9. A very small Roman bronze (or occas. silver) coin, usu. produced locally. Pl. *minimi*, *minims*.

1896 *W. C. HAZLITT Coin Collector* ix. 247 *Minim*, a term which, for want of a better one, has been assigned to a class of bronze money of Roman type, probably of the fourth or fifth century B.C., which may have been of local or provincial origin, and is of unusually small module. 1935 *Discovery* July 196/2 A hoard of 800 minims, small coins in some cases not more than 5 mm. in diameter, buried beneath the floor of the stage. 1962 *C. minim, variant of MENNOM, minnow.

minimal ('mɪnɪməl), *a.* [f. L. *minim-us* smallest, least (see MINIM) + -AL.]

a. Extremely minute in size; of the nature of or constituting a minimum; of a minimum amount, quantity, or degree; that is the least possible.

1666 *G. HARVEY Morb. Angl.* x. 89 Choler being set on fire, and acting upon Melancholy, or rather calcining it into small acuated minimal bodies. 1878 *Smithsonian Rep.* 367 The strength of which [elements of an electric battery] was reduced so as to produce a minimal contraction. 1891 *Brit. b. spec. Linguistics. (*a*) Distinguished only by a single feature; usu. applied to a pair of similar forms; (*b*) other uses (see quots.).

(*a*) 1939 *Amer. Speech* XIV. 122 Words can be distinguished by the minimal opposition of vowel nasality and [n]. 1942 *C. F. HOCKETT in Language* XVIII. 7 The term 'contrastive pair', meaning any pair between which there are differences in a context of similarity, any pair usable for the listing of features, is used here instead of the traditional term 'minimal pair'. 1950 *D. JONES Phoneme* vi. 15 When a distinction between two sequences occurring in a language is such that any lesser degree of distinction would be inadequate for clearly differentiating words in that language, the distinction is termed a 'minimal one'. . . Minimal distinctions are very commonly effected by the addition or subtraction of a phoneme. 1955 *C. F. HOCKETT Man. Phonol.* vi. 212 Before analysis is complete, one cannot be certain that a given pair is 'minimal' in a strict phonologic sense—that there is but a single difference, at the level of ultimate phonologic constituents. 1961 *H. A. GLEASON Introd. Descr. Ling.* (ed. 2) i. 16 In calling *bill* and *pill* a minimal pair we assume that they differ by only one phoneme. 1964 *R. A. HALL Introd. Ling.* 81 Minimal pairs are not essential to show that two sounds do not belong to the same phoneme. 1971 *Archivum Linguisticum* II. 48 In the days of 'classical' phonemics much play was made of the 'minimal pair' in order to establish throughout a language such lexical differences as those between *pin*, *bin*, *tin*, *din*, [etc.].

(*b*) 1930 *H. E. PALMER Princ. Romanization* 52 We may designate by the term *monophone* any phone of the first or second degrees of abstraction of which the concrete members are so similar in point of production and of acoustic effect even when observed by a competent observer, that it may be regarded as a minimal unit of pronunciation (i.e. practically insusceptible of subdivision). 1941 *G. L. TRAGER in L. Spier et al. Lang., Culture & Personality: Ess. in Memory of E. c. In *Art*, used of a form of painting and sculpture which is characterized by the use of simple or primary forms, structures, etc., often geometric and massive.

[1958 *Listener* 23 Oct. 647/2 Creating huge, minimal forms with the palette knife in a few colours.] 1965 *R. WOLLHEIM in Arts Mag.* Jan. 26 In a historic passage Mallarmé describes the terror, the sense of sterility, that the poet experiences when he. . . confronts the sheet of paper. . . and no words come to him. . . Why could not Mallarmé, after an interval of time, have simply got up from his chair and produced the blank sheet of paper as the poem which he sat down to write? . . . Such a gesture. . . would provide us with an extreme instance of what I call minimal art. 1967 *C. GREENBERG in E. Lucie-Smith Movements in Art since 1945* (1969) i. 13 The working out of this problem, whose solution seems to have arrived in the form of what is called Primary Structures, ABC, or Minimal Art. 1969 *Britannica Bk. of Year* (U.S.) 800/2 *Minimal sculpture*, sculpture in the idiom of minimal art. 1969 *Time* 3 Jan. 42 Minimal forms still

d. In *Music*, used of a form of composition which is characterized by the repetition of short phrases incorporating changes very gradually as the music proceeds.

NYMAN Experimental Mus.* vii. 119 (heading) Minimal music, determinacy and the new tonality. *Ibid.* 144 As in the American minimal music so all the workings of the process are easy to follow audibly. 1980 *New Grove Dict. Mus.* XVIII. 481/2 Systematic, or 'minimal', music may consist of extended reiterations of a motif or group of motifs. . . Alternatively, the element of repetition may be governed by a system: the progressive lengthening of the repeated material. . . changing discrepancies from simultaneity. . . or large-scale rhythmic schemes based on integers. 1985 *Radio Times* 20 July 85/1 It is indeed hard to see how such a gigantic work. . . can be considered 'minimal' in any way.

minimalist ('mɪnɪməlist), *sb.* and *a.* [f. MINIMAL *a.* + -IST, or (in sense 1) ad. F. *minimaliste*, tr. Russ. *men'shevik* MENSHEVIK *a.* and *sb.*]

A. sb. 1. (Also with capital initial.) = MENSHEVIK *sb.*; more widely, a person who advocates small or moderate reforms or policies.

