B. quasi-sb. and sb.

1. quasi-sb. On the analogy of *a few* (see FEW 2), *a* has from the 16th c. been prefixed to *many* when followed by a pl. sb. or used *absol.* in plural sense. In such collocations *many* formally admits of being interpreted as a sb., meaning 'a great number'. This interpretation is somewhat strained when *a many* is immediately followed by a pl. sb., because the ellipsis of *of*, which must be assumed, is abnormal; but in the other cases it presents no difficulty, and it would often be impossible to determine whether in the consciousness of the speaker the word is an adj. used *absol.* in pl., or a genuine sb. Confusion with MEINIE, of which there are many traces in the 16th c., seems to have contributed to cause the word in this use to be apprehended as a sb. Often with prefixed adj. as in a † *considerable, good, great, †pretty, †jolly many*; also † *no small many*.

a. with pl. sb. (or *people*) immediately following.

In this use *a many* hardly differs in sense from *many*, and is now somewhat rare in literary use, though *a good many, a great many*, are common colloquially.

A variety of muscovite that contains a relatively high proportion of silica and up to one per cent. chromic oxide and is found as green or greenish-yellow crystals.

1868 B. SILLIMAN in *Proc. Calif. Acad. Sci.* III. 381 The mineral is probably new, and must be referred to the mica section of an hydrous silicate. Should it... prove to be new, I would suggest the name *Mariposite* as an appropriate name for it, as it was on the Mariposa estate that it first attracted my attention, and where it exists in great abundance. 1916 *Bull. U.S. Geol. Survey* No. 610. 139 A comparison of the two analyses of mariposite made by Hildebrand with Penfield's analysis of alurgite shows that the two minerals are probably identical. 1946 *Amer. J. WILLIAMS *Econ. Geol. N.Z.* x. 149/2 The majority of overseas occurrences of fuchsite (and mariposite) seem to have a direct ultramafic association.

|| **Marivaudage** (marivodaʒ). [Fr., f. the name of P. C. de Marivaux (1688-1763), novelist and dramatist.] The expression of affected language and exaggerated sentiment in the style of Marivaux; an overdone attempt at refinement, affectation.

1765 H. WALPOLE *Let.* 19 Nov. in *Corr.* (1948) XIII. 144 Crébillon is entirely out of fashion, and Marivaux a proverb: *marivauder*, and *marivaudage* are established terms for being prolix and tiresome. 1882 G. SAINTSBURY *Short Hist. French Lit.* IV. ii. 410 All the work of Marivaux, dramatic and non-dramatic, is pervaded more or less by a peculiarity which at the time received the name of Marivaudage. This peculiarity exists partly in the sentiment, and partly in the phraseology. The former is characteristic of the eighteenth century, disguising a considerable affectation under a mask of simplicity, and the latter (sparkling with abundant, if somewhat precious wit) is ingeniously constructed to suit it and carry it off. 1894 BEERBOHM in *Yellow Bk.* II. 284 The qualities that I tried... to travesty—paradox and marivaudage. 1930 *Mod. mark (mɑ:k), *sb.*¹ Forms 1 *mearc*, *Anglian merc*, (also *zemerce*, *zemerce*, *Northumb. merce*, *merca*), 2 *marc*, 3-5 *merk(e)*, (Orm. *merrke*), *merc(k)*, *marck(e)*, 4, 7 *marque*, 4- *mark*. [OE. *mearc*, *Anglian merc*, str. fem., boundary, landmark, sign = OFris. *merik(e)*, *merke*, boundary, sign, OS. *marka* boundary (MDu. *marke*, mod.Du. *mark*), OHG. *marcha* boundary (MHG., mod.G. *mark* fem.), ON. *mork* (known only in the derived sense 'forest'; Sw., Da. *mark* field, ground), Goth. *marka* boundary, landmark:—Oteut. **markā*. A neuter form (:—Oteut. type **markom*) exists in several Teut. langs. with the senses 'sign', 'landmark', 'standard', etc.: MDu. *mark* (mod.Du. *merk*), MHG. *mark* (mod.G. has *marke* fem., prob. influenced by F. *marque*), ON., MSw. *mark*. The ME. form *merke* (disyllable), while normally representing the OAnglian pronunciation *merc*, may in part descend from ONorthumb. *merce* (also written *merca*), token, sign, and in part also from an adoption of the equivalent ON. *merki* neut., landmark, standard, sign (Sw. *märke*, Da. *merke*):—Oteut. type **markjom*, f. **markā* (see above); it may also, in northern dialects, represent partly the ONorthumb. *zemerce* sign, token (= WS. *zemerce*, OHG. *gimerchi* boundary:—Oteut. **ga-markjom*), as the prefix *ze-* of sbs. did not survive into ME., and the palatalized *c* in final syllables became *k* in northern Eng. According to phonetic law the ME. *merke* regularly became *mark* in mod.Eng., thus coalescing with the descendant of WS. *mearc*.

