**1. a.** A formal authoritative statement or summary of the religious belief of the Christian church, or of a particular church or sect; a creed or confession of faith, *spec.* the Apostles' Creed.

This use is traceable to Cyprian, Bishop of Carthage (c 250), who applies L. *symbolum* to the baptismal creed, this creed being the 'mark' or 'sign' of a Christian as distinguished from a heathen. The notion, long current, that the creed was so called because it was 'put together' by the Apostles is without foundation in fact.

Lett.* XIX. 1264/2 As far as we know, two of these symmetries are entirely unbroken: the charge *Q*..and the electron number *N*. 1968 M. S. LIVINGSTON *Particle Physics* xii. 201 One consequence of the translational symmetry of space is the invariance of physical laws under translation from one location to another. 1974 FRAUENFELDER & HENLEY *Subatomic Physics* vi. 154 Some of the symmetries are perfect even under closest scrutiny, and no breakdown in the corresponding conservation law has ever been found. Rotational symmetry and conservation of angular momentum are one example.

(Nearly coinciding with 3 b or the stricter use in 2, except that corresponding parts are not necessarily equal, nor do all the parts necessarily correspond.) (b) *Path.* Affection of such corresponding parts simultaneously by the same disease.

1849-52 *Todd's Cycl. Anat.* IV. 845 Symmetry is a word used to express..the fact, that one half of an animal is usually an exact reversed copy of the other.. **sympiasm** (ˈsɪmplæz(ə)m). *Biol.* [f. SYM- + PLASM.] a. *Bacteriol.* A group of bacterial cells that have coalesced into one amorphous mass. ? *Obs.*

**1916** LÖHNIS & SMITH in *Jrnl. Agric. Res.* VI. 680 Type D is in most cases the dissolution product either of the large forms [of *Bacillus azotobacter*]. . . or of the small cells. . . As it is made up by a thorough mixing or melting of a frequently large number of cells, spores, or gonidia, the term *sympiasm* or *symplastic stage* seems to be a correct and convenient name. **1923** *Anat. Rec.* XXVI. 69 The bacteria coalesce and resolve into a sort of plasmodium. This plasmodium is the sympiasm. Later, in the completion of the life-cycle, bacteria are again formed by the breaking up of the sympiasm. **1934** A. T. HENRICI *Biol. Bacteria* ix. 153 Such sympiasms are found in old cultures and they probably represent masses of gum secreted by the bacteria, or more likely, masses of debris formed from dead and dissolved bacterial cells.

b. *Bot.* The cytoplasm of a symplast (sense b); an interconnected mass of cytoplasm.

**1948** *Recueil d. Travaux botaniques Néerlandais* XLI. 5 Up until now, only a few publications have dealt with estimations as to what extent the sympiasm is permeable for solutes. **1954** *Nature* 31 July 223/2 The transport in the cytoplasm from cell to cell..without loss to the outer solution indicates that plasma connexions between the cells must exist. The cells behave like a 'sympiasm'. **1973** *Planta* CXII. 293 Stelar tissues only accumulate ions when these are supplied through the root sympiasm.

Hence **sym'plasmic a.**, of or pertaining to (a) sympiasm.

**1923** *Anot. Rec.* XXVI. 70 The sympiasmic stage in the life-cycles of bacteria appear[s] to be universal. **1971** *Protoplasmo* LXXXII. 315 The concept of sympiasmic transport between plant cells must take account of the possible role of plasmodesmata.

**symplasma** (sɪmˈplæzmə). *Med.* Pl. -plasmata. [mod.L., coined in Ger. (R. Bonnet 1903, in *Monatsschr. f. Geburtshülfe u. Gynaekol.* XVIII. 8): see SYM- and PLASMA.] A mass of cell nuclei and cytoplasm regarded as formed by the breaking down of the cell walls of the outer layer of the placenta.

**1908** *Q. Jrnl. Microsc. Sci.* LIII. 134 The maternal tissue . . . is universally recognised to undergo catalytic changes, and to pass into a symplasma, towards the composition of which superficial epithelium, proliferated epithelium of crypts and glands, subepithelial connective tissue, leucocytes, and blood have all largely contributed. **1910** F. H. A. MARSHALL *Physiol. of Reproduction* x. 414 After the destruction of the epithelium, the villi penetrate into the deeper tissues of the mucosa by gradually absorbing the symplasmata, and branch to form secondary and tertiary villi. **1923** *Q. Jrnl. Microsc. Sci.* LXVII. 146 A degenerating syncytium is called a symplasma . . . , a term which can be correctly applied only to maternal structures of a degenerate nature contained in the plasmodium. **1973** BOVING & LARSEN in Hafez & Evans *Human Reproduction* vii. 149/1 By this stage, the rabbit uterine epithelium has become converted into a 'symplasma' or multinucleated syncytium through the disappearance of the cell membranes between the epithelial cells.

**symplassmatic** (sɪmplæzˈmætɪk), a. [f. prec. after *plasma, plasmatic*.] a. *Med.* Of or pertaining to a symplasma. b. *Bot.* = SYMPLASMIC a.

**1923** *Q. Jrnl. Microsc. Sci.* LXVII. 156 In the symplasmatic zone of the diploplasma are to be found remains of maternal nuclei, maternal blood corpuscles and various granules. **1974** *Planta* CXIX. 47 Transients are

observed in mutated cells when the illuminated green leaf sample also comprises normally green cells and there is a symplasmatic connection between the 2 types of cells.

