OF. *diamant* (= Pr. *diaman*, Cat. *diamant*, It. *diamanto*, OHG. *demant*), ad. late L. *diamas*, *diamant-em* (med.Gr. διαμάντε), an alteration of L. *adamās*, *-antem*, or perh. of its popular variant *adimant-em* (whence Pr. *adiman*, *aziman*, *ayman*, OFr. *aimant*), app. under the influence of the numerous technical words beginning with the prefix DIA-, Gr. δια-.

The differentiation of form in late L. was probably connected with the double signification acquired by *adamās* of 'diamond' and 'loadstone' (see ADAMANT); for, in all the languages, *diamant* with its cognates was at length restricted to the gem, as *aimant* was in F. to the loadstone. In English the *dyamand* and *adamaund* are distinguished from and opposed to each other c 1400 in Maundeville, ed. 1839, xiv. 161, ed. Roxb. Soc. xvii. 80; but *adamaund* long retained the double sense of late L. *adamās*: thus Sherwood, 1623, has 'An Adamant stone, (F.) *aimant*, *diamant*, *calamite*, *pierre marinere*'. See ADAMANT.

The a of the middle syllable has tended to disappear since the 16th c., as shown by the spelling *di'mond*, *dimond*. Sheridan and other early orthoepists recognize the dissyllabic pronunciation, but most recent authorities reckon three syllables. In Shakspeare the word is more frequently a trisyllable; but it is very generally dissyllabic in Pope, Thomson, Young, Cowper, Keats, and Tennyson.]

(Du Cange); in Byzantine Gr. *διαπρος* adj., f. *δια-* (DIA-¹) + *σπος* white.

Early French references mention *diapre* 'que fu fais en Costantinoble' and 'dyaspre d'Antioch', and associate it with other fabrics of Byzantine or Levantine origin. Thus, the *Roman de la Rose* l. 21193 (Meon III. 294) has 'Cendaux, molequins arrabis, Indes, vermaux, jaunes et bis, Samis, diapres, camelos'. The word occurs in mediæval Greek, c 959, in Constantine Porphyrogenitus *De Ceremoniis Aulae Byzant.* (Bonn 1829-40, p. 528) where the *ὑάριον* or robe used in the investment of a Rector is described as *διασπορον*. On the analogy of *διαλευκος*, *διασπος* may mean 'white at intervals, white interspersed with other colour'; though the sense might also be 'thoroughly' or 'pure white'. In OF., *diapre* is often described as *blanc*. (The It., Sp., and Pg. *diapra* 'jasper' appears to be unconnected with F. and Prov. *diapre* 'diaper'. Du Cange has mixed up the two. A gratuitous guess that the name was perhaps derived from Ypres in Flanders has no etymological or historical basis.)

1. The name of a textile fabric; now, and since the 15th c., applied to a linen fabric (or an

In earlier times, esp. in OFr. and med.L., the name was applied to a richer and more costly fabric, apparently of silk, woven or flowered over the surface with gold thread. See Francisque Michel, *Recherches sur les Etoffes de Soie, d'Or et d'Argent* (Paris 1852) I. 236-244.

1833 PAYEN ET PERSOZ *Ann. Chim. et Phys.* LIII. 76 Cette singulière propriété de séparation nous a déterminés à donner à la substance qui la possède le nom de *diastase* qui exprime précisément ce fait.]

A nitrogenous ferment formed in a seed or bud (e.g. in barley and potatoes) during germination, and having the property of converting starch into sugar.

It is obtained as a white, amorphous substance, of unknown analysis (*Watts Dict. Chem.*). It is found throughout the vegetable kingdom, in the infusoria, and in various secretions, etc., in the higher animals (*Syd. Soc. Lex.*).

1838 T. THOMSON *Chem. Org. Bodies* 666 Diastase... is a name given by MM. Payen and Persoz, to a substance which they extracted from malted barley. 1846 J. BAXTER *Libr. Pract. Agric.* (ed. 4) I. 19 During the germination, some of the elements... in the grain form a fresh compound, which acts as a ferment. This compound is called... diastase, the effect of which is... to turn all the starch... first, into gum, and then into sugar. 1863-72 WATTS *Diet. Chem.* II. 319 Neither potatoes nor cereals contain diastase before germination. 1894 *Lancet* 3 Nov. 1045 An extremely active poison, delicate, resembling the diastases or venoms.

Hence *diastasis*, *a.* = DIASTATIC.

1886 W. JAGO *Chem. Wheat* 128 The bacteria cause more or less change in albuminoids, but exert no diastatic action.

diasystem ('daiəsɪstɪm). *Linguistics*. [f. DIA- + SYSTEM.] A linguistic macro-system constructed by treating variants between dialects as part of a continuum of variations.

1954 U. WEINREICH in *Word* X. 390 Structural linguistic theory now needs procedures for constructing systems of a higher level out of the discrete and homogeneous systems that are derived from description and that represent each a unique formal organization of the substance of expression and content. Let us dub these constructions 'diasystems'... A 'diasystem' can be constructed by the linguistic analyst out of any two systems which have partial similarities. 1963 T. A. SEBEOK in J. A. Fishman *Readings Sociol. of Lang.* (1968) 24 Crows free to migrate between the two regions construct a diasystem which enables them to understand both local dialects. 1968 *Language* XLIV. 485 But all languages and all dialects are dia-systems as well, so this does not constitute a special characteristic of proto-languages. 1982 *Amer. diathermancy (dai'θɜ:mənɪ). *Physics*. [ad. F. *diathermansie*, formed by Melloni, 1833, from Gr. διά through + θερμανος heating, f. θερμαίνεω to heat. The French ending follows the analogy of *paralysie* for Gr. παράλυσις. The Eng. ending simulates the -ncy of *transparency*, *buoyancy*.]