1907 *I. ZANGWILL Ghetto Comedies* 408 'Ah, you're a Maximalist,' said the beadle. 'No, I am only a Minimalist. I merely want the minimum—that we save our own lives.' 1917 [see BOLSHEVIK *sb.*]. 1918 *E. P. Reg.* 1953 153 There were the 'maximalists' (Germany and the Netherlands), . . . and the 'minimalists' (France) who wanted the E.P.C. to be little more than a system of inter-governmental association and co-operation.

2. *Art.* A practitioner or proponent of minimal art (MINIMAL *a. c*).

1967 *C. GREENBERG in E. Lucie-Smith Movements in Art since 1945* (1969) i. 13 The Minimalists appear to have realized. . . that the far-out in itself has to be the far-out as an end in itself. 1973 *Phaidon Dict. 20th Cent. Art* 254/1 The immediate predecessors of the Minimalists were Ad Reinhardt and Josef Albers, who brought to their canvases the 'exclusive, negative, absolute, and timeless' quality so desired by the Minimal artists.

3. *Mus.* A composer of minimal music (MINIMAL *a. d*).

1982 *N. Y. Times* 23 Nov. c11 Mr. Gibson, who. . . has also worked with Steve Reich, Philip Glass and other 'minimalists'.

John Adams.

Hence *minimalism*.

1969 *Manch. Guardian Weekly* 1 May 20 Call it minimalism if you like, but the real point is that the thing insists on being just itself and nothing more. 1977 *New Wave Mag.* vii. 12 Numbers are fast and slow. Some are only about thirty seconds long. This ain't minimalism. It's a sense of humour. 1985 *Radio Times* 20 July 85/1 In the 1960s he [sc. Steve Reich] began exploring the musical effects of repeated musical patterns that incorporate gradual changes over an extended period. The style came to be called minimalism.

minimality ('mɪnɪmələti). [f. MINIMAL *a.* + -ITY.]

1. *Linguistics.* The quality or character of being minimal.

1953 *C. E. BAZELL Ling. Form* i. 10 The criterion of minimality is fulfilled in either case. 1963 *J. LYONS Structural Semantics* ii. 29 What can be done, however, is to apply the criterion of minimality after the establishment of the several meaning-relations between sentences in context. 1969 *Word* XXV. 235 Because of the minimality requirement in the definition of the morpheme, the second class is not equivalent to a class of bound morphemes.

2. = MINIMALISM 2.

1969 *E. LUCIE-SMITH Movements in Art since 1945* viii. 242 Judd's colleague, Robert Morris, defends minimality in equally emphatic terms.

4. Ecclesiastical and religious uses.

a. In Pre-Reformation English, applied to a person in orders officially charged with some

function in the celebration of worship in a particular church, chapel, chantry, etc. In the rubrics of the Book of Common Prayer the word denotes the clergyman, or any of a number of clergymen, engaged in conducting worship on a particular occasion.

Then shall the Priest say the Lord's Prayer.

b. In phrases such as *minister of the church*, *of the gospel*, and the scriptural phrases *minister of God*, *of Jesus Christ*, *of the sanctuary*, applied as general designations for a person officially charged with spiritual functions in the Christian Church. Hence from the 16th c. onwards (after the example of foreign Protestant, esp. Calvinistic, use) employed *absol.* in the same sense, at first chiefly by those who objected to the terms *priest* and *clergyman* as implying erroneous views of the nature of the sacred office. The use of *minister* as the designation of an Anglican clergyman (formerly extensively current, sometimes with more specific application to a beneficed clergyman) has latterly become rare, and is now chiefly associated with Low Church views; but it is still the ordinary appellation of one appointed to spiritual office in any non-episcopal communion, esp. of one having a pastoral charge. The term *minister of religion*, as applied to a 'clergyman' or 'minister' of any religious denomination, is common in official use.

1. A kind of fur used as a lining and trimming in ceremonial costume.

French lexicographers say that *menu vair* is the fur of the *petit-gris*, a variety of the common squirrel. What the Eng. *miniver* meant in early use is uncertain; some have supposed that it was the white fur of the Siberian squirrel; the application may have varied at different times, but etymology would suggest that it must have been an artificially spotted or variegated fur, with a smaller pattern than that of *vair*. In 1688 R. Holme explains *miniver* as 'plain white fur', and this (notwithstanding Cotgrave's divergent explanation) may have been the meaning of the word as used with reference to the costume of judges and the lower nobility in the 16-17th c. In this sense the term was revived in the official regulations for the coronation of Edward VII, and it has since had some currency in the description of the ceremonial costume of peers.

pured miniver, *miniver pure* = AF. *meniver puré*, 'powdered miniver'; but in modern times the adj. has been misinterpreted as 'pure white'.

¶ Recent Dicts. attribute to the word the sense that belongs to *menu vair* in Fr. heraldry, viz. a fur distinguished from *vair* in that the shield *menu vair* has six rows of spots instead of four. But this use has never been recognized in English heraldry.

An inhabitant of Minoan Crete or other parts of the Minoan world. b. The language or scripts associated with the Minoan civilization. Hence *Minoanization*; *Minoanized*, *Minoanizing* *adjs.*

The precise chronology of the successive phases and of the collapse of Minoan civilization is highly controversial.