**symplast** (ˈsɪmplaːst, -æ-). *Bot.* [f. SYM- + -PLAST.] †a. [ad. G. *symplast* (J. von Hanstein 1880, in *Bot. Abh.* IV. 11. 9).] A multinucleate cell created either by the fusion of cells into one cytoplasmic mass, or by the division of the nucleus of a single energid. *Obs.*

**1894** *Jrnl. R. Microsc. Soc.* 376 Klemm objects to the term 'unicellular' as applied to *Caulerpa prolifera* and similar organisms. They should be regarded rather as 'symplasts', composed of a number of energids. **1900** *Ibid.* 475 When the polyplasts are so completely fused together that their cytoplasms form a single mass in which a number of nuclei are imbedded, Hanstein's term 'symplasts' may be applied. **1912** L. A. BORRADELE *Mon. Elem. Zool.* vi. 116 Groups of similar, unseparated energids are known as syncytia. They may be plasmodia, formed by the union of free energids, or symplasts, formed by the division of the nucleus of a single energid.

b. [ad. G. *symplast* (E. Münch *Die Stoffbewegungen in der Pflanze* (1930) 73).] A continuous network of interconnected plant cell protoplasts.

**1938** *Amer. Jrnl. Bot.* XXV. 529/2 Studies on the occurrence of plasmodesmata in living tissues show that where pits occur the protoplasts are commonly connected by these strands. Consequently the 'symplast' . . . of the root must constitute an interconnected protoplasmic unit. **1976** B. E. S. GUNNING in Gunning & Robards *Intercellular Communication in Plants; Studies on Plasmodesmata* 1. 2 Following the evolution of plasmodesmata, the plant body is . . . composed of two major compartments, for which the terms apoplast and symplast are convenient (Münch, 1930). . . The term symplast refers to the interconnected protoplasts, all bounded by a continuous plasmalemma.

Hence **sym'plastic a.**, of or pertaining to a symplast or symplasm; **symp'lastic growth**, the expansion of a common wall between adjacent plant cells during cell enlargement.

**1916** [see SYMPLASM a]. **1930** J. H. PRIESTLEY in *New Phytologist* XXIX. 132 It is proposed to call this alternative method of growth now described symplastic growth. **1981** J. R. 2. *Petrol.* Of a rock or its texture: exhibiting an intimate intergrowth of two different minerals, esp. one where one mineral has a vermicular habit within the other as a result of secondary action. [ad. G. *sympлектisch* (C. F. Naumann *Lehrb. der Geognosie* (1850) I. 667.)]

I am, however, in favor of the retention of the word, for the ambiguity has arisen simply through a misunderstanding of Moore's meaning. He applied the term 'synaptic phase', or 'synapsis', to the series of changes following the last diploid division . . . in the course of which the apparent number of chromosomes is reduced to one-half. 1960 L. PICKEN *Organization of Cells* iv. 137 Given the mitotic apparatus, the special features of meiosis might follow from the one act of synapsis—the pairing of homologues. 1978 M. W. **synergism** ('sɪnədʒɪz(ə)m). [ad. mod.L. *synergismus*, f. Gr. *συνεργός* working together, *συνεργείν* to co-operate.] 1. *Theol.* The doctrine that the human will co-operates with Divine grace in the work of regeneration.

1764 MACLAINE tr. *Mosheim's Eccl. Hist.* Cent. XVI. III. II. i. §32 (1833) 488/2 He [sc. Strigelius] was accused by Flaccius of Synergism at the court of Saxe-Weimar. 1828 PUSEY *Hist. Knowl.* III. 2279/2 Synergism is a sublimated type of Semi-Pelagianism.

2. *a. Pharm.* The combined activity of two drugs or other substances, when greater than the sum of the effects of each one present alone.

1910 A. R. CUSHNY *Textbk. Pharmacol. & Therapeutics* (ed. 5) 29 Other examples of synergism are offered by the anæsthetics, for... a mixture of two of these may induce anæsthesia when administered in a dilution far below that necessary if either is employed alone. 1938 [see ANTAGONISM 1 d]. 1961 *Lancet* 12 Aug. 375/2 Combined chemotherapy of acute leukaemia with 6-mercaptopurine plus corticosteroids gave a higher remission-rate than that observed for either of these administered alone... Synergism was not observed with other drug-combinations given for malignant blood diseases. 1972 *Materials & Technol.* V. x. 313 Products of this type are widely used for their ability to work together with other surfactants (synergism), as clarifying and emulsifying agents. 1979 *Buffalo Evening News* 18 May 11. 23/2 By combining 2,4-D and silvex, the weed killer became more effective... This is known as synergism.

b. *transf.* and *fig.*

1925 J. LAIRD *Our Minds & Their Bodies* ii. 26 These various arguments... are often so closely allied as scarcely to be distinguished. There is synergism in all their ramifications... Nevertheless, we must try to discriminate between the different steps and stages in these converging arguments. 1941 BEIGEL & KURTH tr. *Reik's Masochism in Mod. Man* i. 30 Freud dropped his attempt to reduce masochism to the assumption of a sexual synergism of pain and discomfort in the infantile organism. 1970 *Nature* 4 July 71/1 We wish to describe synergism between two distinct populations of cells in the production of cellular immunity. 1971 K. CHIN WU in W. O. Dingwall *Survey Linguistic Sci.* (1978) vii. 159 Articulating speech was... a function involving a rather delicate synchronization, synergism to use a more technical term, of many muscular activities that had to be learned. 1974 *Jrnl. Amer. Med. Assoc.* 15 Apr. 290 Thus, it seems that the synergism obtainable by a working together of both professions would, most of all, aid the physicians who read the journals. 1977 *New Scientist* 30 June 767/2 We've done some experiments on cells in culture and you don't get any synergism, you get addition. 1978 *N.Y. Times* 30 Mar. D3/2 (Adv.), The result: a synergism where the results are greater than the sum of the parts.

**synergist** ('sɪnədʒɪst). Also 7 sun-. [f. Gr. *συνεργός* (see prec.) + -IST.]

W. PIRIE *Food Resources* ii. 67 Substances (called synergists) are added which, though not themselves effective insecticides,

prevent those metabolic changes taking place which confer resistance.

**synergistic** (sɪnədʒɪstɪk), *a.* [f. prec. + -IC.]

1. *Theol.* Of or pertaining to synergism or the synergists.

