Complete Natal and Transit Aspects

Introduction

This is not a course in astrology, but a reference book of astrological interpretation that can be used with just about any astrological horoscope, geocentric or heliocentric, natal or transit.

If you are already interested in astrology, know your way around a bit, and have your natal chart, you need to read no farther. Just take any planetary pair aspect from your chart and look it up in the table of contents.

What makes this work more interesting is that all 765 planetary combinations are illustrated with a tarot-like card called an Astro*Image. It is about time that astrology had the same kind of graphic stimuli that tarot readings do and I hope you like these cards.

Each planetary combination (45 combinations in all) is shown in what professional astrologers consider the sixteen most popular aspects between planets. And each of these sixteen aspects include an Astro*Image card plus written meanings or interpretations for that particular planet-aspect combination for both natal chart and transits – over 765 combinations in all.

And each combination includes two interpretations, a natal interpretation which refers to your birth or natal chart and a transit interpretation which refers to what is happening in the sky overhead right now. If you would like to read more about the standard astrological theory of aspects, there is a short article toward the end of this book.

As you will see this is primarily a guidebook, a guide to the major astrological interpretations used by professional astrologers all over the world.

Complete Natal and Transit Aspects

And these brief interpretations are not intended as definitive statements. Nothing here is written in stone. The keywords, Astro*Image graphic cards, plus the various written interpretations are intended to spark your imagination and get you on the same page with what these astrological combinations might mean. They are not intended to be any kind of last word, but just a guide to get your own intuition and imagination going, so this should be kept in mind. That being said, if you know a little astrology, just jump in. If you are just learning, please read on for more instructions.

Complete Natal and Transit Aspects

A Word on Aspects

A word of advice about aspects for beginners and advanced astrologers. It has become a habit when looking at an astrological chart (whether natal or transit) to only list those aspects that are very exact, that is that have tight orbs. In my experience this habit closes the door on a lot of otherwise very useful astrology.

Each of us has the Sun, Moon, and the eight planets (and all their aspect combinations) in our natal chart, not just those exact few. While any given particular planetary pair may not be in an exact aspect, it is a fact that a major aspect is just about to occur or has just occurred recently for ALL planetary aspect pair.

In other words, each planetary pair is always in some part of the aspect cycle and it is worth our while to know where in the cycle each one is. This is explained in more detail in the article at the end of this book, but for now let me say this:

The solar system and planets are a functioning whole, all parts of which are needed. Two planets not in exact aspects don't just disappear from the heavens. Each planetary pair (all 45 of them) is always in some very important part of the aspect cycle. If they are not exact, they are always just past one aspect and just before the next one. Look up each one and learn more about yourself.

How to Use this Book

First of all you will need some kind of astrological chart. This could be a chart for the day you were born, which is called in astrology a “natal chart.” You could also use a chart for today (or any other date in your life which is significant) which is called a transit chart. Both natal and transit charts work with this book just fine.

As to where you can get such a chart? There are dozens of inexpensive computer programs plus all kinds of web services that will calculate your chart, some of them are even free. Just about every astrological program and web service will provide you with a list of planets and most also provide at least the major planetary aspect pairs that are prominent for that chart. If not, these aspect pairs are easily to locate and you can calculate the aspects yourself. There is a section in the back of the book that shows how to calculate them yourself.

What is in This Book?

The book covers the 45 main planet combinations used by professional astrologers. For each planetary pair (i.e. Sun/Moon, Mercury/Mars, etc.) there is an Astro-Image card and a list of keywords for that pair. Next, for each planetary aspect pair, there are the sixteen major aspects, each with an Astro*Image card and two interpretive texts, one for that aspect in a natal chart and one for the aspect in a transit (sky overhead today) chart.

For each planetary pair, determine what aspect that pair is forming and look up that aspect in the book under that particular planetary pair. For example:

Complete Natal and Transit Aspects

If it is a Full Moon today, that would be an aspect of 180° , which is called an “Opposition” aspect. Using the book, look up the Sun/Moon (SU/MO) combination and find the Opposition aspect. Under that aspect (SU/MO Opposition), read the second text piece, which refers to transit events, events happening overhead now. The first piece of text is for natal charts, which indicates that SU/MO Opposition as part of your birth chart or natal makeup.

Note: Transit aspects of each planet to itself (example: Sun to Sun) are not listed in this book.

Complete Natal and Transit Aspects

SU/MO Natal: Conjunction

You are an enthusiast, with a natural feel for new beginnings, and you know how to marry ideas and resources. Your fresh approach can light up your life time (and the lifetimes of others) with clarity and visions of what can be accomplished, if work is done harmoniously - hand in glove. In this way, you can be somewhat visionary. In fact, you don't always understand the meaning or implication of the impulses that come to you, and only later find out their value. You act on instinct and inner feelings.

Complete Natal and Transit Aspects

MO/SU Transit: Conjunction

This is on or around the New Moon, so you should be able to sense a new beginning, with perhaps some fresh ideas stirring or surfacing, a renewed impulse or desire that something can and should be accomplished. At the very least, you should sense that you are in a new time and that the slate has been wiped clean. Something fresh is stirring inside, and, although you may not yet be able to see what it is, you should be able to feel what needs to be done, either now or a little farther on up the road. A lot of past baggage has been dropped.

Complete Natal and Transit Aspects

SU/MO Natal: Waxing Semi-Sextile (30°)

You enjoy putting new ideas to work, and are very community minded, using any cooperation available and all the help you can get. You want the fresh plans you are coming up with to succeed and become manifest, but you insist on doing it harmoniously.

Not everyone can see what you envision, and one thing you can expect is some resistance to these new ideas and plans for the future. This could mean that push may come to shove and things at times get stuck or a little sticky. Old habits halt progress. You should unusually be able to move beyond whatever may be obstructing your way, and actually get moving on things that need to be done. But you will find that this may not always be easy. You are very community oriented.

Complete Natal and Transit Aspects

MO/SU Transit: Waxing Semi-Sextile (30°)

Here is a time to put new ideas that you feel coming up within you to work. It may well be at this point that you feel a sense of a renewed impulse, an inner feeling that you can get your hands around and more-or-less shape into a plan of action. And you are not above asking for help, so this could involve a more community-oriented frame of mind, one where you reach out so that many hands can make more sense of things. Most important may be to not lose sight of the original impulse that gave rise to these ideas and current plans.

Complete Natal and Transit Aspects

SU/MO Natal: Waxing Semi-Square (45°)

Your own inner zeal and the faith you have in the various plans and ideas you come up with can meet resistance from the world around you. You don't always find the support you need, and can be brought up short by one obstacle or another. At this times, what may be important to remember is to not be discouraged or turn back from what you know in your heart is right, but, instead, to move forward, working your way through and around whatever problems present themselves. You feel that the ideas you champion have a real future and the best way to achieve that is to press on, through thick or thin. You may have trouble when it comes to choosing what will work and what is still not ready for prime time.

