moon (mu:n), sb.¹ Forms: 1 móna, 2-7 mone, (4 mon, mowne), 4-7 moone; north. 4-6 moyn(e, 5-6 mwne, 8 mune, 8-9 muin, 6- moon. [Com. Teut.: OE. *móna* wk. masc. = OFris. *móna*, OS. *māno* masc. (MLG. *māne* masc., MDu. *māne* masc., fem., Du. *maan* fem.), OHG. *māno* masc. (MHG. *māne*, *mōne*, *mōn* masc., rarely fem.; also *mānt*, *mōnt*, *mōnde*, mod. G. *mond* masc.), ON. *māne* masc. (Sw. *māne*, Da. *maane*), Goth. *mēna* masc.:—O'Veut. **mānon*.

According to Brugmann this form has arisen by substitution of suffix, from the *t*-stem **mānōp*- MONTH, as O'Veut. **nefon*- NEPHEW from Indogermanic **nepōt*- (cf. L. *nepōt-em*). Cognate words for 'moon' and 'month' are found in all branches of the Indogermanic family; outside Teut. the following types occur: **mēnā* (Gr. *μήνη* moon), **mēnon*- (Lith. *mėnū* moon), **mēne-s, -os*- (Lith. *mėnesis*, dial. *mėnas*, month), and with reduced grade of stem-suffix **mēns*- (Skr. *mās, māsa*, Zend *māsha*, OSl. *měsęcī*, moon, month, Gr. *μήν*, Ion. *μείς*, L. *mēnsis*, Irish *mí*, month). The prevailing view that the root is **mē-*, to measure (the moon having, it is supposed, been named from its function as a measurer of time) is plausible, but cannot be considered certainly true.]

1. a. The satellite of the earth; a secondary planet, whose light, derived from the sun, is reflected to the earth and serves to dispel the darkness of night.

The moon's constantly recurring changes and phases (see 1 c and NEW MOON, FULL MOON, HALF-MOON, HARVEST MOON, and cf. CRESCENT, QUARTER) have caused it to be taken as a common type of changeableness or fickleness. They are popularly supposed to influence the health of body and mind, and to cause lunacy (cf. LUNATIC). The moon's appearance to the eye of being diversified with light and dark patches gave rise to the fanciful comparison of its disc to a man's face (see 1 f and MAN-IN-THE-MOON). It has been worshipped as a deity by many races; in classical mythology it was identified with various goddesses (see 1 b). Its white or silvery light is taken as emblematic of coldness or chastity.

The moon's attraction is the chief cause of the tides. The period in which the moon completes her series of changes, or in which her orbital revolution brings her back to the same apparent position with regard to the sun, is called a month; in astronomical use this term is applied in a wider sense (see MONTH sb.¹ 2 a).

b. Since the disappearance of the grammatical genders of OE., in which *móna* was masc., the feminine pronoun has commonly been used in referring to the moon, even when no personification is intended (the neuter pronoun occurs, but less frequently); in poetry the moon is often personified, always as a female, and sometimes, after classical example, identified with various goddesses, as Cynthia, Diana, Phœbe.

2. The moon as visible during one (lunar) month is in popular language spoken of as a distinct object from that of another month; its 'age' being the number of days that have elapsed since new moon. Similarly, the sb. is used with qualifying words for: The moon as shining or visible at some particular time or place, or as presenting some particular appearance. (See also NEW MOON, FULL MOON, HARVEST MOON, etc.)

there is a moon, there is no moon = the moon is visible (not visible) at the time and in the place indicated or implied. **the old moon in the new moon's arms (or lap):** the appearance of the moon during the first quarter in which the dark portion of the orb is made faintly luminous by earth-light.

The L. *Maurus*, Gr. *Μαῦρος* may possibly be from some ancient North African language. Some believe the word to be merely a use of Gr. *μαῦρος* black (which on this view is aphetic from *μαυρός* blind); but this adj. (or at least this sense of it) is confined to late Gr., and may even be derived from the ethnic name.]

1. In *Ancient History*, a native of *Mauretania*, a region of Northern Africa corresponding to parts of Morocco and Algeria. In later times, one belonging to the people of mixed Berber and Arab race, Muslim in religion, who constitute the bulk of the population of North-western Africa, and who in the 8th c. conquered Spain. In the Middle Ages, and as late as the 17th c., the Moors were commonly supposed to be mostly black or very swarthy (though the existence of 'white Moors' was recognized), and hence the word was often used for 'Negro'; cf. BLACKAMOOR.

mop (mop), sb.² Also 5 mappe, 7-8 map(p), mop(p), 9 dial. map. [Late 15th c. *mappe*; the relation to the earlier MAPPLE is not quite clear.

On the assumption that *mappe* is ad. The ordinary hypothesis that the word is a. Cf., however, mod. Walloon *map* tablecloth, *mappe* napkin (Remacle).

The form *mop* first appears in the 17th c. (cf. however MOPPET¹, which is recorded much earlier), and may have been due to association with MOP *sb.*¹ in the sense of 'rag doll'. The W. Flem. *moppe*, a ship's mop (De Bo), may possibly be adopted from Eng.]

b. qualifying an adj. or adv., to form the comparative.

With most adjs. and advs. of more than one syllable, and with all of more than two syllables, this is the normal mode of forming the comparative. A few monosyllables (e.g. *right*, *just*) normally form their comparatives in this way instead of taking the suffix *-er*.

c1175 *Lamb. Hom.* 5 þes we ahte to beon þe edmordre and þa mare imete. **1340** HAMPOLE *Pr. Consc.* 858 And what es mar horibel in stede þan a man es when he es dede? **1375** BARBOUR *Bruce* VII. 555 He beheld hir mayr ynkirly. **1711** STEELE *Spect.* No. 6 ¶2 He finds Rest more agreeable than Motion. **1788** Mrs. HUGHES *Henry & Isabella* I. 180 He was . . more gallant, more generous, more everything that is agreeable in youth, than his brother. **1821** SOUTHEY in *Life* (1850) V. 106 His merits are every day more widely acknowledged. **1851** LANDOR *Popey* 30 It is more just that a bishop's salary should be reduced to a thousand a-year than an admiral's to three hundred. **1884** tr. *Lotze's Logic* 348 The true law is far more complicated.

c. Often prefixed to monosyllabic and disyllabic adjs. and advs. which have otherwise a regular comparative in *-er*; as *more true*, *more busy*, *more often* = *truer*, *busier*, *oftener*. Esp. in phr. *I (or you, etc.) couldn't be more* —: I, etc., am extremely —.

By mod. writers this alternative form is used (1) for special emphasis or clearness; (2) to preserve a balance of phrase when other comparatives with 'more' occur in the context; (3) to qualify the whole predicate rather than the single adj. or adv.

5. a. Expressions in which *more* (in sense B. 2) is followed by *than* with a designation of number or quantity admit of being used instrumentally or adverbially, as in 'more than ten years old'. The analogy of these has given rise to expressions like 'more than once' (a multiplicative corresponding to the quasi-numeral 'more than one'). Hence, from the 16th c. onwards, *more than* has been placed before adjs., advs., vbs., and descriptive sbs., to indicate that the word thus qualified is (in some obvious respect) inadequate to the intended meaning. *more'n, mor'n colloq.* (orig. U.S.) = more than; also *ellipt.* = no more than.

[L., abl. of *mos* manner, custom: see *MORES*.] In phrases: chiefly with *poss. adjs.*, as *more suo*, in his own fashion, *more meo*, in my own fashion; and with *national adjs.*, as *more hispanico*, *turcesco*, in accordance with Spanish (Turkish) customs. Also *more majorum*, in traditional manner.

more, var. *MOHUR*; obs. f. *MOOR*.

-**more** (mɔː(r)), *suffix*, forming advs. of place (rarely of time) in the comparative degree (most of which have given rise to adjs. of identical form). Chiefly appended to advs. having already the comparative ending -*er*, as in *backer-more*, *downer-more*, *farther-more*, *further-more*, *hinder-more*, *inner-more*, *outer-more*, *over-more*, *rather-more*, *utter-more*; in the 16-17th c. a few formations occur in which it is added to a positive or uncomparative adv., as *hind-more*, *hither-more*, *inmore*, Sc. *yonder mair*.

The suffix is identical with *MORE adv.*; the addition of this adv. to comparatives occurs in Scandinavian, as ON. *fyrre-meir* earlier, *firre-meir* farther off, *nærre-meir* nearer, OSw. *innarmer* = *INNERMORE*, *nithirmer* = *NETHERMORE*. The earliest instances in Eng. occur in the *Ormulum* (*furthermore*) and the *Cursor Mundi* (*farthermore*, *innermore*); it is therefore likely that the use was originally due to Scandinavian influence. But the majority of the comparatives in -*more* were formed to correspond to previously existing superlatives in -*most*, which were partly altered forms of OE. superlatives in -*m-est*, and partly new formations on the analogy of these.

Morea, Moria, var. *MURIA sb.* and *a*.

moreraye, mores, obs. ff. MORAY, MORRIS *sb.*¹

mores ('mɔəri:z). Normally const. as *sb. pl.* [a. L. *mores* pl. of *mos* manner, custom.] 1. Those acquired customs and moral assumptions which give cohesion to a community or social group, the contravention or rejection of which produces a reaction of shock and outrage. Also *attrib.*

1907 W. G. SUMNER *Folkways* 30 The mores are the folkways, including the philosophical and ethical generalizations as to societal welfare which are suggested by them, and inherent in them as they grow. *Ibid.* 37 The Latin word 'mores' seems to be... convenient... as a name for the folkways with the connotation of right and truth in respect to welfare, embodied in them. 1927 J. DOWD *Negro in Amer. Life* xxi. 154 The adjustment of the South to her new educational problem is only one of the many adjustments incident to her passing from the mores of slavery to the mores of freedom; and any sociologist knows that it is impossible to change the mores of a people suddenly. 1948 *Mind* LVII. 511 It frequently happens that any individual variations from cultural traits cause great indignation. When this is so the cultural traits in question are called *mores-traits*. 1958 J. K. GALBRAITH *Affluent Soc.* xviii. 200 Television and the violent mores of Hollywood and Madison Avenue must contend with the intellectual discipline of the school. 1958 *Spectator* 1 Aug. 167/1 It is surely a mistake for a nation of independent character and traditions to ape the different and often alien mores of another. 1967 *Ibid.* 30 June 765/1 The law, in the shape of the jury, is the custodian of our mores. 1970 G. GREER *Female Eunuch* 171 Perhaps the pop revolution... has had a far-reaching effect on sexual mores. 1975 *Verbatim* Feb. 4/2 The fact of the matter is that mores, politics, and sentiment change.

