

# The Angels of Jupiter

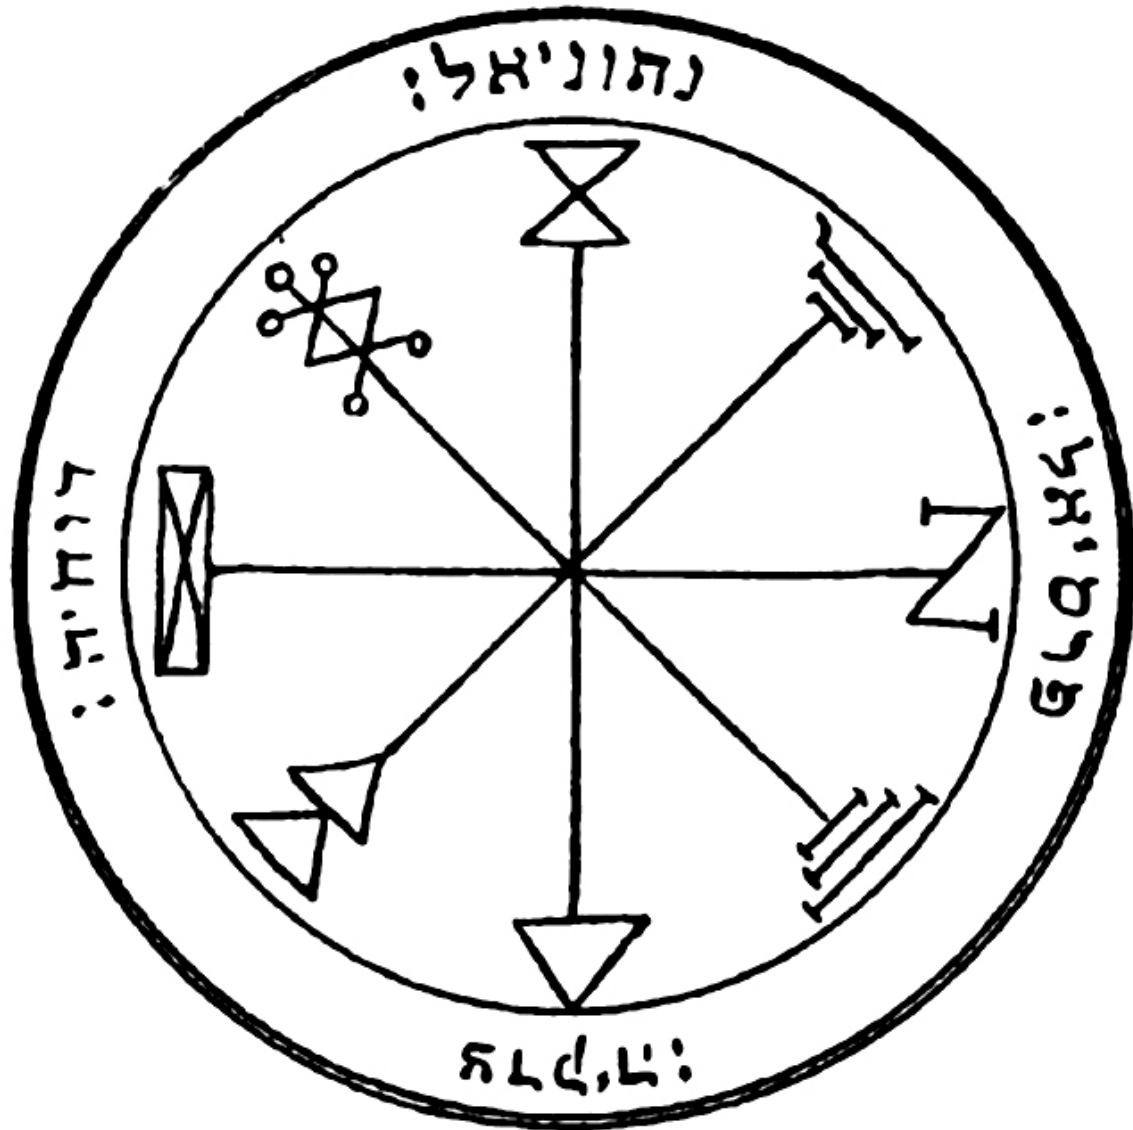

Reconstructed, corrected, completed and  
sigilised by Asterion  
Romania, 2008

### **General pentacle of Jupiter**

For hosting the seal of the angel while calling either by evocation or by scrying.

### **Solomonic Pentacle of Jupiter**

For evoking jupiterian intelligences and keeping them under control. Densifies jovian energies and lifts the Earth-based consciousness to a more Jupiter-vibrating resonance. Due to numerous corruptions of the geomantic seals, we took it upon ourselves to correct it and restore it

to its proper form, which we can see in the illustration above.

The main element that would have made it unusable was the insertion of the planetary glyph of Saturn in the upper diagonal.

The following tables compare the morphological changes in the angelic names from one work to the other, trying to put the correct forms back in use and re-transliterate them in Hebrew in order to sigillize them correctly. The correct Hebrew spelling was most obvious in the great majority of the cases and errors were spotted with ease, but some names were quite difficult. The forms employed in those cases, marked with the symbol \* in my list, were entirely reconstructed by scrying. All of the names have been scryed for with help from his angelic majesty Archangel Tzadkiel, in the hour of Jupiter, Day of the Sun, 30.11.2008, using a small clear quartz sphere placed on the Third Eye after calling forth the help of the said Archangel.