Complete Natal and Transit Aspects

MO/SU Transit: Waxing Semi-Square (45°)

Here is a time when you can feel pulled between cherishing the ideas that have inspired you, as opposed to the risk of staining those ideas by actually making plans that implement them, which could mean pushing some parts of the plan forward, and abandoning others for another time. Traditional advice at this point would be to have you take what you can and move forward, and don't try to do everything at once. This is not a point to take obstacles as a sign to give up or retreat. This is a time for forward motion, and some kind of resistance is normal.

Here is a chance to move beyond old habits, through whatever may be obstructing your way, and actually get moving on things that you have decided need to be done. No one ever said it would be easy, and this is one of those times. Don't doubt your direction, and waste time. Move forward step by step and you soon will be through it. It should not take more than a day or two.

Complete Natal and Transit Aspects

SU/MO Natal: Waxing Sextile (60°)

In your mind, dreams and plans for the future involve cooperation and, above all, harmony, and you know that a balanced flow of energy goes hand in hand with real progress. On the whole, you will have great energy at your command to make your plans real, and you are always looking for times when things free up a bit, and the going is easier. But note too, that you may have more than your share of obstacles to work through. For the sake of what you most care for, you may find it better to let outmoded or unimportant things pass, and to always look toward the goal. Try to keep your eye on the ball. This may require acceptance of "what is" (a not perfect situation), in order to get your plans and dreams launched.

Complete Natal and Transit Aspects

MO/SU Transit: Waxing Sextile (60°)

You are now in a time, when things are freed up quite a bit, and the going should be easier. You may even have that extra energy you need, so you should be able to plan things out and work to get a better grip on the forces around you. And there may well be obstacles that arise. For the sake of what you care for, the goals you have in mind, it may be better to let outmoded or unimportant things pass. Keep your eye on the ball. This may require acceptance of "what is," a not perfect situation, in order to get your new plans launched. In fact, this should be an easier time than a couple of days ago. Check it out.

Complete Natal and Transit Aspects

SU/MO Natal: Waxing Square (90°)

When it comes to coordinating day-to-day energy flow, that between your environment and support system and your future goals, and thus maintaining harmony between these two forces, you tend to be very assertive and successful at overcoming any inertia, pushing on through, and making progress in these areas. You are downright fortunate in that continued effort and action on your part can often make a real difference and bring about actual change, producing something solid, that can't be easily ignored. Not everyone can do this. The result of many of your plans and ideas end in action with an impact, and you establish a foothold. You tend not to hesitate, but to just do it.

Complete Natal and Transit Aspects

MO/SU Transit: Waxing Square (90°)

This is one of those critical or changing points in the Sun-Moon cycle, where you actually receive some physical sign for efforts made, and where continued effort and action on your part CAN make the difference and bring about real change, producing something real that can't be easily ignored by the world around you. This is the time to make a statement and be heard, and the result of your plans and ideas should have established a foothold here. This is not a time for hesitating; just do it.

Complete Natal and Transit Aspects

SU/MO Natal: Waxing Trine (120°)

When it comes to balancing relationships, whether as a mediator or just a participator, you like to take control and point things where you want them to go, and that direction is: toward greater harmony. With plenty of natural energy, you can usually find the point of least resistance, manage to keep things moving, and make a solid effort that will take you a long way. You have the ability to stabilize relationships and provide the infrastructure that makes them stronger. You build solid relationships and are generally successful.

Complete Natal and Transit Aspects

MO/SU Transit: Waxing Trine (120°)

By this point, productivity should not only be started, but well on its way, a good time to take control, and to point or guide things where you want them to go. Here you have renewed energy, and little resistance, with solid momentum, so making a good effort here will take you a long way. Also this is the time to embody your ideas, to build them physically into something solid, an infrastructure. Things are coming together. Go with that.

Complete Natal and Transit Aspects

SU/MO Natal: Waxing Sesqui-Quadrate (135°)

When it comes to relationships, whether between man and woman, older and younger (you-name-it), you can run up against roadblocks every now and again. You may not have the most natural way of handling questions of coordinating where you want to get to (your goals and aspirations) and the support system that is supposed to get you there, your resources. You may push too hard, when it would be better to ease off and take a more relaxed approach. Learning to complete what is at hand will come more easily to you than endless pushing for accomplishment. Instead of driving forward, take a more accommodating approach.

Complete Natal and Transit Aspects

MO/SU Transit: Waxing Sesqui-Quadrate (135°)

Your forward momentum and recent drive is perhaps challenged now or slowed down by circumstances beyond your control, causing a pause or shift in direction on your part. Although perhaps not anticipated, this could have been expected, and is just a sign that pushing forward farther is not so important now, as working with whatever you already have going. Ease it back. It is important that you do not give in to obstacles at this point, but to gently push beyond them. Look to completing what is already on your plate.

Complete Natal and Transit Aspects

SU/MO Natal: Waxing Inconjunct (150°)

When it comes to relationships, whether between man and woman, older and younger (you-name-it), you just naturally like to mediate and make things more harmonious. You have real skills when it comes to finding ways to connect things up, establish communications, and bring people and ideas together, and make them meet. You are not so much into expanding into new frontiers, as you are in doing finishing work, completing what already is there and may be out of balance. You like to make the ends meet and to explore all the nooks and crannies.

Complete Natal and Transit Aspects

MO/SU Transit: Waxing Inconjunct (150°)

By today you should have gotten the message that it is time to throttle back, and concentrate on finishing up whatever you already have in the pipeline.

Connect things up; establish communications.

Complete the detailed infrastructure. This is not so much a time to continue expanding, but rather one in which to do the finish work, and wrap the project up.

Explore all the nooks and crannies, while you have the energy. Cross the each "T" and dot each "I."

Complete Natal and Transit Aspects

SU/MO Natal: Opposition (180°)

You have it just about right when it comes to living harmoniously in the present, mediating, negotiating, and balancing one side and the other, whatever it may be - man and woman, friends, any kind of relationship. There is no need for you to push hard ahead or try to go back, because you always find yourself right in the middle of things, generally in harmony, taking things in and experiencing them. You like just to coast and experience life, at times basking in a sense of fullness. You tend to just let go and ride. Others may find it annoying, but they just wish they could maintain your attitude.

Complete Natal and Transit Aspects

MO/SU Transit: Opposition (180°)

Stop the engines and coast for a while, because this is it, what you have worked to achieve! If it is not to your liking, better luck next time, but don't push on farther at this point, because you have probably accomplished what is possible for this round.

