cumber ('kambə(r)), *sb.* Forms: 4 kumbre, 5 komber, cumbyre, 6 combre, 6-7 comber, *Sc.* cummer, (-ar, -yr), 6- cumber. [Used early in 14th c. in sense 1; but not common till 16th, and then at first chiefly Scotch, where it is also spelt *cummer*. The date, form, and sense, are all consistent with its being either a derivative of **CUMBER** v., or a shortened form of **ENCUMBER** *sb.* But sense 2 strikingly coincides with Ger. *kummer*, MHG. (from c 1200) *kumber*, MLG. *kummer*, Du. *kommer*.

OF. had only *cumbre* fem. in the sense 'heap of felled trees, stones, or the like' (Godef.), corresponding to med. *L. combra* 'a mound or mole in a river for the sake of catching fish' (Du Cange), and akin to Merovingian *L. cumbri*, pl. *cumbri*, *combrī* 'barriers of felled trees' (Du C.), whence med. *L. incumbre, F. encombrer*, to ENCUMBER. Cf. also Pg. *combra* 'a heap of earth'. In the Merovingian *L. cumbri*, Diez (s.v. *Colmo*) saw a barbaric form, through 'cumbri', of *L. cumulus* heap; so also Littré, Scheler, Brachet, s.v. *Encombre*. But the question of the actual origin of *cumbri*, and its relation to the Ger. *kummer* and its family, is a difficult one, which has been much investigated and discussed: see Grimm, Kluge, Franck, Doornkaat-Koolmann.]

†5. Occupation with business to an inconvenient or burdensome degree; pressure of business; (with *pl.*) affairs that occupy and trouble one. *Obs.* or *arch.*

cumber ('kambə(r)), *v.* Forms: 3- cumber; also 3-7 comber, 4-5 combur, comer, 4-6 combre, cumbre, *Sc.* cummer, 5 combir, cumbir, cumbyre, cummere, comyr, *Sc.* cummyr (*pa. t.* cumyrt). [*Cumber* vb. is known from c 1300. Its early derivatives *cumberment, cumbrance, cumbrous* (14th c. at least) all suppose for it a French derivation: cf. the parallel series under **ENCUMBER**, and its weakened form **ACCUMBER**, also OF. *encombrer, -ment, encombrance, encombras, -eus*.

Except in one doubtful instance, Godefroy cites OF. *cumber* only in the sense of *couver* 'to lay hold of, seize, take', which does not account for the ME. uses of *cumber*. He has no examples of *combrance, combrement*, and only one (16th c.) example of *combreux*. Hence it would be more satisfactory to regard the English words as aphetic forms of the *encomber, cummer* types, but for their appearing earlier than these. The etymological history being unsettled, the order of the senses, and the precise meaning in many cases, is doubtful.]

L. *cuppa* is generally held to be a differentiated form of *cupa*, tub, cask, vat, which survives in F. *cuve*, Pr., Sp., Pg. *cuba* tub, etc. But beside *cuppe* in ME., are found two forms *coupe* (*coupe*) and *coupe*, with the variants *cupe*, *cope*, *coope*. Of these *coupe* (*coupe*) directly represents OF. *coupe*, *cupe* prob. represents the earlier OF. spelling of the same word, but may be merely a variant of *cuppe*. The status of *coupe* is not so clear: it may also represent OF. *cope* (sometimes *coupe*), or it may be due to mixture of *cuppe* and OE. *coppe*: see COP sb.; in the form *coppes* it is impossible to distinguish between the pl. of *copp* and that of *coupe*. The rare forms *cope*, *coupe*, prob. represent OF. *cope*. Nearly all these by-forms of the word became obs. before 1500; only *cuppe* survives in mod. English cup.]

1. A drinking-vessel, or something resembling it.

1. A small open vessel for liquids, usually of hemispherical or hemi-spheroidal shape, with or without a handle; a drinking-vessel. The common form of cup (e.g. a tea-cup or coffee-cup) has no stem; but the larger and more ornamental forms (e.g. a wine-cup or chalice) may have a stem and foot, as also a lid or cover; in such case *cup* is sometimes applied specifically to the concave part that receives the liquid.

These 'cupules'... may be regarded as a characteristic of meteorites... The air pressed hard against it burns it unequally, forming cupules over its surface.

2. a. A clergyman engaged for a stipend or salary, and licensed by the bishop of the diocese to perform ministerial duties in the parish as a deputy or assistant of the incumbent; an assistant to a parish priest.

This use of the word is peculiar to the Church of England and to the R.C. Church in Ireland, where assistants to the parish priests are also so called. It appears to have originated in the application of the name *curate* to the clergyman in actual charge of a parish of which the benefice was held by a non-resident clergyman, the head of a college, etc., and to have been thence extended to the deputy of an aged and infirm incumbent, and so gradually to any deputy or assistant of the beneficed clergyman, more fully described as a *stipendiary* or *assistant curate*. This is now the ordinary popular application of *curate*. A clergyman appointed by the bishop to take charge of a parish or chapel during the incapacity or suspension of the incumbent is called a *curate-in-charge*. The incumbent of the chapel or church of an ecclesiastical district, forming part of an ancient parish, appointed by the patron and licensed by the bishop is a *perpetual curate*; these now rank as vicars.