The Teut. word and its derivative vb. were early adopted into Romanic; the sb. appears as OF. *merc*, *marc* masc., F. *marque* fem., mark, sign, etc., *marche* (ONF. *marque*) boundary (see MARCH sb.³), Pr., Sp., Pg., It. *marca* mark, sign, boundary. Some of the senses developed in F. *marque* have coloured the application of the Eng. word.

The OTeut. **markā* appears to be cogn. w. L. *margo* MARGIN, Oceltic **mrogi-* country (Gaulish *brogi-* in place-names, Welsh *brô*, OIrish *mruig*, *bruig*), Persian *marz* boundary. The extra-Teut. relations confirm the view which is suggested by the evidence of Teut. itself, that the primitive sense is 'boundary'. The order of development of senses which appears most probable, and is assumed as the basis of the arrangement below, is 'boundary', 'sign of a boundary', 'sign in general', 'impression, trace or device used as a sign', 'impression, trace, etc. in general'. Some scholars, however, have considered the sense 'visible trace' as primitive (comparing Lith. *margas* parti-coloured), and have supposed the sense 'boundary' to be either derived from this or to belong to an independent word.]

2. *Hist.* The name applied in mediæval Germany to the tract of land held in common by a village community. Hence used by many modern scholars to denote the tract of land similarly held by one of the village communities of primitive Teutonic times. Also *attrib.*, as in *mark-community*, *-family*, *-system*; *markmoot* (pseudo-*arch.*), a (supposed) assembly of the inhabitants of the 'mark'.

Kemble's fancy that OE. *mearc* was the name of a unit of territorial organization next below the shire (*scir* or *gá*) has no foundation. The alleged OE. **mearc-mót* 'mark-moot', has no existence: the *mercemot* occurring in a schedule of boundaries of land at Barrow-on-Humber in 971 (Birch C.S. No. 1270) may perh. mean 'parsley-bed', and in any case does not admit of Kemble's interpretation.

1848 *KEMBLE Saxons in Eng.* (1876) I. iii. 76 As then the word Mark is used to denote two distinct things,—a territorial division and a corporate body,—so does the word Gá or Scir denote both [etc.]. 1867 *FREEMAN Norm. That the markmoot was a court of justice. . . seems altogether improbable. *Ibid.* 85 It is as an owner of land, not as a member of the mark-community, that the freeman has rights. 1876 *DIGBY Real Prop.* i. §1. 5 Each community occupied a territory or mark, which was divided into three, or rather four portions. 1887 *Edin. (God) *bless (or save) the mark* (or *†sample*): an exclamatory phrase, prob. originally serving as a formula to avert an evil omen (cf. quot. 1833) and hence used by way of apology when something horrible, disgusting, indecent or profane has been mentioned. In mod. literary use (after some of the examples in Shaks.), an expression of impatient scorn appended to a quoted expression or to a statement of fact.

[It has been affirmed (see W. A. Henderson in *N. & Q.* 8th ser. VII. 373) that the phrase was used by midwives at the birth of a child bearing a 'mark'. This may possibly be its original use: cf. quot. a 1625 below. The meaning of 'mark' in the expression may, however, have been 'sign' or 'omen' (see 11). There is no foundation for the statement copied in recent Dicts. from Dr. Brewer, that the phrase was originally used by archers.]

c. Of a linguistic construction, form, etc.: distinguished or determined by a particular feature; distinguished as intrinsically unnatural (see also MARKER 7; opp. *unmarked*).

The corresponding Russian word was used by Trubetzkoy before Bloomfield: see R. Jakobson *Selected Writings* (ed. 2, 1971) I. 734 ff.

1933 L. BLOOMFIELD *Lang.* xvi. 268 A phrase consisting of the preposition *to* and an infinitive expression belongs to the special form-class of *marked infinitive phrases*, whose function differs from that of unmarked infinitive expressions. 1953 C. E. BAZELL *Ling. Form* II. 19 The Latin marked construction here can be uniquely derived from the unmarked in every case. 1959 R. QUIRK in Quirk & Smith *Teaching of English* I. 44 It seems likely that this structural notion of marked and unmarked members of opposing pairs can be applied cautiously but with profit to many of the binary choices in usage at more complex linguistic levels than the lexical. 1963 *Canad. Jnl. Ling.* VIII. 92 Whenever a demonstrative system is reduced to a binary one, the first member which can be correlated with the first person always remains and thus becomes the marked member. 1965 *Amer. Speech* XL. 175 There are certain marked forms [of the verb] which are past and future respectively. 1968 CHOMSKY & HALLE *Sound Pattern Eng.* 402 Certain aspects of this general problem can be dealt with if we incorporate the Praguian notion of 'marked' and 'unmarked' values of features into our account in some systematic way, and if we then revise the evaluation measure so that unmarked values do not contribute to complexity. *Ibid.* 404 A major difference between the Praguian conception of markedness and our own is that in the former the marked coefficient of a feature was assumed always to be + and the unmarked coefficient always —. 1972 M. SHAPIRO in *Language* XLVIII. 345 In my concept and utilization of the terms marked and unmarked, the former is to be understood as denoting relative complexity and differentiatedness, the latter as denoting the absence of these relative attributes.