Melloni's original term was *diathermanéité*, from *diathermane* *adj.* (*Ann. Chim. et Phys.* 1833, LIII. 59, LV. 396, *Phil. Mag.* 1835 VII. 476); the latter was, according to him, 'f. διά + θερμαίνω, in imitation of *diaphane*, f. διά + φαίνω to show.' But the analogy was not exact: *diaphane* is not derived from *διά* and *φαίνω*, only from the same root; and in *θερμαίνω*, -αίνω does not belong to the root, but is a verbal suffix, the stem being *θερμ-*. *Diathermane* was first rendered in Eng. diathermal, but after 1837 generally *diathermanous*. To express the notion of 'coloration ou teinte calorifique', Melloni introduced *diathermansie*, f. Gr. διά + θερμανος heating (*Ann. Chim. et Phys.* LV. 377). But the distinction between *diathermanéité* and *diathermansie* appears not to have been generally appreciated; in the Eng. translation of Melloni's paper in Taylor's *Scientific Memoirs*, 1837, I. 72, *diathermancy* is used for both F. words, and English writers generally have used it in the sense of Melloni's *diathermanéité*. For these and other reasons, Melloni afterwards (*Comptes Rendus*, 1841, XLII. 815) abandoned his original terms, and gave a new nomenclature: viz. *diathermique* *adj.*, instead of *diathermane*; *diathermasie* (ad. Gr. διαθερμασία) in place of *diathermanéité*; and *thermochose* for *diathermansie* 'colouring or tint of heat', with corresponding *adj. thermochoïque*. But, though some English writers have thence used *diathermic* and *diathermacy*, most have continued to employ *diathermanous*

and *diathermancy*, the latter in the sense not of Melloni's *diathermansie*, but of his *diathermanéité* or *diathermasie*.]

diatom ('daɪtəm). [ad. mod.L. *Diatoma*, f. Gr. *διάτρυ-ος* cut through, cut in half, f. *διατέμνειν* to cut through.] A member of the genus *Diatoma*, or, in a wider sense, of the *Diatomaceæ*, an order of microscopic unicellular Algæ, with silicified cell-walls, and the power of locomotion, on which account they were formerly placed by many naturalists in the Animal kingdom. They exist in immense numbers at the bottom of the sea, as well as in fresh water; and their siliceous

remains form extensive fossil deposits in many localities.

The genus *Diatoma* is distinguished by having the frustules, or individual cells, connected by their alternate angles so as to form a kind of zig-zag chain: hence the name.

dicker ('dikə(r)), *sb.*¹ Forms: a. 4-5 dyker, 5-6 dycker, 6 deker, diker, -ar, dickar, dikkar, 7 dicar, 6- dicker, β. 6- dacre, daker, (6 daiker, dakir, 8 dakter). [The form *dicker*, ME. *dyker*, etc., with the latinized forms *dicora*, *dikera*, *dicra*, point to an OE. **dicer*, corresponding to MLG. *dēker*, MHG. *decher*, *techer*, mod.G. *decher*, L.G. *diekr* (Westphal.), *däkr* (Pomerania), Icel. *dekr*, Da. *deger*, Sw. *däcker*; all evidently from a WGer. **decura*, **decora*, ad. L. *decuria*, a company or parcel of ten; cf. OE. *scior* for L. *securis*. This WGer. form must be the source of the med.L. *decora*, *decara*, *dicara*, *dacora* (Du Cange), and of the OF. *dacre*, *dakere*, and corresp. med.L. *dacra*, *dacrum*, whence the Sc. and northern forms in β.

The word has been used from ancient times in the reckoning of skins or hides; a letter of the Roman Emperor Valerian (A.D. 253-260) preserved by Trebellius Pollio, directs Zozimion, procurator of Syria, to furnish to Claudius, among other supplies, 'pellium tentorium decurias triginta', i.e. 30 dickers of skins for tents. Kluge points out that the early adoption of the Latin word by the Germans is explained by the tribute of skins which the latter had to pay to the Romans (Tacitus *Ann.* iv. 72), as well as by the fact that skins formed a leading item in the frontier trade between the Romans and the northern barbarians, as they have in the traffic between white men and the Indians in North America in modern times (see DICKER 1.).]

The number of ten; half a score; being the customary unit of exchange in dealing in certain articles, esp. hides or skins; hence a package or lot of (ten) hides.

Its use in the skin trade appears to be the only one in continental languages; in English it has been extended to some other goods; the dicker (*dicra* or *dacra*) of iron in Domesday is generally held to have been ten rods, each sufficient to make two horse-shoes.

dicker, *v.* U.S. [? f. DICKER *sb.*¹]

Quotation 1848 refers to the barter traffic on the Indian frontier in N. America. As skins have always formed a chief item in that trade, it has been suggested with much probability that the verb arose, in the sense 'to deal by the dicker, to deal in skins', among the traders with the Indians, and has thence extended in U.S. to trade by barter generally. If this be the fact, it is interesting that a word which passed from Latin into Germanic in special connexion with dealing in skins, and which has ever since in Europe been associated with this trade (see DICKER *sb.*¹), should, in America, through similar dealings between a civilized and uncivilized race, have received another development of use.]

a. *intr.* To trade by barter or exchange; to truck; to bargain in a petty way, to haggle. Also in extended use (*intr.*): to dither, vacillate, hesitate. b. *trans.* To barter, exchange. Hence 'dickering' *vbl. sb.*; also 'dickering', one who dickers.

