X-ray ('eks rei, eks 'rei). (Also without hyphen.) Also *x-ray*. [Orig. in pl., tr. Ger. *x-strahlen*, the name given by Röntgen to the rays in question, expressing the fact that their essential nature was unknown: cf. X 3.]

I. The pl. form *X-rays*. 1. A form of radiation discovered by Prof. W. C. Röntgen of Würzburg in 1895, capable of passing in various degrees through many substances impervious to light, and of affecting a sensitized plate and thus producing shadow-photographs of objects inclosed within opaque receptacles or bodies, e.g. of the bones, or a bullet or other foreign body, within the flesh of a living person or animal; they also produce fluorescence, phosphorescence, and electrical effects, and have a curative operation in certain skin diseases; much used in modern surgical and medical practice. Now known to be a form of electromagnetic radiation of wavelength less than that of short-wave ultraviolet light (i.e. less than about 4 to 40 nm). Also called *Roentgen rays* (see ROENTGEN *sb.*¹ 1).

X-rays are often defined as being produced by deceleration of charged particles (esp. electrons) or by electron transitions in atoms, in contrast to the otherwise similar *gamma rays* which arise from radioactive decay of nuclei. Since gamma rays tend to be of shorter wavelength than most X-rays, they have been classified variously either as very short X-rays, or as constituting a separate class of very short wavelengths beyond X-rays. Cf. *gamma rays* s.v. GAMMA 1 c (ii).

1896 *Nature* 23 Jan. 274/1 (Röntgen in *Sitzungsberichte der Würzburger Phys.-Med. Gesellschaft* 1896, 133 tr. by A. Y

Y (wai), pl. **Y's**, **Ys** (waiz), the twenty-fifth letter of the modern and twenty-third of the ancient Roman alphabet, representing ultimately **Y**, **Y** (u psilon) of the Greek alphabet, a differentiated form of the primitive **V** which has given also **U** and **V**. It was adopted first in the Latin alphabet in the form **V** to express (u) and (w), and was later (after B.C. 100) readopted in the form **Y** to represent the **Y** of borrowed Greek words.

The name of the letter in the Romanic languages, 'Greek i' (e.g. *F. i grec*, *Sp. i griega*), and the Ger. name *ipsilon*, It. *ipsilon*, -*onne* (*†yssilonne*), and Pg. *ypsilon*, preserve the fact of its Greek origin. The English name *wy* (wai) is of obscure origin.

The earliest available English evidence is in the MS. of the Ormulum, col. 109 (l. 4320), where *pi* is written, app. in the first hand (c. 1200), over *y*, the fifth letter of the name *IESOVS*. Nothing certain is known about the historical relationship of the English name to the name *vi* or *ui* attributed to 'the Greek y' in the grammatical treatise (a. 1150) contained in the Edda, or to the *ui* or *gui* of some OF. systems. Gawin Douglas rhymes **Y** with *sky* (see quot. 1513 in sense 2 below); other early references to the name are:—

1573 BARET *Alv.*, **Y** hath bene taken for a greeke vowel among our latin Grammarians a great while, which me thinke if we marke well we shall finde to be rather a diphthong: for it appeareth to be compounded of u and i, which both spelled together soundeth as we write Wy. 1580 BULLOKAR *Amendm. Orthogr.* 8 The olde name of *y*: (which is wy).

(1) The letter of which our **y** is the direct representative occurs from the earliest times in OE. script to express the *i*-mutation of *u*. It had various forms ranging from those resembling the Greek *u psilon*, in which the tops of the limbs turn outwards in opposite directions, to those in which both limbs turn in the same direction, whether to the right (forming an *f*-like character) or to the left. This last type with the right shank continued leftwards below the line was the form that prevailed in ME. script, and which, with the top closed (*þ*), became identical with the debased forms of *p*: see (3) below. Most forms of the OE. **y** in the earliest manuscripts are written with a superposed dot, which is also a feature of the **y** in contemporary manuscripts of Latin texts. The dot fell out of use towards the end of the eighth century, but was revived towards the end of the tenth. The dotted **y** continued throughout the ME. period, and was carried into some of the early founts of type (e.g. in *The Book of St. Albans* of 1486 the dotted **y** is employed in the larger, but not in the smaller type).

In later (West-Saxon) OE., **y** was written alternatively for *i*, e.g. as representing older *ie*, as in *cyle*, *ongytan*, *yld*, for *ciele*, *ongietan*, *ield*; and, as its function of expressing rounded *i* (**Y**, **y**) was usurped by *u* in imitation of French usage, it became ultimately a possible substitute for vocalic *i* in any position. This use had become established by the middle of the 13th century, and, thenceforward, with the deterioration of script, **y** came to serve as a convenient means of breaking up an ambiguous series of minims produced by a succession of *i*, *u*, *n*, *m*, as *nym*, *myn*, *ynumen*, *unymete*, for *nim*, *min*, *inumen*, *unimete*. This free use of **y** was continued through the ME. period, and the tradition lasted for a long period after the introduction of printing; but *i* was gradually restored to its place, the resulting orthographic convention being that **y** is retained: (i) for final *i*-sounds, as in *fly*, *family*, *daily*, *destroy* (formerly spelt also *flie* and *flye*, *familie* and *famylie*, etc.), only alien words being spelt with final *i*; (ii) in Greek words, representing *υ*, as in *hymn*; (iii) before *i*, in inflexional forms of verbs ending in *y* or *ie*, as *flying*, *lying*, *tying*, not *fliing*, etc.; (iv) in the plural of nouns ending in **y** preceded by another written vowel, as *boy boys*, *ray rays*, *alley alleys*, *money moneys* (but *monies* is still common, and *vallies*, *monkies*, etc. were equally so until recently). Particular usages, not falling under these categories, are the use of **y** to distinguish *dye* from *die*, and the fluctuation between *flyer* and *flier*, *tyre* and *tire*, *gipsy* and

gypsy, *tiro* and *tyro*, *siphon* and *syphon*, *cipher* and *cypher*, *silva* and *sylva* (see each word for the special circumstances).

In some texts **y** is found substituted for *i* = French *j* (d3); e.g. in Shoreham's Poems *manyour* is written for *manjour* = *manger*, in Ayenbite *yyoyned* for *yioyned* joined, in the Camb. MS. of the 15th century version of Guy of Warwick occur *yoye*, *yolye*, *yelowse*, *harbenyoure*, *soyourned* = *joy*, *jolly*, *jealous*, *harbinger*, *sojourned*.

(2) About the middle of the 13th century **y** began to be used to represent the voiced palatal spirant (*j*), taking the place of the character *ȝ* (called *YOGH*, q.v.) in one of its values. *ȝ* is a loosely written form of OE. *ȝ*, which had become appropriated in early ME. script to the guttural and palatal spirants, while the continental *g* was appropriated to the voiced guttural and palatal stops (though in some MSS. *g* stands for all these sounds: cf. *G*). The practice of contemporary scribes varied considerably, some restricting **y** to its vocalic use, others using it freely for both consonant and vowel. Northern scribes of the 14th and 15th centuries often write *yh* for **y** initially, as *yhit*, *yheyt*, yet, *yher* year, *yhoung* young.

In many late ME. scripts *ȝ* became identical in form with *z*, and it was retained by Scottish printers in this form; e.g. printed *zer*, *fenzeit*, *Dalziel*, represent *yer* year, *fenyeit* feigned, *Dalyiel*: see further s.v. *Z*.

(3) Another value of **y** arises from the assimilation of **y** and *þ*, the runic *thorn* (see *TH*), which had become indistinguishable from each other in some MSS. of the early 14th century (e.g. the Cotton MS. of Cursor Mundi). After 1400 *þ* fell more and more out of use, and in some scripts was represented only by the **y**-form in the compendia *y^e*, *yⁱ* or *y^a*, *y^e*, *y^m*, *y^u* = *the*, *that*, *they*, *them*, *thou*, and the like, many of which continued to be extensively employed in manuscript in the 17th and 18th centuries. Two of these, *y^e* or *ȝ^e*, *yⁱ* or *ȝⁱ*, were retained in printers' types during the 15th and 16th centuries, but often with a form of **y** somewhat different from that used in other positions. (In Sir John Cheke's translation of the New Testament, a dotted **y** stands for *th*.) In manuscript (e.g. in letter-writing) *y^e* lasted well into the 19th century. It is still often used pseudo-archaically, jocularly, or vulgarly (pronounced as *ye*), e.g. in Lewis Carroll's 'Ye Carpette Knyghte', and in shop-signs like 'Y^e Olde Booke Shoppe'.

With *a*, *e*, *o*, *u*, it forms combinations having special values:—*ay* (final) = (eɪ), as in *lay* (leɪ), essay ('esɛɪ), = (aɪ) in *aye* (aɪ); = (iː) in *quay* (kiː), = (eɪ) in *says* (seɪz); *ey* = (eɪ), as in *obey* (əu'beɪ), convey (kən'veɪ), = (ɪ), as in *alley* ('æli), honey ('hʌni), = (aɪ) in *eye* (aɪ) and its derivatives, = (eə) in *eyre* (eə(r)); *oy* = (ɔɪ), as in *boy* (bɔɪ), annoy (ə'nɔɪ); *uy* (rare) = (aɪ) in *buy* (baɪ).