2. a. In early use (i.e. down to the end of the 16th c.), a general designation for any one whose profession was to entertain his patrons with singing, music, and story-telling, or with buffoonery or juggling. In modern romantic and historical use commonly with narrowed and elevated application: A mediæval singer or musician, esp. one who sang or recited, to the accompaniment of his own playing on a stringed instrument, heroic or lyric poetry composed by himself or others; *spec.* one of the Old English period.

The use of the word in romantic poetry and fiction has so coloured its meaning that the application to a mere jester, mountebank, or conjuror, originally common, would now seem inappropriate.

minus ('mainəs), quasi-*prep.*, *adv.*, *a.*, and *sb.* Also 5 mynus. [a. L. *minus* neut. of *minor* less: see MINOR *a.*

The quasi-prepositional use (sense 1), from which all the other Eng. uses have been developed, did not exist in Latin of any period. It probably originated in the commercial language of the Middle Ages. In Germany, and perhaps in other countries, the Latin words *plus* and *minus* were used by merchants to mark an excess or deficiency in weight or measure, the amount of which was appended in figures. The earliest known examples of the modern sense of *minus* are German, of about the same date as our oldest quotation. In Widmann's book on commercial arithmetic (1489) the signs (-) and (+) occur for the first time in print, and are directed to be read as *minus* and *mer*. In the *Bamberger Rechenbuch* (1483) the tare to be deducted from the weight of a package is called *das Minus*. In a somewhat different sense, *plus* and *minus* had been employed in 1202 by Leonardo of Pisa for the excess and deficiency in the results of the two suppositions in the Rule of Double Position; and an Italian writer of the 14th c. used *meno* to indicate the subtraction of a number to which it was prefixed. For the passages referred to, see Cantor, *Vorlesungen über Geschichte der Mathematik* II. (ed. 2, 1899).

The origin of the symbol (-), read as *minus*, is disputed; some have conjectured that it arose as a merchants' mark, while others believe it to descend from the *obelus* (see OBELISK 2) used by ancient critics to indicate that a passage should be removed from the text. It has certainly no historical connexion with the mark ϕ (explained as the letter ψ inverted) used by Diophantus for the same purpose. In Denmark the sign (+) is used for *minus*.]

minute ('mɪnɪt), *sb.*¹ Forms: 4 mynut, 4-6 mynute, 4-7 minut, 5 mynwet, mynnate, 6 mynite, -ewte, -iute, *Sc.* minuth, munet, -it, 6-8 mynuit, 7 min-, mynutte, minit, minnite, 4- minute. [In senses 1-3 and 6 a. F. *minute* fem. (whence G. *minute*, Du. *minuut*), ad. L. *minūta*, subst. use of the fem. of *minūtus* MINUTE *a.* In senses 4 and 5 ad. L. *minūtum* (the neuter of the same adj.) used subst. in various applications in late Latin. Sp., Pg. and It. have *minuto* masc. (ad. L. *minutum*) in senses 1-3, but *minuta* (after Fr.) in sense 6.

Senses 1-2 (whence sense 3 is derived) represent the med.L. *minuta*, more fully *pars minuta prima*, denoting the $\frac{1}{60}$ of a unit in the system of sexagesimal fractions (med.L. *minutia physica*), which, originally derived from Babylon, was used, like the modern decimals in scientific calculations as more easy to handle than 'vulgar fractions' (*minutia* simply). The lower denominations of the system were (*pars minuta*) *secunda* (our 'seconds'), *tertia*, *quarta*, etc., the understood denominators being the successive powers of 60. The system ($\delta\tau\eta\varsigma\ \xi\eta\eta\kappa\omicron\upsilon\tau\acute{\alpha}\delta\omicron\varsigma\ \tau\rho\acute{\omicron}\pi\omicron\varsigma$) was recognized by Ptolemy (c150 A.D.), who applied it to the degree ($\mu\omicron\iota\rho\alpha$) of the circle, to the sixty sections into which he divided the radius, and to the day; the application of the system to the division of the hour is much later, perhaps not earlier than the 13th c. Ptolemy has no terms corresponding to the med.L. *minuta*, *secunda*, etc., but merely uses $\mu\epsilon\rho\omicron\varsigma$ 'part' or $\xi\eta\eta\kappa\omicron\upsilon\tau\acute{\alpha}\nu$ 'sixtieth'. The word *minuta* is referred to as a term of the 'mathematici' (app. meaning 'minute' of the circle) by St. Augustine *De diversis Quaest. octoginta tribus* xlv, who also mentions *minuta minutarum*, 'minutes of minutes' (see 2), i.e. seconds.

Sense 6 is from F. *minute*, though Littré has no example before 16th c., and the one quot. for med.L. *minuta* in this use is of date c1500. The primary notion seems to be that of a rough copy in small writing (L. *scriptura minuta*) as distinguished from the 'engrossed' document.]

I. A sixtieth (or other definite part) of a unit.

1. *a.* The sixtieth part of an hour (divided into sixty seconds). In earlier use frequently † *minute of an hour*, † *minute while*. Also, one of the lines upon a dial which mark the minute spaces.

The *minutum* of early mediæval writers, which was one-tenth of an hour, has no historical connexion with this. For the system of time-reckoning to which it belongs, see ATOM *sb.* 7.

