2. Preceded by a possessive, *your, his, her, the king's, the queen's*; sometimes with a qualifying epithet, as (*most*) *sacred, gracious, †royal*. Used as an honorific title in speaking to or of a king, queen, emperor, or empress. In this use *Your Majesty* is a respectful substitute for the pronoun *you*, and *His, Her Majesty* (abbreviated H.M.) may be either prefixed to such designations as *the King, the Queen, King Edward VII*, etc., or substituted for them; so, in modern use, *Their Majesties*, when more than one royal person is meant. Also, with distinguishing epithet: *His, Her Imperial Majesty* (abbreviated H.I.M.), said of an emperor or empress; *His Britannic Majesty* (abbreviated H.B.M.), the King of Great Britain (and Ireland); *His Catholic Majesty*, the

King of Spain; *His Most Christian Majesty* (Hist.), the King of France; in jocular language, *His Satanic Majesty*, the Devil, Satan; also *his sable majesty* (see *SABLE a.*).

This use, common to all the Rom. langs., and from them adopted into all the living Teut. langs., descends from the Latin of the later Roman empire (*tua, vestra majestas*). In England it occurs, in its Latin form, from the 12th c., though examples of the vernacular form are not met with before the 15th c. It was not until the 17th c. that *your majesty* entirely superseded the other customary forms of address to the sovereign. Henry VIII and Queen Elizabeth were often addressed as 'Your Grace' and 'Your Highness', and the latter alternates with 'Your Majesty' in the dedication of the Bible of 1611 to James I.

The English syntax of this word (as of the other abstract nouns similarly employed as titles, e.g. *highness, lordship, grace, excellency*) is somewhat inconsistent. Although *Your Majesty*, like *His, Her Majesty*, requires the following verb to be in the 3rd person sing. to agree with the sb., this principle of concord is not applied to the pronouns, as in Fr. and some other langs. The neuter pronouns *it, its, which*, cannot be used with reference to a foregoing (*Your, His, Her Majesty*); either the titular phrase must be repeated, or the pronoun must be the same as if the simple form ('you', or 'the king', 'the queen') had been used instead of the periphrastic form.

[Com. WGer.: OE. *macian* = OFris. *makia*, OS. *macon* (LG., Du. *maken*), OHG. *mahhôn* (MHG., mod.G. *machen*), app. f. **mako*-fit, suitable (see *MAKE sb.*¹). On this view the primary sense would be 'to fit, arrange'; but in the earliest known stages of the WGer. tongues the verb corresponded generally to the L. *facere* in such of its senses as were not expressed by *DO*. The MSw. *maka* to make, construct (mod.Sw. *make* to move), Da. *mage* to manage, arrange, appear to have been adopted from LG.

Many senses which later Eng. shares with continental Teut. are not recorded in OE., or not until near the end of that period; possibly the vb. originally had some of these meanings, but was displaced in the literary dialect by synonyms. Materials are wanting for a genealogical arrangement of the senses; the order of the main branches in the following scheme has been adopted on grounds of convenience. The word is not very frequent in OE.; the most prominent uses are in causative and factitive applications (see 48, 49, 52) and in the phrase *hit macian* 'to make it' = to act, behave (see 68).]

I. Senses in which the object of the verb is a product or result.

* To bring into existence by construction or elaboration. (Not common until late in OE.; the L. *facere* is usually rendered by *gewyrcean*.)

1. *trans. a.* To produce (a material thing) by combination of parts, or by giving a certain form to a portion of matter; to construct, frame, fashion.

Formerly common in various applications in which vbs. of more specific meaning are now almost universally employed; used, e.g. for to build or erect a house, town, column, ship, to paint a picture, to carve or sculpture a statue.

The mod. usage is difficult to reduce to rule. It is common to speak of 'making' a sonnet or an epigram; but it would sound odd to speak of 'making' a tragedy or a novel, except

with some added phrase, as in 'Some one has made a tragedy on this subject'.

