Any kind of Air, or Melody, as opposed to Recitative, or other music of a purely declamatory character. Thus, Mendelssohn employs the term in order to distinguish the Mediation and Ending of a Gregorian Tone from the Dominant, or Reciting Note. Other writers sometimes use it (less correctly) in the sense of *Fioritura*, or even *Cadenza*. 1881 MRS. WODEHOUSE *ibid.* III. 618/2 These melodic melismas also allow the voice great scope in the so-called 'kehrreim' or refrain. 1938 *Oxf. Compan. Mus.* 557/1 The melisma is a feature of eighteenth-century vocal music, often used merely for display purposes but also descriptively and for emotional expression (Handel,

'Rejoice greatly' and 'Thou shalt break them' in *Messiah*; Bach in such words as 'wept' and 'scourged' in his Passions). 1957 *Times* 22 Oct. 3/1 Some of the tunes were of considerable interest, varying from oriental melismata to a modal melody like an English folksong. 1959 *Listener* 8 Jan. 80/2 The opening cantabile theme . . . continuously flows into more ornate melismata. *Ibid.* 15 Jan. 145/2 Little arabesques and melismas. 1962 A. T. SITHOLE in T. Kochman *Rappin' & Stylin' Out* 70 The black man . . . appreciates the rhythm of his speech and retains it in his songs by avoiding the melisma (many notes to one syllable of a word), as most of the Negro spirituals illustrate.

Hence melis'matic a., ornate or florid in melody; also melis'matics sb. pl., the art of florid or ornate vocalization. (*Cent. Dict.*.)

[Originally two distinct vbs.: (1) the intransitive strong vb. OE. *meltan* (*pa. t.* *mealt*, *pl.* *multon*, *pa. ppl.* *gemolten*); (2) the weak vb. In OE. the strong vb. was always intransitive; the weak vb. was normally transitive, but sometimes intransitive. In the 16th c. the strong *pa. t.* (in the form *molte*, from the analogy of the *pa. pple.*) was used *poet.* by a few writers, but was not generally current. c. The capacity of a body or substance for manifesting effects of its previous state, behaviour, or treatment; the effects themselves.

1887, etc. [see *magnetic memory* (MAGNETIC a. and sb. A. 5)]. 1935 *Proc. R. Soc. A. CXLIX.* 72 The [magnetic] field... is to be regarded as 'frozen in' and represents a permanent memory of the field which existed when the metal was last cooled below the transition temperature. 1949 *Proc. Internat. Congr. Rheology 1948* i. 5 In the usual form of the theory of viscosity it is assumed that the rate of deformation is so slow compared with the relaxation process, that only slight deviations from the equilibrium state will be found... When the relaxation-time is large and the rate of deformation high... the deviation from the equilibrium state will then show traces of a more distant past. Here we see manifested a kind of 'memory' on the part of the flowing medium. 1950 *Physical Rev.* LXXVIII. 341/2 (*heading*) Memory in simple ferromagnetic domain crystal. 1964 *J. M. BLATT Theory Superconductivity* ix. 332 Since the supercurrent acts in such a direction as to make the total flux approach more closely to an integral number of flux quanta, this initial value of m_0 remains unchanged... and preserves a 'memory' for the initial, external flux. 1971 *Nature* 5 Mar. 28/1 The palaeomagnetic memory of most igneous rocks resides in grains of magnetite and titanomagnetite which are chemically unstable. *Ibid.* 30/2 Titanomagnetite retains a memory of its original magnetization after oxidation.

d. The capacity of a body or substance for returning to a previous state when the cause of the transition from that state is removed.

1956 *Chem. Abstr.* L. 4577 The conversion of a naturally occurring twinned quartz crystal to single crystals by torsion often results in the formation of an unstable state, and the crystal reverts to its original twinned state. Natural crystals

exhibiting 'memory' usually contain large amounts of impurities. 1961 *Chem. & Industry* 12 Aug. 1261/2 [This] could have accounted for that part of the diameter increases observed when the polymer solution flowed out of a capillary, which could not be attributed to memory of the convergent flow at the entrance to the capillary. (This memory could not account for all the diameter increase because as the length of the capillary was increased, the diameter increase decreased, but did not tend to zero.) 1964 *A. S. LODGE Elastic Liquids* x. 236 'Bouncing putty'... may be said to have a 'memory' of a few seconds in the sense that if a sample is first rapidly elongated and then held at constant length for a few seconds, no recovery occurs on release; whereas, on immediate release following the initial elongation, appreciable recovery (i.e. decrease in length...) occurs.

In classical Latin the sb. occurs only in the pl. *menstrua* (= sense 1). The development (in med. Latin) of sense 2 is to be explained by the fact that in alchemy the base metal undergoing transmutation into gold was compared to the seed within the womb, undergoing development by the agency of the menstrual blood. The medical writers spoke of the human foetus as consisting of a 'spermatic' and a 'menstrual' part, derived from the two parents respectively; the alchemists employed this language in a transferred sense, the 'menstruum' with them being the solvent liquid. -ment (mənt), *suffix*, forming sbs. Originally occurring in adopted Fr. words in *-ment*, either representing Latin sbs. in *-mentum*, or formed in Fr. on the analogy of these by the addition of the suffix to verb-stems. The Latin *-mentum* was added to verb-stems, and the resulting sbs. sometimes expressed the result or product of the action of the verb, as in *fragmentum* fragment, and sometimes the means or instrument of the action, as in *alimentum* aliment, *ornāmentum* ornament. In late popular Latin, and hence in French, the suffix, while retaining its original functions, came (through sense-development in some of the older words) to be also a formative of nouns of action. In AF. the suffix was still more frequently employed than in continental OF. Of the many words in *-ment* adopted into English from French, some have concrete senses, as *garment*, *habilliment*; the majority are nouns of action, as *abridgement*, *accomplishment*, *commencement*. In most of the instances the Fr. verb has been adopted into English as well as the sb. derived from it. Hence the suffix came to be treated as an English formative. Early examples of its use as appended to native English verb-stems are *onement* (Wyclif's rendering of L. *unio*), and *hangment* (in the *Promptorium c* 1440 given as the equivalent of L. *suspendium*, *suspensio*). In the 16th c. the suffix was very freely added to English verb-stems, not only to those of Romanic etymology (as in *banishment*, *enhancement*, *excitement*), but also to those of native origin; examples of the hybrid formations of this period still surviving in use are *acknowledgement*, *amazement*, *atonement*, *betterment*, *merriment*, *wonderment*. Since the 16th c. many new derivatives in *-ment* have been formed from verbs of obvious French origin. Among verbs of native English etymology, those with the Romanic prefix *en-* (*em-*), and

those with the native prefix *be-*, seem to have given rise to derivatives of this form with especial frequency: examples are *embankment, embodiment, enlightenment, entanglement; bedazzlement, bedevilment, bedrizzlement, bereavement, beseechment, besetment, bewilderment*. Of formations in *-ment* from other native verbs there are few instances since Shakspeare's time. It is rarely that the suffix has been appended to any other part of speech than a verb, as in *dreariment, funniment, oddment*.

The letter *y* (after a consonant) ending a verb is changed into *i* when the suffix is appended, as in *accompaniment*.

2. (See quot. a 1900.) Esp. the theory that physical and physiological phenomena are ultimately only explicable in terms of a creative and interpretative mind.

a 1900 SIDGWICK in *Mind* (1901) Jan. 20 It may be held broadly that 'matter in ultimate analysis is a mode of mind or consciousness', without raising the question of a conscious self or subject... If, again, the 'Mentalist's' ontology expressly excludes the notion of self or subject... then perhaps we may designate him as an atomistic Mentalist. 1917 A. S. A. adj. Of or belonging to the Old English kingdom of Mercia or its language.

Although the political limits of Mercia were different at different periods, it may broadly be said to have occupied the middle of South Britain, between Deira on the north and Wessex on the south, and between Wales on the west and Lindsey and East Anglia on the east. The Mercian dialect of Old English belongs to the Anglian (as opposed to the Saxon) division, and is the dialect from which modern standard English mainly descends.

mercy ('mɜːsi), *sb.* Forms: 2-5 merci, 4-6 mersy, mercye, 4-7 mercie, 5 merce, 6 mersye, *Sc. marcie*, 3- mercy. [a. F. *merci*, earlier *mercit* = Pr. *merce-s*, Sp. *merced*, Pg. *mercê*, It. *mercede*:—L. *mercēdem* (nom. *mercēs*) reward, fee, in Christian Latin from the 6th c. often used in the sense of *miseriordia* (= 1 below) and in that of thanks.]

The post-classical uses of *mercēs* are developed from the specific application of the word to the reward in heaven which is earned by kindness to those who have no claim, and from whom no requital can be expected. The Eng. uses explained below represent OF. senses that for the most part have not survived in Fr., where the word has been in great part superseded by *miseriorde*. The chief uses of *merci* in

mod.Fr. are in the sense 'thanks' (cf. GRAMERCY), and in phrases corresponding to those in 5 below.

1. a. The word is often referred to the Indogermanic root **mer-* (: *mor-*, *mr-*) to die, and supposed to have originally designated the sea as 'lifeless' in contrast with the land as abounding in vegetable life; but this is very doubtful; Brugmann suggests that the *r* may belong to the suffix.

The form *mar(r)* (14th c. *marre*), occurring in senses 2 and 4, is abnormal. Cf. ON. *marr* (which, however, is known only in the sense 'sea'), and F. *mare* pond (from 12th c.)]

1. The blackbird, *Turdus merula arch.*

Perhaps never in popular use, but constantly occurring in Scottish poetry from the 15th c. Drayton adopted from some Scottish poet the traditional association of 'mavis and merle', which he frequently repeats, and which in the 19th c. often appears in English and American poetry from imitation of Scott or Burns. As used by Caxton and perh. by Philemon Holland, the word is an independent adoption from French.

A European species of falcon, *Falco æsalon* or *lithofalco*, one of the smallest, but one of the boldest, of European birds of prey; the male bird (distinguished as *jack-merlin*: see JACK *sb.*¹ 27, 38) is remarkable for the beauty of its plumage. In recent use sometimes in a wider sense, corresponding to the mod.L. *Æsalon*, as applied by some ornithologists to a subdivision of the genus *Falco* including the merlin proper and some closely allied species.

In the 17th c. some writers regarded the name as properly belonging to the female bird.

