TO
MY WIFE

PREFACE

MORE than eighty years have elapsed since the last comprehensive monograph on Zeus was written, a couple of octavo volumes by T. B. Éméric-David issued at Paris in 1833. In the interval much water has gone under the classical mill. Indeed the stream flows from remoter ranges and some of its springs rise from greater depths than our grandfathers guessed. Nowadays we dare not claim to understand the religions of Greece and Rome without an adequate knowledge of contiguous countries and at least an inkling of prehistoric antecedents. In both directions pioneer work of inestimable value has been accomplished. The discoveries of Rawlinson and Layard in Babylonia, of Lepsius and Mariette in Egypt, of Humann and Winckler in Asia Minor—to mention but a few of many honoured names—have enormously increased our area of interest. Again, Schliemann and Dr Dörpfeld, Prof. Halbherr and Sir Arthur Evans, Piette and the Abbé Breuil, have opened to us vista beyond vista into the long-forgotten past. We realise now that Mycenaean and 'Minoan' and even Magdalenian culture has many a lesson for the student of historical times. But above all a new spirit has little by little taken possession of archaeological research. Under the universal sway of modern science accuracy of observation and strictness of method are expected not only of the philological scholar but of any and every investigator in the classical field.

Changed conditions have brought with them a great influx of material, much of which bears directly on the main topic of this book. Important sites where Zeus was worshipped have been identified and examined. His caves on Mount Dikte and Mount Ide, his precinct on the summit of Mount Lykaion, his magnificent altar on the Pergamene Akropolis, his temples at Olympia and Athens and many another cult-centre, have been planned and published with the minutest care. Inscriptions too are discovered almost daily, and not a few of them commemorate local varieties of

the ubiquitous deity—now thirty or forty questions scratched on slips of lead and addressed to his oracle at Dodona, now a contract for the building of his temple at Lebadeia, now again a list of his priests at Korymbos, odd details of his rites at Iasos, a hymn sung in his service at Palakastro, and votive offerings to him from half the towns of Greece.—Such information, fresh and relevant, accumulates apace. Moreover, those who can neither dig nor travel carry on the quest at home. Year in, year out, the universities of Europe and America pour forth a never-ending flood of dissertations and programmes, pamphlets and articles, devoted to the solution of particular problems in ancient religion; and a large proportion of these is more or less intimately concerned with Zeus.

To cope with an output so vast and so varied would be beyond the strength of any man, were it not for the fact that intensive study follows hard upon the heels of discovery. On many aspects of what K. Schenkl called *die Zeusreligion* standard books have long since been penned by well-qualified hands. And more than one admirable summary of results is already before the public. Greek and Latin literature has been ransacked by writers galore, who have sketched the conceptions of Zeus to be found more especially in the poets and the philosophers; it would be tedious to enumerate names. Others again have dealt with the worship of Zeus as it affected a particular area: recent examples are Maybaum *Der Zeuscult in Boeotien* (Doberan 1901) and E. Neustadt *De Jove Cretico* (Berlin 1906). Yet others have written on some specialised form of Zeus: C. J. Schmitthenner *De Jove Hammone* (Weilburg 1890), H. D. Müller *Ueber den Zeus Lykaios* (Gottingen 1851), and A. H. Kan *De Jovis Policheni cultu* (Groningen 1901) will serve as specimens of the class. Notable attempts have been made to cover parts of the subject on more general lines. Inscriptions about Zeus are grouped together by W. Dittenberger *Sylloge inscriptionum Graecarum* (ed. 2 Leipzig 1898, 1900, 1901), C. Michel *Recueil d'inscriptions grecques* (Paris 1900, 1912), and H. Dessau *Inscriptiones Latinae selectae* (Berlin 1892, 1902, 1906, 1914). Descriptions of Zeus in Greek and Latin poetry are analysed by C. F. H. Bruchmann *Epitheta deorum quae apud poetas Graecos leguntur* (Leipzig 1893) and J. B. Carter *Epitheta deorum quae apud poetas Latinos leguntur* (Leipzig 1902). The festivals of Zeus in Athens and elsewhere are discussed by A. Mommsen *Feste der Stadt Athen* (Leipzig 1898) and, with greater circumspection, by M. P. Nilsson *Griechische Feste von religiöser Bedeutung mit Ausschluss der attischen* (Leipzig 1906).

The monuments too have received their fair share of attention. Statues and statuettes, reliefs, vase-paintings, coins, and gems are collected and considered *in primis* by J. Overbeck *Griechische Kunstmythologie* (Besonderer Theil i. 1 Zeus Leipzig 1871 with Atlas 1872, 1873)—a book that is a model of archaeological erudition. Further, every worker on this or kindred themes must be indebted to the *Répertoires* of S. Reinach, whose labours have now reduced chaos to cosmos, not merely in the reproduction of previously known sculptures and vases, but also in the publication of much unpublished material. For surveys of the whole subject we turn to the handbooks. And here again good work has been done. C. Robert's revision of L. Preller *Griechische Mythologie* (Theogonie und Goetter Berlin 1894) deals with Zeus in a clear conspectus of 45 pages. O. Gruppe, the greatest mythologist of modern times, compresses the Father of gods and men into 22 of his well-packed pages (*Griechische Mythologie und Religionsgeschichte* München 1897, 1906). Probably English readers will derive most benefit from the lucid chapters of Dr L. R. Farnell, who in his *Cults of the Greek States* (Oxford 1896, 1896, 1907, 1907, 1909) spends 144 pages in discussing 'Zeus,' 'The Cult-monuments of Zeus,' and 'The Ideal Type of Zeus' with a wealth of learning and aesthetic appreciation that leaves little to seek. Other treatments of the topic are no doubt already being designed for two at least of the three huge dictionaries now approaching completion. The *Dictionnaire des Antiquités grecques et romaines* edited by C. Daremberg and E. Saglio (Paris 1877-) has given some account of Zeus in its article on 'Jupiter' (vol. iii pp. 691—708 by E. P[ottier], pp. 708—713 by P. Perdrizet). But W. H. Roscher's *Ausführliches Lexikon der griechischen und römischen Mythologie* (Leipzig 1884-), though it includes an excellent article on 'Iuppiter' by Aust (vol. ii pp. 618—762), is not likely to reach 'Zeus' for some years to come. And the great syndicate of scholars who are re-writing Pauly's *Real-Encyclopädie der classischen Altertumswissenschaft* (Stuttgart 1894-) have not yet got as far as 'Iuppiter,' let alone 'Zeus.'

The present volume is the first of two in which I have (endeavoured to trace the development and influence of Zeus.) It would seem that the Greeks, starting from a sense of frank childish wonder, not unmixed with fear, at the sight of the animate sky, mounted by slow degrees of enlightenment to a recognition of the physical, intellectual, and moral supremacy of the sky-god. Dion

Chrysostomos in a memorable sentence declared Zeus to be 'the giver of all good things, the Father, the Saviour, the Keeper of mankind.' On the lower levels and slopes of this splendid spiritual ascent the Greeks found themselves at one with the beliefs of many surrounding peoples, so that a fusion of the Hellenic Zeus with this or that barbaric counterpart often came about. On the higher ground of philosophy and poetry they joined hands with a later age and pressed on towards our own conceptions of Deity. I have therefore felt bound to take into account not only the numerous adaptations of Levantine syncretism but also sundry points of contact between Hellenism and Christianity. It is obvious that the limits of such an enquiry are to a certain extent arbitrary. I shall expect to be told by some that I have gone too far afield, by others that I have failed to note many side-lights from adjacent regions. Very possibly both criticisms are true.

Indeed, given the subject, it is not altogether easy to determine the best method of handling it. As a matter of fact I have tried more ways than one. In the *Classical Review* for 1903 and 1904 I published a series of six papers on 'Zeus, Jupiter and the Oak,' which aimed at summarising the Greek and Roman evidence that might be adduced in support of Sir James G. Frazer's Arician hypothesis. Satisfied that the evidence was much stronger than I had at first supposed, I next attempted, rashly enough, to pursue the same theme into the Celtic, the Germanic, and the Letto-Slavonic areas. With that intent I wrote another series of eight articles on 'The European Sky-God,' which appeared in *Folk-Lore* between the years 1904 and 1907. Of these articles the first three restated, with some modifications, the results obtained on Graeco-Italic ground; and the remaining five were devoted to a survey of analogous phenomena among the Insular Celts. I had meant to go further along the same road. But at this point Dr Farnell in the friendliest fashion put a spoke in my wheel by convincing me that the unity of an ancient god consisted less in his nature than in his name. Thereupon I decided to abandon my search for 'The European Sky-God'; and I did so the more readily because I had felt with increasing pressure the difficulty of discussing customs and myths without a real knowledge of the languages in which they were recorded. After some hesitation I resolved to start afresh on narrower lines, restricting enquiry to the single case of Zeus and marking out my province as explained in the previous paragraph. Even so the subject has proved to be almost too wide.

I incline to think that a full treatment of any of the greater Greek divinities, such a treatment as must ultimately be accorded to them all, properly demands the co-ordinated efforts of several workers.

Be that as it may, in this instalment of my book I have traced the evolution of Zeus from Sky to Sky-god and have sought to determine the relations in which he stood to the solar, lunar, and stellar cults of the Mediterranean basin. I need not here anticipate my conclusions, since the volume opens with a Table of Contents and closes with a summary of results. But I would warn my readers that the story runs on from Volume I to Volume II, and that the second half of it is, for the history of religion in general, the more important. Zeus god of the Bright Sky is also Zeus god of the Dark Sky; and it is in this capacity, as lord of the drenching rain-storm, that he fertilises his consort the earth-goddess and becomes the Father of a divine Son, whose worship with its rites of regeneration and its promise of immortality taught that men might in mystic union be identified with their god, and thus in thousands of wistful hearts throughout the Hellenic world awakened longings that could be satisfied only by the coming of the very Christ.

To some it may be a surprise that I have not made more use of ethnology as a master-key wherewith to unlock the complex chambers of Greek religion. I am far from underestimating the value of that great science, and I can well imagine that the mythology of the future may be based on ethnological data. But, if so, it will be based on the data of future ethnology. For at present ethnologists are still at sixes and sevens with regard to the racial stratification of ancient Greece. Such a survey as K. Penka's *Die vorhellenische Bevölkerung Griechenlands* (Hildburghausen 1911) shows that progress is being made; but it also shows the danger of premature constructions. Hypotheses that stand to-day may be upset to-morrow; and to build an edifice on foundations so insecure would be seriously to imperil its stability. I shall therefore be content if certain ethnological conclusions can be drawn, as I believe they can, from the materials here collected, materials that have been arranged on other principles. Again, I may be taxed with an undue neglect of anthropological parallels. In defence I might plead both lack of knowledge and lack of space. But, to be honest, I am not always satisfied that similarity of performance implies similarity of purpose, and I hold that analogies taken from a contiguous area are much more likely to be helpful than analogies

gathered, sometimes on doubtful authority, from the ends of the habitable earth.

Mention must here be made of sundry minor points in method and arrangement. I have as far as possible refrained from mottling my text with Greek and Latin words, and have relegated the necessary quotations to foot-notes, which can be 'skipped' by the expeditious. The perennial problem of orthography I have solved along arbitrary, but I trust consistent, lines. My plan is to transliterate all Greek names (Aischylos, Phoinike, etc.) except those that have been so far Englished as to possess forms differing not only from the Greek but also from the Latin (Homer and Aristotle, the Achaeans and Thessaly). Greek words and phrases cited in the text are further italicised and accentuated. References in the foot-notes have the author's name transliterated, but the title of his work given in Latin to suit prevailing custom, unless that title includes the name of a Greek deity (*e.g.* Aisch. *P.v.*, Plout. *v. Aem. Paul.*, but Kallim. *h. Zeus*, Orph. *h. Dem. Eleus.*). To facilitate occasional usage I have provided two Indexes at the end of Volume I, the first dealing in detail with Persons, Places, and Festivals, the second more summarily with Subjects and Authorities. On the other hand, considerations of space have led me to reserve the Appendixes to the end of Volume II. I may add that the manuscript of that volume is already far advanced: its publication will not, I hope, be unduly delayed.

There remains the pleasant task of thanking those that have in a variety of ways helped towards the making of this book. It was Sir James G. Frazer who first advised me to put together in permanent form the materials that I had collected: he has seen about a third of the present volume, and, though well aware that I differ from him on certain vital issues, he has with characteristic generosity more than once encouraged me to persist in my undertaking. I am conscious that I owe much also, both directly and indirectly, to Dr O. Gruppe, who in his *Handbuch* and elsewhere has set up a standard of thoroughness that must for many a long day be kept in view by all writers on the subject of classical religion. Prof. G. Murray, with proofs of his own on hand, has yet given time to reading mine and has sent me a flight of pencilled *marginalia*, which I have been glad here and there to incorporate. Most of this book has been perused, either in manuscript or in slip, by Miss J. E. Harrison, to whose wide range and quick synthetic powers I am indebted for several valuable suggestions: I am the

more anxious to acknowledge this debt because on matters of the deepest import we do not see eye to eye. Other helpful criticisms have reached me from my friend Dr J. Rendel Harris, whose studies of 'Dioscurism' have obvious bearings on certain aspects of Zeus, and from Mr F. M. Cornford, especially in connexion with Dionysiac drama, a subject which he has made peculiarly his own.

Life in Cambridge has indeed afforded me, not merely ready access to a great Library, but—what is better still—ready access to many personal friends both able and willing to enlighten ignorance. On questions of etymology I, have time after time trespassed on the scanty leisure of Dr P. Giles, Master of Emmanuel College, or all too rarely had the benefit of a flying visit from the Rev. Dr J. H. Moulton, Greenwood Professor of Hellenistic Greek and Indo-European Philology in the Manchester University. Prof. E. J. Rapson has answered various queries with regard to Sanskrit myths and has furnished me with a detailed note on the Vedic Dyaus. One who deals with the syncretistic worships of the nearer East must perforce make excursions into the religions of Egypt, Babylonia, Syria and Asia Minor. In things Egyptian I have consulted Mr F. W. Green, Mr H. R. Hall, and Mrs C. H. W. Johns. For Mesopotamian cult and custom I have gone to my friend and former colleague Dr C. H. W. Johns, Master of St Catharine's College. Semitic puzzles have been made plain to me, partly in long-suffering talks and partly on learned post-cards (that boon of modern University life), by the Rev. Prof. R. H. Kennett of Queens' College, by Profs. A. A. Bevan and F. C. Burkitt of Trinity College, by Mr N. McLean of Christ's College, and by Mr S. A. Cook of Gonville and Caius College: to each and all of them I tender my cordial thanks.

In a book of this character, with its constant appeal to the monuments, textual illustration is not a luxury but a necessity. And here again many friends have laid me under lasting obligations. Photographs of unpublished scenes or objects have been sent to me by Mr K. Kourouniotes, Dr C. G. Seligmann, Mr E. M. W. Tillyard, Mr P. N. Ure, Mr A. J. B. Wace, and by my brother Dr A. R. Cook. Mr A. H. Smith, Keeper of Greek and Roman Antiquities in the British Museum, has allowed me to have photographs and drawings made of numerous art-treasures in gold and silver, bronze, marble, and terra cotta: not a few of them are figured here for the first time. I am specially indebted to Mr H. B. Walters, Assistant-Keeper of the same collection, who

has compared the drawings of vases with the vases themselves, and to Miss P. B. Mudie Cooke, who has verified illustrations and references for me in the Reading Room. In the Department of Coins and Medals Mr G. F. Hill and the late Mr W. Wroth likewise gave me valuable help, partly by discussing various numismatic problems, and partly by supplying me with scores of casts taken from the coins under their charge. Mr F. H. Marshall, formerly of the British Museum, has sent me impressions of gems in the Gold Room, and Monsieur E. Babelon has furnished me with the cast of an unpublished coin in the Paris cabinet. Permission to have drawings made from objects in their possession was granted to me by Mr R. M. Dawkins, Mr F. W. Green, and Dr W. H. D. Rouse; permission to reproduce blocks, by Messrs F. Bruckmann and Co., Monsieur l'Abbé H. Breuil, and Sir William M. Ramsay. Mr J. R. McClean, who was always eager to put his magnificent collection of Greek coins at the service of classical scholarship, generously allowed me to anticipate his *Catalogue* by figuring several of his most interesting specimens, and but a few weeks before his death contributed a large sum towards the better illustration of this work. Another liberal donation to the same object, enhanced by a letter of rare kindness, has reached me from my friend and fellow-lecturer the Rev. Dr A. Wright, Vice-President of Queens' College.

Of the subjects represented in my first volume thirteen coins and one relief were drawn for me by the late Mr F. Anderson, official draughtsman to the British Museum. But the main bulk of the drawings has been made by an equally gifted artist, Miss E. N. Talbot of Saint Rhadegund's House, Cambridge. To her scrupulous exactitude and unremitting industry I am indebted for no fewer than three hundred and twenty-five of my cuts, including the two coloured designs and the restorations attempted in plates vi, xv, xxiii, and xl. Nor must I omit to thank another craftsman of first rate ability, Mr W. H. Hayles of the Cavendish Laboratory, who visited more than one museum on my behalf and, though working against time and not always in ideal conditions, produced a series of exceptionally good photographs.

The Syndics of the University Press by undertaking financial responsibility for the whole work have shouldered a heavy burden with little or no hope of ultimate remuneration. Apart from their timely assistance this book would have remained a pile of musty manuscript. Moreover, at every stage of its production I have

met with unwearied courtesy and consideration from the Manager and Staff of the Pitt Press. In particular I wish to express my obligation to Mr N. Mason, whose resourceful skill has frequently surmounted obstacles in the way of satisfactory illustration, and to Mr W. H. Swift, whose vigilance and accuracy in proof-reading have been to me a perpetual marvel.

Finally, my wife has devoted many hours to the monotonous work of Index-making. I am glad to think that in consequence of her labours this volume will be decidedly more useful than it could otherwise have been.

ARTHUR BERNARD COOK.

19 CRANMER ROAD, CAMBRIDGE.

22 *July* 1914.

CONTENTS OF VOLUME I

CHAPTER I

ZEUS AS GOD OF THE BRIGHT SKY

	PAGES
§ 1. Zeus and the Daylight	1—25
(a) Zeus the Sky	1
(b) The Transition from Sky to Sky-god	9
(c) Zeus <i>Amários</i>	14
(d) Zeus <i>Panámaros</i> , <i>Panemeros</i> , <i>Panemérios</i>	18
§ 2. Zeus and the Burning Sky	25—62
(a) <i>Aithér</i> as the abode of Zeus	25
(b) Zeus <i>Aithérios</i> , Zeus <i>Aithrios</i>	26
(c) Zeus identified with <i>Aithér</i> (sometimes with <i>Aer</i>) in Philosophy and Poetry	27
(d) Zeus as god of the Blue Sky in Hellenistic Art	33
i. The Blue <i>Nimbus</i>	34
ii. The Blue Globe	41
iii. The Blue Mantle	56
§ 3. Zeus <i>Lýkaios</i>	63—99
(a) Wolf-god or Light-god?	63
(b) Peloponnesian coin-types of Zeus <i>Lýkaios</i>	68
(c) Human sacrifice to Zeus <i>Lýkaios</i>	70
(d) The Precinct of Zeus <i>Lýkaios</i>	81
(e) The Cult of Zeus- <i>Lýkaios</i> at Kyrene	89
(f) Zeus <i>Lýkaios</i> on a Spartan ('Cyrenaic') <i>kýlix</i>	92
(g) Zeus-like deities in wolf-skin garb	96
§ 4. Zeus and Olympos	100—117
(a) The Cult of Zeus on Mount Olympos	100
(b) Dionysiac traits in the Cult of Zeus on Mount Olympos	104
(c) Development in the meaning of <i>Ólympos</i> . Zeus <i>Ólýmpios</i>	113
§ 5. The Mountain-cults of Zeus	117—186
(a) Chronological Development of the Mountain-cults	117
(b) The Mountain as the Throne of Zeus	124
(c) The Mountain as the Birth-place of Zeus	148
(d) The Mountain as the Marriage-place of Zeus	154
(e) The Mountain as the Burial-place of Zeus	157
(f) Zeus as a Mountain-god superseded by Saint Elias	163

	PAGES
§ 6. Zeus in relation to the Sun	186—730
(a) Direct identifications of Zeus with the Sun	186
(b) Cult-epithets of Zeus that may be solar	195
(c) The Sun as the Eye of Zeus	196
(d) The Sun as a Wheel	197
i. The Solar Wheel in Greece	197
(a) Ixion	198
(β) Triptolemos	211
(γ) Kirke	238
(δ) Medeia	244

XLII	<i>Kýlix</i> at Taranto: Zeus <i>Lýkaios</i>	782

ABBREVIATIONS

This List of Abbreviations has been drawn up in accordance with two principles. On the one hand, the names of Authors have not been shortened, save by the omission of their initials. On the other hand, the titles of Books and Periodicals have been cut down, but not—it is hoped—beyond the limits of recognizability.

The customary abbreviations of classical writers and their works (for which see *supra* p. xiv) are not here included.

- Abh. d. bayer. Akad. Philos.-philol. Classe* = *Abhandlungen der philosophisch-philologischen Klasse der königlich bayerischen Akademie der Wissenschaften München* 1835—
- Abh. d. berl. Akad. Phil.-hist. Classe* = *Abhandlungen der königlich preussischen Akademie der Wissenschaften Philosophisch-historische Classe Berlin* 1804—
- Abh. d. gött. Gesellsch. d. Wiss. Phil.-hist. Classe* = *Abhandlungen der königlichen Gesellschaft der Wissenschaften zu Göttingen Historisch-philologische Klasse Göttingen* 1838—
- Abh. d. sächs. Gesellsch. d. Wiss. Phil.-hist. Classe* = *Abhandlungen der philologisch-historischen Klasse der königlich sächsischen Gesellschaft der Wissenschaften Leipzig* 1850—

CHAPTER I

ZEUS AS GOD OF THE BRIGHT SKY.