1. a. A marvellous event occurring within human experience, which cannot have been brought about by human power or by the operation of any natural agency, and must

therefore be ascribed to the special intervention of the Deity or of some supernatural being; chiefly, an act (e.g. of healing) exhibiting control over the laws of nature, and serving as evidence that the agent is either divine or is specially favoured by God. Phrases, *to do*, † *make*, *work*, † *show a miracle*.

The L. *miraculum* in this sense, though common in patristic and later theology, is foreign to the Vulgate, in which the Gr. words rendered 'miracle' in the English Bible — *σημείον* 'sign', *τέρας* 'wonder', *δύναμις* 'power' or 'mighty work', are translated respectively by *signum*, *prodigium*, and *virtus*.

If the word is the formal equivalent of Sw. *myra* (OSw. also *myr*), Da. *myre*, the OTeut. type may have been either **meuzjōn*- (= Welsh *myzïon*, ants) or *miurjōn*, related by ablaut to ON. *maur-r* (Norw. *maur*, OSw. *mör*) whence the synonymous northern ME. MAUR. Another hypothesis is that the Eng. and LG. forms represent an OTeut. **mirōn*-, unconnected with the Scandinavian words and not otherwise found exc. perh. in the doubtful Crim-Goth. *miēra*; some scholars would refer this to the root **mig*- (see MIG), so that the etymological notion would be the same as that in the synonymous LG. *mig-ente* (Woeste), *mig-zmeken* (Schambach); if so the compound PISMIRE expresses the idea twice over. Outside Teut. several langs. have names for the ant of similar sound to the Teut. words here mentioned, though the difficulties in the way of admitting etymological connexion have not yet been removed: cf. mis, obs. form of MISS *sb.*¹ and *v.*¹

Mis, M^{is}, obs. abbreviations of *mistris*, MISTRESS.

mis- (mis), *prefix*¹ (also 1 (*rare*), 2-7 *miss-*, 3-6 *mis-*, *mysse-*, 3-7 *mys-*, 4-5 *mes-*), represents OE. *mis-* = OFris. *OS. mis-* (MDu. *mis*(se)-, *mes*(se)-, Du. *mis-*), OHG. *missa-*, *missi-*, *mis-*, *mes-* (MHG. *mis*(se)-, G. *miss-*), ON. *miss-*, Goth. *missa-* (in *missadæps* MISDEED, *missaleiks* different, various, see MISLICH, and *missaquis* 'speaking diversely', disagreement, tr. Gr. *σχημα*):—O Teut. **misso-* (whence **missjan* MISS *v.*), repr. a pre-Teut. formation with ppl. suffix -to on a root ending with a dental. The adj. **misso-* seems to have had two senses: (1) divergent, astray, (2) mutual, alternate (cf. Goth. *missō* mutually). The first of these supports the identification of the root with the Teut. **mip-* to avoid, conceal (see MITHE *v.*); the

two senses may be accounted for by the supposition that the primitive notion expressed by the root was that of difference or change. Phonologically, the Teut. root might represent a pre-Teut. form either with *t* or *th*. On the former view, some scholars regard it as cogn. w. L. *mittēre* to send, let go; but the sense seems too remote. On the other assumption, it would be cognate with Skr. *mith* 'to meet as friend or antagonist, alternate, engage in altercation' (M. Williams), *mithu* 'alternately, falsely, wrongly', *mithas* 'mutually, reciprocally, alternately', *mithya* 'invertedly, contrarily, incorrectly, wrongly'; cf. OS. *mitē*, *miusū* alternately. The root **meith-* in these words is by some regarded as an extension of **mei-* to change: see MEAN *a.*¹

In OE. and ME. MSS. the compounds of *mis-* (as of other prefixes) are written sometimes as two words, sometimes continuously, the hyphen being never used. From the 16th c. onwards the compounds are regularly printed as one word, with or without the hyphen, which becomes, however, less and less frequent, and is now employed chiefly in new or rarely-used formations, and in words like *mis-say* or *mis-cite*, where its omission would tend to disguise the identity of the compound or suggest a wrong pronunciation. (In Sir T. More's Works 1557, the spelling of the compounds as two distinct words was retained, e.g. *misse remember*, *mysse rule*.) The spellings *mispel*, *mispend*, etc. for *mis-spell*, *mis-spend*, etc. were once common and are found as late as the end of the 18th century.

The predominant meaning of the prefix in English, as in the other Teutonic languages, is that of 'amiss', 'wrong(ly)', 'bad(ly)', 'improper(ly)', 'perverse(ly)', 'mistaken(ly)', and this is the only one now recognized in the formation of new compounds. But even in OE. there are instances of its use as a mere negative prefix and also as a pejorative intensive with words of sinister meaning (see 7 and 8 below).

In early ME. a great extension of the use of the prefix took place, *mis-* being freely combined with words of indigenous and of foreign origin alike. Many of the new compounds appear to have been suggested by French formations with *mes-* (see MIS⁻²); thus we have *misbelieve* after OF. *mescreire* (mod. *mécroire*), *misfortune* and *misshap* after OF. *mescheance* (see MISCHANCE); a word like *misjudge* has prob. a double origin, being partly of native formation, and partly an adaptation of OF. *mesjurer*. The most prolific period for the formation of *mis-* compounds was the 17th c., to which a considerable number of those illustrated in this article belong; Bacon, Donne, and Bp. Hall are noteworthy as employing them largely. They still continue to be formed with considerable freedom, but in certain cases *ill-* and *mal-* are now preferred where writers of earlier periods would have preferred *mis-*.