The consonantal sound expressed by **y** is denoted in this Dictionary by (j), as *yew*, *you* (juː).

y- prefix (1 *gi-*, *ge-*, *gæ-*, *gie-*, *gy-*, 1-2 *ie-*, 2-3 *je-*, 2-5 *i-*, *hi-*, 4-7 *dial. e-*, 3- now *dial. a-*, now *arch. y-*) represents OE. *ge-*, earlier (and Northumb.) *gi-*, = OFris. *gi-*, *ge-*, *ie-*, *e-*, *a-*, OS. *gi-*, *ge-*, *i-*, MLG., MDu. *ge-*, *ghe-*, locally *i-*, *y-*, *e-*, (LG., Du. *ge-*), OHG. *ga-*, *ka-*, *gi-*, *ki-*, *ge-*, (MHG., G. *ge-*, *dial. je-*, also *gi-*, *ga-*), Goth. *ga-*:—OTeut. **ga-*. The parallelism of formation and meaning exemplified by such forms as L. *communis* and Goth. *gamains*, OE. *gemæne* common, 1-MENE, L. *convenire* and Goth. *gagiman* to assemble, L. *conticere* and Goth. *gapanan* to be silent, L. *commemini* and Goth. *gamunan*, OE. *gemunan* to remember, L. *conferre* and Goth. *gabairan* to compare, has suggested the probability of the etymological identity of Teut. *ga-* with L. *co-*, *com-*, and some scholars have accepted this on the assumption that Verner's law operated in some instances of initial consonants. (L. *com-* is normally represented by *ham-* in OFrank. *hamēdū*, synonymous with OHG. *geido*, MHG. *geide* conspirator.)

The original form *ga-* is the only one found in Gothic (e.g. *galeiks* YLIKE); it was preserved also in OHG. (e.g. *galih*), continued in MHG., and survives in a few words in some German dialects. The weakened (unstressed) form *gi-* was the prevailing one in OHG. and OS. and is the earliest form recorded in OFris. and OE., but it was early reduced to *ge-* in the whole of the Low German and High German area. In Scandinavian the prefix had disappeared entirely in prehistoric times as a living element, but relics of it remained in ON. *glíkr* YLIKE, *gnógr* ENOUGH, *greiðr* GRAITH *a.* (cf. READY).

The phonetic changes of OE. *ge-*, resulting in its complete disappearance in modern English as a living formative except in certain dialects, are in general paralleled in most of the LG. (as opposed to the HG.) dialects. While in HG. the vowel of the prefix not uncommonly underwent syncope, which has become permanent (to the obscuration of the origin) in certain words, as G. *gleich* (OHG. *ga-*, *gi-*, *gelik*) like (YLIKE), *gnade* (OHG. *gināda*, OS. *ginātha*, *nātha*, Du. *genade*, ON. *nāð*), in LG. dialects, on the other hand, there was a tendency for the consonant to fall, leaving *i-* or *e-*, in some dialects *a-*; e.g. OS. *unimetes* 'aliquid incommodum', MLG. *ilētene*, pa. pple. of *lēten* to permit, *medeselle* (cf. G. *mitgesell*) companion, *enough* enough, *eschein* (cf. G. *geschehen*) happened, MDu. *idaen* done, *idragen* drawn, *yslagen* slain, Du. *dial. ivallig* weak, OFris. *idein* done, *islein* slain, *onebunden* unbound, *enôch*, *anôch* enough, *unaborn* unborn, *ofeslain*, *ofaslain* killed off, Efris. *unikaimed* unkempt, Nfris. *-enogh* (in comp.) enough. Complete suppression of the prefix takes place in certain cases, as in MLG. *to like* (cf. G. *zugleich*) immediately, LG. *lik* like, *naug* enough, *schein* happened, OFris. *bedda*, *sith* companion, *fadera* godfather, *selscip* society, Wfris. *nôch* adv. (beside *genôch* adj.-pron.), Nfris. *nogh* enough; the suppression of the prefix is normal in pa. pples.; in words of other classes, it survives sporadically or has been revived through Du. or HG. influence.

The like developments of OE. *ge-* are traceable in the history of several words in which its identity and force have long ceased to be recognized, or from which all traces of the prefix have been obliterated: e.g. OE. *gefōrdian*, ME. *iforð(i)e*, *aforth*, AFFORD *v.*, OE. *gewær*, ME.

iwar(e), *awar(e)*, AWARE *a.*, OE. *ȝelic(e)*, ME. *YLIKE*, ALIKE, LIKE *a.* and *adv.*, OE. *ȝemang*, *onȝemang*, ME. *YMONG*, AMONG, MONG, OE. *ȝenoh*, ME. *inoȝ*, *anoȝ*, ENOUGH, 'nuff, OE. *handȝeweorc* HANDIWORK (whence, by analogy, HANDICRAFT), OE. *ǣghwæðer* EITHER. For further examples of the complete disappearance of the prefix see below.

The general facts of the history and survival of OE. *ȝe-*, of which some details are given below, are:—In positions where it was still recognizable as a prefix, it had left few traces in northern English by 1200; its disappearance in the north was assisted by the absence of the prefix in ON. Substantival, adjectival, and verbal forms (other than pa. pples.) continued, not later than the end of the 14th century, only in southern and west-midland dialects. The pa. pple. was regularly formed with the prefix in southern ME. till about the middle of the 15th century, and its use in the form *a-* survives in south-western dialects to the present day. Pa. pples. so formed were a prominent feature of the archaistic language of Spenser and his imitators, and a few of them, the most notable of which is *YCLEPT*, persist as conventional archaisms of poetry.

In OE. and ME. the prefix was written either continuously with the body of the word of which it formed a part, or disjoined from it by a full or a half space; in the archaistic usage of the 16th and 17th centuries the general practice was to print the compound as one word, without hyphen. In this Dictionary established and well-known forms such as *yclad*, *yclept*, are printed without hyphen, but in other instances the convenience of the reader has been consulted, where occasion arises, in the avoidance of unhyphenated forms where these would not suggest the nature of the word-formation.

Compounds of the prefix spelt with *y-* are entered in their alphabetical place, whether as full articles or as cross-references. Compounds which did not come down late enough for the spelling *y-* to have become established with them have been entered in their place in the letter I: see 1-1. The choice of *y-* (and not *i-*) by Spenser and other archaists was determined by the prevalence of that form in the texts upon which he modelled his language. There are a few instances of the general survival of the *i-* form till a late date, e.g. I-THREE *v.*; the retention of *i-* in *IWIS* is due to the false etymologizing of it as *I wis*.

The original (physical) signification of the prefix, 'with', 'together', without admixture of transferred meaning, persists in some OE. words, such as *ȝedræȝ* lit. that which is drawn together, band, multitude (cf. Goth. *gadragan* to heap up or together), *ȝelapian* to summon together, invite (cf. Goth. *galapōn* συγκαλεῖν), *ȝerunnen* 'run together', coagulated (cf. Goth. *garinnan* to come together), *ȝepēodan* 'conjungere', to join together, connect; but for the most part its meaning in OE. compounds falls under one or other of the following categories, which are arranged in the probable order of their development in primitive Germanic: the notion of physical accompaniment or conjunction passing into that of (1) association in life, occupation, etc., and hence, of suitability or appropriateness, and (2) collectivity, the final stage being (3) a perfective or intensive notion evolved in some measure from each of the others.

1. The associative meaning is exemplified by two classes of words in OE.:

a. Designations of persons associated or related by birth, family, or status, such as *ȝebedda* (I-BEDDE) 'one who shares a bed with another', bedfellow, consort, f. *bedd* bed, *ȝefēra* (YFERE, FERE *sb.*) 'one who goes with another' (*faran* to go), companion, *ȝehāda* 'one of the same order as another', fellow-minister, f. *hād* condition, order, *ȝesip* (cf. Goth. *gasinhja*, OS. *gisīð*, OHG. *gisind*) 'one who shares a voyage with another', companion, f. *sip* journey.

b. Adjectives and allied substantives denoting quality or condition, in which the purely associative sense readily passes into that of appropriateness, convenience, or similarity, such as *ȝecynde* (I-CUNDE *sb.*) nature, *ȝecynde* (I-CUNDE *a.*) natural, *ȝedēfe* (cf. Goth. *gaddōbs*) becoming, fit, *ȝemæc* well-matched, *ȝemæcca*

companion, mate, MATCH *sb.*¹, *ȝemaca* mate, MAKE *sb.*¹, *ȝelic* lit. related in form to, of the same form as, LIKE *a.*, *YLIKE*, *ȝelica* an equal, *ȝemet* *sb.*, measure, proper measure, proportion, moderation, *ȝemet* *adj.*, *ȝemæte* lit. of suitable measure, fit, proper, MEET *a.*, *ȝeræde* lit. suitably prepared (see I-REDE, I-REDY and READY *a.*), *ȝesibb* related, I-SIB(BE), *ȝeswēȝe* harmonious, *ȝetriewe* holding faith with, TRUE.