1818 TODD. 1839 HALLAM *Lit. Eur.* III. ii. §32 Melancthon espoused the synergistic doctrine. 1864 SHEDD *Hist. Chr. Doctrine* II. iv. ii. 40 Chrysostom's theory of regeneration was firmly synergistic.

3. *gen.* Co-operative, interacting, mutually stimulating.

1965 H. I. ANSOFF *Corporate Strategy* v. 76 This step certainly provides for some of the synergistic interactions. *Ibid.* 83 The synergistic effect can be measured in either of two ways. 1970 *Nature* 26 Dec. 1261/2 The synergistic creativity of Wordsworth and Coleridge which produced *The Lyrical Ballads* in 1798 and began the romantic movement in poetry was over by 1805. 1972 M. †*a.* In general sense. (Cf. SYNERGISM, SYNERGIST 1.) *Obs.*

1660 HEYLIN *Hist. Quinquart.* i. 9 They speak only of such a Synergie, or cooperation, as makes men differ from a senseless stock, or lifeless statua, in reference to the great work of his own conversion.

b. In mod. scientific use: Combined or correlated action of a group of bodily organs (as nerve-centres, muscles, etc.); hence, in extended use, of mental faculties, of remedies, etc.

c. Increased effectiveness, achievement, etc., produced as a result of combined action or co-operation.

1957 T. M. SONNEBORN in E. Mayr *Species Problem* 201, I propose the term 'syngen' for the potentially common gene pool, for organisms capable of 'generating together'. 1977 *Jrnl. Immunologically compatible; (of a group of organisms) so closely related that their tissues do not act as antigens when transplanted to one another; = ISOGENEIC *a.*

1961 P. A. GORER et al. in *Nature* 25 Mar. 1025/1 We suggest the introduction of 'syngeneic' as a synonym for 'isogenic'. If one does not wish to refer to 'intra-strain immunity' one could then use 'syngeneic immunity'. 1977 *Lancet* 8 Oct. 743/2 Some syngeneic grafts have failed, sometimes because they were undertaken when the patient was already seriously ill. 1978 *Nature* 17 Aug. 697/2 When tumour cells are inoculated into syngeneic mice their establishment and growth is subject to regulation by the host animal.

Hence **syngeneically** *adv.*

1971 *Nature* 18 June 449/2 The tumour... has been maintained syngeneically as a solid as well as an ascites tumour.

**syngenesia** (sɪndʒɪ'nɪsiə). *Bot.* [mod.L. (Linnæus 1730), f. Also an order in the classes from the 20th to the 23rd, characterized by similar cohesion of the stamens.

1753 CHAMBERS *Cycl. Supp.* s.v., The *syngenesia* expresses the same class of plants with the compound flowered plants of Ray, and others. 1771 *Encycl. **syngenesia** ('sɪndʒenɪsɪs). *Biol.* [mod.L.: see SYN-<sup>1</sup> and -GENESIS.] Formation of the germ in sexual reproduction by fusion of the male and female elements, so that the substance of the embryo is derived from both parents.

1836-9 *Todd's Cycl. 1. *Biol.* Of or pertaining to syngenesia.

1864 LEWES *Aristotle* xvii. 351 The Syngenetic theory— which makes both parents equally progenitors.

2. *Geol.* Applied to mineral deposits formed at the same time as the enclosing rocks; characterized by or pertaining to a formation contemporaneous with the enclosing or surrounding rock.

1905 J. GEIKIE *Struct. & Field Geol.* xvi. 225 Ore-formations may be grouped under these two main divisions:—1. Syngenetic or Contemporaneous, and 2. Epigenetic or Subsequent... To carry out this idea I shall call this stage the 'synizesis' of the chromatin. 1921 *Ann. II. 14 Syntactics is, then, the consideration of signs and sign combinations in so far as they are subject to syntactical rules. 1941 A. TATE in *Southern Rev.* VI. 636 The role of syntactics in the semiotic science remains somewhat obscure; it seems to consist in a number of 'transformation rules'—that is, in formulas by which given expressions in words, numbers, or symbols can be changed into equivalent but formally different expressions. 1945 [see *intra-linguistic* s.v. INTRA- 1]. 1964 E. A. NIDA *Toward Sci. Transl.* III. 35 While semantics deals with the relationship of symbols to referents, syntactics is concerned with the relationship of symbol to symbol; for the meaning

of expressions is not to be found merely in adding up symbols, but also in determining their arrangements, including order and hierarchical structuring. For example, the constituents *black* and *bird*, when occurring in juxtaposition, may have two quite different meanings. 1969 [see PRAGMATIC *sb.* 4].

**syntactical**, *a.* [f. mod.L. *syntacticus*: see prec. and -ICAL. Cf. *syntactical*.] Belonging or relating to grammatical syntax. Also *transf.* in reference to musical composition (quot. 1597) and logic (see SYNTAX 2 d).

b. In philosophical systems influenced by Hegelian ideas, the final stage of a triadic progression in which an idea is proposed, then negated, and finally transcended by a new idea that resolves the conflict between the first and its negation.

The process is often represented as that of thesis, antithesis, and synthesis, although the terms are not Hegel's. The term is freq. used in relation to the political philosophy of Marx, where this process is seen as exemplified in the history of man's social development (see *dialectical materialism* s.v. DIALECTICAL a. 1 b).

**syn'tonic, a.**<sup>2</sup> [In sense 1, f. Gr. *σύν* SYN-<sup>1</sup> + *τόνος* TONE + -IC; in sense 2, f. SYNTONY 2 + -IC.]

1. *Electr.* Denoting a system of wireless telegraphy in which the transmitting and receiving instruments are accurately 'tuned' or adjusted so that the latter responds only to vibrations of the frequency of those emitted by the former; also said of the instruments so 'tuned'.

1892 LODGE *Mod. Views Electr.* xvi. 339 The synchronizing of the vibration-period of two things... is well expressed by the adjective 'syntonic' which was suggested to me... by the late Dr. A. T. 2. *Psychiatry.* Denoting the responsive, lively type of temperament which is liable to manic-depressive psychosis.