§ 1. *Zeus and the Daylight.*

(a) Zeus the Sky.

THE supreme deity of the ancient Greeks, during their historical period at least, was Zeus. His name, referable to a root that means 'to shine,' may be rendered 'the Bright One'. And, since a whole series of related words in the various languages of the Indo-Europæan family is used to denote 'day' or 'sky',² it can be safely inferred that Zeus was called 'the Bright One' as being the god of the bright or day-light sky.³ Indeed a presumption

¹ K. Brugmann *Grundriss der vergleichenden Grammatik der indogermanischen Sprachen*² Strassburg 1897 i. 204, 210, 263, 276 f., 307, 527, 797, 1906 ii. 1. 133 f., *id.* *Kurze vergleichende Grammatik der indogermanischen Sprachen* Strassburg 1904 p. 312, Schrader *Reallex.* p. 670, H. Hirt *Die Indogermanen* Strassburg 1907 ii. 506. The Greek *Zeús* and the Old Indian *Dyaus* represent an Indo-Europæan **d̥i̯eu-s* from the root *d̥i̯*: *di̯*: *deja*, 'to shine.'

² This series as collected by Walde *Lat. etym. Wörterb.* s.vv. *deus*, *dies*, and *Hirt op. cit.* ii. 734 f. includes the following forms: Greek *ἔνδιος* 'at mid-day,' *εὐδία* 'clear sky'; Latin *sub dīvo* 'under the open sky,' *dies* 'day'; Welsh *dīw dyw dydd* 'day,' Breton *dez* 'day,' Cornish *det* 'day,' Irish *indiu* 'to-day'; Gothic *sin-teins* 'daily'; Lithuanian *diēnà* 'day,' Slavonic *dini* 'day'; Albanian *dito* 'day'; Armenian *tiv* 'day'; Old Indian *divá* 'on the day,' *divám*, 'day, sky.'

³ Two misleading explanations may here be noted. (1) E. H. Meyer *Germanische Mythologie* Berlin 1891 pp. 182, 220 holds that *Zeús* denotes properly the 'hurler' or 'discharger' of rays (cp. H. Grassmann *Wörterbuch zum Rig-veda* Leipzig 1873—1875 p. 600 s.v. *div*.) and infers that he must have been the lightning-god, not as is commonly supposed the god of bright day-light. But the frequent use of the word *dyaus* in the *Rig-veda* for 'sky' or 'day' (A. A. Macdonell *Vedic Mythology* Strassburg 1897 p. 21, P. von Bradke *Dyaus Asura* Halle 1885 p. 110) and the existence of the forms recorded in the foregoing note are conclusive in favour of the common view.

(2) Frazer *Golden Bough*³ ii. 369, *ib.*² iii. 456 f., suggested that Zeus was named 'Bright' as being the oak-god, *i.e.* god of the tree whose wood was used in fire-making. Against this view I protested in the *Class. Rev.* 1902 xvi. 372, as did Gruppe *Gr. Myth. Rel.* p. 1100 n. 2. And Frazer *op. cit.*³ ii. 358 n. 1 admits that he 'was disposed to set aside much too summarily what may be called the meteorological side of Zeus and Jupiter,' though he still regards the oak-tree as the primary, not a secondary, element in their composite nature (*ib.* ii. 373 ff.). I now hold, and shall hope in vol. ii of the present work to show, that the oak was originally the tree of the earth-mother rather than the tree of the sky-father, and that the latter acquired it in the first instance through association with the former.

is raised that Zeus was at first conceived, not in anthropomorphic fashion as the bright sky-god, but simply as the bright sky itself. True, the Greeks at the time when their literature begins had advanced far beyond this primitive view. Zeus in the *Iliad* is already the potent, if not omnipotent, ruler of the gods, the description of whose nod is said to have inspired Pheidias' masterpiece at Olympia¹:

So spake the son of Kronos and thereto
Nodded with darkling brow²: the lordly locks,

¹ Strab. 354, Val. Max. 3. 7. *ext.* 4, Dion Chrys. *or.* 12 p. 383 Reiske, Macrobi. *Sat.* 5. 13. 23, Eustath. *in Il.* p. 145, 10 ff., cp. Polyb. 30. 10. 6, Plout. *v. Aem. Paul.* 28.

² *κνανέησιν ἐπ' ὀφρύσιν.* 'Blue' here implies 'black' (see Stephanus *Thes. Gr. Ling.* s.vv. *κνάεος* and its compounds)—a confusion characteristic of early thought and as such well known to anthropologists. A seated figure of Zeus from a sixth-century *poros* pediment, now in the Akropolis Museum at Athens, has undeniably black hair, eyebrows, and beard (T. Wiegand *Die archaische Poros-Architektur der Akropolis zu Athen* Cassel and Leipzig 1904 p. 97 ff. pl. 8, 1—2).

It is probable that Pheidias' chryselephantine Zeus and its copies had hair and beard of gold; for Lucian makes Zeus complain that a couple of his curls, weighing six minas apiece, were cut off and stolen from Pisa by burglars (Loukian. *Iup. trag.* 25), and Pausanias states that Theokosmos of Megara, helped by Pheidias, made for the Megarian *Olympieion* a statue of Zeus, which had *πρόσωπον ἐλέφαντος καὶ χρυσοῦ* (Paus. 1. 40. 4). But it would be rash to infer from this that the god was essentially fair-haired. The Minoans of Knossos made ivory statuettes of athletes with hair of gilded bronze (*Ann. Brit. Sch. Ath.* 1901—1902 viii. 72 f. pls. 2 f.). Were they blondes? Herodes Attikos erected a chryselephantine statue of Poseidon in the Isthmian temple (Paus. 2. 1. 7 f.). But Poseidon was not xanthotrichous.

A terra-cotta head of Zeus found at Olympia and dating from the first quarter of the fifth century B.C. bears traces of a blackish brown varnish on the hair, on the forehead, and round the eyes: this was either a protective coating (G. Treu in *Olympia* iii. 35 f. pl. 7, 4 and fig. 37), or more probably a lustre intended to imitate the effect of bronze (A. Furtwängler *Die Bronzefunde aus Olympia* Berlin 1879 p. 90, W. Deonna *Les statues de terre cuite dans l'antiquité: Sicile* etc. Paris 1908 p. 25 f.). The terra-cottas from Smyrna that show Zeus or Zeus Sarapis with gilded head and hair (*Brit. Mus. Cat. Terracottas* C 445, cp. D 392, S. Reinach *Esquisses archéologiques* Paris 1888 p. 223 f.) may denote a similar attempt to copy gilt bronze. A terra-cotta head of Zeus, found by Lord Savile at Lanuvium and now in the Fitzwilliam Museum at Cambridge, came probably from a pediment of the third century B.C. (W. Deonna *op. cit.* p. 138): it shows traces of red in the hair and beard; but here we have to reckon with the conventional colouring of architecture (A. Furtwängler *Aegina* München 1906 i. 304 ff.).

Greek vase-painters, bound by their artistic traditions, commonly of course represent Zeus with black hair, but occasionally give him a grey beard or white hair (Overbeck *Gr. Kunstmyth.* Zeus p. 29).

Not till Roman times do we get a demonstrably light-haired Zeus. On wall-paintings from the Villa Farnesina (*Gaz. Arch.* 1883 viii. 99 f. pl. 15 Zeus with the attributes of Dionysos, *Ann. d. Inst.* 1884 lvi. 320, *Mon. d. Inst.* xii. pl. 7, 5, P. Girard *La Peinture Antique* Paris 1891 p. 309 fig. 188, Helbig *Guide Class. Ant. Rome* ii. 246 no. 1083) and from Pompeii (listed in Helbig *Wandgem. Camp.* p. 30 ff., Sogliano *Pitt. mur. Camp.* p. 19 ff., Herrmann *Denkm. d. Malerei* pls. 11, 46, 2, etc.) his hair varies from dark to light. A wall-painting of the Hadrianic age from Eleusis shows him enthroned with a Nike in his right hand, a sceptre in his left: his head is unfortunately mutilated, but

Ambrosial, on his immortal head
Shook—at their shaking all Olympos quaked¹.

Nevertheless, although Zeus as conceived by the Homeric minstrel is fully anthropomorphic, certain traces of the earlier conception persisted even into post-Homeric times². The evidence is linguistic rather than literary. I shall begin by passing it in review.

Closely akin to the substantive *Zeús* is the adjective *díos*, which denotes properly 'of' or 'belonging to Zeus³'. This meaning it actually bears in Attic drama⁴. But how comes it that in the much earlier Homeric poems it has the force of 'bright' or 'glorious' without any such restriction to the property of a personal Zeus⁵? Probably because the word was formed before Zeus became a personality, when as yet he was *the* Zeus, the radiant sky credited with an impersonal life of its own. *Díos* in fact meant at first 'of' or 'belonging to the bright sky'; and a vestige of its primary meaning is to be found in the frequent Homeric phrases 'the *bright* upper air⁶' and 'the *bright* dawn⁷'. The transition from brightness in this sense to glory or splendour in general is not hard to follow. Further, when Zeus came to be regarded as an individual sky-god, the way was open for *díos*, 'of the bright sky,' to take on the more personal meaning, 'of the

enough remains to prove that the beard, like the body, was red-brown in colour shaded with black ('Εφ. Ἄρχ. 1888 p. 77 ff. pl. 5).

¹ *Il.* i. 528 ff., cp. 8. 199 (of Hera). For a similar explanation of earthquakes in modern Greece see *infra* ch. ii. § 5.

² Wissowa *Rel. Kult. Röm.* p. 100 contrasts Zeus the personal sky-god with Iupiter the actual sky (cp. W. Warde Fowler *The Religious Experience of the Roman People* London 1911 pp. 128, 141). But the contrast was neither originally nor finally valid: at the first both Zeus and Iupiter were the sky; at the last both were the sky-god.

³ Brugmann *Grundriss* etc.² ii. 1. 187 ('himmlisch'), *id.* *Kurze vergl. Gram.* etc. pp. 99 ('himmlisch'), 360 ('göttlich'), L. Meyer *Handb. d. gr. Etym.* iii. 175 f. ('von Zeus herrührend, Zeus angehörend,' dann allgemeiner 'himmlisch, göttlich, herrlich' oder ähnlich), Prellwitz *Etym. Wörterb. d. Gr. Spr.*² p. 117 ('göttlich'), Boisacq *Dict. étym. de la Langue Gr.* p. 189 f. ('divin'), treat *díos* as **ǵl̥ios* from *Διϝ-*, 'Zeus.'

⁴ E.g. Aisch. *P. v.* 619 βούλευμα μὲν τὸ Δίον, Ἡφαίστου δὲ χεῖρ, Eur. *Ion* 1144 ἀνάθημα Δίου παιδός.

⁵ According to H. Ebeling *Lexicon Homericum* Lipsiae 1885 i. 310 f. Homer has *díos* in the sense 'bright' or 'glorious' of goddesses (but not gods, though in *frag. h. Dion.* 2 *δίον γένος* is Dionysos son of Zeus, and in *Il.* 17. 582 Zenodotos wrote *díos Ἄρηι*), nymphs, men and women, peoples and places, divine horses, rivers and mountain-peaks, land and sea.

⁶ *Il.* 16. 365, *h. Dem.* 70 αἰθέρος ἐκ δίης, *Od.* 19. 540 ἐς αἰθέρα δῖαν, cp. Emped. *frag.* 109, 2 Diels αἰθέρα δῖον, Aisch. *P. v.* 88 ὦ δίος αἰθήρ, Orph. *frag.* 53, 1 Abel αἰθέρι δῖω, 167, 1 αἰθέρα δῖον.

⁷ *Il.* 24. 417 ἦώς ὅτε δῖα φανήη, *ib.* 9. 240, 662, 11. 723, 18. 255, *Od.* 9. 151, 306, 436, 11. 375, 12. 7, 16. 368, 19. 50, 342 ἦώ δῖαν.

god Zeus⁴. Thus, on the assumption that Zeus began life as *the* Zeus, both Homeric and Attic usages are satisfactorily explained¹. We note in passing that in north-eastern Phrygia Zeus was worshipped as Zeus *Dios*, a double appellation which recalls the *Dea Dia* of the Romans, and very possibly attests the survival among the Thracio-Phrygian folk of an early, not to say primitive, Zeus.

Another adjective *endios* occurs in epic verse with the meaning 'in broad day-light' or 'at mid-day'. For example, Nestor in the *Iliad* describes an expedition in which he had once taken part:

At mid-day (*endios*) came we to the sacred stream
Alpheios⁴.

Eidothea too in the *Odyssey* tells Menelaos the habits of her father Proteus:

What time the Sun bestrides mid heaven, there comes
Shoreward the unerring Ancient of the Sea⁵.

And fifty lines further on her word is made good:

At mid-day (*endios*) came the Ancient from the sea⁶.

¹ Another possible, but—as it seems to me—less probable, explanation would be to say that *Dios* meant originally 'of Zeus,' i.e. of the personal Zeus, and that its meaning had been widened and weakened by epic usage till *dios* came to signify merely 'divine,' while yet Attic poetry retained the primary force of the word *Dios*, 'of Zeus.' That different dialects should be at different stages in the evolution of the meaning of a given word, and even that the early poetry of one dialect should give only the later meaning while the later poetry of another dialect gave only the early meaning, is certainly thinkable. But the hypothesis set forth in the text involves fewer assumptions.

² A. Korte in the *Zeit. f. d. Altert.* 1897 clix. 409 f. publishes (after G. Radet 'En Phrygie' in the *Annales des Missions Scientifiques* Paris 1895 vi. 425—594) a name for Zeus at Eski-schehir in the Kütshük-Han inscribed 'Αγαθῆ τέχνη | Σόλων ἱερός κατὰ ἐπιταγήν Διὸς ἢ Διὸς ἑχέην. Ως κὲ ἐαντῶ ζῶν. On the upper part of the altar are two bunches of grapes: on the base, a plough of a kind still much used in Anatolia. Korte observes that the quantity of *ε* in *Διός* is doubtful, and suggests that we have here perhaps den unalten Himmelsgott *Dios* (an ancient nominative assumed by H. Usener *U. Paganorum* Bonn 1896 pp. 43, 70 f. to account for *Διόσθουος*, *Διός Κόρυθος*, *nu-dius* *Terminus*, *Diu* *Idibus*, *Διανος*). This, however, is highly precarious. I prefer to write *Διός* with Sir W. M. Ramsay *Studies in the History and Art of the Eastern Provinces of the Roman Empire* Aberdeen 1906 p. 275, who notes that Solon, servitor of Zeus *Dios*, discharged a vow to his god and by the same act of devotion made a tomb for himself.

³ So Souda. *ε*. *ἐνδῖος*, Hesych. *ε*. *ἐνδία*, *ἐνδῖος*, *ἐνδῖος*, *et. mag.* p. 339, 1, *et. Gud.* p. 186, 39, Orion p. 60, 4, Apollon. *lex. Hom.* *ε*. *ἐνδῖος*, Cramer *anecd. Oxon.* ii. 200, 7 f.

⁴ *Il.* 11. 726 with Eustath. in *Il.* p. 881, 5 κατὰ μεσημβρίαν: schol. V. *ad loc.* says οὐδ' αἰέναν.

⁵ *Od.* 4. 400 f.

⁶ *Ib.* 450 with scholl. V. B. E. *ἐνδῖος*: μεσημβρινός.

Similarly Soudas cites the following couplet, perhaps by Kallimachos:

So, while mid-day (*éndios*) endured and earth grew hot,
More brilliant than crystal shone the sky¹.

From this adjective are derived verbs meaning 'to take a mid-day siesta', 'to live in the open air', 'to grow up into the air'.² But the adjective itself must have meant originally 'in the Zeus' or 'in the bright sky',³ thence passing into the sense 'in broad daylight', 'at mid-day'.⁴

Lastly, there is the adjective *eúdios* 'with a clear sky, tranquil',⁵ the substantive *eudía* 'a clear sky, calm weather',⁶ and the verbs *eudiân*, *eudiázesthai* 'to be serene'.⁷ These all spring from the same root as *díos*, *éndios*¹⁰, and alike bear witness to the fact that

¹ Soud. *s.v.* *éndios* = Kallim. *frag. an.* 24 Schneider. Hellenistic poets affected the word, e.g. Kallim. *h. Dem.* 39 *ποτὶ τῶνδιον* with schol. *περὶ τὸ μεσημβρινόν*, *id. frag.* 124 Schneider *ἴδεος ἔνδιου*, *id. Hekale frag.* pap. col. iv, 2 *ἀλλ' ἢ νύξ ἢ ἔνδιος ἢ ἔσσετ' ἡμᾶρ*, Ap. Rhod. 1. 603 *ἐς ἔνδιον* with schol. *μέχρι μεσημβρίας*, *id.* 4. 1310 *ἔνδιον ἡμᾶρ ἔην*, *περὶ δ' ὀξύταται θέρον αὐγαὶ | ἡελίου Λιβύην*, Theokr. 16. 95 *ποιμένας ἔνδιους* with schol. *vet. κατὰ τὴν μεσημβρίαν* and gloss M. *δειλιούς* (imitated by Antiphilos in *Anth. Pal.* 9. 71), Arat. *phaen.* 498 *πέντε μὲν ἔνδια στρέφεται καθ' ὑπέριερα γαίης* with schol. *τὸ δὲ ἔνδια ἡμερῶν, ὑψηλὰ ὑπὲρ γῆν, παρὰ τὸν ἔνδιον καιρὸν τὸν μεσημβρινόν*, *id.* 954 *ἢ καὶ βόες ἤδη τοὶ πάρος ὕδατος ἔνδιου | οὐρανὸν εἰσανιδόντες ἀπ' αἰθέρος ὠσφρήσαντο* with schol. *τὸ δὲ ὕδατος ἔνδιου ἤγουν μεσημβρινού καὶ οὐρανόυ*.

² *Ἐνδιάζειν*: Plout. *symf.* 8. 6. 5, *v. Rom.* 4, *v. Lucull.* 16. Cp. Hesych. *ἐνδιῶνται*· *μεσημβριάζουσιν*.

³ *Ἐνδιᾶν*: Theokr. 16. 38, 22. 44, *Anth. Pal.* 5. 291. 6 Agathias. The verb came to mean simply 'to dwell': *Anth. Pal.* 2. 122 Christodoros, *ib.* 4. 4. 10 Agathias, *ib.* 5. 269. 10 Paulus Silentiarius. The (Alexandrine?) author of the Homeric *h. Sel.* says of the full moon *ἢ ἀκτίνες δ' ἐνδιῶνται*, which E. E. Sikes *ad loc.* would render: 'are as bright as day.'

⁴ *Ἐνδιῶν*: Tab. Heracl. 1. 120 *f. ταῦτα δὲ πάντα (sc. τὰ δένδρα) πεφυτευμένα παρέξοντι καὶ ἐνδε|διωκότα*, which G. Kaibel in the *Inscr. Gr. Sic. It.* p. 174 renders 'arbores quae in aere succreant.'

⁵ *Ἐνδιος* is related to *ἐν Δι* as is *ἐννύχιος* to *ἐν νυκτι* or *ἐνάλιος* to *ἐν ἀλι*: see L. Meyer *Handb. d. gr. Etym.* i. 423, Prellwitz *Etym. Wörterb. d. Gr. Spr.*² p. 142, Boisacq *Dict. Etym. de la Langue Gr.* p. 250.

⁶ W. Prellwitz *Eine griechische und eine lateinische Etymologie* Bartenstein 1895 p. 8 notes that *ἐνδιος* is for *ἐνδιλιος* and *ἐνδιός* for *ἐνδιλιός*, both being derived from *ἐν Δι*, 'im Zeus, im lichten Tage.'

⁷ Cp. *Od.* 8. 449 *αὐτόδιον*, 'straightway,' lit. 'on the self-same day' (so Prellwitz *Etym. Wörterb. d. Gr. Spr.*² p. 66, Boisacq *op. cit.* p. 103, on the analogy of *αὐτήμαρ*).

⁸ E.g. Arat. *phaen.* 823 *εὐδιου... ἡματος*, *Georgon.* 18. 3. *ἢ ἡμέρας εὐδιου*, Orph. *h. Aith.* 5. 6 *Μηροῖα* *sc. (sc. Aither) κεκραμένον εὐδιον εἶναι*, *id. h. Hel.* 8. 13 *f. ἀθάνατε Ζεῦ*, | *εὐδιε, πασιφαές* of the sun, Arat. *phaen.* 784 *εὐδιός κ' εἴη* of the moon, *Anth. Pal.* 9. 806. 3 *παναιγλήεντα καὶ εὐδιον* of a space cleared for a sun-dial.

⁹ E.g. Pind. *Isthm.* 7 (6). 37 *f. εὐδιαν ὅπασσεν | ἐκ χειμῶνος*, Theophr. *caus. pl.* 3. 23. 5 *ἐὰν γὰρ εὐδίαὶ καὶ τὰ νότια ἐνισχύωσι*.

¹⁰ E.g. Arat. *phaen.* 899 *πάντη Διὸς εὐδιῶντος* with schol. *εὐδίας ὁσσης*, Plut. *Asiack.* 370 *D bios, ἀσαλεύτω ἡσυχία εὐδιάζομενος*.

¹¹ Prellwitz *op. cit.* p. 162, Boisacq *op. cit.* p. 293.