Petrogr.* 438 *Merohedrism*, a crystallographic term embracing both *hemihedrism* and *tetartohedrism*. 1895 STORY-MASKELYNE *Crystallogr.* §137 The term merohedral will be reserved for certain cases in which a defalcation is met with in the faces of a crystal out of accord with any fixed law of symmetry; though sometimes such a merohedral crystal simulates the mode of grouping of a crystal belonging to a different type of symmetry from its own. 1899 W. J. Garstang et al. *Meroë* ix. 50 Whether *w* was actually the word for 'land' in Meroitic is... uncertain. *Ibid.* 51 The destruction is more complete even than that of the Meroitic temples at Kerma and Kawa. 1934 A. TOYNBEE *Study of Hist.* II. 117 This Meroitic Power lived on, as a politically independent embodiment of the Egyptian Society, until the third century of the Christian Era. 1955 A. J. ARKELL *Hist. Sudan* vii. 160 The Meroitic hieroglyphic... script seems to have been invented on the basis partly of the Meroitic cursive script, and partly of Egyptian hieroglyphs. 1967 P. L. SHINNIE *Meroë* v. 133 There is also just a hint that Meroitic may be related to the little-known group of languages known as Koman, now spoken in a limited area up the Blue Nile and around Jebel Gule. *Ibid.* vii. 156 The numerous finds of glass vessels imported as containers for oils and unguents as well as the mirrors show that Meroitic ladies, at least of the richer classes, took considerable trouble over their appearance.

merry-andrew, **merry-Andrew** (*mæri* 'ændru:). [app. f. MERRY *a.* + Andrew proper name (cf. ANDREW 2).

Hearne's statement, in the preface to his edition of Benedictus Abbas (1735) that 'Merry Andrew' was originally applied to Dr. Andrew Borde (died 1549) has neither evidence nor intrinsic probability, though Borde had a reputation for buffoonery, as is shown by the traditional attribution to him of various collections of jests. In 1668 (29 Aug.) Pepys says that he saw at Bartholomew Fair a ridiculous play called 'Marry Andrew', but that this title has any connexion with *merry-andrew* is very doubtful.]

mesaxon (mēs'æksɒn). *Anat.* [f. MES(ENTERY) (see quot. 1955) + AXON.] In a nerve fibre, a structure composed of a pair of parallel membranes contiguous with the plasma membrane of the Schwann cell, forming in an unmyelinated fibre a channel leading from the outside of the cell to the axon it surrounds and in a myelinated fibre a spiral round the axon that constitutes the myelin sheath.

mesh (mɛʃ), *sb.* Forms: 6-7 meishe, meash, 6-8 (9 *dial.*) mash, (8 marsh), 6- mesh. [Known only from the 16th c.; cogn. w. OE. *max* (? **mæsc.*) neut., net and ON. *mōskve* (see MASK *sb.*¹); but the precise nature of the relation is undetermined.

The Teut. langs. have words with this meaning representing two ablaut-types: (1) OTeut. **mask-* (OE. *max*, ? **mæsc* ? neut.; OHG. *masca*, MHG., mod.G. *masche* fem.; M.Du. *masche* fem.; ON. *mōskve*, Norw. *moske* wk. masc.; Sw. *masha*, Da. *maske* fem. are from LG.); (2) OTeut. **māsk-* (OHG. *māscā*, MHG. ? *māsche*; MDu. *maesche*). The Eng. form *mesh* would regularly represent an OE. **māsc*, but the OE. word occurs only once in the metathetic form *max*, and in that instance means 'a net'. The 16th c. forms *meishe*, *meash*, indicate a pronunciation with long vowel, (mɛ:ʃ); for the shortening to *mesh* cf. *flesh*. On the whole, on account of the absence of the word in ME., its form-history in the 16th c., and the frequency with which fishing terms were adopted from Du., it seems not improbable that *meash* (shortened to *mesh*) and *mesh* represent adoptions respectively of the MDu. forms *maesche* and *masche*. The resemblance between the Eng. form *marsh* (18th c.) and the Flemish *maersche* (Stallaert) is prob. accidental.

The Teut. **māsk-* (: **mask-*) is cognate with the Lithuanian *mezgū* I knit, *mazga-s* knot.]

1. *a.* One of the open spaces or interstices of a net, the size of which is determined by the distance of adjacent knots from one another. Also, the similar space in any network, as a sieve.

mesology (mɛ'sɒlədʒi). [f. Gr. μέσο-ν (neut. of μέσος middle, taken as = 'medium') + -LOGY.]

1. The science of mediums (of attaining happiness). Only in Bentham.

1811-31 BENTHAM *Logic* App., Wks. 1843 VIII. 283/2 Then so it is that with that portion of the field of eudæmonics which is occupied by mesology, the whole field of ontology... is coincident.

2. The science of the relations between organisms and their environment.

1883 QUAIN *Dict. Med.* 973 *Mesology*... This term, recently introduced by Bertillon, conveniently expresses the investigation of the mutual relationship existing between living beings and their surroundings.

Hence **meso'logical** *a.*, pertaining to mesology; **me'sologist**, a student of mesology (*Funk's Stand. Dict.* 1895).

1886 *Buck's Handbk. Med. Sci.* III. 382/1 Grapes contain the mineral salts in variable quantity, the proportion depending on the variety of grape and on mesological conditions.

mesomere: see MESO-.

mesomerism (mɛ'sɒməriz(ə)m). *Chem.* [(in sense *a*) ad. F. *mésomérie* (A. Cornillot 1927, in *Ann. de Chim.* VIII. 267), f. *meso-* MESO- after *tautomérie* TAUTOMERISM.] †*a.* A kind of tautomerism (see quot.). *Obs.*

1928 *Chem. Abstr.* XXII. 2155 The term *mesomerism* is proposed to designate affinitive tautomerism and distinguish it from structural tautomerism (or desmotropism) and activation tautomerism (or tautomerism proper).

b. The property exhibited by certain molecules of having a structure which cannot adequately be represented by a single structural formula but can only be said to be intermediate between two or more graphical structures which differ in the distribution of electrons; resonance.

1934 *Nature* 23 June 947/1 Mesomerism and tautomerism are different concepts. 1951 I. L. FINAR *Org. Chem.* I. ii. 15 Heisenberg (1926), from quantum mechanics, supplied a theoretical background for mesomerism; he called it resonance, and this is the name which is widely used. 1973 B. J. HAZZARD tr. *Organicum* III. iv. 147 The capacity of a substituent for entering into mesomerism with a neighbouring double bond is defined as the mesomeric effect, and its sign is determined... by the polarization of the substituent accompanying the mesomerism.

So **meso'meric** *a.*, exhibiting or arising from mesomerism (sense *b*).

1933 C. K. INGOLD in *Jrnl. Chem. Soc.* 1124 The permanent polarisation associated with the tautomeric effect was originally distinguished by the name 'electronic strain', but this term has not proved convenient and, on account of considerations indicated later, the designation *mesomeric* effect is now substituted. 1956 E. DE B. BARNETT *Mechanism Org. Chem. Reactions* i. 5 Neither the double-bonded formula nor the dipolar formula is a true representation of the molecule, which must be regarded as a mesomeric hybrid to which both structures contribute. 1973 B. J. HAZZARD tr. *Organicum* III. iv. 146 A mesomeric system may involve not only double and triple bonds between the various bond partners but also free electron pairs conjugated with them.

mesomorph ('mɛsəʊmɔ:f, 'mi:zəʊ-). [f. MESO- + Gr. μορφ-ή form.] 1. *Anthropometry*. A person with a powerful, compact body-build in which the physical structures developed from the mesodermal layer of the embryo, i.e. the bones, muscles, and connective tissues, predominate: one of W. H. Sheldon's three constitutional types (cf. ECTOMORPH, ENDOMORPH 2).

1940 W. H. SHELDON *Varieties Human Physique* iii. 35 Bones, muscles, connective tissue... predominate overwhelmingly in the variants of type 2. We therefore call these variants mesomorphs. 1944 A. HUXLEY *Let.* 19 July (1969) 508 The football team entirely composed of big-boned, large-faced mesomorphs. 1951 AUDEN *Notes* (1952) 56 Behold the manly mesomorph Showing his splendid biceps off. 1971 J. Z. YOUNG *Introd. Study Man* xxxix. 573 In mesomorphs muscle and bone predominate, and they are adventurous, aggressive, extroverted, and dominating.

Hence **'mesomorphy**, the mesomorph body-build; the quality of being mesomorphic.

1940 W. H. SHELDON *Varieties Human Physique* i. 5 Mesomorphy means relative predominance of muscle, bone, and connective tissue. 1944 [see ENDOMORPHY]. 1962 [see ECTOMORPH]. 1969 DOWNS & BLEIBTREU *Human Variation* vii. 248 A football player, for example, would be high in mesomorphy.

|| **meson**² (mɛ'sɒn). [*a.* Sp. *mesón* an inn.] A type of inn in Mexico (see quot. 1861).

SANTLEBEN *Texas Pioneer* 164 Meson means an inn or hostelry. 1955 *Amer. Speech* XXX. 258 Meson, an inn.

meson³ ('mi:zɒn, 'mɛzɒn). *Nuclear Physics.* [Alteration of the earlier name MESOTRON: see -ON¹.] *a.* Any of a group of unstable subatomic particles (first found in cosmic rays) that are intermediate in mass between an electron and a proton; the name is now commonly restricted to particles that are strongly interacting and have zero or integral spin (cf. MUON), certain of which occur in atomic nuclei as transmitters of the binding force between the nucleons.

1939 H. J. BHABHA in *Nature* 18 Feb. 276/z The name 'mesotron' has been suggested by Anderson and Neddermeyer... for the new particle found in cosmic radiation with a mass intermediate between that of the electron and proton. It is felt that the 'tr' in this word is redundant, since it does not belong to the Greek root 'meso' for middle; the 'tr' in neutron and electron belong, of course, to the roots 'neutr' and 'electra'... It would therefore be more logical and also shorter to call the new particle a meson instead of a mesotron. 1942 POLLARD & DAVIDSON *Appl. Nucl. Physics* ii. 13 The positive and negative mesotrons or mesons should be mentioned here. 1947 *Sci. News* IV. 125 Mesons are the most penetrating component of cosmic rays. 1948 *Times* 10 Mar. 4/7 Other scientists spoke of mesons as the 'cosmic cement' which is believed to hold together the nucleus of the atom. 1963 S. TOLANSKY *Introd. Atomic Physics* (ed. 5) xxiii. 391 They [sc. muons] were once called mu-mesons but it was recognised that they were not in fact mesons since they had different spins. They are fermions, not bosons, and now the name meson is reserved for bosons only. 1971 *Sci. Amer.* Oct. 42/3 Such high-energy cosmic ray collisions produce a shower of secondary particles,

principally kaons (*K* mesons) and pions (*pi* mesons), which in turn decay spontaneously into muons. *Ibid.*, The detector, a 2,000-ton array of concrete water tanks, light-collecting tubes and gas-filled cylinders, was designed to record the arrival of muons, or mu mesons.

b. **Special Comb.**: **meson factory colloq.**, an establishment having a high-energy accelerator for producing an intense beam of mesons and the equipment for making experimental use of such a beam.

