6. *Law.* An estate or interest in land, etc. for a certain period; in full, *term of* or *for years*.

*outstanding term, satisfied term*: an estate for a long term of years was given, usually to the trustees of a strict settlement, to secure to beneficiaries under the settlement the payments due to them periodically from the tenant of the settled land. If these payments were not made, the trustees could take possession of the land for the term, and sell or mortgage it, to raise the money needed to make them. When the purposes for which the estate was created were fulfilled (e.g. by the death of all the beneficiaries) it was called a *satisfied term*; but unless express provision had been made that it should then cease, or unless it was conveyed to the tenant of the freehold so that it was destroyed by merger in the freehold, it continued to exist for the period for which it was created. It was then known as an *outstanding term*, or an *attendant term*, i.e. a term accompanying the inheritance. By Act 8 & 9 Vict. c. 112 provision was made for the cessation of satisfied terms.

[Note to branch IV. Gr.  $\delta\pi\omicron\varsigma$  denoted 'boundary mark' and thence 'a boundary', as in Euclid (see 1570 in sense 1). Hence in Arithmetic, applied to each of the terms in a ratio, e.g. 2:4; also in a proportion, and in any related series of numbers; in the statement of a mean between two numbers, as 6:9:12, 6 and 12 were the  $\delta\kappa\rho\omicron\iota$   $\delta\pi\omicron\varsigma$  'extreme terms', and, by extension 9 was called  $\mu\epsilon\sigma\omicron\varsigma$   $\delta\pi\omicron\varsigma$  'the mean term'. In Logic,  $\delta\pi\omicron\varsigma$  was applied to the terms in an analogy, e.g. 'as A is to B, so is C to D', where A, B, C, and D were  $\delta\pi\omicron\varsigma$ ; also to the terms (subject and predicate) in a proposition; hence to the terms in a syllogism, the major, minor, and middle (the last being analogous to the 'mean term' in Arithmetic). By late Latin philosophical writers,  $\delta\pi\omicron\varsigma$  in the geometrical, arithmetical, and logical senses was rendered by *terminus* (constantly used by Boethius a 524). The application of  $\delta\pi\omicron\varsigma$  and *terminus* to the definition or limitation of a word appears in Petrus Hispanus, and led finally to the application of *terminus* to any word used in a definite or limited sense (as in sense 13 above). In Aquinas (13th c.) *terminus* is synonymous with *dictio*, *locutio*, *nomen* (see the Thomas Lexicon s.v.).]

Naturalist* LXVI. 32 Related species differ in the degree of terminalization of chiasmata. 1979 *Nature* 22 Mar. 349/2 The issue of terminalisation is relevant both theoretically (assessment of chiasma and crossover frequency) and practically (alleged factor in maternal-age-dependent non-disjunction in mammals).

II. In Christian Latin use of *testamentum*.

Orig. a misuse of the word, arising from the fact that Gr. διαθήκη, 'disposition, arrangement', was applied both to a covenant (*pactum, fœdus*) between parties, and to a testament or will (*testamentum*). Prob. largely due to the use of διαθήκη (in the sense 'covenant') in the account of the Last Supper immediately before Christ's death, and its consequent association with the notion of a last will or testament. 1932 W. S. DUKE-ELDER *Text-bk. Ophthalm.* I. xxv. 986 The fact that picking skeins of wool does not appeal to the average workman, while the reading of pseudochromatic diagrams requires a considerable amount of intelligence, has popularized the adoption of lantern tests wherein coloured glasses are illuminated and the testee is asked to name the colour and (sometimes) to match it with wools or some other coloured material. 1947 *Sci. NOVAK *Woman asks Doctor* xii. 155 There has been... a good deal of unfortunate newspaper discussion on the subject of artificial insemination and 'test-tube babies'. 1945 *Daily Herald* 20 Apr. 3/8 Warning on test tube babies. Artificial insemination of women is being performed on a small scale in this country. 1958 *Times* 18 Jan. 7/2 A 'test-tube' child cannot grow up knowing about his true origin. 1965 *New Scientist* 11 Nov. 392/3 The idea of 'test-tube babies' is no longer something to be woven into the plot of a science fiction novel. Serious-minded scientists are not only thinking about cultivating human embryos on the laboratory bench—they are developing the techniques which will make this a practical possibility. 1978 *Times* 26 July 1/1 The world's first test-tube baby, a girl, was born by caesarian section just before midnight at Oldham and District General Hospital, Greater Manchester... The embryo was implanted in Mrs Brown's womb after being fertilized in Mr Steptoe's laboratories. 1982 *New Scientist* 4 Feb. 290 Since the birth of the first 'test-tube baby' three and a half years ago it has become increasingly obvious that fertilising human eggs in the laboratory is not simply a clinical technique for relieving infertility.

PICKIN *Organization of Cells* iv. 108 Simultaneously in 1948, several groups of workers independently put forward evidence throwing doubt on the old tetranucleotide hypothesis, according to which the four nitrogenous bases present: adenine, guanine, cytosine, and thymine, were combined in equimolecular proportions in a tetranucleotide. This itself was supposed to consist of four nucleotides, each bearing a molecule of one of the four bases. 1974 *Nature* 26 Apr. 783/1 The tetranucleotide hypothesis... asserted that DNA and RNA had a molecular weight of about 1,300, and contained one of each of the four bases (adenine, guanine, cytosine and thymine in DNA; adenine, guanine, cytosine and uracil in

RNA). Because these bases were found to be present in the form of nucleotides (sugar-phosphate + base) the molecule was called a tetranucleotide.

[Note. Late Roman writers reckoned the *Teutones* among the peoples of Germania, and *Teutonicus* became a common poetic equivalent for *Germanicus*. It is now however held by many that they were not a Germanic people. But, before 900, German writers in Latin began to follow Latin poetic precedent by using *Theutonica lingua* instead of the barbarian or non-classical *Theotisca*, to render the native *tiutisch*, *tiutsch* (OHG. *diutisc*, mod. *deutsch* = OS. *thiudisc*, OE. *þeodisc*, literally 'national, popular, vulgar') as a designation of their vulgar tongue in contrast to Latin, as if this German adj. were identical with the ancient ethnic name. In 1200 *lingua Teutonica* was similarly used, and thenceforth *Teutonicus* became a usual L. rendering of *Deutsch* or *German*. Some Early German comparative philologists (e.g. Bopp in 1820) used *Teutonisch* as the name for the family of languages including Gothic, German, Scandinavian, and English; but for this *Germanisch* is now more used in German, and *Germanic* by many in English. But in English there is an awkwardness and sometimes ambiguity in using *Germanic* beside *German* (in its ordinary political sense), which does not arise in German or French, where *germanisch* and *germanique* are entirely distinct from *deutsch* and *allemand*. To avoid this, many English scholars preferred 'Teutonic' as the term for the linguistic family, and it is commonly so used in this dictionary.]

