The conception and the phrase (*causa deficientis*) appear first in St. Augustine, in his discussion of the origin of evil and of God's relation to it, and are connected with his doctrine that evil being nothing positive, but merely a defect, could have no efficient, but only a deficient cause. It was also used by Thomas Aquinas (who distinguished the physical sense of the phrase from the moral); in English it came into vogue during the Calvinistic-Arminian controversy in 16-17th c., in reference both to the origin of evil and to the reprobation of the wicked. Cf. DEFECTIVE *a.* 6.

1893 J. WALTHER in *Nat. Geogr. Mag.* IV. 176 We say of the wind that it 'sweeps' over the ground; for this word means nothing else than that the wind cleans the ground of all loose particles that cover it. Translated into technical geologic language, it is called 'deflation', but that means nothing else than the every-day word 'sweep'. 1898 J. GEIKIE *Earth Sculpture* 20 The transporting action of the wind, or 'deflation' as it is termed, goes on without ceasing. 1910 LAKE & RASTALL *Text-bk. Geol.* 73 Erosion by wind divides itself naturally into two parts—removal by material or deflation, which of course comes under the heading of transport, and actual corrosion or wearing away of the rocks by the dynamical effect of moving sand. 1954 W. D. THORNBURY *Princ. Geomorphol.* xii. 302 Some geologists... believe that deflation is a relatively insignificant process... in the reduction of desert landscapes. 1970 R. J. 3. The action or process of deflating currency; an economic situation characterized by a rise in the value of money and a fall in prices, wages, and credit, usually accompanied by a rise in unemployment. Cf. INFLATION, DISINFLATION.

1920 R. G. HAWTREY in *Rep. Brit. Assoc.* 1919 252 To restore a depreciated unit to its normal gold value requires a measure of deflation. Deflation, which is a reversal of the process of inflation, must mean a decrease in the aggregate of money incomes. 1920 *Glasgow Herald* 11 May 10 The process of deflation likely to result from the new rights of the Federal Reserve system to discount on a graded scale. 1923 *Guernsey Star* 25 Jan. The primary ground on which a policy of gradual deflation is recommended is that it raises the exchange value of the pound sterling in relation to the dollar and hastens our return to the gold standard. 1956 *Ann. Reg.* 1955 227 Influential bankers and industrialists complained that the 'credit squeeze' had been overdone and warned against the danger of deflation.

E. HUTCHINSON *Treat. Limnol.* 1. i. 125 There are a number of basins, the origin of which appears to involve wind action, either through its effect on the distribution of sand or through the deflationary or erosive action of wind acting on broken rock. 1959 *Ann. Reg.* 1958 478 The deflationary policies adopted by the Government in September 1957. 1962 *Listener* 5 Apr. 611/2 This makes him apply a deflationary technique to just those matters which have most strikingly affected British party life in the last century and a half. 1963 *Ibid.* 24 Jan. 179/1 Beneath the deflationary mockery of Beatrice and Benedick there is much human affection and goodwill.

Telephone* 1 In 1820, Oersted discovered that an electric current would deflect a magnetic needle.

b. *Optics.* To bend (a ray of light) from the straight line; *esp.* to bend away from a body. 1796 BROUGHAM in *Phil. Trans.* LXXXVI. 264 The first knife deflected the images formed by the second, in precisely the same degree that it inflected those images which itself formed. 1811 A. T. THOMSON *Lond. Disp.* (1818) p. xxxvii. When a ray of light moving in a straight line passes within a certain distance of a body parallel to its direction, it bends towards the body, or is *inflected*; but when the body parallel to its course is at a greater distance, the ray is bent from it, or *deflected*. 1879 HARLAN *Eyesight* iii. 36 If we look at an object through a prism, the rays of light coming from it are deflected.

[ME. *a.* OF. *defoule-r* (*defoler*, *-fuler*, *-fuller*) to trample down, oppress, outrage, violate, deflower, *f.* DE- I. + *fouler* (*foler*, *fuler*) 'to tread, stampe, or trample on, to bruise or crush by stamping' Cotgr. (= Pr. *folar*, Sp. *hollar*, It. *follare*):—late L. **fullāre* to stamp with the feet, to full (cloth), connected with L. *fullo*, -*ōnem* fuller, med.L. *fullātōrium* a fulling-mill, etc. Senses 1-5 existed already in OF.; the senses 'trample in the mud', and 'violate chastity', thus coming with the word into English, naturally suggested that it contained the native adjective FOUL, OE. *ful*, and gave rise to senses 6-8, which derive from 'foul', as well as (apparently) to the collateral form DEFILÉ (*q.v.*), on the analogy of the equivalence of *be foul*, *befile*. The phonology of the variant *defuyle*, *defoyle* (found nearly as early as *defoule*), has not been satisfactorily made out: see FOIL *v.* It occurs in the earlier senses, and does not appear to have been specially connected with *defile*.]

