The Microsoft Network

The Microsoft Network

The Microsoft Network is Microsoft's online service that makes joining the world of electronic information and communication fun. The Microsoft Network offers easy access to:

- Electronic mail, including access to Internet mail
- Bulletin boards, Internet news groups, and chat forums to discuss and explore everything from movie reviews to business and PC technical issues
- The latest headline news, sports, weather, reference information, and much more

- Yes, install The Microsoft Network.
- No, do not install The Microsoft Network.

You will need 2.3 MB free on your hard disk. You currently have 32.0 MB free.

Perhaps you're attracted to comparing insurance prices without making twenty phone calls, or trying a new recipe straight out of Bon Appetit, or checking flight delays without being put on hold for half an hour, or buying stamps without having to drive to the post office. **Microsoft® Internet Explorer 3.0** is just a click away on your Windows® 95 desktop and **helps you** browse, find and organize stuff on the Internet. **Microsoft FrontPage™** lets you, the normal person, design and manage your own Web site. Microsoft software **makes it easy** to get around and get organized in this wild world so you can skip the stuff you don't need and get to the stuff you do, like finding a flower shop in Milwaukee that specializes in, say, exotics. (Try www.ftd.com.)
