of the cell-nucleus.

1887 tr. *Strasburger's Bot.* xxxii. 363 With this the preparatory phases of cell-division, the *prophases*, are completed.—Now begin the phases of separation and rearrangement of the daughter-segments, the *metaphases* of division.

1898 *Ibid.* i. i. 62 The changes occurring in a mother nucleus preparatory to division are termed the prophases of the karyokinesis.

1903 *Bot. Gaz.* XXXV. 250 The first division in Salamandra is characterized by a long period of growth of the cell and nucleus during the prophase . . ; the first longitudinal fission taking place during the prophase and the second during the metaphase or anaphase.

1911 Q. *Jrnl. Microsc. Sci.* LVII. 27 The most important difference between the pre-meiotic and meiotic prophases is the entire absence in the former of any appearance of fusion of chromatin threads, such as takes place in zygonema.

1929 *Bot. Gaz.* LXXXVIII. 376 In the latter case the visible division of the chromonema would always be prophasic.

1951 H. C. BOLD in G. M. SMITH *Man. Phycol.* xi. 225 The Florideae furnish a conspicuous exception in that the spermatium nucleus is usually described as in a prophasic condition at the moment of union.

[ME. *prophete*, -*fete*, a. F. *prophète* (11th c. in Littré), ad. L. *prophēta* (*prophētēs*), ad. Gr. *προφήτης* an interpreter, proclaimer, spokesman, *esp.* of the will of the deity; an inspired person, a prophet; f. *πρό* forth, before, for + -*φήτης* speaker, f. *φάναι* to speak.]

I. 1. a. One who speaks for God or for any deity, as the inspired revealer or interpreter of his will; one who is held or (more loosely) who claims to have this function; an inspired or quasi-inspired teacher.

In popular use, generally connoting the special function of revealing or predicting the future. (Hence sense 5.)

The Greek *προφήτης* was originally the spokesman or interpreter of a divinity, e.g. of Zeus, Dionysus, Apollo, or the deliverer or interpreter of an oracle, corresponding generally to the Latin *vates*. By the LXX it was adopted to render the Heb. *nabî*, in the O.Test. applied indiscriminately to the prophets of Jehovah, of Baal and other heathen deities, and even to 'false prophets', reputed or pretended soothsayers. In the N.T. it is used in the same senses as in the LXX, but mainly applied to the Hebrew prophets of Jehovah, also to John the Baptist, as well as to certain persons in the Early Church, who were recognized as possessing more or less of the character of the old Hebrew prophets, or as inspired to utter special revelations and

predictions; also applied historically to Balaam, and by St. Paul, in the old Greek sense, to Epimenides the Cretan, while 'false prophets' are frequently mentioned. The Greek word was adopted in L. as *prophēta* chiefly in post-classical times, and largely under Christian influences; and this is the regular rendering in the *Italia*, Vulgate, and Christian Fathers. From Ecclesiastical Latin it has passed down into the Romanic and Teutonic languages. In English the earliest uses are derived from the Scriptures; but the word is currently used in all the ancient senses and in modern ones derived from them.

Occasionally he can not only use 'yes' and 'no' correctly, but can even repeat them. Here, then, we have propositional speech and voluntary utterance. 1932 LEWIS & LANGFORD *Symbolic Logic* ix. 267 In elementary functions only propositional variables occur. 1935 WEISENBURG & MCBRIDE *Aphasia* x. 277 When propositional speech is negligible, spoken expression may nevertheless be frequent. 1943 W. b. In special collocations, as *propositional attitude*, an attitude which can vary expressed towards a proposition that does not vary; *propositional calculus*, a calculus which formalizes the basic truth-functional operations possible in logical propositions and gives notation, indicating conjunction, disjunction, negation, etc., to their sentential connectives; *propositional connective*, a connective which is used as a logical operator in propositions; *propositional function* (see quot. 1910 and cf. PREDICATE sb. 2 a).