1833 HT. MARTINEAU *Manch. Strike* xi. 125 You are a marked man in Manchester, . . . no master in any trade will take you in among his men. 1855 MACAULAY *Hist. Eng.* xviii. Amer.* Sept. 78/3 Any syntactic structure is a member of a transformational chain and any two partially synonymous constructions display an interrelation of markedness and unmarkedness. 1973 A. H. SOMMERSTEIN *Sound Pattern Anc. Greek* III. 82 The Markedness theory holds that phonological features are not in general symmetrical: that for each feature in each environment, one of its possible values is more normal, more 'unmarked', than the other.

markland ('mɑ:klənd). *Sc.* [f. MARK *sb.* 2 + LAND.] A division of land, originally of the annual value of a mark; = MARK *sb.* 2

As 'a markland' and 'a mark (of) land' were equivalent, it is often difficult to determine whether in the early examples the combination is a compound or a syntactical collocation.

1550 in *Black Bk. Taymouth* (Bannatyne Cl.) 407 The markland of Drimleyort, the half markland of Glenkinglas [etc.]. 1774 *PENNANT Tour Scot. in 1772*, 197 The island is divided into marklands, each of which ought to maintain fourteen cows and four horses. 1793 *Statist. Markov ('mɑ:kɒf). *Math.* Also Markoff. [The name of Andrei Andreevich Markov (1856-1922), Russian mathematician, who investigated such processes.] **Markov process**: any stochastic process for which the probabilities, at any one time, of the different future states depend only on the existing state and not on how that state was arrived at. **Markov chain**: a Markov process in which there are a finite or countably infinite number of possible states or in which transitions between states occur at discrete intervals of time; also, one for which in addition the transition probabilities are constant (independent of time). Also **Markov property**, the characteristic property of Markov processes.

1939 *Jap. J. Math.* XVI. 47 (heading) Markoff process with an enumerable infinite number of possible states. 1942 *Trans. Amer. Math. Soc.* LII. 37 Then $p_{ij}(t)$ can be considered a transition probability of a Markoff chain: A system is supposed which can assume various numbered states, and $p_{ij}(t)$ is the probability that the system is in the j th state at the end of a time interval of length t , if it was in the i th state at the beginning of the interval. 1950 W. FELLER *Introd. Probability Theory* I. xv. 337 A Markov process is the probabilistic analogue of the processes of classical mechanics, where the future development is completely determined by the present state and is independent of the way in which the present state has developed. *Ibid.* 337 A definition of the Markov property. 1953 J. L. DOOB *Stochastic Processes* v. 170 A Markov chain is defined as a Markov process... whose random variables can (with probability 1) only assume values in a certain finite or denumerably infinite set. The set is usually taken, for convenience, to be the integers 1, ..., N (finite case) or the integers 1, 2, ... (infinite case). *Ibid.* 186 The problem of card mixing is a good example of the application of Markov chains. 1953 J. B. CARROLL *Study of Lang.* iii. 85 A Markoff process has to do with the different 'states' into which a phenomenon can get, and the statistical probabilities which govern the transition of the phenomenon from one state to another. 1956 *Nature* 4 Feb. 207/1 The most simple case is when all the atoms of the assembly are supposed to have no volume and no interactions (such as in an ideal gas). In that case it can be treated as a Markov process. 1960 KEMENY & SNELL *Finite Markov Chains* ii. 25 A finite Markov chain is a finite Markov process such that the transition probabilities $p_{ij}(n)$ do not depend on n . 1962 J. RIORDAN *Stochastic Service Syst.* iii. 28 The simplest infinite-server system is unique among its fellows in the possession of the Markov property that future changes are independent of the past. 1966 S. KARLIN *First Course in Stochastic Processes* ii. 27 A discrete time Markov chain $\{X_n\}$ is a Markov stochastic process whose state space is a countable or finite set, and for

which $T = (0, 1, 2, \dots)$. *Ibid.*, The vast majority of Markov chains that we shall encounter have stationary transition probabilities. 1968 P. A. P. MORAN *Introd. Probability Theory* iii. 140 Thus a Markov chain observed in the reverse direction of time will be a Markov process. However, it will not in general be a Markov chain because the observed transition probabilities will not be independent of t . 1973 *Manch. Sch. Econ. & Social Stud.* XLI. 401 (heading) A Markov chain model of the benefits of participating in government training schemes.