1925 A. A. BRILL in *Amer. Jrnl. Psychiatry* LXXI. 592 Bleuler proposed for this reaction the name syntonetic. *Syntonetic* not only signifies 'equally toned' but also means to be 'attuned' and in 'harmony'... If a person is neither exclusively schizoid, nor entirely syntonetic, one can only say that he is preponderatingly schizoid or preponderatingly syntonetic... Thus, if a person shows a manic attack, it means that the syntonetic components predominate qualitatively and quantitatively to a morbid degree. 1927 [see CYCLOID *sb.* 3]. 1933 *Brit. Jrnl. Psychol.* July 30 Our results would indicate that the connection of cyclothymic or syntonetic type with low perseveration... has no experimental support. 1948 NOYES & KOLB *Mod. e. *Linguistics.* A group of terms, units, or categories, in a paradigmatic relationship to one another.

1953 R. H. ROBINS in *Trans. Philol. Soc.* 109 Professor J. R. Firth has recently suggested that the terms 'Structure' and 'System' be kept distinct in the technical vocabulary of linguistic description. 'Structure' might be used to refer to undimensional, linear abstractions at various levels from utterances or parts of utterances... When... categories have

been devised by means of which the utterances of the language can be successfully described and analysed, closed systems are formed of these categories. 1956 J. R. FIRTH in *Trans. Philol. Soc.* 1955 91 Neither the Americans nor the Scandinavians have controlled and distinguished the use of *system* and *structure* as we have in the linguistics group at the School of Oriental and African Studies. 1961 Y. OLSSON *Syntax Eng. Verb* ii. 27 Values for the elements are given by terms which commute, that is, operate along the line one-instant-of-another; terms constitute *systems*. 1964 R. H. ROBINS *Gen. Linguistics* ii. 49 It is useful to employ *structure*... specifically with reference to groupings of syntagmatically related elements, and *system* with reference to classes of paradigmatically related elements. 1977 *Canad. J. Linguistics* 1976 XXI. 11. 196 Throughout the late 'fifties and early 'sixties he [sc. M. A. K. Halliday] extended J. R. Firth's concepts of 'system' and 'structure' and 'modes of meaning' into what came to be known as scale and category linguistics.

g. With reference to business and social organizations and the operations or interactions they involve (see also quot. 1967<sup>2</sup>).

1963 *Brit. J. Sociol.* XIV. 38 The idea of 'system' has been used to imply that its parts (organizations or institutions) are interdependent with each other; that the performances of the parts have consequences or functions, consequences for the 'performing' part, consequences for other 'parts', consequences for the whole system. 1965 H. I. ANSOFF *Corporate Strategy* (1968) ix. 166 The term 'systems' is becoming popular for describing large-scale non-military industrial projects. 1967 R. WHITEHEAD in *Wills & Yearsley Handbk. These are not isolated systems but interacting parts of a large and exceedingly complex whole. *Ibid.* iv. 54 The typewriter may be a relatively simple machine but in this context it is a system with a person and a machine coupled together, both interrelated and interacting. 1969 D. # T

**T** (ti:), the twentieth letter of the English and other modern alphabets, the nineteenth of the ancient Roman alphabet, corresponding in form to the Greek *T* (*tau*), from the Phœnician (and ancient Semitic)  $\text{𐤕}$   $\times$   $\times$  (*tau*), in Phœnician, and originally also in Greek, the last letter of the alphabet. It represents the point-breath-stop consonant of Bell's 'Visible Speech', or surd dental mute, so called, but in English is gingival or alveolar rather than dental. Several varieties of a *t*-sound occur in different languages, according as the flow of the breath is stopped by bringing the tip or front of the tongue into contact with different points between the edge of the upper teeth and the roof of the palate. Thus, contact of the tip of the tongue with the teeth gives the true dental *t*, which is common in continental European languages, very distinct in Anglo-Irish, and heard in north-western English dialects before *r*, where it is often represented in dialect specimens by spelling *thru* or *t'hrue* for *true*, and the like (though the consonant is not actually *th* or (θ)). The Indian languages, Aryan as well as Dravidian, distinguish two kinds of *t*, the dental, and the retracted or 'cerebral' (*mürdhanya*), in Sanskrit  $\text{त}$  and  $\text{ट}$ , of which the latter is formed by contact of the retracted tip of the tongue with the roof of the palate. The English *t* is formed between these two extreme positions, the contact being with the back of the gum or the front margin of the palate; its sound is much closer to the cerebral than to the dental, and in the Tamil or Telugu representation of English words, the cerebral is regularly put for English *t*. In the Roman transliteration of Indian words it is usual to write *t* for the dental, and to distinguish the cerebral as *ṭ*, as is done in this dictionary. The Semitic languages also distinguish two *t*-sounds, one, the Hebrew *tau* ( $\text{ט}$ ), Arabic *ṭa* ( $\text{ط}$ ), said to be formed by contact of the blade of the tongue with the palate; this also has been romanized as *ṭ*, though distinguished in Urdū from the cerebral *t*.

In modern English, besides its proper sound as above described, *t* in the combinations *-tion*, *-tious*, *-tial*, *-tia*, *-tian*, *-tience*, *-tient*, after a vowel or any consonant except *s*, has the sound of *sh* (ʃ), in which the following *i* is absorbed, as in *nation* (*neiʃən*), *faction* (*fækʃəs*), *partial* (*pa:ʃəl*), *militia* (*mi'lɪʃə*), *patience* (*peɪʃəns*); but in *-ia*, *-ian*, *i* is sometimes more or less preserved, especially in proper names, as in *inertia*, *Portia*, *Gratian*, *Dalmatian*. In these combinations Latin (*t*) became (*ts*), usually written *z*, and then (*s*), written *c*, in French, as in *L. grātia*, *It. grazia*, *F. grâce*, *L. nātīōnem*, *It. nazione*, *OF., Sp. nacion*. In French and English spelling the Latin *t* was subsequently in most cases restored, e.g. *nation*; but the living sound was (*s*), and it is this *s* which combining with the following *i* (= *y* consonant) as (*sj-*), passed in English into (ʃ), in the same way as written *c* or *s* has done in *gracious*, *Asia*, *emersion*: see *S* the letter, par. 4. Strictly, therefore, what we have is not *ti* pronounced as (ʃ), but (ʃ) derived from *ci*, spelt *ti* after its Latin source. After *s*, the original sound of *t* has remained, as in *bestial*, *Christian*, *Erastian*.