**th**, in words of Old English or Old Norse origin, and in words from Greek, is a consonantal digraph representing a simple sound, or rather (in Teutonic words), a pair of simple sounds, *breath* and *voice*, indicated in this dictionary by the letters (θ) and (ð); the former, as in *thin, bath* (θin, ba:θ), being the breath dental spirant akin to *t*, and the latter, as in *then, bathe* (ðen, beið), the voiced dental spirant akin to *d*. The group (t, d, θ, ð), corresponds to the group (p, b, f, v). The breath spirant is identical with modern Greek *theta* (θ, θ), and approximately with Spanish *z* (or *c* before *e, i*). The Greek letter, which corresponds etymologically to Sanskrit ṭh (and so, by Grimm's Law, to Teutonic and English *D*), was in early inscriptions represented by **TH**, and was a true aspirate; it was subsequently often written *Tθ*, *+θ*, and has prob. the sound (tθ); but by the second century B.C. it had sunk into a simple sound, = our (θ). The Romans, having neither the sound nor the symbol, represented the letter by **TH**, as in *Θάψος, Thapsus*, but app. this was pronounced, at least in late Latin (whence in all the Romanic languages), as simple *t*; cf. Greek *θεωρία*, L. *theōria*, It. and Sp. *teoría*; in Pg. *teoria*, F. *théorie*, spelt with *th*, pronounced with *t*; also Gr. *Θωμάς*, L. *Thōmās*, It. *Toma*, Sp. *Tomás*; Pg., F., Eng. *Thomas* all pronounced with *T*.

(2) In Teutonic the breath spirant (θ) was very frequent, being the regular etymological representative of Indo-Eur. *t* initially or after the stressed vowel, as in OTeut. \**pr̥ijiz*, Goth.

*preis*, OE. *preo*, Eng. *three*, = Indo-Eur. \**treies*, Skr. *trayas*, Gr. *τρεις*, L. *trēs*; OTeut. \**brōper*, Goth. *brōþar*, OE. *brōþor*, *brōðor*, Eng. *brother*, = Indo-Eur. \**bhrātēr*, Gr. *φράτηρ* clansman, L. *frāter*. The voiced spirant in *brōðor*, etc., was a later development (c 700 in English) from the breath sound between vowels or voiced consonants, as in the parallel *v* and *z* from *f* and *s*. Initially, the same change of (θ) to (ð) took place during the Middle English period in the demonstrative group of words, *the*, *that*, and their kindred, *this*, *these*, *þis*, *those*, *there*, *then*, *than*, *thence*, *thither*, *thus*, etc., and in the pronouns of the second person singular, *thou*, *thee*, *thine*, *thy*: these constitute the only words in English with initial (ð). In the same group of words in the cognate Teutonic languages (θ) has passed through (ð) into (d); thus Ger. *das*, Du. *dat*, Da. *det* 'that'; in High Ger., Low Ger., and Du. the same has taken place even in other original *th* words which retain (θ) in English; e.g. Ger. *dach*, *denken*, *ding*, *dick*, *donner*, *drei* = Eng. *thatch*, *think*, *thing*, *thick*, *thunder*, *three*.

(3) In the demonstrative and pronominal groups of words, change of initial *p* to *t*, by assimilation to a preceding dental (*t*, *d*, *s*), appears in earlier English. OE. *pæt* *pe* became *pæte*, *pætte*; *pe læs* *pe* appears in the 11th c. as *pe læste*, whence modern *lest*. In the last section of the OE. Chronicle, from 1132, *pe* after *t* or *d* regularly becomes *te* (e.g. *pæt te* king, and *te eorles*). In the Ormulum and the Cotton MS. of Cursor Mundi, this assimilation is seen in all the words of the *the-thou* group (Orm. *patt tatt te* godspell menep, *wroht tist boc*, and *tatt te* folc all *pess te* bett; *Cursor*, *ne was tar*, here and *tare*, *scho serued taim*, als *sais te* sau). So in Ancrén Riwle (and *te* is, *et tesse* *uerse*, *pæo* *pet tus* *doð*, and *tes* *oðer*, etc.). In the course of the 14th c., this assimilation was given up, and the spirant reappeared (as *ð*).

(4) In the Runic alphabet (*futhorc*) the breath spirant had to itself a symbol *þ* or *ƿ* (called *thorn*); but in the earliest known OE. writings in the Roman alphabet this was represented by *th*, the voiced spirant being often represented by *d* (ð) (sometimes by *th*). Before 700 probably, the character *ð*, formed by a bar across the stem of *ð*, was introduced; it appears in a charter of Wihtred, king of Kent, 700-715 (Sweet *Oldest English Texts* 428). Apparently it was first used to denote the voiced spirant: see the proper names in the Moore MS. of *Bæda*, c 737, and the *Liber Vitæ*, Cott. MS., c 800, and charters before 800 generally. But in the ninth century it was used for both spirants, as in the Vespasian Psalter, c 825 (e.g. iv. 5 *ða ðe cweoðað*), and in a West Saxon charter of 847 (O.E.T. 433). In the 8th century apparently, the thorn, *þ*, was adopted from the Runic *futhorc*, the earliest charter showing it being one of Coenwulf, king of Mercia, of 811 (O.E.T. 456); but it was not much used till late in the 9th c. A Surrey charter a 889 (ibid. 451) has 34 examples of *ð* initial, and 25 medial or final, with 49 of *þ* initial, and 1 medial. From the later years of the 9th c. *ð* and *þ* were used promiscuously in West Saxon works, with some preponderance of *þ* initially and *ð* finally. This continued in ME. till the 13th c. On the other hand, the Durham *Rituale* and the Lindisfarne Gospel Gloss, c 950, have uniformly *ð* in all positions (except in the compendium *þ* for *ðæt*), as has also the East Anglian *Genesis & Exodus*, c 1250; while the Mercian portion of the Rushworth Gospel Gloss, c 975, and Ormin, c 1200, have only *þ*. After 1250 the *ð* speedily became obsolete; *þ* remained in use, but was gradually restricted more or less to the pronominal and demonstrative words. In later times its MS. form approached, and at times became identical with, that of *y* (the latter being sometimes distinguished by having a dot placed over it). As the continental type used by Caxton had no *þ*, its place in print was usually supplied by *th* for both sounds and in all positions. But in Scotland, the early printers, especially in the demonstrative and pronominal words, continued the *þ* as *y*, as in *yis*, *yat*, *you* (= *thou*), a practice also common in England in MS., and hardly yet extinct. Confusion with the modern *y* consonant, ME. *ȝ*, was avoided in Scotland, sometimes by writing the latter *yh*, but usually by continuing ME. *ȝ* in the form *ȝ* or *z*, so that *ye zeir* stood for *pe zeir*, i.e. *the year*. It is remarkable that, when OE. *þ* and *ð* were both in use, no attempt was made to differentiate them as breath and voice spirants, and app. no serious attempt even to distinguish them as initial and medio-final, as was done in Norwegian when the Roman alphabet was adopted, c 1200, and in Icelandic before 1300. At an earlier date (prob.

c 800) the character *ð* was partially adopted from OE. In Old Saxon, and was used generally in the middle and end of words, while *th* was usual as the breath spirant initially.

(5) In a few compounds, as *anthill*, *outhouse*, *lighthouse*, *Chatham*, *Wytham*, *Yetholm*, etc., *t* and *h* come together but do not form a digraph; and in a few foreign words, chiefly East Indian, as *Thakoor*, *Thug*, *th* represents Skr. *थ* *th* or *ठ* *th*, the sound being a *t* or *ʈ* followed by a slight aspiration (*th*, *ʈh*), in Eng. commonly reduced to *t*.