[1904 B. RUSSELL in *Mind* XIII. 509 Belief is a certain attitude towards propositions, which is called knowledge when they are true, error when they are false.] 1939 *Mind* XLVIII. 479 When we disbelieve, then doubt, and finally believe a proposition, it must be the same proposition toward which we have these different attitudes; that is, propositions must be invariant under change of propositional attitude. 1940 B. RUSSELL *Inquiry into Meaning & Truth* xi. 204 A negative basic proposition thus requires a propositional attitude, in which the proposition concerned is the one which, on the basis of perception, is denied. 1966 W. V. QUINE *Ways of Paradox* xv. 189 Striving and wishing, like believing, are propositional attitudes and referentially opaque. 1969 J. Metamath.* iv. 73 In particular,  $\rightarrow$ ,  $\&$ ,  $\vee$ ,  $\neg$  are propositional connectives, and operators of the forms  $\forall x$  and  $\exists x$  are quantifiers... these six are logical operators. 1974 *Jrnl. Philos. Logic* III. 202 The propositional connectives concern statements. 1903 B. RUSSELL *Princ. Math.* ii. 13 Where there are one or more real variables, and for all values of the variables the expression involved is a proposition, I shall call the expression a *propositional function*. 1910 WHITEHEAD & RUSSELL *Principia Math.* i. i. 15 Let  $\phi x$  be a statement containing a variable  $x$  such that it becomes a proposition when  $x$  is given any fixed determined meaning. Then  $\phi x$  is called a 'propositional function'; it is not a proposition, since owing to the ambiguity of  $x$  it really makes no assertion at all. 1943, 1969 [see PREDICATE sb. 2 a]. 1974 *Jrnl. Philos. Logic* III. 196 A predicate, or propositional function, is a statement-valued function, i.e. a function that maps objects of some kind into statements (propositions).

Hence *propo'sitionalist*, someone who is concerned with the logic of propositions; *propo'sitionally adv.*; *propo'sitionality*, the quality of laying down propositions.

1864 MASSON in *Macm. Mag.* July 216 A quality... which coining a monstrous word for my purpose, I will venture to call propositionalness. It is in the main identical with that passion for intellectual generalization which we often speak of as particularly visible in the French mind. 1879 *Brain* II. 215 Then propositionally 'yes' and 'no' give assent or dissent to anything whatever. 1890 *Lancet* 12 Apr. 787/1 note, If he only uttered them [propositions] at random, or if they were only signs of emotion, they would not serve propositionally. 1952 *Mind* LXI. 61 The spurious character of our propositionalist's argument becomes evident. 1970 W. V. QUINE *Philos. of Logic* i. 3 The propositionalist bypasses differences between languages.

**propo'sitionize**, *v.* [f. as prec. + -IZE.] *intr.* To make or utter propositions.

1868 BUSHNELL *Serm. Living Subj.* 74 By much theologizing, propositionizing, schematizing and abstractionizing, we show it builded together for the very ends and uses we have reasoned for it. 1878 *Brain* I. 312 Loss of speech is therefore the loss of power to propositionise. It is not only loss of power to propositionise

aloud (to talk), but to propositionise either internally or externally. **1890** *Lancet* 12 Apr. 787/1 *note*, To speak is not merely to utter words, but to propositionize. **1920** *Brain* XLIII. 119, I believe that under the uncouth word 'propositionizing' is included what I understand by 'symbolic thinking'. **1921** *Brit. Jnl. Psychol.* XI. 185 There are some aspects of the loss of function in aphasia which are not strictly comprised under the heading of 'propositionising'. **1955** R. JAKOBSON in H. Werner *On Expressive Lang.* 77 The patient fails to operate with contiguity, while operations based on similarity remain intact. Thus he [sc. an aphasic] loses the ability to propositionize. **1956** — in Jakobson & Halle *Fund. Lang.* II. iv. 71 The impairment of the ability to propositionize, or generally speaking, to combine simpler linguistic entities into more complex units, is actually confined to one type of aphasia.

**proprioceptor** ('prəʊpiəʊseptə(r)). *Physiol.* [f. *L. propri-*us own, PROPER + -o + RE)CEPTOR.] Any sensory structure which receives stimuli arising within the tissues (other, usually, than

the viscera); esp. one concerned with the sense of position and movement of a part of the body.

Cf. EXTEROCEPTOR, INTEROCEPTOR.