2. Compounds in which mutual relation is implied form a link between the associative and the collective uses, e.g. OE. *ȝefān*, *ȝefiend* (I-FEOND) enemies, *ȝefriend* (I-FREOND) friends, *ȝebrōðor* (I-BROTHEREN) brothers, *ȝesweostor* sisters, *ȝemāȝas* kinsmen, *ȝescý* pair of shoes. The number of OE. words of purely collective meaning is not large; examples are *ȝebæcu* back parts, *ȝefylce* army, troop, *ȝemære*, pl. *ȝemæru* limits, boundary, *ȝetimbru* pl. building, edifice, *ȝewæde* clothing, I-WEDE, *ȝewider*, pl. *ȝewidru* weather (esp. as good or bad), storm cf. (G. *gewitter*).

b. What is probably to be regarded as a particular development of the collective sense appears in the OE. generalizing pronouns and corresponding adverbs, *ȝehwā* every or each one (cf. I-HWAT), *ȝehwīlc* each or every one, ME. *i(l)ch*, ILK, *ȝehú* somehow or other, *ȝehwær* everywhere, YWHERE, *ȝehwider* in any or every direction. Some of them were reinforced by the prefixing of *ā* ever, e.g. *ǣȝhwā* each or every one, *ǣȝhwæper* each of two, both, EITHER, *ǣȝhwelc*, ME. *euch* (see EACH).

3. The perfective or intensive sense is found in the following classes of words:

a. Substantives denoting the result of an action, a stage in a process, or a particular state, as OE. *ȝemōt* meeting, MOOT *sb.*¹, *ȝemynd* (cf. L. *commemini*) memory, remembrance, MIND *sb.*¹, *ȝesibb* relationship, *ȝesihp* I-SIGHT, SIGHT, *ȝeswell* swelling, SWELL *sb.*, *ȝeweorc* working, what is done or built, fortification, WORK *sb.*, *ȝewitnes* testimony, I-WITNESS, WITNESS *sb.*, *ȝewrit* what is written, writing, I-WRIT, WRIT.

b. Adjectives denoting a state, as *ȝeclāne* pure, *ȝehāl* WHOLE, *ȝesund* uninjured, SOUND *a.*

c. Verbs which denote achievement of a result, the attainment of a stage in a process, or a special limitation of the general sense of the simple verb. The force of the prefix is clearly recognizable in examples like OE. *ȝeetan* to eat up, consume, 'comedere', *ȝestigan* to mount up, 'conscendere', and esp. in such pairs as *ærnan* to run, *ȝeærnan* to gain by running, *āscian*, *frignan* to ask, *ȝeāscian*, *ȝefrignan* to learn, *beran* to carry, *ȝeberan* to bring forth, *faran* to go, *ȝefaran* to depart this life, die, to get by going, occupy, *ræcan* to stretch forth, offer, *ȝeræcan* to reach, obtain, *ridan* to ride, *ȝeridan* to reach as by riding, get into one's power, *weorpan* to become, be, *ȝeweorpan* impers. to be agreed, *gán* to go, *ȝegán* to attain to, get, occupy, *winnan* to fight, strive, *ȝewinnan* to win. But in many instances no difference of meaning is discernible between the simplex and the compound, e.g. *beorgan*, *ȝebeorgan* to protect, *hátan*, *ȝehátan* to call, name, command, promise, *limpan*, *ȝelimpan* to happen, *secgan*, *ȝesecgan* to say, tell. There are also some causative compounds, as *ȝebétan* to make good, improve, BEET *v.*, *ȝeforðian* to further (see AFFORD), *ȝehesfigian* to make heavy. Of such verbs many did not survive except in their pa. pples. into the ME. period; others survived only till about 1300, and that in southern areas; a certain number, such as *ȝehieran* YHERE, *ȝeséon* YSEE, continued in use in present and past tenses till 1400 or later; very few lasted till 1500 or beyond. But from the middle of the 15th century onwards archaizing poets created (orig. after pa. ppl. forms) new formations in which the prefix was meaningless. Such are *ybete* (Kingis Quair), *ydrawe*, *yryve* (Lydgate), *yclepe* (after *yclept*), *yglauunst*, and *yshrilled* (Spenser), *ycharm'd*, *y sprout* (Robinson's *Mary Magdalene*), *ysteer* (Gosson), *ydrop* (Henry More), *ylipe*, *yminne*, *ypass*; there are also pres. pples. like Sackville's *ycausing* and Milton's *star-ypointing*.

4. The use of perfective or completive *ȝe-* had its most extensive development in the formation of pa. pples., a function common to the Low German and High German groups but not found in Gothic and Scandinavian. The prefix could be employed with any uncompounded verb, but the verbs corresp. to OE. *bringan* to

bring, *cuman* to come, *findan* to find, *weorpan* to become, did not normally take it.

In OE. and in ME. (where the prefix continued in full use) it is often impossible to determine whether a particular pa. pple. with *ȝe-* (*i-*, *y-*) belongs to a simple verb or to its compound with *ȝe-*.

In OE. the prefix was employed in forms derived from Latin, as *ȝeplantod* = *plantatus*. Similarly in ME. it was freely employed with verbs of French origin, as *ybaptised*, *yblamed*, *ycircumcysed*, *iclosed*, *igranted*, *ikupled*, *ymartred*, *yoccupied*, *ipaied*, *ipassed*, *irobbet*, *isturbed*, *issued*, *isustened*, *iwarised*. Early loanwords from Scandinavian also took it, as *itaken* (12th cent.).

It came down into ME. as a peculiar characteristic of the language of the south and west-midland regions, and examples are consequently abundant in such texts as (in the 13th cent.) Layamon's Brut, the texts of 'the Katherine group', Owl and Nightingale, Robert of Gloucester, (in the 14th cent.) Ayenbite, Shoreham's poems, Piers Plowman, Trevisa's works, Sir Ferumbras, (in the 15th cent.) Yonge's translation (Anglo-Irish) of Secreta Secretorum and the anonymous Two Cookery Books (E.E.T.S.); its frequency in Lydgate is presumably due to metrical exigencies and to imitation of Chaucer, in whom it is fairly common, whereas it is almost entirely absent from the works of Gower. In the 16th century it was adopted as an archaistic feature from Chaucer and Lydgate by many poetical writers, among whom are Phaer, Sylvester, Arthur Hall, and, above all, Spenser. In the 17th cent. Henry More is a prominent user of these pa. pples., and in the 18th cent. Thomson and other Spenserians have many examples. Some of the most commonly occurring words are *ybent*, *ybound*, *ybrought*, *yclad*, *yclept*, *ydyght*, *ydrad*, *ypent*, *ypight*, *ywrought*.

In modern dialects its use in the form *a* (a) extends over a triangular area of which the angles lie in Worcestershire, Surrey, and Cornwall; it is found also in Pembrokeshire and Wexford. Modern examples of dialectal usage are:—

1568 HOWELL *Arbor of Amities* 36 b, In husbandry, icham truly, ycounted to excell. 1605 London *Prodigal* iv. i. E 3 b, Such a lerripoope as thick ych was nere a sarued. c 1640 JOHN SMYTH *Descr. 5. In OE. *ȝe-* was used in the formation of adjs. from substantival stems to express the possession of, or being provided with, something, as *ȝefeax* having hair (of a certain colour), *ȝeheart* courageous, *ȝestence* odorous, *ȝewurms* purulent (f. *wurms* corruption; cf. Goth. *gascōhs* shod), but esp. with the ppl. ending -od, -ed, as *ȝefeaxod* (beside *ȝefeaxen*) having hair, *ȝehelmod*, *ȝehilmed* helmeted, *ȝehyrnd* horned, *ȝesperod* armed with a spear. The number of the latter was added to in ME., e.g. *ybonchyd* humped, (*wel*) *ycheryd* well-favoured, *ifeðered* (cf. OE. *ȝefeðerian*), *ileaded*, *ileðered*, *ypanylyound*, *iteiled*, (old) *i-yeerid*; in some instances the forms with the prefix are the more original forms of such adjs.: see e.g. FEATHERED, LEADED, LEATHERED, TAILED, YEARED. A few compounds of this class were coined by archaists of the 16th century; e.g. *ycrested* (A. Hall, 1581).

-y suffix¹ (Forms: 1-ig, 2-5-i, 4-6-ye, 4-7-ie, 4-y, 6- now only in certain cases -ey), descending from the OE. adj. suffix -ig, which represents under a common form two OTeut. suffixes *-iga-, -aga-, still distinguishable in OE. by the presence or absence respectively of mutation of the stem vowel of the sb. to which it is added, e.g. *mōdiȝ* MOODY:—*mōdaȝa-, f. *mōda-mOOD *sb.*¹, *mīhtȝ* MIGHTY:—*mahtȝa-, f. *mahtȝ MIGHT, *stāniȝ* STONY beside *stāniȝ*, *purstȝ* beside *purstȝ* THIRSTY.

OTeut. *-iga-, -aga- are differentiated forms of Indo-eur. -go- (Skr. -ka-, Gr. -κο-, L. -cu-) arising from application of the suffix to *i-* and *a-* stems respectively. In other Teut. languages the following forms are found: OFris. -ig, OS. *ig*, (MDu. -ig, -ich, Du. -ig), OHG. -ig (MHG. -ig, -eg, -ec, G. -ig), ON. -igr, Goth. -eigs, -igs; OS.

-ag, OHG. -ag, -ah, ON. -agr, Goth. -ags, -ahs; also OHG. -uh, ON. -ugr, Goth. -ugs.

When the suffix is appended to a sb. ending in y, the convention of modern spelling requires it to be spelt -ey, as in *clayey*, *skyey*, *whyeey*. When the sb. ends in -e preceded by a vowel, the e is retained, as *bluey*, *gluey*; in other cases there may be variation, as *homey*, *homy*, *liney*, *liny*, *nosey*, *nosy*.