1966 *Physics Today* Dec. 21/1 Meson factories, which will produce beams of nucleons and mesons thousands of times more intense than those presently available, can be expected to take us to our next level of understanding of nuclear structure... By meson factory I mean a complete nuclear-structure installation based on an accelerator of 500-1000 MeV, which is capable of providing at least 100 microamperes of high quality external beam. All ancillary facilities for performing high precision experiments with the primary and secondary beams are included: targeting, beam transport, data-handling equipment and beam dumps for the residual beams. 1972 *Physics Bull.* Mar. 148/3 With the completion of high intensity proton accelerators, meson factories, around the world... it will soon be possible to produce muonic atoms and molecules copiously.

mesonic (mi:-, mɛ'zɒnik), *a.* *Nuclear Physics.* [f. MESON³ + -IC.] = MESIC *a.* 2

1939 *Nature* 8 July 78/1 The most important problem is the construction of a classical model of the heavy mass by means of a mesonic field in the same manner as the electronic mass is built up from an electromagnetic field. 1953 *Physical Rev.* XCII. 801/2 The use of the μ^- meson as a nuclear probe is possible because the mesonic orbits are much closer to the nucleus than the corresponding electron orbits. 1954 *Ibid.* XCVI. 1145 The effects of vacuum polarization on the energy levels of π and μ mesonic atoms are computed. 1959 *Chambers's Encycl.* XIII. 241/2 The measurement of mesonic mass is very difficult. 1968 M. mesonomic (mɛsəʊ'nɒmɪk, 'mi:zəʊ-), *a.* *Law.* [f. MESO- + Gr. νόμο-ος law + -IC.] In the terminology of A. Kocourek: 'a jural relation which does not directly affect the natural physical freedom of a human being with the support of the law but yet has legal consequences in its evolution'. Opp. ZYGNOMIC *a.*

1927 A. KOCOUREK *Jural Relations* v. 69 Compared with zygomic relations, mesonomic relations are inferior in legal potency. A zygomic relation directly constrains the servus of the relation with the support of the law, but a mesonomic relation either does not constrain the servus directly or lacks the support of the law. 1930 — *Introd. Sci. of Law* iv. 294 Put broadly, the function of mesonomic relations is to initiate or destroy zygomic relations. *Ibid.*, Mesonomic relations have many different forms and functions... The power to commit a tort is mesonomic. The duty to pay damages for the tort is zygomic. The power to pay damages for the tort is zygomic. The power to violate a contract is mesonomic. The duty to pay damages is zygomic... A duty owed by a subject to the sovereign not to commit a crime is mesonomic. The power of a prosecutor to prosecute a criminal offender is zygomic. 1964 J. STONE *Legal Syst. & Lawyers' Reasonings* iv. 148 Kocourek's mesonomic-zygomic distinction is no doubt a valuable one, even if we shrink back at the neologisms. *Ibid.* 149 For citizens' counsellors, as well as for citizens... it is predominantly in the range of alternative courses left open by privileges and powers, the mesonomic relations, that attention and concern mainly moves.

2. As the type of a word which is long, pleasant-sounding, and incomprehensible; used *allusively* for something which gives irrational or inexplicable comfort or satisfaction to the hearer (see quots.).

1827 SCOTT *Chron. Canongate* 1st Ser. I. v. 109 She resembled exactly in her criticism the devotee who pitched on the 'sweet word Mesopotamia', as the most edifying note which she could bring away from a sermon. 1870 *Brewer's Dict. Phr. & Fable* 572/1 The true 'Mesopotamia' ring. . . i.e., something high-sounding and pleasing, but wholly past comprehension. The allusion is to the story of an old woman who told her pastor that she 'found great support in that comfortable word Mesopotamia'. 1886 'M. GRAY' *Silence of Dean Maitland* III. III. iv. 94 It was said of the Bishop of Belminster that he could pronounce the mystic word 'Mesopotamia' in such a manner as to affect his auditors to tears; but of the dean it might be averred that his pronunciation of 'Mesopotamia' caused the listeners' hearts to vibrate with every sorrow and every joy they had ever known, all in the brief space of time occupied by the utterance of that affecting word. 1906 F. M. PARSONS *Garrick & his Circle* 245 Whitefield possessed the inborn gift of preaching to the nerves, and there is an edifying, though probably fallacious, report of Garrick's having remarked that he could pronounce 'Mesopotamia' in such a way as to move any audience to tears. 1908 G. B. SHAW *Platform & Pulpit* (1962) 47 There are people who will swallow as inspired revelation any sort of stuff that, so to speak, has the word Mesopotamia in it. 1924 L. PARKS *What is Modernism?* p. xviii. The reaction to words is a curious psychological—I suspect pathological—phenomenon. The oft-told tale of the good woman who found 'Mesopotamia' a soothing word is one example.

mesosiderite (mēsəu'sɪdəraɪt, -saɪ'dɔraɪt, mɪ:zəu-). *Geol.* [ad. G. *mesosiderit* (G. Rose 1865, in *Amtlicher Bericht* 39. *Versammlung deutscher Naturforscher und Ärzte, Giessen 1864* II); see MESO- and SIDERITE¹.] Any of the stony-iron meteorites in which the silicates are principally present as pyroxene and plagioclase.

1868 *Geol. Mag.* V. 76 Meteorites have long since been arranged under two great divisions, the irons and the stones. . . In examining a certain number of these masses it has been

thought convenient by some to establish a third, or intermediate division, to which the names of *Mesosiderites*, *Lithosiderites*, or of *Siderolites*, have been given. *Ibid.* 78 For these meteorites M. Rose has proposed a special name, that of *mesosiderites*. 1918 G. T. PRIOR in *Mineral. Mag.* XVIII. 151 In the Rose-Tschermak-Brezina classification of meteorites the intermediate class of stony-irons, in which iron and stony matter occur in approximately equal amounts and to which Maskelyne gave the name siderolites, is divided into (1) siderolites proper... and (2) lithosiderites, comprising the groups of the mesosiderites, grahamites, and lodranites. Mesosiderites are defined as consisting of iron and crystalline olivine and bronzite... As seen in the following pages, chemical and microscopic examination of typical members of these two groups fails to reveal any real distinction between them based on the amount of feldspar they contain. For the combined group, all the members of which contain abundant feldspar, it is proposed to retain the earlier name of mesosiderite. 1962 B. MASON *Meteorites* viii. 120 The stony-irons are a minor group of meteorites... They are divided into two major groups according to the nature of the silicate minerals, the pallasites (olivine stony-irons) and mesosiderites (pyroxene-plagioclase stony-irons).

mesosome (mēsō'sōumə). Also mesosoma. [f. mod.L. *mesosoma*, f. Gr. μέσο- middle + σῶμα body.] 1. *Zool.* a. In lamellibranchiate molluscs, the middle region of the body which gives rise to the foot. b. In Arachnids, the middle portion of the animal, between 'head' and 'tail'. c. The central part of the body of certain other invertebrates.

1877 HUXLEY *Anat. Inv. Anim.* viii. 475 From the sides of the mesosoma... the branchiae project into the pallial cavity. 1932 BORRADAILE & POTTS *Invertebrata* xv. 450 The lung books are found on segments 3-6 of the mesosoma. 1962 D. NICHOLS *Echinoderms* xiv. 174 The lophophore itself is borne by the mesosome, and there is a strong partition between this division of the body and the metasome.

2. *Bacteriology.* A cytoplasmic structure in many bacteria which is principally composed of membranes, probably being formed by invagination of the cell membrane, and may be a site of active respiratory activity and the place of attachment of the bacterial genome.

1960 P. C. FITZ-JAMES in *Jrnl. Biophysical & Biochem. Cytol.* VIII. 508/2 This [sc. 'dense body'] is probably an unsuitable name. Certainly they are not always electron dense... Since they appear to be attached to the surface membranes of the cell, one should adopt the suggestion of Robertson... for such membrane-attached cytoplasmic structures and use the term 'mesosomes'. Henceforth in this paper this term will be used. 1968 H. HARRIS *Nucleus & Cytoplasm* vi. 123 The loss of the ability to form the cell wall appears to be associated with the disappearance from the cytoplasm of the cell of specific membranous structures, known as 'mesosomes', which appear to be essential for the formation of the wall. 1974 *Nature* 1 Feb. 303/1 These properties together with the possession of fimbriae and the absence of mesosomes are commonly shared by Gram-negative, but generally absent in Gram-positive bacteria.

Hence mesosomatic *a.*, pertaining to the mesosoma.

1893 SHIPLEY *Zool. Invertebr.* xx. 391 The seventh appendage, or the first mesosomatic, consists of a semi-circular plate-like structure hinged on to the body.

mesothelioma (mēsōθi:l'əumə). *Path.* Pl. -omas, -omata. [f. next + -OMA.] A tumour of mesothelium; formerly, † a tumour composed of cells derived from the embryonic mesothelium.