1557 *Indenture of Advowson of Garsington*, And that also the said president [of Trinity Coll., Oxf.] being parson of the said Rectory [of Garsington] shall likewise for cuer at his own proper charge fynde one sufficient Catholike and hable Curat to serve in the said Rectorye and parishe church. 1587 *Petit. in Fuller Ch. Heyford* 51 These three acolytes in succession were curates-in-charge of the parish.

b. *curate's egg*: taken as a type of something of mixed character (good and bad).

Originating in a story of a meek curate who, having been given a stale egg by his episcopal host, stated that 'parts of it' were 'excellent' (*Punch* 9 Nov. 1895, p. 222).

1905 *Minister's Gazette of Fashion* Aug. 14/1 The past spring and summer season has seen much fluctuation. Like the curate's egg, it has been excellent in parts. 1962 *Oxf. Mag.* 22 Nov. 91/1 All the same it is a curate's egg of a book. While the whole may be somewhat stale and addled, it would be unfair not to acknowledge the merits of some of its parts.

[The senses here placed all derive ultimately from *F. courbe* adj. (= Pr. *corb*, Sp., Pg., It. *curvo*):—L. *curvus* bent, crooked, or from *F. courber*:—L. *curvāre*: see CURB v.¹ But their immediate etymological history presents differences, and Branches I and II might be treated as distinct words. Branch I appears only in Eng., and seems to be a derivative from CURB v.¹, in the sense 'that which curbs or bends the horse's neck'; it seems to be the source of CURB v.², under the influence of which again some of the senses under Branch III have arisen. Branch II contains a variety of senses found under *F. courbe*, subst. use of *courbe* adj. Branch III appears also to have originated in *F. courbe* in the sense of a curved or arched piece of timber, iron, etc. used for structural purposes; but the sense appears to have been gradually modified after CURB v.², so as to involve more and more the sense of a restraining or confining border. In this group the word is often spelt KERB, which is at present established in sense 12. Cf. KENNEL.]

The corrupt forms in -*four*, -*fur*, etc. appear to be of phonetic origin, though in some cases associated with fire.]

1. a. A regulation in force in mediæval Europe by which at a fixed hour in the evening, indicated by the ringing of a bell, fires were to be covered over or extinguished; also, the hour of evening when this signal was given, and the bell rung for the purpose. Also *transf.* and *fig.* b. Hence, the practice of ringing a bell at a fixed hour in the evening, usually eight or nine o'clock, continued after the original purpose was obsolete, and often used as a signal in connexion with various municipal or communal regulations; the practice of ringing the evening bell still survives in many towns. In extended use: a restriction imposed upon the movements of the inhabitants of an area for a specified period.

The primary purpose of the curfew appears to have been the prevention of conflagrations arising from domestic fires left unextinguished at night. The earliest English quotations make no reference to the original sense of the word; the curfew being already in 13th c. merely a name for the ringing of the evening bell, and the time so marked.

2. A court of justice, counsel, or administration; used esp. of the royal and other courts of the feudal organization.

In mediæval L., *curia* was the word regularly employed to render *F. cour*, COURT, and it is so used by modern historians, esp. in *Curia regis*, the King's Curia, or King's Court, of the Norman kings of England.

[c1178 *GLANVILLE* I. llic incipit liber primus de placitis quae pertinent ad curiam regis.]

curie ('kjʊəri, ||kyri). [Named in honour of Pierre Curie (1859-1906), co-discoverer of radium.] 1. Orig., a quantity of radon (radon 222, radium emanation) in radioactive

equilibrium with one gramme of radium; later extended to denote an equivalent quantity of any of the decay products of radium. Later, a unit of radioactivity equal to 3.7×10^{10} disintegrations per second, freq. used loosely as a unit of quantity of any radioactive substance in which there is this degree of radioactivity. Cf. BECQUEREL 2.

1910 RUTHERFORD in *Nature* 6 Oct. 430/2 It was suggested that the name Curie, in honour of the late Prof. Curie, should... be employed for a quantity of radium or of the emanation... The name Curie should be used as a new unit to express the quantity or mass of radium emanation in equilibrium with one gram of radium (element). 1931 M. CURIE et al. *Rep. Internat. Radium-Standards Committee in Rev. Mod. Physics* III. 432 It is recommended that the use of the term curie be extended to include the equilibrium quantity of any decay product of radium. 1954 *Brit. Jnl. Radiol.* XXVII. 243/2 Amount of radioactive material shall be expressed in curies (c). The accepted definition of the curie is:—The curie is a unit of radioactivity defined as the quantity of any radioactive nuclide in which the number of disintegrations per second is 3.700×10^{10} . With this definition the curie is independent of the disintegration rate of radium. 1955 *Sci. Amer.* July 50/3 The most powerful modern atomic bomb should release no more than 10 billion curies. 1963 JERRARD & McNEILL *Dict. Sci. Units* 37 The curie is too large for normal laboratory work where the radioactivity is generally of the order of millicuries. 1968 *Radiation Quantities & Units* (Internat. Commission on Radiation Units & Measurements) 6 In accordance with the former definition of the curie as a unit of quantity of a radioactive nuclide, it was customary and correct to say: 'Y curies of ^{32}P were administered...' It is still permissible to make such statements rather than use the longer form which is now correct: 'A quantity of ^{32}P was administered whose activity was Y curies.' 1970 *Sci. Jnl.* Aug. 43/1 A single 1000 MWe reactor will therefore accumulate in its fuel many thousands of millions of curies of fission products.