2. *Ecology*. The habits, behaviour, etc., of a group of animals of the same kind; also, occasionally, the group itself. Cf. NICHE *sb.* 3 c. Also *attrib.*

1911 V. E. SHELFORD in *Biol. Bull.* XXI. 146 Ecological succession is based upon physiology, habits, behavior, mode of life, and the like, which I have proposed to call mores (opposed to the term form). *Ibid.* 147 It is of course recognized that within rather independent limits the mores of a morphological species remain, in a general way, the same throughout its geographic range. 1913 — *Animal Communities Temperate Amer.* II. 33 Ecology... considers physiological life histories primarily in nature, for this reason the central problem of ecology is the mores problem. 1954 A. M. WOODBURY *Princ. Gen. Ecol.* xi. 197 Ecologically an individual may be classified under two or more headings in which the unit is a mores. For example, an insect may pass through an egg stage, a larval stage, a pupal stage, and an adult stage, each of which would represent a mores, an ecological unit in a community. 1962 H. HANSON *Dict. Ecol.* 229 *Mores*, the general behavioural attributes of motile organisms, or groups of animals possessing particular ecological characteristics. 1973 P. A. COLINVAUX *Introd. Ecol.* VIII. 117 The fish had different physiologies, habits, behavior, and modes of life, a collection of parameters which he [sc. Shelford] called the mores of the animals... His word mores, which has an awkward and alien sound, disappeared, but the idea he was seeking to express by it later found an outlet in Elton's 'niche' and became a central ecological concept.

morgan⁴ ('mɔːgən). *Genetics.* [named after Thomas Hunt Morgan (see MORGANISM).] A unit of the relative distance on a chromosome between two linked genes, defined in terms of the frequency of crossing-over between them so that the distance in morgans between two genes is equal to this frequency when they are close enough together for the effect of multiple crossing-over to be negligible. (Sometimes used for one hundredth of this unit.)

1919 J. B. S. HALDANE in *Jrnl. Genetics* VIII. 305 Let x be the distance between the loci of two factors, y their cross-over value, and let the unit of distance be chosen so that when y is sufficiently small x becomes equal to y . . . The value of y for a given value of x is the sum of the probabilities of all odd numbers of cross-overs. $y = \dots \frac{1}{2}(1 - e^{-2x}) \dots$ It is suggested that the unit of distance in a chromosome as defined above be termed a 'morgan', on the analogy of the ohm, volt, etc. Morgan's unit of distance is therefore a centimorgan. *Ibid.*, The cross-over values .412 and .236 correspond, according to curve (c), . . . to distances of .549 and .261 morgans respectively. 1965 J. A. SERRA *Mod. Genetics* I. vii. 260 Map distances between gene loci are the cross-over values expressed as percentages of recombination for small intervals. Thus, 1% of recombination is often called one cross-over unit . . . or a centimorgan. . . One morgan is equal to 100 centimorgans. [Note] Some authors call a cross-over unit one morgan. 1971 LEVITAN & MONTAGU *Textbk. Human Genetics* ix. 376 Each morgan is divisible into 100 centimorgans, each centimorgan corresponding to the map distance between two loci showing 1 per cent crossing over between them. For close loci the crossover percentage can be translated directly into centimorgans, but this is not possible for more distant loci, especially those more than 30 centimorgans apart. 1971 *Nature* 24 Dec. 475/1 Pedigree studies by Lawler and her co-workers established a close linkage (0.03 morgans) between *Rh*, the rhesus set of blood group loci, and one of the loci, *El*₁, that can lead to elliptocytosis of the red cell.

morganatic ('mɔːgənætɪk), *a.* [ad. mod.L. *morganaticus* (whence G. *morganatisch*, F. *morganatique*, It. *morganatico*, etc.) evolved from the med.L. phrase *matrimonium ad morganaticam*, where the last word is prob. synonymous with *morganaticum* MORNING-GIFT, f. OHG. *morgan* (= MORN) in **morgangeba* morning-gift (*morganegeba* in Gregory of Tours, 6th c.; MHG. *morgengābe*). The literal meaning of the term 'morganatic marriage' (*matrimonium ad morganaticam*) is, as is explained in a 16th c. passage quoted by Du Cange, a marriage by which the wife and the children that may be born are entitled to no share in the husband's possessions beyond the 'morning-gift'.] The distinctive epithet of that kind of marriage by which a man of exalted rank takes to wife a woman of lower station, with the provision that she remains in her former rank, and that the issue of the marriage have no claim to succeed to the possessions or dignities of their father; also, occasionally, used to designate the marriage, under similar conditions, of a woman of exalted rank to a man of inferior station. Hence **morganatic husband, wife**.

A morganatic marriage is sometimes called a 'left-handed marriage' (G. *Ehe zur linkenhand*), because in the ceremony the bridegroom gave the bride his left hand instead of his right. The latter term is sometimes used in a wider sense, for the *matrimonium inaequale* of German law, in which, though the spouse of inferior rank was not elevated, the children retained the rights of succession.

Their results and interpretations were, however, later accepted by Morgan and presented chiefly by him to the scientific and lay public, so that these developments have sometimes been referred to, especially in circles farthest removed from contact with the original work, as 'Morganism'. 1950 A. Mormon ('mɔ:mən). [*f.* *Mormon*, the name of the pretended author of 'The Book of Mormon'; see below. The earlier name was MORMONITE.]

1. A member or adherent of a religious body, calling itself 'The Church of Jesus Christ of the Latter-day Saints', founded in 1830 at Manchester, New York, by Joseph Smith, on the basis of alleged Divine revelations contained in the 'Book of Mormon', which Smith professed to have translated by special inspiration from the original written on gold plates, miraculously discovered by himself.

The feature of the sect which is popularly best known, and which is referred to in allusive uses of the name, is the practice of polygamy: but this is not countenanced by the Book of Mormon, and is now understood to have been abandoned in obedience to the law of the United States.

mærzen, marhen, mor(e)ghen, 2-4 morzen, (4 moryhen); 3 marwen, morwhen, 3-5 morwen, 4 morewen, 5 morewane, morwyn, morwoun, morwyng; 3-5 morun, 4 moroun, 4-5 moren, 5 moron, moryn; 4-7 morne, 3- morn. See also MORROW. [Com. Teut.: the OE. forms represent three distinct types, each of which is represented in one or more of the other Teut. langs. (1) OE. *morzen* (inflected also *morzn-, morn-*) = OFris. **morgen*, *morn*, OS. *morgan* (MLG., MDu., Du. *morgen*), OHG. *morgan* (MHG., mod.G. *morgen*):—O Teut. **murgano-z*, represented also, with variation of suffix, by ON. *morgunn-, -onn* (Sw. *morgon*, Da. *morgen*). (2) OE. *myrzen-* (in the comb. *myrzenlic*) = ON. *myrginn*, Goth. *maurgin-s*:—O Teut. **murgino-z*. (3) OE. *marzen, mærgen* = MDu. *margen, mergen*, ON. *merginn* (OSw. *marghan*):—O Teut. **margano-z-, -ino-z*. The word in all forms retains the masculine gender.

The affinities outside Teut. are doubtful. Some refer the word to the pre-Teut. root **merk-* to be dark; but the absence of consonant-ablaut, as well as the inappropriateness of the sense, seems to render this view less probable than the alternative hypothesis that the root is **mergh-*, represented by Lith. *mirgu* to twinkle, *margas* parti-coloured.

The present monosyllabic form descends, partly at least, from the OE. contraction in oblique cases, *morne, mornes* for *morz(e)ne, morz(e)nes*. (The same contraction existed in ON.) But it may also in part represent the result of a process of contraction starting from ME. *morwen*, the intermediate forms being *morun, moren*, etc.

The ME. forms that retain the final *n* are for convenience placed here, though many of them might with equal propriety be referred to MORROW. In MSS. it is often doubtful whether the word is *morn* or *moru* = 'morrow'.]

morph³ (mɒ:f). *Linguistics*. [f. *MORPH(EME)*.]

a. = *ALLOMORPH*². b. A phoneme or series of phonemes forming a variant or a number of variants of a morpheme.

1947 C. F. HOCKETT in *Language* XXIII. 322 Recurrent partials not composed of smaller ones (-way) are *alternants* or *morphs*... By definition, a morph has the same phonemic shape in all its occurrences... Morphs are not always composed of continuous uninterrupted stretches of phonemes, but they are always composed of phonemes. Every utterance is composed entirely of morphs. 1948 P. K. BENEDICT in *Jrnl. Amer. Oriental Soc.* LXVIII. 185 This nomenclature has obvious advantages from a systematic point of view, and might well be extended to morphology, with the 'morph' as the descriptive unit, and the 'allomorph' as the member of a morpheme. 1952 C. E. BAZELL in E. P. Hamp et al. *Readings in Linguistics II* (1966) 274. The term

morpheme . . was used both for the narrower modern concept and for that of the morpheme-alternant or (in American usage) the morph. 1955 *Trans. Philol. Soc.* 1954 69 *Morphemes*. Analytic classification here would obviously refer to morpheme-alternants ('morphs') . . . Synthetic classification of morphs is implied in the very procedure of defining their morphemic values. For it is on account of their membership in different substitution-classes (selections), that morphs are assigned their different morphemic values, or, as we say, considered to 'represent different morphemes'. 1960 *Amer. Speech* XXXV. 218 He [sc. Hoenigswald] believes sound change to be due to nothing but complete borrowing of morphs between only sub-phonemically differing dialects. 1962 H. M. HOENIGSWALD in Householder & Saporta *Problems in Lexicography* 105 There can be no objection to an arrangement by morphs, that is by the phonemic shape of the allomorph or allomorphs making up the morpheme. 1964 E. BACH *Introd. Transformational Gram.* vii. 147 Phonemes have been considered by some to be classes of sounds, morphemes as classes of morphs, and so on. 1965 *Language* XLI. 420 The markers of case are almost always portmanteau morphs that are also involved in expressing other categories. . . of the noun phrase. 1968 J. LYONS *Introd. Theoretical Linguistics* v. 184 The word *bigger* is analysable into two morphs. . . Each morph represents (or is the exponent of) a particular morpheme. . . Morphemes may be represented directly by phonological (or orthographical) segments with a particular 'shape' (that is, by morphs). 1972 *Hiberno-English Dialect Questionnaire* 1 Some of the principal morphs found in polysyllables are . . . included in the questionnaire.