In a few proper names and other words derived from or influenced by French, as *Thomas*, *Thompson*, *thyme*, *th* is pronounced as *t*; several other words were formerly so treated, and even spelt with *t*, e.g. *theatre*, *theme*, *theology*, *throne*, *authentic*, *orthography*: *t* has become fixed in *treacle*, *treasure*. The late L. and Romanic treatment of *th* as *t* often led to the spelling *th* where *t* was etymological, as in *Thames*, *Sathan*; in *amaranth*, *amianthus*, *author*, etc., the corruption has also affected the pronunciation. See the individual words. In some ME. MSS. *th* frequently appears for *t* or for *d*: e.g. *tho* *to*, *thyll* *till*, *myghth* *might*, *nyghth* *night*, *whythe* *white*; *thede* *deed*, *theer* *deer*, *thegree* *degree*, *thepartyth* *departed*, *tho* *do*, *thogh* *doth*, *aboth* *abode*, *groundeth* *grounded*, *iclodeth* *y-clothed*, *lowthe* *loud*, *rothe* *rood*, *unther* *under*. Early ME. scribes (prob. Norman) often confounded the English letters *p* (or *ð*) and *3*, writing e.g. *yefinge* for *pefinge*, *thieving*, *wiz*, *worz*, *wroz* for *wip*, *worp*, *wrop* (in Auchinleck MS. of *Florie and Bl.*).

(6) Etymologically, modern Eng. *th* (ð) often represents an OE. *d*, esp. before *r* or *er*, as in *father*, *mother*, *gather*, *hither*, *together*, etc.; dialectally, this sometimes extends to other words, as *bladder*, *ladder*, *solder*; on the other hand some dialects retain original *d*, and extend it to other words, as *brother*, *further*, *rather*, *southern-wood*, *whether*. In *burden* and *murder*, *d* represents the earlier *ð* of *burthen*, *murther*.

Dialectally *th* is sometimes substituted for *f*, and vice versa: e.g. *thane*, *thetch*, *thistolow*, *thraill*, *thrae*, *throm*, *thurrow*, for *fane*, *fetch* (vetch), *fistula*, *frail* (rail), *frae*, *from*, *furrow*; also *fill*, *Fuirsdag*, for *thill*, *THURSDAY*. The Welsh name *Llewelyn* appears in Eng. as *Thlewelyn* (Rolls of Parl. 1. 463/1, Edw. I or II), and *Fluellen* (Shaks. Hen. V). *Th* also occurs dialectally for *wh*, as in *thirl*, *thortleberry*, *thorl*, for *whirl*, *whortleberry*, *whorl*. Conversely, *Sc.* has *whaing*, *whang*, *white*, *whittle*, for *thwaing*, *thwang*, *thwite*, *thwittle*.

**-th, suffix<sup>1</sup>**, a formative of sbs. a. from verbs; in some words, as *bath*, *birth*, *death*, *math*, *oath*, OTeut., repr. various Indo-Eur. suffixes, as *-tos*, *-tā*, *-tis*, *-tus*, in which the *t* following the stressed syllable regularly became *þ* in Teutonic; in others, as *growth*, *tilth*, going back to ON. or OE.; in others, as *blowth*, *spilth*, *stealth*, of later analogical formation. In many words Indo-Eur. *t* remained in consequence of its position, or *þ* was subsequently changed to *t*: see -T suffix<sup>3</sup> a.

b. from adjs. (rarely sbs.), representing Indo-Eur. *-itā*, OTeut. *-ipō*, Goth. *-ipa*, OE. *-pu*, *-po*, *-þ*, with prec. *i-* implaut, forming abstract nouns of state: as *filth* (OE. *fýlp*, OS. *fūliþa* from *fúl* foul), *health*, *length*, *mirth*, *strength*, *truth*; in ME. and also in cognate langs., *dearth*, *depth*; of

later analogical formation, *breadth*, *sloth* (cf. OE. *slāwþ*), *wealth*. In some words of this group, *þ* has, by phonetic causes, become *t*, e.g. OE. *hiehpū*, ME. *heizpe*, now *height*, ON. *slægð*, ME. *sliezpe*, now *sleight*: see -T suffix<sup>3</sup> b.

**-th, suffix<sup>2</sup>**, forming ordinal numbers; in modern literary Eng. used with all simple numbers from *fourth* onward; representing OE. *-þa*, *-pe*, or *-oða*, *-oðe*, used with all ordinals except *fifta*, *sixta*, *ellefta*, *twelfta*, which had the ending *-ta*, *-te*; in Sc., north. Eng., and many midland dialects the latter, in form *-t*, is used with all simple numerals after *third* (*fourt*, *fift*, *sixt*, *sevent*, *tent*, *hundert*, etc.). In Kentish and O. Northumbrian those from *seventh* to *tenth* had formerly the ending *-da*, *-de*. All these variations, *-th*, *-t*, *-d*, represent an original Indo-Eur. *-tos* (cf. Gr. *πέμπ-τος*, L. *quin-tus*), understood to be identical with one of the suffixes of the superlative degree. In OE. *fifta*, *sixta*, the original *t* was retained, being protected by the preceding consonant; the *-pa* and *-da* were due to the position of the stress accent, according to Verner's Law.

The ordinals from *twentieth* to *ninetieth* have *-eth*, OE. *-oða*, *-oðe*. In compound numerals *-th* is added only to the last, as *1345*, the one thousand three hundred and forty-fifth part; in his one-and-twentieth year.

[1704 J. HARRIS *Lex. Techn.* I, *Thalami Nervorum Opticorum*, are two Prominences of the lateral Ventricles of the Cerebrum; so call'd, because the Optick Nerves rise out of them.] 1756 *Gentl. Anat.* 501 The two optic thalami, in their anterior two-thirds, lie close together on either side of a deep mesial cleft, which receives the name of the third ventricle of the brain. 1947 *Sci. News* IV. 112 There is an anatomically distinct region, the thalamus, deep in the brain-stem which has something to do with the perception of pain and other sensations and the judgment of their quality. 1948 A. BRODAL *Neurol. Anat.* vi. 157 It appears . . that the thalamus is not only an important relay station in the large afferent sensory fibre systems and the optic and acoustic systems, but in addition extensive parts of it . . also discharge their impulses to the cerebral cortex. 1979 *Sci. Amer.* Sept. 85/2 The rest of the forebrain is the diencephalon: the upper two-thirds comprises the thalamus (which has numerous subdivisions) and the lower third the hypothalamus.

2. *Bot. a.* The receptacle of a flower, on which the carpels are placed; the torus. b. See *quot.* 1842.

A hereditary hæmolytic anæmia common in malarious (or formerly malarious) areas and caused by the faulty synthesis of part of the hæmoglobin molecule, with symptoms that depend on the part of the molecule affected and on whether the individual is homozygous or heterozygous for the gene concerned; so **thalassæmia major**, **intermedia**, **minor**.

