dub (dʌb), *v.*¹ Forms: 1 dubban, 2-3 dubben, 3-5 dobb(e, 4-6 dubbe, 4 dube, 5 double, dobbe, 5-6 dubbe, 5- dub. [Appears in Eng. before 1100. Generally supposed to be from OFr., which had in this sense *aduber* (Ch. de Rol. 11th c.), *adober*,

adouer, also (rarer, and app. only later) *duber, doubet*. The OFr. word is Com. Rom., It. *addobbare*, OSP. and Pr. *adobar*, OPg. *adubar*; its ulterior derivation is unknown.

By Diez it was assumed to be of Teutonic origin: there is however no such Germanic verb as *dubban* to strike, and the Icel. and Sw. *dubba*, cited in support of such, are really late words for 'to dub a knight', from Eng. or Romance. EFr. *dubben* to strike, seems, like our DUB *v.*¹, to be a recent onomatopœic formation. Even the relation of Eng. *dub* to the OF. word presents difficulties, since the latter would be expected to have been adopted as *adub*, which is not found till the 15th c. Branch II is presumably an extension of the same word, though some of the senses are very remote, and are perh. affected by other associations.]

1. a. A gold coin of varying value, formerly in use in most European countries; that current in Holland, Russia, Austria, and Sweden being equivalent to about 9s. 4d. Also applied to a silver coin of Italy, value about 3s. 6d.

Used as the name of a silver coin issued in 1140 by Roger II of Sicily, as Duke of Apulia, bearing the inscription R DX AP, i.e. *Rogerus Dux Apuliae*; according to Falcone de Benevento 'monetam suam introduxit, unam vero, cui Ducatus nomen imposuit' (Du Cange, s.v.). In 1202, it appears (Pappadopoli, *Monete di Venezia*, 1893, 81) as the name of a Venetian Silver coin, usually known as the *grosso*. In 1284, the first gold ducat, also called *zechino d'oro*, was struck at Venice under the doge John Dandolo. This coin, worth about 9s., bears on one side figures of St. Mark and the Doge, and on the other a figure of Christ with the legend 'Sit tibi Christe datus quem tu regis iste ducatus'; this, though it did not originate, may have contributed to spread the name, which was subsequently applied to the gold coins of various European countries.

The other species (about 125 in number, distributed among some 40 genera) are distinguished by adjuncts expressing colour, appearance, or habits, as *black*, *brown*, *crested*, *ducky*, *fishing*, *grey*, *little*, *long-tailed*, *noisy*, *painted*, *pie*, *red-headed*, *ring-necked*, *ruddy*, *sleeper*, *swallow-tailed*, *tufted*, *velvet*, *whistling*, *white-faced* duck, etc.; habitat, as *channel*, *creek*, *mare*, *moss*, *mountain*, *river*, *rock*, *sea*, *shoal*, *surf*, *tree*, *wood-duck*; native region, as *American*, *English*, *French*, *German*, *Labrador*, *Norway* duck; or by more distinctive words as *CANVAS-BACK*-, *CUTHBERT*-, *EIDER*-, *HARLEQUIN*-, *HERALD*-, *MAIDEN*-, *MANDARIN*-, *MUSCOVY*-, OF *MUSK*-, *MUSSEL*-, *PENGUIN*-, *SQUAM*-DUCK, etc., q.v. in their alphabetical places. In its widest technical sense, the name includes the gadwalls, garganeys, golden-eyes, pintails, pochards, scaups, scoters, sheldrakes, shovellers, spoonbills, teal, whistling, widgeons, and other related groups; the geese and geosanders, though *Anatidae*, are not usually called 'ducks'.

duffer ('dʌf(r)), *sb.*¹ *slang*. [Connected with DUFF *v.*¹ From the date of the words and senses, it may be inferred that *duffer* in senses 1 and 2 (the relative priority of which is uncertain) is the starting-point in Eng.; that DUFF *v.*¹ is a back-formation from this, to express the action of the *duffer* (in a somewhat later application), and that sense 3 of the *sb.* is, in turn, an agent-noun from the *vb.* Cf. also DUFFING *ppl. a.*, and DUFFER *sb.*²]

1. One who sells trashy goods as valuable, upon false pretences, e.g. pretending that they are smuggled or stolen, and offered as bargains.