Phonologically, it might answer to L. *dēfēcāre*, *dēfēcāre* (see DEFECAE); but the sense offers difficulties. It has been suggested, however, that if b were the starting-point, it might conceivably answer to a late L. *dēfēcāre stomachum* (cf. *dissolvere stomachum* Pliny). But the sense-development remains uncertain, and the order here followed is provisional. It may be that 'dissolve' was the primary sense.]

The sign for degrees is °, thus 45° = forty-five degrees.

This division of the circle is very ancient, and appears to have been originally applied to the circle of the Zodiac, a degree being the stage or distance travelled by the sun each day according to ancient Babylonian and Egyptian computation, just as a sign represented the space passed through in a month.

13. *Alg.* The rank of an equation or expression as determined by the highest power of the

unknown or variable quantity, or the highest dimensions of the terms, which it contains.

Thus $x^3 + x^2 \cdot x^2 + xy$, are both expressions of the third degree, the terms x^3 and $x^2 \cdot x^2$ being each of 3 dimensions. In algebraic geometry, the degree of a curve or surface is that of the equation expressing it. † *parodic degree*. see *quot.* 1730.

Theism conveys no such implication.

Nichols *Conference with a Theist*, 1696); but the negative aspect of deism, as opposed to Christianity, became the accepted one, and *deist* and *theist* were differentiated as in quotes. 1878 80.)

del (del). *Math.* [Short for DELTA, from its being represented by an inverted delta (sense 1).] A name of the symbolic operator ∇, defined as $i \frac{\partial}{\partial x} + j \frac{\partial}{\partial y} + k \frac{\partial}{\partial z}$.

1901 GIBBS & WILSON *Vector Analysis* iii. 138, $i \frac{\partial}{\partial x} + j \frac{\partial}{\partial y} + k \frac{\partial}{\partial z}$. This symbolic operator ∇ was introduced by Sir W. R. Hamilton and is now in universal employment. There seems, however, to be no universally recognized name for it, although owing to the frequent occurrence of the symbol some name is a practical necessity. It has been found by experience that the monosyllable *del* is so short and easy to pronounce that even in complicated formulae in which ∇ occurs a number of times no inconvenience to the speaker or hearer arises from the repetition. ∇ *V* is read simply as 'del *V*'. 1924 C. E. WEATHERBURN *Adv. Vector Analysis* i. 4 ∇ *V* (pronounced *del V*). 1962 CORSON & LORRAIN *Introd. Electromagn. Fields* i. 6 Gradient is commonly abbreviated as *grad*, and the operation on the scalar *f* defined by the term gradient is indicated by the symbol ∇, called *del*. 1964 S. SIMONS *Vector Anal.* v. 69 If we define a vector differential operator ∇ (called 'del' or 'nabla') by ∇ = $i(\partial/\partial x) + j(\partial/\partial y) + k(\partial/\partial z)$, then it follows...that $\text{grad } V = \nabla V$.

delicātus in OF. was *deliē* 'fine, slender, delicate': see DELIE.

(The etymology of L. *delicātus* appears to be quite uncertain: several distinct suggestions are current. Even the primary sense is doubtful; but, if not originally connected with *delicta* (DELICE), it seems to have been subsequently associated therewith. The word had undergone considerable development of meaning already in ancient Latin; in Romanic it received further extension in the line of meaning 'dainty, tenderly fine, slender, slight, easily affected or hurt'; these Latin and Romanic senses have at various times been adopted in English, often as literal adaptations of the Latin word in the Vulgate, etc.; and the history of the word here is involved and difficult to trace. The following arrangement is more or less provisional.)

Della Crusca (della 'kruska). [It. *Accademia della Crusca*, lit. Academy of the bran or chaff.] The name of an Academy established at Florence in 1582, mainly with the object of sifting and purifying the Italian language; whence its name, and its emblem, a sieve.

The first edition of its Dictionary, the *Vocabolario degli Accademici della Crusca*, appeared in 1612, and the fourth, 1729-38, has long been considered as the standard authority for the Italian language. A new edition on more historical lines was begun in 1881.

Hence **Della-Cruscan** *a.*, of, pertaining to, or after the style of the Academy della Crusca, or its methods; also, applied to a school of English poetry, affecting an artificial style, started towards the end of the 18th c.; *sb.* a member of this Academy, or English school of poetry. Hence **Della-Cruscanism**.

One of the noted writers of this school was Mr. Robert Merry, who (having been elected a member of the Florentine Academy) adopted the signature of *Della Crusca*, whence the name was extended to the school as a whole. [1796 *GIFFORD Mætiad* Introd. 8-9 While the epidemic malady was spreading from fool to fool, Della Crusca [i.e. Merry] came over [from Italy], and immediately announced himself by a sonnet to Love... and from one end of the kingdom to the other, all was nonsense and Della Crusca.] 1815 *W. The transition from the Latin sense 'give in charge, entrust, commit, commend' to the Romance sense 'request, ask', was probably made through the notion of *entrusting* or *committing* to any one a duty to be performed, of *charging* a servant, or officer, with the performance of something, whence of *requiring* its performance of him, or *authoritatively requesting* him to do it. Hence the notion of

asking in a way that commands obedience or compliance, which the word retains in English, and of simple asking, as in French. An indirect personal object (repr. the L. dative) would thus be a necessary part of the original construction, but it had ceased to be so before the word was adopted in England, where the earliest use, both in Anglo-Fr. and English, is to *demand a thing* simply. The verb probably passed into the vernacular from its legal use in Anglo-French.]

a. lit. (a) originally in reference to the meridian dividing the Spanish from the Portuguese Indies.