2. **curie point or temperature**, a temperature at which the type of magnetism exhibited by a substance changes; *spec.* that at which a ferromagnetic substance, on being heated, loses its ferromagnetism and becomes paramagnetic; also, an analogous temperature for a ferroelectric substance, at which it either loses its ferroelectricity or becomes ferroelectric.

1911 *Physical Rev.* XXXIII. 269 Weiss states that the 'Curie point' for cobalt is probably in the neighborhood of 1110°C . 1919 *Chem. Abstr.* XIII. 951 At about 1280°F Fe undergoes a transformation with respect to its magnetic properties and this is referred to here as the Curie or A₄ point. 1925 *Jnl. Iron & Steel Inst.* CXII. 267 It will be observed that the line of magnetic transformation (the Curie points) in the γ -phase approaches the α to γ transformation curve. 1957 *Encycl. Brit.* XIV. 650/1 The temperature at which any ferromagnetic material loses its magnetism is known as the Curie point; it is 770°C . for iron and 358°C . for cobalt. 1960 McGraw-Hill *Encycl. Sci. & Technol.* III. 623/2 The transition between ferrimagnetism and paramagnetism is also marked by a Curie temperature. 1967 *Electronics* 6 Mar. 24/1 (Adv.), High skin temperatures demand an antenna with a high Curie point coupled with low loss characteristics at high frequencies. 1968 CONDON & ODISHAW *Handbk. Physics* (ed. 2) iv. vii. 119 The ferroelectric range of Rochelle salt is very narrow and that of the phosphates and arsenates is limited to low temperatures. Both crystal types... are piezoelectric above the Curie point.

2. A game played on the ice (on a curling-pond, or other smooth frozen surface) in which large rounded stones (see CURLING-STONE) are hurled along a defined space called the *rink* towards a mark called the *tee*. The game has undergone considerable developments in Scotland since the 17th c., and has now been introduced elsewhere, where climatic conditions are favourable.

It appears in its earlier form to have been akin to Quoits, but has now more analogy with Bowls, with modifications consequent upon the situation. A game similar to it in its early form appears in Flanders a 1600; Kilian has *kluyten halluyten*, 'ludere massis uice globis glaciatis; certare discis in æquore glaciato', to play a match with quoits on a smooth surface of ice. The name appears to describe the motion given to the stone. In Flemish the name *krullebol* (curl-bowl) is given, apparently from its motion, to the wooden bowl with which a somewhat similar game *bolspel* is played in an alley.

1620 [See CURLING-STONE]. 1684 in Fountainhall *Decis. Lords of Council* (1759) I. 328 He was playing at the curl-pate with Riddel of Haining. 1693 WALLACE *Descr. Curling* II. 27 8 Curling, when first practised, appears to have been a kind of quoiting on the ice. *Coting, kuting*, or *quoiting*, was for a long time the word in common use to describe the game, and in some districts it is still applied to it.

Tract.* I. 254, I had a rich uncle... a penurious accumulating curmudgeon. 1860 WHYTE MELVILLE *Holmby House* 377 A thankless old curmudgeon.

The occurrence in Holland's *Livy*, 1600, of CORMUDGIN (q.v.) has led to a suggestion that this was the original form, with the meaning 'concealer or hoarder of corn', *mudgin* being associated with ME. *much-en*, *mich-en* to pilfer, steal, or *muchier*, Norman form of OF. *mucier*, *muser* to conceal, hide away. But examination of the evidence shows that *curmudgeon* was in use a quarter of a century before Holland's date, and that *curmudgin* is apparently merely a nonce-word of Holland's, a play upon *corn* and *curmudgeon*. The suggestion that the first syllable is *cur*, the dog, is perhaps worthy of note; but that of Dr. Johnson's 'unknown correspondent', *cæur méchant* for F. *méchant* *cæur*, 'evil or malicious heart', is noticeable only as an ingenious specimen of pre-scientific 'etymology', and as having been retailed by Ash in the form, 'from the French *cæur* unknown, and *méchant* a correspondent'.

change of **crynog*, *crynog* in Welsh would, if certain, account
for the *carn-*, *curn-*, and *cran-*, *cren-*, *cryn-* forms in Eng.
The Welsh *crynog* appears to be known as a measure only in
Glamorganshire and part of Monmouthshire.]

An obsolete (or nearly obsolete) dry measure
formerly used in the West of England, from
Cheshire to Somersetshire, and in parts of
South Wales.

Its capacity varied according to place and commodity; for
corn it was usually 4 bushels = a 'coomb'; for wheat
sometimes 3 bushels. For coal and lime, it varied locally; in
Glamorganshire in 1815, from 10 to 12 or 15 bushels (Davies
Agric. of S. Wales II. 172), and the Cheshire *crennock* or
crynock of salt in the 16th c. appears to have been at least as
much.

† In such phrases as *not worth a curse*, *not to care a curse*, the expression possibly comes down from the ME. *not worth a kerse*, *kers*, *cres*: see CRESS 2.