In the ME. period *mis-* became to some extent a separable prefix; thus we have *inumen mis* and *misnumen*, *don mis* and *misdon*, *seyn mis* and *misseyne*, side by side. (See further under MIS *a.* and *adv.*) Even as late as the 16th c., the prefix was sometimes co-ordinated with an adj. or adv., as in the example *very erroneouse and misopinions* (see MISOPINION). A related phenomenon, of which an instance is found as late as the 17th c., consists in the dropping of the prefix before the second of two compounds coupled together, e.g. *ich abbe misseien mid egen*, *mid mine eren iherd* (Lamb. *Hom.* p. 189), *myslyuyng and techynge* (Wyclif), *mis gyed and led*, *yee mis happe and cheewe* (Hoccleve), *for thou hast mis-said or done* (J. Davies *Ecl.* 1614).

In OE. *mis-* was prefixed to verbs, active and passive participles, nouns of action and condition, and adjectives. In ME. its composition with agent-nouns and adverbs followed as a matter of course, and the principle of prefixing it to any word of the above classes, existing either actually or potentially, became soon established. Hence, in a group of formally related words such as *misrepresent* vb., *misrepresentation*, *misrepresentative* adj. and *sb.*, *misrepresentatively* adv., *misrepresenter*, *misrepresenting* vbl. *sb.* and *ppl. a.*, it is possible (unless there is historical evidence to the contrary) that each member may have been formed independently of any of the others.

All those compounds of *mis-* with respect to which there is evidence of a continuous history during any period, or which belong to a group, are treated in their alphabetical places. Those illustrated in the present article are for the most part nonce-words of obvious meaning.

1. Prefixed to verbs, with the meaning 'amiss', 'badly', 'wrongly', 'perversely', 'mistakenly'.

In OE. about 40 of such compounds are recorded, of which less than half are represented in ME. or MOD. E. (see MISBEDE, MISDO, MISFARE, MISFERE, MISLEAD, MISLIKE, etc.).

As now apprehended, the prefix normally implies not censure of the act itself, but only of its manner. With this restriction, nonce-words may be formed very freely. In the 17th c. the use was much wider, and many of the formations of that period would now be inadmissible.

b. In the 14-16th c. a few verbs like MISDEEM, MISTHINK, in which the prefix had originally its normal function, developed new senses in which it had the force of 'unfavourably'. Then also arose a few new formations, such as MISBODE, MISDOUBT, MISDREAD, in which mis- was prefixed to a verb expressing suspicion or fear, in order to render more fully the notion of uneasy feeling contained in the vb. These new senses and combinations, however, now survive only as *arch.* or *dial.*

9. The existence of pairs of words like *misbelieve* and *disbelieve*, *mislike* and *dislike* gave rise to confusion between the prefixes and to the (often unmeaning) substitution of *mis-* for *dis-* (and even *des-*), as in †*misguise*, †*mismay*. To the same confusion are due the dial. *misdain*, *misdainful* (after *disdain*), *miscry* for *descry*, and *mislest*, corruption of *molest*; also the obs. *mislaundre* for *dislaundre* DISCLANDER.

mis- (mis), *prefix*² (Forms: 3-5 *mes-*, 4 *mess(e)-*, 4-5 *myss(e)-*, 3- *mis-*) in compounds adopted from French represents OF. *mes-* (mod.F. *més-*, *mes-*, *mé*) = Pr. *mes-*, *mens-*, Sp., Pg. *menos-*, OIt. *menes-*, *minis-*, It. *mis-* (also med.L. *mis-*):—Com. Rom. *minus-*, a use of L. *minus* adv. 'less, not', as a prefix with the signification 'bad(ly)', 'wrong(ly)', 'amiss', and with negative force, in comb. with verbs, adjectives, and nouns.

The list of words derived immediately from OFr. compounds of *mes-* is not large, the most important being MISADVENTURE, MISCHANCE, MISCHIEF, MISCONTENT, MISCREANT, MISEASE, MISNOMER, MISPRIZE; but the number due directly or indirectly to the influence of such compounds is prob. much larger (cf. MIS⁻¹). In English the prefix became ultimately identical in form (as it was in meaning) with MIS⁻¹.

Mischief, *mischievous*, and *miscreant* are the only compounds of MIS⁻² having the stress on the prefix. This is due to the fact that they early ceased to be felt as compounds, and while they followed the rule of stress-change in French-derived words, *mischance* and the rest fell under the influence of the native compounds of MIS⁻¹, and so have their stress on the root.

mis-, *prefix*³: see MISO-.