A much more recent change, 'as yet scarcely recognized by orthoepists' (*N.E.D.*, 1910), is the development in southern England of the sound *ch* (tʃ) from *t* followed by *u* with its diphthongal or name sound (ju:), in such combinations as *-tual*, *-tue*, *-tuous*, and especially *-ture*, as in *nature* (*neɪtʃuə(r)*), whence (*neɪtʃə(r)*, *neɪtʃə(r)*). In those English dialects in which *u* has not become (ju:), the original *t* remains, as in 'critter' = *creature*, 'pictur' = *picture*. In rapid speech *ti* after *s* often passes similarly into (tʃ), as (*kwɛstʃən*) for (*kwɛstjən*).

*T* between *s* and syllabic *l* or *n* (*en*), as in *bustle*, *castle*, *epistle*, *christen*, *fasten*, *hasten*, is now usually mute; so between *s* and *m* in *Christmas*, and between *f* and syllabic *n* in *often*, *soften*.

**TH** is a consonantal digraph representing two simple sounds (θ, ð), for which the Roman alphabet has no simple symbols, and is thus phonetically a distinct letter (or two letters), inserted between **TE**- and **TI**-, where see its history and pronunciation.

[The original sense of *T* here has not been ascertained. Suggestions that it was the *tee* at Curling, or at Golf, or a T square, appear on investigation to be untenable; it has also been suggested that it referred to the proper completion of a *t* by crossing it (see *b*); or that it was the initial of a word; in reference to this it is notable that *to a tittle* (i.e. to a prick, dot, jot) was in use nearly a century before 'to a T', and in exactly the same constructions: see *TITTLE*.]

b. *Bacteriology*. [Initial letter of *type*.] T followed by a numeral is the designation of certain strains of phages of the bacterium *Escherichia coli* that have been much used experimentally. So T-even, designating the strains for which the numeral is even.

-t, suffix<sup>1</sup>, formative of the pa. pple. in some weak verbs, for earlier -d and -ede (see -ED<sup>1</sup>), due usually to the devocalization of d after a breath consonant, as in *nipped*, *nip'd*, *nipt*. In some verbs the use of t for -ed goes back to OTeut., esp. in app. contracted or irregular verbs, as *bought*, *brought*, *might*, *thought*, *wrought* (Goth. *bauht*, *brâht*, *maht*, *pâht*, *waurht*); in others it appears in WGer., as *sought* (Goth. *sôkid*, OS. and OE. *sôht*); in others only in OE. as *laught* (læht), *taught* (tæht, taht). But in the majority of cases the t is of later appearance, arising from the reduction of -ed to -d, -d in Middle or Mod. Engl., with consequent devocalization of d, not only after breath consonants, as in *dropt*, *nipt*, *crept*, *slept*, *swept*, *left*, *lost*, *tost*, *past*, but, in certain cases, after liquids and nasals, as in *felt*, *spelt*, *silt*, *dreamt*, *burnt*, *meant*, *pent*; also in contracted formations, such as *built*, *bent*, *lent*, *sent*, *spent*, *girt*, *cast*. But in many words where the pronunciation has t, the current spelling is -ed, e.g. *blessed*, *dropped*, *hushed*, *passed* for *blest*, *dropt*, *husht*, *past*. See the article -ED suffix<sup>1</sup>.

-t, suffix<sup>2</sup>, formative of the pa. t. of some weak verbs, for earlier -te, -de, -ede (i.e. -da, -ida, -eda). Parallel in formation to the prec., and generally going along with it in ME., and identical in form in mod.E.; but in OE. a pa. t. in -te was sometimes used where the pa. pple. retained the fuller -ed, as in *cyssan* to kiss, *cyste*, *cyssed*, *settan* to set, *sette*, *seted* (and *sett*). In mod.Eng. on the contrary the spelling in t is more frequent in the

pa. pple., esp. when used adjectivally, than in the pa. t.: cf. *tempest-tost*, the wind tossed the ship; in time *past*, he *passed* his time. In some cases even the form in *-ed* is a mere modern fashion of spelling, at variance with both the pronunciation and the history; thus, *kissed* was in OS. *kusta*, OE. *cyste*, ME. *kist*, as actually pronounced; it has come to be spelt *kissed*, because in other verbs *-ed* is pronounced *-t*.

**-t**, suffix<sup>3</sup>. A formative of sbs. a. from verbs, going back to OTeut., and answering variously to the Indo-Eur. suffixes *-tos*, *-tā*, *-tis*, *-tus*, the *t* of which remained in Teutonic, when preceded by a guttural, labial, or s; e.g. *draught*, *drift*, *flight*, *frost*, *gift*, *heft*, *might*, *plight*, *shaft*, *shrift*, *slaught*, *thirst*, *thought*, *thrift*, *west*, etc. (in some of which the formation is later and imitative). In a few cases the *t* is a later Eng. change of *-þ* after *h*, 3, as in *sight* (OE. *siehp*), in which *þ* normally represented Indo-Eur. *t*. See -TH<sup>1</sup>.

b. from adjs. (or sbs.), changed from earlier *-þ*, *-th* (in *length*, etc.) after *h*, 3, as *height* (Goth. *hauhipa*, OE. *hieþpo*, ME. *heizþe*, *highth*); *sleight* (ON. *slægþ*, ME. *sleizþe*); *theft* (OE. *piefþ*, ME. *piefþe*); *dreight* (for *dreighth*, from *dreiz*, DREE): here the suffix was OTeut. *-ipō*: *-iðō*: Indo-Eur. *-tā*. See -TH<sup>1</sup>. Also *dought* (OE. *dugup* :—\**dugunþ*), *drought* (OE. *drūgub*, Sc. *drouth*), where the OE. suffix *-up* was for *-unþ*:—Indo-Eur. *-ntis*.