1. The general sense of this suffix is 'having the qualities of' or 'full of' that which is denoted by the sb. to which it is added, as *icy* = (1) of the nature of, having the appearance, hardness, coldness, slipperiness, transparency, etc. of ice; (2) full of or covered with ice. In OE. there was a very large number of such adjs., many of which have a continuous history from the earliest times to the present day; in the case of some, however, e.g. *clayey*, *icy*, *rainy*, *wintry*, there is a significant gap in the evidence, which suggests that they may have dropped out of use and have been formed afresh later. There are some noteworthy instances of new formations in late OE., e.g. *dohtig* DOUGHTY replacing *dyhtig*, *dústig* DUSTY, *snáwig* SNOWY replacing *snáwlic*. To several OE. adjs. in -ig there were parallel formations in -iht, as *isig*, *isiht* icy, *sandig*, *sandih* sandy, *pornig*, *pornih* and *pyrniht* thorny; the disappearance of this latter suffix left freer scope of development for the forms in -ig.

In ME. the number of these derivatives does not seem to have been at first greatly increased; the following fresh coinages are exemplified first from texts before 1300, *dready*, *fiery*, *frighty*, *hairy* (cf. OE. *hæriht*), *happy*, *needy*, *sleepy* (but cf. OE. *unslæpiȝ*), *tidy* (c 1250 = in good condition); there are occasional parasynthetic compounds, as *sort-leui* short-lived. The addition of the suffix to non-native sbs. is at least as early as the 13th cent., e.g. *savoury* in the Ancrén Riwele. The fourteenth cent., esp. the later half, was prolific in new formations; to this period belong *angry*, *bushy*, *earthy*, *fatty*, *flowery*, *heady*, *heartly*, *milky*, *miry*, *mouldy*, *mucky*, *naughty*, *smoky*, *sweaty*, and many more. The sixteenth cent. was also a prolific period; to it belong, e.g., *cottony*, *frothy*, *dirty*, *healthy*, *leafy* (but *leavy* is 15th cent.), *mealy*, *saucy*, *sugary*, *viny*, *woolly*, *yeasty*. Others, such as *bulky*, *measly*, *noisy* (Dryden), *peppery*, *racy*, *skyey* are recorded first from the 17th cent.

Later new derivatives tend in a large measure to be colloquial, undignified, or trivial, as *bumpy*, *dummy*, *flighty*, *hammy*, *liney*, *loopy*, *lumpy*, *lungy*, *messy*, *oniony*, *treey*, *verminy*, *vipery*; some are from verbs, as *dangly*. Contextually, the application of the adj. may be narrowed in any direction, as *mousy* = (1) resembling a mouse, (2) quiet as a mouse, or (3) infested with mice. A sense 'addicted to' (cf. 3), as in *booky*, *doggy*, *horsy*, is of modern growth.

1850 THACKERAY *Contrib. to Punch* Wks. 1900 VI. 163 Grizzel had brought me an oniony knife to cut the bread. 1869 MRS. WHITNEY *We Girls* II, Bedsteads and washstands and bureaux—the very things that made up-stairs look so very bedroommy. 1891 M. MURIEL DOWIE *Girl in Karp*. xi. 144 Fretwork brackets and crystal dangly things.

2. In the 15th cent., if not earlier, certain monosyllabic adjs. were extended by means of this suffix, app. with the design of giving them a more adjectival appearance, e.g. *hugy* f. *huge*, *leany* f. *lean*. The majority of such words arose in the 16th and 17th cent.; examples are: *bleaky*, *chilly*, *cooly*, *dusky*, *fainty*, *haughty*, *hoary*, *lanky*, *paly* adj.¹, *plumpy*, *slightly*, *slippery*, *stouty*, *swarty*, *thicky*, *vasty*. In this application the suffix has not infrequently come to express much the same notion as -ish; this is particularly so with colour-epithets, as *blacky*, *yellowy*, and esp. when these are used quasi-advb., as *greeny-blue*, *bluey-green*, *reddy-brown*.

3. As early as the 13th c. this suffix began to be used with verb-stems to express the meaning 'inclined or apt to' do something, or 'giving occasion to' a certain action; in the Ancrén Riwele alone we have *slibbri*, *sliddri*, *sluggi*, *slummi*. Chaucer has *sleepy* = soporific. In the 16th cent. arose *choky*, *drowsy*, *slippy*, *sticky*; later we find *blowy*, *clingly*, *floaty*, *quavery*, *rollicky*. The immediate etymon of such adjs. cannot always be ascertained.

4. From the early years of the 19th cent. the suffix has been used still more freely in nonce-words designed to connote such characteristics of a person or thing as call for condemnation,

ridicule, or contempt; hence such adjs. as *beery*, *catty*, *churchy*, *jumpy*, *newspapery*, *piggry*, *tinny*.

-y suffix² (1-3 -ian, -igan, -ia, 2-4 -ien, -ie, 3 -izen, -ezen, -ye(n), -in, 3-4 -i, 4-5 -ey, 8 -ee, 3- -y) represents OE. infin. ending -ian of the 2nd class of weak verbs (having pa. t. in -ode and pa. pple. in -od), corresp. to OFris. -ia, OS. -ôian, -ôn, (MLG., MDu. -en), OHG. -ôn (MHG., G. -en), Goth. -ôn:—OTeut. *-ôjan. This class of verbs is denominative; e.g. OE. *sealfian* to anoint:—*salbôjan, f. *salbô ointment, salve, *hearpian* to harp, f. *hearp* harp, and contains many intrans. verbs derived from adjs., e.g. *côlian* to be cool (= OS. *côlôn*):—*kôlôjan, f. *kôluz cool, *nearwian* to be narrow, f. *nearu* narrow; it was swelled in prehistoric OE. by the passing over to it of many verbs that orig. belonged to the -æjan class, as *hatian*:—*hatôjan, -æjan to hate (cf. OHG. *hazzôn* beside *hazzên*). Adoptions of foreign verbs were regularly taken into this class, e.g. OE. *fersian* to versify, (ȝe)temprian to moderate, *offrian* to sacrifice.

By the 13th century this suffix had become restricted to the southern and western districts of England, and in the course of the century became generalized in those parts as the infin. ending of all verbs of whatever origin. The following are some examples of the extension of its use: in verbs orig. belonging to other conjugations, *brukien* (OE. *brúcan*) to enjoy, *nemni* (OE. *nemnan*) to name (Layamon); in new derivatives on native stems, *chapsari* to chaffer (Ayenbite), *grundien* to sink (Layamon), *kniȝti* to knight (King Horn); in verbs from Scandinavian, *lastin* (ON. *lasta*) to blame, *trosti* (Ayenbite); in verbs from French, not only those in -ier, -ir, -ire (the similarity of which to the ME. suffix would naturally suggest adoption into the -ien conjugation), *boili* (OF. *boillir*) to boil, *consenti* (OF. *consentir*), *herberzi* (OF. *herbergier*) to harbour, *saisi* (OF. *saisir*) to seize, *trety* (OF. *traitier*) to treat—including those of the -iss- conjugation, *norisi*, *norischei* (OF. *noriss-*) to nourish, *perissy* (OF. *periss-*) to perish—but many also of other classes, *anuri* (OF. *anourer*) to worship, *fausie* (OF. *fauser*) to fail, *granti* (AF. *graunter*) to grant, *ioyni* (OF. *ioign-*) to join, *tempti* (OF. *tempter*) to tempt (these forms occur in various texts from Layamon to Ayenbite).

This suffix has been in continuous use in the south-west until the present day, when it is the regular infin. ending of verbs when used intrans. in the counties of Somerset, Devon, and Dorset. Examples and illustrations since 1400 are:—

c1430 *Two Cookery-bks.* 7 Gadere alle þe kreme in þe clothe, an let hongy on a pyn. *Ibid.* 31 Take Porke or Beef, weþer þe lyke. 1484 *Yatton Churchw.* Acc. (Som. Rec. Soc.) 115 To costs to rydy for the Chals that waste ystole xij^d. 1746 *Exmoor Scolding* (E.D.S.) 143 Thee wut ruckee, and squattee, and doattee in the Chimley Coander lick an Axwaddle. 1825 JENNINGS *Observ. Dial. W. Eng.* 7 Another peculiarity is that of attaching to many of the common verbs in the infinitive mode, as well as to some other parts of different conjugations, the letter y. Thus it is very common to say *I can't sewy*, *I can't nursy*, *he can't reapy*, *he can't sawy*; as well as *to sewy*, *to nursy*, *to reapy*, *to sawy*, &c. but never, I think, without an auxiliary verb, or the sign of the infinitive to. 1863 BARNES *Dorset Dial.* 28 The truth is, that in the Dorset verb takes y only when it is absolute, and never with an accusative case. We may say, 'Can ye zewy?' but never 'Wull ye zewy up theäse zëam?' 'Wull ye zew up theäse zëam?' would be good Dorset. Belonging to this use of the free infinitive y-ended verbs, is another kindred one, the showing of a repetition or habit of the action, as 'How the dog do jumpy,' i.e. keep jumping. 'The child do like to whippy,' amuse himself with whipping. 'Idle chap, He'll do nothen but vishy, (spend his time in fishing,) if you do leave en alwone.' 'He do markety,' He attends market.