'duffer, *sb.*² *colloq.* and *slang*. [The evident association of the word with DUFFING *ppl. a.*, 'a duffer' being = 'a duffing fellow', 'a duffing coin or article', appears to connect the word with DUFF *v.*¹ It is possible, though our quots. do not show it, that the application to things, e.g. to a counterfeit or base coin, is the earlier, and that the term was thence transferred to a man who is similarly 'no good'. Less probable, though not out of the question, are the suggestions that a duffer is a man of *duff* or dough, or 'spongy substance' (see DUFF *sb.*¹, 2), or that the word is the same as *Sc. duffar*, *duffart* a blunt stupid person', *dofart*, *doofart*, *dowfart*, 'a dull heavy-headed inactive fellow' (Jamieson).]

All these provincial generals were therefore *dukes*; but no more than ten among them were dignified with the rank of counts or companions, a title of honour, or rather of favour, which had been recently invented in the court of Constantine. 1836 PENNY *Cycl.* v. 445/2 Three other principal officers are mentioned—the Comes litoris Saxonici per Britanniam... the Comes Britanniæ (Count of Britain), and the Comes Britanniæ (Duke of Britain). 2. a. In some European countries: A sovereign prince, the ruler of a small state called a duchy.

Five dukes (with six grand-dukes) ruled states included in the German Empire after 1870. Two Italian dukes (and one grand-duke) remained as rulers of independent states down to 1860.

(In this sense, the name is partly derived from the late Roman use of *dux* (1b), partly the English rendering (through med. L. *dux*, F. *duc*, it. *duca*) of Ger. *herzog*, OHG. *herizog*, OE. *heretoga*, lit. 'leader of warlike host'. Throughout the Frankish empire, the Merovingian kings appointed *duces* to superintend several frontier *comitatus* (the *dux* being superior to the *comes*). These *duces* of Aquitaine, Allemania, etc. were purely official. But in the half of Germany not under the Franks there still existed 'dukes' of another kind. The Teutonic *herizog* was originally the temporary war-chief of a tribe, as opposed to the civil chief or king. He occasionally made himself permanent head of the *volksstat*, while still retaining his title (e.g. in Bavaria). In Germany, this class of 'duke' came to an end when Charlemagne destroyed the last independent German states. Under the Carolingians, the *dux* was, east and west of the Rhine alike, an official ruling a province. But, in the decay of this dynasty, the dukes everywhere became hereditary and practically independent. Hence came, in the West, the dukes of Aquitaine, Burgundy, Normandy, etc.; in the East, those of Franconia, Saxony, Suabia, etc. In France, however, the monarchy gradually reabsorbed the duchies, which by 1500 were all amalgamated with the crown, the title of 'duke' having become merely that of the highest rank of nobility, with no sovereign rights. (See sense 3.) In Germany, on the other hand, the Duke of Bavaria or of Saxony was practically independent, the emperor having little or no power over him. The early Italian *duca* came direct from the Old Teutonic *herizog*, the dukes of Benevento and Spoleto having been chiefs of Lombard warbands who carved new states out of Roman Italy. In England, before the Norman Conquest, *dux* was an ordinary translation of *ealdorman* in L. charters; but did not become vernacular. From the Conquest till Edward III, *ealdorman* or *eorl* was rendered by *comes*, and *dux*, *duk*, was known only as a foreign title; even William and Robert are known to the Old English Chronicle only as 'earls' of Normandy.)

3. a. In Great Britain and some other countries: A hereditary title of nobility, ranking next below that of prince.

royal duke, a duke who is a member of the royal family, taking precedence of the other dukes.