**tabby** ('tæbɪ), *sb.* and *a.* Also 7 taby. [In sense 1, *a. F. tabis*, earlier *atabis* (both 14th or early 15th c. in Godef.), Sp., Pg., It. *tabi*, med.L. *attābi* (M. Devic in Littré), app. *a. Arab. e-attābiy*, name of a quarter of Bagdad in which this stuff was manufactured, named after 'Attāb, great-grandson of Omeyya. Of this quarter Yule cites from an Arab writer of the 12th c. 'Here are made the stuffs, called 'Attābiya, which are silks and cottons of divers colours'. The connexion of the other senses is not very clear. *Tabby cat*, instanced in 1695, is generally held to have been so named from the striped or streaked colour of its coat. The simple *tabby*, in the same sense, is much later (1774). *Tabby*, old maid, is usually associated with *tabby* a cat; but it appears earlier, and may have originated as the familiar contraction of *Tabitha* (cf. *Abby* for *Abigail*), as an old-fashioned female name, and have become humorously associated with *tabby cat*. It is possible that *tabby* in the sense of she-cat originated in *Tabby* for *Tabitha*; otherwise it is difficult to see any sense-connexion between she-cat and brindled cat, since a tom-cat may also be brindled or striped. Sense 4 of the *sb.* prob. arose from resemblance to the markings of the tabby cat; the origin of sense 5 is very uncertain, and sense 6 may be a different word, though it may also have originated in a fancied resemblance of colour to that of the tabby cat.]

**taboo, tabu** (tə'bu:), *a.* and *sb.* Also TAPU, tambu, tabou. [ad. Tongan 'tabu' (see A).]

'Tabu' is also the form in several languages of Melanesia and Micronesia, as in some of the islands of Vanuatu, Kiribati, Papua New Guinea, etc. The general Polynesian and Maori form (also in some of the islands of Vanuatu) is 'tapu' (TAPU), in Hawaiian 'kapu'. Some of the Melanesian langs., as those of Fiji, and some of the Solomon Is., have 'tambu', New Britain 'tabu' and 'tambu'. Various cognate forms occur in Melanesian and cognate langs. The Tongan form was that first met with by Captain Cook, in 1777, from the narrative of whose voyages the custom with its name became known in England. In Fr. spelt *tabou*. The accentuation *ta'boo*, and the use of the word as sb. and vb., are English; in all the native langs. the word is stressed on the first syllable, and is used only as adj., the sb. and vb. being expressed by derivative words or phrases.]

**A. adj.** (chiefly in predicate). *a.* As originally used in Polynesia, Melanesia, New Zealand, etc.: Set apart for or consecrated to a special use or purpose; restricted to the use of a god, a king, priests, or chiefs, while forbidden to general use; prohibited to a particular class (esp. to women), or to a particular person or persons; inviolable, sacred; forbidden, unlawful; also said of persons under a perpetual or temporary prohibition from certain actions, from food, or from contact with others.

**1777** COOK *Voy. to Pacific* II. vii. (1785) I. 286 [At Tongataboo] Not one of them would sit down, or eat a bit of any thing. . . On expressing my surprise at this, they were all *taboo*, as they said; which word has a very comprehensive meaning; but, in general, signifies that a thing is forbidden. Why they were laid under such restraints, at present, was not explained. *Ibid.* ix. 338 As every thing would, very soon, be *taboo*, if any of our people, or of their own, should be found walking about, they would be knocked down with clubs. *Ibid.* xi. 410 When any thing is forbidden to be eat, or made use of, they say, that it is *taboo*. **1826** SCOTT *Diary* 24 Oct. in *Lockhart*, The conversation is seldom excellent amongst official people. GARNETT *Ess.* viii. 224 The legendary history of Ireland is . . . taboo to the serious historian.

**B. sb. 1.** The putting of a person or thing under prohibition or interdict, perpetual or temporary; the fact or condition of being so placed; the prohibition or interdict itself. Also, the institution or practice by which such prohibitions are recognized and enforced; found in full force in the islands of the Pacific when first visited by Europeans, and still prevailing in some of them, as also, under other forms and names, among many other races in early stages of culture.

The institution is generally supposed to have had a religious or superstitious origin (certain things being considered the property of the gods or superhuman powers, and therefore forbidden to men), and to have been extended to political and social affairs, being usually controlled by the king or great chiefs in conjunction with the priests. Some things, acts, and words were permanently taboo or interdicted to the mass of the people, and others specially to women, while temporary taboo was frequently imposed, often apparently quite arbitrarily.

*a.* As originally used in Polynesia, New Zealand, Melanesia, etc.

**1777** COOK *Voy. to Pacific* II. xi. **1933** [see sense 3 b below]. **1962** S. ULLMANN *Semantics* viii. 205 Taboo is an important cause of semantic change. Language taboos fall into three more or less distinct groups according to the psychological motivation behind them. **1980** R. A. ||**tagma** ('tægmə). Pl. *tagmata*. [a. Gr. *τάγμα* something arranged, f. *τάσσειν* to set in order.]

1. *Veg. Physiol.* A term applied by Pfeffer (in German, 1877) to the aggregates of molecules of which the structure of a plant is supposed to consist.

**1885** GOODALE *Physiol. Bot.* § 588. 213 *note*, Pfeffer applies a general term, *Tagma*, to all aggregates of molecules, thus bringing under one head the plecton, micella, and micellar aggregate; and he applies the name *Syntagma* to all bodies made up of *tagmata*. **1889** BURDON-SANDERSON in *Nature* 26 Sept. 524 That an element of living material, is not equivalent to a molecule, however big or complex, but must rather be an arrangement or phalanx of molecules of different kinds. Hence the word *tagma*, first used by Pfeffer, has come to be accepted as best expressing the notion.