1. a. A book dealing with the individual words of a language (or certain specified classes of them), so as to set forth their orthography, pronunciation, signification, and use, their synonyms, derivation, and history, or at least some of these facts: for convenience of reference, the words are arranged in some stated order, now, in most languages, alphabetical; and in larger dictionaries the information given is illustrated by quotations from literature; a word-book, vocabulary, or lexicon.

Dictionaries proper are of two kinds: those in which the meanings of the words of one language or dialect are given in another (or, in a polyglot dictionary, in two or more languages), and those in which the words of a language are treated and illustrated in this language itself. The former were the earlier.

Dictionarius was used c. 1225 by Joannes de Garlandia, a native of England, as the title of a collection of Latin vocabularies, arranged according to their subjects, in sentences, for the use of learners; e.g. 'In horto magistri Johannis sunt herbe scilicet iste: salvia, petroselinum, dictamnus, yosupus, celidonia, feniculus, piset[r]um, columbina, rosa, lilium, et viola; et a latere crescit urtica, carduus, et saluicula.'

In the following century Peter Berchorius (died Paris, 1362) wrote a *Dictionarium morale utriusque Testamenti*, consisting of moralizations on the chief words of the Vulgate for the use of students in theology. In 1538 Sir Thomas Eliot published his Latin-English 'Dictionary'; and in 1556 J. Withals published 'A shorte dictionarie for yonge beginners' in English and Latin, in which the words were arranged not alphabetically, but under subject-headings, e.g. 'the names of Byrdes, Byrdes of the Water, Byrdes about the house, as cockes, hennes, etc., of Bees, Flies, and others,' etc. In 1539 R. Estienne published his *Dictionaire Francois-latin*. Dictionaries (so entitled) of English and various modern languages appeared in England from 1547 onward; in the 17th c. the name was gradually extended to works explaining English words, only 'hard words' being admitted into the earliest English Dictionaries.

Vocabulary is now generally limited to a smaller and less comprehensive collection of words, or to a word-book of technical, or specific terms. *Lexicon* is the name usually given to dictionaries of Greek, Hebrew, Arabic, Syriac, Ethiopic, and some other literary languages.

diddler ('didl(r)). [Of obscure origin.

Found first in the name of 'Jeremy Diddler', the chief character in Kenney's farce, 'Raising the Wind', brought out in 1803. The name was of course intended to be contemptuous and ludicrous, and it seems probable that it was formed on DIDDLE *v.* ¹ sense 1, or on the first element of the earlier *diddle-diddle*, *diddle-dum* (see DIDDLE-); it is also probable that Jeremy Diddler's characteristic methods of 'raising the wind', by continually borrowing small sums which he does not pay back, and otherwise sponging upon people, gave rise to the current sense of the verb (DIDDLE *v.* ² sense 2), of which 'diddler' is now naturally viewed as the agent-noun.]

die (daɪ), *sb.*¹ Pl. dice (dais), dies (daɪz). Forms: 4-5 *dee*, 6-8 *dye*, *dy*, 6- *die*. *Plur.* 4 *des*, 4-5 *dees*, *deys*, *dys*, 4-6 *dyse*, *dyce*, 5-6 *dise* (e, *dysse*, 6 *dyss*), 5- *dice*; also 5-6 *dyes*, 5- *dies*. Also *Sing.* 4-5 *dyse*, 5-6 *dyce*, 5-7 *dice*; *Plur.* 4-5 *dyses*, 5 *dises*, *dices*, *dycys*. [Early ME. *dē*, *dee*, pl. *dēs*, *dees*, *a*. OF. *dē* (nom. sing. and obl. pl. 12-14th c. *dez*), mod.F. *dé*, pl. *dés* = Pr. *dat*, *datz*, Cat. *dau*, Sp., *It. dato*, in form:—L. *datum*, subst. use of *datus*, -um 'given', pa. pple. of *dare* to give. It is inferred that, in late pop. L., *datum* was taken in the sense 'that which is given or decreed (sc. by lot or fortune)', and was so applied to the dice by which this was determined. Latinized mediæval forms from It. and Fr. were *dadus*, *decus*.

In late OF. the form *dey* occurs in 14th c.; and *dez* was sometimes used in sing. down to 17th c.: cf. the 14-17th c. Eng. use of *dice* as sing. The remarkable point in the history of the Eng. word is the change of *dē*, *dēs*, to *dý*, *dys*, (*dyse*, *dyce*, *dice*), in the ME. period. The oldest Chaucer MSS., Harl., Ellesm., Hengwrt, have *dees*, which also survived as late as 1484 in Caxton, but *dys* occurs in the other Chaucer MSS., and in rime in the Bodleian MS. of *Kyng Alisaunder*, part of which is in the Auchinleck MS., attributed to the middle of the 14th c. Before 1500, *dý*, *dys* seem to have completely passed from the *ē* into the *i* class, the fortunes of which they have since shared. As in *pence*, the plural *s* retains its original breath sound, probably because these words were not felt as ordinary plurals, but as collective words; cf. the orig. plural *true*, where the collective sense has now passed into a singular. This pronunciation is indicated in later spelling by -ce: cf. the unlat. plurals *lice*, *mice*, the inflexional forms hence, *once*, *twice*, *since*, and the words *ice*, *nice*, *advice*, *device*, *defence*, in all which -ce represents a phonetic and original -s. In the newer senses where the plural is not collective, a form (*daz*) of the ordinary type has arisen; cf. the non-collective later plural *pennies*.]