The bull of 4 May 1493 'sobre la particion del oceano' fixed the Line of Demarcation at 100 leagues west of the Cape Verde Isles; the 'Capitulacion de la particion del Mar Oceano entre los Reyes Catolicos y Don Juan Rey de Portugal', of 7 June 1494, definitely established it at 370 leagues (17½ to an equatorial degree) west of these isles, or about 47° long. W. of Greenwich in the Atlantic, and at the anti-meridian of 133° E. long. in the East Indies. The word occurs in the latter document 'dentro de la dicha limitacion y demarcacion'. deme (di:m), *sb.*² [*ad. Gr.* *δήμος* district, township.]

1. A township or division of ancient Attica. In modern Greece: A commune.

2. *Biol.* Any undifferentiated aggregate of cells, plastids, or monads. (Applied by Perrier to the tertiary or higher individual resulting

from the aggregate integration of merides or permanent colonies of cells.)

1883 P. GEDDES in *Encycl. Brit.* XVI. 843/1 The term colony, corm, or deme may indifferently be applied to these aggregates of primary, secondary, tertiary, or quaternary order which are not, however, integrated into a whole, and do not reach the full individuality of the next higher order. *Ibid.* 843/2 Starting from the unit of the first order, the plastid or monad, and terming any undifferentiated aggregate a *deme*, we have a monad-deme integrating into a secondary unit or dyad, this rising through dyad-demes into a triad, these forming triad-demes, etc.

3. *Ecol.* A local population of closely related plants or animals; also used as the second element of more precise terms, as in *ecodeme*, *gamodeme*, *topodeme*, etc. Hence *demo*logical *a.*

1939 GILMOUR & GREGOR in *Nature* 19 Aug. 333/1 In the course of work on the experimental delimitation of botanical groups, the need has arisen for a term which can be applied to any specified assemblage of taxonomically closely related individuals. . . We propose the term *deme* (from the Greek δῆμος) for this purpose, with appropriate prefixes to denote particular kinds of demes. 1954 *Genetica* XXVII. 150 The essence of the deme terminology is the construction of a series of category-terms by the addition of one or more virtually self-explanatory prefixes to the 'neutral' suffix '-deme'. *Ibid.* 151 Sometimes, however, demological units will coincide with recognised taxa. 1961 G. G. SIMPSON *Princ. Animal Taxon.* v. 176 The smallest unit of population that has evolutionary significance is a group of individual animals (of one species or subspecies) so localized that they are in easy and more or less frequent contact with each other. . . That minimal population unit is called a deme. 1966 R. L. SMITH *Ecology & Field Biol.* xxiii. 431 Collectively, individuals within each group make up a genetical population, or deme. . . Individuals that make up the deme are not identical. 1969 *Nature* 22 Nov. 750/1 The patterns of polymorphisms he found in Arizona indicate that within a species there are small units, or demes, of the order of a hundred or so mice that do not mix with other demes.

Though the correct Latin equivalent was *dominicum*, in med.L. it was often represented by *dominium*, or by *domanium*, a latinized form of the vernacular word.

The Anglo-French spelling *demesne* of the law-books, and 17th c. legal antiquaries, was partly merely graphic (the quiescence of original *s* before a consonant leading to the insertion of a non-etymological *n* to indicate a long vowel), as in *mesne* = OF. *meien*, *meen*, *meon*, mod.F. *moyen*, partly perhaps influenced by association with *mesne* itself, in 'mesne lord', or with *mesnie*:—*mansiónata* house, household establishment. *Demesne* land was app. viewed by some as *terra mansiónatica*, land attached to the mansion or supporting the owner and his household. Perhaps also Bracton's words (see sense 3) gave the notion that the word has some connexion with *mensa*. The prevailing pronunciation in the dictionaries and in the modern poets is (dɪ'mi:n); but (dɪ'meɪn) is also in good legal and general use, and is historically preferable: cf. the variant form *domain*.]

1. Possession.

[In Germanic, including English, law, the primary idea in relation to property is *possession*, not *ownership* (= Roman

dominium), as we now understand it. Hence, derivatives of *L. dominium* and *proprietas* became in medieval law chiefly or even exclusively associated with possession. (Sir F. Pollock.)]

1. *Law*. Possession (of real estate) as one's own. Chiefly in the phrase *to hold in demesne* (*tenere in dominico*), i.e. in one's own hands as possessor by free tenure. (Formerly sometimes in *pl.* by confusion with senses in II.)