Experience what you can and enjoy what is now!

From here on for a while, you can ease off and just let it all sink in. This is the fullness you have worked for, such as it can be. Just let go and enjoy the ride. This is the Full Moon.

Complete Natal and Transit Aspects

SU/MO Natal: Waning Inconjunct (210°)

You have a flair for and understand the rules of harmony, in particular when it comes to relationships, personal or public. You just naturally take command and know how to manage or mediate situations that are out of control or balance. And you are always in the thick of things, checking them out, and trying to get a handle on what is going on around you. You know how not to push for further action, but rather to let things just take their course. You tend to get a better idea of what will come out of things by just being aware and riding them out. You may be able to teach or help others, when it comes to harmonious relationships. Also: teaching and storytelling.

Complete Natal and Transit Aspects

MO/SU Transit: Waning Inconjunct (210°)

The Full Moon has passed, and you are still in the thick of things, perhaps just starting to get a handle on what has been going on around you or rather: what you have been going through. This is not the time for further action, to do more, but rather a time to go with the flow and to let things take their course. From here on to the end of this Moon cycle, you will need to learn to relax and let things come to you. It should be clear to you now or at least dawning on you what these last few days experience mean, whether good or bad.

You should now be able to get a better idea of the results, what will come out of this. Just ride it out. Now is when you can own this event, and feel confidence and pride in what you have done. And you can talk about it. The words should be there, and you may find yourself teaching and sharing with others.

Complete Natal and Transit Aspects

MO Natal: Waning Sesqui-Quadrate (225°)

When it comes to matters of harmony, in particular as regards relationships, you probably know too much, and may be even a bit too facile. This kind of savvy perhaps comes too easily for you, and there may be a sense of dissatisfaction with yourself, and a wish to feel more engaged. You may find it more satisfying to change your pose from that of one who knows it all or, at least, knows a lot, to that of a listener, one who can learn more by receiving, and by facilitation - helping others.

Complete Natal and Transit Aspects

MO/SU Transit: Waning Sesqui-Quadrate (225°)

You have reached what may well be another minor sticking point, and your sense of awareness of what all these recent experiences mean, which has been growing up to now, may slow to a trickle, or even come to a stop. Things are just shifting a bit, and the best way to deal with this time is not to panic, but to be more open and help things pass, to be more receptive. A more accepting attitude will soon restore the flow of awareness, and the sense of accomplishment, although you should know by now it is time to move on. The experience is over.

Complete Natal and Transit Aspects

SU/MO Natal: Waning Trine (240°)

As far as maintaining harmony, whether in relationships, or in the day-to-day balancing of supply and demand, you take a non-aggressive, but very active, approach. You are naturally energetic, and tend to take stock, step back, and develop an understanding of a situation. You react more than act, have very good discrimination, and like to conserve your gains. You always seek to make the most of things, saving what you can. Conservation is a keyword here.

MO/SU Transit: Waning Trine (240°)

This is a good time to just lay off the throttle, and let things coast. In fact, you may want to take stock and step back while you have plenty of energy and a growing understanding of your situation. You should have the general idea now of how things are for you, and this is a perfect time to conserve your gains, and

Complete Natal and Transit Aspects

even plug some of the leaks. Conservation is a key word. Begin to draw some conclusions.

Complete Natal and Transit Aspects

SU/MO Natal: Waning Square (270°)

Others may find you somewhat cool, when it comes to relationships (of all kinds) and their management. You naturally take an objective and impersonal (read: fair-minded) view when it comes to mediation, negotiation, and anything connected to establishing a balance or bringing two sides into harmony. You find it easier than most to turn away from purely personal worries and memories, and take a more reflective and impersonal point of view. Others sense in you a natural sense of responsibility, and a willingness to be a grown up. You are objective.

Complete Natal and Transit Aspects

MO/SU Transit: Waning Square (270°)

This is another major turning point in the Sun-Moon cycle, a time where things shift or change, and a good time to just let go and to turn away from purely personal worries and memories, and take a more reflective and impersonal point of view. You could feel a growing sense of responsibility, and a willingness to just grow up, even relief. You have achieved some objectivity here, and can let old things just pass. You are far enough away from things to be objective, to not take things personally, and to embrace your recent past, in particular, as you can see it is fading.

Complete Natal and Transit Aspects

SU/MO Natal: Waning Sextile (300°)

When it comes to relationships, whether romantic, friendly, or business, you just naturally want to examine them, and you are very analytical. Anything to do with the flow and balance-sheets of relating, whether it be the processes of give and take, ups and downs, man and woman - whatever, you just naturally can cut right to the chase. You generally are able to not only see the problems at hand, but also have the insight and energy to actually do something about them, separating the good parts and culling out whatever is excessive and is holding things back.

Complete Natal and Transit Aspects

MO/SU Transit: Waning Sextile (300°)

Here is another energy rush, with room to maneuver, and you should be able to not only clearly see the problems at hand, but have the insight and objectivity to actually do something about them, separating the good parts and culling out whatever you see is excessive and holding you back. You are definitely standing back and taking this all in. You are at your critical best, and very objective. Nothing personal.

Complete Natal and Transit Aspects

SU/MO Natal: Waning Semi-Square (315°)

It may be interesting that for you relationships, something you feel and actually do know more than a little about, can still be problematical. That old phrase about knowing more than is good for you may pertain here. You can see it all, have heard it all, and for sure have commented on it all, but that does not preclude you from relationship difficulties from time to time. The key here may be to leave off with the critical approach, and turn more inward, looking for a more simple approach yourself. This could prove more satisfying to you and more interesting to others. Less is more.

Complete Natal and Transit Aspects

MO/SU Transit: Waning Semi-Square (315°)

Things will perhaps be simpler now, cutting back a bit, and being content with less, with what is important. All kinds of minor obstacles or hindrances may arise and block your way, tempting you to return to what you have just let go of. There is a subtle shift in direction, and your best bet is to exercise patience, and tread your way around these roadblocks, and continue on with simplifying your situation. Less is definitely more from here to the New Moon. Your sharp critical faculties can be retired.

Complete Natal and Transit Aspects

SU/MO Natal: Waning Semi-Sextile (330°)

Some would say you are a minimalist when it comes to relationships of all kinds, and their maintenance. The natural balance and harmony between man and woman, opposing forces, good and bad, whatever requires mediation or negotiation, are grist for your mill, and you like to keep it simple. You reduce all relationships to just the essentials, and ignore the rest. You tend to be somewhat inward or in-turned, at times ignoring the external world, and giving attention only to the things that really matter, and that you think will last.