1947 *Language* XXIII. 337 Intonational morphs. . . are found spread through such morphs or morph-sequences as *yes, I know, no, maybe*, [etc.]. 1953 C. E. BAZELL *Linguistic Form* ii. 22 The term [sc. morphophonemics] has also more recently been used for the study of morph-structure proper. *Ibid.* iv. 47 In many systems no morph-boundaries are found within syllables. 1962 H. M. HOENIGSWALD in Householder & Saporta *Problems in Lexicography* 107 Is it reasonable . . . to consider the sentence intonations of English on a par with the segmental morph-morphemes? 1964 E. BACH *Introd. Transformational Gram.* vi. 130 The P rules will operate to select the proper morph shapes and allophones. 1965 *Amer. Speech* XL. 297 Orrm's use of double consonants, which is found only in morph-final position or in morph-final clusters, indicates plus juncture rather than shortness of the preceding vowel. 1972 *Archivum Linguisticum* III. 49 There is a regular phonological rule in Nzema and Ahanta which voices certain morph-initial obstruents if they are preceded by a vowel or nasal consonant.

morph⁴ (mɔ:f). [f. Gr. *μορφή* form.] A variant form of an animal produced by genetic differences, or (in later use) one of several forms exhibited by an animal in the course of its life cycle. Hence 'morphic a.; 'morphism = POLYMORPHISM 2.

1955 J. S. HUXLEY in *Heredity* IX. 2, I propose to introduce the term morphism and its derivatives, morphic and morph. *Ibid.* 3, I restrict the term morphism to genetic polymorphism . . . in which (usually sharply distinct) genetic variants or morphs coexist in temporary or permanent balance within a single interbreeding population in a single spatial region, and in such frequencies that the rarer cannot be due solely to mutation, or to the spread of selectively neutral mutants. *Ibid.* 8 The cuckoo shows a general tendency to morphism. . . for it shows a plumage dimorphism, barred red and unbarred grey. Among adults, the red morph is confined to a minority, all females. 1955 — in *Proc. R. Soc. B.* CXLIV. 215 A morphic balance-mechanism must be strong enough to prevent the break-up of the morphism through the disappearance of any morph under adverse selection in periods exceptionally unfavourable to it. 1963 E. MAYR *Animol Species & Evolution* vii. 157 Natural selection may modify the dominance of such morphs. 1968 R. D. MARTIN tr. *Wickler's Mimicry in Plants & Animals* i. 14 A leaf-beetle occurring as two separate morphs is shown. *Ibid.* vi. 61 Both sexes [of *Ityroea nigrocincta*] have two morphs, a green form and a yellow form. 1970 *Nature* 26 Sept. 1368/1 In the autumn the parthenogenetic viviparous morphs of the aphid give birth to nymphs which develop into males and oviparous females. 1974 *Ibid.* 22 Feb. 572/2 The frequencies of colour and banding morphs of the dead animals were compared with those prevailing in the population. 1975 *Jrnl. Zool.* CLXXVII. 336 From considerations of morphism, modality and sex-limitation, a descriptive classification of nine categories is advanced to encompass all situations involving pattern polymorphism and sexual dimorphism in butterflies.

-morph (mɔ:f), terminal element (repr. Gr. *μορφή* form) of sbs. with the sense 'thing having a (certain) form or character', as ISOMORPH, POLYMORPH, ALLELOMORPH, ENDOMORPH.

morphallaxis (mɔ:fələksis). *Zool.* [f. Gr. *μορφή* form + *ἀλλaxis* exchange.] Regeneration by the transformation of existing bodily material.

1901 T. H. MORGAN *Regeneration* i. 23 At present there are known two general ways in which regeneration may take place. . . In order to distinguish broadly these two modes I propose to call those cases of regeneration in which a proliferation of material precedes the development of the new part, 'epimorphosis'. The other mode, in which a part is transformed directly into a new organism, or part of an organism without proliferation at the cut-surfaces, 'morphallaxis'. 1924 G. R. DE BEER *Growth* viii. 53 In regeneration in some cases (where morphallaxis occurs), it [sc. material needed for growth] is derived from the other tissues of the organism which thereby undergo reduction. 1956 C. H. WADDINGTON *Princ. Embryol.* xiv. 304 Animals such as coelenterates, flatworms and oligochaetes in which morphallaxis occurs to a considerable extent. 1965 KIORTSIS & MORAITOU in Kiortsis & Trampusch *Regeneration in*

morphe, -phea, var. ff. MORPHEW, -PHŒA.

Morphean (mɔ:'fi:ən, 'mɔ:fɪən), *a.* [f. MORPHEUS + -AN.] Of or pertaining to MORPHEUS; hence, sleepy, drowsy.

morpheme ('mɔ:fi:m). *Linguistics.* [F. *morphème*, f. Gr. *μορφή* form, after *phonème* PHONEME.] *a.* An element such as an affix, preposition, conjunction, or stress pattern considered in respect of its functional relations in a linguistic system (now little used by linguists). *b.* The smallest meaningful morphological unit of language, one that cannot be analysed into smaller forms.

1896 R. J. LLOYD in *Neueren Sprochen* III. 615 The phonetic elements of a given word are its *phonemes*. But its significant elements, be they root, suffix, prefix, inflection or aught else, are *morphemes*. 1925 P. RADIN tr. *Vendryès's Lang.* II. i. 74 By *semontemes* we understand the linguistic elements which express the ideas of the concepts . . . and by *morphemes* we understand those elements which express the connexions between the ideas. . . The morpheme is generally a phonetic element . . . indicating the grammatical relations between the ideas in the sentence. 1926 L. BLOOMFIELD in *Language* II. 155 A morpheme is a recurrent (meaningful) form which cannot in turn be analyzed into smaller recurrent (meaningful) forms. Hence any unanalyzable word or formative is a morpheme. 1931 *Amer. Jrnl. Philol.* LII. 78 The morpheme of the dependent element indicates merely an unspecialised dependence (gender, number, person, case). *Ibid.* 79 Nouns are *semantemes* susceptible of morphemes of case. 1933 L. BLOOMFIELD *Language* x. 161 A linguistic form which bears no partial phonetic-semantic resemblance to any other form, is a *simple* form or *morpheme*. Thus, *bird, ploy, donece, cran-, -y, -ing* are morphemes. Morphemes may show partial phonetic resemblances. 1935 G. K. ZIFF *Psycho-Biol. of Lang.* (1936) i. 15 One may view the same word [sc. *untruthfulness*] as a sequence of five units which we shall term morphemes. . . i.e. *un-tru-th-ful-ness*. 1948 *Word* Apr. 20 If it is a bound form, the element must—in order to be a morpheme—be active. 1953 C. E. BAZELL *Linguistic Form* i. 5 As used in Europe, it [sc. morpheme] answers very approximately to one of two other American terms: (i) the morphemic component, including the morpheme with only one component, or (ii) the morphemic segment or 'morph'. . . (The earlier distinction of morpheme and *semanteme* is obsolete except in non-structuralist circles.) 1959 *Archivum Linguisticum* XI. 93 In the *Prolegomena*, morphemes ('inflectional elements', not, however, to be identified with morphemes in either the Prague or American [Bloomfieldian] sense) are regarded as constituting part of the content form of language. 1962 E. F. HADEN et al. *Resonance-Theory for Linguistics* iii. 40 The word is here defined . . . as a free form comprising one or more morphemes, occurring in a given position relative to other words. 1967 *General Linguistics* VII. 65 Maslov discusses the shifts in meaning and utilization which the term 'morpheme' has undergone since its coinage by Baudouin de Courtenay in the 1880's. 1973 *Sci. Amer.* Feb. 57/2 Every language has a stock of several thousand morphemes: the bearers of the basic semantic and grammatical content. An expression such as 'can openers' comprises four morphemes: 'can', 'open', '-er' and '-s'.

c. attrib. and Comb., as *morpheme-class, -combination, -configuration, -count, -sequence, -structure, -theory, -unit, -word; morpheme-based, -initial, -like, -medial* adjs.; *morpheme alternant* = ALLOMORPH².

1942 *Language* XVIII. 171 We divide each expression in the given language into the smallest sequences of phonemes which have what we consider the same meaning when they occur in other expressions. . . The resultant minimum parts we call not morphemes, but *morpheme alternants*. 1947 *Ibid.* XXIII. 402 Different phonemic shapes of a given base appearing before different suffixes . . . are morpheme alternants of the same morpheme. 1952, 1955 [see MORPH²]. 1963 J. Each environment determines one and only one morpheme-class. 1963 ERVIN & MILLER in J. A. morphogen ('mɔ:fəudzən). *Biol.* [f. Gr. *μορφή* form + -O + -GEN.] Any agent which is or might be capable of bringing about or determining morphogenesis.

1952 A. M. TURING in *Phil. Trans. R. Soc. B.* CCXXXVII. 38 The systems actually to be considered consist therefore of masses of tissues which are not growing, but within which certain substances are reacting chemically, and through which they are diffusing. These substances will be called morphogens, the word being intended to convey the idea of a form producer. It is not intended to have any very exact meaning. 1965 *Math. in Biol. & Med.* (Med. Res. Council) vi. 247 Turing considers the behaviour of two chemical substances, A and B, which he calls 'morphogens'. The significance of the name is simply that it is supposed that a high concentration of one or other of these substances can act as an 'inducer' of further differentiation. 1972 *Nature* 13 Oct. 366/1 Many theories for the mechanism of signalling in embryos have been produced; the oldest, and simplest, is that there is a concentration gradient of a 'morphogen' from the animal to vegetal poles, and that cells can measure their ambient concentration and then behave according to their position in the gradient.

|| **morpho'genesis.** [mod.L., f. Gr. *μορφή* form + *γένεσις* origin: see GENESIS.]

b. **Geomorphol.** The formation of landscapes or land forms.

1958 *Geol. Mag.* XCV. 126 Tricart and Cailleux. . . claim that a 'sufficiently dense cover of vegetation' interferes very significantly with morphogenesis. 1966 J. A. MABBUTT in G. H. These areas are here called morphogenetic regions. 1954 W. D. THORNBURY *Princ. Geomorphol.* iii. 63 The concept of a morphogenetic region is that under a certain set of climatic conditions particular geomorphic processes will predominate and hence will give to the landscape of the region characteristics that will set it off from those of other areas developed under different climatic conditions. 1957 [see field sb. 17c]. 1965 *Science* 29 Oct. 627/3 (caption) Possible relation of collagen distribution to morphogenetically active and inactive areas. 1966 SAUNDERS & FALLON in M. 1950 *Ann. Assoc. Amer. Geographers* XL. 222 Many of the ideas here expressed are explicitly stated in the lectures of Professor Kirk Bryan, whose emphasis on climatic morphogeny has led to the formulation here set forth.

Chron.* V. 165 General Pitt-Rivers, taking up the same kind of morphological study in relation to other objects, has arranged a collection of... human implements, and has communicated... papers upon their morphology. *Ibid.* 168 The morphological aspect of the coin-type. 1895 N. 4. *Min. morphological axis* (see quots.).