59. With sbs. expressing the action of vbs. (whether etymologically cognate or not), *make* forms innumerable phrases approximately equivalent in sense to those verbs. In some of these phrases the obj.-noun appears always without qualifying word; in others it may be preceded by the indefinite article, or by a possessive adj. relating to the subject of the sentence. When standing alone, the combination of *make* with its object is equivalent to a verb used *intr.* or *absol.*; but in many instances the obj.-noun admits or requires construction with *of*, and this addition converts the phrase into the equivalent of a transitive verb. In this Dictionary these phrases are usually illustrated (and if necessary explained) under their respective sbs.; but a selection of them is given here in order to exhibit the variety of applications. (For the illustration of those phrases which are enumerated without quotations, see the sbs.)

Many of the ME. phrases of this type are literal renderings of phrases with L. *facere* or F. *faire*, the sb. being often adopted from one of those languages. In early use a gerund in -ing was often the obj. of *make*, but this is now rare.

Mal, var. **MALER** *sb.* and *a.*

mal- (mæl), *prefix*, formerly often written **male-** (but pronounced as one syll.), chiefly represents the *F. mal* adv.:—*L. male* ill, badly; rarely, as in *maltalent*, it represents the *OF. mal* adj.:—*L. malus* bad. In its advb. use the prefix occurs in many adoptions from *Fr.*, which are sometimes combinations with *vbs.*, as *maltreat*; sometimes nouns of action formed from such combinations, as *malfeasance*; and sometimes combinations with *adjs.*, where the prefix serves to reverse the favourable connotation of the word, as *maladroït*, *malcontent*. In imitation of these adopted words, *mal-* has from the 16th c. been prefixed to many *Eng.* words, to convey the sense 'ill', 'wrong', 'improper(ly)'. The words thus modified are chiefly nouns of action, as in *malpractice*, and many physiological terms, as *malassimilation*, *malformation*; occasionally *adjs.* and *vbs.*, as in *malodorous*, *malappropriate*. The formations that have a permanent character are treated in their alphabetical places; examples of the frequent use of the prefix in the creation of nonce-words are *mal-accident*, *-application*, *-appointment*, *-association*, *-cultivation*, *-development*, *-direction*, *-feeling*, *-hygiene*, *-identification*, *-institution*, *-instruction*, *-operation*, *-performance*, *-publication*, *-reasoning*, *-use*, *-volition*; *mal-conceited*, *-created*, *-discontented*, *-shapen* *adjs.*

App. identical with the med.L. *melegeta*, the name of a spice mentioned c1214 in connexion with cloves and cardamoms, and said a 1331 to be among the productions of Java (see Du Cange). Both the authors cited are Italian, and in 1486 Simon a Cordo (*Clavis Sanationis*) explains the word as a diminutive of It. *melica* millet, remarking that the grains resemble those of millet. This seems probable; but if the word be of European origin, it has either been adopted in a corrupt form into some West African langs., or confused with a native word, the source of the earliest Eng. form and of the F. *maniguette*. In 1599 Towrson (Hakl. *Voy.* II. ii. 27), in a list of phrases from the lang. of Guinea, gives '*manegete afoye*, grains enough'. Miss M. Kingsley, *West Afr. Studies* (1899) ii. 57, says that in the native lang. at Cape Palmas the name is *emanequetta*, but that as the name is very local (the more usual word is *waizanzag*), a European origin is possible.]

6. **Law.** a. Wrongful intention generally. b. That kind of evil intent which constitutes the aggravation of guilt distinctive of certain offences (*esp.* of murder), or which deprives some act, on the face of it unlawful, of a justification or excuse that might otherwise have been allowed.

The first meaning mentioned under b was originally expressed by the AF. phrase *malice purpense* or *prepense*, which in modern legal language appears as *malice prepense* (see *PREPENSE a.*) and in the translated form *malice aforethought*. In early use the phrase occurs in many anglicized forms: *malice prepensed*, *purpensed*, *pretensed* (also *prepened*, etc. *malice*); occasional variants found in non-technical writers are *malice prepense* (17th c.), *malice prepenive* (Fielding), *malice perpended* (Charles Lamb). For examples see the various adjs.

See also *quots.* 1825–1901 below, and *quot.* 1889 s.v. MALICIOUSLY 4. It is not possible to frame any such general definition as would show what legally constitutes 'malice' or proof of 'malice' in particular kinds of cases.