Complete Natal and Transit Aspects

MO/SU Transit: Waning Semi-Sextile (330°)

You may enjoy a more inward or private time now, one which can find you ignoring the external world, and giving all your attention to the things that really matter, things that you think will last. Simplifying your situation will bring peace and contentment. Now is not the time to start something new. These are the dark days of the Moon, and tradition says to just wait them out, looking for that New Moon and beginning. Seed time.

When it comes to matters of the mind, ideas, thoughts, and the like, you have a natural sense of mental clarity, and enjoy planning and envisioning the future, always filling your inner mental skies with new ideas, something you may wish to share with the world. With you, there are always new ideas, new plans.

You may have a renewed sense of clarity and mental stimulation, perhaps only present now as a deep impulse or insight that you can't yet get your arms around, but you can feel that it has a future, which will unroll in time. ME/SU Transit: Waxing Semi-Sextile (30°)

SU/ME Natal: Waxing Semi-Square (45°)

You are always thinking and making plans for the future, things that have come to you and that you want to share with others or see happen. Your clarity of mind (clear thinking) can be at times somewhat challenged, or at least put to the test by problems which surface around you, making it hard to think clearly. This could easily be seen as a sign to give up. However, it is important for you to persevere, and wade on through at these times, because the way to progress in making these ideas real is to move on, and keep at it.

SU/ME Natal: Waxing Sextile (60°)

Your mind tends to be filled with ideas and thoughts about whatever coulda', shoulda', woulda' - plans for the future. You are naturally energetic when it comes to trying to make these plans real, but your powers of thought and mental clarity tend to at times encounter swarms of mental gnats, that could make it easy to give way to confusion and sloppy thinking, making mistakes easy. This is probably only debris from your own past giving you a hard time, and generally should be ignored. You may have to put up with minor inconveniences for the sake of staying on course, seeing your ideas to fruition.

You have a burst of energy here, enough to bring patience to bear in handling any obstacles.

It is not enough for you to have plenty of ideas and plans you want to see happen; you also have the machismo to push on through until you see some sign or accomplishment. When it comes to matters of clear thinking, and the mind in general, you tend to persevere, always pushing to make contact, and to have an effect. You bring this quality through so that others can see this also.

ME/SU Transit: Waxing Square (90°)

If all has gone well, and you have persevered, this should be a kind of turning point, a time of change, one hopefully in your favor, where you have managed to think more clearly and bring this quality through so that others can see this also. Your ideas can now be communicated, and have gone public. You are manifesting them.

ME/SU Transit: Waxing Trine (120°)

You are all about using the mind, logic, and clear thinking to reason things through, put it all together, and you like to be productive. This is why you may become somewhat discouraged at times when things don't go your way and you run up against walls. The trick at these points is to not push so hard, but to let things take their course, and turn to work with what you have already working than to expect more.

ME/SU Transit: Waxing Sesqui-Quadrate (135°)

You are on track to establish and communicate your ideas and plans clearly. Progress has been made, but at this point you may have to work through any problems (and there will be some) that arise. The mind and ideas are something of pride to you. And you are very facile when it comes to using the mind and explaining it all to others. Sometimes this facileness gets just too smooth, and you can wear out your welcome, mentally speaking. All this points out is that it is time to move on in your mental journeys, and to stop telling how it is and stop to check how it is now. At these times, becoming an active listener may be the key.

ME/SU Transit: Waning Sesqui-Quadrate (225°)

Recent mental clarity may experience some foginess that could threaten to set you back or change your mind about what you think you are seeing and understanding. No one said it would be easy, so there will be puzzles and obstacles to clear thinking to be worked through at this point. The key is to not strive, but to relax, and let it flow in. SU/UR Transit: Waning Square (270°)

Here there can be sudden or not-so-sudden detachment or separation from your purely personal concerns and insight into a public or more communal approach, one that guarantees freedom and independence for all. Your concern with your own self-sufficiency turns into caring the same for that of others. Objectivity arises in these matters.

SU/UR Transit: Waning Sextile (300°)

A view from afar, gives you real insights into your own (or other's) excess, in particular as to matters of self-sufficiency and personal independence, and you can see just what should be cut out and removed, and you have the energy to effect these changes. Sudden criticism, and perhaps an original approach to all of this.

Complete Natal and Transit Aspects

SU/UR Natal: Waning Semi-Square (315°)

You have insights into excess and what should be cut out and removed, and the energy to effect these changes. Sharp criticism, but your heart is not really in it as it might be. Instead, a better direction would be to internalize your critical thoughts and find contentment in more silence.

SU/UR Transit: Waning Semi-Square (315°)

Self-sufficiency, even one pared down to essentials, may not be enough to remove certain obstacles, ones that are caused by our not heeding signs to give in to life even more than we have, and to adjust our sails so that more of life passes through us, as opposed to piling up against us. This is an endgame strategy.

Attempts to make inspirational ideas matter, to make them more manifest in life, come naturally to you, and you have a lot of plans when it comes to identifying and speaking whatever is compassionate and spiritually oriented.

SU/NE Transit: Waxing Semi-Sextile (30°)

“For spirit must be made to matter,” is a line I once penned, and it refers to making our dreams real, and what is at issue here is the need to formulate our deepest fantasies and dreams, whatever inspires us, into actual plans for action, to make what we see in our spiritual vision flesh that walks in the real world.

Complete Natal and Transit Aspects

SU/NE Natal: Waxing Semi-Square (45°)

Attempts to make inspirational ideas matter, to make them more manifest in life, can meet with ignorance and obstructions. This is something to work around, and not a sign to withdraw from this effort. Incorporate these problems into the mix. Make careful plans.

SU/NE Transit: Waxing Semi-Square (45°)

Attempts to make our inspirational ideas matter, to make them more manifest in life, can meet with ignorance and obstructions. The world ignores us, and our spiritual insights seem wasted on it. This is not a reflection on our dreams, but is something to work around, and not a sign to withdraw from this effort. Incorporate these problems into the mix, embrace them, and move on.

For spirit must be made to matter, and attempts to carry inspiring concepts forward meet with whatever can arise to be an obstruction, and to cause a delay. Patience furthers.

SU/PL Natal: Conjunction

Others may find you deeply intense, perhaps even disturbingly so, and you may not even be aware of this quality within yourself. Your very presence can be somewhat of an intense experience, and many instigate transformation and change. These are very inward and potent qualities.

SU/PL Transit: Conjunction

The deep reaches of the mind hold many things for each of us, and in moments like this, they can rise to the surface and be felt, if not fully understood. The power of an intense experience to transform and change you deeply provides fuel for thought and drives a vision to actually experience this.