Applied either to the absolute ownership of the king, or to the tenure of the person who held land to his own use, mediately or immediately from the king. Opposed to 'to hold in service' (*tenere in servitio*): if A held lands, immediately or mediately of the king, part of which he retained in his own hands, and part of which were in turn held of him by B, he was said to hold the former 'in demesne', and the latter 'in service'. B, in his turn, might hold his portion wholly 'in demesne', or partly also 'in service' by admitting a tenant under him. In every case, the ultimate (free) holder, 'the person who stands at the bottom of the scale, who seems most like an owner of the land, and who has a general right of doing what he pleases with it, is said to hold the land in demesne'. Prof. F. W. Maitland.

b. *in his demesne as of fee* (*in dominico suo ut de feodo*): in possession as an estate of inheritance.

Not applied to things incapable of physical possession, such as an advowson, for which the phrase is *ut de feodo*, or *ut de feodo et jure*. (Elphinstone, etc. *Interpr. of Deeds*, 1885, 571-2.) The phrase is quite erroneously explained by Cowell, *Interpr.* s.v. *Demaine*.

II. A possession; an estate possessed.

3. An estate held in demesne: land possessed or occupied by the owner himself, and not held of him by any subordinate tenant. a. In the wider sense, applied to all land not held of the owner by freehold tenants, i.e. including lands held of him by villein or copyhold tenure. b. In a more restricted sense, excluding the land held by the villeins or copyholders, and applied only to that actually occupied or held 'in hand' by the owner. (Cf. Vinogradoff, *Villainage in Engl.* 223-4.) Hence c. in modern use, The land immediately attached to a mansion, and held along with it for use or pleasure; the park, chase, home-farm, etc.

demi ('demi), *sb.*, *a.*, prefix. Also 5-6 dimi. [F. *demi* — L. *dimidium* half: see DIMIDIATE. The Fr.

word is a *sb.* and *adj.*, and much used in combination. It began to be used in English in the 15th c. attrib. in *Heraldry*, and in the 16th c. in names of cannon, and soon passed to other uses. At first it was often written separately; hence it was also treated as a simple *adj.*, and occasionally as a *sb.* (In certain uses the separate word survives as DEMY, *q.v.*) But *demi-* is now almost always hyphenated to the word which it qualifies, and it has become to a large extent a living element, capable of being prefixed to almost any *sb.* (often also to *adjs.*, and sometimes to verbs.)

demi-john ('dēmīdʒɒn). Forms: 8 demijan, 9 demijejan, demie-john, demijohn. [In F. *dame-jeanne* (1694 Th. Corneille *dame-jane*, 1701 Furetière *Dame Jeanne*, lit. 'Dame Jane'); so Sp. *dama-juana* (as if *Dama Juana*); mod.Pr., in different dialects, *dama-jana*, *damajano*, *damojano*, *damejano*, *dabajano*, *debajano*; Cat. *damajana*; It. *damigiana*; mod. Arabic *damajānah*, *dāmājānah*, etc. in 19th c. lexicons.

The current Eng. form is the result of popular perversion as in 'sparrow-grass'; the earlier *demijan*, *demijejan*, approach more closely to the F. and Rumanic, whence the word was adopted. The original nationality and etymology of the word are disputed: see Rev. A. L. Mayhew in *Academy* 14 Oct. 1893. Some have assumed the Arabic to be the source of the Rumanic forms, and have sought to explain this as of Persian origin, and derived from the name of the town *Damhān* or *Damhān*, a commercial emporium S.E. of the Caspian. But this is not supported by any historical evidence; moreover, the word does not occur in Persian dictionaries, nor in Arabic lexicons before the 19th c., and the unfixedness of its form (*dāmājānah*, *dāmājānah*, *dāmājānah*, *dāmājānah*) points, in the opinion of Arabic scholars, to its recent adoption from some foreign language, probably from Levantine use of It. *damigiana*. Assuming the word to be Rumanic, some have taken the Provencal and Catalan forms as the starting-point, and conjectured for these either a L. type **dimidiāna* from *dimidium* half (Alart in *Rev. Lang. Rom.* Jan. 1877), or the phrase *de mediāna* of middle or mean (size) (in illustration of the phrase 'ampolas de mieja meigera' = L. *ampullas de media mensura*). But these suggestions fail to explain the initial *da-* prevalent in all the langs.; on account of which M. Paul Meyer (like Littré) thinks that all the Rumanic forms are simply adaptations or transliterations of the French, this being simply *Dame Jeanne* 'Dame Jane', as a popular appellation (cf. *Bellarmino*, *greybeard*, etc.). This is also most in accordance with the historical evidence at present known, since the word occurs in French in the 17th c., while no trace of it equally early has been found elsewhere.]

A large bottle with bulging body and narrow neck, holding from 3 to 10 (or, in extreme cases, 2 to 15) gallons, and usually cased in wicker- or rush-work, with one or two handles of the same, for convenience of transport.