Laws Eng.* VIII. 77 The meaning of the term malice (*malitia*) in English law has been a question of much difficulty and controversy . . . It certainly has different meanings with respect to responsibility for civil wrongs and responsibility for crime. 1901 SIR F. POLLOCK *Law of Torts* (ed. 6) 24 Such abuse [of privilege allowed by law on special occasions and for special purposes, where the act is done not in good faith or for the advancement of justice, but from evil motives such as personal enmity] is called 'malice' or 'express malice', and deprives the act of justification. . . The words 'malice', 'malicious', and 'maliciously' were formerly used in pleading, and thence in forensic and judicial language, in many places where they were superfluous.

mamma', **mama** (mɑ'mɑ:). [A reduplicated syllable often uttered instinctively by young children, who are in many countries taught to use it as their word for 'mother' (esp. where the ordinary word in the language begins with *m*).

The Indogermanic type **mammā*, as a child's word for mother, is found as Gr. μάμη, L. *mamma* (whence It. *mamma*), OSI., Russian *mama*, Lith. *mama*, Irish *mam* (O'Brien); also in Welsh *mam*, which is the only word for 'mother', though *modr* survives in some compounds. The F. *maman* (Cotgr. 1611 *mammam*), like the earlier *mam-ma* (1584 in Hatz.-Darm.), appears to be an independent adoption of the instinctive infantine utterance; the Sp. *mamá*, Pg. *mamã*, may perhaps be from French.

Apart from the two 16th c. quots. in which the word is used with reference to a child's first attempt to speak, the Eng. *mamma* has not been found earlier than near the end of the 17th c., after which time it rapidly became common. The Eng. word of the 17-18th c. (rimed by Shadwell with *awe*) prob. represents a spoken form adopted from the F. *maman*; the spelling may have been suggested by Latin or It., or it may possibly have been originally meant to express the native English form ('*mama*', 'momā'), which is still current in many dialects. In educated use, so far as is known, the stress has in England always been on the last syllable; in the United States, however, the stress '*mamma*' is the more usual; a prevailing U.S. pronunciation is represented by the spelling *momma*. The spelling *mama*, sometimes used in the 18th c., became somewhat common after 1800, and is especially frequent in the novels printed c 1830-50. It is now rare.]

a. A word employed as the equivalent of *mother*: chiefly used in the vocative, or preceded by a possess. pronoun (as 'my mamma'); also without article in the manner of a proper name (e.g. 'Mamma is well'); less usually with *a*, *the*, or in *plural*.

The status of the word has always been the same as that of PAPA'. In the 18th c., although '*mamma*' as used by young children was probably common, *ma'mma* seems to have been confined to the higher classes, and among them to have been freely used not only by children but by adults of both sexes. In the 19th c. its use was much extended, and among the lower middle class was a mark of 'gentility'. Latterly it has in England become unfashionable, even as used by children. Aramaic *māmōn*, *māmōnā* riches, gain (frequent in the Targums). Hence also Syriac *māmūnā*, Goth. *mammōna* wk. masc., mod.F. *mammon*, *mammone*.

The N. T. phrase *μαμωνάς τῆς δδικίας* (Eng. version 'mammon of unrighteousness'; earlier versions, 'mammon of iniquity', 'wicked mammon', etc.) represents exactly the Aramaic *māmōn di-r'shae*, 'riches or gain of wickedness' (Targ. Hab. ii. 9), and approximately the more common *māmōn di-sh'qar*, 'riches of falsehood'.

1. The Aramaic word for 'riches', occurring in the Greek text of Matt. vi. 24 and Luke xvi. 9-13, and retained in the Vulgate. Owing to the quasi-personification in these passages, the word was taken by mediæval writers as the proper name of the devil of covetousness. This use appears in English in the 14-16th c., and was revived by Milton (*P.L.* i. 678, II. 228). The word does not occur in the N. T. translations of Wyclif and Purvey (who substitute *richessis*), but it was used by Tindale (1526-34) and subsequent translators, with the exception of those of the Geneva version. From the 16th c. onwards it has been current in English, usually with more or less of personification, as a term of opprobrium for wealth regarded as an idol or as an evil influence.

män, Da. *mand*, pl. *mænd*), Goth. *manna*, accus. *mannans*, genit. *mans*, pl. *mans*, *mannans*. The forms in the various Teut. langs. belong to two declensional stems, the OTeut. forms of which would be **mann-* and **mannon-*. (The ON. *man* str. neut., slave, may possibly be related, but the connexion is doubtful). The OE. plural *menn* is the regular descendant of OTeut. **manniz*, and the dative *mēnn* of OTeut. **manni*, from the cons.-stem **mann-*.

