VII. Comb. The adverb *well* is extensively employed in combination with various parts of the verb, esp. the past and present participles, and in parasynthetic adjectives ending in *-ed*. In modern practice the latter are regularly hyphenated. In attributive use the participial formations are properly hyphenated, and the hyphen is also frequently employed even when the construction is predicative. On account of the large number of such combinations, all those of any standing (either by common or continued use, or in virtue of their source) are treated as main words, the less important or less common being printed in smaller type without definition, after the model of similar words in UN-. The normal insertion or omission of the hyphen, according to the construction of the word in the sentence, is indicated by printing it within parentheses, as *well(-)baked*.

In the following enumeration of the different types of combinations the illustration is chronological, and partly includes words more fully exemplified below.

The original forms of the *pa. t.* and *pa. pple.* are respectively *wende* and *wended*, *wend*, but the forms *wente*, *went* appear beside these from c 1200, and latterly become the more usual; in the refl. and intr. senses *went* finally replaced the older preterites belonging to *go*, and from c 1500 is most naturally regarded as the *pa. t.* of that verb, while *wend* was provided with the new form *wended*.

The following are illustrations of the less usual forms of the infinitive and present. The β-forms represent a normal lengthening of the vowel in certain dialects. The γ-forms are merely graphic (by confusion with WIND *v.*¹), as the rhymes regularly indicate *wēnd* or *wënd*. The δ-form is due to the influence of the *pa. t.* and *pa. pple.* in the form *went(e)*.

Wernicke (v-, 'wɜ:nɪkə). *Path.* The name of Karl *Wernicke* (1848-1905), German neurologist, used in the possessive to designate:

a. A neurological disorder in which there is an inability to understand speech and, usually, to speak sensibly, caused by a lesion of *Wernicke's area*, an area of the cerebral cortex comprising parts of the temporal and parietal lobes.

1887 *VICKERY & KNAPP* in *Strümpell's Text-bk. Med.* 679 The word, when it is heard, may fail to call up the appropriate mental image. *Kussmaul* has given this condition the name of word deafness (*Wernicke's* sensory aphasia). The patient is not really deaf, for he hears everything, but he no longer understands what he hears, and has forgotten what the words signify. **1907** *Practitioner* Oct. 545 In the *Aphasia of Broca*.. the cases.. closely resemble those of *Wernicke's* aphasia, with the difference that, in *Broca's* aphasia, the patient cannot speak. **1908** A. GORDON *Dis. Nervous Syst.* vii. 118 *Pierre Marie*.. holds that aphasia.. is caused by a lesion in the lenticular nucleus and in *Wernicke's* zone; the latter comprises the following portions: supra-marginal gyrus, angular gyrus, the posterior portions of the first two temporal convolutions. **1965** [see *LOGORRHEA*, *LOGORRHEA*]. **1976** *New Yorker* 15 Nov. 152/2 There are two areas of the cortex that have been shown to be directly involved in speaking. Those areas—known since the late nineteenth century as *Broca's* area and *Wernicke's* area—are on the side of the brain (usually the left) that is dominant for speech. **1979** *Sci. Amer.* Sept. 161/1 In *Wernicke's* aphasia speech is phonetically and even grammatically normal, but it is semantically deviant.

b. An encephalopathy caused by vitamin B₁ deficiency and characterized by mental confusion and uncontrolled movements, esp. of the eyes. So *Wernicke-Korsakoff* [see *KORSAKOFF*], applied to *Wernicke's* syndrome and *Korsakoff's* syndrome when both are present in an individual.

1910 E. E. SOUTHAIR in *Osler & McCrae Syst. Med.* VII. xiii. 631 (heading) Hemorrhagic superior polienccephalitis (*Wernicke's* disease). *Ibid.*, The non-alcoholic and the alcoholic forms of *Wernicke's* disease are considered. **1939** *Jrnl. Path. & Bacteriol.* XLVIII. 259 We suggest therefore that, as in chronic alcoholism so in pregnancy, B₁ deficiency may play a part in producing *Wernicke's* encephalopathy as well as polyeuropathy. **1966** *Trans. Amer. Neurol. Assoc.* XCI. 31 The *Wernicke-Korsakoff* syndrome is.. both a clinical and a pathological entity. **1978** *Sci. Amer.* Oct. 76/3 The *Wernicke-Korsakoff* syndrome is a neurological disorder that begins with an acute phase characterized by palsy and poor muscular coordination; with treatment the acute phase gives way to a chronic phase, *Korsakoff's* psychosis, characterized by severe amnesia.