Zeus once signified the animate sky. It is interesting to observe that the tenth-century scholar, who compiled the great Greek lexikon known as the *Etymologicum Magnum*, seems to have had an inkling of the truth; for in discussing the words *cúdios* and *eudía* he suggests as a possible derivation—'or because *Zeús* denotes "the sky" also¹.

When the pre-anthropomorphic conception of Zeus had developed into the anthropomorphic, the natural tendency would be to forget the former in the latter. We can hardly expect, therefore, to find in extant Greek literature the name *Zeús* used as a simple equivalent of 'the sky.' Still, there are occasional passages of a more or less colloquial sort, in which the ancient usage may be detected. Thus Aristophanes in his comedy *Friends of the Frying-pan* makes one of the characters exclaim :

And how should Plouton bear the name he does bear,
Had he not got the best of it? I'll explain.
The things of earth surpass the things of Zeus.
When you are weighing, 'tis the laden pan
Seeks earth, the empty one goes up towards Zeus².

The remark gains in point, if we may suppose that 'towards Zeus' was a popular expression for 'sky-wards.'³ It certainly appears to be used in that sense by Euripides: he has in his *Kyklops* the following conversation between Polyphemos, who has returned home unexpectedly, and the Chorus of Satyrs, who are caught idling and so face their ferocious master with hanging heads :

Kyklops. Look up, not down.
Chorus. There! We are staring up towards Zeus himself:
I see the stars; I see Orion too⁴.

Plutarch, again, quotes a witty epigram on Lysippos' statue of Alexander the Great with its characteristic upturned gaze:

The man of bronze who looks to Zeus
Says (so I should opine)—

¹ *Et. mag.* p. 389, 35 ἢ ὅτι ὁ Ζεὺς σηματοῦναι καὶ τὸν οὐρανόν, cp. *ib.* p. 409, 6 (Ζεὺς σηματοῦναι) τὸν θεὸν ἢ τὸν οὐρανόν. So *Lyd. de mens.* 4. 176 p. 183, 9 ff. Wunsch Ζεὺς γὰρ ὁ ἀήρ... ὥστε διοσημεῖα τὸ τοῦ ἀέρος σημεῖον, ὥσπερ εὐδίων τὸ πρᾶον καὶ γαλητῶν τοῦ ἀέρος καλεῖται σχῆμα, *Eustath. in Il.* p. 881, 9 ἐνδιοιοι. ἴσως δὲ καὶ παρὰ τὸν ὑγρὸν Δία, ὃ ἐστὶν ἀέρα, *Tzetz. alleg. II.* 1. 375 καὶ Ζεὺς αὐτὸς ἠρέμησεν εὐδῖος σὺν αἰθέρι. On the equation of Zeus with ἀήρ see further *infra* p. 30.

² *Aristoph. Tegenistae frag.* 1. 1—5 *Meineke ap. Stob. flor.* 121. 18 (ed. Gaisford iii. 417): the last clause is ὅταν γὰρ ἰστᾶς, τοῦ ταλάντου τὸ βέπον | κάτω βαδίζει, τὸ δὲ κενὸν πρὸς τὸν Δία.

³ For a Latin parallel see *Ap. met.* 10. 21 (cod. Laur. 54. 24) dentes ad Iovem elevans (of an ass looking up).

⁴ *Eur. Cycl.* 211 ff. *KT.* βλέπετ' ἄνω καὶ μὴ κάτω. | ΧΟ. ἰδοῦ, πρὸς αὐτὸν τὸν Δί' ἀνακεκῦψαμεν, | καὶ τᾶστρα καὶ τὸν Ἄριωνα δέρκομαι.

'This earth I keep for my own use ;
The sky, Zeus, is for thine!'

With these passages of comedy and quasi-comedy should be compared certain others of more serious tone, in which the poet says 'the rays of Zeus' or 'the light of Zeus' where we should say 'the light of day.' The *Iliad* thus describes the crash of a battle between Argives and Trojans:

The din of both
Rose to the upper sky and the rays of Zeus².

Hekabe in the tragedy that Euripides named after her speaks of her dead son Polydoros as—

No longer in the light of Zeus³.

In the same poet's *Iphigenia at Aulis* the heroine, when she departs to her death, bids adieu to the day-light:

O lamp of day
And light of Zeus,
Another life,
Another lot
Henceforth be mine.
Loved light, farewell⁴.

In such passages it is difficult to determine whether Zeus is conceived as anthropomorphic, or not. Anthropomorphism is, however, apparent in the *Rhesos*, where Euripides writes not only 'the light of the god⁵' but also 'Zeus god of Light⁶.'

¹ Plout. *de Alex. magn.* 1. 9, 2. 2 (=Cougny *Anth. Pal. Append.* 3. 53) αὐδασοῦντι δ' ἔοικεν ὁ χάλκεος εἰς Δία λεύσσων· | 'γῶν ὑπ' ἐμοὶ τίθεμαι, Ζεῦ, σὺ δ' Ὀλυμπον ἔχε.'

² *Il.* 13. 837 ἡχῆ δ' ἀμφοτέρων ἕκετ' αἰθέρα καὶ Διὸς αὐγὰς. Schol. B. Διὸς γὰρ αὐγὰς λέγει τὸν οὐρανόν. Schol. V. τὸν οὐρανόν· δι' αἰθέρος οὐρανὸν ἦκεν (*Il.* 2. 458). So schol. T., adding οἱ δὲ "Διὸς" τοῦ ἡλίου, Πλατωνικῶς. Cp. Eustath. *in Il.* p. 962, 64 f. Διὸς αὐγὰς, ὃ ἐστὶν ἡλίου κατὰ τοὺς παλαιούς and *et. mag.* p. 409, 9 which quotes the line as proof that Zeus sometimes means 'the sun.' Hesych. Διὸς αὐγὰς· τῆς ἡμέρας τὸ φῶς. τὸν αἰθέρα. The phrase recurs in a Greek metrical inscription found at Ostia (*Inscr. Gr. Sic. It.* no. 940 [ἐν αἰθέ]ρι καὶ Διὸς αὐγαῖς).

³ Eur. *Hec.* 707 οὐκέτ' ὄντα Διὸς ἐν φάει.

⁴ *Id.* *I.A.* 1505 ff. ἰὼ ἰώ, | λαμπαδοῦχος ἀμέρα | Διὸς τε φέγγος, κ.τ.λ.

⁵ *Id.* *Rhes.* 331 τοῦπιόν σέλας θεοῦ='to-morrow.'

⁶ *Id.* *ib.* 355 Ζεὺς ὁ Φαναῖος. Perhaps we should rather render 'He that Appareth'; cp. *ib.* 370 φάνηθι. The same title was borne by Apollon in Chios (Hesych. *s.v.* Φαναῖος), and is thus explained by Macrob. *Sat.* 1. 17. 34: Φαναῖον (MSS. Φανεόν) ἐπειδὴ φαίνεται νέος, quia sol cotidie renovat sese. Cornut. *theol.* 32 p. 67, 3 f. Lang has ('Ἀπόλλωνα) Φαναῖον ἀπὸ τοῦ δηλοῦσθαι δι' αὐτοῦ τὰ ὄντα καὶ φωτίζεισθαι τὸν κόσμον. But, as applied to the Chian Apollon, and presumably also to Zeus, the epithet was at first a mere ἰθνηκόν, 'the god of Phanai'; for Strab. 645 in describing Chios mentions Φῆναι, λιμὴν βαθύς, καὶ νεὺς Ἀπόλλωνος καὶ ἄλσος φοινίκων, though Steph. Byz. *s.v.* Φῆναι says ἀκρωτήριον τῆς Χίου, ἀπὸ τοῦ ἐκείθεν ἀναφανῆναι τῇ Λητοῖ τὴν Δῆλον. οἱ οἰκῆτορες Φαναῖοι κ.τ.λ. The port and promontory are referred to by other writers (Aristoph. *av.* 1694 with schol.,

For fifteen hundred years and more, in fact till the decay of paganism, the anthropomorphic conception of Zeus held the field. Yet the older view was never very far below the surface, and from time to time, as we shall see, it cropped up in a variety of ways. Even in the extreme decadence of Greek letters there was a scholastic resuscitation of it. Thus, the original Zeus was simply the radiant day-light Sky. With the rise of anthropomorphism this belief was obscured and overlaid. The Zeus of Hesiodic mythology is described as grandson of an older god *Ouranós*, the starry midnight 'Sky'. In Hellenic times the two Spartan kings were respectively priests of Zeus *Lakedatmon* and Zeus *Ouranios* ('of the Sky'). In the Hellenistic age the latter title was much used by the poets³: it afforded a point of contact between the Greek Zeus and the Semitic *Ba'al-shamin*, 'Lord of Heaven'. Finally, Byzantine learning spoke of Zeus *ouranós*, Zeus the 'sky', a title which in letter, though not in spirit, recalled the primary idea of the animate Sky.

Thouk. 8. 24, Ptolem. 5. 2 p. 323, 19, Liv. 36. 43, 44. 28, 45. 10, Verg. *georg.* 2. 98 with Serv. *ad loc.*

Orphic writers occasionally gave the name Zeus to their first-born deity Φάνης (Damaskios *quaest. de primis principiis* p. 380 = Orph. *frag.* 48 Abel Πρωτόγονον ἀνυμεί και Δα καλεῖ πάντων διατάκτορα, Euseb. *praep. ev.* 3. 9. 1 f. = Stob. *ecl.* 1. 1. 23 = Orph. *frag.* 123 Abel Ζεὺς πῶτος γένητο κ.τ.λ.: see O. Gruppe in Roscher *Lex. Myth.* iii. 2260), whose own name was explained sometimes as referring to Light (Io. Malal. *chron.* 4 p. 74 Dindorf, Soud. *s.v.* Ὀρφεὺς 7 φῶς) or to Day (Theon Smyrn. *expos. rerum mathematic.* *ad legendum Platonem utilium* p. 105 = Orph. *frag.* 171 Abel Φανῆ τε μέγαν και νύκτα μέλαιναν), but usually as a description of the Sun (Macrob. *Sat.* 1. 18. 13, Diod. 1. 11, Iamb. *theol. arith.* p. 60: see E. Zeller *A History of Greek Philosophy* trans. S. F. Alleyne London 1881 i. 106 n. 4, O. Gruppe in Roscher *Lex. Myth.* iii. 2255 f.). On a relief at Modena representing Phanes with a thunderbolt in his right hand see R. Eisler *Weltenmantel und Himmelszelt* München 1910 ii. 399 ff. fig. 47.

¹ The relation of Ouranos to Gaia, and of both to Zeus, will be considered later.

(b) The Transition from Sky to Sky-god.

The precise steps by which men advanced from a belief in Zeus the Sky to a belief in Zeus the Sky-god are hidden from us in the penumbra of a prehistoric past. The utmost that we can hope is to detect here and there survivals in language or custom or myth, which may enable us to divine as through gaps in a mist the track once travelled by early thought¹. In such circumstances to attempt anything like a detailed survey or reconstruction of the route would be manifestly impossible. Nevertheless the shift from Sky to Sky-god was a momentous fact, a fact which modified the whole course of Greek religion, and its ultimate consequence was nothing less than the rise of faith in a personal God, the Ruler and Father of all. In view of this great issue we may well strain our backward gaze beyond the point of clear vision and even acquiesce in sundry tentative hypotheses, if they help us to retrace in imagination the initial stages of the journey. I shall make bold, therefore, to surmise that in Greece, as elsewhere, religion effected its upward progress along the following lines.

When those who first used the word *Zeús* went out into the world and looked abroad, they found themselves over-arched by the blue and brilliant sky, a luminous Something fraught with incalculable possibilities of weal or woe. It cheered them with its steady sunshine. It scared them with its flickering fires. It fanned their cheeks with cool breezes, or set all knees a-tremble with reverberating thunder. It mystified them with its birds winging their way in ominous silence or talking secrets in an unknown tongue. It paraded before men's eyes a splendid succession of celestial phenomena, and underwent for all to see the daily miracle of darkness and dawn. Inevitably, perhaps instinctively, they would regard it with awe—that primitive blend of religious feelings²—and would go on to conciliate it by any means in their power. This is the stage of mental and moral development attributed by Herodotos to the ancient Persians. 'I am aware,' he says³, 'that the Persians practise the following customs. They

¹ The only writer, so far as I know, who has recognised and done justice to this blank stretch in our knowledge of Zeus is Gruppe in his masterly handbook (*Gr. Myth. Rel.* p. 753 'die Entstehung der Vorstellung von den einzelnen Göttern das dunkelste Gebiet der gesamten griechischen Religionsgeschichte ist,' p. 1102 'Zwischen dem Urzeus und dem historischen Zeus liegen tiefe Klüfte, die wir in Gedanken zwar leicht überspringen können, aber nicht überspringen dürfen').

² R. R. Marett *The Threshold of Religion* London 1909 p. 13 (= 'Pre-Animistic Religion' in *Folk-Lore* 1900 xi. 168), W. Wundt *Völkerpsychologie* Leipzig 1906 ii. 2. 171 ff. 'Die präanimistische Hypothese.'

³ Hdt. i. 131. The passage is paraphrased also in Strab. 732.

10 The Transition from Sky to Sky-god

are not in the habit of erecting images, temples, or altars; indeed, they charge those who do so with folly, because—I suppose—they do not, like the Greeks, hold the gods to be of human shape. Their practice is to climb the highest mountains and sacrifice to Zeus, by which name they call the whole circle of the sky¹. They sacrifice also to the sun and moon, the earth, fire and water, and the winds. These, and these alone, are the original objects of their worship.' The same stage of belief has left many traces of itself in the Latin language and literature². To quote but a single example, a popular line of Ennius ran:

Look at yonder Brilliance o'er us, whom the world invokes as Jove³.

There can be little doubt that in this expressive sentence the poet has caught and fixed for us the religious thought of the

¹ Hdt. i. 131 οἱ δὲ νομίζουσι Διὸς μὲν ἐπὶ τὰ ὑψηλότατα τῶν οὐρέων ἀναβαίνοντες θυσίας ἔρδειν, τὸν κύκλον πάντα τοῦ οὐρανοῦ Δία καλέοντας.

My friend the Rev. Prof. J. H. Moulton, our greatest authority on early Persian beliefs, in a very striking paper 'Syncretism in Religion as illustrated in the History of Parsism' (*Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 89 ff.) observes à propos of this passage: "It is generally assumed that he [*i.e.* Herodotos] calls the supreme deity 'Zeus' merely from his Greek instinct. But it is at least possible that he heard in Persia a name for the sky-god which sounded so much like 'Zeus,' being in fact the same word, that he really believed they used the familiar name. (The suggestion occurred to me [J.H.M.] independently, but it was anticipated by Spiegel, *Eran. Alt.* ii. 190.) This incidentally explains why the name 'Ωρομάσδης (Auramazda) does not appear in Greek writers until another century has passed. In *Yz.* iii. 13 (a metrical passage, presumably ancient) we find *φαταὶ δυαός...Αυρὸ Μαινυῦς*, 'Angra fell from heaven': see Bartholomae, s.v. *δυαοῦ*. Since *Dyaus* survives in the Veda as a divine name as well as a common noun—just as *dies* and *Diespiter* in Latin—it is antecedently probable that the Iranians still worshipped the ancestral deity by his old name." Prof. Moulton further writes to me (June 23, 1911) that Herodotos 'is entirely right, as usual: his general picture of Persian religion agrees most subtly with what we should reconstruct on other evidence as the religion of the people before Zarathushtra's reform began to affect them. It is pure Aryan nature-worship—and probably pure Indogermanic ditto—, prior alike to the reform of Z. on the one side and the Babylonian contamination that produced Mithraism on the other.'

Auramazda appears in later Greek authors as *Zeus μέγιστος* (Xen. *Cyr.* 5. 1. 29, cp. pseudo-Kallisthen. 1. 40) or *Zeus βασιλεύς* (Xen. *Cyr.* 3. 3. 21, 7. 5. 57, *anab.* 3. 1. 12, 6. 1. 22, Arrian. 4. 20. 3 ἐπὶ τοῖσδε ἀνατείναι Δαρείων ἐς τὸν οὐρανὸν τὰς χεῖρας καὶ εὐχασθαι ὦδε· 'Ἄλλ' ὦ Ζεῦ βασιλεῦ, ὅτ' ἐπιτέτραπται νέμειν τὰ βασιλέων πράγματα ἐν ἀνθρώποις, κ.τ.λ.=Soud. s.v. 'Ἀλέξανδρος) or *Zeus καὶ 'Ωρομάσδης* (Aristot. *frag.* 8 Rose *ap.* Diog. Laert. *prosm.* 8) or *Zeus 'Ωρομάσδης* (Michel *Recueil d'Inscr. gr.* no. 735=Dittenberger *Orient. Gr. inscr. sel.* no. 383, 41 f. πρὸς οὐρανοῦς Διὸς | 'Ωρομάσδου θρόνου, 54 Διὸς τε 'Ωρομάσδου κ.τ.λ.). Cp. Agathias *hist.* 2. 24 τὸ μὲν γὰρ παλαιὸν Δία τε καὶ Κρόνον καὶ τοῖτους δὴ ἅπαντας τοὺς παρ' Ἑλλήσι θρυλλομένους ἐτίμων (*sc.* οἱ Πέρσαι) θεοὺς, πλὴν γε οὐτι δὴ αὐτοῖς ἢ προσηγορία οὐχ ὁμοίως ἐσώζετο, ἀλλὰ Βῆλον μὲν τὸν Δία τυχῶν Σάνδην τε τὸν 'Ηρακλέα καὶ 'Αναΐτιδα τὴν 'Αφροδίτην καὶ ἄλλως τοὺς ἄλλους ἐκάλουν.

² I have collected the evidence in *Folk-Lore* 1905 xvi. 260 ff.

³ Ennius *ap.* Cic. *de nat. deor.* 2. 4 and 65 aspice hoc sublime candens, quem invocant omnes Iovem.

Italians in its transitional phase. Behind him is the divine Sky, in front the Sky-god Iupiter.

Now an animate Sky, even if credited with certain personal qualities, does not necessarily become an anthropomorphic Sky-god. It may even develop in the opposite direction. Xenophanes of Kolophon in the sixth century B.C. appears to have based his reformed theology directly on the ancient Greek conception of Zeus. As Aristotle puts it, he 'looked upon the whole sky and declared that the One exists, to wit God¹.' To this cosmic Unity 'equal on all sides²' Xenophanes, again in all probability following the lead of early religious thought, ascribed various personal powers:

As a whole he sees, as a whole he thinks, and as a whole he hears³.

But the poet explicitly repudiates anthropomorphism:

One God there is, greatest among gods and men,
Like to mortals neither in form nor yet in thought⁴.

We have therefore, it would seem, still to determine the circumstances that occasioned the rise of the anthropomorphic view. In plain words, we must answer the question: How came the Greeks in general to think of Zeus, not as the blue sky, but as a sceptred king dwelling in it?

To solve this problem we turn our attention once more to the primitive idea of a living Sky. One point about it, and that the most important of all for practical folk, we have thus far omitted to mention. Vegetable life, and therefore animal life, and therefore human life, plainly depends upon the weather, that is upon the condition of the Sky⁵. Hence unsophisticated man seeks to

¹ Aristot. *met.* 1. 5. 986 b 21 ff. *Ξενοφάνης δὲ...εἰς τὸν ὅλον οὐρανὸν ἀποβλέψας τὸ ὅν εἶναι φησὶ τὸν θεόν.* J. Burnet *Early Greek Philosophy* London and Edinburgh 1892 prefers to translate: 'Xenophanes...said, with reference to the whole universe, that the One was God.' But this, I believe, misses the point. Xenophanes, like Pythagoras and many another reformer, starts with a revival of half-forgotten beliefs.

³ Xenophan. *frag.* 24 Diels *ap.* Sext. *adv. math.* 9. 144 οὐλος ὄρα, οὐλος δὲ νοεῖ, οὐλος δὲ τ' ἀκούει, Diog. Laert. 9. 19. Cp. the Homeric εὐρύσπασ Ζεὺς and the Hesiodic πάντα ἰδὼν Διὸς ὀφθαλμὸς καὶ πάντα νοήσας (o. d. 267).

⁴ Xenophan. *frag.* 23. Diels *ap.* Clem. Al. *strom.* 5. 14 p. 399, 14 ff. Stählin, cp. *frag.* 10 ff. Diels.

⁵ The Greeks persistently attempted to connect Ζεὺς, Ζῆνα, etc. with ζῆν. Gruppe *Gr. Myth. Rel.* p. 1101 n. justly remarks that their attempts, though etymologically mistaken, have a certain value as throwing light on their conception of the god. He distinguishes: (1) Zeus as the only living son of Kronos (*et. mag.* p. 408, 55 f., cp. *et. Gud.* p. 230, 16 f.); (2) Zeus as the world-soul (Cornut. *theol.* 2 p. 3, 3 ff. Lang, *et. mag.* p. 408, 52 f.); (3) Zeus as the cause of life to all that live (Aristot. *de mund.* 7. 401 a 13 ff. = Apul. *de mund.* 37, Chryssippos *infra* p. 29 n. 4, Cornut. *theol.* 2 p. 3, 6 Lang, Diog.