1906 [see EXTEROCEPTOR]. 1927 HALDANE & HUXLEY *Animal Biol.* i. 24 The receptor organs are those parts of the living organism which are specially sensitive to the changes going on around them. Some of them are affected by the changes going on inside the body in muscles and joints and in the organ of balance (proprioceptors), others by the changes taking place in the world outside (exteroceptors). 1938 *Jrnl. Exper. Biol.* XV. 112 The campaniform sensilla will act as proprioceptors for the palps. 1940 FRAENKEL & GUNN *Orientation of Animals* iv. 37 In the knee-jerk the stimulus is translated by the proprioceptors in the leg, goes to the central nervous system and is there, so to say, reflected back to the leg, where it is translated into effect or action. 1964 J. Z. YOUNG *Model of Brain* xv. 242 Proprioceptors are probably present [in octopus arms] but it is not clear how they could appropriately signal the position of the arms. 1974 D. & M. WEBSTER *Compar. Vertebr. Morphol.* x. 200 The most studied proprioceptor is the muscle spindle.

So **proprioception**, the reception of information by proprioceptors and its interpretation; **proprioceptive** *a.*; **proprioceptively** *adv.* (*rare*).

1906 C. S. SHERRINGTON *Integrative Action of Nervous Syst.* iv. 130 Since in this field the stimuli to the receptors are given by the organism itself, their field may be called the proprioceptive field. *Ibid.* ix. 349 The supposition that the organ [sc. the cerebellum] is the chief co-ordinative centre or rather group of centres of the reflex system of proprioception. 1927 HALDANE & HUXLEY *Animal Biol.* v. 123 Proprioceptive organs may affect the consciousness. Thus we can tell how much our knee is bent even with our eyes shut, owing to the joint-organs, or how great a weight we are holding, owing to the muscle-organs. 1958 S. H. BARTLEY *Princ. Perception* xiv. 315 Kinesthesia and the vestibular sense have been called proprioception, since they have something to do with end results originated by the activity of the body itself. 1961 L. F. BROSNAHAN *Sounds of Language* i. 15 Articulations which are similar . . . must require greater precision of execution . . . in order to keep the resulting speech sounds distinct, both proprioceptively and auditorily. 1968 *New Scientist* 7 Nov. 315/1 Proprioceptive information . . . describes such things as the tension in the muscles and the location and movement of the parts of the limb. 1977 *Lancet* 5 Nov. 977/1 He had . . . absent vibration sense, and very reduced proprioception in the lower limbs.

1904 C. S. SHERRINGTON in *Nature* 8 Sept. 461 (*caption*) Proprio-spinal neurones. *Ibid.* 463/1 We . . . arrive at the following reflex chain for the scratch reflex: (i.) The receptive neurone. . . (ii.) The long descending proprio-spinal neurone . . . from the shoulder segment to the grey matter of leg segments. 1920 H. HEAD *Studies in Neurol.* II. 111. 504 If these proprio-spinal paths have been destroyed, or their functions abolished, the mass-reflex may appear in its complete form even though some sensation and voluntary movement are still present below the level of the lesion. 1959 *Brain* LXXXII. 614 We have retained the name 'fasciculi proprii' for the fibres under review, as there is no suitable English equivalent. Sherrington's name 'proprio-spinal fibres' . . . might be suggested. But it seems to us that a name which includes the term 'spinal' is undesirable. 1974 *Exper. Brain Res.* XXI. 188 Our results show that long propriospinal fibres stimulated a few segments caudal to the cervical enlargement.

Gram.* (ed. 5) I. 345 Prosody consists of two parts: the former teaches the true pronunciation of words, comprising accent, quantity, emphasis, pause, and tone; and the latter, the laws of versification. 1871 R. 3. *Linguistics.* In the theories of J. R. Firth and his followers: a phonological feature having as its domain more than one segment.

Prosodies include the class of 'suprasegmental' features such as intonation, stress, and juncture, but also some features which are regarded as 'segmental' in phonemic theory, e.g. palatalization, lip-rounding, nasalization.