wessie, obs. f. VIZY *v.* Sc.

west (west), *adv.*, *sb.*¹, and *a.* Forms: 1– west (1 wæst), 3 *Orm.* wesst, 3–7 weste (5 *Sc.* veste), *Sc.* 5, 7–9 wast, 6–7 weast(e, (6 *Sc.* weist, weyst, 7 *Sc.* vaist). [Com. Teutonic: OE. *west* *adv.* = OFris. *wes* (WFr. *wes*, NFr. *west*, *wäst*), OS. *-west* (in *north-*, *súthwest*; MLG. and LG., MDu. and Du. *west*), OHG. *west-* (G. *west*), ON. and Icel. (with *-r*-suffix; cf. *austr* EAST, etc.) *vestr* (MSw. *våster*, Sw. *vester*); MSw. *väst* (rare), Norw., Sw., Da. *vest* (prob. after LG.); not recorded in Gothic. The primitive Germanic stem **wes-* appears to be an extension of the **wes-* found in Gr. *ἑσπερος*, *ἑσπέρα*, L. *vesper*, *vespera* evening, west. In HG. dialects *abend* is similarly used for 'west'.

In OE. *west* occurs only as an *adv.*, the use as noun and *adj.* being a later development. In the cognate languages it is usually (in some exclusively) a noun in the earlier periods, the adverbial use coming later, and the adjectival being represented only by the first element in compounds (OE. *west-* in *west-dæl*, etc.).

The fact that the Romanic forms for 'east' (F. *est*, etc.) have been adopted from English indicates that this, rather than any other Germanic language, is also the source of F. *ouest* (OF. *west*), Sp. and Pg. *oeste*.)

A. *adv.* Towards or in the direction of that part of the horizon where the sun sets.

1. **a.** With reference to movement, extension, or direction.

b. Sci. Of a liquid: to cover or penetrate (a substance or object) readily, so that a small quantity spreads uniformly over it rather than lying as droplets upon it.

A common criterion of wetting is the angle that the surface of a droplet makes, at its point of contact, with the surface on which it rests (as measured through the liquid); the liquid is said to wet or not to wet the surface according as the angle is less or greater than 90 degrees.

wh, a consonantal digraph, normally represents initial *hw* in words of OE. origin, as in *hwæt* what, *hwisprian* to whisper. In words of other origin, its occurrence may be due to analogy resting on the supposed phonetic appropriateness of the 'aspirate' sound, as in *whip*, *whisk*; it sometimes varies with *h* or simple *w*; e.g. *whortleberry* and *hurtleberry*, *whoop* and *hoop*, *welked* and *welked*. Historically OE. initial *hw* represents OTeut. *xw* (under which Indo-Eur. *qʷ* and *kw* were levelled), which appears as *hw* in the early forms of the Germanic languages, but is variously modified in their modern forms, appearing in High and Low German as *w*, in the Scandinavian languages, according to dialect, as *hv*, *kv*, and *v*, in English as *wh*. For typical forms see WHAT.

The normal OE. spelling *hw* was generally preserved in early ME. till late in the 13th century, e.g. in the Nero MS. of Ancren Riwe (with occas. variants in *w*, as *wase* whoso), and the pieces contained in An Old English Miscellany (E.E.T.S.); it persists in the Ayenbite of Inwyt in the form *hu*, as *huich*. The modern spelling *wh* is found first in regular use in the Ormulum, e.g. *whillc* which; it is the commoner spelling in the earlier text of Layamon's Brut (with frequent variants in *w*), the Harl. MS. of King Horn, and the earliest MS. of Robert of Gloucester's Chronicle, and continues thence without interruption to the present day; sporadic anticipations occur in the 11th century in the interlinear Rule of St. Benedict, as in *xiwhepera* (ed. E.E.T.S., p. 81), *whænne* (ib. 103), and in the 12th century in the Peterborough Chronicle (e.g. *whilc*, an. 675), and the Lambeth and Cotton Homilies. A few instances of the omission of *h* occur in some early texts (e.g. *sinuurbul* 'teres' in Epinal Gloss., *wilum* 'nunc' in 9th century Bede Glosses), and there are some in the 11th century Rule of St. Benedict (e.g. *wylce* which, *wanon* whence); it becomes more frequent in the 12th century, chiefly in words of the interrogative class, e.g. *wilc*, *zewilcum*, *wat*, *wænne*, and (*sum*)*wile*, for *hwilc*, *zewhilcum*, *hwæt*, *hwænne*, and *hwile* (Cato Glosses, Canterbury Psalter, Peterborough Chronicle, Homilies, etc.). Many examples of simple *w* are to be found in the two versions of Layamon and other 13th century texts, and this variant spelling continues in widespread use till 1500.