12 The Transition from Sky to Sky-god

control its sunshine, its winds, above all its fructifying showers by a sheer assertion of his own will-power expressed in the naïve arts of magic¹. Modern investigators have shown how great was the rôle of the magician, especially of the public magician, in early society. And not the least of Dr J. G. Frazer's services to anthropology has been his detailed proof 'that in many parts of the world the king is the lineal successor of the old magician or medicine-man².' 'For sorcerers,' he urges, 'are found in every savage tribe known to us; and among the lowest savages...they are the only professional class that exists. As time goes on, and the process of differentiation continues, the order of medicine-men is itself subdivided into such classes as the healers of disease, the makers of rain, and so forth; while the most powerful member of the order wins for himself a position as chief and gradually develops into a sacred king, his old magical functions falling more and more into the background and being exchanged for priestly or even divine duties, in proportion as magic is slowly ousted by religion³.' But if so, it becomes highly probable, nay practically certain, that the real prototype of the heavenly weather-king was the earthly weather-king, and that Zeus was represented with thunderbolt and sceptre just because these were the customary attributes of the magician and monarch.

So Zeus, in a sense, copied Salmoneus. But it remains to ask what led the community side by side with their Salmoneus to postulate a Salmoneus-like Zeus. I incline to the following explanation as possible and even probable. With the age-long growth of intelligence it gradually dawned upon men that the magician, when he caused a storm, did not actually make it himself by virtue of his own will-power but rather imitated it by his torches, rattling chariot, etc., and so coaxed it into coming

Laert. 7. 147, Aristeid. *or.* 1. 6 (i. 9 Dindorf), *et. mag.* p. 408, 54, *et. Gud.* p. 230, 18 f., *schol. II.* 15. 188 f., cp. Athen. 289 A, Eustath. *in II.* p. 436, 11 ff.); (4) Zeus as life-giving breath, *i.e.* $\xi\eta\nu$ + $\acute{\alpha}\omega$ (*et. mag.* p. 408, 57 f.).

¹ On 'will-power' as a rough equivalent of the *mana* of the Pacific and the *orenda* of the Iroquois see R. R. Marett *The Threshold of Religion* London 1909 p. 99, cp. pp. 115—141.

Even sophisticated man has his moments of *hyperboulia*. When I hit a ball too far at lawn-tennis, I ejaculate 'Don't go out!' and while speaking feel as if my voice actually controlled the ball's flight. Or again, I find myself rising on tip-toe to make a ball, already in mid air, clear the net. What is this but rudimentary magic?

In *Folk-Lore* 1903 xiv. 278 f. I attempted to show that magic, whether 'mimetic' or 'sympathetic,' ultimately depends upon a primitive conception of extended personality—a failure to distinguish aright the *I* from the *not-I*.

² Frazer *Golden Bough*³: *The Magic Art* i. 371, cp. i. 215, 245, and especially 332 ff.

³ *Id. ib.* i. 420 f.

about. If, then, the magician or king imitated a storm made by Zeus, how did Zeus make it? The spirit of enquiry was awake (with the Greeks it awoke early), and the obvious answer was that Zeus must be a Master-image, a King supreme, beyond the clouds. Doubtless, said nascent reflexion, Zeus makes his thunder in heaven much as our magician-king makes it upon earth, only on a grander, more sonorous scale. But observe: if this was indeed the sequence of thought, then the change from Sky to Sky-god was occasioned not by any despair of magic¹—for people might well come to believe that Zeus the Sky-god made thunderstorms and yet not cease believing that the magician-king could produce the like—but rather by the discovery that magic, whether effective or not, was a matter of imitation. In short, the transition from Sky to Sky-god was a result, perhaps the first result, of conscious reflexion upon the *modus operandi* of primitive magic.

On this showing the cult of an anthropomorphic Zeus was the outcome of a long evolution comprising three well-marked stages, in which the feelings, the will, and the intellect played successively the principal part. First in order of development came emotion—the awe felt by early man as he regarded the live azure above him, potent to bliss or blight. Feeling in turn called forth will, when the community was parched with drought and the magician by his own passionate self-projection made the rushing rain-storm to satisfy the thirst of man and beast. Later, much later, intellect was brought to bear upon the process, distinguishing the imitation from the thing imitated and expressing heaven in terms of earth.

¹ Dr Frazer in a memorable chapter (*op. cit.* i. 220—243) argues that, when little by little the essential futility of magic was discovered, the shrewder intelligences casting about for an explanation of its failures would ascribe them to the more powerful magic of great invisible beings—the gods—and thus would escape from the 'troubled sea of doubt and uncertainty' into the 'quiet haven' of religion. Magic, he conjectures, everywhere came first, religion second, the latter being directly due to the unmasking of the former.

The eloquence with which Dr Frazer has stated his case is only less admirable than his learning. But for all that I believe him to be wrong. The baffled magician would most plausibly account for his failure by attributing it to the counter-charms of some rival practitioner on earth, say a neighbouring chief, or else to the machinations of a ghost, say a dead ancestor of his own. Why should he—how could he—assume a sky-god, unless the sky was already regarded as a divine Potency? And, if this was the case, then religion was not subsequent to magic, but either prior to it or coeval with it. No doubt, as Dr Frazer himself remarks (*ib.* i. 223), much turns upon our exact definition of religion. But personally I should not refuse the term 'religious' to the attitude of reverential fear with which I suppose early man to have approached the animate Sky. Indeed, it would not be absurd to maintain that this pre-anthropomorphic conception was in some respects higher, because more true, than later anthropomorphism. After all, 'God is not a man,' and early thought could hardly be drawn nearer to the idea of the Infinite than by contemplating the endless blue of Heaven.

Thus a movement, which began on the plane of feeling, passed upwards through that of volition, and ended by evoking all the powers of the human soul.

Incidentally we have arrived at another conclusion, deserving of a moment's emphasis. We have, if I may use the phrase, ventured to analyse the divinity of Zeus. This analysis, tentative (be it remembered) and provisional in character, has detected two distinct elements, both of a primitive sort,—on the one hand the vast mysterious impersonal life of the blue sky, on the other the clear-cut form and fashion of the weather-ruling king. To speak with logical precision, though in such a matter logic was at best implicit, the primeval sanctity of the sky gave the content, the equipment of the magician-turned-king gave the form, of the resultant sky-god Zeus¹.

(c) Zeus Amários.

The transition from the day-light Sky to the day-light Sky-god is perhaps best exemplified by the Latin terms *dies*, 'day,' and *Diespiter*, 'Day-father.' The vocative case of *Diespiter* came to be used as a new nominative, the more familiar *Iupiter*².

¹ An objection must here be met. It may be argued that, if my view were true, the Homeric Zeus ought to be recognisable as a magician, whereas notoriously magic is scarce in Homer and never associated with the Homeric Zeus.

To this I should reply (1) that the Homeric poems as we have them bear ample traces of earlier expurgation affecting many savage practices (see the convincing chapter of Prof. G. Murray *The Rise of the Greek Epic*² Oxford 1911 pp. 141—166), and (2) that such expurgation has in point of fact failed precisely where failure might have been expected, *viz.* in eliminating the pre-Homeric 'fixed epithets' of Zeus. These are simply redolent of the magician. Zeus is often Κρόνου πάσι ἀγκυλομήτην, 'son of the wizard Kronos.' He is himself *μηρίατα*, a 'mage' rather than a 'sage.' The word *μηρίαται* is used thrice, in *h. Ap.* 344 and *h. Hest.* 5 of Zeus (so *Hes. o. d.* 51, *theog.* 457, *Moiro ap.* Athen. 491 B), in *Od.* 4. 227 of magic herbs prepared by the daughter of Zeus. Again, Zeus alone is ἀφθίτα μῆδεα εἰδώς (*Il.* 24. 88, *h. Aphr.* 43, *Hes. theog.* 545, 550, 561, *frag.* 35, 2 Flach), *cp.* the names of the sorceresses Medeia, Agamede, Perimede, Mestra. Thirty-six times in the *Il.* and *Od.* he is described as νεφεληγερέτα, a transparent synonym of 'rain-maker.' And what of his constant appellation αἰγλοχός? The αἰγίς, when shaken, produced a thunderstorm (*Il.* 17. 593 ff., *cp.* 4. 166 ff.), and Virgil at least seems to have regarded it as part of the rain-maker's paraphernalia (*Aen.* 8. 352 ff. *Arcades ipsum | credunt se vidisse Iovem, cum saepe nigrantem | aegida concuteret dextra nimbosque cieret, cp. Sil. It.* 12. 719 ff.). It was presumably as a magical means of securing fertility that at Athens the priestess brought the sacred αἰγίς to newly-wedded wives (Suid. *s.v.* αἰγίς). Further, Zeus causes an earthquake by nodding his head and shaking his hair (*supra* p. 2 f.)—a procedure that savours strongly of the magician's art. Lastly, the frequent mention of the βουλή or βουλαί of Zeus (from *Il.* 1. 5 Διὸς δ' ἐτελέετο βουλή onwards: see H. Ebeling *Lexicon Homericum* Lipsiae 1885 i. 236) gains fresh meaning, if seen to imply the will-power characteristic of the magician-king.

² F. Stolz *Historische Grammatik der lateinischen Sprache* Leipzig 1894 i. 1. 305,

But, confining our attention to the Greek area, we may further illustrate the same change.

Macrobius states that 'the Cretans call the day *Zeús*'¹—a startling, but by no means incredible, assertion. Unfortunately he does not go on to tell us whether this usage was restricted to any particular tribe or town in Crete. That island was a meeting-place of the nations. Already in Homeric times its population included Achaeans, Eteo-Cretans, Cydonians, Dorians and Pelasgians²; and to choose between these, and perhaps others, is a precarious undertaking. Nevertheless the dialect of Crete as a whole throughout the classical period was undoubtedly Doric, and we are therefore free to contend that in some variety of Cretan Doric the word *Zeús* had retained its primitive meaning.

This contention gains in probability from Prof. R. C. Bosanquet's discovery at Palaikastro in eastern Crete of a late Doric hymn to Zeus *Diktaios*³. The hymn appears to have been written down about the year 200 A.D.; but its wording is perhaps five centuries older⁴, and its refrain preserves what I venture to regard as a survival of the original conception of Zeus:—

Hail, greatest Lad of Kronos' line⁵,
Almighty Brilliance, who art here
 Leading thy followers divine:
 To Dikte come for the new year
 And dance with joy this dance of mine⁶.

W. M. Lindsay *The Latin Language* Oxford 1894 p. 389, Walde *Lat. etym. Wörterb.* p. 313.

¹ Macrobi. *Sat.* i. 15. 14 Cretenses *Δια τὴν ἡμέραν* vocant.

² *Od.* 19. 175 ff.

⁴ G. Murray, *ib.* xv. 364 f.

⁵ With *κοῦρε*...*Κρόνιε* cp. Aisch. *P. v.* 577 f. ὦ Κρόνιε | παῖ, Pind. *Ol.* 2. 22 ὦ Κρόνιε παῖ Πέας. For *κοῦρος* = *παῖς* see Stephanus *Thes. Gr. Ling.* iv. 1895 A.

⁶ ἰώ, | μέγιστε κοῦρε, χαῖρέ μοι, | Κρόνιε, παγκρατὲς γάνος, | βέβαιες | δαιμόνων ἀγώμενος· | Δικταν ἐς ἐνιαυτὸν ἔρ-|πε καὶ γέγαθι μολπῆ.

Two copies of the hymn are engraved on the back and face of the same stone. The back, which contains a text full of blunders, nowhere preserves the termination of the word *γάνος*. The face has in line 2 ΠΑΤΙΚΡΑΤΕΣ ΓΑΝΟC altered into ΠΑΝΚΡΑΤΕC ΓΑΝΟΥC, and in line 20 ΠΑΝΚΡΑΤΕC ΓΑΝΟΥC. This suggests an attempt to make sense of an old defective copy, and on reading it I conjectured (see *Trinity College Lecture Room* paper of Nov. 4, 1910) that the original phrase was *παγκρατὲς γάνος*, cp. Enn. *ap. Cic. de nat. deor.* 2. 4 *aspice hoc sublime candens, quem invocant omnes Iovem* (*Folk-Lore* 1905 xvi. 261). Prof. G. Murray printed *παγκρατὲς γάνους* in his restored text and translated it 'Lord of all that is wet and gleaming.' He now (Aug. 15, 1911) writes to me *à propos* of *γάνος*: 'I think it a very probable suggestion but do not on the whole think there is sufficient reason for altering the text.' He adds that in a letter to himself Prof. U. von Wilamowitz-Moellendorf had independently made the same correction.

A possible but by no means certain parallel to this survival occurs in the *Tabula Edaliensis*, a Cypriote inscription, which thrice uses the word *zân* in the sense of 'time'. Dr Hoffmann suggests that this word is related to the Sanskrit *dyâus*, 'day,' and to the Latin *dies*, 'day,'—in fact is akin to the name *Zeûs*². Some such primitive usage, we may suppose, underlies and explains the Homeric and Hesiodic belief that 'days are from Zeus'³.

Far more advanced was the cult of Zeus *Amários*, whose name appears to denote Zeus 'of the Day-light' (*amára*)⁴. According to Strabon, the Achaeans of the northern Peloponnese, like the Ionians before them, were wont to assemble for deliberation and the transaction of common business at a place called the *Amárimon*⁵: this was a grove sacred to Zeus in the territory of Aigion⁶. Hence, when about the year 230 B.C. the town of Orchomenos in Arkadia joined the Achaean League, it was agreed that the Achaean magistrates at Aigion and the Orchomenian magistrates at Orchomenos should swear to the terms of a treaty by Zeus *Amários*, Athena *Amaría*, Aphrodite and all the gods⁷. And, when in 217 B.C. Aratos the Achaean general had settled certain serious disputes at Megalopolis, the terms of the settlement were engraved

¹ W. Deecke 'Die griechisch-kyprischen Inschriften' in Collitz-Bechtel *Gr. Dial.-Inscr.* i. 27 ff. no. 60, 10, 23, 28 *ὅφαις ζᾶν*.

² O. Hoffmann *Die griechischen Dialekte* Göttingen 1891 i. 68 ff. no. 135, 10, 23, 28 *ὅφαις ζᾶν*. *Id. ib.* i. 71 f. rejects Meister's view that ζᾶν = epic δῆν and translates 'für alle Zeit,' taking *ὅφαις* = ἐπι αἰε (als accus. for *αἰς cp. Indian *dyus* 'life-time') and ζᾶν as akin to *djâus*, *dies*, *diu*. But all this is very doubtful, as Hoffmann himself (*ib.* p. 228) admits. C. D. Buck *Introduction to the Study of the Greek Dialects* Boston etc. 1910 p. 182 n. says: 'ζᾶν is possibly connected with ζῆω and ζῶω, *live*, on the basis of a third by-form ζᾶ.'

³ *Od.* 14. 93 *νόκτες τε καὶ ἡμέραι ἐκ Διὸς εἰσιν*, Hes. *o. d.* 765 *ἡμεῖρα δ' ἐκ Διόθεν*, *ib.* 769 *αἶθε γὰρ ἡμέραι εἰσι Διὸς πᾶρα μητιέντος*. Cp. *Il.* 2. 134 *ἐννεῖα δὴ βεβᾶσαι Διὸς μεγάλου ἐνιαυτοί*. This last line supports the contention of W. Prellwitz *Eine griechische und eine lateinische Etymologie* Bartenstein 1895 p. 1 ff. that *ἐνιαυτός* is strictly the day on which the year starts again 'in the same' (*ἐνὶ αὐτῷ*) position as before, and that it was originally an appellation of Zeus = *diēs* (*ib.* p. 8).

⁴ P. Foucart 'Fragment inédit d'un décret de la ligue achéenne' in the *Rev. Arch.* 1876 N.S. xxxii. 2. 96—103 first propounded the explanation, now commonly accepted, of *Ἀμάριος* as 'le dieu de l'atmosphère lumineuse' (*ib.* p. 100). *Ἀμάρια* = *ἡμέρα* is found in Locrian inscriptions (Collitz-Bechtel *op. cit.* nos. 1478, 42, 1479, 5, cp. 1478, 33), and *πενταμαριτεῶν* in a Delphian inscription (*ib.* no. 2561, D 16, = Dittenberger *Syll. inscr. Gr.*² no. 438, 183). *Ἀμάριος* = *ἡμέριος* may well have been in use on the other side of the Corinthian Gulf also.

G. Kramer on Strab. 389 and F. Hultsch on Polyb. 2. 39. 6 (*praef.* p. lv) hold that the name was *Ἀμάριος* = *Ὀμάριος*, cp. *ἀμαρτῆ* = *ὀμαρτῆ*. Gruppe *Gr. Myth. Rel.* p. 1116 n. 3, following Collitz and Schulze *Quaestiones epicae* p. 500 n. 1, takes *Ἀμάριος* = *Ὀμάριος*.

⁵ Strab. 385. MSS. *Αινάριον* or *Ἀρνάριον*. Koraes cj. *Ὀμάριον*, Kramer *Ἀμάριον*, Foucart *Ἀμάριον*.

on a tablet and set up beside an altar of Hestia in the *Amáριον*¹. This is in all probability the spot described by Pausanias in the following extract: 'Near the sea at Aigion is a sanctuary of Aphrodite, after that one of Poseidon, one of Kore Demeter's daughter, and in the fourth place one to Zeus *Homagýrios*. Here there are statues of Zeus, Aphrodite and Athena. Zeus was surnamed *Homagýrios*, "the Assembler," because on this spot Agamemnon gathered together the chief men of Hellas to consult how they should make war on the kingdom of Priam... Adjoining the sanctuary to Zeus *Homagýrios* is one of Demeter *Panachaiá*, "goddess of all the Achaeans²." Zeus *Amários* was on this showing one with Zeus *Homagýrios*; and it is possible that the former title was, owing to the influence of the latter, popularly changed into *Homários*, which might be understood as 'the Joiner-together³.' However that may be, it is clear that from Aigion the cult made its way to Magna Graecia, where Kroton, Sybaris and Kaulonia, in avowed imitation of the Achaeans, erected a common temple to Zeus *Amários*⁴.

How this Zeus 'of the Day-light' was conceived by his worshippers, can be inferred from representations of him on coins of the Achaean League. A unique silver *statér* of Aeginetic standard, probably struck at Aigion about 367—362 B.C., has for its reverse type an enthroned Zeus, who holds an eagle in his right hand and rests on a sceptre with his left (fig. 1)⁵. Bronze coins of the League, as reconstituted in 281 B.C., exhibit on the obverse side a standing figure of Zeus: he is naked and supports on his right hand a winged Nike, who offers him a wreath, while he leans

¹ Polyb. 5. 93. 10. MSS. 'Ομαρῶ. Foucart restored 'Αμαρῶ, cp. J. L. Strachan-Davidson *Selections from Polybius* Oxford 1888 p. 145. On the connexion of Hestia with Zeus, see *infra* ch. iii § 1 (a) ix (a).

² Paus. 7. 24. 2 f. O. Jessen in Pauly-Wissowa *Real-Enc.* i. 1741 would distinguish between the 'Αμάριον and the precinct of Zeus 'Ομαγύριος; but Frazer *Pausanias* iv. 162 identifies them.

³ Dittenberger *Syll. inscr. Gr.*² p. 370 thinks that 'Ομαγύριος is a corruption of 'Αμάριος; but this is not necessary. 'Ομάριος (Polyb. 2. 39. 6 with *v.l.* ομαριου sic A. όμοριου C, 5. 93. 10) suggests comparison with Hesych. όμαρές όμοῦ συμφώνως. Those that take it to be the original form will quote Steph. Byz. 'Ομάριον πόλις Θεσσαλίας. Θεόπομπος Φιλίππικῶν εἰκοστῶ δευτέρῳ. ἐν ταύτῃ τιμᾶται Ζεὺς καὶ Ἀθηναίη. τὸ ἐθνικὸν 'Ομάριοι, 'Ομαρεῦς.

⁴ Polyb. 2. 39. 6. The MSS. vary: ομαριου sic A. όμοριου C. Foucart restored 'Αμαριου.

⁵ W. Wroth in the *Num. Chron.* Fourth Series 1902 ii. 324 ff. pl. 16, 4, G. F. Hill *Historical Greek Coins* London 1906 p. 73 ff. pl. 5, 38, *Head Hist. num.*³ p. 416 ('the reverse type of Zeus seems to have been suggested by the seated Zeus on the early Arcadian coins.' Cp. *infra* ch. i § 3 (b)). The coin is now in the British Museum.

with his left hand on a long sceptre (fig. 2)¹. The later silver coins, from some date earlier than 330 B.C., show a laureate head of Zeus as their obverse (fig. 3), a wreath of bay as their reverse design². Such representations drop no hint of Zeus as a day-light deity. The physical aspect of the god had long been forgotten, or at most survived in a cult-title of dubious significance.

Fig. 3.

(d) Zeus *Panámaros*, *Panémeros*, *Panemérios*.

Near the Carian town of Stratonikeia was a village called Panamara, situated on the mountain now known as *Baiaca*. Here in 1886 MM. G. Deschamps and G. Cousin discovered the precinct of the Carian god Zeus *Panámaros* and over four hundred inscriptions relating to his cult³. It is probable that the name *Panámaros*, which appears more than once without that of Zeus⁴, was originally a local epithet denoting the deity who dwelt at Panamara⁵. If so, it is useless to speculate on the real meaning of the word. But when the district was subjected to Hellenic influence—Stratonikeia, we know, was a Macedonian colony⁶—the local divinity by an instructive series of changes became Zeus *Panámaros*⁷, Zeus

³ *Bull. Corr. Hell.* 1887 xi. 373 ff., 1888 xii. 82 ff., 249 ff., 479 ff., 1891 xv. 169 ff., 1904 xxviii. 20 ff., 238 ff. See further the article by O. Höfer in Roscher *Lex. Myth.* iii. 1491—1497, Nilsson *Gr. Feste* pp. 27—31.