-y suffix³ (also 3-7 -ie, 4-6 -ye) represents ultimately, through F. -ie, Com. Romanic -ia = L. -ia, which comprised under one graphic form the Greek suffixes -ia and -eia, as in L. *mania* = Gr. *μανία*, whence F. *manie*, ME. *MANIE*, L. *sympathia* = Gr. *συμπάθεια*, whence F. *sympathie*, Eng. SYMPATHY. Romanic -ia displaced L. -ia and became a living formative for abstract nouns of quality or condition; e.g. in OF. from *corteis* (COURTEOUS) was formed *corteisie* COURTESY, from *fol* (FOOL), *folie* FOLLY, from *gelos* (JEALOUS), *gelosie* JEALOUSY, and the like. When learned adoptions were made of L. nouns in -ia, this suffix was also represented by -ie, and so assimilated to -ia; e.g. F. *furie* FURY, ad. L. *furia* (whence also organic OF. *fuire*). In AF. preference was given to such forms as these over popular or semi-popular forms, e.g. AF. *accidie*, *glorie*, *estorie*, *victorie* = central F.

accide, *gloire*, *estoire*, *victoire*, L. or med.L. *accidia*, *glōria*, *historia* (Gr. *ιστορία*), *victōria*; it is the AF. forms of such words that were adopted into English (see ACCIDIE, GLORY, STORY, VICTORY).

There were various new formations in late or med.L., in Romanic, or in individual Romance languages; examples are Romanic **libraria* LIBRARY, **poesia* (for *poesis*) POESY, OF. *navie* NAVY.

This suffix has never been in English a prolific formative, but from time to time new coinages have been made, e.g. in the 14th cent. *beggerie* BEGGARY and in the 16th COOPERY (= cooper's work or ware), f. *beggar* and *cooper*, both doubtless furthered by the prevalence of the suffix -ERY. Nonce-words like *orphanry* and *tenantry* are of doubtful status, but the correspondence of adjs. in -ic and -ous to sbs. in -y has made possible in modern times the formation after Gr. types of such words as *brachycephaly*, *gymnospermy*, *synchrony*, *syntony* from *brachycephalic*, *gymnospermous*, *synchronous*, *syntonic*. The domain of the suffix is much enlarged by its constituting the final element of many compound suffixes, which receive separate treatment in this Dictionary in their alphabetical places; e.g. -ACY, -CY, -ERY, -GRAPHY, -LATRY, -LOGY, -MACHY, -PATHY, -PHAGY, -PHILY, -RY, -TOMY, -TONY.

Many important sbs. having this suffix appear as English adoptions of French words in the 13th century, as *barony*, *blasphemy*, *company*, *courtesy*, *felony*, *folly*, *jealousy*, *litany*, *story*, *villainy*; others, such as *comedy* and *tragedy*, *fury*, *glory*, *harmony*, *honesty*, *library*, *melancholy*, *memory*, *misery*, *navy*, *victory* date from the 14th century; in the 15th and 16th centuries another series of borrowings from French or from Latin appears, such as *family*, *industry*, *irony*, *liturgy*, *modesty*.

The majority denote a state, condition, or quality; others denote an activity or a result of it, as *blasphemy*, *felony*, *fury*, *harmony*, *history*, *liturgy*, *memory*, *phantasy*, *poesy*, *victory*. From either signification a definitely concrete meaning may be readily developed, which is found in *barony* (= baronial domain, body of barons), *company*, *family*, *library*, *navy*, *sacristy*, etc. The concrete application is abundantly illustrated also by names of countries, as †*Armony* (Armenia), *Italy*, †*Syrie* (Syria), *Brittany*; cf. -IA suffix¹.

-y suffix⁴, representing, first through AF. forms in -ie, later by direct adaptation, L. -ium, which was added to verbal roots (primarily i- and e-stems) to denote an act, as in *beneficium* well-doing, good action, f. *beneficere* to do good, *colloquium* conference, conversation, f. *colloqui* to speak with, *gaudium* joy, f. *gaudere* to rejoice, *susprium* sigh, f. *susprire* to sigh. The earliest derivatives of this formation that were introduced into English are *remedy* (Ancren Riwele), through AF. *remedie*, from L. *remedium*, and †*sacrilegy* (early 14th c.), from AF. **sacrilegie* or L. *sacrilegium*. To both of these there are parallel forms, †*remede* and *sacrilege*, derived from continental Fr. forms *remede* and *sacrilege*; there are several similar pairs, of which the shorter form represents a continental Fr. form, the longer the corresponding AF. form or the orig. Latin, viz. †*augure*¹ and *augury*, *benefice* and †*beneficie* (rare), †*colloque* and *colloquy*, *empire* (F. *empire*) and †*tempery* (AF. *emperie*, L. *imperium*), *homicide* sb.² and †*homicidie* (rare), †*perjure* sb.² (rare) and *perjury*, †*subside* (c1450-1553) and *subsidy*; †*ingeny* 'mind', 'intellect' has its etymological doubt in *engine* 'native talent', genius, ingenuity, mechanical contrivance'. Most of these words, together with *obloquy*, came into the language before 1500. †*Relevy* sb.¹ (med.L. *relevium*) and *suspury* (L. *susprium*) are rarities; *gaudy*, though partly from L. *gaudium*, is prob. of mixed origin; the derivation of *larceny* is somewhat obscure. *Horology*¹ (beside *horologe*) and *mystery*¹ are derived, through the medium of L. -ium, from Greek forms having the cognate termination -ιον.

This cannot be said to have been at any time a living suffix in Eng., but there appears to have been reminiscence of its function, combined with the false analogy of words in -RY, in the coining of a few nouns from verbs ending in an

r-sound, viz. *enquery* (c 1440), *inquery*, *inquiry* (16th c.), *f. enquire, inquire, expiry* (from 1752) *f. expire*, and a rare *transpiry f. transpire. Entreaty* (16th c.) is *f. entreat vb.* on the analogy of *treat, treaty*.

-y suffix⁵, representing AF., OF. *-e, -ee*, mod.F. *-é, -ée*:—L. *-ātu-, -ātā-* (see *-ATE*¹, *-ATE*²).

a. In sbs. = *-ATE*¹, as in (i) *COUNTY*¹, OF. *counte*, F. *comté*, L. *comitatus*, *f. comit-, comes* count, DUCHY, F. *duché*, L. *ducatus*, *f. duc-, dux* duke, TREATY, F. *traité*, L. *tractatus*, *f. tractare* to treat, (ii) ARMY, F. *armée*, Romanic **armāta* armed force, *f. armāre* to arm, DELIVERY, AF. *delivree*, ppl. sb. *f. deliver* to deliver, ENTRY, F. *entrée*, Romanic **intrāta*, *f. intrāre* to enter.

This suffix is represented under other forms in certain words, e.g. *assignee, committee, refugee* (F. *assigné, comité, réfugié*), attorney (OF. *atorné*), alley, journey, valley (F. *allée, journée, vallée*).

b. In adjs. = *-ATE*², as in *easy*, OF. *aisié* (F. *aisé*), *f. aisier* to ease. There are few general adjs. of this kind, but there is a considerable number of heraldic descriptive terms having this termination, the earliest example of which is *jerownde* (14th cent.), *gerundi* (1486), GYRONNY, a. OF. *geroné, gironné*, *f. giron* GYRON. Early adoptions of this class have the ending *-e*, later *-ee*, and (as early as the Book of St. Albans, 1486) often *-i*, later *-y*. With some, *-y* has become the regular form, as *barry, bendy, fretty, fusilly, gyronny, lozengy, nowy, paly* adj.², *sarcelly*; others are found commonly with either *-é, -ée, -ee*, or *-y*, as *botoné(e, -y, checky, chequee, nébulé, -y, tenné, -y, undé(e, undy)*; others, of more modern introduction, usually retain the French spelling, as *coupé, dancetté(e* (cf. *†dancy*), *écartelé, renversé, semée*; some have been anglicized with the native ppl. suffix, either temporarily or permanently, as *†besantid* (= *bezanty*), *escarteled, paled* ppl. adj.¹, *resarcelled, sarcelled*. In *wavy* (after *undy*) we have a rare instance of an analogical use of the suffix with a sb. of native origin.

-y suffix⁶, **-ie** (also 7-8 *-ee, -ey*), used to form pet names and familiar diminutives. The forms *-y* and *-ie* are now almost equally common in proper names as such, but in a few instances one or other spelling is preferred, as *Annie, Betty, Sally* (rather than *Anny, Bettie, Sallie*); in the transferred applications of these, as *jemmy, tommy, dicky*, and the like, *-y* prevails; in general hypocoristic forms *-ie* is the favourite spelling after Scottish usage, as *dearie, mousie*. The use of *-ey* is subject to the same rules as for *-y suffix*¹.

The use of this suffix in pet forms of proper names is found in Sc. as early as 1400; and in the 15th and 16th centuries instances become frequent; examples are *Cryste, Cristi* (f. *Cristin, Cristian*), *Pery* (f. *Pere Peter*), *Sandy* (f. *Sandre* for *Alisandre* Alexander), *Jamy* (f. *James*), *Michy* (f. *Michel*), *Richy* (f. *Richard*), *Roby* (f. *Robert*), *Edi* (f. *Ede, Ade Adam*), *Anny* (f. *Anne*), *Bessy* (f. *Elizabeth*). Such names were prob. modelled orig. upon forms like *Davy, Mathy* (= OF. *Davi, Mathé*), which have the appearance of being pet forms of *David, Mathou*. (Many have survived in Sc. surnames, as *Christie, Eadie, Pirrie, Ritchie, Christison, Mathieson, Robison*; *Davy* occurs as a surname in English use in the early 14th cent.)