Strong enunciation of the back (guttural) element in the pronunciation of (hw) is shown by the spellings *chua*, *chuæt*, *chwæm*, *chuelc* = *hwá*, etc. of the Lindisfarne Gosp., and began to be denoted in ME. of the 13th century by the use of *qu* (*quu*, *qw*), first in East Anglian texts (once in the Bestiary, *qual* whale; regularly but not exclusively in Genesis and Exodus). It remained a feature of East Anglian spelling till *c 1450* (as in the Paston Letters and the works of John Metham), but after 1300 it became more especially a characteristic feature of northern English, surviving in Scottish, esp. in the form *quh*, till the 18th century. (For the converse use of *wh* for *qu* (kw), see the letter Q.)

Early in the 15th century appear spellings with *wh* of words with initial *h* followed by an *o*-sound. It occurs first before *ō* (:—*ā*), e.g. *whom* for *hōm* (OE. *hām*) in Brut *c 1420* (E.E.T.S.), pp. 346, 370, *wholle* for *hōle* (OE. *hāl*) in Chron. Vilod. *c 1420*, 3368, and Camb. MS. of Guy of Warwick 3422, *whote* for *hōt* (OE. *hāt*) in Partonope, *whore* for *hōre* hoar (OE. *hár*) in Revel. Monk of Evesham (1482); *wholy* for *hōly* is used by Tindale, 1526. Later, other words normally spelt with initial *ho-* (of

whatever origin) became subject to the same variation of spelling; e.g. *whore* for *hōre* (OE. *hōre*), *whole* for *hōle* (OE. *hol*), *whood* for *hood* (OE. *hōd*), *whoord* for *hōrd* 'hoard' (OE. *hord*). Some of these spellings were especially frequent in the 16th century; thus *whood* 'hood' is used by Hall the chronicler, Nashe, Harvey, John Davies of Hereford, and Sylvester. The *wh*-spelling has become standardized in two of these words, viz. *whole* and *whore*, and their derivatives, in which it became common c 1600. The corresponding labialized pronunciation is current dialectally only in *whole*, but it survives in several other words where the standard form has preserved the original *ho-*, as in *hoard*, *hold*, *hole*, *home*, *hot*; in *home*, pronunciations such as (wɒm), (wʊəm), (wam) cover a wide area. For details of the evidence see the various words in this Dict. and Eng. Dial. Dict.

Spellings of *how* *adv.* with initial *hw*, *wh*, and (consequently) *quh* are on a different footing, as they are due in the first place to association of the word with the interrogative *why*, *where*, etc.

From the fourteenth century onwards there are sporadic instances of initial *whr* for *wr*, as *whrightes* (R. Brunne's Chron. Wace 8711), *whrassid* 'wrested' (St. Cuthbert, 6041), *whretchedly* (Bale, 1560). For the relationship of *hurlpool*, *hurlwind*, *hurtleberry* to *whirlpool*, *whirlwind*, *whortleberry*, etc., and of *thwack*, *thwang* to *whack*, *whang*, etc., see these words.

Pronunciation. In OE. the pronunciation symbolized by *hw* was probably in the earliest periods a voiced bilabial consonant preceded by a breath. This was developed in two different directions: (1) it was reduced to a simple voiced consonant (w); (2) by the influence of the accompanying breath, the voiced (w) became unvoiced. The first of these pronunciations (w) probably became current first in southern ME. under the influence of French speakers, whence it spread northwards (but ME. orthography gives no reliable evidence on this point). It is now universal in English dialect speech except in the four northernmost counties and north Yorkshire, and is the prevailing pronunciation among educated speakers. The second pronunciation, denoted in this Dictionary by the conventional symbol (hw), and otherwise variously denoted by phoneticians, (wh), (w), (ʍ), (ʌ), is general in Scotland, Ireland, and America, and is used by a large proportion of educated speakers in England, either from social or educational tradition, or from a preference for what is considered a careful or correct pronunciation.