But historical connexion between the two is not evidenced, there being an interval of more than 300 years between the examples of the ME. and the modern phrase; and *damn* (cf. CARE v. 4 a) occurs as early as *curse*, so that the coincidence may be merely accidental.

c. *curse of Scotland*: a name given to the nine of diamonds in a pack of cards.

Origin of the name doubtful. A not unlikely suggestion is that the card was so called from resembling the armorial bearings of Dalrymple, Lord Stair, nine lozenges on a saltire, the number and shape of the spots being identical, and their arrangement sufficiently similar. The first Earl of Stair was the object of much execration, especially from the adherents of the Stuarts, for his share in sanctioning the Massacre of Glencoe in 1692, and subsequently for the influential part played by him in bringing about the Union with England in 1707. An opponent says he was 'at the bottom of the Union', and 'so he may be styled the Judas of the Country'.

1715-47 J. HOUSTON *Mem.* 92 [Lord Justice-Clerk Ormiston] became universally hated in Scotland, where they called him the Curse of Scotland; and when the ladies were at cards playing the Nine of Diamonds (commonly called the Curse of Scotland), they called it the Justice Clerk. 1791 *Gentl. Mag.* 141 The nine of diamonds [is called] the Curse of Scotland, because every ninth monarch of that nation was a bad King to his subjects. 1810 *Sporting Mag.* XXXVI. 75 There is the curse of Scotland, plague take that nine of diamonds. 1893 *Daily News* 21 Feb. 4/8 A problem which has long puzzled antiquaries. Why is the Nine of Diamonds called the Curse of Scotland?

The pointless sword borne before the kings of England at their coronation; emblematically considered the sword of mercy; also called the sword of King Edward the Confessor.

In the Coronation procession *Curatana* is borne in the front rank of the regalia, supported to the right and the left by two pointed swords, the sword of justice, and the third sword, all three being drawn; they are followed by Garter King of Arms, the Lord Great Chamberlain, and the Sword of State borne in its scabbard; then follow the Sceptre, St. Edward's Crown, and the Orb, borne abreast; then the Paten and the Chalice abreast, immediately in front of the Sovereign.

cut (kat), *sb.*¹ Also *cutt*, -e. [Origin and original sense uncertain.]

This has been usually regarded as merely a special use of CUT *sb.*² (under which it is still treated in recent dictionaries); but to this identification two considerations are opposed. First, 'cut' the act or result of cutting' is (like such verbal derivatives generally) a word only of Modern English, known from the 16th c., while 'cut' 'lot' goes back before 1300, standing quite alone without any sense of CUT *sb.*² to explain or support it. Secondly, in ME., in the verb CUT and its pa. pple., the forms *kylt*, *kit*, *ket* are of constant occurrence, but no such spellings are found for this word, only *cut*, *cutt* (*cutte*). The latter circumstance opposes also any such suggestion as that 'cut' 'lot' is an absolute use of the pa. pple. meaning 'the cut stick or straw', 'the cut or marked thing drawn', a use which would besides be very difficult to admit at so early a date. There is no cognate word, and no derivative from any word meaning 'cutting', used in the other Teutonic languages; in these the word LOT, with its cognates, is the native term. It is evident that *drawing cuts* has been from the 13th c. a more popular form of *sortilege*, or a more popular and colloquial expression for it, than 'casting lots'. Welsh has *cut* 'a little piece, a cut, a gobbet, a lot' (Silvan Evans); *cut* 'lot' occurs in Salesbury's transl. of the Bible, 1520; and the word has in Welsh the derivatives *cwtes* 'lot, lottery-ticket, share, cuttyyn 'lot, ticket; but it may be from English.]

1. = LOT: in the phrase *draw cuts*, originally *draw* (or *lay*) *cut*, applied to a ready way of casting lots, by the chance drawing of sticks or straws of unequal length.

The simplest and most usual way is to take as many bits of straw, stick, or the like, as there are persons concerned, one of these bits being *shorter* (or it may be *longer*) than the others; these being held so that one end only is exposed, each person draws one of the bits for himself, and he who chances in draw the bit differing in length is the person to whom the lot falls. In later use each bit is called *o cut*, but in earlier use the decisive bit appears as the 'cut'.

[Found in end of 13th c., and in common use since the 14th c., being the proper word for the action in question, for which OE. used *snīdan*, *ceorfan*. The phonology is doubtful; the early variants *cutte*, *kutte*, *kette*, with *pa. ppl.* *cut*, *kyt*, *kit*, *kett*, are parallel to the early variants of *shut*, OE. *scytan*, and point to **cyttan*, *kytten* (from **cutian*) as the original form, an earlier *y* (y), having here, as in *shut* and other words, given later *u* (now *a*). The word is not recorded in OE. (nor in any WGer. dialect), and there is no corresponding verb in Romanic. Mod. Norwegian *kutte* = *skjære* to cut (chiefly used by

sailors) is certainly adopted from English; but a verb *kāta*, (*kutā*) = *skāra*, *hugga* to cut, is widely diffused in Swedish dialects, and app. an old word, from an OTeut. stem **kut-*, **kot-*, which is probably the source also of the Eng. vb., whatever the intermediate history of the latter.