Complete Natal and Transit Aspects

SU/PL Natal: Waxing Semi-Sextile (30°)

You naturally have ideas related to transforming yourself and the world around you, and these often turn into actual plans you want to carry out and put into effect. For the most part, you prefer coming up with ideas for change, than actually making those changes.

SU/PL Transit: Waxing Semi-Sextile (30°)

Deep thoughts, rising to mind, are grasped enough to be understood, and manage to formulate themselves into plans or structures that call out for implementation, to be worked into the fabric of our lives.

SU/PL Natal: Waxing Semi-Square (45°)

You often experience a struggle between the forces of change and transformation and simple mundane obstacles to moving forward. Your tendency may be to blow them out of the water with a burst of intense power, but a better use would be to negotiate their demands, pay them their dues, and move around them. You should move forward in these areas, however, and do not go back.

SU/PL Transit: Waxing Semi-Square (45°)

Here you may have a struggle between the forces of change and transformation, and simple mundane obstacles to moving forward. SU/PL Natal: Waxing Sextile (60°)

Your plans for change and transformation frequently meet with resistance, the guardians at the threshold of action, all kinds of petty demands that can stand in the way of your progress. SU/PL Natal: Waxing Sesqui-Quadrant (135°)

Changing yourself and your working environment through effort is something you naturally know how to do, but you may find that pushing too hard breaks things. More success can be had by not driving forward, but working cooperatively with the forces around you already in motion, and bringing change that way.

SU/PL Transit: Waxing Sesqui-Quadrant (135°)

Personal change and transformation can be made to manifest in our lives, by effort, and just as there is a time to make that effort, so is there a time to leave off at effort, and turn to caring for whatever we already have in the works. Probably some obstruction here, from events that push you in a direction other than you had in mind. What causes this is simple: a need on your part to pay more attention, and to learn to take as well as give, that is: take a more receptive stance.

Complete Natal and Transit Aspects

SU/PL Natal: Waning Trine (240°)

You often find yourself examining, in detail, an experience that, in little or in large, was somehow transformative. You are able to hang on to parts of it, but find others too hard to remember. Take from it what you can. In this, you are very conservative.

SU/PL Natal: Waning Semi-Square (315°)

You are able to clearly cull out what is of no value, while holding fast to the essence, when it comes to anything to do with change and transformative experiences. However, this is more a façade than something integral to your nature. Holding your tongue and criticism, being perhaps more stoic and enjoying silence is what people find when they come to know you.

SU/PL Transit: Waning Semi-Square (315°)

Here we are talking about inner change, and what we have learned or can remember of it, but also how our attitude can be a problem, actually causing us problems. What Are Aspects?

This book is all about the 45 major planetary combinations and the sixteen standard aspects that each of these combinations form in the 360-degree relationship cycle of those two planets.

Before we go any further into this, let's agree what we mean by aspects. Take any two heavenly bodies; it does not matter if it is the Sun or Moon, or one of the planets. One of any two bodies is moving faster and the other moves more slowly. The net effect is that the faster-moving planet describes a 360-degree circle or cycle of aspects to the slower moving body. The faster-moving planet goes from a conjunction with the slower body through a circle/cycle of 360-degrees and back around to the next conjunction. That is called the aspect cycle, and is what aspects

Complete Natal and Transit Aspects

are all about. Let's take the familiar solunar cycle as an example.

The solunar cycle (and astronomers call this a "synodic" cycle) begins with the Sun and Moon conjunct in the same zodiac degree at the moment of the New Moon. The Moon, being the faster-moving body, then begins to move away from the conjunction with the Sun and starts to form aspects (angular arcs of separation) with the Sun, the most familiar being the First Quarter Moon (90 degrees), the Full Moon (180 degrees), and the Fourth Quarter Moon (270 degrees), after which the Moon moves to conjunct the Sun again, for another New Moon. The cycle continues on around, month after month.

This same type of synodic cycle of aspects takes place with any two heavenly bodies; it makes no difference which two you select. There is always one that moves faster, and one that moves more slowly. Aspects are formed, endlessly. It is happening now in the sky above. Each planet out there is in the process of forming or separating from one aspect or another with all the other planets.

In fact, the Sun, Moon, and planets are always involved with one another in these various aspect cycles, some 45 pairs of them (geocentrically), all going on at once.

Complete Natal and Transit Aspects

Why These Points?

Perhaps because there are so many aspects to consider all at once, astrologers have over the centuries picked certain points on the 360-degree aspect cycle and found them to be especially significant. We mentioned (using the solunar cycle) the 90-degree points (Square), and the halfway point (Opposition), which is the 180 degree point in the circle. Most astrologers add to this list, the 60-degree points (Sextile) and the 120-degree points (Trine). Still others want to include the 45-degree points (Semi-Square), and so on it goes.

If we kept adding points along the circle or cycle, we would eventually have all 360 degrees marked out. Some folks do, and the Sabian Symbols by Marc Edmund Jones has an interpretation for all 360 degrees of the zodiac. But let's back up a moment.

Complete Natal and Transit Aspects

We mentioned the 90-degree or Square points on the cycle, but there are two of these in any cycle. In the solunar cycle, there is the 90-degree point that marks the First Quarter, but there is also the 90-degree point that marks the Fourth Quarter. Each of these aspects is 90 degrees, and few astrologers would want to confuse a First Quarter Moon with a Fourth Quarter Moon. One leads to the light of the Full Moon, and the other to the dark of the New Moon. The same is true for the 60-degree (Sextile) and 120-degree (Trine) aspects. There are two of these in each cycle, as well. What are we to do with this fact that there are two of most aspects?

The Other Shoe

In modern astrology, almost all astrologers treat the 90-degree or square aspect as the same thing, whether it is that first 90-degree aspect (the waxing

Complete Natal and Transit Aspects

Square) or the second 90-degree aspect (the waning Square). The interpretation is the same. Yes, many astrologers would perhaps make an exception with the familiar solunar cycle, and differentiate between a First Quarter Moon and a Fourth Quarter Moon, but when it gets to the planets, in all their various combinations, there is usually only one interpretation given.

A Square is a Square is a Square, and so on. However, not everyone agrees.

It is true that a very few astrologers have pointed out to the rest of us that, reasonably speaking, we ought to interpret a waxing Square differently from a waning Square, just as we do in the solunar cycle, most notably L. Edward Johndro and in particular Dane Rudhyar. Both of these authors writings have made it clear that we are missing something very important by grouping all squares, all sextiles, all trines, etc. together and interpreting each pair in the same manner. What are they trying to tell us?