When expelled from 12 to 28 weeks it is called a late abortion and from 28 to 36 weeks it is said to be premature termination of pregnancy. Many laymen still associate the word abortion with illegal interference and prefer to call a spontaneous termination of pregnancy a miscarriage. The nurse should be guided accordingly. 1970 *Sci. Jrnl.* June 75/2 Most hospitals regard the loss of a pregnancy before 20 weeks as a miscarriage. 1971 RUGH & SHETTLES *From Conception to Birth* (1972) x. 157 There are generally signs of an impending miscarriage (another term

for a spontaneous abortion). 1974 PASSMORE & ROBSON *Compan. Med. Stud.* III. xlii. 1/2 Abortion may be defined as the termination of pregnancy before the fetus is viable. In Britain this is considered to be before the 28th week of pregnancy. However, fetuses expelled before the 28th week occasionally survive, and to allow for this possibility the 20th week is sometimes used as the watershed between viability and non-viability. . . In many North American centres abortion is defined as the expulsion of a fetus weighing less than 500 g. A precise definition is required for medico-legal purposes and in Britain abortion means the termination of pregnancy before the 28th week. Miscarriage is synonymous with abortion and is often more acceptable to the lay public.

b. *misprision of treason, of felony*: originally, an offence or misdemeanour akin to treason or felony, but involving a lesser degree of guilt, and not liable to the capital penalty. As various statutes enacted that concealment of a person's knowledge of treasonable actions or designs should be regarded as *misprision of treason*, this term came to be used as the ordinary designation for such concealment.

Hence it was often supposed that the word *misprision* itself expressed the sense of 'failure to denounce' a crime. This imagined sense Sir E. Coke (followed by Blackstone) attempted to account for etymologically, assuming that the

word was derived from the OF. *mespris* (mod.F. *mépris*: cf. MISPRIZE *sb.*¹ and *v.*¹) neglect, contempt.

miss (mis), *sb.*¹ Forms: 3-6 mis, mysse, 3-7 misse, 4-5 mys, (5 myss, 6 myshe), 6- miss. [Partly f. MISS *v.* 1; but other formations (likewise from the OTeut. **misso-*) seem to have coalesced with this. In the sense of 'loss' (branch I) the

word may partly represent OE. **miss* neut., 'absence, loss' (Sweet *Anglo-Saxon Dict.*), or be ad. ON. *missi-r* masc. or *missa* fem., 'loss'. In some of the earlier examples of branch II (fault, mistake) the word appears to have been evolved (like MIS *adv.*) from the resolution of compounds of MIS-*prefix*; of similar origin are MHG., MLG., MDu. *mis*se mistake, ill-success, Du. *mis* error. In the sense of 'missing a mark', etc. (branch III) it has not been found earlier than the 16th c., and may be purely a late formation on the verb; cf., however, early mod.Du. *mis*se 'vanus ictus, jactus' (Kilian), which was developed from the adverbial use in *mis*se slaan, to miss one's stroke. Cf. also ON. *á mis* *adv.*, so as to miss or fail to meet, whence the ME. *on mis* (see 4 below), later AMISS *adv.*, is prob. adopted.]

miss (mis), *sb.*² [Shortening of MISTRESS.]

Probably this oral shortening may have been suggested by the written abbreviations 'Mis.' and 'M^s' (the latter representing the spelling *mistris*) which were common in the 16-17th c. In the following quotes it is not quite certain that 'Mis' is not a mere graphic abbreviation.

2. Prefixed as a title to the name of an unmarried woman or girl (not entitled to the prefix 'lady' or some higher designation of rank).

In modern use, when *Miss* is prefixed to the surname alone, e.g. *Miss Smith*, it normally indicates the eldest (unmarried) daughter of the family; in referring to the others the Christian name is employed, e.g. *Miss Ethel (Smith)*. (But for reasons of convenience the Christian names are often inserted or omitted without regard to this rule.) When the title is applied to several persons of the same name at once, usage sanctions two forms, viz. *the Misses Smith* and *the Miss Smiths*, the former being regarded as grammatically the more proper.

mister ('mɪstə(r)), sb.² Also 6 myster. [See MASTER sb.¹ 22, note.]

1. a. Used as a title of courtesy prefixed to the surname or Christian name of a man (not entitled to be addressed as 'Sir' or 'Lord'), and to designations of office or occupation.

The word in mod. use may be best described as the oral equivalent of the written prefix MR. (q.v. in its alphabetical place). In writing, the unabbreviated form is now used only with more or less of jocular intention; in a passage like quot. 1854 in d, most persons would now write 'Mr.' (with inverted commas).

1. *a.* Originally, a Flemish copper coin of very small value; according to some early Flemish writers, worth $\frac{1}{3}$ of a Flemish penny, though other, chiefly smaller, values are also mentioned. In Eng. use mainly as a proverbial expression for an extremely small unit of money value. In books of commercial arithmetic in 16-17th c. it commonly appears as the lowest denomination of English money of account, usually $\frac{1}{24}d$, but sometimes $\frac{1}{32}d$, and sometimes $\frac{1}{12}d$; it is, however, unlikely that the word was ever in Eng. mercantile use. From the 14th c. *mite* has been the usual rendering (though the Wyclif versions have 'mynutis') of L. *minūtum* (Vulg.), Gr. *λεπτόν* in Mark xii. 43, where two 'mites' are stated to make a 'farthing' (Gr. *κοδράντης*, L. *quadrans*); hence the word was popularly taken as equivalent to 'half-farthing'.