Demijohns of clear glass, of ovate-quadrilateral section in the body (14 × 16 inches diam.), are employed to export vinegar and spirits to the West Indies, and are in common household use in the islands. The name is sometimes also given to vessels of earthenware or stoneware similarly cased.

Demogorgon (di:məʊ'gɔ:gən). *Myth.* [late L. *Demogorgon*, having the form of a derivative of Gr. *δημος* people + *γοργός* grim, terrible, whence *γοργύς* Gorgon; but of uncertain origin: see below.]

Name of a mysterious and terrible infernal deity.

First mentioned (so far as known) by the Scholiast (Lactantius or Lutatius Placidus, ? c. 450) on Statius *Theb.* iv. 516, as the name of the great nether deity invoked in magic rites. Mentioned also by a scholiast on Lucan *Pharsalia* vi. 742. Described in the *Repertorium* of Conrad de Mure (1273) as the primordial God of ancient mythology; so in the *Genealogia Deorum* of Boccaccio. The latter appears to be the source of the word in modern literature (Ariosto, Spenser, Milton, Shelley, etc.).

[By some supposed to be a corruption of *δημιουργός* Demiurgus; but this is very doubtful. The mediaeval writers connect it with *dæmon* (DEMON), and explain it as meaning either *dæmonibus* terror (terror to demons), or *terribilis dæmon* (terrible demon). From its connexion with magic, it may be a disguised form of some Oriental name.]

demon¹ ('di:mən). Also 6-9 **dæmon**. [In form, and in sense 1 a, a. L. *dæmōn* (med.L. *dēmōn*) spirit, evil spirit, a. Gr. *δαίμων* divinity, genius, tutelary deity. But in sense 1 b and 2, put for L. *dæmonium*, Gr. *δαίμόνιον*, neuter of *δαίμωνιος* adj. '(thing) of divine or dæmonic nature or character', which is used by the LXX, N. Test., and Christian writers, for 'evil spirit'. Cf. F. *démon* (in Oresme 14th c. *démones*); also 13th c. *demoigne* = Pr. *demoni*, It., Sp. *demonio*, repr. L. *dæmonium*, Gr. *δαίμόνιον*.]

1. a. In ancient Greek mythology (= *δαίμων*): A supernatural being of a nature intermediate between that of gods and men; an inferior divinity, spirit, genius (including the souls or ghosts of deceased persons, esp. deified heroes). Often written *dæmon* for distinction from sense 2.

b. Sometimes, particularly, An attendant, ministering, or indwelling spirit; a genius.

(Chiefly in references to the so-called 'dæmon of Socrates'. Socrates himself claimed to be guided, not by a *δαίμων* or *dæmon*, but by a *δαίμόνιον*, *divinum quiddam* (Cicero), a certain divine principle or agency, an inward monitor or oracle. It was his accusers who represented this as a personal *dæmon*, and the same was done by the Christian Fathers (under the influence of sense 2), whence the English use of the word, as in the quotations. See tr. Zeller's *Socrates* iv. 73; Riddell, *Apology of Plato*, Appendix A.).

2. An evil spirit.

a. (Representing *δαίμόνιον* of the LXX and N.T. (rarely *δαίμων*); in Vulgate *dæmonium*, *dæmon*). Applied to the idols or gods of the heathen, and to the 'evil' or 'unclean spirits' by which demoniacs were possessed or actuated.

A Jewish application of the Greek word, anterior to Christianity. *δαίμόνια* is used several times by the LXX to render *shédim* 'lords, idols', and *śē'irim* 'hairy ones' (satyrs or he-goats), the latter also rendered *náraia* 'vain things'. It is also frequent in the Apocrypha (esp. in Tobit), and in the N.T., where in one instance (Matt. viii. 31) *δαίμονες* occurs in same sense. In the Vulgate generally rendered *dæmonium*,

pl. -ia, but once in O.T. (Lev. xvii. 7), and in 10 places in N.T. (8 in St. Matthew) *dæmon*, pl. -es. These words are indiscriminately translated *devil* in the Aps. Gospels, *jeed* or *deuil* in Wyclif, and in all the 16-17th c. versions *devil*; the Revisers of 1881-5 substitute *demons* in Deut. and Psalms, but in the N.T. retain *devil*, -s, in the text, with the literal translation *demon*, -i, in the margin. Quite distinct from this is the word properly translated 'Devil', *diábolos*, which is not used in the plural. It is owing to this substitution of *devil* in the Bible versions, that *demon* is not found so early in this, as in the popular sense b, which arose out of this identification.

Kersey), *Demon*... in Holy Scripture, the Word is always taken for the Devil or a Bad Genius. 1727-51 CHAMBERS *Cycl.*, *Dæmoniac* is applied to a person possessed with a spirit or demon. 1767 T. demyth (di'miθ), v. [f. DE- II. 2 + MYTH sb.] Used occasionally as a synonym of DEMYTHOLOGIZE v.