1909 J. G. ADAMI *Princ. Path.* I. 647 Of mesothelial origin: Tumors (mesotheliomas) whose characteristic constituents are cells derived in direct descent from the persistent mesothelium of the embryo. (a) Typical.—Adenoma of kidney, testicle, 'mesothelioma' of pleurae, peritoneum, etc. *Ibid.* 746 If a convenient term is required for all this order of tumors, the transitional adenocarcinomas of adrenal, kidney, ovary, and testis, we have, from embryogenetic considerations, suggested the term mesothelioma. 1921 *Lancet* 23 July 173/2 The true nature of these tumours has been the subject of much controversy as is seen by the variety of names given to them—e.g. endothelial cancer, mesothelioma, and so on. 1966 WRIGHT & SYMMERS *Systemic Path.* I. i. 6/1 Primary tumours of the pericardium... are very rare: most of those that have been described appear to have arisen from mesothelial cells, and may in consequence be termed 'mesotheliomas'. 1971 *Brit. Med. Bull.* XXVII. 71/2 Wagner... discovered the first of a large group of pleural and peritoneal tumours—mesotheliomata—apparently related to exposure to crocidolite. 1973 *Nature* 8 June 352/2 Mesotheliomas of the pleura and peritoneum have been linked with the inhalation of asbestos fibres.

mesothelium (mēsō-, mizəu'θi:ləm). *Embryol. and Histology.* Pl. -thelia. [f. MESO- + EPI]THELIUM.] In a vertebrate embryo, epithelium that forms the surface layer of the mesoderm and lines the body-cavity; in a post-natal organism, the tissue derived from this that forms the lining of the pleurae, peritoneum, and pericardium (by some writers, esp. pathologists, not regarded as epithelium).

1886 C. S. MINOT in *Buck's Handbk. Med. Sci.* III. 176/1 The whole of the mesoderm... does not go through this metamorphosis, but... a part remains closely compacted; but ultimately it is only the single layer of cells immediately bounding the coelom, and the cells constituting the myotomes... which remain thus close together. These cells, therefore, have all the characteristics of an epithelium, so that the coelom is limited by an epithelium of cuboidal cells, for which I have proposed the name *mesothelium*. *Ibid.* 176/2 Derivatives of the mesothelium (epithelial mesoderm). 1945 W. J. HAMILTON et al. *Human Embryol.* vi. 80 The mesoderm bounding the coelom [of the embryo] will persist throughout life as an epithelium (so-called mesothelium) which forms the visceral and parietal linings of the peritoneal, pleural and pericardial cavities. Parts of the peritoneal mesothelium become specialized to form the germinal epithelium, the paramesonephric ducts... and the cortex of the suprarenal gland. 1950 A. W. HAM *Histol.* xi. 140/1 Endothelium and mesothelium, structurally, are both typically epithelial... Nevertheless, pathologists usually prefer to consider endothelium and mesothelium as apart from ordinary epithelium because endothelial and mesothelial cells behave differently from ordinary epithelial cells. 1960 F. D. ALLAN *Essent. Human Embryol.* xvii. 165 The cells of the cortical primordium are derived from the coelomic mesothelium. 1968 PASSMORE & ROBSON *Compan. Med. Stud.* I. xvii. 3/2 Endothelium and mesothelia arise only from mesoderm.

Hence meso'thelial *a.*

1892 C. S. MINOT *Human Embryol.* (1897) vii. 159 Although the pancreas, ovary, and spinal cord all contain connective tissue, we do not call them mesenchymal, but respectively entodermal, mesothelial, and ectodermal. 1946 B. M. PATTEN *Human Embryol.* xv. 469 In the case of a part of the gut tract which lies within the body cavity, the corresponding connective-tissue layer will be supplemented by an epithelial layer derived from the mesoderm which lines the coelomic cavities... This mesothelial layer provides a smooth, moist surface which permits the viscera within the body cavity to change shape and position with a minimum amount of friction. 1950 [see above]. 1968 PASSMORE & ROBSON *Compan. Med. Stud.* I. xvi. 5/2 (*heading*) Mesothelial or serosal sac membranes.

FISHER tr. *Schimper's Plant-Geogr.* 236 The most important family of the north temperate zone among the *Polycarpicæ*, that of the Ranunculaceæ, is mesothermic and microthermic. 1960 N. POLUNIN *Introd. Messiah (mɪ'saɪə). Forms: *a.* 4 Messie, 4-5 Messye, 5 Messy, Messe, Myssye; *β.* 3 Messyas, 4-8 Messias; *γ.* 7 Messiah. [The *a* forms are *a. F. Messie*, *ad. L. (Vulg.) Messias*, *a. Gr. Μεσσίας*, *ad. Aramaic m'shīhā*, *Heb. māshīhā* anointed (in the LXX rendered *Χριστός*, CHRIST), *f. māshah* to anoint. These forms do not occur in any Eng. transl. of the Bible, though common in other literature down to the 15th c. The form *Messias* was used in John i. 41 and iv. 25 (the only passages in which the word is found in the Gr. or Latin N.T.) by Wyclif after the Vulgate, and by later translators from 1526 to 1611 directly after the Greek. The form *Messiah*, invented by the translators of the Geneva Bible of 1560, is an alteration of the traditional *Messias*, intended to give it a more Hebraic aspect (the translators having on principle eliminated the Græcized forms of proper names from the O.T., though retaining them in the N.T.). In the Bible of 1611 it was adopted in Dan. ix. 25, 26, and although it occurs in no other passage of the 'Authorized Version', it eventually became the only current form. The Revisers of 1880-84 have substituted it for *Messias* in the two N.T. passages, but on the other hand have removed it from its original place in Dan. ix, where they read 'the anointed'.] The Hebrew title (= 'anointed') applied in the O.T. prophetic writings to a promised deliverer of the Jewish nation, and hence applied to Jesus of Nazareth as the fulfilment of that promise. (Chiefly preceded by *the* or defining word, exc. in the three Bible passages and sometimes in poetry, where it is treated as a proper name.) Hence *transf.*, an expected liberator or saviour of an oppressed people or country. (Written with capital M.)

meta- ('mætə), *prefix*, before a vowel normally *met-* (also before *h*, the resulting *meth-* being pronounced (mɛθ)), repr. Gr. *μετα-*, *μετ-* (μɛθ-), which occurs separately as the prep. *μετά* with, after; etymologically corresponding to MID *prep.* In Gr. the prefix is joined chiefly to verbs and verbal derivatives; the principal notions which it expresses are: sharing, action in common; pursuit or quest; and, especially, change (of place, order, condition, or nature), corresponding to L. *trans-*. In some few formations *μετα-* represents the prep. *μετά* in syntactical combination, with the sense after or behind, as in *μετάφρενον* METAPHRENON.

The words derived from Gr. words containing the prefix, or from assumed Greek types normally constructed, are given in their alphabetical place. The words enumerated in this article are modern formations, in which the prefix is employed in ways not strictly in accordance with Greek analogies. The prefix is often hyphenated, and the *a* remains unaltered before a vowel or *h*.

1. *a.* The supposed analogy of METAPHYSICS (misapprehended as meaning 'the science of that which transcends the physical') has been followed in the practice of prefixing *meta-* to the name of a science, to form a designation for a higher science (actual or hypothetical) of the same nature but dealing with ulterior and more fundamental problems. **meta'chemistry** ? *nonce-wd.*, the chemistry of the supersensible. **meta-'ethics**, a name applied to the study of the foundations of ethics, esp. of the nature of ethical statements; hence **meta-'ethical a.** **meta-'history**, inquiry into the principles governing historical events; so **meta-historic(al) adjs.**, transcending history, controlling the course of history. **metaphi'losophy**, inquiry into the problems ulterior to philosophy or philosophical theories; so **metaphilo'sophical a.** **metaphysi'ology**, a name invented by G. H. Lewes for a doctrine of life and vital phenomena which should base itself on principles outside of and higher

than those of physiology and the material organism; hence **metaphysi'ological a.**, **metaphysi'ologist.** **metasoci'ology** (see quot. 1970); so **metasocio'logical**, **meta-sociolo'gistic adjs.** **meta-the'ology**, (*a*) *nonce-wd.*, a profounder theology than that recognized by divines; (*b*) the philosophical study of the nature of religious language or statements; hence **meta-theo'logian**, **meta-theo'logical a.** Similarly in **meta-'element**, **meta'gnostic a.**, [cf. Gnostic a.], **metaorganism** (see quot.); **metaphe'nomenal a.**, existing behind phenomena. See also METAGEOMETRY, METEMPIRIC.

5. *Geol. a.* In imitation of METAMORPHISM, the prefix has been used irregularly to form words referring to certain specific varieties of metamorphic processes, as *meta'chemic a.*, *meta'pepsis* (hence *meta'peptic a.*), *meta'taxis* (hence *meta'taxic a.*), *me'tatropy*: see quotes.

Other kinds are *dioryte* and *metadioryte, syenyte* and *metosyenyte, felsyte* and *metafelsyte*, etc. 1920 A. HOLMES *Nomencl. 6. In *Chemistry. a.* *Meta-* is used to designate compounds derived from, metameric with, or resembling in composition those to the names of which it is prefixed, as *metachloral*, METALDEHYDE, etc. More systematically, it is used to distinguish one class of acids and their corresponding salts from another class (the ORTHO-acids) consisting of the same elements in different proportions, the *meta-* acids containing one, two, or three molecules of water less than the *ortho-* acids; the salts of these acids have names formed by replacing *-ic* by *-ate*. (A few of these compounds will be found in their alphabetical place; the most important of those remaining are placed below.)

The use of the prefix in chemistry was first introduced by Graham in 1833 (*Phil. Trans.* 253); see METAPHOSPHATE, METAPHOSPHORIC. The more definite use (correlated with *ortho-*) was introduced by Odling in 1859.

metabiology. Also meta-biology. [f. META- 1 + BIOLOGY.] A hypothetical or postulated science dealing with phenomena of living organisms beyond the scope of conventional biology, or treating them in a more fundamental way. Chiefly in non-scientific use, freq. with allusion to Shaw.

1921 G. B. SHAW *Back to Methuselah* Pref. p. lxxxv, As the conception of Creative Evolution developed I saw that we were at last within reach of a faith which complied with the first condition of all the religions that have ever taken hold of humanity; namely, that it must be, first and fundamentally, a science of metabiology. 1936 *Scrutiny* Mar. 377 And Keats's genius... is not really illuminated by the procedure of *Keats and Shakespeare* or, except as another of Metabiology's cloudy trophies, exalted. 1945 K. 1887 *Science* 18 Mar. 264/1 We doubt the value to a man of a mass of indefinite ill-digested text-book information. Occasionally an omnivore can take in everything, and digest and so metabolize it as to organize it into healthy mental tissue. **1900** *Lancet* 28 July 248/1 The removal of the incompletely metabolised end products. **1905** *Brit. Amer.* Dec. 36/3 The anoxybiotic species does not stop metabolizing as soon as it encounters anaerobic conditions; it continues to metabolize for as long as six days, even though the new metabolic end product is unusual and potentially harmful.