1878 GURNEY *Crystallogr.* 38 The axis of hexagonal symmetry in the Rhombohedral System and the axis of tetragonal symmetry in the Pyramidal System are called morphological axes. 1895 STORY-MASKELYNE *Crystallogr.* 128 Where two or more planes of symmetry lying in a zone are conformable, their zone-axis will be termed a morphological axis or axis of form for the system.

morphologically (mɔːfɔːlɔːdʒɪkəlɪ), *adv.* [f. prec. + -LY².] In a morphological manner; with reference to the facts or principles of morphology (in various senses).

1859 *Todd's Cycl. Anat.* V. 220/2 Saprolegnia, which is morphologically so closely related to Vaucheria... we obtain [etc.]. 1868 MAX MÜLLER *Sel. morphologist (mɔːfɔːlɔːdʒɪst), [f. MORPHOLOGY + -IST.] One versed in morphology; one who pursues morphological investigations.

1845 WHEWELL *Indic. Creator* 34 The morphologists have declared... that they could not allow themselves to ascribe to the Creator any intention. 1857 GOODSIR in *Edin. New Philos. J. V.* 119 It is... incumbent on the morphologist to ascertain in what respects they correspond. 1899 *Allbutt's Syst. morphology (mɔːfɔːlɔːdʒɪ), [f. Gr. μορφή form + -LOGY.] The science of form.

1. *Biol.* That branch of biology which is concerned with the form of animals and plants, and of the structures, homologies, and metamorphoses which govern or influence that form.

1830 R. KNOX *Cloquet's Anat.* 2 It is to this kind of investigation, which has by some been named Morphology, that anatomy belongs. 1859 J. R. GREENE *Protozoa* *Introd.* 17 By some the word 'morphology' is employed in a restricted sense, to signify the study of homologous organs. 1880 GRAY *Struct. Bot.* 5 note, The term Morphology was introduced into science by Goethe, at least as early as the year 1817.

2. *Philol.* *a.* The branch of grammar which is concerned with the form of words (including word-formation and inflexion).

1869 FARRAR *Fam. Speech* iv. 118 By the morphology of a language we mean the general laws of its grammatical structure. 1871 *Public Sch. Lat. Gram.* 21 Morphology or Wordlore... has three divisions:—I. Flexion. II. Derivation. III. Composition. 1907 *Athenæum* 2 Mar. 256/1 Two volumes—one dealing with phonology, morphology, and inflexions, and the other with syntax.

b. *Appos.*, as *morphology-syntax*. *Comb.*, as *morphology-based adj.*

1965 H. A. GLEASON *Linguistics & Eng. GARVIN *On Linguistic Method* 157 Morphemic analysis [is]... primarily syntactic for those languages to which the morphology-syntax division applies.

3. *gen.* The history of variation in form.

1885 C. F. KEARY in *Numism. Chron.* V. 165 By the morphology of coins I mean the history of those changes in their form which have resulted... from influences which... are always affecting... the evolution of coins.

II. 4. Shape, form, external structure or arrangement, esp. as an object of study or classification.

1890 C. P. MITCHELL *Philos. Tumour-Dis.* ii. 52 Facts so varied as those comprised in the morphology of tumours. 1894 *Jrnl. morphomaniac (mɔːfɔːmeɪniæk), [Irreg. f. MORPHIA + MANIAC *sb.*] = MORPHINOMANIAC.

1906 G. K. CHESTERTON *Dickens* ii. 41 These great popular leaders... become drunkards; they become demagogues; they become morphomaniacs. 1912 L. J. VANCE *Destroying Angel* xii. 165 He's just short of a raving morphomaniac.

morphometric (mɔːfɔːmɛtrɪk), *a.* [f. Gr. μορφή form + -O + -METRIC.] Of or pertaining to morphometry or morphometrics; morphometrical.

1931 T. L. WOO in *Biometrika* XXII. 325 A special advantage of taking measurements on the individual bones of the skull is that we thus get some idea of the size and shape of relatively small regions... giving us a better appreciation of local asymmetries than the run of anthropometric measurements can. I think it might be useful to distinguish the two types of measurements as ethnometric and morphometric, for both are actually anthropometric. 1934 *Geogr. J. LXXXIV.* 424 Other questions, such as the morphology of arctic regions, morphometric methods, classification and variation of climate. 1952 *Bull. Geol. Soc. YOUNG *Slopes* i. 3 Morphometric analysis takes the river basin as the fundamental unit; this is a consequence of its origin in hydrological studies, in particular in the attempt to predict flood discharge from the landform characteristics of river catchments. 1974 *Nature* 24 May 371/1 A three-fold enrichment (as judged by morphometric analysis of electron micrographs) of synaptic junctions... was obtained.

Hence *morphometrically adv.*

1937 *Trans. Connecticut Acad. Arts & Sci.* XXXIII. 67 The lake is primarily eutrophic, secondarily or morphometrically oligotrophic. 1957 G. E. HUTCHINSON *Treat. Limnol.* I. ii. 170 The number of lakes of maximum depth of over 400 m. will, however, be greatly increased when the large lakes of southern South America become known morphometrically. 1960 *Jrnl. Animal Ecol.* XXIX. 310 The parents were most probably very similar morphometrically to the fledglings.

morphometrics (mɔːfɔːmɛtrɪks), *sb. pl.* [f. as prec.: see -IC 2.] Morphometry (esp. of living forms); also, morphometric features or properties.

1960 *Jrnl. Animal Ecol.* XXIX. 309 The shape of an animal, of which morphometrics are a numerical expression, is dependent upon genetically transmitted characters and the modifying influence of the environment on them. *Ibid.* 310 No completely reliable evidence was obtained for either the morphometrics or the behaviour of the parents of two of

the populations studied. 1971 BLACKITH & REYMENT *Multivariate Morphometrics* ii. 9 An essential problem in morphometrics is to measure the degree of similarity of two forms. 1974 *Nature* 22 Mar. 303/3 The chapters on multivariate morphometrics and optical data analysis are particularly good.

morphometry (mɔ:'fɔmɪtri). [f. Gr. μορφ-ή form + -METRY.] The art or process of measuring the external form of objects, esp. in *Geomorphol.*

1856 in MAYNE *Expos. Lex.* 1898 *Nature* 13 Jan. 256/1 Dr. Wilhelm Halbfass has worked out in detail the morphometry of the Lake of Geneva. 1957 G. E. HUTCHINSON *Treat. Limnol.* i. ii. 168 (heading) Morphometry of lakes over 400 m. deep. 1958 *Geogr. Jnl.* CXXXIV. 370 (heading) Aspects of the morphometry of a 'poly-cyclic' drainage basin. 1961 *Geomorphological Abstr.* Sept. 33 Earlier work showing the dominance of rock type in pebble morphometry is strongly supported. 1963 E. R. WEIBEL (title) Morphometry of the human lung. 1970 R. J. SMALL *Study of Landforms* i. 4 Quantification is applied... to landscape forms, giving rise to the branch of modern geomorphology known as 'morphometry'.

Hence **morpho'metrical a.**, pertaining to or connected with morphometry.

1856 in MAYNE *Expos. Lex.* 1935 *Geol. Mag.* LXXII. 183 Its [sc. the clinographic curve's] utility in delicate morphometrical determinations seems to me undoubted. 1935 *Biometrika* XXVII. 465 (heading) Morphometrical indices. 1953 *Anti-Locust Bull.* XVI. (heading on title-p.) Morphometrical studies on phases of the Desert Locust (*Schistocerca gregaria* Forskål).

morphon (mɔ:'fɔn). Also morphone. Pl. (badly formed) morphontes. [a. G. *mophon* (pl. *mophonthen*), invented by Haeckel, who explains it as f. Gr. μορφ-ή form + ὄν being.] a. *Biol.* A morphological individual, element, or factor.

1873 W. S. DALLAS (tr. Haeckel) in *Ann. Mag. Nat. Hist.* Ser. iv. XI. 245 Because the morphontes (morphological elements) of the first order which form the sponge-organism... exhibit a relatively high degree of physiological individuality, and because the personality of the sponges built up of these (the morphon of the third order) was not recognised, the former have been regarded as the 'true individuals' of the sponge. 1880 PASCOE *Zool. Classif.* (ed. 2) 284 *Morphone*, a morphological element. 1883 *Encycl. Brit.* XVI. 842/1 He distinguishes... the physiological individual (or *bion*)... from the morphological individual (or *mophon*).

b. *Linguistics.* A term in stratificational grammar for MORPHOPHONEME. Also *attrib.* Hence **mor'phonic a.**

1964 S. M. LAMB in *Rep. 15th Ann. Round Table Meeting Ling. & Lang. Stud.* (Georgetown Univ. Inst. Lang.) 105 Morphons (i.e. morphophonemes) often have alternate phonemic realizations. 1965 *Language* XLI. 200, I shall use Lamb's convenient neologism *mophon*. The syntactic component of a correct generative grammar... yields sentences as strings of morphons. 1966 S. M. LAMB *Outl. Stratificational Gram.* ii. 29 There are three separate alternation patterns, the lexonic, the morphonic, and the phononic. 1967 C. F. HOCKETT *Language, Mathematics, & Linguistics* iii. 95 Relative to the terminal subalphabet T'(G), a morphon string is a simple (linear) string. 1968 P. M. POSTAL *Aspects Phonol. Theory* iii. 41 It must be emphasized... that stratificational grammar insists that the morphophonemes, or 'morphons' in their terms, are unanalyzable symbols. 1968 *Language* XLIV. 595 Rules c & e are necessary because the objects on the higher stratum, called 'morphons', are distinct from the objects on the lower stratum, which are bundles of phonons. 1970 G. SAMPSON *Stratificational Gram.* ii. 33 The large number of neutralisations represented by almost every morphon. *Ibid.* iii. 45 In a complete description of English, there would be two further strata, each with its tactics, below the morphon level... I am not in a position... to give the morphonic realisations of the morphemes.

morphoneme (mɔ:'fɔni:m). *Linguistics.* [f. Gr. μορφ-ή form + PHONEME.] = MORPHOPHONEME. So **morpho'nemic a.**

1933 *English Studies* XV. 87 The alternating pairs (sometimes groups) of phonemes like *i/e*, *f/v* evidently form special units which, being conditioned by morphemic circumstances, are called *morphonemes*. 1934 *Language* X. 335 The five Russian vowel morphonemes are very variable... The consonant morphonemes are: [p, p₁, b, b₁, ...]. *Ibid.* 340 The interchange here is morphonemic, and does not properly concern us in a purely phonemic study. 1942 *Ibid.* XVIII. 309 Summarizing briefly Trager's article '[The Phonemes of Russian]' (*Language* 1934, No. 4) and generally valuing its positive outlook, Reformatsky deplores his terminological unclearness connected with [his] use of [the] word 'morphoneme'. 1966 J. VACHEK *Linguistic School of Prague* iv. 81 The generativists after establishing the morphonemic make up of their strings, proceed to 'rewrite' the morphonemes by concrete sounds found in the phonetic implementations of these strings.