It was formerly regarded as certain (on the ground of the supposed correspondence with Skr. *manu* man) that the *nn* of **mann-* was derived from an original *mw*. The now prevailing view is that the second *n* represents the zero-grade of the suffix of a stem of which the Gothic form would be **manan-*. This hypothesis accounts for the otherwise obscure form *mana-* which the word assumes in Gothic compounds; if it be correct, the Teut. word and the Skr. *manu* cannot have any nearer relation than that of independent derivatives of a common root. They have been usually referred to the Indogermanic **men-*, **mon-*, to think (see MIND sb.), so that the primary meaning of the sb. would refer to intelligence as the distinctive characteristic of human beings as contrasted with brutes. Many scholars, however, regard this as intrinsically unlikely to have been the original sense, though no plausible alternative explanation has been suggested.

In all the Teut. langs. the word had the twofold sense of 'human being' and 'adult male human being', though exc. in Eng. it has been mainly superseded in the former sense by a derivative (Ger., Du. *mensch*, Sw. *menniska*, Da. *menneske*: cf. MANNISH sb.)

I. 1. A human being (irrespective of sex or age); = L. *homo*. In OE. the prevailing sense.

† a. In many OE. instances, and in a few of later date, used explicitly as a designation equally applicable to either sex. Obs.

In OE. the words distinctive of sex were *wer* and *wif*, *wēpman* and *wifman*.

b. In the surviving use, the sense 'person' occurs only in general or indefinite applications (e.g. with adjs. like *every*, *any*, *no*, and often in the plural, esp. with *all*, *any*, *some*, *many*, *few*, etc.); in modern apprehension *man* as thus used primarily denotes the male sex, though by implication referring also to women.

The gradual development of the use of the unambiguous synonyms *body*, *person*, *one*, and (for the plural) *folk(s)*, *people*, has greatly narrowed the currency of *man* in this sense; it is now literary and proverbial rather than colloquial.

In *Zoology*: The human creature or race viewed as a genus (*Homo*: in the present classification consisting of only one species, *H. sapiens*) of animals.

In OE. a few examples occur with the definite article. The Eng. use of the word as a quasi-proper name, without article, differs from the practice of most of the modern European langs. (cf. F. *l'homme*, G. *der mensch*), and from the usage of Eng. itself with regard to other generic names of animals: cf. 'the anatomical structure of *man* and that of *the lion*'.

manage ('mænidʒ), *v.* Forms: a. 6 manege, mannage, 6-7 mannage, 6- manage. β. 6-8 menage. [Recorded earlier than the cognate MANAGE sb., and prob. directly ad. It. *maneggiare* to handle, esp. to manage or train (horses) = Sp. *manejar*, F. *manier*:—vulgar L. type **manidiare*, f. L. *man-us* (It., Sp. *mano*, F. *main*) hand.]

Although the etymological form *manege* appears in our earliest example, the ending was, as in the sb., already in the 16th c. assimilated to the common suffix -AGE. The form *menage* in early examples is taken from the sb.; but in the late 17th and early 18th c. it was chiefly used where the sense closely approaches that of the F. *ménager* to use carefully, to husband, spare, f. *ménage* household. This Fr. vb. certainly influenced the sense-development of the Eng. word: indeed, in the writings of Dryden and his contemporaries, there are frequent instances of *manage* (as well as of *menage*) which can only be regarded as conscious gallicisms.]

At Rouen, a ring-shaped cake of bread (in ordinary Fr. called *couronne*) is known as *manchette*, lit. 'cuff' (Robin *Patois normand*, and Littré *Suppl.*), but this name (which may be of recent origin) is obviously descriptive of shape, while the Eng. word in early use denotes a certain quality of bread. The identity of sense with PAINDEMAINE, DEMEINE, *maine-bread* (see MAINE *sb.*) suggests the possibility of etymological connexion with those words. The word might represent an AF. diminutive f. **demenche*—L. *dominica*, or it might be an Eng. compound f. MAINE *sb.* + CHEAT *sb.*; but either supposition involves some difficulties.]