1932 WHIPPLE & BRADFORD in *Amer. Jrnl. Dis. Children* XLIV. 364 We do not like the term 'erythroblastic anæmia'. . . The disease is limited almost wholly to Italians, Greeks and Syrians, i.e., to the people originating about the Mediterranean Sea. Internal Med.* LXXIV. 196/2 It is suggested, on the basis of the pathologic and genetic evidence, that the full-blown disease be designated 'thalassæmia major' and the milder carrier state 'thalassæmia minor'. 1954 K. SINGER et al. in *Blood* IX. 1039 We have found the following simple classification very useful; it is based on the alterations of the red cell and hemoglobin levels: 1. Thalassæmia major (Cooley's anæmia): very severe microcytic hemolytic anæmia. 2. Thalassæmia intermedia, characterized by a less severe, but still marked anæmia. 3. Thalassæmia minor: mild anæmia. 1962 [see **HAEMOGLOBINOPATHY**]. 1972 D. E. COMINGS in W. J. Williams et al. *Hematology* xxxi. 332/2 Although the total number of individuals with thalassæmia intermedia is relatively small . . , it constitutes a clinically important group, since its relatively benign course (compared to thalassæmia major) allows affected individuals to live to adulthood. 1973 B. **than** (ðən; as a separate word called ðæn), *conj.* Forms: *a.* 1-3 ð-, þonne, (1 ðone, ðon); *β.* 1 ðanne, þanne, 1-4 þanne, 3 þæne, 3-4 þane, 4-5 þanne; *γ.* 2-5 þenne, 2-3 þene, (3 þeone), 3-5 þen, (5 thenne, 7 yen), 4-8 then; *δ.* 1 than, 2-6 þan, 3 (Orm.) þann, (4 þain), 4- then (abbrev. 7-8 y<sup>n</sup>, yn); *ε.* 5 an, 9 *dial.* 'n. [OE. *panne*, *ponne*, *þenne*, also *pan*, *pon*; originally the same word as *THEN* (OE. *panne*, *ponne*, *þenne*), the *adv.* of time. Its employment as the connective particle after a comparative (= L. *quam*, F. *que*) is a pre-English development, existing already in WGer.: cf. OHG. *thanne*, *danne*, MHG. *danne*, *denne*, Ger. *denn* (now largely supplanted by *als*), OS. *than*, MDu. *danne*, *dan*, Du. *dan*, all used after the comparative. (Not so in Gothic or Scandinavian.)

How the conjunctive use arose out of the *adv.* of time is obscure. Some would explain it directly from the demonstrative sense 'then', taking 'John is more skilful than his brother' as = 'John is more skilful; then (= after that) his brother'. Others derive it from the relative or conjunctive use of OE. *ponne* (THEN 6), = 'When, when as', thus 'When as (whereas) his brother is skilful, John is more (so)'. The analogy of L. *quam* favours a relative sense.

When interrogative or demonstrative words became conjunctive or relative they lost their stress and were liable to weakening. Already in the 8th c. OE. *panne* appears as *ðan*, *þan*, *than*, a form exemplified in nearly every century since, though down to c. 1500 the fuller contemporary forms of the demonstrative *adv.* *panne*, *þenne*, *þane*, *þene*, etc., were also in use. When the *adv.* was reduced to *þen*, from the 15th c. spelt *then*, there was a strong tendency to spell the conjunction in the same way, which during the 16th c. nearly triumphed; but in the 17th c. the tide turned, and by 1700 or a little later the conjunction was differentiated from the *adv.* as *than*. As the latter was, and is, pronounced (ðən), it is manifest that it might be written either *then* or *than* with equal approximation to the actual sound.]

1. *a.* The conjunctive particle used after a comparative adjective or adverb (and sometimes after other words: see 2-4) to introduce the second member of the comparison; the conjunction expressing the comparative of inequality (cf. AS 3). In use it is always stressless, usually joined accentually to the prec. word, e.g. *more than*, *less than*, *other than* ('mōððæn, 'lesððæn, 'aðaððæn)).

The two members of the comparison are most commonly of the same grammatical form, e.g. two clauses (the latter of which may be contracted in various ways, two substantives, two pronouns, two infinitives, two adjectives, two adverbs, etc., but not invariably so: see the quotes. (Two infinitives connected by *than* in mod. Eng. either both have to or are both without it; formerly (until c. 1800), esp. after *had* rather, *had* better, the second infinitive often had to when the first was without it.)

Instead of *than* after a comparative, *as* (like Ger. *als*) is common in Scotland, the north of England, and in parts of Ireland and the United States; *nor* (*nar*, *ner*) appears to be dialectal everywhere from Shetland to Hampshire and Cornwall, as well as in Ireland and America (see E.D.D.), but seems never to have been literary except in Sc., where also *na* was formerly used. In Sc. the relation is sometimes expressed by *be* (= by) as 'this field is bigger be that' (Jamieson s.v. BE).

*c.* Followed by *that*, or by *infin.* expressing a hypothetical result or consequence.

The modern idiom would often substitute *too* with the positive followed by the infinitive, for the comparative with *than*: e.g. in quot. 1611 'the bed is too short for a man to stretch himself'; in quot. 1693 'he is too modest to deny it'. Examples occur of a confusion of the two constructions, as 'too wise than that' or 'than to be'.

But *thain* was in 15-16th c. Sc. written *thane* (in L. *thanus*), and this form, being used by Boece, Holinshed, and Shakespeare (in *Macbeth*), was adopted by Selden, Spelman, and the legal antiquaries and historians of the 17th c. to represent the Anglo-Saxon *þegn*, and became the usual form in Eng. history. Recent historians, as Stubbs, Freeman, and Green, in order to distinguish the Anglo-Saxon use from the Sc. in sense 4, have revived the OE. *þegn* as THEGN, q.v.]

†3. Kindly thought or feeling entertained towards any one for favour or services received; grateful thought, gratitude. Rarely in *pl.* *Obs.*

The sense of 'gratitude, kindly or loving feeling for favour or benefit' must have been developed between that of 'good will, good feeling' generally, and that of 'the expression of gratitude'. But the feeling passes so naturally into its expression that it is not easy to separate them in the quotations, except by the accompanying verbs: to express one's thanks, and the archaic to con thanks, ought to mean to express one's feelings of gratitude; but to give, offer, return or receive thanks, ought to mean to give or receive the expression of gratitude; so to have thanks, but this is less clear. In many instances it is impossible to say which is meant; some of the examples given here may belong to 4.

The original plural in both uses was *þā*, in ME. *þā* and *tho*, q.v., surviving in Sc. and north. *dial.* as *thae*, but superseded in literary English by THOSE.

The demonstrative was also used in OE. as a relative pronoun, for which see below.]

A. Illustration of Forms.

1. In OE. inflected for gender, number, and case: see the inflexional forms under THE. Some of the inflexions remained in early ME., and in some dialects even to 1400. A few examples of these, in which the sense is demonstrative, follow here. For the plural forms see *tho* and *THOSE*.