⁴ *Πανάματος* without *Zeús* occurs in *Bull. Corr. Hell.* 1888 xii. 85 no. 9, 11, *ib.* p. 86 no. 10, 15, *ib.* p. 88 no. 11, 5. *Πανάματος* (*sic*) was one of the Carian Kouretes along with *Αάβρανδος* and *Πάλαξος* or *Σπάλαξος* (*et. mag.* p. 389, 55 ff.).

⁵ So Höfer *loc. cit.* 1492 f., Nilsson *op. cit.* p. 31 n. 6. On A. Dieterich's conjectural **Amaros ~ Amara* see Append. B Egypt.

⁶ Strab. 660, cp. Steph. Byz. *s.v.* *Στρατονικεία*.

⁷ *Zeús Πανάματος*, sometimes *Zeús ó Πανάματος* or *ó Zeús ó Πανάματος*, is the common form of his name in the inscriptions (Höfer *loc. cit.* 1492, 1 ff.).

*Panémeros*¹, Zeus *Panemérios*². The unintelligible Carian name was thus Hellenised into a cult-title that suited the Greek conception of Zeus. *Panámaros* to Greek ears would mean the god 'of the live-long Day' (*panámeros*, *panémeros*, *panemérios*)³.

Imperial coins of Stratonikeia, both in silver and in bronze (fig. 4), exhibit a bearded horseman, who carries a long sceptre over his left shoulder and apparently a *phidie* in his right hand⁴. On one specimen in the British Museum (fig. 5)⁵, probably struck in Hadrian's time, this equestrian figure is radiate. Dr B. V. Head

Fig. 4.

Fig. 5.

Fig. 6.

conjectures that it is not the emperor, but Zeus *Panámaros* conceived as a solar deity⁶. The identification of the rider as Zeus might be supported by the fact that some imperial bronze coins of Stratonikeia have as their reverse type Zeus enthroned with a sceptre in one hand, a *phidie* in the other (fig. 6)⁷. And the radiate crown would be appropriate to Zeus 'of the live-long Day,' whether he was regarded as a sun-god or not.

The precinct found by MM. Deschamps and Cousin occupied the summit of a steep hill furrowed by ravines. It contained

three temples, that of Zeus *Panámaros*, that of Hera *Teleta*¹, and a building called the *Komyrion*, the name of which recalls the title of Zeus *Kómyros* at Halikarnassos². Corresponding with the two temples of Zeus and the one of Hera were three public festivals, the Panamareia, the Komyria, and the Heraia.

The principal festival of the place was the Panamareia, an annual affair, which at first lasted for ten days³ and later for a whole month⁴. It began with a procession from the precinct at Panamara to the council-chamber at Stratonikeia⁵. And, since the ten days of the festival were known as the 'Sojourn' (*epidemía*) of the god⁶, it has been concluded that the image of Zeus paid an actual visit to the neighbouring town. This visit appears to be identical with the 'Entry of the horse' mentioned in a local inscription⁷, so that Dr Höfer is doubtless right in regarding the rider on the coins of Stratonikeia as Zeus entering the town on horseback⁸. His entry was the signal for a great outburst of rejoicing. Citizens and strangers alike received at the hands of the priests *largesse* of oil for gymnastic contests and baths, besides perfume, corn, meat, and money. The merry-making was kept up day and night during the 'Sojourn' of the god⁹.

The Komyria lasted for two days only¹ and involved certain mysteries². Since the inscriptions speak of the 'Ascent' (*ánodos* or *anábasis*) of the god in this connexion³, MM. Deschamps and Cousin infer that the Komyria was essentially the return-journey of Zeus from Stratonikeia to Panamara⁴. Mr M. P. Nilsson, however, points out that the 'Ascent' is said to take place *in* the sanctuary, not *to* it, and conjectures that Zeus then paid a visit to his wife⁵. Probably we should do well to combine these views and hold that the 'Ascent' of the god from Stratonikeia to Panamara culminated in the sanctuary on the mountain-top, where Zeus was annually married to his bride. On this occasion the men were entertained by the priest in the *Komyrion* and the women separately in the sanctuary⁶. Wine was served out in abundance—no distinction being made between citizens, Romans, foreigners, and slaves. Money-gifts and portions of sacrificial meat were likewise distributed with a lavish hand. Booths were erected for the accommodation of the celebrants. Sirup and wine were even provided by the road-side for old and young⁷. And the horse that had served the god, presumably in the procession, was duly dedicated to him⁸. In short, the whole account, so far as it can be reconstructed from the inscriptions, reads like that of a joyous wedding *cortège*.

The Heraia was another important festival involving a long programme of games⁹, religious shows¹⁰, and mystic rites¹¹. It seems to have been celebrated yearly and on a grander scale once every four years¹². The *rendez-vous* was the temple of Hera. The

¹² This is deduced by M. P. Nilsson *op. cit.* p. 28 from the fact that the inscriptions employ two distinct *formulae*, viz. *ἱερεὺς (ἱερατεύσας, κ.τ.λ.) ἐν Ἡραίοις* and *ἱερεὺς (ἱερατεύσας, κ.τ.λ.) ἐν Ἡραίοις κατὰ πενταετηρίδα*.

22 Zeus *Panámaros*, *Panémeros*, *Panemérios*

priest and priestess invited all the women, whether bond or free, and gave them a banquet with plenty of wine and a present of money for each guest¹. They also furnished a repast for the men². It is at first sight puzzling to find this apparent duplication of the Komyria. But, if—as we shall later see reason to suppose³—Zeus was not originally the consort of Hera, it is likely enough that he had his own marriage-feast to attend and she hers⁴. At Panamara, even when Zeus was paired with Hera, the two celebrations were on the foregoing hypothesis kept up side by side. This bizarre arrangement had its practical advantages, and it obviously made a powerful appeal to the appetites of the mob.

The priest and priestess who presided over these wholesale entertainments were acting not merely as public host and hostess but as the visible representatives of the god and goddess. Their inauguration was a function lasting four days and involving gymnasiarchal duties, in particular the distribution of oil for the gymnasia and the baths⁵. It is called the 'reception of the crown'⁶ or 'reception of the god'⁷; and the officials themselves are described as 'receiving the crown of the god'⁸ or 'receiving the god'⁹. The termination of their office, the tenure of which was annual¹⁰, is correspondingly called the 'putting off of the crowns'¹¹. Not improbably these persons wore a golden crown decorated with a small image of their deity. Crowns of the sort are mentioned in literature¹² and figured both on coins of Tarsos¹³ and on portrait-heads from Ephesos¹⁴ and elsewhere¹⁵.

¹ *Bull. Corr. Hell.* 1887 xi. 376 no. 1, 32 ff., 1891 xv. 182 no. 123, 5 ff., 198 no. 140, 24 ff., 200 no. 141, 7 f., 204 no. 145, 3 ff., 1894 xxviii. 40 no. 23 B, 1 ff.

¹⁵ Daremberg-Saglio *Dict. Ant.* ii. 1523 and 1525 fig. 1986 (a priest of Bellona);

One odd rite deserves to be noticed. Many of the inscriptions found at *Baïaca* record the dedication of human hair¹. The custom was for the dedicator to erect, either inside the temple of Zeus or outside it in the sacred precinct, a small *stéle* of stone containing the tress or tresses in a cavity sometimes closed by a thin marble lid (fig. 7)². Those that could not afford such a *stéle* would make a hole in the stone wall, or even in the corner of another man's slab, and inscribe their names beside it. MM. Deschamps and Cousin point out that the dedicants were invariably men—not a single woman's name occurs³; that the dedication was always made to Zeus, never to Hera; that the occasion is sometimes specified as the *Komyria* and the place once at least as the *Komyrion*—the *Heraia* and the *Heraion* are not mentioned at all; that slaves were allowed to participate in this act of devotion; and that the act itself might be repeatedly performed by the same person⁴. These scholars suggest that the votive hair may have been offered by those who were initiated into the mysteries of the *Komyria*⁵.

Fig. 7.

If we may judge from analogous customs existing here and there throughout the Greek world⁶, the rite was probably connected

Helbig *Guide Class. Ant. Rome* i. 151 f. no. 221 = A. J. B. Wace in the *Journ. Hell. Stud.* 1905 xxv. 94 f. ('a priest of the cult of one of the later Diadochi') = Amelung *Sculpt. ⁵ *Ib.* p. 487.

⁶ *Ib.* pp. 481—484, Daremberg-Saglio *Dict. Ant.* i. 1358, 1362, Frazer *Pausanias* ii. 534 f., iii. 279 ff., iv. 128, *Golden Bough*³: *The Magic Art* i. 28 ff., Gruppe *Gr. Myth. Rel.* p. 913 f. The fullest collection of evidence from the Greek area is that of W. H. D. Rouse *Greek Votive Offerings* Cambridge 1902 pp. 240—245. See too G. A. Wilken 'Ueber das Haaropfer und einige andere Trauergebräuche bei den Völkern Indonesien's' in the *Revue Coloniale Internationale* 1886 iii. 225 ff., 1887 iv. 353 ff.

Dr Wilken explained the rite as a substitute for human sacrifice, the hair being deemed the seat of the soul. Dr Frazer suggests that the gift of hair was tantamount to a gift of virility or fertility. Dr Rouse regards hair-offering as a 'practice connected with puberty.' Dr Gruppe concludes that the rite was originally 'vorzugsweise eine Initiationszeremonie.'

I incline to think that we have in this custom the relics of a puberty-rite once

with marriage or with arrival at a marriageable age. As such it

widespread throughout Greece, and that further proof of the practice may be found in the terms *kópos*, *kóρη* for 'young man, young woman,' literally 'shaveling' (*κέρω*, 'I shave'). My friend Dr Giles kindly informs me that this derivation is quite possible, and that the words in question should be grouped as follows: *kópos*, Ionic *κούρος*, Doric *κώρος*, etc. <*κόρ-fo-s*; *κόρη*, Ionic *κούρη*, Doric *κώρα*, etc. <*κόρ-fa* (Collitz-Bechtel *Gr. Dial.-Inscr.* i. 143 no. 373 τὰ *Κόρφα*) and *κουρεύς* 'barber' <*κορσ-εύς* (Hesych. *s.v.*); *κουρά* 'hair-cutting' 'tress' <**κορσ-ά*. He refers me to F. Solmsen in the *Zeitschrift für vergleichende Sprachforschung* 1888 xxix. 128 f., who conjectures that *κουρά* (*κέρω*) became *κουρά* by analogy with *κουρεύς* <*κορσεύς*. That this whole series of words was interrelated had already been guessed by the ancients: see *et. mag.* p. 534, 4 ff. *κουρά* ἀπὸ τοῦ *κέρω* κέκαρμαι *κουρά* καὶ *κουρά*. *κούρη*...ἢ παρὰ τὸ *κέρω*, τὸ *κουρεῖω*, *κόρη* καὶ *κούρη* κ.τ.λ., *ib.* p. 533, 57 f. λέγεται δὲ καὶ ὁ ξυρῶν αὐτοῦ τὸ γένειον (sc. *κούρος*). So *ib.* p. 529, 36 f., *et. Gud.* pp. 338, 8 f., 341, 40 ff.

The foregoing derivation strongly supports Miss J. E. Harrison's contention that the *Κουρήτες* were the young initiates of the tribe (see her cogent article in the *Ann. Brit. Sch. Ath.* 1908—1909 xv. 308—338). Archemachos of Euboea *frag.* 8 (*Frag. hist. Gr.* iv. 315 f. Müller) *ap.* Strab. 465 states that the Kouretes of Chalkis ὄπισθεν κομῶντας γενέσθαι, τὰ δ' ἔμπροσθεν κείρεσθαι, διὸ καὶ Κουρήτας ἀπὸ τῆς *κουράς* κληθῆναι. This may be a speculation based on the Ἄβαντες...ὄπισθεν κομῶντας (*Il.* 2. 542). But it was certainly believed in the fifth century B.C. that the *Κουρήτες* got their name from their peculiar *coiffure*: Aisch. *frag.* 313 Nauck² *χλιδῶν τε πλόκαμος ὥστε παρθένους ἀβραῖς* | ὄθεν καλεῖν *Κουρήτα* λαὸν ἦνεσαν, Agathon *Thyestes frag.* 3 Nauck² *κόμας ἐκεράμεσθα μάρτυρας τρυφῆς*, | ἢ που ποθεινὸν χρήμα παιζούση φρενί. | ἐπώνυμον γούιν εὐθὺς ἔσχομεν κλέος, | *Κούρητες* εἶναι, *κουρίμου χάριν τριχός*. Cp. *et. mag.* p. 534, 14 ff. *Κουρήτες*...ἢ ἀπὸ τῆς *κουράς*, παρὰ τὸ μὴ κείρεσθαι=*et. Gud.* p. 342, 1 ff., Hesych. *s.v.* *Κουρήτες*...διὰ τὸ *κουρικῶς ἀναδεδέσθαι τὰς κόμας*, Eudok. *viol.* 518 *εἰ δὲ τινες τῶν Ἑλλήνων οὐκ ἦσαν κερηκομῶντες, παρεσημείωσατο αὐτοὺς ἢ ἱστορία, Κουρήτας αὐτοὺς ὀνομάζεσθαι λέγουσα κ.τ.λ.* = Eustath. *in Il.* p. 165, 8 ff.

At Athens the third day of the Apatouria was called *κουρεῶτις*—say the lexicographers—not merely because the *κούροι* and *κούραι* were then enrolled on their phratry-lists (Soud. *s.v.* Ἀπατούρια), but also because on that day children's hair was cut and dedicated to Artemis (Hesych. *s.v.* *κουρεῶτις*) or the *κούροι* had their hair cut and were enrolled in their phratries (Soud. *s.v.* *κουρεῶτις*). The sacrifice offered for those of full age (*εἰς ἡλικίαν προελθόντων*) was termed *κούρειον* in the case of the boys, *γαμηλία* in that of the girls (Poll. 8. 107). These terms point to an original puberty-rite of hair-clipping. Further, Miss Harrison notes that the Athenian *ἔφηβοι* presented Herakles with a big cup of wine (*ὀνιστήρια*) and then clipped their hair (Athen. 494 F, Hesych. *s.v.* *ὀνιστήρια*, Phot. *lex. s.v.* *ὀνι[α]στήρια*, Eustath. *in Il.* p. 907, 19, Favorin. *lex.* p. 469, 20 f.; cp. Poll. 3. 52, 6. 22, who connects the rite with the Apatouria).

The exact character of such tonsures can seldom be determined. Yet there is a certain amount of monumental evidence available. In Minoan art youthful figures, both male and female, often have a single curl hanging over the forehead (e.g. *Ann. Brit. Sch. Ath.* 1900—1901 vii. 56 f. fig. 17, *Mou. d. Linc.* 1908 xix. 15 ff. pl. 1 f.): was this the *χλιδῶν πλόκαμος* of the Kouretes? The ὄπισθεν κομῶντες appear on an archaic sherd from Aigina, which shows a man's head beardless and bald on top, but with bushy hair behind tied in a bunch on the neck (F. Dümmler in the *Jahrb. d. kais. deutsch. arch. Inst.* 1887 ii. 20 f. pl. 2, 3), and also on certain oblong plates of gold found at Corinth, which represent Theseus slaying the Minotaur and Ariadne standing at his back, both figures being bald on top, but long-haired behind (A. Furtwängler in the *Arch. Zeit.* 1884 p. 106 ff. pl. 8, 2—7): this was known as the *Θησῆος κουρά*, since Theseus at Delphoi shaved the front of his head only (Plout. *v. Thes.* 5, Eustath. *in Il.* p. 165, 7 f.). The head of a Lapith from the west pediment of the temple of Zeus at Olympia has a smooth surface reserved in the hair above the middle of the forehead (*Olympia* iii. 83 fig. 136): G. Treu *ib.* assumes an

tends to confirm our conjecture that the *Komyria* was the marriage-feast of Zeus¹.

It is probable that the crowds which in Roman times thronged the precinct looked upon the *Komyria* as the 'Hair'-festival; for the published dedications, sixty or so in number, regularly describe the votive hair as *kóme* or *kómai*. This appears to be another case of an obvious Greek meaning thrust upon an unobvious Carian term. It is thus comparable with the name of Zeus *Panámaros* himself².

§ 2. *Zeus and the Burning Sky.*

(a) *Aithér* as the abode of Zeus.

As a bright sky-god Zeus lived in the *aithér* or 'burning sky'.³ Homer and Theognis speak of him as 'dwelling in *aithér*.' And a notable line in the *Iliad* says:

Zeus' portion was
Broad heaven in the *aithér* and the clouds⁵.

Hence, when he punished Hera, he hung her up 'in the *aithér* and

upright tongue attached to a fillet (cp. a *stèle* in the Naples collection figured by Collignon *Hist. de la Sculpt. gr.* i. 256, the Lapiths on a vase published by H. Heydemann *Mittheilungen aus den Antikensammlungen in Ober- und Mittelitalien* Halle 1879 pl. 3, 1, etc.), but admits that there is no trace of the fillet. On the shaved moustache of the Spartans as a tribal mark see *infra* ch. i § 3 (f).

The relation of *Kaipós* to this group of words is dealt with in *Append. A*.

¹ In *Anth. Pal.* 6. 242 Krinagoras records the dedication of his brother's first beard *τελείω | Ζηνί καὶ ὠδίνων μείλιχῳ Ἀρτέμυδι*. Dr Rouse *op. cit.* p. 241 says: 'Agamemnon in perplexity tore out handfuls of hair as an offering to Zeus' (*Il.* 10. 15 f. *πολλὰς ἐκ κεφαλῆς προθελόμενος ἔλακτο χαιτράς | ὑψόθ' ἐόντι Δι*). But this strange couplet has been variously interpreted. Eustath. *in Il.* p. 786, 46 ff. presses the preceding metaphor to mean that, just as Zeus thundered, rained, and snowed, so Agamemnon groaned, shed tears, and scattered his hairs broadcast! Probably the whole passage is due to some bombastic rhapsode, who was trying to outdo the more commonplace phrase *Δι χείρας ἀνασχεῖν* (W. Leaf *ad loc.*).

² *Supra* p. 18. A puzzling epithet, perhaps another example of the same inter-linguistic phenomenon, is that given in the *Bull. Corr. Hell.* 1891 xv. 186 no. 130 A, 1 [*Δι Π*] *ανημέρω Ἀργύρου καὶ Ἡ[ρα]*. MM. Deschamps and Cousin take 'Ἀργύρου' to be an indeclinable divine title, which has given rise to such personal names as *Bull. Corr. Hell.* 1888 xii. 487 no. 60 (Panamara) *Ἐπαφῶ [κ]όμη Ἀργύρου*, *Bull. Corr. Hell.* 1887 xi. 12 no. 6, 5 f. (Lagina) *ἱέρεια ἡ γυνὴ αὐ[τ]οῦ | Ἀρτέμεις Ἀργύρου Κ(ωρα)ῖ(ς)*, *Corp. inscr. Gr.* iv no. 8753 (Pergamon) *Ἀργύρου*. But to Greek ears 'Ἀργύρου' spelled 'Silver,' and silver was the metal specially assigned to Zeus by the Byzantines (*infra* ch. i § 6 (g) on Iupiter *Dolichenus*).

³ L. Meyer *Handb. d. gr. Etym.* ii. 91, Prellwitz *Etym. Wörterb. d. Gr. Spr.*² p. 15, Boisacq *Dict. étym. de la Langue Gr.* p. 23.

⁴ *Il.* 2. 412, 4. 166, *Od.* 15. 523, Theogn. 757 *αἰθέρι ναίων*.

⁵ *Il.* 15. 192 *Ζεὺς δ' ἔλαχ' οὐρανὸν εὐρὸν ἐν αἰθέρι καὶ νεφέλῃσιν*. See *infra* ch. ii § 6.

the cloud'. On one occasion he sent a portent to the Achaeans 'out of *aithra*'; on another he helped Hektor 'from *aithér*'³; on another he came near to flinging Hypnos 'from *aithér*' into the sea'. Euripides in his *Melanippe the Wise* made one of the characters cry:

I swear by holy *aithra*, home of Zeus⁴.

Aristophanes after the manner of a caricaturist slightly distorts the phrase and ridicules the poet for saying '*aithér*, room of Zeus'⁵. Again in his *Chrysis* Euripides wrote an invocation of earth and sky beginning—

Highest Earth and *aithér* of Zeus⁷—

and in another fragment described Perseus as—

The Gorgon-slayer that winged his way to the holy *aithér* of Zeus⁸.

The Latin poets followed suit and used the borrowed word *aether* to denote the habitual abode of Jupiter⁹.

(b) Zeus *Aithérios*, Zeus *Aíthrios*.

Writers of both nationalities call Zeus (Jupiter) *aithérios* (*aetherius*), 'god of the burning sky'¹⁰—an epithet which gains importance from the fact that it was a cult-title possibly in Arkadia¹¹ and certainly in Lesbos. A decree found at *Chalakais*, on the site of the ancient town Hiera, records the sacred offices held by a certain Bresos, among them the priesthood of Zeus *Aithérios*¹². Aristotle in his treatise *On the Universe* links with *Aithérios* the epithet *Aíthrios*, 'god of the Bright Sky'¹³. This too

was a cult-title at Priene in Karia. A small marble altar found there and dating from the first century of our era or later is inscribed :

Διὸς	Of Zeus
Αιθρίου	<i>Atthrios</i> ¹ .

Another altar of similar *provenance*, period, and size is adorned with a bay-wreath, beneath which is the inscription :

Θεμιστοκλῆς	Themistokles
Μενάνδρου	son of Menandros
Διὶ Αιθρίῳ	to Zeus <i>Atthrios</i>
εὐχῆν	(in fulfilment of) a vow ² .