Complete Natal and Transit Aspects

The Message about Aspects

If we read these authors (and I have), and others on this subject, here is their message to us. I will paraphrase and summarize what they have said:

These cycles are living events in the heavens above, with a beginning, a middle, and an end, starting at the point of the conjunction of the two bodies, extending to the opposition, and then back to the next conjunction. It can be important for us to know, when we speak of an aspect like a Square, whether we are referring to the square at the beginning or the square at the end of the cycle.

If you asked me to help you plan a social outing, and I told you to have your social event "after" the Square aspect between the Sun and the Moon, it would be important, according to the tradition of astrology, to designate that it is the waxing Square, after which you

Complete Natal and Transit Aspects

should hold the party, and not the waning Square. If you threw the party after the waning Square, you would be holding it right before the New Moon, and the dark of the Moon in both Eastern and Western astrology is more of a time to hunker down, and not a time to celebrate.

Everyone knows that the Full Moon is when to get together. You get the idea, and I believe most of you would agree. We have this discrimination for the solunar cycle, but we don't extend this to the planetary aspects. Why is that?

Waxing and Waning Aspects

The point is that, according to Dane Rudhyar and others, we should discriminate in our interpretation between what are called waxing and waning aspects. An aspect is waxing if it occurs before the Opposition point (180 degrees), and it is waning if it takes place

Complete Natal and Transit Aspects

after the Opposition. There is the going out to the opposition, and the coming back from the Opposition. Therefore, we would have a waxing Square and a waning Square, and same goes for Sextiles (60 degree), Trines (120 degree), Semi-Squares (45 degree), Sesqui-Quadrates (135 degree), Inconjunct (150 degree), and any other aspects you might care to use.

The only aspects that are not mirrored in this way are the Conjunction (zero degrees) and Opposition (180 degrees). They are the beginning and mid points of the cycle, and, in that sense, they stand alone.

Discriminating between waxing and waning aspects takes us a long way to re-invigorating our astrological interpretations. The question of how the interpretations differ between waxing and waning aspects is something I want to get to, but first there is a more important point to be made about the wholeness of cycles as they relate to individual aspects.

Complete Natal and Transit Aspects

Inconvenient Aspects

While it may have been a great convenience to astrologers over the centuries to have fixed upon a series of aspects, like the Square and Trine, and to have more-or-less ignored whatever takes place in between those aspects, we now need to take a good look at what we have been ignoring, and that is: the essential wholeness or continuum of these planetary cycles.

If we use aspect orbs, and most astrologers do, then no matter what orbs we use, there will always be the case where a planet is just one degree out of orb, and that aspect will not be taken into consideration by us. This is particularly true if we are using computerized astrology, which will simply not list an aspect if it is out-of-orb. What are we to do with these unlisted aspects?

Complete Natal and Transit Aspects

We do know by looking at the chart that the unlisted aspect is either an aspect waiting to happen or an aspect that has just happened recently. It certainly is not any other aspect, and the fact that the aspect is very close to the particular aspect we have set orbs to, we can know it is at the very least in the same ballpark.

Regardless of what orbs we may have set, each and every planet is somewhere in its journey or relationship with every other planet. It is never "not out there," and it never somehow drops out of the cycle, but it always continues, degree by degree, on its appointed round of the zodiac. In the entire 360-degree orbit, every degree is essential. We can't get along without each one of them.

Complete Natal and Transit Aspects

An Analogy

Here is a simple analogy that will point out two areas where we, as astrologers, may be missing out.

Suppose I were to send one of my daughters on a round trip to Ann Arbor, by way of Kalamazoo on the outgoing leg and Flint on the ingoing.

Let's say that Kalamazoo, Michigan is one of the stops (aspects) she will make along the way that I want to designate as a key point, like an aspect. We have placed that city at the 120-degree aspect point from Big Rapids, which is the Trine aspect in traditional astrology. But if she calls me on the phone and is having car trouble and I say, "Where are you?" I don't only want to know when she is in Kalamazoo; I want to know where she is *any time* in between. This is analogous to setting absolute orbs on aspects and completely ignoring the planet and aspect if it falls just outside it the orb.

My daughter tells me she has broken down just outside of Kalamazoo, even though she is not within the orb for Kalamazoo I had planned. The place she has broken down, no matter where that place happens to be, is information I need to have and that is useful. It tells me a lot, for example, if she is still on her way to Ann Arbor (waxing) or already on her way back (waning), and closer to Flint, Michigan. If her car breaks down somewhere in between, that too is important. "Where" is always important, not just at some predefined points or aspects. You get the idea. Let's move on.

While we have this analogy up, let's look at the other problem, the fact that astrologers generally fail to interpret between waxing and waning aspects. To

Complete Natal and Transit Aspects

most astrologers today, as mentioned, a Trine is a Trine. In the diagram, this would be equivalent to only wanting to know if my daughter was in Kalamazoo or in Flint, each of which is a Trine or 240-degree aspect from Big Rapids. We can all see very clearly that these two places are in very different parts of the aspect cycle. In the first, Kalamazoo, she is still on her way to Ann Arbor, and with the other, Flint, she is already on her way home. Both of these points are addressed with full-phase aspects.

As an initial step, I stopped using strict orbs with aspects and, instead, began to ask myself: where is this planet on its 360-degree journey in relation to the planet it is aspecting? After all, it is not nowhere. It is always somewhere, and that somewhere, no matter where it is, is important.

My daughter may not be in Kalamazoo, but if she is in the outskirts, I have learned a lot about her situation, for example that she is in a heavily populated area. I find it similar with all the aspects, and no longer find orbs that useful. I would rather just look to see how close the planet is to a traditional aspect, and this helps me to see where the planet is in the overall aspect picture. It is never "not" doing something, so to speak.

Complete Natal and Transit Aspects

The Standard Aspect Cycle

I do not argue that the various points of exact traditional aspects (90, 60, 120, etc. degrees) are not important. Of course they are, but there is no degree or point in the aspect circle/cycle that is not essential, although it may have a different kind of importance. Perhaps we have never inquired about the kind of importance of each area of the cycle.

In fact, after a short while, I found myself doing away with the concept of there being "any" point in the 360-degree cycle that is not somewhere in the vicinity of a major aspect, at least the ones that most astrologers use. For example, using what I consider the most commonly-used aspects, and as the author of dozens of astrological programs, you can be sure my users have told me what aspects they want in their software, and they are:

What about Orbs?

These are the sixteen most commonly used aspects. And if you have to have orbs, let's just divide the space between any two of these 16 aspects in half, and use that midpoint in space as the marker as to the end of one aspect and the beginning of the next.

And, for now, we won't play favorites, giving some aspects more space (greater orbs) and others less. For instance, I find that the Semi-Squares are very important, and yet most astrologers used reduced orbs when considering them. Why bother? Just look at the chart.