morphonology (mɔ:'fɔnɒlədʒi). *Linguistics.* [f. Gr. μορφ-ή form + PHONOLOGY.] A term used by the Prague school of linguists for the study of the phonology of morphemes. So **morphono'logic**, **morphono'logical adjs.**

[1929 *Travaux du Cercle Linguistique de Prague* I. 85 La grammaire doit comprendre encore un chapitre particulier, qui étudie l'utilisation morphologique des différences phonologiques, et qui peut être appelée la 'morpho-phonologie' ou, en abrégé, la 'morphologie'.] 1933 *English Studies* XV. 87 That part of phonology which examines the phonological structure of morphemes, is called *morphology*. 1935 *Amer. Speech* X. 252/2 Another branch of phonology, established by the Prague linguists, called *morphonology*,... examines the phonological structure of morphemes. 1936 *Ibid.* XI. 114 Morphological phonology or 'morphonology',... investigates the morphological use of

phonemes or groups of phonemes, or more inclusively, for phonological means. 1949 H. SPANG-HANSEN in *Travaux du Cercle Ling. de Copenhague* V. 69 Morphonologic or morphemic monographs have no direct bearing on this subject either, since they also presuppose that the phoneme inventory has already been established. 1950 *Lingua* II. 241 This morphonology, according to Trubetzkoy, has a threefold task: 1. the investigation of the phonological (i.e. phonematic) structure of the morphemes, 2. the investigation of the combinatorial sound-changes... 3. the investigation of the series of sound-changes... which have a morphological function. 1966 J. VACHEK *Linguistic School of Prague* iv. 81 The other recent trend in linguistic thinking that has substantially contributed to the revival of interest in morphonology is the stratificational approach by Sydney M. Lamb and his colleagues. *Ibid.*, The first language to be characterized from the morphonological point of view was... Russian. 1971 tr. *Akhmanova's Phonology, Morphology, Morphology* ii. 82 Professor Vachek speaks of the present state of morphonological research... The 'generativist and transformationist' morphonology is, perhaps, best described as 'codificational morphonology'.

morphonomy (mɔ:'fɔnɒmi). *Nat. Hist.* [f. Gr. μορφ-ή form + -νομία, f. νόμος law.] The science concerned with the laws of form in animals, plants, and crystals.

1856 in MAYNE *Expos. Lex.*, and in later Dicts. Hence **morpho'nomical a.**, of or pertaining to morphonomy (*Cent. Dict.* 1890).

morphophoneme (mɔ:'fɔu'fɔni:m). *Linguistics.* [f. Gr. μορφ-ή form + PHONEME.] One of the variant phonemes which belong to the same morpheme.

1934 M. SWADESH in *Language* X. 129 Morphologically distinct phonemes are called morpho-phonemes. A morpho-phoneme is one of a class of like phonemes considered as components of actual morphemes which behave alike morphologically, i.e., have a like place in the same mutation series. 1939 L. BLOOMFIELD in *Travaux du Cercle Linguistique de Prague* VIII. 106 The morphophoneme u seems to occur in only one suffix. 1947 C. F. HOCKETT in *Language* XXIII. 323 Morphophonemic statements may involve morphophonemes—that is, the symbols used for phonemes, plus supplementary ones, with special definitions as to phonemic value under varying circumstances—or they may not. 1957 N. CHOMSKY *Syntactic Structures* iv. 33 The elements that figure in the rules can be classified into a finite set of levels (e.g. phonemes and morphemes; or, perhaps, phonemes, morphophonemes, and morphemes). 1964 E. BACH *Introd. Transformational Gram.* ii. 25 We distinguish the final morphophonemes in *laugh* and *wife* on the basis of their plural formation. 1968 *Language* XLIV. 508 The major thesis of this paper is that the most efficient description of morpheme alternants requires the use of morphophonemes, and, moreover, that these morphophonemes do in fact constitute psychologically real units. 1972 *Ibid.* XLVIII. 372 In Turkish, the target is satisfied at a level preceding the application of the first law of vowel harmony, which maps the morphophonemes *A I U* onto their respective phonetic reflexes.

Hence **morphophonem'atic (rare)**, **morpho'phonic adjs.**, **morpho'phonically adv.**

1939 [see MORPHOLEXICAL a.], 1944 *Amer. Speech* XIX. 136 The 'neutrality' of *e* in Hungarian and Finnish is not phonetic but morphophonemic. 1951 Z. S. HARRIS *Methods in Structural Linguistics* xiv. 239 The *al* of *moral* would appear to be morphophonemically [æ:l], where [l] represents phonemic zero before *ly*, but [l] otherwise. 1957 *Publ. Amer. Dial. Soc.* xxviii. 58 Morphophonemically *be* behaves like an auxiliary, regardless of its complement. 1960 C. E. BAZELL in *Year's Work in Eng. Studies* 1958 47/2 Evidence for the diphthongal character of Gothic *iu* is largely morphophonemic (e.g. the alternation *triu/triwa*). 1964 D. WARD in D. Abercrombie et al. *Daniel Jones* 390 There are some departures from the morphophonemic principle in Russian, including such sporadic ones as, for example, *nozdrj* 'nostrils' (cp. *nos* 'nose'). 1965 *Canad. Jnl. Linguistics* Spring 169 Most noun stems [in Eyak] are morphophonemically invariable. 1968 P. M. POSTAL *Aspects Phonol. Theory* vi. 117 Even setting up new allomorphs like 'is', etc. does not avoid the consequence that the morphophonemic rules must appeal to categorial properties. 1970 *Bible Translator* XXI. 25 There is reason to believe that most function morphemes should be read at sight rather than 'sounded out', and this also supports the idea of writing such morphemes morphophonemically. 1971 tr. *Akhmanova's Phonology, Morphology, Morphology* ii. 72 It is quite impossible to formulate any morphophonemic rules to explain the would-be substitution of [-a] for [-i] or [-y].

morphophonemics (mɔ:'fɔu'fɔni:miks), *sb. pl.* [f. prec. + -ICS.] The study and description of the phonemic aspects of the constitution of morphemes.

1939 L. BLOOMFIELD in *Travaux du Cercle Linguistique de Prague* VIII. 105 The present paper describes... the internal *sandhi* or *morphophonemics* of the language. 1953 [see *morpheme-sequence*]. 1957 S. POTTER *Mod. Linguistics* vii. 146 As we proceed from morphophonemics, and morphology proper, to syntax, so we observe a rise in the scale of semantic values. 1965 B. M. H. STRANG *Metaphors & Models* 15 The study of how a language encodes its different meanings is called *morphophonemics*. 1968 *Amer. Speech* XLIII. 233 The author includes a description of Jamaican Creole... morphophonemics. 1972 *Language* XLVIII. 805 This negative is realized from the sentence modality without going through the morphophonemics of pre-verbal location. 1973 *Computers & Humanities* VII. 218 How does one handle the unbelievably complex morphophonemics in choosing headwords?

morphophonics (mɔ:'fɔu'fɔniks), *sb. pl.* [f. Gr. μορφ-ή form + PHONICS *sb. pl.*]

= MORPHOPHONEMICS *sb. pl.* (see also quot. 1962). Also **morphophone**, a unit representing

the class of phonemes occurring in dialectally different pronunciations of morphemes; **morpho'phonic a.**

1962 E. F. HADEN et al. *Resonance-Theory for Linguistics* iii. 30 Such sets of allophones, as expressions of morphological units, are *morphophonemic expressions*. *Ibid.* 40 Morphophonics... is the intermediate area between phonology and morphology... Morphophonics is the process of transposing phonemic entities from the context of phonology into the context of morphology. 1967 H. L. SMITH in *Language* XLIII. 1. 306 A three-stratum, twenty-seven level model for linguistic analysis indicates structural units—the *morphophones*—between phoneme and morpheme. Morphophones are seen as the basic units of the morphemes, and are themselves composed of dialectally different phonemic variants, which are non-contrasting in the same lexical items. *Ibid.* 311 From one point of view, the morphophone can be seen as a sort of 'holding company' or 'super-family' of different phonemes which are non-contrasting in the same words. But from another point of view, the morphophone is a unit of the language as a whole, and as a unit furnishes the basis of what might be thought of as 'higher order' or 'higher level' contrasts. *Ibid.* 323 Substitutions and interchanges are aspects of the morphophonemic system. *Ibid.* 341 The donor language's morphophonics have been subject to a pretty thorough Anglicization. 1972 G. L. TRAGER *Lang. & Languages* iii. 49 The diacritic part of morphology, which examines the items of which morphemes are composed, may be called *morphophonics* (more commonly the term is *morphophonemics*, but there are good theoretical reasons for omitting the -em-). *Ibid.* 56 Morphemes with more than one allomorph are made up of or composed of morphophones, and it follows that morphemes with only one allomorph are also composed of morphophones... The morphophonemic alternations that occur can then be considered as relations between (simple) morphophones.

morphophonology (mɔ:'fɔu'fɔnɒlədʒi). *Linguistics.* [f. Gr. μορφ-ή form + PHONOLOGY.] = MORPHONOLOGY. So **morpho'phonological a.**

1934 *Language* X. 128 Morpho-phonology includes, in addition to the study of the phonemic structure of morphemes, the study of interchange between phonemes as a morphologic process. 1938 *Trans. Philol. Soc.* 106 The morpheme in the sense of Skalička and of the Prague Linguistic Circle is a morphophonological unit, and the corresponding phonomorphological unit is the phonemic function. 1953 K. JACKSON *Lang. & Hist. in Early Britain* ii. 548 The development of IE. *p* cannot be connected in any way with lenition, since it does not follow the special morphophonological rules for its occurrence. 1970 G. C. LEPSCHY *Survey Structural Linguistics* iii. 56 [One of the] main tasks of synchronic phonology [is]... to describe the morphological utilization of phonological differences (morphophonology or morphonology). 1973 *Archivum Linguisticum* IV. 47 No account is being taken here of regular, if often quite subtle morphophonological alternations, as between... *vivis* and *vayas*. *Ibid.* 50 The lengthening of the vowel of -ha in the example... belongs rather to the (morpho)phonology of the language.

morphophyly (mɔ:'fɔfɪli). *Biol.* [f. Gr. μορφ-ή form + φύλ-ον tribe + -Y.] The tribal history of living forms; that branch of phylogeny which treats only of form.

1879 tr. *Haeckel's Evol. Man* I. i. 24 Tribal history of forms (Morphophyly). 1890 in *Century Dict.*

morphoplasm (mɔ:'fɔu'plæz(ə)m). *Biol.* [f. Gr. μορφ-ή form + πλάσμα PLASMA, PLASM.] The vital substance of an organic cell.