(c) Zeus identified with *Aithér* (sometimes with *Aér*)
in Philosophy and Poetry.

Lying at the back of such usages is the half-forgotten belief that *Aithér*, 'the Burning Sky,' itself is Zeus³. Zoïsm⁴ dies hard ; and this belief can be traced here and there throughout the whole range of Greek literature. In particular, it has left its impress on philosophy and poetry.

Pherekydes of Syros, one of the earliest writers of Greek prose, has preserved for us some exceedingly primitive notions with regard to Zeus, or *Zás* as he terms him. Of these I shall have more to say : for the moment we are concerned with the tradition that by Zeus Pherekydes understood *aithér*, 'the burning sky,' or *ignis*, 'fire⁵.' He may doubtless have given some such

¹ F. Hiller von Gaertringen *Inscriben von Priene* Berlin 1906 no. 184.

² *Id. ib.* no. 185.

³ As Zeus' Ἀμάριος presupposed ἀμάρια = Zeus, so Zeus Αἰθέριος presupposes αἰθήρ = Zeus. Hes. *theog.* 124 (Cornut. *theol.* 17 p. 28, 6 f. Lang) makes Aither the brother of Hemera, as does Hyg. *fab. praef.* p. 9, 2 Schmidt (Dies and Aether), cp. Cic. *de nat. deor.* 3. 44. Aither and Hemera appear fighting side by side on the frieze of the great Pergamene altar to Zeus: see *Die Skulpturen des Pergamon-Museums in Photographien* Berlin 1903 pl. 10, *Pergamon* iii. 2. 31 ff. Atlas pl. 6. In Cic. *de nat. deor.* 3. 53 f. Aether is father of an Arcadian Iupiter, cp. Ampel. 9 *Loves fuere tres. primus in Arcadia, Aetheris filius, cui etiam Aetherius cognomen fuit: hic primum Solem procreavit*, Lyd. *de mens.* 4. 67 p. 121, 25 f. Wunsch ἐπὶ Ἡρακλεῖς γενέσθαι, πρῶτον Διὸς τοῦ Αἰθέρος, *ib.* 4. 71 p. 122, 22 ff. τρεῖς Δίας εἶναι βούλονται, ἓνα μὲν Αἰθέρος, τὸν δὲ ἕτερον ἐν Ἀρκαδίᾳ. Pan was the son of Oinoë by Aither (Pind. *ap.* Maxim. Holobol. *in Syringem* p. 112 b 15 f. Dübner, *Araithos frag.* 5 *ap.* schol. Eur. *Rhes.* 36 = *Frag. hist. Gr.* iv. 319 Müller: cp. Gruppe *Gr. Myth. Rel.* p. 1390 n. 5), or of Oineïs by Aither (schol. Theokr. 1. 121) or by Zeus (*Aristippos frag.* 2 *ap.* schol. Theokr. 1. 3 and Eudok. *viol.* 747 = *Frag. hist. Gr.* iv. 327 Müller).

⁴ By zoïsm I mean what Mr J. S. Stuart-Glennie means by 'zoönism' and Mr R. R. Marett by 'animatism'—the primitive view that things in general, including inanimates, possess a mysterious life of their own.

⁵ *Hermias irrisio gentilium philosophorum* 12 = H. Diels *Doxographi Graeci* Berolini

interpretation of his own cosmological myth. But the tradition that he actually did so is late, and so mixed up with Stoic phraseology that it would be unsafe to build upon it¹.

Whatever Thales of Miletos meant by his statements that 'all things are full of gods²' and that even inanimates, to judge from the load-stone and amber, have life³, it is at least clear that his teaching was in a sense zoistic. It is therefore of interest to find that Herakleitos, the greatest of his followers, uses the expression '*Atthrios Zeus*' as a direct equivalent of 'the Bright Sky.' In a fragment preserved by Strabon he writes:

The limits of Morning and Evening are the Bear,
and over against the Bear is the boundary of *Atthrios Zeus*⁴.

Nay more, may we not venture to assert that Herakleitos' cardinal doctrine of the universe as an Ever-living Fire⁵ is but a refinement upon the primitive conception of Zeus the Burning Sky? For not only does the philosopher speak of his elemental Fire as *Keraunós*, 'the Thunderbolt⁶,' a word peculiarly appropriate to Zeus⁷, but he actually applies to it the name *Zén* or Zeus⁸. The author of the pseudo-Hippocratean work *On Diet* borrows both

1879 p. 654, 7 ff. Φερεκύδης μὲν ἀρχὰς εἶναι λέγων Ζῆνα καὶ Χθονίην καὶ Κρόνον· Ζῆνα μὲν τὸν αἰθέρα, Χθονίην δὲ τὴν γῆν, Κρόνον δὲ τὸν χρόνον· ὁ μὲν αἰθὴρ τὸ ποιοῦν, ἡ δὲ γῆ τὸ πάσχον, ὁ δὲ χρόνος ἐν ᾧ τὰ γινόμενα, Probus in Verg. *ecl.* 6. 31 p. 355 Lion Pherecydes... Ζῆνα, inquit, καὶ Χθόν <a> καὶ Κρόνον, ignem ac terram <ac> tempus significans; et esse aethera, qui regat terram, qua regatur tempus, in quo universa pars moderetur.

¹ This was seen by E. Zeller *op. cit.* i. 91 n. 3.

⁶ Herakl. *ap.* Hippolyt. *ref. haer.* 9. 10 πάντα οὐκίζει κεραυνός = frag. 28 Bywater, 64 Diels, cp. Kleanth. *h. Zeus* 10 πυρρόεντ' ἀείζωντα κεραυνόν, Philodem. *περὶ εὐσεβείας* 6^a p. 70 Gomperz κεραυνός π <ἀντ' οὐρα> ἰζει.

⁷ *Infra* ch. ii § 3 (a) i.

⁸ Herakl. *ap.* Clem. Al. *strom.* 5. 14 p. 404, 1 Stählin (Euseb. *praep. ev.* 13. 13. 42) ἐν τῷ σοφῶν μόνον λέγεσθαι οὐκ ἐθέλει καὶ ἐθέλει Ζηνὸς ὄνομα = frag. 65 Bywater, 32 Diels. Schuster punctuates after μόνον (*Rhein. Mus.* 1854 ix. 345), Cron after ἐθέλει (*Philologus* N.F. 1889 i. 208 ff.). Bernays transposes ἐθέλει καὶ οὐκ ἐθέλει (*Rhein. Mus.* 1854 ix. 256 f.). ὄνομα vulg. ὄνομα Bywater with Euseb. cod. D. οὐνόματι Mullach.

Probably Ζηνός, for Διός, in order to suggest a connexion with ζῆν, 'to live' (*supra* p. 11 n. 5).

That Herakleitos called his first principle Zeus, appears also from Chrysipp. *ap.* Philodem. *περὶ εὐσεβείας* 14 p. 81 Gomperz τὸν Πόλεμον καὶ τὸν Δία τὸν αὐτὸν εἶναι, καθάπερ καὶ Ἡράκλειτον λέγει, Clem. Al. *paed.* 1. 5 p. 103, 6 Stählin τοιαύτην τινὰ παίξιν παιδίαν τὸν ἑαυτοῦ Δία Ἡράκλειτος λέγει.

the style and the tenets of the enigmatic Herakleitos, when he declares:

All things are the same and not the same:
light is the same as Zen, darkness as Aïdes,
light is the same as Aïdes, darkness as Zen¹.

The Stoics, whose physical theories were profoundly influenced by those of Herakleitos, held that matter alone has real existence. But matter is not inert and dead. It can act as well as be acted upon, thanks to a certain tension or elasticity (*tónos*), which is found to a greater or less degree in all matter. This tension is described by a variety of names, among them those of Constructive Fire², *Aithér*³, and Zeus⁴. Krates, a distinguished Greek grammarian who was also a Stoic philosopher⁵, held that Aratos of Soloi, who began his astronomical poem the *Phaenomena* with a famous invocation of Zeus, was in reality invoking the sky⁶: he

⁵ Soud. *s.v.* Κράτης ii. 395 a 14 ff. Bernhardt.

⁶ Krates *ap.* schol. Caes. Germ. *Aratea* p. 379, 11 ff. Eyssenhardt. The same interpretation is put upon the phrase by Macrobi. *Sat.* 1. 18. 15, *in somn. Scip.* 1. 17. 14.

added that it was reasonable to invoke the *aér* and *aithér*, since in them were the stars: Homer—he said—had called the sky Zeus¹, as had Aratos elsewhere²; Hesiod³ and Philemon⁴ had used the same word of the *aér*. Other rationalists propounded similar explanations⁵; for allegory is ever popular with those who have outgrown their creeds. Thus what had once been a piece of genuine folk-belief was first taken up into a philosophical system by Herakleitos, then pressed into the service of various Stoic speculations, and finally treated as a commonplace by allegorists and eclectics.

The comedians of course lost no opportunity of deriding such vagaries. Philemon, the first representative of the New Attic Comedy, is known to have penned a play called *The Philosophers* in which he made mock of Zenon the Stoic⁶. When, therefore, we find that the prologue to one of his other comedies was spoken by a personage named *Aér* and identified with Zeus, we may fairly suspect a travesty of Stoic teaching. The personage in question announces himself as follows:

One who knows everybody and everything
That every one did, does, or ever will do,
And yet no god, and yet no man, am I.
Air, if you please, or Zeus if you prefer it!
For, like a god, I'm everywhere at once,
I'm here in Athens, at Patras, in Sicily,
In every state and every house, indeed
In each man Jack of you. Air's everywhere
And, being everywhere, knows everything⁷!

Another philosopher, who availed himself of the belief that the fiery sky is Zeus, was Empedokles of Agrigentum. This remarkable thinker recognised four elements or 'roots' of things, *viz.* Fire, Air, Earth, and Water, particles of which were combined and separated by the moving forces of Friendship and Enmity. In the extant fragments of his poem *On Evolution* he clothes his ideas in mythological language, speaking of the elements as Zeus, Here, Aidoneus, and Nestis respectively, and of the moving forces as Aphrodite (Kypris) and Ares (Eris). Thus he writes:

For first hear thou the four roots of all things:
Bright Zeus, life-bringing Here, Aidoneus,
And Nestis, whose tears flow as a fount for men¹.

The author of the compilation *On the Dogmas of the Philosophers*, a work wrongly ascribed to Plutarch², quotes the second line as commencing with the words 'Zeus *Aithér*' instead of 'Zeus *argés*,' *i.e.* 'Zeus the Burning Sky' instead of 'Zeus the Brilliant.' But that is perhaps an emendation on the part of a copyist familiar with Stoic phraseology and ignorant of the poet's vocabulary³. The word *argés* means 'bright' or 'brilliant' and is used by Homer five times of the thunderbolt hurled by Zeus⁴, once of the shining

4. 176 p. 183, 9 Wünsch *Zeus γὰρ ὁ ἀήρ κατὰ τοὺς φυσικοὺς λέγεται κ.τ.λ.*, *ib.* 1. 12 p. 6, 25 *Διὸς ἦτοι ἀέρος*.

Diogenes of Apollonia, a belated follower of Anaximenes, likewise equated Zeus with 'Aἴρ: Philodem. *περὶ εὐσεβείας* 6^b=H. Diels *Doxogr.* p. 536 b 2 ff. *Διογένης ἐπαυεῖ τὸν Ὀμηρον, ὡς οὐ μυθικῶς ἀλλ' ἀληθῶς ὑπὲρ τοῦ θείου διελεγμένον. τὸν ἀέρα γὰρ αὐτὸν Δία νομίζεν φησίν, ἐπειδὴ πᾶν ελδέναι τὸν Δία λέγει.*

The same equation is found many centuries later in Tzetz. *alleg. Od.* 6. 132 *πάντα τὰ δένδρα γὰρ ὁ Ζεὺς ἤγουν ἀήρ ἐκτρέφει, 8. 76 Ζεὺς δὲ ἀήρ τις κ.τ.λ.*

raiment worn by Helen¹, and twice in a slightly different form of white glistening fat². From the same root springs the word *argós*, 'bright, glittering, shimmering³,'—a fact which raises the question, In what relation did Zeus stand to the various mythical persons named *Árgos*? This complicated problem, which in one shape or another has exercised the minds of mythologists for the last seventy years⁴, has been recently attacked with the utmost care by Dr K. Wernicke⁵ and Dr O. Jessen⁷. They arrive at substantially identical results, *viz.* (1) that the numerous personages named *Árgos* are, for the purposes of serious investigation, reducible to two—the eponymous hero of the town Argos and the sleepless watcher of Io; (2) that these two were originally one and the same; and (3) that the ultimate *Árgos* was a sky-god, 'a sort of Zeus' says Dr Wernicke⁵, 'essentially similar to Zeus' as Dr Jessen puts it⁹. If this be so, it is permissible to regard *Árgos* 'the Glittering' as another name of *Zeús* 'the Bright One¹⁰,' and we obtain confirmation of our view that Empedokles, when he spoke of Fire as Zeus *argés*, Zeus 'the Brilliant,' was utilising a popular and originally zoistic conception of the bright sky-god.

Euripides sometimes identifies Zeus with the burning sky. He says, for example:

But *Aithér* is thy father, maid,
Whose name on earth is Zeus¹¹.

Or again:

Thou seest yon boundless *aithér* overhead
Clasping the earth in close and soft embrace?
That deem thou Zen, that reckon thou thy god¹².

It is usual to suppose that in such passages Euripides was writing as a disciple of Anaxagoras. But, though Euripides was certainly influenced by Anaxagoras¹, and though Anaxagoras in his cosmogony derived the world from the reciprocal action of a rare warm bright dry principle termed *aithér* and a dense cold dark moist principle termed *aér*², yet inasmuch as the philosopher nowhere calls his *aithér* by the name of Zeus, his influence on the poet is not here to be traced. Nor yet can these Euripidean passages be ascribed to Orphic teaching. For the Orphic Zeus was pantheistic and only identified with *aithér* in the same sense as he is identified with all the other elements of Nature³. Thus Aischylos in his *Heliades* writes probably under Orphic influence:

Zeus is the *aithér*, Zeus the earth, and Zeus the sky,
Zeus the whole world and aught there is above it⁴.

Orphic poems describe *aithér* as the 'unerring kingly ear' of Zeus⁵, or as 'holding the ever tireless might of Zeus' high palace⁶; but a direct identification of Zeus with *aithér* is attributed to Orpheus only by Ioannes Diakonos, a late and untrustworthy author⁷. What then was the source of Euripides' teaching in the matter? Possibly Herakleitos' use of '*Aithrios* Zeus' for 'the Bright Sky'⁸; but possibly also the old zoïstic conception that lay at the base of all these philosophical superstructures.

(d) Zeus as god of the Blue Sky in Hellenistic Art.

Pompeian wall-paintings have preserved to us certain Hellenistic⁹ types of Zeus conceived as god of the blue sky. He is characterised as such by the simplest of means. Either he wears a blue *nimbus* round his head, or he has a blue globe at his feet, or he is wrapped about with a blue mantle.

i. *The Blue Nimbus.*

In a painting from the *Casa del naviglio* (pl. i. and Frontispiece)¹, now unfortunately much faded, a fine triangular composition of Zeus enthroned is seen against a red background. The god's right hand, raised to his head, betokens thoughtful care. His left hand holds a long sceptre. His flowing locks are circled by a blue *nimbus*². Wrapped about his knees is a mantle, which varies in hue from light blue to light violet. His sandalled feet are placed on a footstool, beside which is perched his eagle, heedfully turning its head towards its master. The throne has for arm-rests two small eagles, and is covered with green drapery. Immediately behind it rises a pillar rectangular in section and yellowish grey in colour, the sacred stone of Zeus. We have thus in juxtaposition the earliest and the latest embodiment of the sky-god, the rude aniconic pillar of immemorial sanctity and the fully anthropomorphic figure of the Olympian ruler deep in the meditations of Providence³.

The same striking combination occurs on a well-mouth of Luna marble in the Naples Museum (pl. ii.)⁴. Here too we see Zeus seated in a pensive attitude, his right hand supporting his head, his left placed as though it held a sceptre. There is again a pillar

Zeus on a well-mouth at Naples.

See page 34 ff.

beside him: on it rests his eagle, the lightning-bearer, turning towards him and spreading its wings for instant flight.

Both designs are clearly variations (the one chromatic, the other plastic) of a common original by some sculptor of repute, who—to judge from the abundant but not as yet exaggerated locks of the god, his earnest deep-set eyes, his broad athletic shoulders, the naturalistic gesture of his right hand, and the multifacial character of the whole work—may well have been Lysippos. The Italian *provenance* of the wall-painting and the well-mouth suggest that this Lysippean masterpiece was executed for some city in Italy. Our only further clue is the presence of the pillar as an essential feature of the composition. Now pillar-cults of Zeus lasting on into the classical period are of extreme rarity. There was, however, one such cult, of which I shall have more to say¹, at Tarentum in south Italy. If it could be shown that Lysippos made an image of the Tarentine pillar-Zeus, it would be reasonable to regard that image as the prototype of our later figures. At this point Pliny may be brought forward as a witness. *A propos* of colossal statues he says: 'Yet another is that at Tarentum, made by Lysippos, forty cubits in height. It is noteworthy because the weight is so nicely balanced that, though it can be moved by the hand—so they state—, yet it is not overthrown by any gale. The artist himself is said to have provided against this by placing a pillar a little way off on the side where it was most necessary to break the violence of the wind².' Lucilius³ and Strabon⁴ mention that the statue in question represented Zeus and was set in a large open market-place. Whether it was seated we are not definitely told and cannot certainly infer⁵. On the one hand, its great height and carefully calculated balance suggest a standing figure (cp. fig. 8)⁶. On the other hand, Lysippos'

Fig. 8.

⁴ Strab. 278 *ἔχει δὲ* (sc. Tarentum) *γυμνάσιον τε κάλλιστον καὶ ἀγορὰν εὐμεγέθη, ἐν ἣ καὶ ὁ τοῦ Διὸς ἰδρυται κολοσσὸς χαλκοῦς, μέγιστος μετὰ τὸν Ῥοδίων.*

⁵ Overbeck *Gr. Kunstmyth.* Zeus p. 57.

⁶ Müller-Wieseler-Wernicke *Aut. Denkm.* i. 58 pl. 5, 11, a brown paste of late Roman work at Berlin (Furtwängler *Geschnitt. Steine Berlin* p. 122 no. 2642 pl. 24) shows Zeus leaning his left arm on a pillar and holding a *phiale* in his right hand. Upon

intention may well have been to eclipse the Olympian Zeus of Pheidias by a seated colossus of yet vaster bulk. Moreover, both Strabon¹ and Pliny² speak in the next breath of another colossal bronze made by Lysippos for the Tarentines: this represented Herakles without weapons, seated and resting his head on his left hand³—a fitting pendant to a Zeus in the Pompeian pose. Pliny's curious remark about the weight being moveable by hand might refer to some accessory such as the eagle of Zeus⁴; and his idea that the pillar set up beside the statue was intended to break the force of the wind is due to an obvious misunderstanding of the sacred stone. In short, the evidence that our painting and bas-relief presuppose Lysippos' famous work, though not conclusive, is fairly strong.

In this connexion it should be observed that Apulian vases—Tarentine vases, as Prof. Furtwängler called them on the ground that they were much used, if not manufactured, at Tarentum⁵,—more than once represent an ancient cult of Zeus by means of a simple pillar closely resembling that of the Pompeian painting or that of the Neapolitan relief. Thus a vase in the Louvre (fig. 9)⁶ depicts Hippodameia offering a *phiale* to her father Oinomaos, who is about to pour a libation over a primitive squared pillar before starting on the fateful race with Pelops. An *amphora* from Ruvo, now in the British Museum (pl. iii.)⁷, has the same scene with

the pillar is perched his eagle. In the field to right and left of his head are a star (sun?) and a crescent moon. The god is flanked by two smaller figures of the Dioskouroi, each with lance in hand and star on head. This design probably represents a definite cult-group e.g. at Tarentum, where the worship of the pillar-Zeus may have been combined with that of the Dioskouroi. If Lysippos' colossal Zeus (*supra* p. 35) was a standing, not a seated, figure, the Berlin paste perhaps gives us some idea of it.

¹ Strab. 278.

Pillar-cult of Zeus o

hora from Ruvo.

See page 36 ff.

further details and names. In the centre a four-sided pillar with splayed foot and moulded top bears the inscription *Dios*, '(the pillar) of Zeus¹.' It rises above, and probably out of, an altar,

Fig. 9.

over which Oinomaos, faced by Pelops, is in act to pour his libation. The king is flanked by Myrtilos, his faithless charioteer; the claimant, by Hippodameia, whom an older woman—possibly

¹ ΔΙΟΣ here is commonly supposed to mean '(the altar) of Zeus.' Overbeck *Gr. Kunstmyth.* Zeus p. 5 f. fig. 1 objects that in this case the word would have been written on the blank side of the altar, and prefers to supply Διὸς (ἀγάλμα or ἕδος). If, however, the pillar actually rises out of the altar (as does the female herm on the Dareios-vase: Furtwängler-Reichhold *op. cit.* ii. 148 pl. 88), the distinction ceases to be important; the altar is virtually the base of the pillar.