1960 J. MACQUARIE *Scope of Demythologizing* vii. 214 Some English writers on demythologizing... have adopted the habit of talking rather slickly of 'demything'. Apart from the fact that this word is a more than usual inelegant barbarism, it also betrays a fundamental misunderstanding of Bultmann's intention. If 'demything' meant anything, it would mean, 'the elimination of myth'. 'Demythologizing' means 'the elimination of mythology', and this is not the same as the elimination of myth. 1961 *Times Lit. Suppl.* 14 Apr. 236/3 All three books agree that some measure of demything (if a less barbaric rendering of the German than 'demythologizing' is permissible) of the world-view and other assumptions of New Testament writers is necessary.

demythicize (di'miθisaɪz), v. [f. DE- II. 1 + MYTHICIZE v.] To remove the attribution of a mythical character to (a legend, etc.); = DEMYTHOLOGIZE v. Hence **de'mythici'zation**.

1951 K. GROBEL in *Jrnl. Bibl. Lit.* 101 One may have to reject Bultmann's own attempt to de-mythitize. 1953 R. H. FULLER tr. *Bartsch's Kerygma & Myth* I. 214 Other remedies might easily be found... more efficacious than the demythicization of the Gospel. 1967 *Religious Studies* II. 171 It is especially in Greek culture that myth was submitted to a long and penetrating analysis, from which it emerged radically 'de-mythitized'.

demythify (di'miθɪfaɪ), v. [f. DE- II. 1 + MYTHIFY v.] *trans.* To deprive of mythical character; to remove the aura of reverence, sentimentality, etc., from. Cf. DEMYTHOLOGIZE v.

1964 S. ATTANASIO tr. *H. Fesquet's Wit & Wisdom Good Pope John* p. 19 John XXIII... by his disdain for honours, by his aversion to luxury, by his exquisite cordiality... put himself on an equal footing with the people. He 'demythified' the profession of pope. 1968 *Economist* 25 May 50/3 So many real names would have to be named, so many public myths demythified. 1973 *Guardian Weekly* 24 Feb. 19 Franc considers the play as a chance to demythify the politico-religious system oppressing their comrades. 1984 *Time* 30 Jan. 94/1 In his attempt to demystify and demythify 'the Bard'... McKellen establishes two reference points between himself and Shakespeare.

demythologize (di'miθɒlədʒaɪz), v. *trans.* and *intr.* [f. DE- II. 1 + MYTHOLOGIZE v.] To remove the mythical elements (from a legend, cult, etc.); spec. *Theology* (cf. G. *entmythologisierung* and quot. 1953): to reinterpret the mythological elements in the Bible. Hence **demythologizing vbl. sb.** and **ppl. a.**; **demythologi'zation**.

1950 *Scot. Jnl. Theol.* III. 39 What it means... to be initiated into the Kingdom of Heaven, and to have religion 'de-mythologized'. 1951 F. V. FILSON tr. *Cullmann's Christ & Time* 13 A framework, of which we must strip the account in order to get at the kernel ('de-mythologizing' or 'myth-removal'). 1953 *Radio Times* 23 Jan. 19/2 A new word has entered into New Testament criticism since Bultmann began his exegesis: *Entmythologisierung*, best translated 'demythologizing'. Bultmann claims that there are many passages in the Bible, especially those about God and his dealings with man, that have the form of mythological expressions; and if they are to be intelligible in the twentieth century they must be interpreted. 1955 J. MACQUARIE *Existential Theol.* vii. 176 A demythologized Bible... would require to use the same obscure symbolic language... and because that language would be symbolic, it would be more accurate to speak of transmythologization than of demythologization. 1959 *Observer* 18 Jan. 20/7 Recently, there have been attempts to demythologize this highly popular saint [sr. St. Thérèse of Lisieux]. 1962 *Listener* 11 Jan. 68/1 Bultmann unflinchingly demythologizes, until he reaches that inner heart of Christian belief which he identifies with the *Kerygma*, the gospel truth. 1969 R. BAMBOURGH *Reason, Truth & God* II. 37 There is no incompatibility between a refurbished, demythologized Homeric polytheism, a refurbished, demythologized Islam, and a refurbished, demythologized Christianity. 1971 *Nature* 12 Feb. 460/1 Thus, for Roszak, science, which began as a demythologizing force, by its own logic creates new and darker mysteries.

dene (di:n), *sb.*² Also den, deine, deane. [Of uncertain derivation.

But its relationship to these words is phonetically uncertain, and rendered more so by the existence of the form *den*. Relationship to Ger. *tenne* floor, perh. orig. Dene-hole, Dane-hole (ˈdiːn-, ˈdeɪnhəʊl). Also 9 Danes' hole. [app. from the national name *Dane*, *Danes*, ME. *Dene*, OE. *Dene* + *HOLE*.]