Using this method, there are no un-aspected planets. A planet is always in the general area or ballpark of one of these traditional aspects or another. If it is not right on top of the aspect, then it is forming or coming to be, or it is past the exact point and in the process of

Complete Natal and Transit Aspects

fading away. Either way, there is still the flavor of that aspect around them.

Looking at a chart this way, each planet is always at a very natural point in relation to every other planet. It is never un-aspected. We can see at a glance what phase of the cycle a planet is in as it relates to any other planet. We don't even have to measure, for we can just look at the chart and get a ballpark idea of each relationship. This is perhaps some kind of holistic way of looking at aspects.

Thanks for your patience; we are almost there, but there is one little twist I want to present to you, and I hope it does not throw you off the track.

Mean Planetary Motion Per Day

☉ The Sun	59'08"
☾ The Moon	13°10'36"
☿ Mercury	1°23'
♀ Venus	1°12'

♅ Uranus	0°00'42"
♆ Neptune	0°00'24"
♇ Pluto	0°00'15"

Phase Relationships

What we are looking at so far here is what is called the "phase relationship" or angular separation of one planet to another. We can divide the cycle of aspects

Complete Natal and Transit Aspects

between any two bodies into as many phases or parts as we wish, but we will always want to know if the faster moving planet is in a waxing phase or a waning phase to the other, as in: is the angular separation between the two bodies progressing to the opposition (the equivalent of the Full Moon in the solunar cycle) or is it progressing back toward the conjunction (the equivalent of the New Moon in the solunar cycle). In the first case, the angle is waxing, and in the second, waning. That is what we need to know.

Looking at the chart, it is not difficult to examine any pair of planets and decide which is the faster moving planet, and which is the slower moving planet. And, by "faster" or "slower," I don't mean is it faster or slower on a given day. A fast moving planet like Mercury might be retrograde on a given day or stationary, meaning it appears to not move at all. What we mean here is "faster" or "slower" in the traditional sense of the speed of the planets. Here is the list, from fast to slow:

Moon, Mercury, Venus, Sun, Mars, Jupiter, Saturn, Uranus, Neptune, and Pluto. That is the order, in terms of speed, to use, not whether at any given moment it is stationary and not moving, or even moving backward.

Calculating Aspects

Most computer programs and web services will calculate and list out the planetary aspect pairs for you. All you will have to do is look them up in the table of contents.

However, if you have an accurate natal chart which includes a list of the zodiac position of the Sun, Moon, and the eight planet positions, you can calculate the aspect pairs yourself, one by one. It is somewhat tedious, but not difficult. You will need to know something about how these aspects are calculated.

The 360 degrees of the zodiac make the aspect circle. Each zodiac sign (Aries, Taurus, etc.) consists of thirty degrees and each degree consists of sixty minutes of arc (not time), so you need to keep that in mind. Just select any two bodies (Sun, Moon, planets, etc.) and determine how many degrees and minutes they are apart. For example: My natal Sun is at 25 degrees and 48 minutes of the zodiac sign Cancer. My natal Moon is at 23 degrees and 29 minutes of the zodiac sign Taurus. Let's do the math.

(1) Degrees of Separation

25° Cancer 48' Sun's Position
23° Taurus 29' Moon's Position
62°19' of arc

(2) Faster Planet?

We need to determine which is the faster moving planet according to this list, which shows the faster-moving planet at the top of the list:

Complete Natal and Transit Aspects

Moon
Mercury
Venus
Sun/Earth
Mars
Jupiter
Saturn
Uranus
Neptune
Pluto.

Here we see that the Moon is the faster-moving planet and is closing in on the Sun.

(3) Waxing or Waning

If the faster moving planet is less than 180° from the slower moving planet it is said to be “Waxing, “ in which case use the calculation from step #1 as is.

However, if the faster moving planet is more than 180° (past the opposition point), then you want to subtract the calculation in Step #1 from 360° .

In this case, the faster-moving planet is more than halfway around the circle, so we have to subtract $62^\circ 19'$ from 360° .

$$\begin{array}{r} 360^\circ \\ \underline{62^\circ 19'} \\ 297^\circ 41' \end{array}$$

Complete Natal and Transit Aspects

Therefore $297^{\circ}41'$ is the aspect between the Sun and the Moon. Now you can locate which of the sixteen aspects this is using the following table:

“Michael Erlewine is the giant influence whose creativity is forever imprinted on

all astrologers’ work since the beginning of the Computer era! He is the man who single-handedly applied computer technology to astrological measurement, research, and interpretation, and has been the formative and leading light of astrology’s modern growth. Erlewine humanized it all, adding perception and incisive practical analyses to modern, computerized astrology. A Brief Bio of Michael Erlewine

Michael Erlewine has studied and practiced astrology for over 40 years, as an author, teacher, lecturer, personal consultant, programmer, and conference producer.

Erlewine was the first astrologer to program astrology, on microcomputers and make those programs available to his fellow astrologers. This was in 1977. He founded Matrix Astrology in 1978, and his company, along with Microsoft, are the two oldest software companies still on the Internet.

Michael, soon joined by his astrologer-brother Stephen Erlewine, went on to revolutionize astrology by producing, for the new microcomputers, the first written astrological reports, first research system, first high resolution chart wheels, geographic and star maps, and on and on.

Along the way Matrix produced programs that spoke astrology (audio), personal astrological videos, infomercials, and many other pioneering feats.

Michael Erlewine has received major awards from UAC (United Astrological Conferences), AFA (American Federation of Astrologers), and the PIA (Professional Astrologers Incorporated), and scores of on online awards.

Michael and Stephen Erlewine have published a yearly calendar for almost 30 years, since 1969. Michael Erlewine has produced and put on more than 36 conferences in the areas of astrology and Buddhism.

The Heart Center House

In 1972, Michael and Margaret Erlewine established the Heart Center, a center for community studies. Today, the Heart Center continues to be a center for astrological and spiritual work. Over the years, hundreds of invited guests have stayed at the Heart Center, some for just a night, others for many years. Astrologers, authors, musicians, Sanskrit scholars, swamis - you name it, the Heart Center has been a home for a wide group of individuals, all united by their interest in spiritual or cultural ideas.

The All-Music Guide / All-Movie Guide

Michael Erlewine's devotion to studying and playing the music of Black Americans, in particular blues, led to his traveling to small blues clubs of Chicago and hearing live, blues greats like Little Walter, Magic Sam, Big Walter Horton, and many others. He went on to interview many dozens of performers. Much of this interviewing took place at the Ann Arbor Blues Festivals, in 1969 and 1970, the first electric blues festivals of any size ever held in North America, and than later at the Ann Arbor Blues & Jazz Festivals.