Since the middle piece or 'Nebenkernel' of the echinoderm spermatozoon is formed from the mitotic spindle, the term 'mitosome', introduced by Platner, has been adopted and will be used to designate the middle piece, = Nebenkernel = *corpuscule accessoire* of other writers. 1920 L. DONCASTER *Introd. Study Cytol.* vii. 95 In the spermatozoon, as the cell enlarges, the mitochondrial bodies increase in size... In the young spermatid they unite to form a fairly compact mass near the nucleus at the side of the cell at which the tail will grow out. [Note] This mitochondrial mass ('mitosome') constitutes the 'Nebenkernel' of some authors, but as the word has been used to designate the remains of the division-spindle... the 'idiozome'... and other cell-structures, it is now dropping out of use. 1925 E. B. WILSON *Cell* (ed. 3) iv. 366 One of these [elements of doubtful nature] is the spindle-remnant, sometimes called the 'mitosome'... This body was believed by some earlier observers to play an important part in the sperm-formation, and was confused with the nebenkernel or with the acroblast; but later studies seem to show that it disappears without taking any definite part in the sperm-formation. 1934 L. W. SHARP *Introd. Cytol.* (ed. 3) xiv. 218 In insects generally the chondriosomes form a single more or less compact body, the nebenkernel (the mitosome of Gatenby).

2. A sacerdotal head-dress.

a. Hebrew Antiq. Used (after L. *mitra*, Vulg., and *μίτρα*, LXX.) for the ceremonial turban of the high priest (Heb. *miṣnepheth*, *ṣānīph*); also (in Wyclif and the Douay Bible, though not in the other versions) for the head-dress of the ordinary priests (Heb. *migbā'ēā*; Coverdale and the Bible of 1611 'bonnet', 1884 Revised 'headtire').

Wyclif's rendering of *cidaris* by 'mytre' is noteworthy, as probably indicating that the word was already current in English (in sense 1 b).

b. Eccl. A head-dress forming part of the insignia of a bishop in the Western Church, and worn also by certain abbots and other ecclesiastics as a mark of exceptional dignity. In its modern form, it is a tall cap, deeply cleft at the top, the outline of the front and back having the shape of a pointed arch; the material has usually been white linen or satin, embroidered and often jewelled; but mitres of gold or silver have also been used.

The application of *mitra* in med.L. to the episcopal head-dress was doubtless suggested by its occurrence in the description of the attire of the Jewish high-priest. (See *a.*)

In the Anglican church after the Reformation, the mitre, though theoretically part of the episcopal insignia, was seldom actually worn except at coronations down to that of George III. In recent times some bishops have revived its use on special ceremonial occasions.

mitre ('maitə(r)), *sb.*² Also *miter*. [Of somewhat uncertain origin: perh., as is usually assumed, a transferred use of prec., but the development of sense is not easy to explain.

Possibly there may be a reference to the early form of the episcopal mitre, which had a vertical band bisecting a rectilinear angle at the top.]

1. In Joinery and other mechanical arts: A joint (also *mitre-joint*) in which the line or plane of junction makes an angle of 45° with the side of each of the two pieces joined, so that the adjacent sides meet in a right angle; the shaped end or edge of a piece of material intended to form such a joint with another; an angle or slope of 45°. Now sometimes applied to any joint in which the angle made by the sides of the joined pieces is bisected by the line of junction.

mix (miks), *v.* Pa. t. and pa. pple. mixed (mɪkst). [Back-formation from the ppl. *adj.* *mixt* (see *MIXED ppl. a.*), a. F. *mixte*, ad. L. *mixtus*, 737 pple. of *miscēre* to mix. Cf. *MIXT v.*

Our earliest example of the vb., in any form other than the pa. pple., is of the date 1538, and it was extremely rare until Shakspeare's time. Of the pa. pple. itself, the earliest examples are c 1480 and 1526, the latter year being the date of our first quot. for *MIXT v.* The OE. *miscian* (the alleged by-form **mixian* is spurious) which has generally been assumed to be the source of the present verb, app. did not survive into ME. Only two examples are cited by Toller, and in these the sense seems to be 'to apportion suitably'.

The L. *miscēre*:—*mik-sk-* is f. the Indogermanic root **mik-* (*meik*, *moik-*), represented by Skr. *miçra* (:—**mikro-*) mixed, and by many vbs. with the sense 'to mix' in the various langs.: Skr. *miksh*, ? Gr. *μίγναι* (Gr. *μύρναι* is from the cognate root *mig-*), Welsh *mysgu*, OIrish *mesc*, Lith. *maiszyti*, Osl. *městiti* (Russ. *meshat'*). Whether the OE. *miscian*, OHG. *misgen*, *miskan* (MHG., MLG., mod. G. *mischen*) is cognate with the Latin or an early WGer. adoption from it, seems doubtful; the absence of the word from Goth., Scandinavian, Osl., and Frisian, is an argument in favour of the latter view.]

mixoploid ('miksəplɔɪd), *a.* (and *sb.*). *Biol.* [f. MIXO- + -PLOID.] Containing cells which are of differing ploidy or, more widely, have differing numbers of chromosomes. Also as *sb.*, a mixoploid individual.