The formation was greatly extended in Scottish and English use; whence *Annie, Billy, Carrie* (f. *Caroline*), *CHARLIE* or *CHARLEY*, *Fanny* (f. *Frances*), *JACKY, JENNY, JIMMY, JOHNNY, NANNY, Nellie* (f. *Ellen*), *PATTY, Reggie* (f. *Reginald*), *TOMMY, Willie*. Many female names have corresponding forms in Du. names with the suffix *-je*, as in *huisje* little house, *f. huis* HOUSE sb.¹; e.g. *Betty, Elsie, Hetty, Katy, Lottie, Matty, Sally* correspond to Du. *Betje, Elsie, Jetje, Kaatje, Lotje, Matje, Sellie*; but there is no evidence of historical contact.

Recently appended to surnames to form a familiar name. 1941 J. HILTON *Random Harvest* v. 352 She ran into his arms calling out: 'Oh, Smithy—Smithy—it may not be too late.' 1958 A. HACKNEY *Private Life* ix. 84 'Who's Old Kitey?' 'A Mr. Kite. He's our shop steward.' *Ibid.* xvii. 171 'Mr. Cox arranged it.'... 'You've got to be careful with old Coxy.'

The earliest recorded instances of the use of such proper names as appellatives are Scottish and belong to the beginning of the 16th century: viz. *Lowrie* (f. *Lowrens* Laurence) used for 'fox'; *Katy* and *Kitty* (f. *Katherine*), with the meaning 'lass, wench', tending to a specifically depreciatory sense, 'wanton, loose woman',

which senses belong also to the 18th century *Molly* and *Nanny* (as in *nanny-house* brothel); a few female names, viz. *Molly* and (dialectally) *Peggy*, have been used to designate an effeminate type of man.

The application of the female names to birds dates, according to our evidence, from the close of the 16th century; the wren is designated by *Kitty* and (more commonly) *Jenny*; in 1616 Ben Jonson calls a parrot *Polly*; in modern dialects *Peggy* is applied to various warblers and the pied wagtail, and *Betty* to the hedge-sparrow. Then, in the course of the 17th century, these names came to be applied to various mechanical contrivances, among which machines for spinning processes and the burglar's jemmy are prominent. This transference of application is illustrated by *Betty* (a burglar's jemmy, 1700), *Jenny* (in SPINNING-JENNY, 1783), *Jinny* (a stationary engine at a mine), *Peggy* (a washing-tub dolly, in various dialects).

Among male names the following are typical: *Johnny* is used for fellow, chap, *Jemmy* for the burglar's weapon, *Billy* for a roving machine; *Bobby, Charley, Dicky, Geordie, Jacky, Jockey, Tommy* exhibit a great variety of modes of application.

The first known instance of the application of the suffix to a common noun is LADDIE which appears in 1546 in the form *laddy*, used by John Bale; but there is no evidence until the 18th century of the generalization of *-y* for pet diminutives. Early instances are *dummie* (1595), *grannie* (1663), *dearie* (1681), *mousie* (1693, Sc.); *laddie, lassie*, and *sweetie* were used by Allan Ramsay, and these, with Burn's *birdie* and *mousie*, helped to popularize such formations in English generally; hence the appearance in the late 18th and early 19th century of *cookky, doggie, froggy, mannie, slavey*. In *blacky* and *darky* there remained something of the status of a proper name; cf. *Fatty* as a nickname. *Bookie* for *bookmaker* is a formation of a rare type; cf. *nighty* for *nightdress*.

There are two words that are generally held to contain this suffix, viz. *baby* (late 14th c.) and *puppy* (late 15th c.). With *baby* may perhaps be coupled *daddy* and *mammy*, although the evidence for these is not earlier than the 16th century; the pairs *babe* and *baby, dad* and *daddy, mam* and *mammy*, may have resulted from different phonetic reductions of original reduplicated forms **baba* (cf. BABAN), **dada, *mama*. The source of *puppy* (spelt *popi* in the Bk. St. Albans) is doubtful; *pup* is a back-formation from it.

Yankee (ˈjæŋki), *sb.* and *a.* Also 8-9 **Yankey**, **Yanky**, *pl.* **Yankies**. [Source unascertained.]

The two earliest statements as to its origin were published in 1789: Thomas Anburey, a British officer who served under Burgoyne in the War of Independence, in his *Travels* II. 50 derives *Yankee* from Cherokee *eanke* slave, coward, which he says was applied to the inhabitants of New England by the Virginians for not assisting them in a war with the Cherokees; William Gordon in *Hist. Amer. War* states that it was a favourite word with farmer Jonathan Hastings of Cambridge, Mass., c. 1713, who used it in the sense of 'excellent'. Appearing next in order of date (1822) is the statement which has been most widely accepted, viz. that the word has been evolved from North American Indian corruptions of the word *English* through *Yengees* to *Yankees* (Heckewelder, *Indian Nations* iii. ed. 1876, p. 77); cf. YENGEES.

Perhaps the most plausible conjecture is that it comes from Du. *janke*, dim. of *jan* John, applied as a derisive nickname by either Dutch or English in the New England states (J. N. A. Thierry, 1838, in *Life of Ticknor*, 1876, II. vii. 124). The existence of *Yank(e)y*, *Yankee*, as a surname or nickname (often with Dutch associations) is vouched for by the following references:

1683 *Cal. St. Papers, Colon. Ser.* (1898) 457 They [sc. pirates] sailed from Bonaco...; chief commanders, Vanhorn, Laurens, and Yankey Duch. 1684 *Ibid.* 733 A sloop... unlawfully seized by Captain Yankey. 1687 *Ibid.* (1899) 456 Captains John Williams (Yankey) and Jacob Everson (Jacob). 1687-8 MSS. *Earl of Dartmouth in 11th Rep. Hist. MSS. Comm.* App. v. 136 The pirates Yankey and Jacobs. 1697 DAMPIER *Voy.* I. iii. 38. 1725 *Inventory of W. Marr of Carolina in N. & Q.* 5th Ser. X. 467 Item one negroe man named Yankee to be sold.

yard (jɑ:d), *sb.*¹ Forms: 1 **geard**, 4-5 **3erd**(e, 4-6 **3ard**(e, yerde, 4-8 **yerd**, 4-9 **yaird**, (4 **3herd**, 5 **3eard**, 3ord, yorde, 6 **3harde**, 7 **yearde**, 8 *Sc.* **yeard**), 5-6 **3aird**, 6-7 **yarde**, 3- **yard**. [OE. *geard* str. masc. fence, dwelling, house, region = OS. *gard* enclosure, field, dwelling, MDu., Du. *gaard* garden, OHG. *gart* circle, ring, ON. *gārð* GARTH, (Sw. *gård* yard, Da. *gard* yard, farm), Goth. *gards* house, with corresp. wk. forms OFris. *garda* garden, OS. *gardo*, OHG. *garto* (MHG. *garte*, G. *garten*) garden, Goth. *garda* enclosure, stall. (OE. *geard* is the second element of *middangeard* MIDDENERD, *ortgeard* ORCHARD, *wingearð* WINYARD.)

The ulterior relations of these words are uncertain. Close affinity of sense is exhibited by the words derived from the Teut. root *gerd-*: *gard-*: *gurd-*, represented by GIRD *v.*¹ (OE. *gyrdan*, OHG. *gurtan*, ON. *gyrða*) and GIRTH *sb.*¹ (ON. *gyrð*, Goth. *gairda*), and those derived from an Indo-European root *ghort-*, viz. Gr. *xópros* farm-yard, feeding-place, food, fodder, L. *hortus* garden, *co-hors* enclosure, yard, pen for cattle and poultry, COHORT, COURT, OIR. *gori* cornfield; but there are phonological difficulties in the way of equating both groups of words. (OSl. *gradū* enclosure, town, Russ. *grad*, *gorod* town, as in *Petrograd*, *Novgorod*, Lith. *gàrda* hurdle, fold, are prob. borrowed from Teutonic.)

The general signification of the word is 'enclosure', the particular character of which is usually to be inferred from the context; the simple word is thus often felt to be short for a specific compound of it (see references in the various senses).]

Y chromosome. Genetics. Also †y chromosome. [Y 4 b.] A sex chromosome which occurs in only one of the sexes (in man and other mammals, the male) or in some species is absent altogether, its presence or absence in the zygote determining in man and many other species the sex of the organism.

1911 Biol. Bull. Jan. 119 We have associated the X and Y chromosomes of the male with sex-determination, but possibly they have some other meaning. **1933**, etc. [see X CHROMOSOME]. **1965** R. P. MOREHEAD *Human Path.* vi. 170/1 Proved cases of mutation involving the Y chromosome are

extremely rare. . . As Y chromosomes occur only in males, the characteristic pedigree of such mutations should contain only affected males, never affected females, and all affected males should transmit the defect to all their sons. **1974** P. CAVE *Dirty Picture Postcard* x. 57 You've buttonholed me to give me long and boring lectures upon Germaine Greer, the faulty Y chromosome and the drudgeries of housework and child-bearing. **1982** *Nature* 2 Dec. 404/2 When a Y chromosome is present the foetal gonad, which has the potential to become either ovary or testis, differentiates into a testis and, when absent, into an ovary. . . Recent genetic analysis shows that this first step is not as simple as first thought and appears to be controlled by an interaction between autosomal genes and a gene(s) on the Y chromosome, for normal male differentiation. **1983** J. R. S. FINCHAM *Genetics* ii. 72 In grasshoppers and other insects of the order Orthoptera. . . there is usually no Y-chromosome. The females are XX and the males just X.