1. With plural *dice*. (The form *dice* (used as pl. and *sing.*) is of much more frequent occurrence in gaming and related senses than the singular *die*.)

1. *a.* A small cube of ivory, bone, or other material, having its faces marked with spots numbering from one to six, used in games of chance by being thrown from a box or the hand, the chance being decided by the number on the face of the die that turns uppermost. Also, a cube bearing other devices on its faces, or a solid with more or less than six faces (see *quots.*). *b.* *pl.* The game played with these; *esp.* in phr. *at (the) dice*.

[Early ME. *dēzen*, *dēghen*, corresp. to ON. *deyja* (orig. *dayja*, OSw. and ODa. *dōia*, Da. *dōe*, Sw. *dō*), OFris. *deia*, *deja*, OS. *dōian*, OHG. *touwan*, MHG. *tōuwen*; these represent an OTeut. strong verb of the 6th ablaut class **daw-j-an*, pa. t. *dōw*, pa. pple. *dawan-*, the strong inflexions being retained in ON. (*dō-*:—**dōw*, *dāinn*:—**dawans*). In the other langs. and in Eng. a regular weak verb. No instance of the word is known in OE. literature (its sense being expressed by *steorfan*, *sweltan*, or the periphrastic *wesan deād*, pa. t. *wæs deād*: see DEAD I d) hence it is generally held to have been early lost in OE. (as in Gothic, and as subsequently in all the continental WGer. langs.), and re-adopted in late OE. or early ME. from Norse; but some think that the facts point rather to the preservation of an OE. *diegan*, *dēgan*, in some dialect; the word appears to have been in general use from the 12th c., even in the s.w. dialects (see Napier in *Hist. Holy Rood*, E.E.T.S., 1894). The ME. *dēzen*, *dēghen* came regularly down to 1500 as *deye*, which was retained in the North as *dē*, *dee* (still current from Lancashire to Scotland); but in standard English *dēgh* was in 14th c. (in conformity with the common phonetic history of OE. *eh*, *eah*, *eah*, as in *dye*, *fly*, *high*, *lie*, *nigh*, *thigh*, etc.) narrowed to *dize*, *dighe*, whence the later *dye*, *die*.

The oldest text of Cursor M. (Cotton) has only *dey*; in the later texts this is frequently altered to *dighe*, *dye*, when not

in rime, in the late Trinity MS. sometimes even in rime, with change of text. Chaucer used both *dey* and *dye*, the C.T. (Ellesm. MS.) contains in the rimes 22 examples of *deye* and 50 of *dye*. Both forms are also used in the Wycliffe version, and both occur in Caxton's works.

The stem *dau-* appears also in Gothic in the ppl. a. *daups*, OE. *dead* (:-*daud*-02) *DEAD*, and the sb. *daupus*, OE. *deap*, *DEATH* sb.; also in *afdojan* (:-*afdojan*), pa. ppl. *afdauid* (:-*afdouid*-) vexed, worried. (The relationship of Gothic *diuand*, *undiwanei*, etc. is uncertain.) The simple verb has shown a notable tendency to die out, and leave its place to be taken by derivatives: thus in Gothic *daupnan* to die.]

2. To die a (specified) death: to die by or suffer a particular death.

Death prob. represents the OE. *deape* instrumental, in *deape sweltan*, *L. morte mori*: it was in ME. also preceded by various prepositions, *on*, *in*, *a*, *o*, *of*, *by*, *with*; but is now generally treated as a cognate object. In *die a death*, *a* was prob. originally the preposition = *on*, *o* (see *quots.* c. 1200, c. 1386) but came to be treated as the indefinite article.

diet ('daɪt), *sb.*² [ad. med.L. *diēta* in same senses, or a. F. *diète* in sense 5 (Cotgr. 1611): cf. also It. *dieta* 'a parliament or general assembly of estates' (Florio, 1598), Sp. *dieta* the (Germanic) diet.

Med.L. *diēta* had the various senses 'day's journey', 'day's work', 'day's wage', 'space of a day', as well as that of 'assembly, meeting of councillors, diet of the empire'. The same senses, more or less, are (or have been) expressed by Ger. *tag*, and F. *journée* day. *Diēta* has therefore been viewed as a simple derivative of L. *dies* day, distinct from *dieta*, Gr *diata*, DIET *sb.*¹ But it seems more likely that one or other of the senses developed from *dieta* was associated with *dies*, and led to the application of the word to other uses arising directly from *dies*. One of the senses given by Du Cange is 'the ordinary course of the church': this seems naturally transferred from *diata*, *diata*, in the sense 'ordinary or prescribed course of life', which might be understood to mean 'daily office', and so lead to the use of *dieta* for other daily courses, duties, or occasions.]

diff-, prefix of L. origin, being the assimilated form of *dis-* before *f*, as in *diff-ferre*, *diff-fusio*. In Romanic it became *def-*, which in OF. was subsequently reduced to *de-*; this occasionally appears in Eng., as *defer* from L. *differre*, OF. *defferer*, mod.F. *déferer*, *defy* from L. type *diffidare*, It. *diffidare*, *disfidare*, OF. *desf-*, *deff-*, *defer*, mod.F. *défer*. Usually, however, the Latin form of the prefix is used in Eng.: cf. *differ*, *difficult*, *diffidence*, *diffuse*. For its force, see *DIS-*: it is not, like the latter, a living prefix.