There is no doubt that this is popularly and traditionally the local interpretation of the name: see the first quot. In various parts of the country, e.g. the county of Durham, other ancient caves and excavations are attributed to the Danes, and called *Danes' holes* or *Dane-holes*. It is not quite certain that *dene-hole* is a genuine popular form anywhere; but if so, it may possibly represent a ME. *Dene-hol(e)* = OE. *Dena-hol*, *Danes' hole* (cf. OE. *Dena-lagu*, ME. *Dene-lawe*, mod. *Danes' law*, *Dane-law*), or it may be merely a local pronunciation. But it has suggested to recent writers connexion with *DENE sb.*, or with other of the sbs. so spelt, or with *DEN* (which is phonetically impossible); and either on this account, or because it does not countenance any theory about the Danes, it has been generally adopted by the archaeologists who have investigated these holes since c. 1880. Some have very reprehensibly shortened the name *dene-hole* into *dene*, conformably to their erroneous conjectures as to its connexion with *dene* and *den*.

The name applied to a class of ancient excavations, found chiefly in Essex and Kent in England, and in the Valley of the Somme in France, consisting of a narrow cylindrical shaft sunk through the superincumbent strata to the chalk, often at a depth of 60 or 80 feet, and there widening out horizontally into one or more chambers. Their age and purpose have been the theme of much discussion.

They are mentioned (but not named) by Lambarde 1570, by Camden 1605 as *putei*, in Plot's *Oxfordshire*, 1705, as 'the Gold-mine of Cunobeline, in Essex', and described in a letter from Derham to Ray 17 Feb. 1706. For later history see Mr. Spurrell's paper cited below, and *Trans. Essex Field Club*, 1883 III. 48, *Journal* xxviii, lvi.

1768 *MORANT Hist. Essex* i. 228 [The Dane-holes at Grays] The Danes are vulgarly reported to have used them as receptacles or hiding-places for the plunder and booty which they took from the adjoining inhabitants during their frequent piracies and descents upon this island, and hence they have been styled *Dane* or *Dene* holes. 1818 *Cambrian Reg.* III. 31 The controversy relative to the original intention of the Deneholes. 1863 *Murray's Handbk. Similar excavations exist in the chalk and tufa on either bank of the Somme. The tradition still asserts that these caverns were used for retreat and concealment in time of war, whence their ordinary name *Les souterrains des guerres*. 1871 R. dengue (ˈdɛŋɡeɪ). Also *dengue-fever*, *denga*. [Immediately, a. West Indian Spanish *dengue*; ultimately, according to Dr. Christie, in *Glasgow Med. Jnl.* Sept. 1881, a Swahili word, the full name of the disease in Zanzibar being *ka dinga pepo* (*ka* partitive article, 'a, a kind of', *dinga*, *dyenga*, *denga*, 'sudden cramp-like seizure', *pepo* 'evil spirit, plague'). On its introduction to the West Indies from Africa in 1827, the name was, in Cuba, popularly identified with the Spanish word *dengue* 'fastidiousness, prudery'. In this form it was subsequently adopted in the United States, and eventually in general English use.

In the British West Indies, called by the Negroes *dandy*. Both names appear to be popular adaptations, of the 'sparrow-grass' type, of the Swahili name, with a mocking reference to the stiffness of the neck and shoulders, and dread of motion, exhibited by the patients; whence also another name of ridicule, the 'Giraffe'. — See *DANDY*.

An infectious eruptive fever, commencing suddenly, and characterized by excruciating pains, especially in the joints, with great prostration and debility, but seldom proving fatal; it is epidemic and sporadic in East Africa and the countries surrounding the Indian Ocean, and (since 1827) in the West Indies and adjacent parts of America. Also called *dandy*, and *break-bone fever*.

b. Logic. Of a word: Having the quality of designating, as distinguished from *connotative*. Also as sb.

1864 LATHAM *Diet.* s.v. *Denotation*, Proper names are preeminently denotative; telling us that such an object has such a term to denote it, but telling us nothing as to any single attribute. 1869 J. 1938 C. W. MORRIS in *Internat. En cycl. Unified Sci.* I. 83 Where what is referred to actually exists as referred to[,] the object of reference is a denotatum. It thus becomes clear that, while every sign has a designatum, not every sign has a denotatum. A designatum is not a thing, but a kind of object or class of objects—and a class may have many members, or one member, or no members. The denotata are the members of the class. 1940 [see DESIGNATUM]. 1944 M. WEITZ in P. A. Schilpp *Philos. B. Russell* 100 So to interpret the entities of physics means . . . that they are no longer the denotata of proper names . . . nor the denotata of descriptions. 1963 J. R. CHAO *Language & Symbolic Systems* 67 The word *dog* means the animal *dog*. The word is said to refer to, or denote, the thing and the thing is the referent or denotatum. 1968 *Language* XLIV. 40 With adjectives, it is clear that *and* is obligatory when the coordinated nouns do not refer to the same sample of the denotatum.

deoxyribo'nucleic acid. *Biochem.* Also desoxy-. [*f.* DEOXYRIBOSE + NUCLEIC *a.*] A generic term for any of the nucleic acids which yield deoxyribose on hydrolysis, which are generally found in and confined to the chromosomes of higher organisms, and which store genetic information. Also called deoxy-, desoxyribose nucleic acid. Abbrev. D.N.A., DNA.

