in-[1], a prefix representing English *in* (*income, indwelling, inland,* etc.) but used also as a verb-formative with transitive, intensive, or sometimes little apparent force (*intrust*) or with verbs that assume the same phrases as **in-**[2], as **en-, em-, im-**[3]. [ME, OE; see IN]

in-[2], a prefix of Latin origin meaning primarily "in," but used also as a verb-formative with the same force as **in-**[1] (*incarcerate, incrustation*), also *out-* (*v.*). Cf. **em-, en-.** [< L, comb. form of *in* (prep.); c. IN]

in-[3], a prefix of Latin origin, corresponding to English *un-*, having a negative or privative force, freely used as an English native prefix, and forming words and their derivatives and of nouns (*inattention, indefensible, inexpensive; inorganic, invariable*); it assumes the same phrases as **in-**[2] (*incorporate, inmeasurable, illiterate, irregular,* etc.). In French, it became *en-* and thus occurs unfelt in such words as *enemy* (French *ennemi*, Latin *inimicus*, lit., not friendly). Also, **il-, im-, ir-.** < L; cf. Gk **n-**, Goth **un-**

—Syn. The prefixes IN- and UN- may both have, among other uses, a negative force. IN- is the form from the classical languages (Greek and Latin) and is therefore used in learned and technical words derived from those languages: *inaccessible, inaccuracy, inadequate,* etc. UN- is the native form going back to Old English, used in words of native origin, and sometimes used in combination with words of other origins if these words are in common use: *unloving, unmanly, unfeeling, unnecessary, unscientific, unalphabetical.* UN- is used with a frequently used word in a common meaning, as in *unsanitary* (not clean), and IN- with the same word in a more technical sense: *insanitary* (likely to cause disease). In England the prefix IN- is more commonly used than in the United States.

-in[2], a noun suffix used in a special manner in chemical and mineralogical nomenclature (*glycerin; acetin,* etc.). In spelling, usage wavers between *-in* and *-ine*. —Syn. 1, 3. IRONY, SARCASM, SATIRE indicate mockery of something or someone. The essential feature of IRONY is the indirect presentation of a contradiction between an action or expression and the context in which it occurs. In this figure of speech, emphasis is placed on the opposition between the literal and the intended meaning of a statement; one thing is said and its opposite implied, as in the comment, "Beautiful weather, isn't it?" made when it is raining or nasty. Ironic techniques expand the idea into a rhetorical figure, such devices as character development, situation, and plot to stress the paradoxical nature of reality or the contrast between an ideal and actual condition, set of circumstances, etc., freely ranging from the gentle to the stress the absurdity present in the contradiction between substance and form. Pope's *Rape of the Lock*, for example, deals with a trivial situation in terms and forms more suitable to the discussion of important circumstances. The heavy apparatus of mythology and allegory is used in the poem to show a multitude of nymphs, sylphs, gnomes, and mortals warring bitterly and heroically over a matter of interest to a lovely and flighty young girl by one of her admirers at a card party. Neither faction wins the prize, for the lock is finally placed in the heavens. IRONY differs from SARCASM in greater subtlety and wit. In SARCASM ridicule or mockery is used harshly, often crudely and contemptuously, for destructive purposes. It may be used in an indirect manner, and have the form of irony, as in "What a fine musician you turned out to be!" or it may be used in the form of a direct statement, "You couldn't play one piece correctly if you had two assistants." The distinctive quality of SARCASM is present in the spoken word and manifested chiefly by vocal inflections. SATIRE usually implies the writing of literature as literary and rhetorical forms, are exhibited in the organization or structuring of either language or literary material. SATIRE usually implies the use of irony or sarcasm for censorious or corrective purposes and is often directed at public figures or institutions, conventional behavior, political situations, etc.