B. Signification and uses.

The pronominal use goes back to the earliest OE. The adjectival demonstrative use in OE. corresponded to that of *L. is, ea, id*, or the unqualified French *ce, cette*, and is often indistinguishable from that of the modern definite article. But by 1200 the adjectival use of *that* began also to be more definitely demonstrative (= *L. iste, ille, F. ce. . . là*), and to be implicitly or explicitly opposed to *THIS* (= *L. hic, F. ce. . . ci*). As this appears first in Ormin, it may have been due to the influence of Norse, in which the adjectival use of *þat* as a demonstrative, opposed to *þetta* 'this', is of earlier appearance.

I. Demonstrative Pronoun. Pl. †*tho* (*obs.*), *THOSE*, q.v.

\* *As simple demonstrative pronoun.*

1. Denoting a thing or person pointed out or present, or that has just been mentioned: cf. II. 1.

a. a thing (concrete or abstract).

Often serving instead of repetition of the name of the thing, and directing the attention back to it (thus more emphatic than *it*). Also, for emphasis, used pleonastically in apposition to the sb.; also, in mod. use, as in quot. 1880, placed (as subj.) after the predicate sb., with ellipsis of the copula. In quot. 1905, applied to a person contemptuously spoken of as a thing or creature.

b. a person. Now noting a person actually pointed out (not one just mentioned, exc. in emphatic pleonastic use as in a). Chiefly as subject of the verb *to be* in stating or asking who or what *that* (person) is. (See also 6 c.)

Colloquially used in expressions of commendation, or in mod. use of anticipatory commendation by way of persuasion or encouragement (esp. to a child). Cf. *THERE adv.* 3 b.

\*\* *As antecedent pronoun.*  
(= F. *celui*, Ger. *der, derjenige*.)

6. As antecedent to a relative (pron. or adv.) expressed or understood.

Here, and in 7 and 8 usually (as in II. 3) definitive rather than demonstrative, the relative clause (or dependent phrase) serving to complete the definition.

a. Of a thing, in general sense: *that that*, *that which* = the thing which, what; so *that whereby*, *wherein*, *wherewith*, *whence*, etc.

Sometimes following the relative clause, which then begins with *what*: *that* being in this case now pleonastic and emphatic.

7. With ellipsis of a following relative (subj. or obj. of the relative clause): = that person or thing (*sc.* 'that' or 'which'). Now only where *that* is definitely demonstrative or emphatic, as in 1.

In earlier use the antecedent pronoun was omitted: see *that rel. pron.* 3. From the 16th c. onwards there are examples in which it is difficult to say whether the single *that* is the antecedent or the relative. Wherever it is emphatic it may be considered the demonstrative. Cf. also *that rel. pron.* 3 and 10.

a. Referring to something just mentioned, and equivalent to *the* with the sb., or *the one*. (Cf. 6b.)

## II. Demonstrative Adjective. Pl. as in I.

1. a. The simple demonstrative used (as adjective in concord with a sb.), to indicate a thing or person either as being actually pointed out or present, or as having just been mentioned and being thus mentally pointed out. (Now distinguished from the definite article *THE* as being *demonstrative*, i.e. pointing out, and not merely *definitive*, i.e. distinguishing or singling out.)

The use before a possessive, as in quot. 1551, is *obs.* or *arch.*, the periphrasis with *of* (see OF 44) being now substituted for the possessive.

In *Sc.* also referring to something mentioned immediately after, where *mod. Eng.* uses *this*. Cf. I. 1c, and THIS B. II. 1b.

**that** (ðæt), *relative pron.* Forms: see below. [An unstressed and phonetically weakened form of THAT *dem. pron.*, used to subordinate one predication to another.

The Common Indo-Eur. had no relative pronoun, which has been developed separately in the different linguistic families. In Latin it was evolved out of the interrogative, in Teutonic chiefly out of the demonstrative. But even within the Teutonic languages the relative is differently formed (see Wright *Gothic Grammar* §270, *Old Eng. Grammar* §468). In *mod. English* it is expressed by *that*, from the demonstrative pron., and by *who* (*whom*), *which*, *what* (after L. *qui*, *quæ*, *quod*, F. *qui*, *que*, *quel*) from the interrogative pronouns. In northern dialect, ME. and *mod.*, it is commonly expressed by *AT*, 'at', rel. pron. In OE. it was expressed (1) by the simple demonstrative *se*, *sēo*, *þæt*; (2) by the particle *þe*; (3) by *þe* preceded by a personal pronoun or the demonstrative. For *þe*, see THE *conjunctive particle*. The use of the demonstrative as a relative appears to have come about simply by the subordination of the second of two originally consecutive sentences to the first; thus, 'he came to a river; that (or this) was broad and deep', whence 'he came to a river that was broad and deep'. In OE. it is sometimes impossible to determine whether the pronoun of the second clause is still demonstrative or has become relative. Thus the words in the OE. version of *Bæda's History*, i. xii. (1890) 52 'Hi wæron Wihtgylses suna . þæs fæder wæs Witta haten . þæs fæder wæs Wihta haten . and þæs Wihta fæder wæs Woden nemned', might be read either as short consecutive sentences, 'They were sons of Wihtgyls; his father [lit. *that's* father] was called Witta; his father was called Wihta; and this Wihta's father was named Woden'; or 'They were sons of Wihtgyls whose father was called Witta, whose father was called Wihta, and whose (Wihta's) father was named Woden'. Bæda's Latin has *cujus* in all three places, so that the translator apparently used *þæs* as a relative. See also Wülfing *Syntax Alfreds des Grossen* i. §275. Now, and for a long time past, the relative that has been stressless, and consequently with obscure vowel; but this unstressing and obscuration came gradually, and was never represented in writing, so that in the written forms there is nothing to distinguish the relative from the demonstrative.]

A. Examples of early inflexional forms.

(The inflexional forms were, to begin with, those of the *dem. pron.* and definite article (see *prec.* and THE); but, as relative, *that* is now invariable for gender, case, and number.)

## B. Signification.

The general relative pronoun, referring to any antecedent, and used without inflexion irrespective of gender, number, and case.

I. 1. a. Introducing a clause defining or restricting the antecedent, and thus completing its sense. (The ordinary use: referring to persons or things.)

Sometimes replaceable by *who* (of persons) or *which* (of things), but properly only in cases where no ambiguity results: cf. 2, and see *WHO*, *WHICH*, *rel.* (For ellipsis of *that*, see 10.)

E. PASCOE *Lond. of To-day* xxx. (ed. 3) 269 The Westminster Hall that we now see... is the building of Richard II's time.

b. As obj. of a preposition, which in this case stands at the end of the relative clause (in OE. and ME. sometimes immediately before the verb): e.g. *the cup that I shall drink of* = the cup of which I shall drink; ME. *these that I have of told* = these of which I have told.

(When *whom* or *which* is substituted for *that*, the prep. precedes the relative.)

2. Introducing a clause stating something additional about the antecedent (the sense of the principal clause being complete without the relative clause). Now only *poet.* or *rhet.*, the ordinary equivalents being *who* (obj. *whom*) of persons, and *which* of things.

But the relative clause is often merely descriptive, stating an attribute of the antecedent; or it may give the reason or a reason of the main statement, and thus be closely connected with it; the use in these cases approaches that in 1. There are thus many cases in which modern use allows either *that* or *who*, *which*, and in which poets prefer *that*. (*That* as in quot. *c1450* is now impossible.)