In med.L. it meant also the office or function of a *manceps* or buyer in of stores (in late L. this word sometimes denoted the manager of a public bakery: so in late Gr. form *μάνκιψ*). It may be conjectured that in monastic use the word denoting the office was applied (like many similar terms) to the person charged with it, and that this application is the source of sense 1 below, which seems not to be known in OF.]

1. A black mineral (now recognized as an oxide of a metal, to which its name has been transferred: see sense 2), used from ancient times in glass-making, and now in many industrial processes. Also called **black manganese**, † **glass-maker's manganese**. The name has been also applied with qualification to other ores of the metal: **grey m.**, = MANGANITE 1; **horn m.**, **corneous m.** [G. *hornmangan*, *Jasche*], an impure manganese silicate akin to pitchite; **red m.**, = RODOCHROSITE; **white m.**, manganese carbonate.

As the name is in chemical use now restricted to the metal (sense 2), its older application survives only in commercial and industrial use. The black manganese of commerce is usually a mixture of various oxides, but the term is considered to apply esp. to manganese dioxide, MnO₂, which is the valuable ingredient in the mixture.

mangrove¹ ('mæŋgrəʊv). Also 7 mangrove, mangrave. [Of obscure history. Synonymous words app. connected are Pg. *mangue* (16th c.), Sp. *mangle* (Oviedo 1535, who applies it to S. American species), whence F. *manglé* (16th c.), later *mangle* (now applied to the fruit only, the name of the tree being *manglier*). The Malay *mangi-mangi* mangrove (not now current in the Malay Peninsula, but recorded in early Dicts.) is usually regarded as the ultimate source, but it is difficult to account on this view for the early appearance of Sp. *mangle* referring to America. The Eng. forms *mangrove*, *-grave* are unexplained (but cf. the word-play in quot. 1613); the mod. form is doubtless due to assimilation to GROVE sb.]

1. Any tree or shrub of the genus *Rhizophora*, or the allied genus *Bruguiera* (N. O. *Rhizophoraceæ*); esp. the common mangrove, *R. Mangle*.

The genus *Rhizophora* is extensively represented in both hemispheres. The species are all tropical, growing in the mud on the sea-shore down to low-water-mark; they have large masses of interlacing roots above ground, which intercept mud and weeds, and thus cause the land to encroach on the sea. *red mangrove* (see also 2d); a name given to a West Indian variety of the Common Mangrove, formerly separated as *R. Candel*; also in Australia, to *Bruguiera rheedii*.

1613 W. C. Plain *Descr. Barmudas* F 2 b, Amongst all the rest there grows a kinde of tree called Mangroves, they grow very strangely, & would make a man wonder to see the manner of their growing. 1657 R. LIGON *Barbadoes* 72 The mangrave is a tree of such note as she must not be forgotten. 1697 DAMPIER *Voy.* I. 151 Low swampy Land, overgrown with Red Mangroves. 1772-84 *Cook's Voy.* (1790) I. 193 A large lagoon, by the sides of which grows the true mangrove, such as is found in the West-Indies. 1845 DARWIN *Voy. Red Mangrove.

¶Ligon's description of the 'mangrave' confuses it (as Sloane pointed out) with the Mahoe (see MAHOE¹ 1). Hence some later writers have applied the name mangrove-tree to the Mahoe.

2. Applied, on account of similarity of habit and appearance, to various other plants. a. Any tree or shrub of the genus *Avicennia* (N. O. *Verbenaceæ*), esp. the white mangrove (*A. officinalis*) found in Brazil and Australasia, and the black or olive mangrove (*A. nitida*) of tropical America and Africa. b. button mangrove, a small W. African tree, *Conocarpus erectus* (N. O. *Combretaceæ*). Also called *Zaragoza mangrove* (*Treas. Bot.* 1866). c. white mangrove, *Laguncularia racemosa* (N. O.

Combretaceæ), found in the West Indies. d. In Australasia (see Morris *Austral Eng.* 1898) used with various qualifications in the names of certain plants indigenous or cultivated there, as milky mangrove, *Excoccaria Agallocha* (N. O. *Euphorbiaceæ*); native mangrove (in Tasmania), a leguminous tree, *Acacia longifolia*; red mangrove (see also 1), *Heritiera littoralis* (N. O. *Sterculiaceæ*); river mangrove, an East Indian tree, *Ægiceras majus* (N. O. *Myrsineæ*), naturalized in Australia; rope mangrove, *Hibiscus arboreus*.