Markovian (mɑ:'kəʊviən), *a.* [f. prec. + -IAN.] Having the Markov property.

1950 W. FELLER *Introd. Probability Theory* I. xv. 338 Examples of non-Markovian processes... Let $X^{(n)}$ equal 1 or 0 according to whether the n th drawing [from the urn] results in a black or a red ball. The sequence $\{X^{(n)}\}$ is not a Markov process. 1965 N. CHOMSKY *Aspects of Theory of Syntax* ii. 89 A derivation involving only phrase structure rules (rewriting rules) has a strict 'Markovian' character. That is, in a derivation consisting of the successive lines $\sigma_1, \dots, \sigma_n, \dots$, the rules that can be applied to form the next line σ_{n+1} , are independent of $\sigma_1, \dots, \sigma_n$, and depend completely on the string σ_n . 1972 *Nature* 3 Mar. 20/2 To render the process Markovian, we have assumed exponential distributions of division times for both normal and abnormal cells.

'mark-up. [f. the vbl. phr. *to mark up*: see MARK v. 2 c, 7 f.] 1. The amount added by a retailer to the cost price of goods to cover overhead charges and provide profits.

1920 P. I. CARTHAGE *Retail Organization & Accounting Control* ii. 44 The mark up of merchandise refers to the percentage or the amount of money added to the cost in order to obtain the selling price. 1931 J. F. PYLE *Marketing Princ.* xx. 518 *Mark-up* is... the difference between the marked price of the merchandise, at retail, and the cost of merchandise bought. Thus the mark-up represents the gross margin that is *hoped for*. 1936 *Economist* 22 Feb. 422/1 The 'mark up' (retailer's margin) is evidently adequate to provide relatively stable earnings on a stabilised capital investment. 1957 *Times* 19 Aug. 9/2 Shops often add to the price which they pay for their merchandise to manufacturers and wholesalers a percentage 'mark up' of 30 or 40 per cent. 1965 *Spectator* 22 Jan. 116/3 A big, new market for poor-quality materials and an even larger mark-up where the garments are supplied ready-made. 1972 M. WOODHOUSE *Mama Doll* xiii. 175 The estimated value of the items on the inventory is somewhere around fifty-five million pounds... Allowing a hundred per cent markup on sale, that would make their wholesale value some twenty-seven million pounds. 1974 *Times* 7 Feb. 20/8 The exorbitant mark-up imposed by European booksellers.

2. a. In the preparation of text for printing, typesetting, etc.: the process or result of writing instructions on lay-out, style, and other matters, in a code convertible by the compositor or typesetter.

1973 A. DAVIS *Graphics* iii. 74 The type mark-up by which the designer conveys his instructions to the compositor is one of the essential tools of the trade. 1986 *Bookseller* 7 June 2275/1 Traditionally, copy preparation and typographical markup have involved the use of a large, rather ill-defined set of words, abbreviations and signs.

b. *Computing* The process of assigning tags to the various elements of a text, indicating the nature of each in relation to the structure of the text; the tags so assigned.

1980 *IBM Tech. Disclosure Bull.* 5130 A program which generates a report from machine-readable data does not insert format-related information directly into its output, but instead inserts GML (Generalized Markup Language) tags into the output file to describe significant data items.

1985 *New OED System Design* (Oxf. Univ. Press) 2 Since structural information is only partially contained in the text captured by the keyboarding contractor, structural mark-up will be generated and inserted by the system. 1986 P. R. KING in G. Coray et al. *Text Processing & Document Manipulation* 189 Mark-up in W consists in specifying a document as a hierarchy of nested components. 1986 *Computer Jnl.* XXIX. 193/2 The basic principle is that of the generic markup of the structural elements of a document, their manner of presentation being a separate matter.

The origin of the Fr. word is obscure; it has been conjectured to be a derivative of L. *marmor* marble, but the form is not easy to account for. Originally, a licence granted by a sovereign to a subject, authorizing him to make reprisals on the subjects of a hostile state for injuries alleged to have been done to him by the enemy's army. In later times this became practically a licence to fit out an armed vessel and employ it in the capture of the merchant shipping belonging to the enemy's subjects, the holder of letters of *marque* being called a privateer or corsair, and entitled by international law to commit against the hostile nation acts which would otherwise have been condemned as piracy. Rom. *marca* (see MARCH *sb.*³, MARK *sb.*¹) frontier, frontier territory + -ese:—L. -ensem suffix forming adjs. from place-names (see -ESE). The word is thus etymologically an adj., the sb. understood being that represented in Eng. by COUNT, so that the title was equivalent to MARGRAVE. The med.L. representative was *marchiōnem* (*marchio*), still preserved in heraldic Latin: cf. *marchioness*.

The prevailing spelling in literary use appears to be *marquis*. Some newspapers, however, use *marquess*, and several English nobles bearing the title always write it in this way.]