8. Connecting two clauses loosely or anacoluthically, the relative or dependent clause being imperfect (the part omitted being suggested by the principal clause); giving the effect of the ordinary rel. pron. with ellipsis of a preposition, an infinitive, etc.: cf. 7. (Now considered slipshod.)

9. *That* followed by a poss. pron. corresponding to the antecedent (e.g. *you that your, the man that his*, OE. *þe his*, the particle 3d) is an ancient mode of expressing the genitive of the relative = *whose*.

(The same idiom is used in many langs., e.g. Celtic, Semitic, etc.). Still common dialectally.

II* (1814) II. 45/2 Item, it is ordanet... at ilk man þat his gudis extendis to xx<sup>ij</sup> merckis be bodyn at þe lest w<sup>t</sup>... a suerde and a buclare, a bow and a schair of arrowis. **1470-85** MALORY *Arthur* viii. xxxv. 327 There came a man that sire Tristram afore hand had slayne his broder. **1523** FITZHERB. *Husb.* § 148 That man that thy horse hath eten his corne or grasse wyll be greued at the. **1602** *Ld. 'the wumman at ye ken hyr sun.']

¶ 10. The relative is very frequently omitted by ellipsis, esp. in senses 1, 1 b (chiefly as obj. or pred., less freq. and now only in certain connexions as subj.); also in sense 7.

This (one of the commonest idioms in colloquial English, and largely found in the literary language) prob. began with the relative *þe*, THE. Cf. also *conj.* 10.

I. 1. a. Introducing a dependent substantive-clause, as subject, object, or other element of the principal clause, or as complement of a sb. or adj., or in apposition with a sb. therein.

The dependent clause as subject is most commonly placed after the verb and introduced by a preceding *it*, e.g. 'it is certain that he was there' = 'that he was there, is certain': see IT 4 b. As object, it usually follows, e.g. 'I have heard that he was there'. (For ellipsis of *that*, see 10.)

[This use of *that* is generally held to have arisen out of the dem. pron. pointing to the clause which it introduces. Cf. (1) He once lived here: we all know *that*; (2) *That* (now this) we all know: he once lived here; (3) We all know *that* (or *this*): he once lived here; (4) We all know *that* he once lived

here; (5) We all know he once lived here. In 1, 2, 3 *that* is a demonstrative pronoun in apposition to the statement 'he once lived here'; in 4 it has sunk into a conjunctive particle, and (like the relative pronoun) has become stressless; in 5 it has disappeared, and 'he once lived here' appears as the direct object of 'we know'. After *aware*, *certain*, *conscious*, *suspicious*, *assured*, *informed*, *persuaded*, etc., or of some other prep. seems understood before *that*: 'I am certain of that: he once lived here'. But 'I am certain that' may have arisen as another way of saying 'I know that'; and so of the other expressions.]

But in OHG., OS. (in most dialects), and in late OE. After the middle of the 13th c. the *s-* forms are no longer found, exc. as a belated survival (*ze m., zy f.*) in the Kentish dial. of the Aenbite (1340). The only surviving reprs. of the OE. forms are *the* and *that*, Du. and LG. *de, dat*; but while LG. *dat* (besides its other uses) is still the neuter article, the Eng. *that* has ceased to be any part of the article. In the following illustration of Forms all the inflexions are illustrated, but the special history of *pæt* and *pá* pl. will be found under **THAT, THO**.

(The nom. fem. *sio, seo* corresponds in form not to Goth. *sô*, ON. *sú*, I.-Eur. *\*sâ*, but to OS., OHG. *siu* 'she'. Some identify it with Skr. *syâ* fem. of the 'extended' demonstrative *syā, syā, tyat*; others regard it as a special WGer. formation related to Goth. *si* 'she'.)]

A particularizing *adj.* often becomes a permanent epithet, as in *the Black Prince*, *the Lesser Bear*, *the Red Campion*, *the Great Exhibition*, *the Green Park*, *the Yellow Sea*, *the Count or County Palatine*, *the Prince Imperial*; the *adj.* and sb. may then be treated as name of a unique object, as in 3.

It proclaims not a conception of God, but a manifestation of God. 1875 LIGHTFOOT *Comm. Col.* (ed. 2) 119 The monotheism of the Old Testament is supplemented by the theanthropism of the New.

The taking of some payment from a thief to secure him from legal prosecution; either the receiving back by the owner of the stolen goods or of some compensation, or the taking of a bribe by a person who ought to have brought the thief to justice.

Nichols (1865) in *Britton*, in note to quot. 1292, suggests that the word 'originally signified the legal *bote* or composition for theft', and was then 'applied to the illegal compounding of theft, or taking money to maintain or connive at such offenders'. But all our quotations refer to illegal payment, a form of compounding a felony.

**thegither**, *Sc. f.* TOGETHER.

**thegn** (θein). *Hist.* A form used by some recent historians to represent the OE. *þegn* (*þegen*, *pén*), THANE<sup>1</sup>, in its sense of tenant by military service, and as a term of rank below the *ealdorman* or *eorl* and above the *ceorl*, corresponding in its various grades to the post-conquest *baron* and *knight*.

The purpose of this spelling is to distinguish the Anglo-Saxon from the Scottish use of THANE<sup>1</sup> (sense 4), made familiar by Shakespeare.

1848 LYTTON *Harold* I. i, A Thegn forfeited his rank if he lost his lands. 1867 FREEMAN *Norm. Cong.* I. vi. 428 note, The signatures are no doubt those of local Thegns. 1874 STUBBS *Const. Hist.* I. vi. 155 Closely connected with the *gesith* is the *thegn*... The thegn seems to be primarily the warrior *gesith*; in this idea Alfred uses the word as translating the *miles* of Bede. But he also appears as a landowner. *Ibid.* 156 The name of thegn covers the whole class which after the Conquest appears under the name of knights, with the same qualification in land and nearly the same obligations. 1890 GROSS *Gild Merch.* I. 185 The merchant who made three voyages across the ocean at his own cost became a thegn.

Hence 'thegn-born a., of noble or gentle birth. 'thegnndom, the position or rank of thegn. 'thegnhood, the condition or position of a thegn; the order of thegns, thegns collectively. 'thegn-land, land held by a thegn. 'thegnly, a. and *adv.* [OE. *þegnlic*, -lice], (a) *adj.* of or pertaining to, or becoming a thegn; (b) *adv.* in a manner becoming a thegn. 'thegn-right, the legal rights and privileges of a thegn. 'thegn-ship [OE. *þegnscipe*], the office, function, or position of a thegn (in various senses). 'thegn-wer [OE. *þegnwer*], the wer-gild of a thegn. 'thegn-worthy a.: see quot.