A conjectured derivation of *cut* from Welsh *cwta* 'short' is in the opinion of Prof. Rhys quite untenable. Neither *cwta* nor any of its derivatives have any relation whatever to the use of a knife or other cutting instrument; while the South Wales *cwt* = cut, gash, e.g. in the hand, is a mere adoption of the Eng. sb.]

cy, cye, OE. pl. of *cow*.

-**cy**, suffix of sbs., originating in *L. -cia, -tia, Gr. -κία, -κεια, -τία, -τεία*, in which the abstract ending -ia (-y) follows another formative element. Occurring chiefly in the combined forms -ACY, -ANCY, -ENCY, -CRACY, -MANCY, *q.v.* Also in *prophecy*, *Gr. προφήτεια, f. προφήτης* prophet; *policy*, *Gr. πολιτεία, f. πολίτης* citizen, -polite, *secrecy* *f. secret*. In words in -acy from *L. -ātia*, and those in -ncy, the *c* represents an original *t* before *i*, which became *c* often in late *L.* and in French, e.g. *L. infantia*, late *L.* also *infancia*, *F. enfance, infancy*. Hence abstracts in -ncy arise out of adjs. or sbs. in -nt, expressing the quality of an adjective (*fluent, fluency*), or the estate or position of an agent or officer (*agent, agency*). But by proximity of sound, -cy is extended from sbs. in -nt to some in -n, e.g. *chaplain-cy, captain-cy, alderman-cy* (after *incumbency, lieutenantancy, adjutantcy*), and -cy being thus treated as an independent suffix = *ship*, is extended to other words as *colonel-cy*, and is

even added to words in -t (instead of being substituted for the -t), as in *bankrupt-cy* (for which the regular etymological form is *bankruptcy*), *idiot-cy* variant of *idiocy* (*Gr. ἰδιωτεία*), *baronet-cy, brevet-cy, cornet-cy* (as against *secret, secrecy*).

1948 N. WIENER *Cybernetics* 19 We have decided to call the entire field of control and communication theory, whether in the machine or in the animal, by the name Cybernetics. 1951 *Jrnl. R. Aeronaut. Soc.* Oct. 624/2 All these machines represent developments in that part of what has been called the cybernetic revolution which is gradually taking over those operations in the fields of numbers, quantities, and data that are strictly clerical or mechanical. 1952 *Science News* XXIII. 77 The cyberneticists approach the problem of neural activity from a purely functional angle, and seek to model the activity of the brain as a whole on the electronic devices of modern communications systems and servo-mechanisms. 1958 *Listener* 18 Sept. 413 The claim of cybernetics is that we can treat organisms as if they were machines, in the sense that the same methods of synthesis and analysis can be applied to both. 1959 *Times* 11 May 6/6 Cybernetics is the study of man in relation to his particular job or machine with special reference to mental processes and control mechanisms. 1961 *Times Lit. 1960 *N.Y. Times* 22 May 31/1 A cyborg is essentially a man-machine system in which the control mechanisms of the human portion are modified externally by drugs or regulatory devices so that the being can live in an environment different from the normal one. 1960 CLYNES & KLINE in *Astronautics* Sept. 27/1 For the exogenously extended organizational complex functioning as an integrated homeostatic system unconsciously, we propose the term 'Cyborg'. The Cyborg deliberately incorporates exogenous components extending the self-regulatory control function of the organism in order to adapt it to new environments. 1966 C. M. CADE *Other Worlds than Ours* x. 218 The 'Cyborg'—which is the name... for animal-machine combinations—seems to be the man of the future. 1970 A. 1927 G. W. STEWART & R. M. MORROW in *Physical Rev.* XXX. 233 The present paper... interprets the space array... not as caused by fragmentary crystals, but by a type of molecular arrangement wherein there is combined mobility of the component molecules and yet a recognizable space array. To this state is given the name 'cybotaxis', which means 'space-arrangement'. The adjective is 'cybotactic'. A new word is necessary in order to distinguish this state from that called 'crystalline'. 1941 *Nature* 22 Nov. 617/1 There are... two main types of conception of liquid structure... (1) group and (2) statistical conceptions... The most elegant development of the group type of conception is Stewart's theory of 'cybotaxis'. In this the groups are considered to be of transitory nature, continually forming and disappearing. 1948 *Sci. News* VIII. 96 Their views fit in well with Stewart's theory that liquids have a 'cybotactic' structure, viz., that there are small aggregates of molecules arranged as they would be in a crystalline particle.

D

D (dir), the fourth letter of the Roman alphabet, corresponding in position and power to the Phœnician and Hebrew *Daleth*, and Greek *Delta*, Δ, whence also its form was derived by rounding one angle of the triangular form. It represents the sonant dental mute, or point-voice stop consonant, which in English is alveolar rather than dental. The plural has been written D's, Ds, de's.

The phonetic value of D in English is constant, except that in past participles the earlier full spelling *-ed* is retained where the pronunciation after a breath-consonant is now *t*, as in *looked, dipped, fished, passed*. The spelling *-ed* is now even extended to words in which OE. had *t*, as in *wished, puffed, kissed*, OE. *wyscte, pysfte, cyste*.

b. *Billiards*, etc. A semi-circle marked on the baulk side of the baulk-line from within which a player must strike the cue-ball when in hand; the area bounded by this semi-circle.