2. *Zool.* Each of the morphologically distinct regions, comprising several adjoining segments, into which the bodies of arthropods and some other metamerically organized animals are

divided. Chiefly *pl.* Hence tag'mosis, the formation of tagmata.

**1902** E. R. LANKESTER in *Encycl. Brit.* XXV. 691/2 It is convenient to have a special word for... regions of like meres, and we call each a tagma (*τάγμα*, a regiment). The word 'tagmosis' is applicable to the formation of such regions.

**1935** R. E. SNODGRASS *Princ. Insect Morphol.* iv. 80 Tagmosis is more variable in the Crustacea [than in insects]; in the Chilopoda and Diplopoda it results only in the formation of a head, including the gnathal segments, and a body. **1980** C. GILLOTT *Entomol.* iii. 54 The basic segmental structure is frequently obscured as a result of tagmosis. In insects three tagmata are found: the head, the thorax, and the abdomen.

3. *Linguistics.* a. A feature of grammatical arrangement or syntax.

**1949** *Archivum Linguisticum* I. 1 Such distinctions as that of morpheme and 'tagma' as the constituents of the syntagm provide the necessary correction. But there is a different sense in which morpheme and tagma may share in the expression of the meaning of a syntagm: a feature of meaning may be distributed over both.

b. In tagmemics, the smallest meaningful unit of grammatical substance (contrasted with tagmeme).

**1964** R. E. LONGACRE *Grammar Discovery Procedures* i. 46 Copy the data from the filing slips onto charts: (a) There should be a column for each tagma, i.e. for each tentatively identified function-set correlation. **1969** W. A. COOK *Introd. Tagmemic Analysis* vii. 187 Tagmemics is a grouping process, which involves human judgment, an attempt to group tagmas into units essential to the language, as the language appears to the native speaker.

**tagmeme** ('tægmɪ:m). *Linguistics.* [f. Gr. *τάγμα* arrangement (see TAGMA) + -EME.]

1. The smallest meaningful unit of grammatical form.

**1933** L. BLOOMFIELD *Language* x. 166 In the case of lexical forms, we have defined the smallest meaningful units as morphemes, and their meanings as sememes; in the same way, the smallest meaningful units of grammatical form may be spoken of as tagmemes, and their meanings as epistememes. **1950** S. POTTER *Our Language* 86 Beginning with the phoneme, philologists pass on to speak about morphemes, taxemes or tagmemes.

2. The correlate of a grammatical function and the class of items which can perform it.

**1943** K. L. PIKE in *Language* XIX. 69 Somewhat diffidently I suggest the following classifications and relabelings as perhaps being a bit easier to handle than Bloomfield's... *Tagmeme*, a composite view of the basic composite taxemes of a linguistic form, at any one specific layer of structure. E.g. the total arrangement features of the form *duchess* considered as a single entity. **1957** — in *General Linguistics* III. 29 In future work, therefore, we are adopting the term *tagmeme*. It should be noted, however, that our definition of this term is sharply different from Bloomfield. **1968** *Language* XLIV. 190 Another basic concept in tagmemic analysis is the consistent distinction observed between obligatory and optional tagmemes. **1969** S. POTTER *Changing English* viii. 163 Every sentence is a frame into which syntactic units, or tagmemes, are fitted. When a word is forced into an unusual tagmemic slot, it is said to undergo grammatical conversion or functional shift. **1973** *Amer. Speech* 1970 XLV. 135 The highest level tagmeme operates at the level of the T-unit. **1981** *Word* 1980 XXXI. 232 The infrastructure of English contains seven slots or tagmemes and that of German six.

**tagmemic** (tæg'mi:mɪk), *a. Linguistics.* [f. TAGMEME + -IC.] Of or pertaining to tagmemes or tagmemics.

**1958** K. L. PIKE in *Internat. J. Amer. Linguistics* XXIV. 275 In order to demonstrate another crucial difference between our tagmeme and that of Bloomfield it is necessary to indicate the manner in which slot and distribution class are relevant to our tagmemic view. **1964** R. H. ROBINS *Gen. Linguistics* p. xx, P. Postal... sets out a vigorous criticism of both immediate constituent and tagmemic analysis. **1968** *Language* XLIV. 190 Tagmemic theory provides a tight hierarchical scheme for grammatical description. **1969** [see TAGMEME 2]. **1978** *English J. Dec.* 66 A clause analysis technique reflecting a sketch of the core grammatical system of English based on a tagmemic model. **1981** *Word* 1980 XXXI. 231 He... adopts the generative tagmemic approach as the basis of his work.

**tagmemicist** (tæg'mi:mɪsɪst). *Linguistics.* [f. TAGMEMIC(S) + -IST.] A student or exponent of tagmemics.

**1965** *Language* XLI. 640 It would be easy to go farther and say that transformationists represent the extreme of preoccupation with linguistic theory, while tagmemicists represent the extreme of practical concern. **1972** *Times Lit. Suppl.* 22 Sept. 1116/2 Like the units of the tagmemicists, Saumjan's categories are a combination of form and function. **1977** *Language* LIII. 247 The linguistic study of discourse or intrasentential relations has been carried out by such diverse scholars as... tagmemicists (e.g. Pike 1967).

**tagmemics** (tæg'mi:mɪks), *sb. pl.* (const. as *sing.*). *Linguistics.* [f. TAGMEME: see -IC 2.] The study and description of language in terms of tagmemes; *spec.* a school of linguistic analysis, based on the work of Kenneth L. Pike (b. 1912), which stresses the functional and structural relations of grammatical units.