**them** (ðem, ðəm), *pers. pron.* Forms: see below. [Three types are found in ME. *a.* þe33m, þeym, *a.* ON. *þeim* 'to those', 'to them', dat. pl. of the demonst. *sá, sú, þat*, the plural of which also supplies that of the 3rd pers. pron. (see THEY). This came down to the 16th c. in Eng. in the form *theim*, and still exists in north. dial. and in Sc. as *thaim*. *β.* Northern Eng. *þam*, app. bef. 1300; this appears to represent þæm, þām, dat. pl. of OE. *se, séo, þæt*, pl. *þá* (see THAT, THO), found already as accus. in the Rushworth Gospels, where Lindisf. has *hía*, *Ags. Gosp.* *híg*, *Hatton hyo*, all in the sense 'them'. This came down in Sc. as *thame* to 16th c. *γ.* The existing form *them*, found in R. Brunne *c* 1330. This may have originated as an unstressed form (ðəm) of *þeim* or (?) *þam*, or it may actually have represented the OE. Anglian þæm of the Rushworth Gospels.

Although the form from Norse is not known before Ormin, it must have been current in the Danelaw much earlier, since it was only dative in Norse, and must have been taken into OE. as dative, and have shared in the peculiar English change by which the accusative and dative of the pronouns were levelled under the dative form. In the singular *hine, him*, instances of this change are seen in the Rushworth Gospel Gloss *c* 975 (see HIM 1d); and it is noteworthy that the same Gloss shows the use of þæm as acc., = *hía, híg, hyo*, as mentioned above. This use of þæm as pers. pron. may itself have been due to Norse influence, the OE. word being used in the same sense as the Norse *þeim*.

The commoner pron. of 3rd pers. pl. obj. (dat. and acc.) in OE. and ME. was HEM, surviving colloq. and dial. as 'em.]

d. *Philately.* Applied to the collecting of stamps with designs which relate to the same subject, or to such a collection.

1951 R. J. SUTTON *Stamp Collector's Encycl.* 231 Thematic Collecting: Collecting to a theme or subject. 1965 E. H. 3. *Gram.* Of or pertaining to the theme or stem-form of a word: see THEME 5. Hence, of verb-forms: having a connecting vowel between the verb-stem and the suffixes or inflections.

*thematic vowel*, a vowel which comes between the root and the inflexions in a verb or sb., as the *e* and *o* in *φέρ-ο-μεν*, *φέρ-ε-τε*, the *i*, *e*, and *a* in OE. *ber-i-p*, *ber-e-p*, *luf-a-ð*.

1861 GOLDSTÜCKER *Pānini* 257 There must be reasons for this variety of thematic forms which constitute the declension of the same base. 1877 PAPILLON *Man. Comp. Philol.* viii. (ed. 2) 167 Curtius... explains the vowel in question as a 'thematic vowel', i.e. a suffix to or increase of the stem or 'theme' previous to the reception of the inflections. 1887 COOK *Sievers' O.E. 1891 in *Cent. Dict.*

2. *Gram.* A thematic verb-form.

1968 *Language* XLIV. 717 The conventional view of the distribution of athematics and thematics seems to be that both types existed even in quite early Proto-Indo-European.

3. *Philately.* A collection of stamps with designs which relate to the same subject.

1972 *Police Rev.* 1 Dec. 1572/3 It was known as United Kingdom Thematics 1972, open to thematic entries from anywhere. 1979 *West Lancs. Even. Gaz.* 6 Apr. 18 (Advt.), Stamp collectors world-wide approvals and thematics.

4. *pl. const.* as *sing.* A body of subjects or topics of discussion or study.

Lacan's Écrits* v. 149 The thematics of this science is henceforth suspended, in effect at the primordial position of the signifier and the signified. 1980 *Encounter* May 34/2 Even if Dr Henry Kissinger's picture of a world of 'multi-polarity' is more a neo-Bismarckian fiction than a reality, the confrontation of two Super-powers describes neither the thematics nor the structure of world politics today.

So the'matical a. = thematic; the'matically *adv.*, in a thematic manner; with respect to a theme or themes; † 'thematism *Obs. nonce-wd.* [ad. Gr. *θεματισμός* a laying down], a placing, arrangement; 'thematist, one who composes or writes themes (Ogilvie, 1882).

1890 *Athenæum* 3 May 579/1 The 'thematical material in the four movements of the work is... interesting, and... the music is pleasantly unconventional. *Ibid.* 25 Jan. 125/2 Structurally as well as 'thematically we note a welcome advance towards clearness. 1929 SHELVOCKE *Artillery* v. 334 The first then shall be the 'Thematism (from the Greek Word *θεματισμός*) which signifies the Decorum and Gracefulness of any Pile.

**thematization** ('θi:mətaɪzən). [f. THEMATIZE v. + -ATION.] 1. The action of THEMATIZE v. 2.

1955 T. BURROW *Sanskrit Lang.* iv. 153 This tendency to thematisation had already been operating in the prehistoric period. 1972 *Language* XLVIII. 399 The thematization process... is triggered by violations of canons of permissible plus and minus values of pronominal features for non-ergator and indirect object. 1977 *Ibid.* LIII. 50 Thus the form \**somos* can be regarded as a partial thematization of the copula.

2. The action of THEMATIZE v. 1.

1959 J. FIRBAS in *Brno Studies in English* I. 52 Whereas only two elements [*the girl and broke*] of the three in *The girl broke a vase* allow of thematization, any of the three

elements occurring in *The girl broke the vase* can be thematized. 1969 K. H. WAGNER *Generative Grammatical Studies in Old Eng. Lang.* i. 50 In the abstract structure *Th* and *Rh* are empty places, i.e. they will not be expanded by subsequent rules. These places will be filled with constituents from the nucleus by transformation rules which may be termed rules of *thematization* and *rhematization*, respectively. 1977 J. LYONS *Semantics* II. xii. 507 It is certainly true that the processes that different languages make available for the thematization of one expression rather than another frequently involve putting the expression earlier rather than later in the utterance.

**thematize** (θi:mətaɪz), *v.* *Linguistics.* [f. Gr. θεματ-, stem of θέμα *THEME sb.* + -IZE.]

1. *trans.* To convert (part of a sentence) into a theme: see *THEME sb.* 1 d.

1959 J. FIRBAS in *Brno Studies in English* I. 43 When thematic elements occur in basically transitional or basically thematic positions, they communicatively weaken them, or so to speak, 'dedynamize', 'thematize' them. 1969 [see RHEMATIZE *v.*] 1976 *Archivum Linguisticum* VII. 145 The following functional constituents (derived from the mood system) may be thematized by fronting them.

2. To modify (a verb-form) by the addition of a thematic vowel: see *THEMATIC a.* 3.

1966 E. P. HAMP in Birnbaum & Puhvel *Indo-Europ. Dial.* 115 \*ghē(s)r-om, thematized from \*ghēsr. 1977 *Language* LIII. 50 In addition, Isg. \*esmi was thematized. Hence 'thematized' ppl. *a.*

1972 *Language* XLVIII. 402 We would expect \*n-mi- at the beginning of the relationship terms; instead we get the thematized form, a transitive construction. 1976 *Ibid.* LII. 68 Kuno proposes... that the deep structure of every relative clause in Japanese contains a thematized sentence.

**theodolite** (θi:'bdəlaɪt). Forms: 6-7 theodelitus, 7 theodelite, -dolit, -dilit, 8 -dolet, 7- theodolite. [Origin unknown: see Note below.]