The 15th or 16th century Welsh transcript of the English Hymn to the Virgin (E.D.S. Misc. 3, p. 27) shows the voiceless pronunciation, rendering *where* by *hwier*, and the evidence of the 16th century and later orthoepists goes to show that this was the prevailing pronunciation among cultured speakers, but there are indications that it was not of universal currency. Towards the end of the 18th century the voiceless was ousted by the voiced sound, and the lexicographer John Walker (1791) notes that in London speech 'the aspirate *h* is often sunk', and includes the voiced pronunciation of *wh* among the four faults of the speech of the metropolis. The restoration of the voiceless pronunciation which took place in the 19th century was due in part to Scottish and Irish influence, and in part to conscious reference to the spelling. Some early orthoepists admitted a pronunciation of *whole*, *wholesome* with (hw). This must have been familiar to Samuel Johnson, for in the Grammar prefixed to his Dictionary he remarks that 'in *whore* only, and sometimes in *wholesome*, *wh* is sounded like a simple *h*'. The dialectal pron. (woɪ, wʊl) are widespread.

In Sc. dialects north of the Tay the voiceless bilabial (hw) has become the voiceless labio-dental (f) in interrog. prons. and advs., as *fa* *how*, *fat* *what*, *fan* *when*; in Aberdeen and Banff in other words also, as *fite* *white*, *folp* *whelp*, *fup* *whip*. (Cf. FALL sb.³).

Wharncliffe ('hwɔ:nklɪf). The name of James Archibald Stuart-Wortley-Mackenzie, 1st Baron *Wharncliffe* (1776-1845), used *attrib.* and in the possessive to designate a standing order in Parliament which requires the directors of a company wishing to promote any private Bill for the extension of the company's powers to secure the consent of its members or shareholders, or a meeting at which this consent is sought.

1846 *Hansard Lords* 23 Apr. 874 Their Lordships had already required further securities, in particular cases, by the Order called Lord Wharncliffe's Order, which required in the case of established companies, if they...demanded powers beyond their original powers—that...a meeting consisting of three-fifths of the company should have sanctioned the proposed alteration. 1851 ERSKINE MAY *Law of Parl.* (ed. 2) xxvii. 560 It is directed by an order commonly known as 'Lord Wharncliffe's order'. 1887 F. CLIFFORD *11st. Private Bill Legislation* 11. xx. 784 In order to prevent directors of companies from promoting Bills without the knowledge or sanction of shareholders, the House of Lords framed, in 1846, a series of Orders, under which 'Wharncliffe meetings', as they were afterwards termed, must be held, to consider each Bill so promoted. 1923 *Daily Mail* 24 Feb. 3/2 Your approval will be asked at a Wharncliffe Meeting which will be held in the near future. 1948 O. C. WILLIAMS *Hist. Devel. Private Bill Procedure* 1. vi. 166 The Wharncliffe Order, then, was not first framed in 1846, as Clifford says, but in 1838; it was not one of a series of orders, but developed into a series by processes of division

and addition; its object was *not* simply to prevent directors of companies from promoting bills without the knowledge and sanction of shareholders but to prevent the promotion of bills to obtain further powers (especially to construct branch lines—always a speculative project) without such sanction.

** In dependent clauses. (In early use occas. followed by *that* (THAT conj. 6).)

Here the interrogative force varies according to the nature of the principal clause; after verbs or phrases of asking, wondering, or the like, the dependent clause is more or less explicitly an indirect question (e.g. 'I asked him what he meant' = 'I asked him "What do you mean?"'); after verbs or phrases of knowing, saying, or the like, it is only implicitly so, but the sense is essentially the same, and is to be distinguished from the compound relative (= 'that which': see C. I.* below), which however it sometimes closely approaches, the construction being often identical; cf. 'I did not know what he meant' (which implies the mental question 'What did he mean?') with 'I did not hear what he said' (where *what* simply = 'that which').

The dependent clause may by inversion of construction become a subject-clause: e.g. 'What he meant was unknown to me' = 'I did not know what he meant.' (Cf. quot. 1766 s.v. *HOW adv.* 8 a.)

6. In indirect questions, and clauses of similar meaning (see remarks above): corresponding to the direct use in 1. Of a thing: either (a) in finite clause, or (b) as obj. of a following infinitive (cf. *TO prep.* B. 16).