1. In various European countries, the title of the ruler of certain territories (originally 'marches' or frontier districts). This gradually passed, in Romanic-speaking countries, into a mere title indicating a certain grade of noble rank, immediately below that of duke and above that of count. In English it is commonly used to designate a person of this titular rank in the modern nobility of foreign countries (though the foreign forms, It. *marchese*, Sp. *marqués*, etc. are sometimes retained), and also *Hist.* as the appellation of those territorial lords to whom it was applied in earlier times. Formerly it was often employed (now rarely) as the English equivalent of MARGRAVE.

Horace Gerold (the Marquis of Clairefontaine).

2. At the end of the 14th c. the title was introduced into England to designate a specific degree of the peerage, between those of duke and earl. Late in the 15th c. this degree was adopted in the peerage of Scotland. The title still continues, indicating the same relative rank, in the peerage of the United Kingdom and in those of Scotland and Ireland. When a duke is also a marquis, his second title is given 'by courtesy' to his eldest son: thus the eldest son of the Duke of Devonshire is called 'the Marquis of Hartington'.

The title of a marquis is usually territorial in form, as 'the Marquis of Salisbury', but in some instances 'Marquis' is prefixed to a surname, as 'the Marquis Cornwallis'.

†3. In the 16-17th c. often employed as a female title, equivalent to the later MARCHIONESS. *Obs.*

It is not easy to see how far this was regarded as an application of the masculine title, and how far it was taken as an Anglicization of MARQUISE. The spelling *marquess* was commonly preferred in this use, prob. through association with the suffix -ess. *Lady* was often prefixed.

Marsh². The name of James Marsh (1794-1846), British chemist, used in the possessive and *attrib.* to designate a sensitive test for the presence of arsenic in a substance (published by him in 1836), in which the substance is subjected to the action of nascent hydrogen so that any arsenic in it forms the gas arsine, which may be detected by decomposing it (e.g. by passing it through a heated glass tube) and looking for a dark stain of arsenic (distinguishable from a similar stain given by antimony by its solubility in sodium hypochlorite solution).

1855 J. SCOFFERN *Elem. Chem.* 479 Arseniuretted hydrogen thus employed, as a means of removing and discovering arsenic, is called Marsh's test, from its inventor, Mr. Marsh. 1930 D. L. SAYERS *Strong Poison* xx. 265 In a small apartment usually devoted to Bunter's photographic work... stood the apparatus necessary for making a Marsh's test of arsenic. 1968 *Materials & Technol.* I. ix. 399 Very minute quantities of arsenic can be detected by means of the Marsh test.

Martello (*ma:rtələu*). [Corruption (through association with It. *martello* hammer) of the name of Cape *Mortella* in Corsica (from It. *mortella* wild myrtle), where there was a tower of this kind which the English fleet captured with some difficulty on 8 Feb. 1794; it had been captured by the English and again abandoned in Sept. 1793.

The tower was of a type common in the Mediterranean; the stout resistance which it was able to make with a small force led to a belief among English military experts that the construction had great defensive value, and the erection of 'martello' towers was therefore strongly urged on the British government, but it was not until 1804 that any were actually erected. Windham's account of the events of 1793-4 is grossly inaccurate, but there appears to be no room for doubt that he refers to these.]

3. martial law. a. That kind of military government of a country or district, by which the ordinary law is suspended, and the military authorities are empowered to arrest all suspected persons at their discretion, and to punish offenders without formal trial. † b. Formerly sometimes applied to what is now called 'military law', viz. the body of enactments and rules for the government of the army; an enactment or rule forming part of this.

Originally these two senses (in which the adj. has respectively senses 1 and 2) would not always be distinguishable, as military law existed only in war-time, and consisted mainly of temporary and occasional ordinances; our earliest quotes., however, distinctly exhibit the same use as is now current. In early examples the adj. is often assimilated in spelling to MARSHAL *sb.*, and it was a common opinion that 'marshal law' was so called as being the law emanating from the lord marshal. *Mod. Fr.* has *loi martiale*, but perh. from English.

The name is applied in Fr. to various birds, as in *martin-chasseur*, the hen-harrier, *martin-pêcheur*, the kingfisher; the dim. *martinet* (see MARTINET) denotes the house-martin and the swift.

The application of the Christian name to birds has no obvious reason, and may have been purely arbitrary. Many writers of the 17th c. say that the martin is so called because it comes in March and departs about Martinmas.]

2. *Her.* An imaginary bird without feet, borne as a charge. Used as a mark of cadency for a fourth son.