Zend *yūš*, Lith. *jūs*, and Skr. *yū-yám*).

For the declension of the 2nd pers. pron. in OE. and ME. see THOU.

In the earliest periods of English *ye* was restricted to the nom. pl. In the 13th c. it came to be used as a nom. sing. = 'thou', first as a respectful form addressed to a superior. This use survives in modern dialects, esp. (in the form *ee*) in interrog. and imperative formulæ (e.g. *Dee* = 'do ye'), but also in objective uses = 'thee' (e.g. *Oi tell ee*). When *you* had usurped the place of *ye* as a nom., *ye* came to be used (in the 15th c.), vice versa, as an objective sing. and pl. (= 'thee' and 'you').

Now (in all uses) only *dial.*, *arch.*, or *poet.*; in ordinary use replaced by *you*.

[An affirmative particle having forms corresponding more or less exactly in all the other Teutonic languages: OFris. *gê*, *jê*, OS. *jâ*, (M)LG. *ja*, (M)Du.,

OHG., MHG. *ja*, *jâ*, (G. *ja*), ON. *já*, Goth. *ja*, *jai*, all derivable ultimately from a primitive Teut. **ja*, *je*, which has undergone modification in different directions as the result of sentence stress or emotional emphasis.

OE. (WS.) *ȝea* combined with the corresp. Anglian *ȝe* to produce the ME. type *ȝe(e)*, *ye(e)*; the Northumb. development of the Anglian form, *ȝie*, *ȝi* (cf. Northumb. **scieþ*, *scip* = WS. *scēap* SHEEP), gave a ME. type *ȝie*, continued in mod. north. dial. in *yi*, *yigh*, *yoi*. In later WS. the falling diphthong of *ȝea* became a rising one, *ȝeá*, *iá*, whence arose southern *3o* and northern *3a* (but cf. ON. *já*). In other respects the phonology of the English forms is obscure. The modern standard spelling *yea* and pronunciation (jer) show arrested development of the vowel, but the pronunciation (ji:) is current locally. ME. *ȝei*, *ȝey*, *ȝey3e* seem to point back to a doubled form **ȝeȝe*. The *e*-forms *ȝui*, *ȝoi* constitute a distinct southern type, with possibly a modern representative in Hampshire *yigh*.]

A. *adv.* A word used to express affirmation or assent: now ordinarily replaced by YES.

1. a. As simple affirmative, in answer to a question not involving a negative: = YES 1.

For the distinction formerly observed between *yea* and *yes*, see NAY *adv.* 1 and YES 2.

In ME. *ȝe* is sometimes accompanied by a pronoun repeating the pronominal subj. of the question (see quots. from *Ancren Riwele*, a 1225, and cf. the first quot. from the same text in 1 c).

OE. *omer*, *emer*, *emaer*, 'scorellus', OHG. *amerinc*, MHG. *gold(en)emer*, G. *emmerling*, *femmering*, *emmeritze*, *fembitze* (whence mod.L. *emberiza*), LG. *geelemerken* (dim., with *geel* 'yellow' prefixed). Besides these forms there is a type represented by OE. *clodhamer* (coupled with *feldeware*) 'scorellus', of doubtful formation (? corruption of **goldhamer*) and MHG. *hamere*, *golthamere* 'amarellus'. The origin and identity of *hamer*, -ere are uncertain; but connexion with or assimilation to OE. -hama, OHG. -hamo covering, skin, feathers (see HAME¹) seems probable, and the form YELLOW-HAM, which may go back to an OE. type **geolo-hama* the yellow-feathered bird, gives support to the hypothesis.

Both forms -hammer and -ammer are historically justifiable; Yarell's proposed rejection of -hammer (see *British Birds*, 1843, I. 446) is based on insufficient evidence.

The bird has many local names into which the word *yellow* or *gold* enters, viz. YOWLRING (YORLING), YOLDRING,

YOWLEY, *yellow bunting*, *yellow yite*, *gold spink*, *gold finch*. Cf. (in addition to the names given above) MLG. *gelegorsse*, -gerse, Du. *geelgors*, LG. *gelgans*, -gös, G. *gelbling*, *gelbammer*, *goldfink*, MHG. *golthans*, *gol(hammer)*, G. dial. *golmer*, Sw. *gulsparf*, dial. *golspink*, Norw. dial. *gulspikke*, *gulspurv*, *gulskur*, Du. *guulspurv*.]

The acceptance of this derivation necessitates the assumption that *gése* was orig. applicable as an answer to a particular class of question, which is intrinsically not improbable. The suggested derivation from **gēa swā* 'yea, so' is phonologically inadequate.

The pronunciation (jɛs), still widespread in dialects, was formerly current in polite speech and is recorded as such in Walker's *Pronouncing Dict.*

A. *adv.* A word used to express an affirmative reply to a question, statement, command, etc.

1. a. In answer to a question not involving a negative; standing for the affirmative sentence corresponding to the interrogative one constituting the question: = 'It is so.' Phr. to say yes: to assent, comply; *spec.* to accept a proposal of marriage.

Formerly usually more emphatic than *yea* or *ay*; in later use taking the place of these as the ordinary affirmative particle: cf. 2 below.

b. *Yes and No*: a round game (see *quots.*).

1843 DICKENS *Chr. Carol* iii. It was a Game called Yes and No, where Scroogee's nephew had to think of something, and the rest must find out what; he only answering to their questions yes or no, as the case was. 1854 *Round Games* (ed. 2) 111 Yes and No. This game... was formerly called *Animal, Vegetable, and Mineral*. A player was sent out of the room, and a word (or rather thing) thought of. The player was called in, and proceeded to ask certain members of the company to which of the three kingdoms—*animal, vegetable, or mineral*—the object in question belonged... He then proceeded to ask other questions, to which the players were only compelled to answer 'Yes' or 'No'.

c. *yes and no*, in answer to a question to which it is difficult to reply: partly, perhaps, to a certain degree.

1873 C. M. YONGE *Pillars of House* I. vii. 154 'Do you come from his father?' 'Well—yes and no. His father is still in Oregon; but he and I have always been one.' 1896 'M. PETRIE *Murder by Precedent* v. 78 'That's why you gave him a home?' he asked. 'Well yes and no.' 1981 B. MURPHY *Enigma Variations* xiii. 137 'Do you believe that if you continue seeing me you'll be damned?' 'Yes and no.'

d. *yes or no*: used *attrib.* (freq. hyphenated) to denote a question, etc., answerable by, or definable in terms of, *yes* or *no*; *spec.* in *Linguistics*. Also *ellipt.* as *yes-no*.

1924 [see PRONOMINAL a. 2]. 1935 [see OKEY-DOKE a.]. 1952 *Mind* LXI. 52 The yes-or-no question is the one we like to ask. 1957 D. L. BOLINGER in *Publ. Amer. HOUSEHOLDER in Saporta & Bastian *Psycholinguistics* 17/1 Beside this graded kind of 'grammaticalness'... there is also an absolute yes-or-no type. 1963, 1964 [see MORE C. *adv.* 2]. 1966 A. BATTERSBY *Math. in Management* vii. 180 This type of work [sc. simulation] lends itself very readily to electronic computation, because it comprises a number of repetitive 'loops' of instructions, controlled by simple 'yes-no' decisions. 1976 H. KEMELMAN *Wednesday Rabbi got Wet* xlv. 257 The law is not a yes-or-no thing. 1977 *Times* 8 Feb. 17/1 'The Government is proposing to put a single yes-no question to the voters of Scotland and Wales. 1979 *Economist* 16 June 98/2 Whitehall's traditional passion for compromise only makes for trouble in a crisis which needs yes-or-no decisions, fast. 1984 *Word* XXXV. 188 Sentences other than declaratives are broken up into a speech act operator (a wh-question operator, a yes-no question operator, a command operator, etc.) and a propositional kernel.

2. a. In answer to a question involving a negative.

Formerly regularly used thus (and as in b) in distinction from *yea* (see YEA 1); the distinction became obsolete soon after 1600, and since then *yes* has been the ordinary affirmative particle in reply to any question positive or negative, and *yea* has become archaic. The distinction was still observed in the Bible of 1611, in which *yes* occurs four times (all in N.T.), always after a negative question or statement; the Revisers of 1881, apparently in ignorance of the usage, altered it in all these instances to *yea*.

(Also 1–6 occas. as two words.) [OE. *geostran*, *zystran* dæg, Lindisf. Gosp. *gioster* doeg, Rushw. Gosp. *gestor* dæge, also with metathesis (WS.) *gierstan*, *gyrstan* dæg. The only known parallel to this collocation is Goth. *gistradagis aþrion*, tomorrow; in OE., the simple *giestron* is found only once, but in the other languages the simple word is regularly used alone in the sense of 'yesterday': OFris. **iester*, **iers(t)ne* (Nfris., Wfris. *jister*, Efris. *jursen*, *jersten*), MLG. *gisteren*, *-ern(e)*, (LG. *gistern*, *güster(n)*, MDu. *ghisteren*, *ghister* (Du. *gisteren*, also *dag van gister*), OHG. *gestaron*, *gest(e)ren* (MHG. *gestern*, *gester*, G. *gestern*). The word has the form (with and without inflexional -n) of a comparative **ghistr-*, *ghjestr-* (cf. L. *hester-nus* of yesterday) of an Indo-eur. **ghjes* represented outside Teutonic by Skr. *hyás*, Gr. *χθές*, Alb. *dje*, L. *heri* yesterday (ON. *i gær* yesterday, tomorrow, shows a variant with long vowel).