† **metabolon** (mɛ'tæbəlɒn). *Physics. Obs.* [ad. Gr. μεταβόλον, neut. of μεταβόλος changeable, f. μεταβάλλω to change.] A radioactive atom produced in the process of radioactive disintegration.

1903 RUTHERFORD & SODDY in *Phil Mag.* V. 586 At each stage [of disintegration] one or more a 'rays' are projected, until the last stages are reached, when the β 'ray' or electron is expelled. It seems advisable to possess a special name for these now numerous atom-fragments, or new atoms, which result from the original atom after the ray has been expelled, and which remain in existence only a limited time... We would suggest the term *metabolon* for this purpose. **1904** E. J. HALL *Textile Sci.* iv. 184 The third (metachrome) method enables both dye and bichromate to be applied at the same time and it depends on the fact that no appreciable combination occurs between the

bichromate and the wool or the dye under alkaline conditions, but this holds only for a limited number of dyes. 1971 R. L. M. ALLEN *Colour Chem.* iv. 45 In 1900 the Berlin Aniline Company devised the metachrome method whereby selected dyes can be applied simultaneously with a chroming agent.

metachromism (mɛtə'krəʊmɪz(ə)m). [Formed as prec. + -ISM.] Colour-change.

Normally the word should mean 'transposition of dates' (cf. quot. 1656 below); but it has been associated with Gr. μετάχρονος, μεταχρόνιος happening later, f. μετά after + χρόνος time; hence the sense explained below, which seems to be that of all the available instances.]

1. An error in chronology consisting in placing an event later than its real date. (Cf. PARACHRONISM.)

2. *Biol.* The co-ordination of the movement of parts, esp. cilia, into a progressive wave.

1905 *Jrnl. Exper. Zool.* II. 408 It is the principal object of this paper to discuss the cause of metachronism in ciliary action. 1928 J. GRAY *Ciliary Movement* vii. 117 Any particular cilium is slightly in advance of the cilium behind it in the series and slightly behind the one just in front of it. This regular sequence is known as metachronism. 1972 M. S. GARDINER *Biol. Invertebr.* iv. xi. 189/1 In Metazoa, the cilia on adjacent cells may exhibit a similar coordination in metachronism.

So **meta'chronal a.**, exhibiting or characteristic of metachronism (sense 2); **meta'chronally adv.**

1905 *Jrnl. Exper. Zool.* II. 407 The cause of metachronal action is.. to be sought.. in the mechanical effect of one cilium on another. *Ibid.*, These swimming plates are arranged in rows and the members of each row, like ordinary cilia, beat metachronally, not synchronally. 1928 J. GRAY *Ciliary Movement* vii. 118 Although the direction of the metachronal wave.. differs in different tissues, it is remarkably constant in each particular case. 1940 G. S. CARTER *Gen. Zool. Invertebr.* viii. 359 Metachronal rhythm is not confined to metazoan cilia; it can be well seen in such ciliate protists as *Opalina*. 1962 D. NICHOLS *Echinoderms* viii. 99 In at least one urchin, *Diadema*, the spines show metachronal rhythm during locomotion, and they move the animal across the ocean floor with considerable speed. 1971 *Nature* 12 Feb. 491/1 The cilia of these last two cell types beat metachronally.

2. A manifestation of consciousness or mental phenomena.

1890 *C. L. MORGAN Animal Life* xii. 467 We call manifestations of energy 'kinetic' manifestations, and we use the term 'kinesis' for physical manifestations of this order. Similarly, we may call concomitant manifestations of the mental or conscious order 'metakinetic', and may use the term 'metakinesis' for all manifestations belonging to this phenomenal order. *Ibid.* 488 When, in man, the metakineses associated with these neural kineses assume the form of hypotheses, theories, interpretations of nature, moral ideals, and religious conceptions, these are .. no longer subject to the law of natural selection. 1892 *K. PEARSON Gram. Sci.* ix. 401 This metakinesis does not appear to be more than a metaphysical name for non-conscious life, for there is no sense-impression that we have of such life that we can describe as metakinetic. 1903 *L. F. 1. *a.* Any member of the class of substances represented by gold, silver, copper, iron, lead, and tin. Originally this class was regarded as including only these bodies together with certain alloys (as brass and bronze), and hence as definable by their common properties, viz. high specific gravity and density, fusibility, malleability, opacity, and a peculiar lustre (known specifically as 'metallic'). In process of time other substances were discovered to have most but not all of these properties; the class was thus gradually extended, the properties viewed

as essential to its definition becoming fewer. From the point of view of modern Chemistry, the 'metals' are a division (including by far the greater number) of the 'elements' or simple substances. Among them are all the original (simple) 'metals'; of the later additions to the list some possess all the properties formerly viewed as characteristic of a metal, while others possess hardly any of them; the 'metallic lustre' is perhaps the most constant. By some chemists the radical ammonium (NH₄) and derivatives thereof have been designated as 'metals', on account of the analogy of their compounds with those of the metals potassium and sodium.

In popular language the term is not applied to a metallic element when in such a state of combination that its identity is disguised. (Cf. METALLIC a. 2.)

metalinguage (metə'læŋgwɪdʒ, 'mɛtə-). [See META- 1, 1 b.] A language which supplies terms for the analysis of an 'object' language; a system of propositions about other propositions.

[1935 A. TARSKI in *Studia Philosophica* I. 282 Die Namen der Ausdrücke der ersten Sprache und der zwischen ihnen bestehenden Relationen gehören schon zu der zweiten Sprache, der sog. Metasprache (welche übrigens die Grundsprache als Fragment enthalten kann).] 1936 *Mind* XLV. 486 The concepts *analytic* and *contradictory* in the language L, for instance, cannot be defined in L, as Carnap has shown. In order to escape from these restrictions one must build up a new language (a so-called *meta-language*) disposing of more means of expressing thoughts than the former. 1947 H. REICHENBACH *Elem. Symbolic Logic* i. 9 We say that signs of signs constitute a language of a higher level, which we call *metalinguage*. 1948 L. HJELMSLEV in *Studia Linguistica* I. 75 This would mean, in logistic terms, that linguistics is a metalinguage of the first degree, whereas phonetics and semantics are metalinguages of the second degree. 1954 A. J. AYER *Philos. Ess.* 12 Particulars, considered as occasions, would be referred to only at the level of the meta-language; when it was a question not of using the language, but of talking about its use. 1959 *Listener* 1 Oct. 520/1 We can then avoid the clumsy term 'meta-language'—the name for the language in which we talk about the terms of any formalized language. 1960 E. DELAVENAY *Introd. Machine Transl.* vii. 110 Between metalinguage and pure poetry, from the clear and distinct expression of a scientific representation to the synthetic expression of the vibrations of the poet's ego at the centre of his individual universe, there exists a whole vast range of untranslatable. 1962 *Times Lit. Suppl.* 13 Apr. 252/5 Machine translation research may be of value... in that, because one of its basic techniques is the establishment of a meta-language or intermediate language of ideas, it is in principle capable of constructing automatically an abstract. 1964 C. CHERRY in *Endeavour* Jan. 13/2 A meta-language is a formal language-system for describing language or a linguistic source. Strictly, a book of grammar is written in a meta-language—it defines a syntax but is itself not literature. 1973 *Computers & Humanities* VII. 223 Each segment is analyzed as to content and translated into a 'meta-language', which allows unambiguous comparisons among the variant readings.

Hence 'meta-'metalinguage, a language used in the description of another language which is itself a meta-language; the universal linguistic or symbolic system from which a particular metalinguage derives.

1954 I. M. COPPI *Symbolic Logic* App. B. 341 The first of these is the meta-metalinguage's synonym for the name relation in the metalinguage. 1957 N. CHOMSKY *Syntactic Struct.* vi. 54 Linguistic theory will thus be formulated in a metalinguage to the language in which grammars are written—a metametalinguage to any language for which a grammar is constructed. 1963 H. B. CURRY *Found. Math. Logic* ii. 31 In that case we use a third language, L₃, customarily called the metametalinguage. 1967 *Encycl. Philos.* VII. 352/2 A proof of adequacy... requires an inductive argument of the meta-metalinguage.

metalation (metə'leɪʃən). *Chem.* [f. METAL sb. + -ATION.] The introduction into an organic compound of an atom of a metal in place of one of hydrogen (usu. one attached to an aromatic ring).

1934 GILMAN & YOUNG in *Jrnl. Amer. Chem. Soc.* LVI. 1415/1 The term metalation is proposed for reactions involving replacement of hydrogen by a metal to give a true organometallic compound. *Ibid.*, Metalations were effected by metals, organometallic compounds and salts. 1937 F. C. WHITMORE *Org. Chem.* 724 The aniline sulfate solution contains the strongly positive group -NH₃ and consequently gives m-substitution. The 'metalation' of benzene apparently offers an exception to this generalization. 1957 E. G. ROCHOW et al. *Chem. metamathematical (mɛtə'mæθɪ'mætɪkəl), *a.* [f. as next, after *mathematics*, *mathematical*.]

a. Beyond the scope of *mathematics*. *rare.*

1833 SIR W. R. HAMILTON in R. P. GRAVES *Life* II. 68 In the application of the *mathematics* themselves there must (if I may venture on the word) be something *metamathematical*.

b. Of or pertaining to *metamathematics*.

1926 F. P. RAMSEY in *Mathematical Gaz.* XIII. 188 It is contended that the principles used in the *metamathematical* proof that the axioms of *mathematics* do not lead to contradiction, are so obviously true that not even the sceptics can doubt them. 1933 M. BLACK *Nature of Math.* 150 It is extremely probable that a *metamathematical* proof of the consistency of the whole of pure *mathematics* is impossible. 1952 S. C. KLEENE *Introd. Metamath.* vi. 140 In either case, the rules of inference must have the character of schemata, i.e. they must employ *metamathematical* variables, since infinitely many applications have to be provided for. 1971 *Nature* 8 Jan. 104/2 Hilbert's programme for demonstrating the consistency of arithmetic by *metamathematical* methods resulted in a new outburst of activity which culminated... with Gödel's incompleteness theorem.

Hence **metamathematically adv.**, by means of, or from the point of view of, *metamathematics*.