In French heraldry the corresponding bird (described as having neither feet nor beak) is called *merlette* (OF. *merlete*, *meslete*; AF. heraldry had *merelot*, *merlot*, with differing dim. suffix). This word is app. a dim. of *merle* blackbird; according to Littré it has the sense 'female blackbird', but only the heraldic sense appears in Hatz.-Darm. It seems possible that the heraldic bird may originally have been intended for a 'little blackbird', represented without feet by accident or caprice, or with symbolical intention, and that the English heralds of the 16th c. or earlier identified the bird so depicted with the 'martlet' or swift, which has short legs, whence its mod. specific name *apus* = Gr. ἄπυς footless. It is noteworthy that the 'martlets' (so called in the 16th c.) in the pretended arms of Edward the Confessor were at an early period portrayed with feet. The anglicized form of *merlete*, MARLET, does not occur in heraldic use, but appears in several 16th c. instances with the sense of *martlet*, i.e. a swift or a martin. According to English heraldic writers, the use of the footless bird as a mark of cadency for younger sons was meant to symbolize their position as having no footing in the ancestral lands.

1. *Eccl.* a. The specific designation of honour (connoting the highest degree of saintship) for: One who voluntarily undergoes the penalty of death for refusing to renounce the Christian faith or any article of it, for perseverance in any Christian virtue, or for obedience to any law or command of the Church.

A sect which regarded its distinctive principles as part of the Christian faith could apply the title, in this strict sense, to its own members who died under persecution, while by others the application would be repudiated, or only conceded ironically. Popularly, however, this sense has long tended to be apprehended as a specific use of sense 2.

marzipan (ˌmɑ:zi'pæn), **marchpane** ('mɑ:tʃpæn). Forms: a. 5, 8 *marchpayne*, 6 *marche payne*, -*pane*, (*martspaine*, *martchpane*), *march pain*, (-*payne*, -*pine*), 7 *marchpayn*, (6, 9 *marchpan*), 6-7 *marchpaine*, 6- *marchpane*. β. 6-7 *mazapane*. γ. 6 *marzepaine*, 9 *marzipan*, (*marzapane*, *marcipan*). [Occurs as *F. massepain* (in 16th c. *marcepain*), It. *marzapane*, Sp. *mazapan*, Pg. *maçapão*, Ger. *marzipan* (*marzapan* 1521, glossing *panis marcius*), Du. *marsepein* (*marcepain* in 1486), Da., Sw. *marsepain*; the Eng. forms come from various continental sources. In recent times the sweetmeat has been known chiefly as imported from Germany; hence the Ger. form *marzipan* has greater currency than the traditional Eng. form *marchpane*.

The word is believed to have come into the other Rom. langs. from Italian. Its etymology is obscure. What seems to be the same word occurs in various Rom. forms and in med.L. with the senses 'small box', 'a certain mediæval weight', and 'a mediæval coin'. Kluyver, in *Zeitschr. f. deutsche Wortforschung* July 1904, ingeniously tries to prove that the last-mentioned sense is the source of all the others. He identifies the word with med.L. *matapanus*, a Venetian coin bearing a figure of Christ on a throne (Du Cange), and suggests that it represents Arab. *mauthabân* 'a king that sits still' (Lane), which he conjectures to have been used by Saracens as a derivative name for this coin.]

maser ('meɪzə(r)). [An acronym: see quot. 1955².] A laser, esp. one that emits microwaves.

The first masers emitted microwaves. Later ones emitted in other parts of the spectrum, and these were also called masers for a time until *laser* came to be adopted as the general name for all such devices.

1955 *Sci. News* Let. 5 Feb. 83/1 Scientists can, for the first time, generate microwaves of extremely high frequency by tapping directly the energy of molecules, Dr. Charles H. Townes of Columbia University's physics department reported in New York. His device for doing so is known as the 'maser'. *Ibid.*, Work on the maser began three years ago. 1955 GORDON, ZEIGER, & TOWNES in *Physical Rev.* 15 Aug. 1264/1 The device utilizes a molecular beam in which molecules in the excited state of a microwave transition are selected. Interaction between these excited molecules and a microwave field produces additional radiation and hence amplification by stimulated emission. We call an apparatus utilizing this technique a 'maser', which is an acronym for 'microwave amplification by stimulated emission of radiation'. 1958 SCHAWLOW & TOWNES in *Ibid.* 15 Dec. 1940 (heading) Infrared and optical masers. 1960 *Times* 17 Oct. 2/2 (Advt.), Development work on existing long range programmes in: solid-state millimetre and optical masers, parametric amplifiers, [etc.]. 1960, 1962 [see LASER²]. 1962 *Engineering* 2 Feb. 190/2 The basic type of maser, from which the principle of optical masers is derived, is a quite recent electron device... Research later extended the upper frequency range of this technique of low-noise signal amplification, until it eventually reached the visible region—giving rise to the optical maser, otherwise known as the laser. 1967 T. P. MELIA *Introd. Masers & Lasers* iv. 34 The power output of the ammonia maser is very small (about 10⁻¹⁰ watt) but the frequency stability is of the order of 1 in 10¹² over a 1 minute period and 1 part in 10¹⁰ over very much longer periods. 1968 *Nature* 30 Mar. 1237/2 (heading) Is interstellar hydrogen capable of maser action at 21 centimetres? 1969 S. G. & H. LIPSON *Optical Physics* xi. 369 A maser is, of course, a very-narrow-band amplifier; it is because of its narrow band that the noise-level achieved is very low, since there is a theoretical minimum noise-level per unit band-width. 1972 *Sci. Amer.* Sept. 136/3 The greatest contributor... to the receiver's ability to handle Telstar's faint signals (about 10⁻¹² watt) was a maser amplifier that combined very high gain with extremely low noise.