1893 W. N. PARKER tr. *Weismann's Germ-Plasm* 38, I shall... call the vital substance of the cell the 'formative plasm' or morphoplasm... in contrast to the idioplasm.

morphoscopy (mɔ:'fɔskəpi). *Biol.* [f. Gr. μορφ-ή form + σκοπ-εῖν to look (see -SCOPE) + -Y.] = MORPHOLOGY (*Syd. Soc. Lex.* 1891).

morphosis (mɔ:'fɔusɪs). Pl. **morphoses** (mɔ:'fɔusɪz). [mod. L., a. Gr. μόρφωσις a shaping, f. μορφοῦν to shape, fashion, f. μορφή form.]

morphosyntax (mɔ:'fɔu'sɪntæks). *Linguistics.* [f. Gr. μορφ-ή form + SYNTAX 2.] A branch of

linguistic study which combines the study of morphology and syntax.

1961 F. W. HOUSEHOLDER in Saporta & Bastian *Psycholinguistics* 23/2 So also in morpho-syntax it should be possible to agree on definitions for terms like 'noun phrase', 'verb phrase', 'sentence', etc. 1967 *Word* XXIII. 472 In morpho-syntax the sequential chain model should perhaps not be completely disregarded. 1968 Y. MALKIEL *Essays on Linguistic Themes* i. 3 A few scholars have gone so far as to consolidate all of morphology and syntax into the single domain of 'morphosyntax', which forms the hard, inalienable kernel of linguistics. 1969 tr. *Akhmonova & Mikael'an's Theory Syntax Mod. Linguistics* ii. 26 He [sc. Brøndal] not only remained faithful to his conception of 'morphology' and syntax, but also developed it by introducing the notion of 'morphosyntax' to cover such phenomena as the functioning of words in sentences, the semantic modification of words in context, [etc.]. 1972 *Archivum Linguisticum* III. 89 As a final instance of the general validity of a systematic approach to diachronic morpho-syntax, let us examine a well-documented change within the verbal system of Romance.

Hence morphosyntactic *a.*, morpho-syntactically *adv.*

1959 F. W. HOUSEHOLDER in *Word* XV. 232 It does not appear that languages have a semantic structure which is separate and distinct from the morpho-syntactic one. 1962 H. C. CONKLIN in Householder & Saporta *Problems in Lexicography* 119 While an 'appeal' to meaning does not improve grammatical analysis, neither does an intuitive appeal to morphosyntactic form yield the most appropriate analysis of meaning and reference. *Ibid.* 121 The compounds *firewater* and *silverfish*... are endocentric morphosyntactically. 1968 *Word* XXIV. 55 The United States dialect refers to any variety of English set off from other varieties of English, phonetically, morphosyntactically, or lexically. 1969 tr. *Akhmanova & Mikael'an's Theory Syntax Mod. Linguistics* v. 119 The words... had to have canonical phonemic shapes, to 'behave' morphophonemically and morphosyntactically. 1970 *Language* XLVI. 332 The proposal does not spell out how one gets from the morphosyntactic surface structure to the phonemics.

morphotactics (mɔːfəʊ'tæktɪks). *sb. pl.* *Linguistics*. [F. Gr. *μορφ-ή* form + TACTICS.] The study of the sequence of morphemes in a language (MORPHEME *b*). Hence morpho'tactic *a.*; morpho'tactically *adv.*

1958 A. A. HILL *Introd. Linguistic Structures* vi. 68 The term 'phonotactics', now widely used, as well as other terms in '-tactics' to indicate sequences of items such as 'morphotactics' and 'logotactics', I owe to an unpublished lecture by Robert P. Stockwell delivered before the Linguistic Institute held at the Georgetown University Institute of Languages and Linguistics in 1954. *Ibid.* viii. 120 With most prebases, it is a morphotactic characteristic which identifies them. *Ibid.*, These are the 'grammatical endings' of familiar terminology. They can be defined morphotactically as morphemes which stand frequently before terminal junctures. *Ibid.* xxi. 414 Morphotactics gives us the partial predictability of morphemes and allomorphs. 1962 E. F. HADEN et al. *Resonance-Theory for Linguistics* iii. 35 Whereas in morphemics our task is to identify the form and the property of a grammatically functioning unit, in morphotactics we focus our attention on such a unit occurring in a sequence of morphemes... The morphotactic identification will be made with the same criteria for determining Form and Property as in morphemics. *Ibid.* 40 Morphotactics complements morphemics with morphology in a manner exactly parallel to phonotactics and phonemics within phonology. 1966 S. M. LAMB *Outl. Stratif. Gram.* ii. 23 When a lexonomic ordering is of elements belonging to different morphotactic classes, e.g. verb stem and verb suffix, it is up to the morphotactics to determine their relative order. 1967 D. G. HAYS *Introd. Computational Linguistics* xi. 184 The morphotactic rules come to light as restrictions on sequence are found... The establishment of the morphotactics can be exceedingly simple or as complex as the development of a full syntax. 1970 G. SAMPSON *Stratificational Gram.* vi. 59 The morphotactics generates sequences of 'words' (M-Word), separated by the downward-determined element 'word-boundary'. *Ibid.* 62 The preference value of this derivation is six, one from the semotactic trace, four from the lexotactic, and one from the morphotactic.

morphotectonics (mɔːfəʊ'tɛktɒnɪks), *sb. pl.* [F. Gr. *μορφ-ή* form + -O + TECTONICS.] The branch of geomorphology concerned with the form and structure of the larger features of the earth's surface (as continents, mountain ranges, river basins); also, the morphotectonic character or features of a region.

1956 E. S. HILLS in *Jrnl. Geol. Soc. Austral.* III. 1 (*heading*) A contribution to the morphotectonics of Australia. *Ibid.*, A model of this size does in fact afford a unique basis for the study of morphotectonics, since no other medium can present a synoptic view of the topography of an area as large as [a] continent. 1961 — in *Q. Jrnl. Geol. Soc.* CXVII. 79 What I have called morphotectonics implies, as well as structural geomorphology, something broader and applicable to regional study on a large scale, using topography as the primary criterion, but of course not neglecting all that may be known as to geology and geophysics. 1968 R. W. FAIRBRIDGE *Encycl. Geomorphol.* 734/1 The concept of 'Gondwanaland' in the southern hemisphere... evolved in the late nineteenth century... on the basis of extraordinarily similar morphotectonics, as much as from common features of stratigraphy, paleontology and paleoclimate. *Ibid.* 734/2 Up till now only one attempt has been made at a detailed world survey of morphotectonics.

Hence morphotec'tonic *a.*, of or pertaining to or seen from the point of view of morphotectonics.

1961 *Q. Jrnl. Geol. Soc.* CXVII. 84 A purely morphotectonic map for Egypt... shows, firstly, that it is not possible to conceive of the region as an elliptical upwarp. 1967 *Geogr. Abstr.* A. 280 The Provence foldings south-east of the Durance and the Verdon confluent give a good summary of the morphotectonic evolution of the Provence Range. 1973 *Nature* 2 Mar. 43/2 The morphotectonic features shown in Figs. 1 and 3 show a close agreement between structure and topography.

morphotic (mɔː'fɒtɪk), *a.* *Biol.* [ad. Gr. type **μορφωτικός*, f. *μορφόν* to form, f. *μορφή* form.] Formative; contributory to organic structure.

1876 BARTHOLOW *Mot. Med.* (1879) 544 Cupping and leeching... may diminish... the proportion of the morphotic elements. 1891 in *Syd. Soc. Lex.*

morphotomy (mɔː'fɒtəmi). *Biol.* [F. Gr. *μορφ-ή* form + -τομία cutting, f. *τομ-*, *τέμνειν* to cut, after *anatomy*.] The art of dissecting the different parts of any organized body for purposes of morphological investigation (*Syd. Soc. Lex.* 1891).

morphotropism (mɔː'fɒtrəpɪz(ə)m). *Cryst.* [f. as next; see -ISM.] = next.

1905 *Amer. Chem. Jrnl.* XXXIV. 104 The chapter on Morphotropism deals with the dependence of the crystal structure on the chemical constitution of the body. 1959 tr. *W. F. de Jong's Crystallogr.* 184 If a change of structure that occurs by replacement becomes so great that we no longer want to use the term 'isomorphism', we speak of morphotropism. 1966 *McGraw-Hill Encycl. Sci. & Technol.* VIII. 599/1 Organic compounds also show morphotropism.

morphotropy (mɔː'fɒtrəpi). *Cryst.* [ad. G. *morphotropie* (P. Groth 1870, in *Ann. d. Physik und Chem.* CXLI. 39), f. Gr. *μορφ-ή* form + τροπή turning.] (The study of) the progressive change in crystal structure brought about by replacing one of the species of atom or radical in a crystal by other species.

1900 *Rep. Brit. Assoc. Adv. Sci.* 1900 167 Morphotropy and isomorphism have a common cause, and... this is more likely to be discovered by the crystallographic study of substances showing morphotropic relationships than from the examination merely of materials likely to exhibit isomorphism. 1924 W. S. STILES tr. *F. Rinne's Crystals & Fine Struct. Matter* ix. 105 P. v. Groth has founded the science of morphotropy. By comparing crystalline forms, he succeeded in showing how the replacement of H by (OH), NO₂, NH₂, CH₃, Cl, in benzene (C₆H₆) manifests itself in changes of corresponding angles, and ultimately the symmetry. 1939 R. C. EVANS *Introd. Crystol Chem.* iii. 60 The structural importance of the quantitative lattice theory... lies in the light which it throws on... the problems of polymorphism and morphotropy.

So morpho'tropic *a.*, characteristic of or exhibiting morphotropy.

1899 *Mineral. Mag.* XII. 66 The three minerals may be members of a morphotropic series, in which the vertical crystallographic axis increases in length with an increase in the amount of lead. 1937 W. L. BRAGG *Atomic Struct. Minerals* ix. 150 The members of the chondrodite series are interesting because of the morphotropic relationships which exist between them. 1959 tr. *W. F. de Jong's Gen. Crystallogr.* 184 A morphotropic range of compounds is one in which the replacing atoms differ gradually in one property—for example, in size or polarizability. 1973 A. I. KITAIGORODSKY *Molec. Crystals & Molecules* i. 18 Morphotropic changes associated with a loss of symmetry are accompanied by an increase in the packing density.

The L. *mortārium* in the sense 'product of trituration' (applied by Juvenal to drugs, and by Vitruvius to mortar) is commonly regarded as a transferred use of *mortārium* *MORTAR* sb.¹, which was applied by extension to the trough in which mortar was mixed. It is possible, however, that the two senses of the Latin word are equally original, the suffix -ārium being employed in two different functions.]