**1947** C. F. HOCKETT in *Language* XXIII. 274 This term [sc. *tactics*] seems simpler than 'taxemics' or 'tagmemics', which one might derive more directly from Bloomfield's labels. **1958** K. L. PIKE in *Internat. J. Amer. Linguistics* XXIV. 273 Tagmemics, as I see it, should work with neither of these schematic views by itself. **1964** *Language* XL. 314 The similarity of Firthian linguistics to American slot-and-filler grammatical description, notably tagmemics, has

already been noted. 1967 R. H. ROBINS *Short Hist. Linguistics* viii. 212 In thus employing semantics diachronically, and in severely modifying immediate constituent structures in syntax, tagmemics marks its major divergencies from 'Bloomfieldian' grammatical analysis. 1975 M. A. K. HALLIOAY in S. Rogers *Children & Lang.* iv. 225 With the now general recognition of the basically tri-stratal nature of the linguistic system (and Prague theory, glossematics, system-structure theory, tagmemics, stratification theory and the later versions of transformation theory are all variants on this theme), the semantic perspective has been restored. 1981 *Word* 1980 XXXI. 230 He makes use of the slot-and-filler infrastructure, characteristic of tagmemics.

**taipan**<sup>2</sup> ('taipæn). Also Taipan. [Aboriginal name.] A large dark brown venomous snake, *Oxyuranus scutellatus*, of the family Elapidae, native to northern parts of Australia.

1933 D. F. THOMSON in *Proc. Zool. **Tai-ping** (taipɪŋ). Also Taë-ping. [Chinese *T'ai-p'ing*, i.e. *t'ai* great, *p'ing* peace.] The name given to the adherents of a great rebellion which arose in Southern China in 1850, under the leadership of Hung-siu-tsun, styled *Tien-wang*, Heavenly Prince, and *T'ai-p'ing-wang*, Prince of great peace, who claimed a divine commission to overthrow the Manchu dynasty and establish one of native origin, to be called the *T'ai-p'ing Chao* or Great Peace Dynasty. Also *attrib.* Hence **Tai-pingdom**, **Tai-pingism**.

The war which ensued devastated some of the most fertile provinces of China for a number of years; partly by means of English help the Tai-pings were finally routed and dispersed in 1865.

MORRIS *Austral Eng.* (1898) 454/2 *Taipo* means to visit or come by night,—a night visitant,—a spectral thing seen in dreams,—a fancied and feared thing, or hobgoblin. 1886 *N.Z. Cf. *tae*, to arrive; *po*, night. 1921 H. GUTHRIE-SMITH *Tutira* xi. 91 This crossing has always been known in my time as the 'Taipo'—goblin—crossing, a name probably given because of a totara block which used to lie there hewn roughly to the similitude of a man's head. 1946 *Jnl. Polynesian Soc.* June 150 *Taipo*, supernatural being; goblin: used by the Maori believing it to be Pakeha, and by the Pakeha believing it to be Maori; often spelt *taepo*, which also is not a Maori word: so *taipo* is a word coined by no one knows whom. 1968 *N.Z. 1775 JOHNSON *Western Isles, Ostig*, By the term *second sight*, seems to be meant a mode of seeing, superadded to that which nature generally bestows. In the Erse it is called *Taisch*; which signifies likewise a spectre, or a vision. 1785 BOSWELL *Tour to Hebrides* 7 Sept., Some women said to him, they had heard two taischs, that is, two voices of persons about to die; and what was remarkable, one of them was an English taisch, which they never heard before. 1792 *Statist. **take** (teik), *v.* Pa. t. took (tuk); pa. pple. taken ('teik(ə)n). Forms: see below. [Late OE. *tacan*, *tōc*, *tacen*, a. ON. *taka*, *tōk*, *tekin* (OSw. *taka*, Sw. *taga*, Da. *tage*), to grasp, grip, seize, lay hold of, take, which appears c 1100, in late parts of the OE. Chron., first in MS. D, and then a 1150 also in E, and elsewhere, but may have been in use in the Dane-law district a 1000. A. Illustration of Forms and Inflexions.

*Take* is, like *shake*, *forsake*, a strong vb. of the 6th ablaut series. In northern ME. the *k* and following short vowel in *take*, *takes*, *taken* were often suppressed, leaving the forms *ta*, *tas*, *tan*, of which *ta*, *tay*, survives in Eng. dialects, *tane* in Sc. and many Eng. dialects, *ta'en* in Eng. poets. The reduction of the pa. t. to *tō* is obs., rare, and doubtful. A weak pa. t. *taked* occurs from 13th c., and is, with *tayed*, *teaded*, *tade*, still dialectal. For the pa. pple. *taken*, the pa. t. *took* has been common since 16th c. in vulgar speech and in dialects, which have also *tooken*, *tooked*. In the pa. pple., *ton*(e) for the northern *tan*(e) occasionally appears. See *Eng. Dial. Dict.*

B. Signification.

The earliest known use of this verb in the Germanic languages was app. to express the physical action 'to put the hand on', 'to touch'—the only known sense of Gothic *tēkan*. By a natural advance, such as is seen in English in the use of 'lay hands upon', the sense passed to 'lay hold upon, lay hold of, grip, grasp, seize'—the essential meaning of Old Norse *taka*, of MDu. *taken*, and of the material senses of *take* in English. By the subordination of the notion of the instruments, and even of the physical action, to that of the result, *take* becomes in its essence 'to transfer to oneself by one's own action or volition (anything material or non-material)'. This becomes then the general or ordinary sense of the verb, which falls into two main divisions, *take* in the sense of 'seize, grip', hence 'appropriate', and *take* in the sense of 'receive or accept what is handed to one'. Subordinate to these are the non-material senses of 'assume, adopt, apprehend, comprehend, comprise, contain'. For the common element of all these notions *take* is the simple and proper term, for which no simpler can be substituted. It is one of the elemental words of the language, of which the only direct explanation is to show the *thing* or *action* to which they are applied.

*Take* also enters into a great number of idiomatic phrases, which are often difficult to analyse. Many of these are parallel to, and influenced by French phrases with *prendre*: see F. H. SYKES, *French Elements in ME.*, Oxford 1899.