mask (mɑːsk, -æ-), *sb.*³ Forms: (6 *measque*), 6-7 *maske*, 6-9 *masque*, 7- *mask*. [a. F. *masque* masc. (in 16th c. also fem.) of disputed origin, whence also G., Du. *maske* fem., Da. *maske* com., Sw. *mask* fem. MASQUE *sb.* was orig. a sense of the same word, now differentiated in spelling.

The Fr. word (first recorded in 16th c.) is usually believed to be ad. the synonymous Sp. *máscara*, It. *maschera* (see MASKER sb.¹, MASQUERADE). But it is difficult to believe that the word has no connexion with med.L. *mascus*, *masca*, which render OE. *gríma* mask, spectre, in the Corpus Glossary c 725. *Mascha* is used c 680 by Aldhelm in association with *larva*, which had the senses 'mask' and 'spectre', and *masca* occurs in the Lombard Laws c 800 with the sense 'witch'; cf. Pr. *masco* witch (see MASCOT). On the whole the most plausible view seems to be that the representative of med.L. *mascus*, *masca* survived in some Fr. dialect, and was thence taken into literary use as an equivalent of the like-sounding Sp. *máscara*. The origin of med.L. *mascus*, *masca*, is undetermined; some scholars think the original sense was 'mask', and that the word was from Teut. **maskwo-* net (see MESH sb.).]

Most scholars have regarded the OHG. *mess*(e) neut., brass, as identical with MHG. *mässe*, *messe* fem., lump (of metal), usually believed to be a derivative of L. *massa* **MASS** sb.² The supposition involves serious difficulties, and has latterly been questioned (Kluge, Franck), but no plausible alternative has been found. It does not seem possible to connect the words with L. (*æs*) *miscellum* mixed brass, or with the popular Lat. word represented in **MASLIN**². The MHG. *messinc* passed into Slavonic (Czech, Upper Serb. *mosaz*, Lower Serb. *mjesnik*, Little Russian *mosaž*, White Russian *mosenz*:—**mosengju*) and Lith. (*masadis*). The view of Schrader that the Slav. word is the source of the MHG. is improbable, and leaves the OE. forms and the MHG. *messe* unexplained. On the other hand, Schrader's comparison of certain oriental words for brass (Kirghiz *moes*, Kurdish *mys*, Persian *mis*, Mazendoran *mers*, *mis*) seems worthy of consideration.]

The mod. Heb. *māsōrāh* (whence mod. [OE. *mæsse* (Kentish and Mercian *messe*) wk. fem., a. vulgar L. *messa* (whence F. *messe*, Pr., It. *messa*; Sp. *misa*, Pg. *missa*, are from written Latin):—Eccl. L. *missa*. The Teut. forms, partly from vulgar Lat. and partly from written Latin, are: OFris., OS. *missa* (MDu. *misse*, *messe*, mod. Du. *mis*), MHG. *misse*, *messe* (mod. G. *messe*), ON. *messa* (Sw. *messa*, Da. *messe*).

It is now generally agreed that the L. *missa* is a verbal sb. (formed like *repulsa*, *collecta*, *offensa*) from L. *mittere* (pa. pple. *missus*) to send, send away, dismiss. The earliest known examples of the word belong to the last quarter of the 4th century, occurring in the Epistles of St. Ambrose and the Itinerary of Silvia of Aquitania. In the early centuries it had the general sense of 'religious service', being applicable, e.g., to matins and vespers, though in an eminent sense it always denoted the Eucharist. In secular application it occurs, though rarely, in the 5th and 6th centuries with the sense 'dismissal'. The origin of the liturgical application has been much disputed. Isidore (a 636) conjectured that the original reference was to the dismissal of the catechumens which was the preliminary to the eucharistic service. This explanation is not favoured by modern scholars, who consider that the wider sense 'religious service' is more likely than the narrower sense to have been the original. Some think that *missa* at first denoted the solemn dismissory formula at the conclusion of a service, *Ite, missa est*, and hence came to be applied to the service itself. Others (as Kattenbusch in Herzog's *Encycl.*) have suggested, on confessedly slender and doubtful evidence, that *missa* in secular use had some such sense as 'commission', 'official duty', and was therefore adopted as the rendering of Gr. *λεωτοργία* (see LITURGY), which had primarily a similar meaning, but in ecclesiastical language was used for 'religious service' and specifically for the Eucharist. Several other theories have been proposed, but none of them has gained wide acceptance among scholars.]