(After the great feudatory dukes of France, or most of them, had come to be merely the greatest nobles of the country, the title was imitated in England and other countries. In England it was introduced by Edward III, who in 1337 created the Prince of Wales, Duke of Cornwall, and in 1351 the king's cousin Henry, Duke of Lancaster, which title at his death in 1361 was conferred on his son-in-law, John of Gaunt, the king's third surviving son, the title of Duke of Clarence being at the same time conferred upon the second son Lionel. Under Richard II and in subsequent reigns, the dignity was gradually extended outside the Royal Family, this being especially the case after the death of Queen Elizabeth, under whom the rank had been for some time extinguished.)

dun, *sb.* † Also 7 *dunne*. [Goes with DUN *v.* †]

The evidence does not decide whether the *sb.* or the *vb.* is the starting-point. If sense 1 below is (as appears in the quotation) earlier than sense 2, we should naturally expect it to be the source of the *vb.* as in *Burke*, to *burke*, and the like; sense 2, on the other hand, would as naturally be a noun of action from the *vb.* as in to *kick*, a *kick*. duricrust ('djurikrast). *Geol.* [f. L. *dūr-us* hard + -I- + CRUST sb.] A hard crust formed at or near the surface in a semi-arid climate by the accumulation of mineral matter, esp. silica or iron oxides, deposited as ground water rises by capillary action and evaporates; esp. such a crust in Australia.

1928 W. G. WOOLNUGH in *Jrnl. & Proc. R. Soc. N.S.W.* LXI. 27 From the fact that... the chemically formed covering... always appears as a relatively hard 'armour plate', protecting softer, decomposed rock residue beneath it, I propose to group together all the representatives of the hard crust, in every part of Australia where they can be shown to have formed in the same manner, during the same geological period, under the name of the duricrust... [Note] This name was suggested to me by Professor Todd, Professor of Latin in the University of Sydney. 1954 W. D. THORNBURY *Princ. Geomorphol.* iv. 83 Under the present arid conditions which prevail today [in Australia] duricrusts are not forming in a significant amount but rather are undergoing destruction. 1955 P. A. BLXTON *Nat. Hist. Tsetse Flies* xi. 390 The thicket grows on a clay cement or duricrust, which may well be too hard for the larva to enter. 1962 L. C. KING *Morphol. of Earth* vi. 172 The duricrust often grades down through a zone of weathered rock into the bedrock itself. 1977 A. HALLAM *Planet Earth* 85 At other times (pluvials), average rainfall may have been markedly

greater so that... bedrock became deeply weathered to give striking weathering crusts (duricrusts). 1978 T. LANGFORD-SMITH *Silcrete in Australia* 1 2 Differences in the type of duricrust... were regarded by Woolnough as a reflection of changes in the rock type, so that whether a duricrust happened to be ferruginous or siliceous was a measure of the underlying parent material.

Hence 'duricrusted a., covered with a duricrust.

1962 L. C. KING *Morphol. of Earth* vi. 172 Most duricrusted lands are subject to an annual period of drought (Africa, Australia). 1978 T. LANGFORD-SMITH *Silcrete in Australia* 1 2 Woolnough's conception of a single duricrusted surface was over-simplified.

durmast ('dɜ:mɑ:st, -æ-). [A recent word. The first element is doubtful (see Note below); the second is MAST, fruit of forest tree.] A sessile-flowered sub-species or variety of oak (*Quercus pubescens*, or *Q. sessiliflora*): see quot. 1866. (Usually *durmast-oak*.)

1791 T. NICHOLS *Obi. on Oak Trees* 24 There are two different sorts of oak growing in the [New] forest, one the true english... the other is called by the woodmen in the forest the dur mast oak, which I believe to be the second sort of oak, described by Mr. Miller... the wood of which is not so strong. 1792 MARTYN *Flora Rust.* I. A branch... received from Mr. Nichols out of the New Forest, where it is known by the name of the *Durmast Oak*. 1841 *Penny Cycl.* XIX. 212 2 What is called the *Durmast oak*... seems to us a slight variety of *Q. sessiliflora*, with the leaves pubescent on the under side. 1866 *Treas. Bot.* 949 The wood of *Q. sessiliflora*, or *Durmast* as it is called, is described as darker, heavier, and more elastic than that of *Q. pedunculata*, less easy to split, not so easy to break, yet the least difficult to bend.