An interesting parallel is furnished by a series of bronze weights found at Olympia—the very spot represented on the vase (*Olympia* v. 801—824). They are shaped like an altar of one, two, three, or four steps, and are regularly inscribed ΔΙΟΣ, sometimes ΔΙΟΣ ΙΕΡΩΝ, or with the addition of a cult-title ΔΙΟΡ ΟΛΤΜΠΩ, ΔΙΟΡ ΟΛΤΝΠΩ, ΔΙΟΣ ΚΑΛ(Λυλικού? Miss J. E. Harrison), ΔΙΟΣ ΚΑΛ(δέου? cp. Paus. 5. 10. 7. H. B. Walters in *Brit. Mus. Cat. Bronzes* p. 361 no. 3008, followed by E. Michon in *Daremberg-Saglio Dict. Ant.* iv. 552 n. 50, suggests Κλαριου). Some of them are further decorated with a thunderbolt, or with an eagle attacking a snake. If these weights really represent an altar and not merely—as is possible—a pile of smaller weights, that altar was presumably the great altar of Zeus, which is known to have been a stepped structure formed from the ashes of the thighs of the victims sacrificed to Zeus (Paus. 5. 13. 8 ff.). Fig. 10 is a specimen inscribed ΔΙΟΣ (*Brit. Mus. Cat. Bronzes* p. 49 no. 327).

Copper coins of Nikaia in Bithynia, struck under Domitian, show a flaming rectangular altar inscribed ΔΙΟC | ΑΓO|PAI|OY (Morell. *Thes. Num. Imp. Rom.* ii. 483 f.

her mother's head forward by the wrist. Aphrodite and Eros appropriately complete the group. On the wall in the background hangs a white *phlox* with a sword, and to either side of it two human heads— one that of a young man named *Pelag(ou)*² wearing a Phrygian cap with lappets, the other that of a youth called *Pelops*: these are the heads of former suitors vanquished and slain by Oinomaos.

Fig. 10.

Other vases, which repeat the scene with variations, show a more developed form of the pillar-Zeus. A *kratēr* with medallion handles from Apulia, likewise in the British Museum (pl. iv, 1)³, again illustrates the compact of Oinomaos with Pelops before the altar of Zeus. Here too the central figures are flanked by Myrtilos and Hippodameia⁴; the former bears armour, the latter a bridal torch. In pl. 21, 21, *op. cit.* ii, 302 iii, pl. 26, 26: Waddington-Babelon-Reinach *Monn. gr. d'As. Mus.* i, 406 pl. 67, 166. Others, struck under Trajan, have a large altar ready laid with wood; there is a bull in the front of the altar and beneath it the word ΔΙΟC (*Hunter Cat. Chic.* ii, 2473). Others again, under Antoninus Pius, have a flaming altar inscribed ΔΙΟC with ΑΙΤΑΙΟΥ in the exergue (Waddington-Babelon-Reinach *op. cit.* i, 407 pl. 68, 3).

Early altars were often inscribed with the name of the deity in the genitive case (E. Kersch in Pauly-Wissowa *Recl-Enc.* i, 1681).

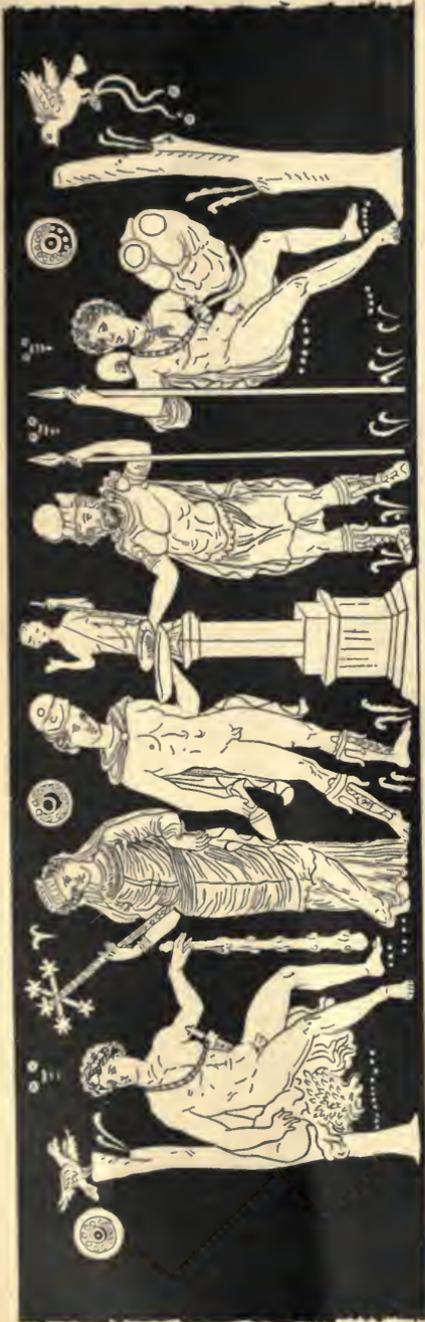

² Not Peitho, as I suggested in *Class. Rev.* 1903 xvii, 272 (following P. Weizsäcker in Roscher *Lex. Myth.* iii, 776), for she is white-haired. II. B. Walters in the *Brit. Mus. Cat. Vase* iv, 165 rightly says Sterope.

³ Paus. 6, 24, 11.

⁴ *Brit. Mus. Cat. Vase* iv, 132 ff. no. F 278, *Bull. Arch. Nap.* 1858 vi, 145 ff. 118, 8-10. *Class. Rev.* 1903 xvii, 272 fig. 2. My pl. iv, 1 and 2, are from a fresh drawing of the vase.

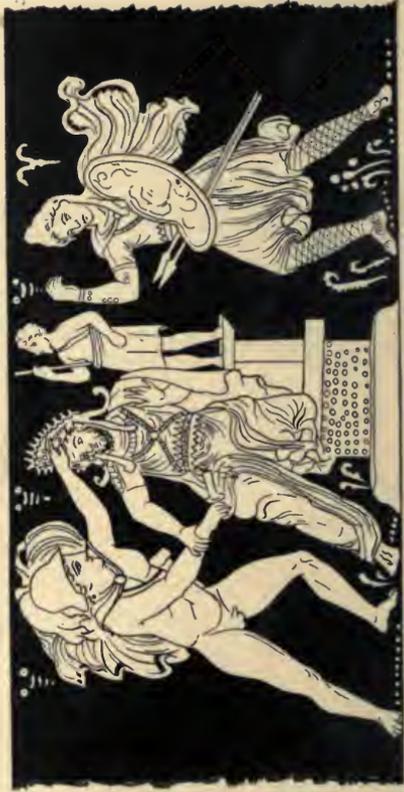

⁵ Not Aphrodite, as S. Reinach supposes (*Rev. Vases* i, 495).

Pillar-cult of Zeus on a *krater* from Lecce (the 'Cawdor vase').

See page 39.

Herakles is present as founder of the Olympic games. The *Áltis* or 'Grove' is indicated by a couple of tree-stumps to right and left, while the two doves hovering above them are probably the equivalent of Aphrodite and Eros in the last design¹. It will be noticed that the four-sided pillar with its altar-base is now topped by a statue of Zeus, who stands clad in *chitón* and *himátion*, his left hand leaning on a sceptre, his right raised as if to hurl a bolt². A second *kratér* of the same sort, found in 1790 near Lecce and known as the 'Cawdor vase' because purchased for a thousand guineas by Lord Cawdor, is now in the Soane Museum at 13 Lincoln's Inn Fields. It exhibits a somewhat later moment—the sacrifice by Oinomaos (pl. v)³. Pelops and Hippodameia have started. But the king still stands at the altar, holding a *phidle*, a wreath and a flower in his right hand, a spear in his left, while a youth (Myrtilos?) brings up a ram for the sacrifice. On the right of this group sits a retainer with armour; on the left a female figure wearing diadem, ear-ring, and necklace (Sterope?) approaches with a basket, a fillet, and three *epichýseis*. The altar is horned, and above it rises a pillar with moulded top, on which is placed a small undraped image of Zeus advancing with uplifted bolt. Between Zeus and Oinomaos a small prophylactic wheel is seen suspended⁴.

Similarly on a Campanian *amphora* from Capua, now at Dresden, Orestes stabs Aigisthos in the presence of Elektra (fig. 11)⁵. Aigisthos has apparently fled for refuge to an altar-base of Zeus⁶,

¹ In *Class. Rev.* 1903 xvii. 272 I accepted Minervini's contention (*Bull. Arch. Nap.* 1858 vi. 148 f.) that these doves should be identified with those of the Dodonaean Zeus, who spoke his oracles *δισσῶν ἐκ πελειάδων* (Soph. *Trach.* 172 with schol. *ad loc.*). But, though Aphrodite's doves are ultimately comparable with those of Zeus, we must not suppose any such recondite significance here.

² The opposite side of the same vase, which depicts the capture of Troy, shows *inter alia* Neoptolemos stabbing Priamos as he clings to a very similar pillar-altar of Zeus (pl. iv, 2): *infra* n. 6.

³ J. B. Passeri *Picturae Etruscorum in Vasculis* Rome 1775 iii pl. 282 ff., H. Moses *A Collection of Vases...* London 1814 pl. 23, J. My illustration of the top register (7½ inches high) was drawn over photographic blue-prints taken by Mr W. E. Gray of Bayswater.

⁴ On these prophylactic wheels see *infra* ch. i § 6 (d) i (e).

⁵ G. Treu in the *Jahrb. d. kais. deutsch. arch. Inst.* 1890 v Arch. Anz. p. 90, O. Höfer in Roscher *Lex. Myth.* iii. 969.

⁶ The scene as conceived by the vase-painter differs from the literary tradition (cp.

whose archaic statue holding thunderbolt and eagle surmounts a pillar on the right¹. Before it, upon the wall hangs a shield.

Fig. 11.

These vases prove that the pillar-cult of Zeus as conceived in south Italy passed from the aniconic to the iconic stage without discarding the primitive pillar. They thus afford a fair parallel to the painting from Pompeii, though there we have Zeus by the pillar and here Zeus on the pillar.

It remains to speak of the blue *nimbus*. Despite the express denial of L. Stephani², there is something to be urged for the view put forward by E. G. Schulz, that painters varied the colour of the *nimbus* in accordance with the character of the god they portrayed, and that a blue *nimbus* in particular suited Zeus as representative of the *aithér*³. It is—I would rather say—a naïve device for depicting Zeus as a dweller in the blue sky, and is therefore no less suitable to other denizens of Olympus⁴.

Christian art retained the symbol with a like significance. A fourth century painting from the top of an *arcosolium* in the Roman Catacombs shows Elias ascending to heaven in his chariot of fire. The saint

however Eur. *El.* 839 ff.): it was perhaps inspired by the death of Priamos at the altar of Zeus *Herkeios* (*supra* p. 39 n. 2).

¹ A milder type of pillar-Zeus, with *phidre* in right hand and sceptre in left, occurs on a *kratér* from Gnathia, now at Bonn (*infra* ch. i § 6 (d) i (f)).

² L. Stephani *Nimbus und Strahlenkranz* St Petersburg 1859 p. 96 (extr. from the *Mémoires de l'Académie des Sciences de St.-Petersbourg.* vi Série. Sciences politiques, histoire, philologie. ix. 456).

³ *Bull. d. Inst.* 1841 p. 103 'Tra le altre divinità è specialmente il Giove quasi sempre fregiato di quest' ornamento, al quale come ad una divinità universale e rappresentante l' etere viene per lo più attribuito il nimbo azzurro. Così lo vediamo tra altri esempj in un dipinto del Museo borbonico ed in un altro esistente nel cavedio della casa delle Baccanti,' with n. 'Mus. borb. vi, t. 52.'

On the meaning of gold, silver, red, green, and black *nimbi* in later art see Mrs H. Jenner *Christian Symbolism* London 1910 p. 91 f.

⁴ Blue *nimbi* are attached to the following deities: Aphrodite (Helbig *Wandgem. Camp.* nos. 118?, 291, 317), Apollon (Helbig nos. 189?, 232, 4, Sogliano *Pitt. mur.*

has a blue *nimbus* about his beardless head and obviously perpetuates the type of Helios¹. An interesting miniature on linen of about the same date comes from a priestly mitre found at Panopolis (*Achmim*). On it we see Christ as a youthful brown-haired figure, standing in a blue robe trimmed with carmine and holding a cross in his right hand: he too has a blue *nimbus* round his head². A *clavus* of polychrome wool-work, found on the same site but in a Byzantine grave of the sixth century or thereabout, represents a white-robed saint between two trees: his left hand holds a staff, and his head is circled by a blue *nimbus*³. The magnificent mosaic on the triumphal arch of S. Paolo *fuori le mura* at Rome, which was designed in the middle of the fifth century but has undergone substantial restorations, culminates in the bust of Our Lord wearing a golden radiate *nimbus* rimmed with dark blue⁴.

ii. *The Blue Globe.*

The blue *nimbus* marked Zeus as a dweller in the blue sky. More intimate is the connexion denoted by another symbol in the repertory of the Pompeian artist, the blue *orbis*⁵ or globe.

Camp. no. 164?), Demeter (Helbig no. 176 'bläulich'), Dionysos (Helbig no. 388), Helios (Sogliano no. 164?), Hypnos (Helbig no. 974 'bläulich, zackig'), Kirke (Helbig no. 1329), Leda (Helbig no. 143), Selene (Sogliano no. 457 'azzurgnolo'), young god with white or golden star above him (Helbig nos. 964, 971), young radiate god (Helbig no. 969, Sogliano no. 458, cp. Helbig no. 965 youth with blue radiate crown and white star above), mountain-nymphs (Helbig no. 971), wood-nymph (Sogliano no. 119), radiate female figure with bat's wings (Sogliano no. 499) or bird's wings (Sogliano no. 500). See also Stephani *op. cit.* pp. 19, 22, 23, 47, 49, 65.

B. de Rossi *Mosaici cristiani e saggi dei pavimenti delle chiese di Roma anteriori al secolo xv* Roma 1899 pl. 13, L. von Sybel *Christliche Antike* Marburg 1909 ii. 328 pl. 3 (after de Rossi), W. Lowrie *Christian Art and Archaeology* New York 1901 p. 311. On the blue *nimbus* in Christian art see further O. M. Dalton *Byzantine Art and Archaeology* Oxford 1911 p. 682.

⁵ The word is found in the description of a silver statue of Iupiter *Victor*, which stood on the Capitol of Circa: *Corp. inscr. Lat.* viii no. 6981 = Dessau *Inscr. Lat. sel.* no. 4921^a (Wilmanns *Ex. inscr. Lat.* no. 2736) SYNOPSIS | IOVIS • VICTOR • ARGENTEVS | IN KAPITOLIO • HABENS • IN • CAPITE • CO|RONAM • ARGENTEM • QVERQVEAM | FOLIOR • XXV ◊ IN QVA • GLANDES • N̄ • XV • FE|RENS • IN MANV • DEXTRA • ORBEM • ARGEN|TEVM • ET VICTORIA • PALMAM • FERENTEM | [*spinar?*] • XX • ET CORONAM ◊ FOLIOR • XXXX • | [*in manu*] SINISTRA • HASTAM • ARG • TENENS.... Cp., however, Amm. Marc. 21. 14. 1 *sphaeram* quam ipse (*sc.* Constantius ii) dextera manu gestabat, 25. 10. 2 Maximiani statua Caesaris...amisit repente *sphaeram* aeream formatam in speciem poli quam gestabat. Soud. *s.v.* *Ἰουστινιανός* also uses the term *σφαῖρα* (*infra* p. 52 n. 4).

This occurs in a painting from the *Casa dei Dioscuri* (pl. vi)¹. Against a red ground we see Zeus seated on a throne, which is draped in shimmering blue. Its arm-rests, of which one is visible, are supported by carved eagles. A violet-blue mantle with gold-embroidered border covers the lower part of his figure. The right hand resting on his knee holds a thunderbolt; the left is raised and leans on a sceptre banded with gold. Before him is his eagle looking up to him in an attitude of attention. Behind hovers Nike in a light violet *chiton*, with a green veil over her left arm, placing a golden bay-wreath on the head of the god. Beside him is a blue globe on a square base.

Fig. 12.

An engraved chalcedony of imperial date, now in the Berlin collection (fig. 12)², repeats the *motif* with slight variations. The right foot, not the left, is advanced, and the globe is omitted, perhaps to leave room for the inscription.

With regard to this interesting composition two questions may be mooted. What were its antecedents? And what were its consequents?

The facing type is certainly suggestive of a cult-statue; and we observe, to begin with, that our figure bears a more than superficial resemblance to the Iupiter *Capitolinus* of Apollonios, a chryselephantine copy of Pheidias' Zeus made for the temple dedicated by Q. Lutatius Catulus in 69 B.C.³ The main features of Apollonios' Iupiter were recovered by A. Michaelis from a torso at Naples and from sundry early drawings by Heemskerck, Giuliano da Sangallo, and dal Pozzo⁴. The right hand probably held a sceptre, but not high enough for the upper arm to assume a horizontal position. The left hand was lowered and probably grasped a thunderbolt. The right foot was thrust forward till it projected horizontally beyond the footstool of the

v2

Zeus enthroned on the *ara Capitolina*.

See page 43.

throne. The left foot was drawn back till it rested only on its toes. The *himátion* covered the top half of the god's left arm, and the end of it hung down between his knees. Now all, or almost all, these traits are to be found in an extant relief, the consideration of which would have materially strengthened Michaelis' case—I mean the principal face of the so-called *ara Capitolina*. This beautiful monument represents on its four sides scenes from the life of Zeus, and has by way of climax Zeus enthroned among the other denizens of Olympos (pl. vii)¹. The form of the god is precisely that described by Michaelis, except for the unimportant circumstance that the sculptor has here chosen to bring forward the left rather than the right foot. The comparatively low position of the arm holding the sceptre, the somewhat unusual arrangement of a thunderbolt grasped by the left hand, the feet thrust forward and drawn back respectively, the *himátion* swathing the whole of the upper arm—all these characteristics are present, together with a head of would-be fifth-century type admirably suited to a copy of the Olympian Zeus². I take it, therefore, that the seated Zeus of the *ara Capitolina* is on the whole our best evidence for the aspect of Apollonios' Iupiter *Capitolinus*³. If this be so, it becomes probable that the latter, like the former, had a large globe placed on the left hand side of his throne.

Next we have to compare the type of Zeus attested by the Pompeian wall-painting and the intaglio at Berlin with that of Iupiter *Capitolinus* thus determined. The two types have undoubtedly much in common. Both show a seated Zeus half-draped in a *himátion*, holding a sceptre in his raised, a thunderbolt in his lowered hand. The pose of the feet and legs is similar, not to say identical; and the Pompeian Zeus at least agrees with the

¹ Helbig *Guide Class. Ant. Rome* i. 379 f. no. 515, Friederichs-Wolters *Gipsabgüsse* p. 815 f. no. 2142, Overbeck *Gr. Kunstmyth. Zeus* pp. 170, 175 ff., Hera pp. 129, 137 ff., Atlas pl. 1, 49 (Zeus only), E. Braun *Vorschule der Kunstmythologie* Gotha 1854 pl. 5, Baumeister *Denkm.* iii. 2139 fig. 2397.

² The substitution of a fillet for a wreath is noteworthy, since Petillius Capitolinus was accused of carrying off the wreath of Iupiter *Capitolinus* (Acron and Porphyryon *ad Hor. sat.* 1. 4. 94). This accusation was a time-honoured joke (Plaut. *Men.* 941, *Trin.* 83 ff.).

³ The colossal statue of Nerva seated as Iupiter in the Rotunda of the Vatican (Helbig *Guide Class. Ant. Rome* i. 217 no. 303) looks like an adaptation of the same type, as Miss M. M. Hardie of Newnham College pointed out to me. But both arms with the mantle covering the left shoulder are restorations by Cavaceppi, and the lower half belongs to another seated male figure. A similar adaptation of the type may be seen in the Berlin 'Trajan' (*Ant. Skulpt. Berlin* p. 144 no. 354), a seated emperor of the first century A.D. (head not belonging; arms, feet, etc. much restored). Cp. also the Augustus of Ankyra (*Gaz. Arch.* 1881—1882 vii. 73 ff. pl. 13).

Iupiter *Capitolinus* in the fall of its drapery between the knees as also in the presence of the big globe to the left of the throne. Nevertheless close inspection reveals important points of difference. The wall-painting and the intaglio give Zeus a fourth-century, not a fifth-century, head. They place the thunderbolt in his right hand, the sceptre in his left, not *vice versa*. They raise the hand leaning on the sceptre till the upper arm is horizontal. Consequently they dispense, either wholly or in part, with the covering of the arm. Lastly, they introduce an entirely new feature, Nike appearing behind the throne and wreathing the head of the god. These similarities and differences can be readily explained, if we suppose that the wall-painting and the intaglio have preserved to us a later modification of the type of Iupiter *Capitolinus*. We know that Catulus' temple was burnt by the Vitelliani or their opponents in the eventful year 69 A.D.¹ And we know that Pompeii was destroyed by the eruption of Mount Vesuvius in 79 A.D. It is reasonable to conjecture that the new statue of Iupiter *Capitolinus* necessitated by the disaster of 69 would be during the first decade of its existence a favourite theme with the painters of the day. On this showing we may well believe that the Pompeian painting represents the cult-statue of Iupiter *Capitolinus* in the temple which Vespasian began to build in 70 A.D.² Confirmation of the surmise is not far to seek. The

Fig. 13.

reverse of a copper coin struck by Vespasian shows the façade of the new building (fig. 13)³. Between its central columns is seen a statue of Iupiter seated in exactly the same pose and holding exactly the same attributes as in the Pompeian painting. The globe at the side and the Victory behind are omitted on account of the small scale of the design. But that they were present in the temple itself can hardly be doubted⁴.