A portable surveying instrument, originally for measuring horizontal angles, and consisting essentially of a planisphere or horizontal graduated circular plate, with an alidad or index bearing sights; subsequently variously elaborated with a telescope instead of sights, a compass, level, vernier, micrometer, and other accessories, and now often with the addition of a vertical circle or arc for the measurement of angles of altitude or depression.

The original *theodelitus* of Digges was for horizontal angles only, and many quots. down to 19th c. use the name in this sense; Digges also describes a compound instrument having also a vertical semicircle for taking altitudes, but he calls that his *topographical instrument*, restricting the name *theodelitus* to the horizontal circle.

1571 *DIGGES Pantom.* I. xvii. Hiiij, The composition of the instrument called Theodelitus. It is but a circle diuied in 360... degrees, or a semicircle parted in 180 portions, and euery of those diuisions in 3 or rather 6 smaller partes... The index of that instrument with the sightes &c. are not vnlike to that whiche the square hath: In his backe prepare a vice or scrue to be fastned in the top of some staffe. *Ibid.* I. ij, [In the figure] GEFO [is] Theodelitus, GF his Alhidada or index with sightes. *Ibid.* xxix. HOPTON Speculum Topogr.* vi. 27 The Theodelitus is an instrument consisting of a Planisphere and an Alhidada. *Ibid.* Table D d 2 b, To take a plat at one station by the Theodelite. 1669 *STURMY Mariner's Mag.* II. 46 Any Instrument, as the Plain Table, the Theodolit or Circumferenter. 1701 *MOXON Math. Instr.* 20 Theodolet, a whole Circle made of Brass, containing 360 degrees, diagonally or otherwise diuided, with an Index and sights moving on the Center, and a box and Needle in the middle. 1790 *ROY in Phil. Trans.* LXXX. 136 It is a brass circle, three feet in diameter, and may be called a great theodolet, rendered extremely perfect. 1833 *HERSCHEL Astron.* ii. § 155 The zenith sector and the theodolite are peculiar modifications of the altitude and azimuth instrument. 1842 *Penny Cycl.* XXIV. 314/2 Theodolet, or Theodolite... the name generally given to the instrument used for measuring horizontal angles. [*Ibid.* 315/2 The problem is to measure the horizontal angle between two objects. *Ibid.* 316/2 If the vertical angles are to be measured as accurately as the horizontal angles, the instrument becomes an altitude and azimuth circle.] [Cf. ALTAZIMUTH.]

b. *attrib.*, as theodolite-goniometer, a goniometer with horizontal and vertical graduated circles; theodolite-magnetometer, an instrument for measuring magnetic declination, and for observations of magnetic force; theodolite-needle, the needle of the compass of a theodolite.

Hence theodolitic *a.*, of, pertaining to, done or made with a theodolite (Webster 1864).

[*Note.* The name, alike in the Latinized form *theodelitus* and the vernacular *theodelite* (subseq. -dolite), originated in England, and is not known in French and German until the 19th c. Its first user, and probable inventor, L. or T. Digges, has left no account of its composition, as to which various futile conjectures, incompatible with its early history and use, have been offered; such is the notion that it arose in some way out of *alhidada* or its corruption *athelida* occurring in Bourne's *Treasure for Travaillers* 1578, which an examination of the works of Digges and Bourne, where both words occur in their proper senses, shows to be absurd. *Theodelite* has the look of a formation from Greek; can it have been (like many modern names of inventions) an unscholarly formation from *θεόωμαι* 'I view' or *θεῶν* 'behold' and *δῆλος* 'visible, clear, manifest', with a meaningless termination?]

[Note. Gr. θεολογία meant 'an account of the gods, or of God (whether legendary or philosophical)'. Varro, following the Stoics, distinguished three kinds of *theologia*, mythical, natural (rational), and civil, the last being the knowledge of the due rites and ceremonies of religion. This threefold division is referred to also by Tertullian and St.

Augustine. In Christian Greek, the vb. θεολογέω was used = 'to speak of as God, to attribute deity to', whence θεολογία had the specific sense of 'the ascription of a divine nature to Christ', in contrast to οἰκονομία, the doctrine of his incarnation and human nature. Another patristic Gr. use, arising out of the primary sense, was 'the account of God, or record of God's ways, as given in the Bible', whence the late Gr. and med.L. use of *theologia* for the Scriptures themselves. In the 12th c. (1121-40) Abelard applied the term to a philosophical treatment of the doctrines of the Christian religion, which, though at first strongly condemned, became current, and, in this sense, 'theologia' came to designate a department of academic study, the text-books of which were the Bible and the Sentences (from the Fathers) of Peter Lombard. Hence the earliest Eng. use. (The passage from Gower in sense 3 is derived ultimately from Aristotle's division of the theoretic forms of philosophy into μαθηματική, φυσική, θεολογική, the last being what we should call metaphysics, which included his doctrine of the divine nature.)]

The word was revived early in the 17th c. in Latin and vernacular forms, to denote a kind of speculation, such as is found in the Jewish Cabbala and is illustrated by the writings of Cornelius Agrippa (1486-1535), Paracelsus, Robert Fludd, and others, which sought, usually by the doctrine of the macrocosm and microcosm, to derive from the knowledge of God contained in sacred books, or traditions mystically interpreted, a profounder knowledge and control of nature than could be obtained by the methods of the Aristotelian or other current philosophy. The name *theosophy* was often applied specifically to the system of Jacob Boehme (1575-1624), which, though not claiming to the same degree traditional authority, was largely expressed in language borrowed from writers of the school in question. The word has then and since been applied to more ancient and more recent views having more or less affinity to those already mentioned.

1. Any system of speculation which bases the knowledge of nature upon that of the divine nature: often with reference to such authors as those above mentioned, and more particularly to Boehme.

2. Applied to a system of recent origin, resembling the above in its claim to a knowledge of nature profounder than is obtained from empirical science, and contained in an esoteric tradition of which the doctrines of the various historical religions are held to be only the exoteric expression. Sometimes called Esoteric Buddhism. See *Theosophical Society*, under THEOSOPHICAL b.

**1881** SINNETT *Occult World* 172 They have shown that Theosophy, or Occult Philosophy, is no new candidate for the world's attention, but is really a restatement of principles which have been recognized from the very infancy of mankind. **1884** *Chr. Used unemphatically to introduce a sentence or clause in which, for the sake of emphasis or preparing the hearer, the verb comes before its subject, as *there comes a time when*, etc., *there was heard a rumbling noise*. In interrogative sentences *there* comes between the verb and subject, as *Breathes there the man*, etc.?, or follows the first word of a compound verb, as *Does there breathe a man?*, *Shall there be any notice taken of it?* The same order was formerly observed after an introductory adv. or clause, as *Then came there a voice*, *Soon shall there arise a prophet*.

Grammatically, there is no difference between *There comes the train!* and *There comes a time when*, etc.; but, while in the former *there* is demonstrative and stressed, in the latter it has been reduced to a mere anticipative element occupying the place of the subject which comes later. Preceding or following a main verb, or following any verb,

*there*, thus used, is stressless (proclitic or enclitic: e.g. *there-came*, 'breathes-there', 'is-there', 'will-there'), but preceding *be* or an auxiliary, *there* has a slight stress, and the verb is enclitic (e.g. 'there-is', 'there-was', 'there-will').