differ ('difə(r)), *v.* Also 6 *dyffer* (defer), 6-7 *differe*. [a. F. *différer* (in Froissart 14th c.), ad. L. *differ-re* to carry or bear apart, spread abroad, distract, protract, delay, defer; also *intr.* to tend apart or diversely in nature or character, to differ. The verb was used with both senses in F. in 14th c., and has continued to be so used till the present day. In English, it was taken first in the transitive sense, with stress *differ* (cf. *confer*, *refer*, *prefer*), which led at length to the transitive senses being written *defer*: see DEFER *v.*; the intrans. use, being closely related in sense to *different*, *difference*, apparently followed these words in stressing the first syllable. (*Offer*, *suffer*, which have the same stress, have a distinct form in French and Romanic.) And one transitive use, closely associated with the intrans., and with *different*, *difference*, has gone with these. In this way L. *differre*, F. *différer*, ME. *differre*, has been split into the two verbs *defer* to put off, and *differ* to make or be unlike. The pr. pple. *differing* occurs in Chaucer's

Boethius; but instances of the verb in the form *differ* are rare before 1500.]

digamma (daɪ'gæmə), [a. L. *digamma*, Gr. *διγάμμα* the digamma, f. δι- twice + γάμμα the letter gamma: so called by the grammarians of the first century, from its shape φ or Φ , resembling two gammas (Γ) set one above the other.]

The sixth letter of the original Greek alphabet, corresponding to the Semitic *waw* or *uau*, which was afterwards disused, the sound expressed by it having been gradually lost from the literary language.

It was a consonant, probably equivalent to English *w*; in the Italian alphabets derived from Greek, it appears to have passed through the power of consonantal *v*, to that of *f*, its value in the Roman alphabet: see F. It was lost in Ionic and Attic before the date of the earliest known monuments, but it occurs in inscriptions in all the other dialects down to late times, and it was also retained in the literary remains of Æolic, whence the appellation Æolic digamma or letter. Though not written in classical Greek, it can be restored on linguistic and metrical grounds in the Homeric and other ancient forms of Greek words, as *ῥέγων*, work, *ἄρι* dative of *Ζεύς*, etc.

The mutual relations of the OE., OHG., and Norse words are not quite

clear; but the difference of formation between OE. *dihtan* :—**dihtjan*, and OHG. *tihtōn* v. :—**tihtōjan*, indicates that they are independent adaptations of the Latin, although the change of *d* to *t* shows that the word is old in German. The Norse word must be of later adoption: if it were old, the expected form would be **dētta*.

From the senses of literary dictation and composition in which it was originally used, this verb received in ME. an extraordinary sense-development, so as to be one of the most widely used words in the language. Special representatives of these ME. senses, survive dialectally, esp. in the north; the modern literary language knows the pa. pple. *dight*, which after being nearly obsolete in the 18th c., has been largely taken up again by poets and romantic writers of the 19th c. in senses 10, 14. (In MHG. *dichten* had also a much greater development of meaning than in mod.German.)

dilemma (di'lemə, dai-), *sb.* Also *β.* 6-7 (after French) dilemme (dylem). [a. L. *dilemma*, a. Gr. *δίλημμα* double proposition, f. *δι-*, twice (DI-²) + *λήμμα* assumption, premiss: see LEMMA.]

1. In *Rhetoric*. A form of argument involving an adversary in the choice of two (or, loosely, more) alternatives, either of which is (or appears) equally unfavourable to him. (The alternatives are commonly spoken of as the 'horns' of the dilemma.) Hence in *Logic*, a hypothetical syllogism having a conjunctive or 'conditional' major premiss and a disjunctive minor (or, one premiss conjunctive and the other disjunctive).

Very different views have been taken by different logicians as to what syllogisms are properly dilemmas; several of the arguments commonly so called being considered by some writers to be only ordinary conjunctive syllogisms, constructive or destructive. See FOWLER, *Deductive Logic*, v. §4.

THOMSON *Laws Th.* §109 (1860) 203 The Dilemma is a complex argument, partaking both of the conditional and disjunctive. 1887 FOWLER *Deductive Logic* 121 In disputation, the adversary who is refuted by a dilemma is said to be 'fixed on the horns of a dilemma'; he is said to *rebut* the dilemma, if he meet it by another with an opposite conclusion. *Ibid.* 122 It seems less arbitrary and more systematic to define dilemma as 'a syllogism of which one premiss is a conjunctive and the other a disjunctive proposition'.

diluvium (di'l(j)u:vɪəm). [a. *L. diluvium* flood, inundation, deluge, f. *dilūere* to wash to pieces, wash away, dissolve by water: see DILUTE.] A term applied to superficial deposits which appear not to have been formed by the ordinary slow operations of water, but to be due to some extraordinary action on a vast scale; such were at first attributed to the Noachian or Universal deluge, whence the name; the chief of these deposits were those of the Northern Drift or Boulder formation at the close of the Tertiary Period, to which the name continued to be applied after the theory of their origin was given up; it is now generally 'applied to all masses apparently the result of powerful aqueous agency'.

3. *Math.* *a.* *Geom.* A mode of linear measurement, magnitude, or extension, in a particular direction; usually as co-existing with similar measurements or extensions in other directions.