1949 J. R. FIRTH in *Trans. Philol. Soc.* 1948 129 We may abstract those features which mark word or syllable initials and word or syllable finals or word junctions from the word, piece, or sentence, and regard them syntagmatically as prosodies, distinct from the phonematic constituents which are referred to as units of the consonant and vowel systems. 1951 *Bull. School of Oriental & Afr. Stud.* XIII. 945 The prosodies abstracted by these treatments have included not only aspiration but also, e.g. yotization, labiovelarization, rhotacization, affrication, friction, and voice. 1957 *Proc. Univ. of Durham Philos. Soc.* I. Ser. B (Arts) 1. 3 *Prosodic analysis*... makes use of two types of element, Prosodies and Phonematic Units... Phonematic units refer to those features or aspects of the phonic material which are best regarded as referable to minimal segments, having serial order in relation to each other in structures... Structures are not, however, completely stated in these terms; a great part... of the phonic material is referable to prosodies, which are, by definition, of more than one segment in scope or domain of relevance, and may in fact belong to structures of any length. 1964 R. H. ROBINS *Gen. Linguistics* iv. 161 The relevant phonetic data may be assigned to such different categories of prosody as sentence prosodies, sentence part prosodies, word prosodies, syllable prosodies, and syllable part prosodies. 1966 J. T. BENDOR-SAMUEL in C. E. Bazell *In Memory of J. R. Firth* 31 There are three word prosodies: nasalization, yodization, and the absence of nasalization and yodization. 1968 [see PHONEMATIC a. b]. 1971 *Archivum Linguisticum* II. 68 In phonology, too... the Firthian view was to reject the phoneme in favour of a syntagmatic concept, which was termed—perhaps not too happily—the 'prosody'.

2. [tr. mod.L. *prosopographia*.] A study or description of an individual's life and career; hence, historical inquiry, esp. in Roman hist., concerned with the study of (political) careers and family connections; a presentation of evidence relating to this study.

The German word *prosopographie* is attested at an earlier date than the English form, but with less specific methodological implications.

1929 R. M. DAWKINS *Sanctuary of Artemis Orthia at Sparta* x. 292 Account has been taken of the lettering, the formulae, and the prosopography. 1934 R. SYME in *Jrnl. Roman Stud.* XXIV. 80 Of recent years prosopography, as it may conveniently be called, has been the object of a heightened interest coincident with the detailed study of the development and working of the imperial administration. 1954 A. MOMIGLIANO in *Camb. Jrnl.* Mar. 345 He [sc. M. I. Rostovtzeff] was lucky in being born early enough to escape the present ridiculous adoration of so-called prosopography (which, as we all know, claims to have irrefutably established the previously unknown phenomenon of family ties). 1959 A. G. WOODHEAD *Study Gk. A prosopographer investigates 'the common background characteristics of a group of actors in history by means of a collective study of their lives'. 1971 A. H. M. JONES et al. (*title*) The prosopography of the later Roman Empire. 1973 *Proc. Brit. Acad.* LVII. 429 The third and very important and permanent by-product of [A. H. Interdisciplinary Hist.* III. 543 (*heading*) The Prosopography of the Tudor University. *Ibid.* 544 On the theme of prosopography (or collective biography), the argument has tended to revolve around two distinct but related issues: the social status and numbers of those attending the universities. 1975 *Anglo-Saxon Eng.* IV. 168 Dolley...infers from Prosopography that the missing first element of the moneyer's name on this cut-halfpenny is not *Ægel-* but some form of *Leof-*. 1976 *Times Lit. Stevens] had a preoccupation...with 'gutting the source'...and so likewise, whether their field be history (social, political, military or economic), historiography or prosopography, do the contributors whose work is assembled here to do him honour.

Hence **proso'pographer**, one who undertakes or is concerned with prosopography; **prosop'graphic(al)** *a.*, denoting the method of historical inquiry which makes use of prosopography; **prosopo'graphically** *adv.*, in a prosopographical manner; as regards prosopography. 1930 *Antiquity* IV. 526 During the period from the 4th. century to the Roman rehandling of the site a series of dedicatory inscriptions, mostly of the latter 1st. and 2nd. century A.D., accumulated. This is a familiar tale in this prosopographical age. 1970 Prosopographer [see above]. 1971 *Dædalus* C. 55 The attitude toward the workings of politics taken by the early prosopographers appears to owe little to the writings of political theorists. *Ibid.* 66 The monks have also been studied prosopographically. 1971 A. 1. *Theol.* A conception or external presentation of one of the three Persons of the Trinity; = HYPOSTASIS 5.