A material consisting of lime and sand mixed with water, which is used to make the joints between stones and bricks in building, and which, when set, binds them together into a solid mass. Also applied to materials of other composition used for the same purpose.

Identical with the alleged F. *mort d'eschine* (lit. death of the spine), for which Fitzherbert 1534 (*Husb.* §119) quotes the proverb 'Mort de langue et de eschine sont maladyes saunce medecine'. It is probable that *mort* here is a mistake for *morve*, running of the nose, glanders (for which, or its dial. variant *mourve*, Cotgr. has erroneously *mourrûe*). The notion that the morbid matter of glanders came from the spine was generally held. The 16th c. Eng. name for the disease, MOURNING of the chine is prob. a corruption of the original form of the Fr. term. Fountainhall's *mord de chien* is pseudo-etymological (as if 'bite of dog').

moss (mɒs), sb.¹ Forms: 1, 3, 6 mos, 2, 6 mose, 4-6 mosse, 5 moos, mosh, 4- moss. [OE. *mos* neut., bog (also 12th c. *mose* moss), corresponding to MDu., MLG. *mos* bog, also moss, lichen, mildew (Du. *mos* moss), OHG., MHG. *mos* (mod.G. *moos*) bog, moss, MSw., Da. *mos*:—OTeut. **muso*]; declensional variants are represented by Flemish *moze* mud, ON. *mose* wk. masc., bog, moss, Sw. *mosse* masc., bog, *mossa* fem., moss. From a different ablaut-grade of the same root (OTeut. **meus-*, *meuz-*) are OE. *mēos* (? masc.) moss (see *MESE sb.*¹), OHG. *mios* masc., moss (mod.G. *mies* masc., neut., moss, lichen; in some dialects bog), ON. *mýr-r* MIRE sb.¹ Cognates outside Teut. (f. Indogermanic **mus-*) are L. *muscus* moss, OSl. *mūchū* moss, ? Lith. *musai* scum on sour milk. The Fr. *mousse* fem. (Pr. *mossa*), moss, is prob. of Teut. origin.

All branches of Teut. exc. Gothic have the word or its cognates in both the senses 'bog' and 'moss' (the plant). As moss is the characteristic plant of bogs, there is no reason for doubting the identity of the word in the two senses. Which is the prior sense is doubtful; the fact that the cognates outside Teut. have the sense 'moss' only is not decisive. The sense 'bog' is the only one known in OE.; but the use as the name of the plant (called in OE. *mēos*) presumably existed in OE., as a late adoption from continental Teut. would be very improbable. The 12th c. northern form *mose* (sense 3, quot. c 1150) is perh. adopted from ON.; it cannot be the ancestor of the mod. form with unvoiced (s).]

Mössbauer ('mɔːsbəʊə(r)). *Physics.* The name of Rudolf L. Mössbauer (b. 1929), W. German physicist, used *attrib.* with reference to an effect he reported in 1958, in which gamma rays emitted by an atomic nucleus bound in a crystal exhibit very little Doppler line-broadening (owing to the absence of translational motion of the nucleus) and have almost all the energy released in the transition between nuclear states (owing to the entire mass of the crystal being involved in the recoil of the emitting nucleus, which is consequently very small), so that it is possible to obtain resonance absorption in another similar nucleus with a high degree of precision and hence derive information about the energies and widths of nuclear energy levels; so **Mössbauer effect**, **spectroscopy**, etc.

1960 *Physical Rev. Lett.* IV. 28 (*heading*) Observations on the Mössbauer effect in Fe⁵⁷. 1960 *Ibid.* V. 364/2 The Mössbauer spectrum was observed with an Fe absorber, enriched to 75% Fe⁵⁷ and of equivalent thickness 2.2 mg/cm². 1962 *Listener* 6 Dec. 964/2 Physicists all over the world scramble to examine the 'Mössbauer effect' to find out by how much gravity makes a clock run slow. 1965 PHILLIPS & WILLIAMS *Inorg. Chem.* I. v. 146 The Mössbauer shift can then be correlated with the degree of ionic bonding. Thus the shift of the γ -ray energy from the value found in metallic Sn increases from SnI₄ through SnBr₄, SnCl₄, and SnO₂ to SnF₄. 1966 *Jrnl. Physics & Chem. Solids* XXVII. 85 The Mössbauer effect was used to measure the line shifts and electric quadrupole splittings of the 14.4 keV level of Fe⁵⁷ in absorbers at 81°K and 300°K of the marcasite structure compounds FeS₂, FeSe₂, FeTe₂, and FeSb₂. 1970 *Physics Bull.* June 247/1 The Mössbauer nuclear resonance is the narrowest spectral line so far available. 1971 GREENWOOD & GIBB *Mössbauer Spectrosc.* i. 1 The Mössbauer effect has been detected in a total of 88 γ -ray transitions in 72 isotopes of 42 different elements. 1971 *Sci. Amer.* Oct. 86/2 Mössbauer-effect spectroscopy is now used extensively for studying chemical bonds, the architecture of molecules and the distribution of electronic charge around atoms. 1973 G. M. BANCROFT *Mössbauer Spectrosc.* iii. 47 In comparison to many spectroscopic experiments, the basic Mössbauer equipment is rather simple and inexpensive. *Ibid.*, A Mössbauer spectrum consists of a plot of the number of gamma ray photons transmitted through an absorber as a function of the instantaneous relative velocity of the source with respect to an absorber.

The OE. *māst*, the normal representative of the Com. Teut. type, has been found only in Northumbrian, but it is not certain that it existed only in that dialect. The ordinary OE. form (WS. *māst*, Kentish *mést*) has abnormal umlaut, and seems to descend from a prehistoric **mā-ist*, a reformation due to a consciousness of the grammatical relation of the word to *má* MO. The umlaut form survived, in the south, down to the 15th c., but seems to have now entirely disappeared even in dialects. (The 19th c. northern form *meast* represents OE. *māst*; the coincidence with the early ME. *meast*:—OE. *māst* is accidental.) The establishment of *most* as the only form in the midlands and south was probably due to the influence of the related *mo*, *more*.

The southern form *most*, occasionally spelt *moist*, was often used, esp. in rimes, by the Sc. poets of the 15-16th c.]

most, obs. form of MUST *sb.* and *v.*

-**most** (moust, most), *suffix*, forming *adjs.* in the superlative degree (many of which are also used as *advs.*), is an altered form of OE. *-mest* (= Goth. *-umist*), a combination of two distinct OTeut. (and Indogermanic) superlative suffixes, *-mo-* (which occurs, e.g., in OE. *forma* first, *hindema* last, and in L. *primus* first), and *-isto-* = *-est*. Those OE. superlatives in *-mest* which either descend from OTeut., or are extensions of OTeut. superlatives in *-mo-*, are formed not on *adjs.* but on prepositional or demonstrative stems; examples are *æftemest* (see AFTERMOST), *formest* or *fyrmost* FOREMOST, *inmost* INMOST, *niðemest* lowest, *ufemest* or *yfemest* (see OVEEMEST), *utmost* or *ytmost* UTMOST, *ymest* (= Goth. *auhumists*) highest; the only instance (among the words belonging to this primary group) of formation on an *adj.*-stem is *midmost* MIDMOST. On the analogy of these older words, the suffix *-mest* was in OE. used to form superlatives of several *adjs.* of local and temporal signification, as *lætmost*, *siðemest* latest, *éastmost*, *westmost* (also *westema*), *norðemest*, *súðemest*.

In late OE. the *adjs.* in *-mest* came to be regarded as compounds of *mæst* MOST, as the frequent spelling *-mæst* shows. The subsequent history of the written form of the suffix coincides with that of the *adj.*, exc. that the absence of stress led to the occasional retention

of the spelling *-mest* (beside the quasi-etymological *-most*) down to the 16th c. In mod. English the formal pronunciation of the suffix is assimilated to that of the *adj.*, though colloq. the normal pronunciation (moust) is usual.

As the superlatives in *-mest*, *-most* corresponded to comparatives in *-er*, analogy led to the insertion of *r* or *er* before the suffix: thus *aftemest* was in early ME. altered to *aftermost*, and *ovemest* was replaced by *overmost*. In the 15th and 16th c. the suffix *-most* (interpreted as identical with MOST *a.*) was added to many comparatives in *-er*, on the analogy of earlier adverbial formations in *-MORE*, as in *furthermost*, *hindermest*, *innermost*, *lowermost*, *outermost*, *uppermost*, *uttermost*.

In ME. and modern English, the suffix has been appended to certain positive *adjs.*; to *sb.* used adjectively, as in *backmost*, *bottommost*, *topmost*; and to *advs.*, as in *downmost*, *upmost*, *hithermost*.

The restriction of the application of the suffix to words denoting position in place, time, or serial order, which existed in OE., has almost universally been adhered to in the subsequent formations; the only exception, in a word that has obtained any degree of currency, is *bettermost*. The only other violations of the rule occur in mere nonce-words, as in the following quot.

[A WGer. and Gothic preterite-present verb (wanting in Scandinavian): OE. *mōt* corresp. to OFris. *mōt*, OS. *mōt*, *muot* may, must (Du. *moet* must), OHG., MHG. *muoz* may, must (mod.G. *mus* must), Goth. *ga-mōt* (it) has room, related to OHG. *muoza* (mod.G. *musse*) leisure:—OTeut. type **mōtā*.

The primary sense seems to be that preserved in Gothic, from which the sense 'is permitted, may' can easily have been developed. The transition from this to the sense 'is obliged, must' is more difficult to explain; it may have arisen

from the use in negative contexts, where the two senses ('may not', 'must not') are nearly coincident. Normally, OTeut. *mōt should be the perfect of a verb *mat-, but there is no trace of a vb. of this form with a suitable sense; the word may be related to *met- to measure (see METE v.).

If the verb had come down to mod. English, its form would have been *moot*. Exc. in northern dialects, it seems not to have survived in colloquial use beyond the 15th c., or at latest the middle of the 16th c. In the 16th c. it was often confused with *mought* (see MAY v.), with which it was prob. identical in sound. In the early part of the 16th c., the verb was still used correctly as a present tense, though commonly misspelt *mought*. In the archaic use of Spenser and later writers, on the other hand, it is, even when written *mote*, almost always a preterite except in traditional phrases.

The pa. t. (OE. *mōste*) is treated under MUST. The survival of the inflected 2nd person (OE. *mōst*) is doubtful after the early part of the 15th c., on account of its formal coincidence with the pa. t., which by that time had already assumed the function of a present.]