1873 J. BENNETT *Billiards* ii. 18 The diameter of the D varies from 21 in. on championship tables to 23 in. on ordinary tables. 1904 J. P. MANNOCK *Billiards Expounded* I. ii. 53 What I want you to do is, following your losing hazard in the corner pocket, to then take your ball to the D, and play in again off the red from there. 1968 *Billiards & Snooker* ('Know the Game' Ser.) 12/1 A player, whenever 'in hand'... must play out of the 'D' from some point within it. 1981 G. BRANDRETH *Everyman's Indoor Games* 240 On the baulk line there is a semi-circle known as the 'D'.

3. Used euphemistically for *damn* (often printed d—), etc. Cf. DEE v.

II. 1. a. Used like the other letters of the alphabet to denote serial order, with the value of *fourth*; applied, e.g., to the fourth quire or sheet of a book, a group or section in classification, etc.

1886 *Oxford Univ. Statutes* (1890) 109 The examination in the above-mentioned Group D shall be under the direction of the Board of the Faculty of Theology.

b. In typical or hypothetical examples of any argumentation, D is put for a fourth person or thing. (Cf. A, II. 4.)

1858 KINGSLEY *Let. to J. Ludlow in Life* xvii. (1879) II. 78 How worthless opinions of the Press are. c. *D-layer, -region*: the lowest stratum of the ionosphere, occurring between 25 and 50 miles above the earth's surface, below the Heaviside or E-layer.

1930 APPLETON & RATCLIFFE in *Proc. R. Soc. A*. CXXVIII. 155 We therefore attribute the result of the small variation of the reflection coefficient with distance, to the influence of an absorbing zone (D region) of ionisation situated below the region (E region) in which the main bending takes place. *Ibid.*, Rays which travel to the more distant receiving stations have a longer path through the D region. 1935 *Nature* 8 June 953/2 Besides these two main regions (F and E), the existence of a so-called D or absorbing layer has been suggested. *Ibid.*, The appearance of echoes from the D layer is closely connected with the weakening of echoes from the E layer. 1955 *Sci. Amer.* Sept. 128/2 The lowest stratum of the ionosphere is called the D layer. Its electron density has not been measured accurately but is known to be low, because the layer does not reflect radio waves of one megacycle per second or higher frequency. 1968 G. M. B. DOSSON *Explor. Atmos.* (ed. 2) viii. 151 These

radio waves will be absorbed as they come down through the D region.

2. *spec. in Music*. The name of the second note of the 'natural' major scale. (In Italy and France called *re*.) Also, the scale or key which has that note for its tonic.

3. In *Algebra*: see A, II. 5. In the higher mathematics, *d* is the sign of differentiation, and *D* of derivation; *D* is also used to denote the deficiency of a curve.

1852 SALMON *Higher Plane Curves* ii. (1879) 30 We call the deficiency of a curve the number D, by which its number of double points is short of the maximum. 1873 B. WILLIAMSON *Diff. Calc.* (ed. 2) §5 When the increment is supposed infinitely small, it is called a *differential*, and represented by *dx*.

4. *D notice, short for Defence notice* (see quot. 1967). Hence *D list*, a list of D notices currently in force.

The Services, Press and Broadcasting Committee was set up in 1912 as the 'Admiralty, War Office and Press Committee'. Its main function is to give guidance to the press, etc., about matters which, in the interests of national security, should not be publicly disclosed.

1940 GRAVES & HODGE *Long Week-End* xxvi. 450 The Prime Minister authorized a 'D' notice to be sent round to the newspapers, warning them not to print it. 1961 *Times* 12 May 20/4 Mr. Lipton... asked the Prime Minister which Minister was responsible for preparing the D-list... Mr. Macmillan—Ministerial responsibility for D-notices rests on the Minister responsible for the subject covered by the notice. 1964 'C. E. MAINE' *Never let Up* v. 41 No names were mentioned... The story had probably been put out with a 'D' notice, which meant that editors were asked to toe the security line. 1967 *Rep. Comm. Privy Counsellors* (Cmd. 3309) 1, A 'D' notice is a formal letter of warning or request, signed by the Secretary of a Committee known as the Services, Press and Broadcasting Committee, and addressed to newspaper editors, to news editors in sound broadcasting and television, [etc.]... Their purpose is to request a ban on the publication of certain subjects, indicated in the notices, which bear upon defence or national security.

dab (dæb), v.¹ In 4 dabben, 6 dabbe. Inflected dabb(d), dabb[ing]. [This and the accompanying sb. DAB¹ appear about 1300; there is nothing similar in OE.

Middle and early modern Dutch had a verb *dabben*, according to Oudemans, 'to pinch, knead, fumble, dabble': cf. Ger. *tappen* to grope, fumble (with the hands, as in the dark); but it is not clear that there is any connexion between this and the English word. Rather does the latter appear to be of independent onomatopœic origin, being, primarily, the expression of the mechanical action in question by analogous oral action, including (but only in a secondary way) the representation of the sound. Cf. DUB v., which in some of its senses appears to be of kindred formation.]

(or possibly 15th c.), in representations of rustic, humble, or childish speech, in which it may of course have been in use much earlier, though it is not given in the *Promptorium* or *Catholicon*, where words of this class occur.