The three dimensions of a body, or of ordinary space, are length, breadth, and thickness (or depth); a surface has only two dimensions (length and breadth); a line only one (length). Here the notion of *measurement* or *magnitude* is commonly lost, and the word denotes merely a particular

mode of spatial extension. Modern mathematicians have speculated as to the possibility of more than three dimensions of space.

b. *Alg.* Since the product of two, or of three, quantities, each denoting a length (i.e. a magnitude of one dimension), represents an area or a volume (i.e. a magnitude of two, or of three, dimensions), such products themselves are said to be of so many dimensions; and generally, the number of dimensions of a product is the number of the (unknown or variable) quantities contained in it as factors (known or constant quantities being reckoned of no dimensions); any power of a quantity being of the dimensions denoted by its index. (Thus x^3 , x^2y , xyz are each of three dimensions.) The dimensions of an expression or equation are those of the term of highest dimensions in it. (The number of dimensions corresponds to the *degree* of a quantity or equation: see *DEGREE* *sb.* 13.)

The 'fundamental quantities' are usually taken to be mass, length, and time, with the addition of one or more other quantities in certain cases (such as electrical and magnetic phenomena).

1864 *Rep. Brit. Assoc.* 1863 132 The value of a force is directly proportional to a length and a mass, but inversely proportional to the square of a time. b. *dimensional analysis*, a method of mathematical analysis in which physical quantities are expressed in terms of their dimensions (i.e. length, mass, time, etc.) so that conclusions may be drawn regarding their mutual relations; it is based on the fact that quantities added to or equated with each other must have the same dimensions.

In this view *disner* contains the same elements ultimately as F. *déjeuner*, OF. *desjuner* to breakfast, DISJUNE, and owes its greater phonetic reduction (cf. *aider*—L. *adiutare*) to its belonging to an earlier period. The shifting of meaning whereby *disner* ceased to be applied to the first meal of the day, while its form ceased to recall L. *jejunium* or OF. *jeûner*, would facilitate the subsequent introduction of *desjeûner* with the required form and sense.]

(b) *to dine with Duke Humphrey*: to go dinnerless.

Of this phrase the origin is not altogether clear. In the 17th c. it was associated with Old St. Paul's, London, and said of those who, while others were dining, passed their time walking in that place, or sitting in 'the chair of Duke Humphrey', or 'at Duke Humphrey's table'. According to Stowe, the monument of Sir John Beauchamp there was 'by ignorant people misnamed to be' that of Humphrey Duke of Gloucester, son of Henry IV (who was really buried at St. Albans). Nares says an (adjacent) part of the church was termed *Duke Humphrey's Walk*. (A different origin is however given by Fuller.) The equivalent phrase in Edinburgh appears to have been 'To dine with St. Giles and the Earl of Murray' (who was interred in St. Giles's Church): see *quots.* 1680, and Irving *Hist. Sc. Poetry* 579.

Under Latin influence at the Renaissance, the form became in Fr. and Eng. *dioces*; whence, for phonetic reasons, in Fr. *diocèse*, in Eng. *diocesse*, *diocess*. *Diocess* was the classical English type from the 16th to the end of the 18th c.; it was the only form recognized by Dr. Johnson and the other 18th century lexicographers, and was retained by some (notably by the *Times* newspaper) in the 19th c., in which, however, *diocese* (as in Fr.) has become the established spelling. In Scotch, *diocis(e)*, lost the terminal *s* in the singular, and was reduced to *diocie*, *diocy*. The Gr.-L. word was also independently adapted as *diocesy*, -ie: cf. *paralysis*, F. *paralyisie*, *palsy*. (Cf. Pr. *diocesa*, *diocesi*, Sp. *diocesis*, Pg. *diocese*, It. *diocesi*, -cese.)]

Gr. *δi-*, *δια-* through + *ὄραμα* that which is seen, a sight: cf. *διόρα-εiv* to see through.] *a.* A mode of scenic representation in which a picture, some portions of which are translucent, is viewed through an aperture, the sides of which are continued towards the picture; the light, which is thrown upon the picture from the roof, may be diminished or increased at pleasure, so as to represent the change from sunshine to cloudy weather, etc. The name has also been used to include the building in which dioramic views are exhibited; and in later times has been transferred to exhibitions of dissolving views, etc.

The Diorama, invented by Daguerre and Bouton, was first exhibited in London, 29 Sept. 1823, the building being erected in Regent's Park. It was patented in 1824 by J. Arrowsmith, No. 4899.

First used in 1821 in the French form *diphthérie* by Bretonneau of Tours in a paper before the French Academy, published 1826; the word was taken into English and German medical literature, usually as *diphtheritis*, though the Fr. form was occasional in the scanty English notices of the disease before 1857. In 1855, Bretonneau in a new memoir substituted the name *diphthérie*, probably because terms in -ite, -ITIS, are properly formed on names of the part affected, as in *bronchitis, laryngitis*; in Eng. this was adapted as *diphtheria*, when 'Boulogne sore-throat' became epidemic here in 1857-58; but the adj. *diphtheritic* was generally retained in preference to *diphtheric* used by some. diphthong ('difθŋŋ), *sb.* Forms: 5-6 diptong(e, dyptong), 6 dyptong, diphthonge, -gue, 7-9 diphthong, 8 diphthongue, 6- diphthong. [a. F. *diphthongue*, earlier *dyptongue*, ad. L. *diphthongus*, a. Gr. διφθγγος, adj. having two sounds, sb. a diphthong, f. δι-, δῖς twice, doubly + φθόγγος voice, sound.]