With their extensive knowledge of the blues music, Erlewine and his brother Daniel were asked to play host to the score or so of professional blues musicians and their bands. They were in charge of serving them food and (of course) drink. Michael went on to interview most of the performers in these early festivals, with an audio recorder, and later on with video.

The interviewing led to more study and ultimately

Complete Natal and Transit Aspects

resulted in Michael founding and developing AMG, the All-Music Guide, today the largest single database of music reviews and documentation on the planet.

Erlewine started from a one-room office, and the reviewers and music aficionados of the time laughed at his attempt to cover all music. But he persisted, and the all-Music Guide appeared as a Gopher Site, before the World Wide Web even existed—a database of popular music for all music lovers.

Over the years AMG grew, and the All-Movie Guide and All Game Guide were born, and also flourished. Later, Erlewine would create ClassicPosters.com, devoted to the history and documentation of rock n' roll posters, some 35,000 of them.

These guides changed the way music was reviewed and rated. Previous to AMG, review guides like the "Rolling Stones Record Guide" were run by a few sophisticated reviewers, and the emphasis was on the expertise of the reviewer, and their point of view. Erlewine insisted on treating all artists equally, and not comparing artist to artist, what can be important, Michael points out, is to find the best music any artist has produced, not if the artist is better or worse than Jimmie Hendrix or Bob Dylan.

Erlewine sold AMG in 1996, at which time he had 150 fulltime employees, and 500 free-lance writers. He had edited and published any number of books and CD-ROMs on music and film. During the time he owned and ran AMG, there were no advertisements on the site and nothing for sale. As Erlewine writes, "All of us deserve to have access to our own popular culture. That is what AMG and ClassicPosters.com are all about." Today, AMG reviews can be found

everywhere across the Internet. Erlewine's music collection is housed in an AMG warehouse, numbering almost 500,000 CDs.

Michael Erlewine has been active in Buddhism since the 1950s. Here are his own words:

“Back in the late 1950s, and early 1960, Buddhism was one of many ideas we stayed up late, smoked cigarettes, drank lots of coffee, and talked about, along with existentialism, poetry, and the like.

“It was not until I met the Tibetan lama, Chogyam Trungpa Rinpoche, in 1974 that I understood Buddhism as not just Philosophy, but also as path, a way to get through life. Having been raised Catholic, serving as an altar boy, learning church Latin, and all that, I had not been given any kind of a path, other than the path of faith. I hung onto that faith as long as

Complete Natal and Transit Aspects

I could, but it told me very little about how to live and work in this world.,

“I had been trying to learn the basics of Tibetan Buddhism before I met Trungpa Rinpoche, but the spark that welded all of that together was missing. Trungpa provided that spark. I got to be his chauffeur for a weekend, and to design a poster for his public talk.

“More important: only about an hour after we met, Trungpa took me into a small room for a couple of hours and taught me to meditate. I didn’t even understand what I was learning. All that I know was that I was learning about myself.

“After that meeting, I begin to understand a lot more of what I had read, but it was almost ten years later that I met my teacher, Khenpo Karthar, Rinpoche, the abbot of Karma Triyana Dharmachakra Monstery, in the mountains above Woodstock, NY. Meeting Rinpoche was life-changing.

“It was not long after that we started the Heart Center Meditation Center here in Big Rapids, which is still going today. My wife and I became more and more involved with the monastery in New York, and we ended up serving on several boards, and even as fundraisers for the monastery. We helped to raise the funds to build a 3-year retreat in upstate New York, one for men and one for women.

“We also established KTD Dharma Goods, a mail-order dharma goods business that helped practitioners find the meditation materials they might need. We published many sadhanas, the traditional Buddhist practice texts, plus other teachings, in print and on audio tape.

Years have gone by, and I am still working with Khenpo, Rinpoche and the sangha at the Woodstock monastery. Some years ago, Rinpoche surprised my wife and I by telling us we should go to Tibet and meet His Holiness the 17th Karmapa, and that we should go right away, that summer, and I hate to leave the house!

That trip, and a second trip that followed some years later, turned out to be pilgrimages that were also life changing. Our center in Big Rapids has a separate building as a shrine room and even a small Stupa; pictures are shown below.

I can never repay the kindness that Khenpo Rinpoche and the other rinpoches that I have taken teachings from have shown me.

Music Career

Michael Erlewine's career in music started early on, when he dropped out of high school and hitchhiked to Venice West, in Santa Monica, California, in an attempt to catch a ride on the tail end of the Beatnik era. This was 1960, and he was a little late for that, but right on time for the folk music revival that was just beginning to bloom at that time. Like many other people his age, Erlewine traveled from college center to center across the nation: Ann Arbor, Berkeley, Cambridge, and Greenwich Village. There was a well-beaten track on which traveled the young folk musicians of the future.

Erlewine, who also played folk guitar, hitchhiked for a stint with a young Bob Dylan, and then more extensively with guitar virtuoso and instrumentalist Perry Lederman. Erlewine helped to put on Dylan's first concert in Ann Arbor. He hung out with people like Ramblin' Jack Elliot, Joan Baez, The New Lost City Ramblers, and the County Gentlemen.

In 1965, the same year that the Grateful Dead were forming, Michael Erlewine, his brother Daniel, and a few others formed the first new-style band in the Midwest, the Prime Movers Blues Band. Iggy Pop was their drummer, and his stint in the band was how he got the name Iggy. This was the beginning of the hippie era. Michael was the band's lead singer, and played amplified Chicago-style blues harmonica. He still plays.

Erlewine was also the manager of the band, and personally designed and silkscreened the band's posters, one of which is shown below.

The Prime Movers became a seminal band throughout the Midwest, and even traveled as far as the West Coast, where the band spent 1967, the "summer of Love," playing at all of the famous clubs, for example, opening for Eric Clapton and Cream, at the Fillmore Auditorium.

As the 60s wound down, and bands began to break up, Erlewine was still studying the music of American Blacks, in particular blues. Because of their knowledge of blues and the players, Michael and his brother Dan were invited to help host the first major electric blues festival in the United States, the 1969 Ann Arbor Blues Festival. They got to wine and dine the performers, and generally look after them.

Michael interviewed (audio and video) most of the players at the first two Ann Arbor Blues Festivals, they included: Big Joe Turner, Luther Allison, Carey Bell, Bobby Bland, Clifton Chenier, James Cotton, Pee Wee Crayton, Arthur, Crudup, Jimmy Dawkins, Doctor Ross, Sleepy John Estes, Lowell Fulson, Buddy Guy, John Lee hooker, Howlin' wolf, J.B. Hutto, Albert King,