1900 J. S. BANKS *Devel. Doctrine in Early Church* i. vii. 101 John of Damascus...says, Father, Son, and Spirit are one God or one substance (*ousia*, nature, essence), but not one person (*hypostasis*, *prosopon*). 1932 A. But it is one and the same God, one and the same divine person, who acts in all these ways. The difference is not in being or person, but in function or activity. Each of these functions or activities—Father, Son and Spirit—was called by Sabellius *prosopon* (πρόσωπον), the Greek word of which the Latin translation is *persona*. The word means not person but face, and was used for the mask worn by actors in the theatre or for the part they played. 1936 G. L. Fowler's classification of the plural as an absurd use (*Dict. Modern English Usage* p. 471; maintained in Sir E. 1934 K. BRYAN in *Geogr. Rev.* XXIV. 656 The word 'nivation' is the name of a process of excavation around snowbanks described by Matthes. **protanomalous** (prəʊtə'nɒmələ). *Ophthalm.* [*ad. G. protanomale* (W. A. Nagel 1907, in *Zeitschr. f. Psychol. und Physiol. d. Sinnesorgane: Abt. II* XLII. 67), *f. Gr. πρωτ-* PROT- + *G. anomal* anomalous.] A person with protanomaly.

1915 J. H. PARSONS *Introd. Study Colour Vision* II. iii. 183 Of the partial protanopes (protanomalous, Nagel) Donders and König do not record any case, v. Kries one only, whereas Nagel, Guttman, and Abney and Watson record a considerable number. 1973 *Jrnl. Optical Soc. Amer.* LXIII. 236/1 In Fig. 2, the red primary is assigned a value of 637 nm for normals and deuteranomalous, and 629 nm for protanomalous.

Hence *prota'nomalous a.*, having protanomalous; also *absol.*

1911 *Amer. Jrnl. Psychol.* XXII. 370 It is now customary... to distinguish two groups of anomalous trichromates, upon the analogy of the two groups of dichromates,—the red-anomalous or protanomalous trichromates, whose sensitivity to red is below normal, and the green-anomalous or deuteranomalous trichromates, whose sensitivity to green is below normal. 1938 [see PROTANOMALY]. 1965 *Science* 9 July 186/1 The protanomalous subject can match all colors of the spectrum with mixtures of three hues but requires more red in each mixture than the normal subject. 1975 *Sci. Amer.* Mar. 172/3 Some have considered that the protanomalous need more red in their mixture because, although they have normal cone pigments, the red signals are too weak.

**protanomaly** (prəʊtə'nɒməli). *Ophthalm.* [*f. prec. + -Y<sup>3</sup>*.] A form of anomalous trichromatism marked by a reduced sensitivity to red and subnormal discrimination between red, yellow, and green hues.

1938 *Proc. Physical Soc. L.* 674 As the results for only one protanomalous observer are given, it is impossible to talk of any stages of protanomaly except by comparison with the results for the deuteranomalous observers. 1946 W. D. WRIGHT *Res. Normal & Defective Colour Vision* xxiv. 297 Anomalous trichromatism is subdivided into three corresponding groups—protanomaly, deuteranomaly and tritanomaly—from the fact that each group has characteristics intermediate between those of the trichromat and the corresponding dichromat. 1973 *Vision Res.* XIII. 2033 The condition of anomalous trichromacy thus includes the categories of simple and extreme protanomaly and simple and extreme deuteranomaly.

**protanope** ('prəʊtənəʊp). *Ophthalm.* [*ad. G. protanop* (J. von Kries 1897, in *Zeitschr. f. Psychol. und Physiol. d. Sinnesorgane* XIII. 248), *f. PROT-* + *Gr. priv. dv-* + ὤψ, ὠπ- eye, face.] A person with protanopia.