A union of two vowels pronounced in one syllable; the combination of a sonantal with a consonantal vowel.

The latter is usually one of the two vowels *i* and *u*, the extremes of the vowel scale, which pass into the consonants *y*, *w*. When these sounds, called by Melville Bell *glides*, follow the sonantal vowel, the combination is called a 'falling diphthong', as in *out, how, boil, boy*; when they precede, the combination is a 'rising diphthong', as in *It, uovo, piano*. It is common in the latter case to consider the first element as the consonant *w* or *y*.

b. Often applied to a combination of two vowel characters, more correctly called DIGRAPH¹.

diplomatic (diplə'mætɪk), a. and sb. Also 8-9 -ique, -ick. [ad. mod. L. *diplomaticus* (Mabillon, 1681, *De re diplomatica*), f. Gr. διπλωματ-: see DIPLOMA and -IC. In senses 2, 3, a. F. *diplomatique* (1788 in Hatz.-Darm.).]

The transition from sense 1 to sense 3 appears to have originated in the titles of the *Codex Juris Gentium Diplomaticus* of Leibnitz 1695, containing original texts of important public documents from the 11th to 15th c., and the *Corps universel diplomatique du Droit des gens* of Dumont, historiographer to the Emperor, 1726, containing the original texts of 'the treaties of Alliance, of Peace, and of Commerce, from the Peace of Munster 1719'. In these titles (as in the *Codex Diplomaticus Aevi Saxonici* of Kemble), *diplomaticus*, *diplomatique*, had its original meaning (sense 1 below) as applying to a body or collection of original official documents. But as the subject-matter of these particular collections was international relations, 'corps diplomatique' appears to have been treated as equivalent to 'corps du droit des gens', and *diplomatique* taken as 'having to do with international relations'. The transition is shown in sense 2, which refers to documents connected with international relations, while in the fully developed sense 3 the connexion with documents disappears. This sense became established in English at the time of the French Revolution, and its French origin comes out emphatically in the writings of Burke on French affairs.]

Rev.* Oct. 361 The root idea of direct action dates back in this country to Chartist days. In practice, direct action almost invariably implies either a sectional strike by a particular group or groups of labour, or a general strike by all groups of labour combined. 1931 S. JAMESON *Richer Dust* iv. 86 The men were talking of 'direct action', and not taking much notice of their elected [trade-union] leaders. 1957 *Peace News* 18 Jan. 1/4 We have confined ourselves... too naïvely to public meetings. e. *direct tax*: one levied immediately upon the persons who are to bear the burden, as opposed to *indirect taxes* levied upon commodities, of which the price is thereby increased, so that the persons on whom the incidence ultimately falls pay indirectly a proportion of taxation included in the price of the article. Accounting* II. 263 These 'expenses' or charges are broadly divisible into 'direct' and 'indirect'. 1922 J. D. HACKETT in *Management Engineering* Feb., Absence, such as is being considered here, applies mainly to direct or 'productive' labor and not to indirect or 'non-productive' employees. 1923 *Ibid.* May, *Direct labor*, work done exclusively in the making of a product, in contradistinction to subsidiary work also necessary for production. 1925 RYALL *Primer of Costing* 49 Direct labour may therefore be defined as—'Labour applied to a work order which can be measured and directly charged to that order or product'. 1930 *Daily Mail* 1 Aug. 7/7 The Office of Works is about to substitute direct labour for the present system of work done by contract.

dirk (dɜ:k), sb. Forms: 7 dork, 7-9 durk, (7) durke, 8- dirk. [Origin unknown. Found in 1602 spelt *dork*, then common from second half of 17th c. as *durk*; the spelling *dirk* was adopted without authority in Johnson's Dict. 1755, app. from the falling together of *ir*, *ur*, in Eng. pronunciation; cf. *Burmah, Birmah, dirt, durt*, etc. Although early quotes, and Johnson's explanation suggest that the name was Gaelic, there is no such word in that language, where the weapon is called *biodag*. O'Reilly's *duirc* is merely the 18th c. English word spelt Irish-fashion.

The suggestion has been offered that the word may be the Da. *Dirk*, familiar form of the personal name *Diederik*, which name, in Ger. *dietrich*, LG. *dierker* (Bremen Wb.), Da. *dirk*, *dirsk*, Sw. *dyrk*, is actually given to a pick-lock; but besides the difficulty that *dirk* is not the original form of the English word, no such sense as 'dagger' belongs to the continental word. If of continental origin, the earliest form dork might possibly be a soldier's or sailor's corruption of Du., Da., Sw. *dolk*, Ger. *dolch*, dagger.]

dis-, abbreviation of **DISCOUNT**; [also of L. *disputābilis* proper for disputation (see quot.)]