Of the actual origin we have no evidence; but the forms *dada*, *tota*, meaning 'father', originating in infantile or childish speech, occur independently in many languages. It has been assumed that our word is taken from Welsh *tad*, mutated *dad*, but this is very doubtful; the Welsh is itself merely a word of the same class, which has displaced the original Celtic word for 'father' = Ir. *athair*.]

daffodil ('dæfədɪl). Also 6 daffodyll, 6-7 daffo-, daffadill, 7-8 daffadil. (9 daffodel): see also DAFFODILLY, and DAFFADOWNDILLY. [A variant of AFFODILL, q.v. The initial *d* has not been satisfactorily accounted for.]

It has been variously suggested as due to childish or playful distortion, as in *Ted for Edward, tante for aunt*; to union of the article *th* (cf. Cotgr., *Affrodille*, *Th' Affodill*, and north. Eng. *th' affodil*); to final *d* of *and*, in (e.g.) 'fennell an-d affodil'; to union of the Dutch or Flemish article, as *de affodil* = the affodil; and to Fr. prep. *d'* as in *fleur*

d'aphrodille. It is noteworthy that as in Eng. the word has gained a letter, in 16th c. Fr. it sometimes lost one. LITTRE (s.v. *asphodelle*) quotes from De Serres (16th c.), 'Des racines d'afrodille', and also 'Decoction de lapace, de frodilles'. A third form *daffodille* is quite conceivable.

Affodil and its popular variants *daffodil*, *daffadilly*, were originally and properly the *Asphodel*; then by popular misconception, due apparently to the application to both plants, at their first introduction to England, of the fanciful name *Laus tibi* (see Turner *Libellus* B 3b), it was applied, especially in the popular variations, to species of *Narcissus*, etc. Botanists, after resisting this misapplication, compromised the matter by retaining *affodil* for the *Asphodel*, and accepting the more popular *daffodil* for *Narcissus*. Finally *affodil* was 'rectified' to *asfodyl* and *asphodel*, and *daffodil* restricted in popular use to the Yellow *Narcissus* or Yellow Daffodil of Eng. fields and gardens.]

The *æ* here is app. for umlaut *e* before *ft*, *st*, which explains the two-fold ME. development *daft* and *deft*. The primary meaning of the adj. must have been 'becoming, fit'; cf. the adv. *gedæftlice* fitly, suitably, seasonably, and the vb. *gedæftian* to make fit or ready, to prepare; from 'fit, ready, apt' came the general later sense of *deft*; from 'becoming, decens' as said of persons, came that of 'meek, mild, innocent', and from 'innocent, inoffensive' apt. that of 'irrational' said of beasts, and of 'silly, foolish, deficient in sense' as said of persons: cf. a common sense of 'innocent', and the sense-history of SILLY. As to the OF. word, see M. Gaston Paris in *Romania* (1889) 469. He shows it to be distinct from OF. *deshait* evil disposition or condition, sorrow, woe, etc., and suggests the meaning 'God's hate', in primitive Merovingian French **deu hat*. In English, the primary *dahet* is very rare; the usual *dapeit*, *dathet*, *dathet* are difficult to account for, unless they represent the OF. phrase *da(h)et ait*, *daat ait*, or in pl. *dahez*, *daez*, *daaz ait*, just as in OF. itself M. Paris explains *dahet*, *dahait*, from the running together of *dehé ait*. Apparently, the phrase being thus taken for the simple word, the verb had to be added anew, as in OF. *dehait ait*! Dalradian (dæl'ræːdiən), *a.* *Geol.* [f. *Dalrad-*, altered form of *Dalriada*, name of an ancient kingdom in Scotland and northern Ireland + -IAN.] Epithet of a series of metamorphosed sedimentary and volcanic rocks found in a belt running north-east from the west coast of Ireland through the southern highlands of Scotland, thought to be of early Cambrian age and in part probably pre-Cambrian; of or characteristic of this series. Also *ellipt.*

1891 A. GEIKIE in *Q. Jnl. Geol. Soc.* XLVII. 75 It is well known that from the old kingdom of Dalriada, in the north of Ireland, a colony settled in Argyllshire, and gradually acquiring dominion over the whole of Scotland, gave that kingdom its present name. Dalton¹ ('dɔːltən). The name of the high school (at Dalton, Mass., U.S.A.) in which the educational plan so named (devised by Miss Helen Parkhurst) was first adopted in 1920, which consists essentially in dividing up the year's work into monthly 'assignments' which the pupils contract to carry through (with certain preliminary aids) on their own responsibility and with their own discipline. Hence 'Daltonize *v. trans.*, to manage or arrange by this educational method; Daltonization; Daltonian *sb.*², an advocate of the method; Daltonism², the method itself.