-*mania*, a terminal element, repr. Gr. *μανία* MANIA in composition.

There were in Gr. a few compounds in *-μανία* (rare and chiefly post-classical), expressing the general sense 'a certain kind of madness', or 'the state of being mad after some object', and corresponding as nouns of quality or condition to the related adjs. (a much more frequent formation) in *-μανής* = 'mad'. Examples are *γυναικομανία* mad passion for women, *ἔρωτομανία* love-madness, *ἵππομανία* mad love for horses, *ὕδρομανία* 'water-madness', hydrophobia. In the 16th and 17th c. a number of quasi-Greek compounds, denoting species of mania, were invented and used in medical Latin, and some of these, as *nymphomania*, have been adopted in Eng. Other technical or quasi-technical words, formed in the 19th c., are *kleptomania*, *lypomania*, *megalomania*. In the 17-18th c. the currency of *F. manie* in the sense of a 'craze' or passion (e.g. for some pursuit, or the collection of some class of objects) suggested the formation of a number of quasi-Gr. compounds such as *bibliomanie* mania for books, *métromanie* mania for metre, *mélomanie* mania for song; and hybrid formations such as *Anglomanie* mania for things English, *tulipomanie* mania for tulips. Several of these words have been adopted in Eng. with the ending *-mania*, and in the 19th c. it became somewhat common to invent nonce-words with this ending. Examples are *bancomania*, a craze for establishing banks; *Graïomania* [L. *Grai-us* Greek], passion for things Greek; *Italomania*, wild enthusiasm for Italy; *Queenomania*, (applied by Southey to the popular devotion to the cause of Queen Caroline); *scribbleomania*, a craze for scribbling. The sbs. in *-mania* have, actually or potentially, correlative sbs. in *-maniac*; the words in *-MANE* are of rare occurrence, and are viewed as Gallicisms.

(For a later interpretation of its symbolism see *quot. c* 1532.)

The words used on putting on the maniple, 'Merear, Domine, portare manipulum fletus et doloris', look like a reminiscence of Ps. cxxv[i]. 6 (Vulg.), and it seems possible that the term may have originated from this formula. (So, as one of several suggestions, in Durandus *Rationale* III. vi, *De Manipulo*; he explains 'manipulus' as = *præmium*.)

manna¹ ('mænə). Also 1 *monna*, 2-3 *manne*, 4 *mana*. [a. late L. *manna* neut. indecl. (later also fem. a stem), a. Hellenistic Gr. *μάννα* neut. indecl. (LXX and N. T.), ad. (? through Aramaic *mannā*) Heb. *mān* (whence Gr. *μάν*, L. *mana*, occurring more frequently than the longer form in the LXX and Vulgate O. T.: see MAN *sb.*³).

G. Ebers (*Durch Gosen zum Sinai*), gives plausible reasons for believing that the Ancient Egyptian *mannu* denoted the exudation of *Tamarix gallica*. As the Arab. *mann* has the same sense, it seems possible that the Heb. word may represent the name anciently current in the Sinaitic wilderness for this natural product, which in many respects agrees with the description of the miraculous manna, and which is still locally regarded as a dew falling from the sky.

The etymological tradition or conjecture preserved in Ex. xvi. 15 represents the word as having originated from the question *man hū?* 'what is it' (in Aramaic or supposed archaic Heb.), which grammatically admits of being interpreted 'It is mān'. (Cf. the Vulgate, l. c.: Dixerunt ad inuicem: Manhu, quod interpretatur, 'quid est hoc?')

The word has been adopted in most versions of the Bible, and appears in figurative uses in the literature of most of the countries of Christendom. Cf. Goth., OHG. (MHG., mod.G.), Du., Sw., It. *manna*, F. *manne*, Sp. *maná*, Pg. *maná*.