1931 B. NĚMEC in *Rep. Proc. 5th Internat. Bot. Congr.* 1930 233 Many plants contain under normal conditions both diploid and polyploid cells. It is easy to get experimentally plants containing a varying number of polyploid cells. The author designates such plants mixoploid. *Ibid.*, Mixoploid organs tend to eliminate the polyploid cells when they form a minority, especially when they are highly polyploid. 1939 *Hereditas* XXV. 111 As a result of the agar treatment entire plants occasionally become mixoploids. 1944 *Jrnl. Heredity* XXXV. 359/2 Mixoploid tissue resulted from colchicine treatment. *Ibid.* 361/1 Individual anthers were mixoploid. 1951 *Nature* 2 June 891/1 In many species the diploid tissue grows at the expense of the tetraploid, and such a mixoploid reverts rapidly to the diploid condition. 1967 *Current Sci.* XXXVI. 307 (heading) Preferential elimination of diploid cells in a colchicine-induced mixoploid tissue. 1971 J. HAMERTON *Human Cytogenetics* I. vii. 224 Autosomal mosaics are less common, and about 1% of Down's syndrome patients are estimated to be mixoploids.

So 'mixoploidy, the property or state of being mixoploid.

1931 B. NĚMEC in *Rep. Proc. 5th Internat. Bot. Congr.* 1930 233 (heading) Mixoploidy and the cellular theory. 1958 C. P. SWANSON *Cytol. & Cytogenetics* ix. 300 This gradual change, if caught before the completion of the entire process of doubling, will give both tissues of mixed ploidy and cells with an uneven degree of polyteny in the individual chromosomes. Mickey (1946, 1947) has also shown this type of mixoploidy to be true for the spermatogonia in the testes of the grasshopper, *Romalea*. 1963 LEVAN & MÜNTZING in *Portugaliae Acta Biol.* A. VII. 10 The present writers would suggest that the term mixoploidy should include all cases in which cell populations contain more than one chromosome number irrespective of whether the numbers are euploid or aneuploid. Mixoploidy, thus, covers all cases of mosaicism and chimeric constitution in which the heterogeneity between different elements involves differences in chromosome number. Mixoploidy may originate by all kinds of mitotic irregularities, by cellular and nuclear fusions, or even by amitotic processes, provided they give rise to viable products. 1971 J. HAMERTON *Human Cytogenetics* I. vii. 225 *In vitro* studies on mixoploidy should include the use of single cell clones from a mixoploid culture so that the only genetic difference is confined to a single chromosome.

mixotrophic ('miksəʊ'trəʊfɪk), *a.* *Biol.* [a. G. *mixotroph* (W. Pfeffer *Pflanzenphysiologie* (ed. 2, 1897). I. vii. 349), f. MIXO- + Gr. τροφικός nursing.] Living by a mixture of autotrophic and heterotrophic nutrition; pertaining to nutrition of this kind.

1900 A. J. EWART in *Pfeffer's Physiol. Plants* I. vii. 364 By others [*sc.* plants] a portion only of the organic food is drawn from the external world, the rest being supplied by the imperfectly developed chlorophyll-apparatus; such may be termed 'mixotrophic' plants. *Ibid.*, All stages of transition between pure autotrophism and heterotrophism are exhibited among obligate or facultative mixotrophic plants. 1940 L. H. HYMAN *Invertebrates* I. iii. 58 Nutrition [of Protozoa] is holophytic, saprozoic, holozoic, or mixotrophic. 1965 BELL & COOMBE tr. *Strasburger's Textbk. Bot.* 5 Such mixotrophic organisms [*sc.* unicellular Protista] (which obtain their energy partly directly as autotrophs, and partly indirectly as heterotrophs) are regarded as the starting-point of two great developmental series which have led on the one side to the 'typical' plants and on the other to the 'typical' animals.

Sp. *mesana*, Pg. *mezena* foresail, Du. *bezaan* (earlier *bezane*), G. *besan* (-mast, -segel) mizen.]

The agreement of the use in Eng. and It. suggests that the divergent use in mod. Fr. is not original; the statement that It. *mezzana* originally meant 'mainsail' seems to be merely a conjecture based on the etymological meaning of the word, the precise implication of which is uncertain: some have suggested that it may be 'middle-sized'.

CASALIS *Basutos* ii. xiii. 248 Every being, to whom the natives render adoration, is called *Molimo*, the signification of which shows that it is by no means of heathen origin. mnemon ('ni:mɒn). *Psychol.* [f. Gr. μνήμη- memory + -ON¹.] A unit of memory (see quots. 1965, 1966).

The coin of the term appears to be Cherkin (quot. 1966), whose forthcoming paper is mentioned by Young in 1965. Cherkin's paper was communicated to the editor of the *Proceedings* on 19 November 1965.

1965 *New Scientist* 23 Dec. 861 In the author's [sc. J. Z. Young's] view, memory is localized in small combinations of brain cells, which he calls 'mnemons'. 1966 A. CHERKIN in *Proc. Nat. Acad. Sci.* LV. 88 The proposed unit is defined as the minimum physical change in the nervous system that encodes one memory... The name proposed for the unit is the 'mnemon' (mneme = memory; -on = suffix denoting a fundamental particle). 1971 J. Z. YOUNG *Introd. Study Man* xix. 252 The time to begin accumulating such units of memory (mnemons) would be as soon as they are ready.

C. *adj.* = MORE a.

[In OE. the construction of *mā* with a partitive genitive (see B 1, 2) was sometimes inconvenient, because the sb. which was felt to be virtually the subject or object of the verb, or the regimen of the prep., did not show the nature of this relation by its inflexion. Hence the genitive was occas. replaced by the case in which the sb. would have stood if *mā* had been absent, or (to express the same thing in another way) the sb. was placed in apposition with *mā*. In this way *mā* became practically an indeclinable *adj.*]