1937 *Philos. of Sci.* IV. 329 Gödel has proved *metamathematically* that there are surely theorems and problems about the natural numbers which cannot be proved or solved by elementary means. 1956 J. H. WOODGER tr. *Tarski's Logic, Semantics, Metamath.* 116 Let us now consider the situation *metamathematically*. 1967 S. C. KLEENE *Math. Logic* §39. 214 Ackermann in 1924-5 thought he had proved *metamathematically* the consistency of N.

metamathematician (mɛtə'mæθɪ'mætɪʃən). [f. next, after *mathematics*, *mathematician*.] An expert in *metamathematics*.

1935 *Mind* XLIV. 394 The *metamathematician* may use *mathematical* induction for the recursive definition of simple functions. 1952 S. C. KLEENE *Introd. Metamath.* iii. 64 The interpretation motivates the *metamathematician* in his choice of the particular formal system which he introduces by his definitions.

metamathematics (mɛtə'mæθɪ'mætɪks), *sb. pl.* (*const. as sing.*). [f. META- + MATHEMATICS *sb. pl.*, after G. *metamathematik* (D. Hilbert 1923, in *Math. Ann.* LXXXVIII. 153).] The field of study concerned with the structure and formal properties of *mathematics* and similar formal systems.

1890 in *Cent. Dict.* 1926 *Encycl. Brit.* II. 831/1 The science on which Hilbert is now (1926) engaged, which takes for its subject matter the meaningless formulae of *mathematics*, he calls *metamathematics*, and believes it to be capable of establishing many important results relating to the multiplicative axiom or axiom of selections, and to the continuum problem. 1940 *Mind* XLIX. 242 The investigation of *calculus*, in this light, independently of all regard for the 'meaning' of the component complex marks, was christened *metamathematics*. 1952 S. C. KLEENE *Introd. Metamath.* iii. 63 The formal systems which are studied in *metamathematics* are (usually) so chosen that they serve as models for parts of informal *mathematics* and logic with which we are already more or less familiar, and from which they arose by formalization. 1956 E. H. HUTTEN *Lang. Mod. Physics* ii. 35 That we require a *metamathematics* in order to prove the consistency and completeness of *mathematics*... does not mean that we are confronted with the final break-down of logic and *mathematics*. 1963 G. T. KNEEBONE *Math. Logic* 381

Metamathematics began as a study of particular formal systems, and it was initially concerned with questions of consistency and completeness of given sets of axioms. But it now embraces investigations of altogether wider scope, designed to yield fundamental information about entire classes of formal systems of some particular kind. 1966 J. J. KATZ *Philos. of Lang.* iii. 27 *Metamathematics*, as the general theory of the formal structure of the language of *mathematics*, was closely parallel to Carnap's idea of logical syntax, as the general theory of the formal structure of scientific and factual discourse. No wonder, then, that *metamathematics* appealed to Carnap as a model for his theory of logical syntax.

metamerism (mɛ'tæmɜ:(r)ɪz(ə)m). [Formed as METAMERIC: see -ISM.]

1. *Chem.* The condition of those isomeric compounds, which, although they have the same composition and molecular weight, have different chemical properties.

1848 WATTS tr. *Gmelin's Handbk. Chem.* I. 110 *Metamerism*. 1927 *Phil. Hence **metamicti'zation**, the process of becoming, or state of being, metamict; **'metamictness**, metamict character.

1952 *Amer. metanoia (metə'nɔɪə). [Gr. μετάνοια, f. μετανοεῖν to change one's mind, to repent.] Penitence, repentance; reorientation of one's way of life, spiritual conversion.

1873 M. ARNOLD *Lit. & Dogma* vii. 196 Of 'metanoia', as Jesus used the word, the lamenting one's sins was a small part; the main part was something more active and fruitful, the setting up an immense new inward movement for obtaining the rule of life. And 'metanoia', accordingly, is: a change of the inner man. 1881 *Amer. Church Rev.* July 167 What a Metanoia was there, to both Jesus and John! . . . And what a Metanoia had come also upon the disciples of John and upon Israel! 1918 *Encycl. Relig. & Ethics* X. 733/2 'Repentance' has an emotional tone; μετάνοια is ethical and intellectual; the former is negative—a turning away from sin; the latter is positive—an enthusiasm for righteousness. 1939 V. A. DEMANT *Relig. Prospect* ix. 237 If we understand St. Paul's use of the word 'spiritual', not in our misleading sense of 'non-material' but as the nature of a creature turned to God, we see how this *metanoia*, this turning about, brings a restored understanding of the order of human powers and faculties. 1945 A. HUXLEY *Let.* 10 Apr. (1969) 520 Virgil's *metanoia* was in the nature of a death-bed repentance. 1969 F. DE GRAEVE in J. Kerckhofs *Mod. Mission Dialogue* p. xvi. It must reveal the Church . . . as the community in which the religious intentionality of all people can blossom into that newness of life that is the real metanoia. 1973 E. POWELL *No Easy Answers* xii. 123 To entertain this idea and to be penetrated with it is the change of mind, repentance, *metanoia*, of which the baptist was not the announcer but the forerunner.

5. Adopted by Johnson as the designation of certain 17th cent. poets (chief of whom were

Donne and Cowley) addicted to 'witty conceits' and far-fetched imagery. In more recent use, of poetry which expresses emotion within an intellectual context; also *ellipt.* as *sb.*, a metaphysical poet. Hence metaphysic'ality, the quality of being metaphysical.

[1693 DRYDEN *Orig. & Progr. Satire* Ess. (ed. Ker) II. 19 He [Donne] affects the metaphysics, not only in his satires, but in his amorous verses, where nature only should reign; and perplexes the minds of the fair sex with nice speculations of philosophy, when he should engage their hearts. . . GRIERSON *First Half 17th Cent.* ix. 374 In Donne's love-poetry there is a real metaphysical strain, while the range of erudition from which he draws his imagery was something altogether new. 1921 G. SAINTSBURY in *Times Lit. Suppl.* 27 Oct. 698/2 [Dryden] might. . . so use 'metaphysics' as equivalent to 'second thoughts', things that come after the natural first; and, once more, this definition would, I think, fit all the poetry commonly called 'metaphysical'. *Ibid.*, I only hope that in a second edition he will add a few more 'specimens' of the lighter metaphysicality. 1936 *Essays & Stud.* XXI. 137, I use 'metaphysical' not in the Johnsonian sense of 'conceited', but as implying a certain refinement and complexity of thought—a kind of ecstasy of intellectual partition as we find it in Shakespeare and Donne. 1947 C. DAY LEWIS *Colloq. Element Eng. Poetry* 21 The poets of the Romantic Movement gave an outlet to new ideas. . . beneath the crust of their age, just as the Metaphysicalls had done for the new ideas of their time. 1955 R. GRAVES *Crowning Privilege* ii. 27 Dryden's conversion from metaphysicality was not to the poetic faith of his English predecessors, but to current French theory. 1960 D. DAICHES *Crit. Hist. Eng. metaphysics (metə'fiziks), *sb. pl.* [pl. of METAPHYSIC sb., repr. med.L. *metaphysica* (neut. pl.), med.Gr. (τά) μεταφυσικά (neut. pl.), an alteration of the older τὰ μετὰ τὰ φυσικά, 'the (works) after the Physics' (cf. META- and PHYSICS), the title applied, at least from the 1st century A.D., to the 13 books of Aristotle dealing with questions of 'first philosophy' or ontology.

This title doubtless originally referred (as some of the early commentators state) to the position which the books so designated occupied in the received arrangement of Aristotle's writings (τὰ φυσικά being used to signify, not the particular treatise so called, but the whole collection of treatises relating to matters of natural science). It was, however, from an early period used as a name for the branch of study treated in these books, and hence came to be misinterpreted as meaning 'the science of things transcending what is physical or natural'. This misinterpretation is found, though rarely, in Greek writers, notwithstanding the fact that μετὰ does not admit of any such sense as 'beyond' or 'transcending'. In scholastic Latin writers the error was general (being helped, perhaps, by the known equivalence of the prefixes *meta-* and *trans-* in various compounds); and in English its influence is seen in the custom, frequent down to the 17th c., of explaining *metaphysical* by words like 'supernatural', 'transnatural', etc.]

1. *a.* That branch of speculative inquiry which treats of the first principles of things, including such concepts as being, substance, essence, time, space, cause, identity, etc.; theoretical philosophy as the ultimate science of Being and Knowing.

1885 *Proc. Soc. Psychical Res.* III. 422 It would be a grave retardation of science were it assumed that this strange metapsychosis was a medical curiosity alone. 1902 J. M. BALDWIN *Dict. Philos. & Psychol.* II. 668/2 The term metapsychosis has been suggested to designate mental states especially of the percipient under telepathic conditions. 1945 C. [*f.* META- + RHODOPSIN.] Either of two interconvertible intermediates (the orange metarhodopsin I and the yellow metarhodopsin II) that are formed when rhodopsin is bleached by light, being produced from lumirhodopsin and undergoing spontaneous hydrolysis to retinal and opsin.

1950 G. WALD et al. in *Science* 17 Feb. 180/1 If the solution of lumi-rhodopsin is warmed to about -20°C, a further change occurs in darkness. The absorption band shifts another 7-9 mμ toward the blue, with little further change in height or shape... We shall call this second product meta-rhodopsin. 1970 G. S. BRINDLEY *Physiol. Retina* (ed. 2) i. 11 Figure 1.4 shows the effect of pH on the absorption spectrum of metarhodopsin at 3.2°C. Increase of temperature favours the acid form ('metarhodopsin II'). *Ibid.*, It seems that when rhodopsin is bleached by light the alkaline form ('metarhodopsin I') is always formed first, and this passes quickly into the equilibrium mixture appropriate to the pH and temperature. 1975 [see LUMIRHODOPSIN].

metastability (metəstə'bɪlɪtɪ). [f. next, after *stable, stability*.] The property or state of being metastable.

1901 *Jrnl. Physical Chem.* V. 270 (heading) The metastability of the Weston cadmium cell. 1914 W. ROSENHAIN *Introd. Study Physical Metall.* xiv. 328 The metallic state, in the conditions which prevail at the surface of the earth, is for the majority of metals a state of chemical meta-stability. 1924 *Nature* 13 Dec. 859/2 Atomic theory would suggest that these lines were connected with a faint metastability of certain possible quantum states of the atoms. 1950 *Engineering* 3 Feb. 137/3 This type of under-cooling is made possible only by the metastability of iron carbide. 1968 C. G. KUPER *Introd. Theory Superconductivity* i. 4 The latter is a small and very simple device which exploits the metastability of superconducting persistent currents.

metastable (metə'steɪb(ə)l), *a.* [Irreg. f. META- + STABLE *a.*, as tr. of G. *metastabil* (coined in sense 1 by W. Ostwald, in *Lehrb. d. allgemeinen Chem.* (1893) II. i. 517).] 1. Of a physical system: persisting (in its existing state) when undisturbed or subject to disturbances smaller than some small or infinitesimal amount, but passing to a more stable state when subject to greater disturbances.