1920 *Times Educ. Suppl.* 18 Nov. 605/4 Mr. Ernest Jackman, headmaster of the Dalton High School, writes:—I am glad to answer the questions of various English educators regarding Miss Parkhurst's plan, now to be renamed at her desire, 'The Dalton Plan'. 1922 H. PARKHURST *Educ. on Dalton Plan* ii. 15 The Dalton Laboratory Plan provides that means by diverting his energy to the pursuit and organization of his own studies in his own way. *Ibid.* iv. 40 Demonstrating the superiority of the Dalton Plan from the point of view of economy. 1924 A. J. HUXLEY *Proper Studies* 117 The first step in the Daltonization of a school consists in the abolition of class rooms and the substitution of specialist rooms. *Ibid.* 125 In a well-run Daltonized school the problem of discipline solves itself. *Ibid.* 133 These ancient seats of learning [sc. Oxford and Cambridge] were Daltonized long before Daltonism was invented. 1959 *Chambers's Encycl.* IV. 353/2 In a number of English schools, where a modified Dalton plan is still used, one finds a mixture of class-teaching and of individual assignments. 1964 [see DALCROZE].

dalton² ('dɔːltən). Also Dalton. [f. the name of John Dalton (see DALTONIAN *a.* and *sb.*)] A name for the atomic mass unit (see ATOMIC *a.* and *sb.* A. 1), used chiefly in *Biochem.*; freq. used as a dimensionless unit of molecular weight.

1938 C. M. BEADNELL *Dict. Sci. Terms* 65/1 Dalton, mass unit, being the 1/16 of mass of O atom. 1967 *New Scientist* 27 Apr. 196/1 The size in molecular weight units was about five million daltons—in other words each molecule of DNA weighed as much as five million atoms of hydrogen. 1969 *Nature* 11 Oct. 150/1 All DNAs were sheared to a single-stranded molecular weight of about 400,000 Daltons by passage through a French pressure cell. 1970 *Ibid.* 28 Nov. 889/2 Thus it would be correct to write... 'the molecular mass of protein X is 250,000 [read 25,000] daltons'; or 'the relative molecular mass (that is, molecular weight) of protein X is 25,000'... It would, however, be incorrect to say: 'the molecular weight of protein X is 25,000 daltons', for the dalton is a unit of mass, and molecular weight is dimensionless.

TOULMIN in *Quanta & Reality* 21 With his Periodic Table, Mendeleeff had shown that chemical atoms fell into well-defined families, having resemblances which could not be explained on Daltonian principles alone. 1962 M. Introduced by Prof. Pierre Prevost of Geneva, but objected to by English authors on the ground that it associated a great name with a physical defect. See Wartmann's papers on 'Daltonisme' in *Mem. Soc. Phys. de Genève* (1843) X. 273; and (1849) XII. 183.]

1828 STEDMAN in *Edin. Med. Jnl.* XXX. 227 As it was unknown to the faculty, the vulgar, as commonly happens, gave it names of their own; and ridiculous as they may sound, they soon became the only appellations of the new malady. The English negroes in St. Thomas called it the *Dandy Fever*, while the French vulgar called it the *Bouquet*, which again was corrupted into the *Bucket*. — *ibid.* 239 The contagion was supposed to be brought by a vessel from the coast of Africa which touched at St. Thomas. 1830 FURLONGE *Ibid.* XXXIII. 51 (title) A few remarks on the Dandy which prevailed in the West Indies towards the close of 1827 and beginning of 1828. 1866 E. An annual tax imposed at the end of the 10th c. or in the 11th c., originally (as is supposed) to provide funds for the protection of England from the Danes, and continued after the Norman Conquest as a land-tax. Also *transf.* and *fig.*

The name is not known to occur in OE., and the actual contemporary notices, beginning with Domesday, are mainly of fiscal character. Bromton (14th c.) calls it 'tallagium datum Danis', apparently identifying it with the *gafol* or tribute paid to the Danes in 991, and on two subsequent occasions, to buy them off. In the so-called 'Laws of Eadweard' (Schmid 496) it is described as an annual tax to hire mercenaries to resist and put down pirates. This might identify it with the *hersegild* 'army-tax' levied by the Danish kings to maintain their army and navy (see *O.E. Chron.* 1039, 40), and said to have been afterwards remitted by Edward the Confessor. Mr. Freeman suggests (*Norm. Cong.* II. App. Q) that *Danegeld* was a popular name of dislike, originally applied to the payments made to buy off the Danes, and thence transferred to these other payments made to Danish and other mercenary troops, from the time of Thurkill onwards. The *Danegeld* was levied as a land-tax by the Norman kings; it disappears under that name after 1163, but in fact continued under the name of *tallage*.

2. Hence, The part of England over which this law prevailed, being the district north-east of Watling Street, ceded by the Treaty of Wedmore, 878, or perhaps the Northumbrian territory in Danish occupation.

This use appears explicitly only in modern historians (chiefly under the barbarous forms *Dane-lage*, *Dane-lagh*, which are neither Old nor modern English), though founded on ancient passages, such as those of quots. 1050, 1300, in 1. [In Icelandic *lög* 'law' had, according to Vigfusson, the sense 'law-district', 'almost as a local name' in *Gulapings-lög*, *þrændi-lög*, etc.]

A name for the Dwarf Elder, *Sambucus Ebulus*.

(The name is found in Turner 1538, but only the earlier name *Wallwort* or *Wellewort*, OE. *wealtwyr*, is given in *Sinon*. *Barthol.* of 14th c., and *Alphita* c 1450; Rous also, who died 1491, in relating the legend, has only the name *Walwort*; so that the names *Danewort*, *Daneweed*, *Dane's blood*, etc. can hardly have belonged to early tradition. While suggested in part by the abundance of the plant at certain spots historically or traditionally associated with slaughter, there was also an element of fanciful etymology in explaining the Latin name *Ebulus* from *ebullire* to bubble forth, with reference to the flowing of blood. See also WALLWORT.)