As in the case of FATHER, the substitution of *th* for the earlier *d* dates from the beginning of the 16th c., though the pronunciation with (ð) probably existed earlier. The occasional occurrence of the spelling *moper* in the 14th c. (e.g. in the Göttingen MS. of the *Cursor Mundi*) has prob. no phonetic significance, being due to association with words like *broper*, *oper*, which in fact occur in the immediate context of several of the examples. The development of OE. *ó* to mod.E. (a) (through *u*, *u*, *o*) is normal in the case of words in -*ther*, -*der*: cf. *brother*, *other*, *rudder*. In OE. the genitive sing. normally coincided in form with the nom., and many instances of the uninflected genitive occur in ME. and early mod.E. (see also 15 b). The genitive *móderes* is common in the Northumbrian gospels (10th c.).

1. a. A female parent; a woman who has given birth to a child. Correlative with *son* or *daughter*.

As with other terms of relationship, *my* is (exc. in poetic language) commonly omitted before *mother* used vocatively. On the other hand, in the 3rd person the use of *mother* for *my mother* is colloquial and familiar; in the middle of the 19th c. it was regarded as vulgar, or at least as unfashionable, but has now regained currency.

Mother is also used colloquially by a husband addressing or referring to his wife.

mother ('mʌðə(r)), sb.² [Corresponds in meaning to MDu. *moeder*, *moer* (in mod. Du. *moer*), G. *mutter*, identical in form and gender with the equivalent of MOTHER sb.¹

Comparison with the synonymous It., Sp. *madre* scum of liquids, F. *mère* (*de vinaigre*), OF. *mere* 'vendange pressée' (= sense 3 below), seems to show that this word, in Eng., Du., and Ger., is really an application of MOTHER sb.¹ The transition of sense is difficult to explain; but most probably the scum or dregs of distilled waters and the like was regarded as being a portion of the 'mother' or original crude substance which had remained mixed with the refined product, from which in course of time it separated itself. (The term may possibly have belonged originally to the vocabulary of alchemy.) An explanation sometimes given, that 'mother of vinegar' was so called on account of its effect in promoting acetous fermentation, does not agree with the history of the use. It has been pointed out that Gr. *γὰρ*, old woman, is used in the sense 'scum, as of boiled milk', but the coincidence is prob. accidental.

Most etymologists have regarded the word (with its Du. and Ger. equivalents) as altered by popular etymology from Du. *modder* masc., mud, mire (for which Middle Du. has a rare variant *moeder*, occurring chiefly in derivatives) = LG. *modder*, *moder* (whence mod.G. *moder*), HG. dial. *motter* masc. (for which a variant *mutter* occurs). This notion goes back to Kilian's (Du. or Flemish) dictionary of 1598, which contains the two following entries: (1) '*Modder, moder, moyer, more, moer, limus, cœnum mollius, lutum, volutabrum; Ang. mire, mudde*'; and (2) '*Modder, moeyer, moeder, grondsoepe, feux, fœces, crassamen, crassamentum; Ang. mother*'. But there appears to be no evidence that the form *modder* was ever used for 'mother' or 'scum', nor is that sense recorded for Ger. dial. *motter*.]

The early forms (with which cf. those of MEDLEY) suggest adoption of an AF. **motelé*, which may possibly have been formed on the native ENG. MOTE *sb.*, speck, spot; cf. *speckled*, with which in some early examples *motley* seems nearly synonymous. Formally the word might be derived from OF. *motel*, early mod.F. *motteau* little clod, also 'clot of congealed moisture' (Cotgr.), dim. of *mote*, *motte* clod, but this does not seem quite satisfactory with regard to sense. Connexion with early mod.F. *matellé* 'clotted, knotted, curdled, or curd-like' (Cotgr.) is improbable on grounds both of form and meaning.]

1913 *Arizona Republican* (Phoenix) 5 June 2/4 The motorcade can make its music self supporting and donate large and salubrious gobs of melody to the natives at all points along the line. *Ibid.* 4 July 4/2 This 'motorcade' came from a suggestion thrown out by the sporting editor of the Republican. It was immediately accepted by several local automobile owners, whereupon, the sporting editor [sc. Lyle Abbott] became the busiest man in Phoenix and hammered away at the 'motorcade' a term which, by the way, he had invented sometime before in order that newspapers might keep pace with the developments of vehicular transportation. 1924 *N. & Q.* 19 Apr. 288/1 A parade of motor cars... was termed in the local [Florida] papers a 'motorcade'. 1928 in *Amer. motorium (məʊ'tɔːrɪəm). [mod.L., f. *mōtorius* moving, f. L. *mōt-*, stem of *movēre* to move: cf. -ORY¹.] 1. *Psychol.* Collectively, the centres in the brain concerned in the function of voluntary muscle; that system of the body capable of initiating and putting into effect muscular movement.

1885 J. ROSS *Handbk. Dis. Nervous Syst.* 73 The central ends of the individual sensory mechanisms are unified by a collective centre—the *sensorium commune*—which is the general centre of nervous connections on the afferent side. It may also be supposed that the individual motor centres are unified by a general centre of nervous connections which may be regarded as a *motorium commune*. 1900 DORLAND *Med. Dict.* 398/1 *Motorium*, (1) a motor center; especially the common center of motor influences; (2) the motor apparatus of the body. 1924 R. M. OGDEN tr. *Koffka's Growth of Mind* 80 The optical sensorium and motorium can not be regarded as two independent pieces of apparatus, since for many types of performance they constitute a unitary organ. 1959 S. KOCH *Psychology* II. 76 For certain purposes, in dealing with transactions with the physical world (walking, performing a motor task, driving a car, etc.), the motorium may be considered to be the muscular apparatus of the organism. Even in such cases, however, it may prove to be useful to consider tools as a part of the motorium.

2. *Zool.* A cytoplasmic structure in some ciliate protozoa forming the centre of the neuromotor apparatus.

1914 R. G. SHARP in *Univ. Calif. Publ. Zool.* XIII. 83 We now come to the description of what is believed to be the most interesting structure in the anatomy of this organism [sc. the protozoan *Diplodinium ecaudatum*]... The possibility of this structure functioning... as a neuromotor apparatus is suggested and... the designation neuromotor apparatus will be used, and its constituent parts will be described as a motorium or motor mass. 1926 G. N. CALKINS *Biol. Protozoa* ii. 104 Certain special types of cytoplasmic kinetic elements such as myonemes, motorium, and conductile fibers, are characteristic of the ciliates. 1940 L. H. HYMAN *Invertebrates* I. iii. 65 All these fibrils may center in a small body, the motorium. 1966 *New Scientist* 3 Nov. 242/1 Another interesting feature of *Euplotes* is that, as Taylor first noticed in 1920, some of the cirri are connected by a system of minute fibrils to a structure near the front of the animal. This he called the motorium.

motorization (,məʊtəraɪzəʃən). [f. next + -ATION.] 1. *Psychol.* The process of making a presentation motorial in character. *rare*.

1901 *Amer. Jnl. Psychol.* XII. 304 The motorization of an exposed word would suggest another similar in sound. *Ibid.* 309 The single-word motorization does not make so much noise in consciousness.

HONDERMARD in E. DAVIES *Roads & their Traffic* vi. 130 The extent of motorization, expressed by the number of vehicles per 1000 inhabitants, has had to be periodically reviewed. *Ibid.* 132 Fig. 6.1... shows a significant correlation between the degree of motorization and national income in different countries. 1960 G. MIKES *How to be Inimitable* 57 This motorisation has developed into a war between the motorists and the authorities. 1969 *Daily Tel.* 26 Aug. 14/3

1890 *Boston (Mass.) Jnl.* 12 Apr. 4/4 Has it, then, become the established policy of the West End road, from the late vice president to the motor-men, that the public must learn that the electric cars cannot be fooled with? 1901 *Daily Record & Mail* 11 July 3 Hours and Wages of Motormen and Conductors. 1904 F. LYNDE *Grafters* xxiv. 298 The conductor and motorman of an early morning electric car. 1908 [see *dead man's handle* s.v. DEAD MAN]. 1935 'J. motor-minded (stress variable), *a.* [f. MOTOR *sb.* and *a.* + MINDED *ppl. a.*] 1. *Psychol.* Having a mind in which motor images predominate over visual and auditory ones; thinking largely in terms of movements.

1897 *Psychol. Rev. Monogr. Suppl.* II. i. 40 This, in itself, does not prove that motor-minded persons are less intelligent readers than auditory- or visual-minded. 1900 *Amer. Jnl. Psychol.* XI. 297 Consonants were not thought to be generally more important than vowels for word perception. The relative importance of these elements might depend upon the reader's tendency to be motor or auditory minded. 1904 W. JAMES in *Atlantic Monthly* Jan. 98/1 Every one knows that in some of us the material of thought is mainly optical, in others auditory, etc., and the classification of human beings into the eye-minded, the ear-minded, and the motor-minded, is familiar.

2. Interested in motor vehicles.

1927 *Glasgow Herald* 14 Oct. 8 With motor trade exhibitions running... in London (at Olympia) and in Paris... the motor-minded have got quite a lot to talk about.

Montagu of Beaulieu* xx. 254 Where the economic conditions guarantee an adequate volume of traffic, as between large cities, direct roads solely for fast traffic, i.e. motorways, must be constructed. 1937 [see AUTOBAHN]. 1955 *Times* 6 July 10/1 Motorways, 345 miles in total length, for motor traffic only, are to be built by the Government. 1959 *Radio Times* 23 Oct. 3/1 A motorway differs from all other types of roads in that it has no crossroads, no traffic lights, no pedestrian crossings. Certain categories of road-users are barred from it altogether; these include pedal cyclists, invalid carriages and 'L' drivers. 1964 *Daily Tel.* 22 Jan. 14 The British are relative newcomers to the motorway age. 1967 *Economist* 4 Nov. 495/1 The more central, shorter, but more expensive 'motorway box' favoured by the GLC. 1971 *Daily Tel.* 14 Sept. 2/6 This supports the 'motorway madness' theory of a false sense of security which makes drivers behave quite differently on motor-ways than on ordinary roads. 1972 J. MANN *Mrs Knox's Profession* v. 31 She had pulled into the motorway café, hating the look of it. 1973 R. BUSBY *Pattern of Violence* i. 15 He... gave them a name and the time of arrival of a motorway coach. 1973 *Guardian* 15 Oct. 14/1 Fog is the number one motorway menace with irrispirable... driving coming second. ¶ In 1843 MM. Mérimée and Lenoir (*Archit. Mil. au Moyen-Age*) fancifully applied the name *moucharaby* to a kind of balcony projecting from the walls of certain European mediæval castles. It does not appear that this application of the word ever had any actual currency either in Fr. or Eng.; but *moucharaby* was inserted with this explanation (its proper sense being ignored) in Ogilvie's *Imperial Dictionary* (1850), and the entry has been copied with verbal alterations and expansions into various later Eng. Dicts.