1. The Eucharistic service; in post-Reformation use, chiefly that of the Roman Catholic Church.

In the 16th c. the Protestants generally objected to the term as being unscriptural, and as associated with the 'popish' view of the nature of the sacrament. (In Sweden and Denmark, however, the equivalent words are applied to the Lutheran communion service.) In the first Prayer-book of Edward VI (1548-9) the heading of the service reads 'The Holy Communion, commonly called the Masse', but in the subsequent Prayer-books the word was not used. In recent years some of the Anglican clergy have applied the term to their own rite.

¶ c. Shakspeare's mention of *evening mass* is prob. due to ignorance or forgetfulness of the fact that mass was not (normally) celebrated in the evening. In ecclesiastical antiquities, however, the expression is a literal rendering of L. *missa vespertina*, where the sb. has the wider sense mentioned in the etymological note above.

massula ('mæsjulə). *Bot.* [mod.L., dim. of L. *massa*: see MASS sb.²] (a) In heterosporous ferns of the genera *Azolla* and *Salvinia*, the tissue surrounding the maturing microspores; (b) in certain orchids, a cluster of pollen grains developed from a single cell.

1856 J. S. HENSLAW *Dict. Bot. Terms* (ed. 2) 105 Massula (a little lump). One of the smaller fragments which... compose the pollen mass in Orchidaceæ. 1882 S. H. VINES tr. F. G. J. von Sachs's *Text-bk. Bot.* II. 454 In the microsporangia [of *Azolla*] the mucilage looks like a large-

celled tissue, and forms from two to eight separate clumps (*Massula*), each of which encloses a number of microspores. In some species... these massulae have their surfaces covered with hair-like appendages. 1894 S. H. VINES *Students' Textbk. Bot.* I. III. 410 In *Azolla* the microspores are likewise embedded in this substance, but in more than one group or massula according to the species. 1895 — *Ibid.* II. III. 564 The pollinium may consist... of larger groups of cells, termed *massulae* (e.g. *Orchis*). 1938 G. M. SMITH *Cryptogamic Bot.* II. ix. 358 The functional macrospore lies in the large massula at the base of a sporangium. *Ibid.* 360 A microspore remains embedded within a massula during the entire course of its development into a gametophyte. 1959 WIRTH & WITHNER in C. L. Withner *Orchids* v. 157 In some genera, such as *Peristylus*, there is a variation on the normal mode of development. All the cells resulting from the divisions of an archesporial cell remain attached to each other, eventually forming a small cluster of tetrads known as a massula. 1965 BELL & COOMBE tr. *Strasburger's Textbk. Bot.* 582 *Azolla* is of interest for the arrangements which ensure fertilization. After liberation from the microsporangium the sixty-four microspores are aggregated into 5-8 roundish floating balls (*massulae*) formed of the frothy periplasmodium. Arising from the surface of each massula are a number of stalked, barbed hooks.

22. A title prefixed to the name or designation of a man. Originally used only in speaking of or to a man either of high social rank or of learning (sometimes, esp. in Scotland, applied *spec.* to a Master of Arts), but gradually extended in application. In ordinary use now only *dial.*, but in literature sometimes *arch.* or *Hist.*; otherwise superseded by MR. (pronounced 'mistə(r)').

The obscured pronunciation resulting from proclitic use doubtless began while the written form *master* was still commonly employed. Before the end of the 17th c. the abbreviation *Mr.* (originally only one among many others used for the word in all applications) had come to be restricted to the use in which the pronunciation was obscured, and to be the only permitted mode of writing the word in that use. Thenceforward *master* and *Mr.* were practically two words, distinct both in function and in form. In this Dictionary the abbreviation MR., in all its historical varieties of use, is treated in its alphabetical place.

a. Prefixed to a surname or a Christian name. Down to the 16th c. or a little later, *master* could be prefixed to the name of a knight or a bishop; at an earlier period it was freely used with the names of personages of ancient history and ancient writers. Some modern dialects have only one form for *Master* and *Mr.* as prefixed titles; others have both prefixes with a difference of function, *Mr.* being the superior title. (See E.D.D.)

The form of the Eng. word is difficult to account for. Possibly the word was first known to Englishmen in the Pr. form *masti-s*; as this coincides with the form that would have been assumed in early OF. by the subject-case of a noun **mastif*, the *a.* forms may be due to grammatical interpretation, while the *β.* and *γ.* forms may have been taken directly from Pr. The word was more or less confused with OF. *mestif* mongrel. The form MASTIN occurs only in Caxton's translations from Fr.: cf. MÂTIN.]