The twofold meaning exhibited in the above forms and in OHG. *egestern* day before yesterday, day after tomorrow, indicates that the original application of the word was to a day preceding or following the present. The following apparent example of the English word with the meaning 'tomorrow' is isolated:—

More emphatically adversative than BUT *conj.* 24, and freer in construction; formerly sometimes placed after, and still sometimes in the midst of, its clause; and/or but may precede yet. Nearly equivalent to STILL *adv.* 6 b; but still indicates mainly that the fact or condition remains unaltered by the adverse one; yet usually expresses some degree of surprise at it as something unexpected.

This verb has had a remarkable sense-development in English owing to its having been used as an equivalent of L. *reddere* and F. *rendre*, or their compounds. In some of the related languages the word has shown tendencies to develop in the same directions, but the only generally surviving senses on the Continent are 'to be worth, to be valid, to concern, apply to', which are not represented at all in the English word.]

The latter name brings out the character of the phenomenon, but at the same time suggests a point related to absolute strength or cohesion; I have therefore spoken of this point in the present work as the yield-point. **1889** *Telegr. yl, obs. form of ILL, ISLE.

-yl (il, ail), formerly occas. -ule, a terminal element of chemical terms, ad. G. -yl, f. Gr. ὕλη wood, matter, substance (see HYLE), used for 'chemical principle, radical'. It was introduced by Wöhler and Liebig (*Ann. der Pharm.* (1832) III. 262), and first used by them in the term *benzoyl*; other early names were *éthyle* (*éthule*), *élayle* (Berzelius), *dadyle*, *peucyle*, *citronyle*, *citryle* (Blanchet and Sell). Some fifteen in anglicized form, including *acetyl*, *amyl*, *cinnamyl*, *glyceryl*, *salicyl*, appear in the *Elements of Chemistry* by T. Graham, 1842, who also invented the general term *basyle* for a body which unites with oxygen to form a base. *Methyl* is peculiar in being a back-formation from *methylene*.

-yl is used in forming the names of radicals compounded of two or three elements in various atomic proportions, which behave in combination like simple elements and are the constant bases of series of compounds (though they may not be themselves obtainable in a free state). Thus *carbonyl* CO, *hydroxyl* HO, *sulphuryl* SO₂, are compounds of carbon, hydrogen, and sulphur respectively. The greater number are compounds of carbon and hydrogen, either alone, as *amyl*, *ethyl*, *deutyl*, *trityl*, or with oxygen, as *acetyl*, *lactyl*.

b. Now also in more formal use in *Organic Chem.*

1952 *Jrnl. Chem. Soc.* 5075 Rule 58.5. Radicals derived from amino-acids which have trivial names in *ine* by removal of OH from all -CH(NH₂)-CO₂H and related groups will be named by replacing the ending *ine* with *yl*. **1965** *Recommended Names for Chemicals used in Industry (B.S.I.)* 11 Univalent radicals derived from cycloalkanes with no side chain are named by replacing the ending '-ane' of the hydrocarbon name by '-yl'. **1966** [see FURYLL]. **1971** *Nomencl. Org. Chem.* (I.U.P.A.C.) ylem ('i:lem). *Astr.* [f. med.L. *hylem*, acc. of *hylē* HYLE.] In the big-bang theory, the primordial matter of the universe, orig. conceived as composed of neutrons at high temperature and density.

[**1390**: see HYLE.] **1948** R. A. ALPHER in *Physical Rev.* LXXIV. 1581/1 Very shortly after the beginning of the universal expansion, the ylem was a gas of neutrons only. [Note] According to Webster's New International Dictionary...the word 'ylem' is an obsolete noun meaning 'The primordial substance from which the elements were formed.' It seems highly desirable that a word of so appropriate a meaning be resurrected. **1954** *Sci. Amer.* Mar. 61/2 As the Universe went on expanding and the temperature of ylem dropped, protons and neutrons began to stick together, forming deuterons...and heavier elements. **1959** J. BLISH *Clash of Cymbals* vii. 171 The ylem was the primordial flux of neutrons out of which all else emerged. **1974** FRAUENFELDER & HENLEY *Subatomic Physics* xviii. 475 It is interpreted as the radiation that is left over from the primordial fireball and thus provides some information about the conditions in the ylem.

Hence **y'lidic** *a.*

These compds. are called ylides. **1970** *Nature* 25 July 335/2 Silylated ylides of phosphorus, arsenic and sulphur, in which the silyl group is both a stabilizing and an efficient leaving group, transferring the ylidic moiety in very mild conditions. **1972** S. -ylidene ('ɪl-, -'aɪlɪdɪn), *suffix. Chem.* [f. as -IDENE.] Used in place of -IDINE when the name of the parent compound does not end in -yl.

1971 *Nomencl. Org. Chem.* (I.U.P.A.C.) Later, when the form *ȝode*, arising from the development of *eo* as a rising diphthong, became established, it would help to extend the currency of the form *ȝede* by analogical influence upon *ede*, the normal representative of *éode* with a falling diphthong. A parallel development is furnished by ME. *York, Yerk*:—OE. *Eoforwíc* (see YORK). Moreover, the OE. compound form *ȝeéode*, pa. t. of *ȝegán* IGO *v.*, examples of which are here given with the meaning of the simple *éode*, may have survived in localities where the prefix *ȝe-* = *y-* persisted in ME., and so have furthered the spread of *ȝede* and *ȝode*.

G. STEEL *Cricket* (Badm. Libr.) iii. 133 The ordinary definition of a 'yorker' is a ball that pitches inside the crease, and this, no doubt, is correct so far as it goes, but it does not go far enough. It really should be, any ball that pitches directly underneath the bat. It is quite possible for a man to be bowled out with a 'yorker' when he is two or three yards out of his ground, if he misjudges the ball, and allows it to pitch directly beneath his bat, although the ball pitches as far from the crease as he is standing. The most deadly sort of 'yorker', however, is the one that pitches about three or four inches inside the crease.

'young 'lady.

1. A lady who is young; a young woman, usually unmarried, or a girl, orig. one of superior social position; formerly often used to connote the artificiality, primness, sentimentality, etc., attributed to young ladies.

This expression is now avoided in polite use, except among some old-fashioned speakers and jocularly. Various particular applications formerly existed; thus, from the 17th to the early 19th cent. a young woman or a girl waited upon by a maid-servant was called "her young lady"; until late in the 19th cent. girls at boarding schools were spoken of and addressed as young ladies. At the present day, the term is freq. applied, with the intention of avoiding the supposed derogatory implication of *young woman*, to female shop assistants or clerks of good appearance and manners. On the pronunciation John Walker in his *Pronouncing Dict.* 1791, says: 'When the emphasis is upon this word, it is always pronounced full and open like the noun *Ewer*; as, "The moment I had read *Your* letter I sat down to write *Mine*"; but when it is not emphatical it generally sinks into *yur*, exactly like the last syllable of *Law-yer*; as, "I had just answered *yur* first letter as *yur* last arrived." Here if we were to say, "I had just answered *yur* first letter as *your* last arrived," with *your* sounded full and open like *Ewer*, as in the former sentence, every delicate ear would be offended.' Since this was written, there has been a reaction in favour of less obscuration of the vowel.]

yrare [cf. Y- 3 b], pseudo-arch. f. RARE *a.*¹

1742 SHENSTONE *Schoolmistr.* xvii, With sugar'd Cates she doth them greet, And Gingerbread y-rare.

yrast ('ræst), *a. Nucl. Physics.* [See quot. 1967.] Pertaining to or designating any nuclear energy level that is the lowest for some value of the spin; *yrast line*, a line on a graph of spin against nuclear rotational energy (or some function of each of these), connecting points representing the various yrast states of a nuclide.

1967 J. B. GROVER in *Physical Rev.* CLVII. 832 It has been proposed that the lowest-energy excited state at a given

angular momentum be called 'yrast' level for that angular momentum. *Ibid.* 832/1 The yrast levels play a crucial role in deciding the course and outcome of many nuclear reactions. [Note] By 'yrast' level of a given nucleus, at a given angular momentum, is meant the level with least energy at that angular momentum. The English language seems not to have a graceful superlative form for adjectives expressing rotation. Professor F. Ruplin (of the Germanic Languages Department of the State University of New York, Stony Brook) suggested the use of the Swedish adjective *yr* for designating these special levels. This word derives from the same Old Norse verb *hvirfla* (to whirl) as the English verb *whirl*, and forms the natural superlative, *yrast*. It can thus be understood to mean 'whirlingest', although literally translated from Swedish it means 'dizziest' or 'most bewildered'. 1971 *Physics Lett.* XXXIVb. 575 Non-axially symmetric deformation of a nucleus is introduced to account for the admixture of the collective rotational bands and the distribution of the yrast levels. 1974 FRAUENFELDER & HENLEY *Subatomic Physics* xvi. 435 The yrast line of a nucleus gives *E* as a function of *J*. 1983 *Nucl. Physics A*. CDIII. 421 Precession of the yrast 2^+1 , and 4^+1 , and the second 2^+2 states in ^{24}Mg have been measured.