1931 LEVENE & BASS *Nucleic Acids* ix. 294 (heading) Deoxyribonucleic acids. 1938 *Jrnl. Chem. Chem.* CLVI. 691 The key rôle of the deoxyribose type of these substances in the reproduction of inheritable characteristics has been emphasized by the identification of desoxyribose nucleic acid (DNA) as a major component of chromosomal nucleoprotein. 1947 *Thorpe's Dict. Appl. Chem.* (ed. 4) VIII. 622/1 Deoxyribonucleic acid has been identified in only a few viruses, for example those of psittacosis, vaccinia, influenza [etc.]. 1951 *Lancet* 16 June 1287/1 In normal animal and plant cells deoxyribonucleic acid (D.N.A.) is located entirely within the nucleus. 1953 *Sci. News* XXIX. 109 The structure proposed for the salts of deoxyribose nucleic acid consists of two chains coiled in the same direction about the same axis. 1955 *New Biol.* XIX. 9 DNA molecules are chains which can be broken down into nucleotides. Each nucleotide molecule can be broken down by hydrolysis into a molecule of phosphoric acid, one of desoxyribose (a five carbon sugar) and one of a purine (adenine or guanine) or of a pyrimidine (thymine, cytosine or 5-methyl cytosine, but in some phages thymine or 5-hydroxy-methyl-cytosine). 1955 *Sci. Amer.* Oct. 70/3 The chromosomes are made largely of DNA (deoxyribonucleic acid). DNA can exist in a great multitude of forms, all built of the same building blocks but with the units arranged in different sequences. The hereditary information carried by a DNA molecule is contained in the order of arrangement of these units. 1962 A. HUXLEY *Let.* 26 Dec. (1969) 945 He talked such nonsense... about true intelligence residing only in the DNA molecule. 1964 *Listener* 19 Mar. 493/2 The spiral of deoxyribonucleic acid. 1970 *Nature* 5 Sept. 998/2 Demolition of the hallowed idea of the molecular biologist that RNA cannot synthesize DNA has prompted a reinvestigation of other ideas.

1944 *Jrnl. Biol. Chem.* CLVI. 692 Most deoxyribonucleoproteins contain very small amounts of tryptophane. 1955 *Sci. News* Let. 30 Apr. 280/3 The chemical has properties which place it in the class of biologically important substances termed deoxyribonucleoproteins... The substances are giant molecules which are found exclusively in the chromosomes and appear to be the carriers of cell heredity. 1961 *Lancet* 19 Aug. 436/2 One of these... was probably glycoprotein in nature, and was clearly different from the desoxyribonucleoprotein (D.N.A.P.).

b. spec. One of the separate divisions or branches of state or municipal administration.

In the U.S. the word is used in the titles of the great branches of administration, i.e. (in 1988), the *Departments* (Dep'ts.) of State (orig. Foreign Affairs), Treasury, Defense, Justice, Interior, Agriculture, Commerce, Labor, Health and Human Services, Housing and Urban Development, Transportation, Energy, and Education.

In Great Britain, the great departments of State were not so named titularly until the mid-20th c., when a number of new departments were created under that name during the administrative reorganizations of the 1960s and 1970s (alongside others which retained the title *Ministry* or *Office*); e.g. (in 1988) the Departments of Education and Science, Employment, Energy, the Environment, Health and Social Security, Trade and Industry, and Transport. The word is also used in naming subdivisions or branches of these, e.g. the *Prisons Dept.* of the Home Office, and for certain other branches of administration; also in the *Departments* of a local government authority, as the *Highways Department*.

1769 Junius Lett. I. 3 Only mark how the principal departments of the State are bestowed. 1791 WASHINGTON Writ. deponent (di'pəʊnənt), *a.* and *sb.* [ad. L. *depōnent-em*, pr. pple. of *depōnere* (see *prec.*), spec. used by the late L. grammarians as in sense 1.]

A. adj. Gram. Of verbs: Passive or middle in form but active in meaning: originally a term of Latin Grammar.

Both form and meaning were originally reflexive (e.g. *utor* I serve myself, *fruor* I delight myself, *proficiscor* I put myself forward, etc.), as in the Middle Voice in Greek; as, however, in ordinary verbs the reflexive form had become a passive in Latin, these verbs were erroneously regarded as having *laid aside* or dropped a passive meaning, whence the name. In reality, what was laid aside, or lost sight of, was the reflexive sense.

1528 TINDALE *Obed. Chr. Man* (1573) 130 [He] maketh a verbe passive of a verbe deponent. 1669 MILTON *Accedence Wks.* (1847) 467.1 Of verbs deponent come participles both of the active and passive form. 1859 DONALDSON *Grk. Gram.* §433 A deponent verb is one which though exclusively passive or middle in its inflexions, has so entirely *deponed* or laid aside its original meaning, that it is used in all respects like a transitive or neuter verb of the active form. 1871 GOODWIN *Grk. Gram.* (1882) 80 Deponent verbs are those which have no active voice, but are used in the middle or passive forms with an active sense.