1908 *Psychol. Bull.* V. 298 When red and blue are mixed to match blue-green the protanope requires a relative excess of red in his purple mixture; and in similar determinations with red and yellow the protanope may demand five times as much red as the deuteranope. 1924 tr. J. von Kries in *Helmholtz's Treat. Physiol. Optics* II. 402 In order to have brief descriptive terms for the relation that has been found to exist here, without expressing any theoretical bias, the writer suggests the names *protanopes* and *deuteranopes* to describe the two kinds of dichromats, that is, persons who lack the first component or the second component, respectively, of the normal visual organ. 1953 *Jrnl. Physiol.* CXXI. 565 The protanopes confuse red with green and are characterized by a very low sensitivity to light of long wavelengths. 1959 [see DICHRMAT, DICHRMATE *sb.*]. 1971 *Vision Res.* XI. 1034 Protanopes are deficient in some red-sensitive cone pigment that is present in normal eyes.

**protanopia** (prəʊtə'nəʊpiə). *Ophthalm.* [*mod. L., f. prec. + -IA<sup>1</sup>*.] A form of dichromatic colour-blindness marked by an insensitivity to red and an inability to distinguish between red, yellow, and green hues.

1902 J. M. BALDWIN *Dict. Philos. & Psychol.* II. 371/1 In... the so-called red-blindness, the red end of the spectrum is shortened, and the maximum brightness is further towards the green (protanopia). 1923 L. C. MARTIN *Colour* x. 146 In complete protanopia or deuteranopia we have the spectrum consisting (broadly speaking) of two parts of differing hue separated by a grey or white. 1950 *Jrnl. Optical Soc. Amer.* XL. 46/2 If the scores at either + 5 or - 5 are incorrect the subject has complete red-green color deficiency, i.e. either protanopia or deuteranopia. 1974 *Ophthalmic Res.* VI. 281 Colour discrimination as tested with the Ishihara plates and Nagel anomaloscope... was typical for protanopia.

Hence *prota'stopia a.*

1908 *Psychol. Bull.* V. 298 Certain individuals... make their mixtures much redder, and other individuals much greener than the average. Here again we must distinguish between a protanopic and a deuteranopic sub-type. Investigations since Rayleigh's pioneer publication have shown that the former sub-type is much more numerous than the latter. 1973 *Vision Res.* XIII. 1762 The reduction in gradient of the deuteranopic isochromatic line through the blue-green and purple region suggests an explanation of why some deuteranopes cannot distinguish either the protanopic or the deuteranopic diagnostic figures in the Ishihara test.

**protarch** ('prəʊtɑ:k). *rare.* [*ad. Gr. πρωτάρχης, f. πρώτος first + ἀρχός ruler.*] A chief ruler.

1656 BRAMHALL *Replie.* v. 190 In the age of the Apostles... the highest Order in the Church, under the Apostles, were national Protarchs or Patriarchs.

**protargol** (prəu'tɑ:gɒl). *Med.* [a. G. *protargol* (A. Neisser 1897, in *Dermatologisches Centralblatt* I. 5), f. *prot-ein* PROTEIN + L. *argentum* silver; cf. -OL.] A substance made from protein and various compounds of silver, used as a mild antiseptic and a stain.

**1898** *Boston Med. & Surg. Jnl.* 25 Aug. 194/2 In the few cases of purulent ophthalmia that have been treated with protargol the length of the course of the disease has apparently only been slightly shortened, but the severity of the attack has been decidedly lessened. **1907** J. H. PARSONS *Dis. Eye* xxix. 580 In more severe cases... protargol, 15 to 20 per cent., should be rubbed into the margins of the lids with a stumpy camel's hair brush. **1938** *Stain Technol.* XIII. 154 Protargol exhibits an isoelectric point roughly about pH 4, at which acidity it is precipitated, hence it might be expected to behave somewhat like a dye by having its selectivity altered by variation of pH of the staining mixture. **1976** *Acta Zool.* LVII. 117 The figures demonstrate the close connection between the surface cilia as shown by SEM [sc. scanning electron microscopy] and the subsurface kinetosomes revealed by the protargol impregnations.

**protarsal** (prəu'tɑ:səl), *a. Ent.* [f. PROTARS(US) + -AL.] Of or pertaining to the protarsus.

**1902** R. I. Pocock in *Proc. Zool. Soc.* II. 391, 2nd leg with superior basal and anterior apical femoral spine, three inferior apical protarsal spines... and one inferior medium tarsal spine.