1897 *Jrnl. Chem. Soc. LXXII.* II. 309 The author gives to the above form of instability, where the change to solid can only be caused by the presence of the solid itself, the name of 'metastabile' [sic]. *Ibid.* 777/1 (Index), Equilibrium, metastable and labile. 1899 J. WALKER *Introd. Physical Chem.* xi. 101 A supercooled liquid may be kept for a very long time without any solid appearing, but as soon as the smallest particle of the substance in the more stable solid phase is introduced, the less stable, or, as it has been called, the metastable phase is transformed into it. 1940 GLASSTONE *Text-bk. Physical Chem.* vi. 459 The term metastable is used to describe a definite equilibrium, which is nevertheless not the most stable equilibrium at the given temperature; a metastable system undergoes spontaneous change on the addition of the stable phase. 1941 J. H. KEENAN *Thermodynamics* xxiii. 404 A system is in a state of metastable equilibrium if for all infinitesimal possible variations $\Delta S)_E < 0$, that is, $\Delta E)_S > 0$, while for some finite possible variations $\Delta S)_E > 0$, that is, $\Delta E)_S < 0$. A marble at rest at the bottom of the higher of two depressions in a continuous surface is an example of metastable equilibrium. 1954 *Electronic Engin.* XXVI. 60/1 The 11 points *a, c, e, . . . t, u* are the stable positions corresponding to the digits 0, 1, 2, . . . 9 and the reset point [of the counting tube], whereas the 10 points *b, d, f, . . .* are metastable. Suppose the anode current is at the point corresponding to *b* and a small disturbance shifts the beam to the left. . . The beam will then move farther away . . . and soon reach the point corresponding to *c* at which it will remain despite any small disturbances. 1968 C. G. KUPER *Introd. Theory Superconductivity* i. 11 Long-lived metastable states cannot be rejected *a priori* as impossible. Diamond at room temperature shows no tendency to graphitize, nor glass to crystallize. But in all cases like these the excess entropy is frozen in by the immobility of the atoms at low temperatures.

2. *Physics.* Of an excited state of an atom, nucleus, or other quantum-mechanical system: having an exceptionally long lifetime because the transitions to states of lower energy are forbidden transitions. [Introduced in this sense (in Ger.) by Franck & Knipping 1919, in *Physik Zeitschr.* XX. 485/2.]

1922 A. D. UDDEN tr. *Bohr's Theory of Spectra* III. 86 These experiments showed that the impact of electrons could bring helium into a 'metastable' state from which the atom cannot return to its normal state by means of a simple transition. 1942 J. D. STRANATHAN 'Particles' of *Mod. Physics* xi. 455 It seems that certain nuclei can exist for considerable time in an excited state, known as a metastable state. 1961 POWELL & CRASEMANN *Quantum Mech.* xii. 458 The ground state of the orthohelium system . . . is therefore stable with respect to optical transitions of the usual kind, and has a correspondingly long lifetime. For this reason, it is frequently referred to as a metastable state. 1973 *Sci. Amer.* Feb. 93/2 The singlet and triplet metastable states have long lifetimes because they have no means of radiating their energy.

metastably (metə'steɪblɪ), *adv.* [f. prec. + -LY².] In a metastable state.

1938 A. JOHANNSEN *Descr. Petrogr. Ign. Rocks* IV. 401 Clinopyroxenes . . . may form metastably at lower temperatures. 1963 W. A. DEER et al. *Rock-Forming Min.* IV. 181 The higher temperature forms . . . can exist metastably below their inversion temperatures. 1973 A. D. EDGAR *Exper. Petrol.* iii. 61 For some compositions it may be necessary to avoid certain very reactive components, e.g. *a-cristobalite*, which is known to persist metastably well below its equilibrium stability field.

Metastasian (metə'steɪsɪən, -zɪən), *a.* [f. the name of Pietro *Metastasio* (1698-1782), Italian poet and librettist + -AN.] Of or pertaining to P. *Metastasio* or characteristic of his works.

1947 A. EINSTEIN *Mus. Romantic Era* ix. 89 Canzonets on Metastasian texts. 1961 *Times* 16 Feb. 16/7 The Metastasian masterpiece, *Il Zio*. 1963 *Listener* 14 Feb. 313/2 Dissatisfied with the Metastasian libretto, he looked to Paris for an alternative. 1964 *Conc. Oxf. Dict. Opera* 259/2 It was against the abuses to which Metastasian opera lent itself—above all the halting dramatic progress, with the plot continually arrested to make way for demonstrations of vocal skill—that Gluck rebelled.

metastasis (me'tæstəsɪs). *Pl.* *metastases* (me'tæstəsɪz). [late L., *a.* Gr. *μετάστασις*

Philos.* II. xx. 294 What not unfrequently happens in distempered Bodies by the *Metastasis* of the Morbifique matter. 1747 tr. *Astruc's Fevers* 354 The milk . . . is very often thrown on other parts, where it creates *metastases* the most incorrigible and obstinate. 1842 *Medico-Chirurg. Rev.* XXXVII. 557 Hysteria; Catalepsy; Metastasis of Hearing, &c. 1898 P. MANSON *Trop. Diseases* ix. 175 The metastasis of the pains. 1903 MYERS *Hum. Personality* I. Gloss. 19 *Metastasis*, change of the seat of a bodily function from one place . . . to another.

b. Biol. The transformation of chemical compounds into other compounds in the process of assimilation by an organism.

By some writers restricted to signify the change of non-living into other non-living matter; by others treated as synonymous with METABOLISM.

1875 BENNETT & DYER tr. *Sachs' Bot.* 626 Assimilation and Metastasis (Stoffwechsel). 1878 BELL tr. *Gegenbaur's Comp. Anat.* 13 Metastasis, or change in the arrangement of chemical elements. The body nourishes itself by replacing the material used up in metastasis by fresh matter, which is received from without.

c. Geol. (See quot.)

1886 BONNEY in *Proc. Geol. Soc.* 59 Metastasis (change of order), denoting changes rather of a paramorphic character, such, for example, as the crystallization of a limestone, the devitrification of a glassy rock.

3. *gen.* Transformation; change from one condition to another. *rare.*

1831 SIR W. HAMILTON *Discuss.* (1852) 21 *note*, The Infinite and Absolute are only the names of . . . two subjective negations, converted into objective affirmations. . . Some, more reasonably, call the thing unfinishable—infinite; others, less rationally, call it finished—absolute. But in both cases, the metastasis is in itself irrational. 1887 STEVENSON *Mem. & Portraits* vii. 116 The lamp and oil man, just then beginning, by a not unnatural metastasis, to bloom into a lighthouse-engineer.

metastasize (me'tæstəsəɪz), *v.* *Path.* [f. METASTAS(IS) + -IZE.] *intr.* Of a disease, esp. a tumour: to pass from one part or organ to another; to undergo metastasis (sense 2 a).

1907 *Jrnl. Med. Res.* XVII. 187 As might be expected the tendency to metastasize is much greater in certain tumours than in others. 1947 *Nature* 4 Jan. 15/1 Many prostatic cancers which have metastasized stand still or disappear after the removal of the patients' testicles. 1974 PASSMORE & ROBSON *Compan. Med. Stud.* III. xix. 14/2 This tumour invades neighbouring structures, advances along nerves and often recurs after local removal. It may eventually metastasize to distant organs.

metastatic (metə'stætɪk), *a.* [f. METASTASIS: cf. STATIC and rare Gr. *μεταστατικός*.]

1. *Min.* (See quot.)

1816 R. JAMESON *Char. Min.* (ed. 2) 218 A crystal is named . . . *Metastatic* (*metastatique*), that is to say, transferred, when its plane angles and solid angles are the same as those of the nucleus, and are thus transported to the secondary form. Example, *Metastatic calcareous-spar*.

2. Pertaining to, characterized or produced by metastasis.

a. Path. 1822-34 *Good's Study Med.* (ed. 4) IV. 316 As sometimes happens in metastatic dropsy from repelled gout. 1841 *Medico-Chirurg. Rev.* XXXV. 563 *Metastatic Abscess*. 1892 *Tuke's Dict. Psychol. Med.* II. 697 *Metastatic Insanity*, any form of insanity which appears and disappears with the disappearance or appearance of certain physical affections, e.g. asthma, gout, erysipelas, &c.

2. *Cryst.* (See quot.) Hence **meta'strophic a.**

1895 STORY-MASKELYNE *Crystallogr.* 99 A solid figure is symmetrical to an axis when every *radius vector* moving in a plane perpendicular to the axis and meeting a point of the figure would also meet corresponding points at the same distances from the axis at each revolution through an arc-angle of $2\pi/n$. The aspect of such a solid figure will not therefore be changed by a revolution of the solid round this axis through the angle $2\pi/n$, and any portion of its surface so revolving will move into a position in which it will be congruent with another portion of the surface entirely corresponding to it. DEF.—Congruence of this kind will be termed *metastrophe*, and such corresponding parts will be said to be *metastrophic* to each other. 1899 W. J. LEWIS *Crystallogr.* 18 We shall generally express the relation by saying that the like faces, edges and coigns disposed about an axis of symmetry are interchangeable or *metastrophic*.