1574 M. STOKYS in Peacock *Stat. Cambridge* (1841) App. A. p. xiv, One of the Bedels must... proclayme thorder of their standynge... upon the Dis Dayes... Yf it be Dys, then... from one of the Clocke untill fyve.

dis- (ME. also **dys-**) *prefix*, of L. origin. [L. *dis-* was related to *bis*, orig. **dis* = Gr. *dis* twice, from *duo*, *duo* two, the primary meaning being 'two-ways, in twain'.] In L., *dis-* was retained in full before c, p, q, s, t, sometimes before g, h, j, and usually before the vowels, where, however, it sometimes became *dir-* (as in *diribere* = *dis* + *habere*, *dirimere* = *dis* + *emere*); before f, it was assimilated, as *dif-* (as in *dif-ferre*, *dif-fusus*); before the other consonants, it was reduced to *dī-* (DI-). In late L. the full *dis-* was often restored instead of *dī-* (cf. Eng. *dismiss*, *disrupt*); and the prefix itself became of more frequent use by being substituted in many words for L. *dē-*: see **DE-** *pref.* I. 6. The regular Romanic form of *dis-* (*dif-*) was *des-* (*def-*) as in OIt., Sp., Pg., Pr., OFr. In F. s (f) before a consonant became mute, and was finally dropped in writing, giving mod.F. *dē-*. In OF. words of learned origin adopted from L., the L. *dis-* was usually retained; and under the influence of these, *dis-* was often substituted for, or used alongside of, *des-* in the inherited words, e.g. *descorder*, *discorder*. The early OF. words in English exhibit the prefix in these forms; *des-* prevailing in the popular words, *dis-* (*dys-*) in those of learned origin. But before the close of the ME. period, the latinized form *dis-* (*dys-*) was uniformly substituted, and *des-* became entirely obsolete, or was retained only in a few words in which its nature was not distinctly recognized, as **DESCANT**. All words taken from L. in the modern period have *dis-*.

Hence, in English, *dis-* appears (1) as the English and French representative of L. *dis-* in words adopted from L.; (2) as the English representative of OF. *des-* (mod.F. *dē-*, *dés-*), the inherited form of L. *dis-*; (3) as the representative of late L. *dis-*, Romanic *des-*, substituted for L. *dē-*; (4) as a living prefix, arising from the analysis of these, and extended to other words without respect to their origin.

In Latin, compounds in *dis-* were frequently the opposites of those in *com-*, *con-*; e.g. *concolor* of the same colour, *discolor* of different colours; *concordia* concord, *discordia* discord; *conjunctio* joining together, *disjunctio* separation; *compendium* profit, *dispendium* loss; *consentire* to agree in feeling, *dissentire* to disagree in opinion, etc. In cl.L. *dis-* was rarely prefixed to another prefix, though *discondicere* to be unprofitable, is used by Plautus, and *disconvenire* to disagree, by Horace; but in late L. and Romanic, compounds in *discon-*, expressing the separation of elements of which *com-*, *con-* expressed the junction, became very numerous; many words of this type have come down through Fr. into English, where others have been formed after them: cf. *discoherent*, *discomfit*, *discomfort*, *discommend*, *discompose*, *disconnect*, *disconsolate*, *discontent*, *discontinue*.

In some words beginning with *dis-*, the prefix is *di-*, the s being the initial of the radical (e.g. *dis-perse*, *dis-tinguish*). But by identity of phonetic change, *dis-* here also became *des-* (sometimes reduced to *de-*) in OF., whence also *des-* in ME. as *desperse*, *desincte*; at the Renaissance these were rectified to *dis-*.

The following are the chief senses of *dis-* in Latin and English:

1. As an etymological element. In the senses:

1. 'In twain, in different directions, apart, asunder,' hence 'abroad, away'; as *discernere* to discern, *discutere* discuss, *dilapidare* dilapidate, *dimittere* dismiss, *dirumpere* disrupt, *dissentire* dissent, *distendere* distend, *dividere* divide.

2. 'Between, so as to separate or distinguish'; as *dijudicare* to adjudicate, *diligere* choose with a preference, love.

3. 'Separately, singly, one by one'; as *dinumerare* to dinumerate, *disputare* dispute.

4. With privative sense, implying removal, aversion, negation, reversal of action (cf. **DE-** I. 6), as *discaleatus* unshod, *diffibulare* to unclasp, *disjungere* disjoin, *dispicere* displease, *dissociare* dissociate, *dissuadere*, dissuade.

5. With verbs having already a sense of division, solution, separation, or undoing, the addition of *dis-* was naturally intensive, 'away, out and out, utterly, exceedingly', as in *disperire* to perish utterly, *disputare* to be utterly ashamed, *distendere* to be utterly wearied or disgusted; hence it became an intensive in some other verbs, as *dilaudare* to praise exceedingly, *discupere* to desire vehemently, *dissuaviri* to kiss ardently. In the same way, English has several verbs in which *dis-* adds intensity to words having already a sense of undoing, as in *disalter*, *disaltern*, *disannul*.

II. As a living prefix, with privative force.

(Extended from 4, and like *F. des-, de-*, used with verbs, substantives, and adjectives, without regard to their origin. 1650 O. WALKER *Oratory* 31 Some Prepositions there are, which may be prefixed at pleasure, as, *un, dis, re*.)

6. Forming compound verbs (with their derivative sbs., adjs., etc.) having the sense of undoing or reversing the action or effect of the simple verb.

Usually formed by the addition of *dis-* to an existing verb; sometimes, however, formed from a sb. or adj. by prefixing *dis-* and adding a verbal suffix, *-ize, -ate, -fy*, etc.

Most of these formations, including all the more important and permanent, are treated in their alphabetical places as Main words, e.g. *DISAFFIRM*, *DISESTABLISH*, *DISOWN*. Of others, chiefly nonce-words, examples are, *disanagrammatize*, *disangularize*, *disasinate*, *disasinize* (to deprive of asinine nature), *disByronize*, *discompound*, *disdeify*, *disdenominationalize*, *disdub*, *disexcommunicate*, *dishellenize*, *dislegitimate*, *dispantheonize*, *dispapalize*, *dispericra-niate*, *disrestore*.