Whether the Gr. *μάννα*, L. *manna*, fem., meaning a grain of frankincense (sense 9 below), is connected with this word is uncertain, though an oriental origin for it is probable.]

mannerism ('mænərɪz(ə)m). [f. MANNER *sb.*¹ + -ISM. Cf. F. *maniérisme* (Littré *Suppl.*.)]

a. Excessive or affected addiction to a distinctive manner or method of treatment, *esp.* in art and literature. *spec.* (freq. with capital initial) applied to a style of art which originated in Italy c 1520 and preceded the Baroque, characterized by stylistic exaggeration in figure and composition, etc.

Apart from the generalized use illustrated below, the term has been used (a) of the followers of Michelangelo, Raphael, etc., as Bronzino, Pontormo, the Zuccari, etc. (mainly a 19th-c. use), (b) from c 1920 under the influence of M. Dvořák and W. Friedländer applied without pejorative associations to Italian art, in particular, from c 1520 to c 1590. Sense (b) is first found in English in the 1930s.

3. a. A unit of English territorial organization, originally of the nature of a feudal lordship.

The doctrine of the lawyers of the 17th c. is that a manor consists essentially of land held in demesne by the lord, to which is attached a seignory over freehold tenants sufficient in number (the minimum is variously stated as two or three) to constitute the court, called at a relatively late time the court-baron, which the lord is bound to hold and the tenants to attend. (The manor was often defined from the point of view of its relation to the lord, as an estate in land consisting of demesnes and services.) This restriction of the meaning of the word is destitute of early authority (though the kind of complex estate described probably existed from the 12th century), but is the basis of the present application. As the status of tenant in fee under a mesne lord is practically obsolete, a manor now consists of the lord's demesne (if any exists) and of lands from the holders of which he has the right to exact certain fees and fines, and within which he has certain privileges. A 'court customary' is held in all manors where there are copyhold or customary tenants of the demesne. A manor is usually named from the principal township, as 'the manor of Barnstaple'.

d. In some of the American colonies, authority was given by royal charter for the creation of 'manors' after the English model, with courts-baron and seigniorial rights. The Dutch governors of what is now the State of New York also granted 'manors', with certain hereditary privileges now abolished. (See quot. 1870 and *PATROON* 4.) The term still continues to be applied to certain districts in the U.S. which were 'manors' in colonial times.

2. *Law.* A species of criminal homicide of a lower degree of criminality than murder; now defined as criminal homicide without malice aforethought.

In etymological meaning there is no difference between *manslaughter* and *homicide* (L. *homicidium*, F. *homicide*, both used in early Eng. law-books). In its modern technical use, *manslaughter* corresponds generally to the 'simple homicide' of early Law French and Law Latin writers, which was used in contradistinction to 'murder' (though the distinction is not identical with the modern one), and ordinarily implied criminality.

According to the modern interpretation, *manslaughter* is committed when one person causes the death of another either intentionally in the heat of passion under certain kinds of provocation, or unintentionally by culpable negligence or as a consequence of some unlawful act.

In Scotland the term corresponding to *manslaughter* is 'culpable homicide'.

A special group of senses taken from the Fr. is now distinguished by the spelling MANTEL.

According to most philologists, the *L. mantellum* cloak is more correctly written *mantēlum*, and is etymologically identical with *mantēlum*, *mantēlum*, *mantilium*, *mantēle*, *mantile* table-cloth, towel. (Cf. *Sp. manteles* pl., table-linen; also MANTEEL.) One of the three major layers composing the earth, extending from the bottom of the crust (at a depth of about 30 km.) for about 2,900 km. to the boundary with the region beneath (the core), and differing from the crust and the core in physical properties (esp. density) and in chemical composition.

Orig. not distinguished from the crust (see quots. 1940, 1955).

1940 R. A. DALY *Strength & Struct. Earth* i. 1 The earth contains a spheroidal core. . . The rest of the planet, beneath ocean and atmosphere, . . . may be distinguished as a whole by the name 'mantle'. *Ibid.* 21 At the depth of about 2,900 kilometers . . . there is . . . an interface or rapid transition between the earth's silicate mantle and its 'iron' core. 1955 *Sci. Amer.* Apr. 24/2 Outside the liquid outer core is a mantle of solid rock some 2,900 kilometers thick, which approaches to within 40 kilometers of the earth's surface under the continents and to within 10 kilometers under the oceans. The thin rocky skin surrounding the mantle is the earth's crust. No drill has penetrated the earth's crust deeper than a few kilometers.