Baltic and Slavonic languages, one of certain kinds of substitution of one distinctive intonation for another in a given syllable; these substitutions collectively. Hence **metatonic** *a.*

1936 *Trans. Philol. Soc.* 17 The long monophthongs, which have now a rising intonation, are abnormal. Except in loan words, they are due to various obscure causes, known collectively as *metatonie*. *Ibid.* 29 But *metatonie* in the Slavonic period (i.e. *nowocyrkumfleksowa*) may be present in some of these cases. 1949 ENTWISTLE & MORISON *Russian & Slavonic Languages* iv. 74 The process by which acutes change to circumflexes and *vice versa* is known as *metatony*. 1957 C. K. MATTHEWS *Russ. Hist. Gram.* ii. 42 The Russian form *voróna*... illustrates a shift of stress forward in the word, which is known as progressive *metatony* and is the outcome here of the greater energy of the acute accent as compared with that of the circumflex. *Ibid.* vi. 99 The modern instances of *metatony* or shift of stress... have parallels in the fourteenth century. 1965 G. Y. SHEVELOV *Prehist. of Slavic* xxxiii. 532 He [sc. Rozwadowski] called [the] whole phenomenon of their rise and all the changes associated with it *metatony*... The original idea of *metatony* as a pitch mutation resulting in the appearance of the two new intonations was a typical product of the Neogrammarian approach. *Ibid.* 533 *Metatonic* changes are most marked in those Slavic languages or dialects which preserve distinctive (phonemic) pitch. 1973 T. MATHIASSEN in A. Ziedonis et al. *Baltic Lit. & Linguistics* 165, I am inclined to assume for such cases... only the working of *metatony*, which involves merely a shift of intonation from circumflex to acute.

metempiric (mɛtɛm'pɪrɪk). [f. META- + EMPIRIC.]

Introduced, together with the related words, by G. H. Lewes in 1874.]

1. (Also metempirics with sing. construction: cf. metaphysic, metaphysics.) The philosophy of things that lie outside the sphere of knowledge derived from experience.

The writers quoted differ greatly in their application of the term, but the question between them is what is meant by 'experience'; the definition given above would be accepted on both sides.

1874 LEWES Probl. Life & Mind Ser. 1. I. 18 Metempirics sweeps out of this region in search of the otherness of things. a 1881 A. BARRATT Phys. Metempiric xi. (1883) 130 Any metempiric which does more than numerically multiply, or vary in degree, existence such as we have it in experience, or which postulates beings whose qualities bear no resemblance to those of experience, must be at once rejected.

2. One who believes in or supports metempirical philosophy; a metempiricist.

a 1881 A. BARRATT Phys. Metempiric iii. (1883) 19 Every man who believes in the consciousness of his fellows—every man who uses the word 'we'—is a Metempiric. 1882 in OGILVIE, and in later Dicts.

metempirical (mɛtɛm'pɪrɪkəl), a. [f. META- + EMPIRICAL.] Pertaining to matters outside the range of knowledge derived from experience. Also, of opinions and their advocates: Maintaining the validity of concepts and beliefs based otherwise than on experience.

1874 LEWES Probl. Life & Mind Ser. 1. I. 17 If then the Empirical designates the province we include within the range of Science, the province we exclude may fitly be styled the Metempirical. a 1881 A. BARRATT Phys. Metempiric ii. (1883) 17 The simplest Metempirical assumption, and one made by every man, is that there is a Metempirical existence, that he and his own experience are not all that has ever existed. 1888 Athenæum 11 Feb. 184 It appropriated for empiricism doctrines hitherto the special property of metempirical schools.

Hence metem'pirically adv., in a metempirical sense or manner.

meter: see METRE *sb.*¹ and ².

-**meter**, in actual use commonly -*ometer*, and in some later formations -*imeter*, a terminal element in words denoting scientific instruments for automatically measuring something. Many words with this ending, as *barometer*, *hydrometer*, *hygrometer*, *thermometer*, were formed in the 17th c., and represent mod.L. forms in -*metrum* (F. -*mètre*, It. -*metro*). In these early examples the ending is always appended to Gr. noun-stems, or combining forms in -*o*, and the mod.L. form shows that it was intended to represent the Gr. μέτρον measure (see METRE *sb.*¹); the formation is irregular, as the Gr. word does not occur in combination with *sbs.*, and would not correctly express the required notion of 'instrument that measures'. In the 18th and 19th c. many additional words were formed with this ending on Greek bases, as *actinometer*, *anemometer*, *chronometer*, *eudiometer*, etc. Near the end of the 18th c. hybrid formations began to be introduced (many of them first occurring in Fr.). In some of these the form of Greek compounds is imitated, as in *gasometer*, *galvanometer*, *alcoholometer*, *lactometer*, *pedometer*; in others the combining-vowel *i* of the Latin first element is retained, as in *calorimeter*, *gravimeter*, *densimeter*, *velocimeter*. In some late formations -*meter* is appended to modern words without any attempt to assimilate the form of the first element to that of a Gr. or Latin combining form, as in *voltmeter*, *ammeter*. Cf. also the names of electrical measuring instruments mentioned under METER *sb.*³ 1 b, which might perhaps be more correctly viewed as examples of the suffixed -*meter* than as examples of the *sb.* with defining word.

Jocular nonce-words in -*ometer* have been frequently formed; chiefly in imitation of Sydney Smith's FOOLOMETER, with the sense 'a means of measuring or ascertaining the opinion or prevalent character of some class of people'; also occasionally in names of imaginary instruments for measuring the amount or degree of something, as in *obscenometer*. Similar hybrid formations have sometimes been adopted as trade names for certain instruments,

methinks (mi:'θɪŋks), *impers. v.* Now *arch.* and *poet.* Pa. t. methought (mi:'θɔ:t). Forms: see below and cf. THINK *v.*¹ [OE. *mē þyncþ* (pa. t. *mē þūhte*), where *mē* is dative, and *þyncþ* the 3 pers. sing. of *þynccean* to seem: see THINK *v.*¹

As THINK *v.*¹ did not, exc. in this phrase, survive beyond the 14th c., and had no very wide currency after 1250, the syntax of *methinks* became obscure. Hence it underwent various alterations of form. The verb being supposed to be THINK *v.*², it followed that it ought to be in the first person; hence the form *me think*, in which probably the pronoun was still correctly apprehended as a dative. In the 16-17th c. there occur the forms *my think*, *my thought(s)*, which are attempts to obtain a normal syntax by taking *think*, *thought*, as sbs. The curious form *methoughts*, used in the 17th and the first half of the 18th c., prob. owes its s to the analogy of the present tense *methinks*.]

According to Celsus, the members of this school (called in Latin *methodici*, in Gr. *μεθοδικοί*) differed from the Dogmatic school in basing their treatment not on principles deduced from a classification of diseases according to their origin, but on the theory that morbid conditions consisted either in 'looseness', 'tightness', or a mixture between the two (*fluens, strictum, mixtum*), each of the three states having its appropriate set of remedies. The founder of the school was Themison, about A.D. 100.

4. a. Originally, a term applied to the members of a religious society (nicknamed 'the Holy Club'), established at Oxford in 1729 by John and Charles Wesley and other members of the University, having for its object the promotion of piety and morality; subsequently applied to those who took part in or sympathized with the evangelistic movement led by the Wesleys and George Whitefield. b. In later use, a member or adherent of any one of a number of religious bodies or denominations which originated directly or indirectly from the labours of the Wesleys and Whitefield, and which came together in 1932 to form the Methodist Church of Gt. Britain and Ireland.

In England, during the nineteenth century, the designation belonged especially to the members and adherents of the Wesleyan-Methodist Society founded by John Wesley, and of the various other bodies that proceeded from it or from each other by succession, as the New Connexion Methodists, the Primitive Methodists, the United Methodist Free Church, and others. All these bodies accepted in the main the Arminian theology of Wesley, and in nearly all of them the ministers (called 'travelling preachers') changed their place of abode after a certain period (usually three years). In the U.S. the most influential body of Methodists is the Methodist Episcopal Church, which is in full communion with the Methodist Church in Great Britain. There are also several other bodies in the U.S. that adopt the name as a part of their official designation. In Wales the name 'Methodists' was formerly used to denote the body more fully known as 'Calvinistic Methodists', which was founded by Welshmen influenced by the teaching of Whitefield.

The origin of the name, as applied to the associates of the Wesleys at Oxford, is somewhat obscure. Cf., however, sense 3 a, and the 17th c. use in examples like quotes. 1647, 1658, in sense 2.

SHERWOOD *Stories Ch. Catech.* xxxiii. 353 The women of the regiment soon gave her the name of a methodist. [Footnote] This term, as used in India, . . . is a name of reproach given to those . . . who are more serious than their neighbours. 1834 *Tait's Mag.* I. 387/2 For this hardship his remedy was, that the Methodists, his general term for all dissenters, should be made to contribute double, to relieve churchmen of such burdens.

methyl ('mɛθɪl). *Chem.* Formerly also *methule*, -yle. [a. F. *méthyle*, G. *methyl*, a back-formation from F. *méthylène*, G. *methylen*, METHYLENE.]

The G. *methyl* occurs in papers by Regnault in *Ann. der Pharmacie* XXXIII. 328 and XXXIV. 28 (1840). The back-formation was suggested by the fact that -yl (which Berzelius preferred to spell -ule), from the Gr. *ἄλγῃ* in the sense of 'matter', had already been used in names of organic radicals (*benzoyl*, *Wöhler* & *Liebig* 1832; *ethyl*, *Liebig* 1834). The analysis of *methylene* into *methyl* + *-ene* gave rise to the use of -ENE as a chemical suffix, as in *ethylene*, *benzene*, etc., and the identification of the last syllable of *methyl* with the suffix -yl led to the use of *meth-* as an element in the names of substances connected with or derived from wood spirit.]

metre ('mɪtə(r)), *sb.*² Also *U.S.* meter, 9 *mètre*. [ad. F. *mètre* (mɛtr), ad. Gr. μέτρον measure.]

a. The fundamental unit of length of the metric system, approximately equal to 39.37 English inches. Now one of the base units of the International System of Units, and redefined in terms of the wavelength of a spectral line (at 605.8 nanometres) of an isotope of krypton (see quot. 1970).

It was intended to represent one ten-millionth of the length of a quadrant of the meridian; the standard metre kept at Paris nearly corresponds to this theoretical value.

1797 *Monthly Mag.* III. 434 The measures of length above the metre are ten times [etc.]... greater than the metre. 1831 *Jnl. Roy. Instit.* I. 599 M. One epoch-making scientific decision was taken, namely, to redefine the metre in terms of a natural atomic standard, the wave-length of light, thus depositing the platinum-iridium bar—the International Prototype Metre—from the supremacy it has held in the field of length measurements since 1889. *Ibid.* 196/2 The specification of the conditions of excitation and observation [of the radiation] ensures a reproducibility of the new optical metre to about 1 part in 100 millions. 1970 *Internat. (11th CGPM (1960), Resolution 6). 1971 *Physicis Bull.* July 397/1 The definition of the metre in terms of the wave-length of the orange spectral line of a krypton discharge was internationally accepted in 1960 and brought about a new interest in interferometry for length measurement.