[Note. The original authority for 'durmast' appears to be Nichols, on whose information Martyn inserted it in his ed. of Miller's Dictionary, whence it has passed into general book use. According to W. Atkinson in *Trans. Hort. Soc.* (1833) I. 336, the name appears to have been mistaken: he says 'The woodmen in the Forest call certain oaks that have dark-coloured acorns *Dun-mast*, but those dun-coloured acorns are found both of the *Q. pedunculata* and *Q. sessiliflora*; I have raised trees from them, and consider them as only accidental varieties, and that the colour of the acorns may be occasioned by something peculiar in the soil'. (No ground has been found for connecting 'durmast' with F. *durelin* or Ger. *dürreche*, varieties of the oak. Welsh *dure* is, of course, out of the question.)]

dusk (dʌsk), *a. and sb.* Forms: 3 *deosc*, *deosk*, *dosc*, 3-6 *dosk*, 5-6 *duske*, *doske*, 6- *dusk*. [Origin and phonetic history obscure.

OE. had in the same, or an allied sense, *dosc*, which, if = **dosc*, would repr. an OTE. **dusko-z* = Aryan **dhuskos*, to which Kluge refers also L. *fuscus*. The relation of mod. *dusk* to OE. *dox*, **dosc*, presents some difficulties, both as to the vowel, and, still more, in regard to the final consonant-

group. Few of our words in -sk are of OE. origin, OE. -sc normally gives -sh in later English, e.g. in *ush*, *dish*, *fish*, *bush*, *rush*; so that from OE. *dosc* we should expect *dosh*, or, at least, as in the case of *ush* and *tush*, ME. and mod. forms in -sh, and -x, beside the -sk form.]

Germany, the adj. was used (in the 9th c.) as a rendering of *L. vulgaris*, to distinguish the 'vulgar tongue' from the Latin of the church and the learned, hence it gradually came to be the current denomination of the vernacular, applicable alike to any particular dialect, and generically to German as a whole. From the language, it was naturally extended to those who spoke it (cf. *English*), and thus grew to be an ethnic or national adjective, whence also, in the 12th or 13th c., arose the name of the country, *Deutichlant*, now *Deutschland*, = Germany. In the 15th and 16th c. 'Dutch' was used in England in the general sense in which we now use 'German', and in this sense it included the language and people of the Netherlands as part of the 'Low Dutch' or Low German domain. After the United Provinces became an independent state, using the 'Nederduitsch' or Low German of Holland as the national language, the term 'Dutch' was gradually restricted in England to the Netherlands, as being the particular division of the 'Dutch' or Germans with whom the English came in contact in the 17th c.; while in Holland itself *dutch*, and in Germany *deutsch*, are, in their ordinary use, restricted to the language and dialects of the German Empire and of adjacent regions, exclusive of the Netherlands and Friesland; though in a wider sense 'deutsch' includes these also, and may even be used as widely as 'Germanic' or 'Teutonic'. Thus the English use of *Dutch* has diverged from the German and Netherlandish use since 1600.]

b. A payment to the public revenue levied upon the import, export, manufacture, or sale of certain commodities, the transfer of or succession to property, licence to use certain things or practise certain trades or pursuits, or the legal recognition of deeds and documents, as contracts, receipts, certificates, protests, affidavits, etc. Applied to the payments included under the several heads of customs, excise, licences, stamp-duties, probate and

succession duties (death duties), inhabited house duty.

In general, 'duties' differ from other taxes in that they are levied upon specific articles or transactions, and not upon persons whether by capitation or in proportion to their income or possessions. But the distinction is not strictly observed in language; a 'window-tax' and 'dog-tax' are duties, as much as the inhabited house duty, or the duty on men-servants.