¹ Tac. *hist.* 3. 71 f., Plout. *v. Public.* 15, Suet. *Vitell.* 15, Euseb. *chron. ann. Abr.* 2086, Aur. *Vict. de Caes.* 8. 5, 9. 7, Kedren. *hist. comp.* 217 A (i. 380 Bekker).

² Tac. *hist.* 4. 53, Plout. *v. Public.* 15, Suet. *Vesp.* 8, Dion Cass. 66. 10, Euseb. *chron. ann. Abr.* 2087, Aur. *Vict. de Caes.* 9. 7, Kedren. *hist. comp.* 217 A (i. 380 Bekker). Suetonius' expression *nolle deos mutari veterem formam* is satisfied by the general resemblance of the Vespasianic Iupiter to his predecessor.

³ Drawn from a specimen in my possession. See further T. L. Donaldson *Architectura Numismatica* London 1859 p. 6 ff. no. 3 (pl.), Morell. *Thes. Num. Imp. Rom.* ii. 314 pl. 13, 23, 375 f. pl. 10, 9, Cohen *Monn. emp. rom.*² i. 405 f.

⁴ The Victory may have stood on a column behind the throne of Iupiter. Cp. *e.g.* copper coins of Ptolemais in Phoinike struck by Septimius Severus etc., which show Nike

Vespasian's building did not last for long. Another great conflagration occurred in 80 A.D. and burnt it to the ground¹. It was rebuilt by Titus and Domitian², and, thus restored, had a longer lease of life. Despite some damage done by lightning and fire in the reign of Commodus³, it remained substantially the same building till the fall of the western empire⁴. To determine the type of Domitian's Jupiter is not easy, since the silver coin that expressly commemorates the rebuilding is undecisive⁵, while the ordinary issues of this emperor in silver⁶ and copper⁷ may have been influenced by Vespasian's coin.

However, it is probable that succeeding centuries saw sundry minor changes introduced. Thus there is reason to think that the globe, originally at the left side of the throne, came to be held in the god's right hand. A coin of Neapolis in Samaria, struck by Caracalla, shows Jupiter *Capitolinus* on a throne facing us.

Fig. 14.

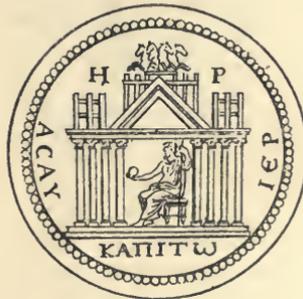

Fig. 15.

He holds a globe in his right hand, a long sceptre in his left, and is flanked by Iuno and Minerva (fig. 14)⁸. Similarly coins of Capitolias, a town near Gadara founded in the reign of Nerva or Trajan⁹, have the same deity enthroned in an octostyle temple,

on a column behind Tyche, crowning her with a wreath in a tetrastyle temple (*Brit. Mus. Cat. Coins Phoenicia* p. 133 pl. 16, 15, p. 135 ff. pl. 17, 4, 9).

the gable of which supports a solar chariot. Iupiter again holds a sceptre in his left hand, a globe in his right (fig. 15)¹. It seems likely that in the Capitoline temple at Rome Victory still held her wreath over the head of the god; for not only do coins of Antoninus Pius and others show the emperor seated on a curule chair with a globe in one hand and a sceptre in the other², but such coins sometimes add a Victory hovering behind him with a wreath in her outstretched hand (fig. 16)³. Gold coins of the later Roman emperors frequently exhibit a design of kindred origin. For example, Valentinianus i and his son sit side by side holding a starry globe between them, while Victory with spread wings is seen in the background behind their throne (fig. 17)⁴.

Fig. 16.

Fig. 17.

These representations imply on the one hand that the emperor has stepped into the shoes of Iupiter, on the other hand that his duties descend in unbroken succession from occupant to occupant of the imperial seat. Both conceptions could be further illustrated from Roman coinage. Frequently from the time of Commodus to that of Diocletian we find Iupiter delegating the globe to his human representative (fig. 18)⁵. Sometimes, as in the case of

¹ H. Norisius *Chronologica (Opera omnia: tomus secundus)* Veronae 1729 p. 338 fig., Eckhel *Doctr. num. vet.*² iii. 329, Rasche *Lex. Num.* ii. 341, Suppl. i. 1626. Trajan and Hadrian, it is the emperor who passes on the symbol to his successor (fig. 19)¹.

Fig. 18.

Fig. 19.

Yet another modification of the same cult-statue produced the type of Jupiter enthroned with his left foot planted on the globe. This may be seen from sundry late sarcophagus-reliefs supposed to portray the birth of Apollon². The best-preserved of them is that of a sarcophagus-lid in the Villa Borghese. The central scene (fig. 20)³, with which alone we are here concerned, shows Jupiter enthroned in heaven. Once more he sits facing us, with a sceptre in his raised left and a thunderbolt in his lowered right hand⁴. But this time the globe is transferred from his left side to a new position beneath his left foot. On either side of him are a boy and a girl interpreted as the youthful Apollon and Artemis⁵. They in turn are flanked by Iuno with her sceptre and Minerva with her helmet and spear. In short, we have before us the heavenly region represented by the three Capitoline deities and their new *protégés*.

That the Jupiter of this relief is in truth only a variation of the Vespasianic type, appears from a curious circumstance noted by

¹ Rasche *Lex. Num.* iii. 15, 1464, Sittl *op. cit.* p. 49. The illustration is from a coin of Hadrian in my collection. DAC · PARTHIC[O P · M · TR · P] · COS P P and S · C.

Zoega. He states that on the background (between the head of the supposed Artemis and that of Iupiter) were still to be seen the

Fig. 20.

shoulder and bare right arm of some formerly existing figure¹. These were subsequently chipped away by the zealous restorer. But

Fig. 21.

very fortunately the missing figure can be determined by means of a *replica* in the Capitoline Museum (fig. 21)², which exhibits Victory

¹ Robert *op. cit.* iii. 1. 42.

² Raoul Rochette *op. cit.* p. 401 ff. pl. 74, 2, Overbeck *op. cit.* Zeus p. 172, Hera p. 131 Atlas pl. 10, 23. A drawing by Eichler is given in Robert *op. cit.* iii. 1. 42.

holding a shield above Iupiter and the globe—later transformed into a vase—resting on a high base to the left of Iuno¹. It would thus seem that the Iupiter *Capitolinus* of the Borghese relief presupposes a statue with Victory behind and a pedestalled globe at its side. That *Vorbild* can hardly have been other than the cult-image of Vespasian's temple.

The god enthroned with the globe as his footstool was a type readily adopted by Christian art. A gilded glass of the fourth century, found in one of the Roman catacombs (fig. 22)², shows a beardless figure of Our Lord (CRISTVS) seated with his foot on a

Fig. 22.

starry globe. He takes a scroll from its case at his side and instructs S. Stephen (ISTEFANVS). The Godhead with a *nimbus* in the background, who raises his hands to bless both Master and disciple, recalls the Victory appearing behind Valentinianus i and his son.

¹ Robert in *Hermes* 1887 xxii. 463 f. and in his *Sark.-Relfs.* iii. 1. 42 f. condemns the whole work as a forgery, arguing that it was made about 1615 A.D. in free imitation of the Borghese relief. But in view of what is said by Raoul Rochette *op. cit.* p. 401 f. further investigation seems desirable. In any case the Capitoline *replica* may fairly be used (Robert uses it so himself) as evidence of the original aspect of the Borghese composition.

² F. Buonarruoti *Osservazioni sopra alcuni frammenti di vasi antichi di vetro* Firenze 1716 p. 110 ff. pl. 17, 1. DIGNITAS AMICORVM VIVAS CVM TVIS FELICITER.

A somewhat similar type, that of the Father or the Son seated on a large globe, occurs in church-mosaics of the fourth, fifth

Fig. 23.

and sixth centuries¹. For example, the right lateral apse in the Mausoleo di S. Costanza near the Via Nomentana at Rome—a work

Fig. 24.

¹ J. Ciampinus *Vetera Monumenta Romæ* 1747 i. 271 ff. pl. 77 (S. Agatha in Subura = S. Agata dei Goti at Rome, 460—468 A.D.), ii. 72 f. pl. 19 (S. Vitalis = S. Vitale at

dated by de Rossi shortly after 360 A.D.—shows God the Father, not only with a blue *nimbus* and a blue robe, but also seated on a blue globe, as he presents the scroll of the law to Moses (fig. 23)¹. Similarly the apse of the church of S. Teodoro at the foot of the Palatine—*circ.* 600 A.D.—has God the Son seated on a blue globe spangled with gold stars between St Peter, who presents S. Teodoro, and St Paul presenting another saint hard to identify (fig. 24)². This type too in all probability derives from a pagan prototype³. Silver and copper coins of Ouranopolis, a town founded by Alexarchos, brother of Kassandros, on the peninsula of Akte, represent Aphrodite *Ourania* seated on a globe (fig. 25)⁴. On autonomous copper coins of Klazomenai the philosopher Anaxagoras is seen sitting on a globe (fig. 26)⁵: on an imperial copper of the same town he holds a small globe in his extended right hand, while he sets his left foot on a *cippus*⁶. A silver coin of Domitia Longina, wife of the emperor Domitian, shows a child seated on a globe and surrounded by seven stars (fig. 27)⁷. The child has been identified as the empress' son, who was born in 73 A.D. and died young⁸. He is here represented as the infant Zeus of Crete. A Cretan copper, struck under Trajan, has the

same *motif* (fig. 28)¹: Zeus as a child sits on the globe with a goat at his side and seven stars above his head. The idea was popularised by coins of Antoninus Pius (fig. 29)² and Commodus, on which occurs the fine figure of Italia enthroned on a starry globe as mistress of the world.

The symbol of the globe was still further Christianised, when Valentinianus I added a cross on the top of it³. In this form it occurs on the coins of many of the later Roman emperors⁴. An obvious exception is afforded by Julian the Apostate, who sub-

Fig. 27.

Fig. 28.

Fig. 29.

stituted a small figure of Victory for the cross⁵. The *globus cruciger*, or globe and cross, is again a constant emblem of Christian sovereignty on Byzantine coins⁶. As the 'orb' of mediaeval and modern *regalia* it has survived to our own times⁷.

We have now passed in review the different conditions under which the globe is associated with Zeus. It remains to ask what was the origin of the symbol, and what was its significance.

Its origin appears to have been twofold. On the one hand, the

¹ Overbeck *Gr. Kunstmyth.* Zeus p. 330 Münztaf. 5, 2, J. N. Svoronos *Numismatique de la Crète ancienne* Macon 1890 i. 348 pl. 35, 1.

⁷ Ducange *Gloss. med. et inf. Lat.* ed. 1886 vi. 111 *s.v.* 'palla' cites from Gotefridus Viterbiensis the couplet—Aureus ille Globus Pomum vel Palla vocatur, | Quando coronatur, Palla ferenda datur.

type of the infant Zeus seated on a globe surrounded by stars is of Greek extraction. On the other hand, most of the representations considered above can be legitimately derived from the cult-statue of Iupiter *Capitolinus*, which had at its left side a ball resting on a pedestal or pillar. This was a definitely Roman adjunct: it had no counterpart in the temple of Zeus at Olympia.

Enquiry might be pushed further. The temple of Iupiter *Capitolinus* was, as is well known, essentially an Etruscan building. Now a ball resting on a pedestal or pillar occurs in Etruscan art sometimes as a grave-stèle¹, sometimes as a sacred land-mark or boundary-stone². Such monuments varied much in shape and size. A fine example from Orvieto, now in the Museum at Florence, consists of a rectangular moulded base topped by a spheroidal black stone (fig. 30)³. Another, in the Orvieto Museum, is a cone of tufa hollow inside, and bears an inscription (*Tinia Tinscvil*) which connects it with *Tinia*, the Etruscan Iupiter (fig. 31)⁴. Are we then to infer that in the *cella* of Iupiter *Capitolinus*, side by side with the most august statue in Rome, there was a grave-stèle or a boundary stone? The fact is luckily beyond question⁵. When the foundations of the temple were first laid by Tarquinius Priscus, the god Terminus—otherwise known as Iupiter *Terminus*—was already in possession of the site and resisted the process of exauguration. Hence the ancient boundary-stone that passed as his image was allowed to remain in close proximity⁶ to the statue of Iupiter *Capitolinus*. Moreover, a small opening was contrived in the roof above it, since sacrifices to Terminus had to take place in the open air. Lactantius asserts that the rude stone worshipped as Terminus

¹ Durm *Baukunst d. Etrusk.*² p. 128 fig. 141, Raoul Rochette *op. cit.* pp. 141 n. 5, 402, 405. These balls on pillars were originally *Grabphalli* (Forrer *Reallex.* p. 297): see A. Koerte in the *Ath. Mitth.* 1899 xxiv. 6 ff. pl. 1, 1, A. Dieterich *Mutter Erde* Leipzig and Berlin 1905 p. 104 f.

² Raoul Rochette *op. cit.* p. 404 f. pl. 75 (a funeral urn in the museum at Volterra): G. Körte *I Rilievi delle Urne Etrusche* Berlino 1890 ii. 1. 97 pl. 38, 3 describes and figures the object on the pillar as 'un vaso tondo.' Cp. the stone balls on our lodges (see, however, S. Baring-Gould *Strange Survivals*³ London 1905 p. 53).

³ L. A. Milani in the *Rendiconti della Reale Accademia dei Lincei*. Classe di Scienze Morali, Storiche e Filologiche. Serie Quinta. Roma 1900 ix. 295 fig. 4, *Studi e materiali di archeologia e numismatica* Firenze 1902 i. 60 f. fig. 226.

A similar *Grabansatz* from Orvieto, now at Berlin, is an elliptical block of polished serpentine resting on a moulded base of trachyte (*Ant. Skulpt. Berlin* p. 481 no. 1244 fig.).

⁴ Milani *loc. cit.* ix. 293 fig. 3 cp. *ib.* p. 294 'un cono tufaceo vuoto internamente,' i. 60 f. fig. 227. Cp. J. Six 'Der Agyieus des Mys' in the *Ath. Mitth.* 1894 xix. 340 ff.

⁵ The evidence is collected by Preller-Jordan *Röm. Myth.*³ i. 255 f., Wissowa *Rel. Kult. Röm.* p. 124 f., C. Hülsen in Pauly-Wissowa *Real-Enc.* iii. 1532.

⁶ Dion. Hal. 3. 69 *πλησίον τοῦ ἔδους*.

was that which Saturn was said to have swallowed in place of Jupiter¹. This confusion suggests that Terminus' stone had a round top to it²—as was in fact the case, if I am right in my conjecture with regard to the globe of Jupiter *Capitolinus*.

Fig. 30.

But, it will be asked, if this globe was originally the stone of Terminus, how came it to be regarded as a symbol of the sky? Partly, I suppose, because it was a round object standing under the clear sky; but partly also because a globe on a pillar was used by Greek astronomers as a model of the sky³. Thus imperial

¹ Lact. *div. inst.* 1. 20.

² In Roman art the stone of Kronos is figured as a half-egg on the top of a short pillar (*infra* ch. ii § 10 (d)).

copper coins of Samos figure Pythagoras seated or standing before a globe, which rests on a pillar, and pointing to it with a rod¹.

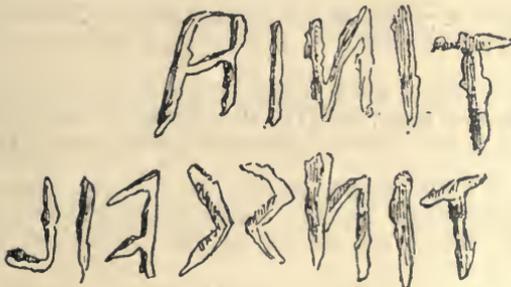

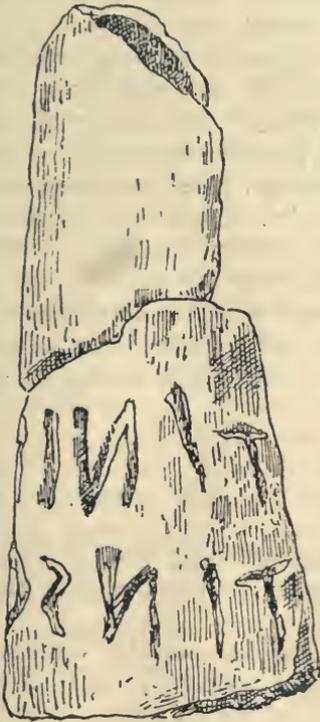

Fig. 31.

Enthroned as master in the realm of knowledge with a long sceptre in his left hand and a *himation* loosely wrapped about him

¹ L. Bürchner in the *Zeitschr. f. Num.* 1882 ix. 121 ff., *Brit. Mus. Cat. Coins Ionia* pp. 373, 376, 381, 390, 392, pl. 37, 14, J. J. Bernoulli *Griechische Ikonographie* München 1901 i. 75 Münztaf. 1, 21 and 23.

with black ground from the *Casa dei bronzi* shows him clad in a sky-blue wrap and sitting on a seat which is draped in reddish brown¹. An important painting of the *hieròs gámos* from the *Casa del poeta tragico* represents Zeus seated on a rock with a light violet robe hanging like a veil over his hair and thrown loosely round his shoulders, back, and legs². Again, a picture of Zeus drawing lots has him enthroned with a peacock-blue *himátion* about his knees³. The splendid wall-painting of a youthful fair-haired Zeus found in the *Casa dei Vettii* similarly shows the god with a peacock-blue *himátion* round his legs⁴. Other Pompeian examples portray him seated, his legs wrapped in a red mantle with a blue⁵ or green⁶ border. A painting from Herculaneum gives him a whitish *nimbus* and drapes him from the waist downwards in a reddish *himátion*; but it is to be observed that here Zeus is represented as reclining among the clouds with a rainbow arched above him and a background of blue sky⁷. Finally, in a fresco of the Hadrianic age, found at Eleusis, he is once more seen on a throne, his legs swathed in a violet-blue *himátion* edged with green⁸.

It would seem, then, that Hellenistic art normally depicted Zeus as wearing a mantle of violet-blue. And this in all probability corresponded with cult-practice. Alexander the Great is known to have worn a purple cloak, when he masqueraded as Zeus *Ámmon*⁹. Anaxenor, a famous musician of Magnesia on the Maiandros in the days of M. Antonius the triumvir, was clad in purple by his fellow-countrymen as priest of Zeus *Sóstpolis*¹⁰. And

¹ So Zahn *Die schönsten Ornamente* etc. ii pl. 54 (coloured). According to Helbig *Wandgemälde* etc. p. 31 no. 103, his garment is reddish and his seat covered with a blue robe.

⁸ 'Eφ. 'Αρχ. 1888 pl. 5, *supra* p. 2 n. 2, Collignon *Hist. de la Sculpt. gr.* i. 528 says: 'le bas du corps couvert d'un himation bleu.'

⁹ Ehippos *ap.* Athen. 537 E "Εφίππος δὲ φησὶν ὡς Ἀλέξανδρος καὶ τὰς λεγὰς ἐσθθίτας ἐφόρει ἐν τοῖς δέλτοις, ὅτε μὲν τὴν τοῦ Ἀμμωνος πορφυρίδα καὶ περισχιδεῖς καὶ κέρατα καθάπερ ὁ θεός, ὅτε δὲ κ.τ.λ.

¹⁰ Strab. 648, *infra* p. 58 n. 6.

a Roman dedication to Iupiter *Purpurio* may be taken to imply that the god wore a purple garb¹.

The first and most obvious explanation of this conventional colouring is the fact that Zeus was king of all and, as such, would of course wear the purple or blue of royalty. If we pursue the enquiry and ask *why* royal robes were blue or purple, we enter the region of conjecture. In its origin perhaps the usage was prophylactic, red (*i.e.* blood-colour)² passing into purple, and purple into blue.

But, whatever the ultimate significance, it is probable that by Hellenistic times, if not earlier, a fresh meaning had been read into the ancient custom, the purple or blue robe of Zeus and of his earthly representative being interpreted as a symbol of the sky³. Hence in both cases it came to be spangled with golden stars. At Elis the god Sosipolis was painted as a boy clad in a starry *chlamys*⁴. His name recalls the Zeus *Sosipolis* of Magnesia on the Maiandros⁵, who is known to have had a sacred purple robe⁶. It is highly probable that these two divinities were alike related to the Cretan Zeus⁷. Again, Demetrios Poliorketes, who posed as Zeus⁸, had a dark-tinted *chlamys* inwoven with stars of gold and with the twelve signs of the zodiac⁹. Scipio, when he triumphed in 201 B.C., was 'dressed according to ancestral custom

¹ *Corp. inscr. Lat.* vi no. 424 = Dessau *Inscr. Lat. sel.* no. 3040 (found at Rome near the Monte Testaccio):

LICINIA	LICINIA	OCTAVIA
QVINTA	PVRPVRIS	SATVRNIN
(A thunderbolt)	(Three female figures standing)	(A <i>paterna</i>)
IOVI	• OPTIMO •	MAXIMO
PVRPVRIONI		

It is commonly assumed that Iupiter *Purpurio* took his name from one of the three dedicants, Licinia Purpuris (Preller-Jordan *Röm. Myth.*³ i. 208 n. 1): it should be further assumed that the god was clad in purple.

² See my note in the *Journ. Hell. Stud.* 1898 xviii p. xliv f., W. Headlam *ib.* 1906 xxvi. 268 ff., F. von Duhn 'Rot und Tot' in the *Archiv f. Rel.* 1906 ix. 1 ff.

³ This conception is illustrated with a wealth of examples from ancient, mediaeval, and modern life by Dr R. Eisler *Weltenmantel und Himmelszelt* München 1910, to whose diligent collection of materials I am much indebted, though I cannot always agree with his conclusions.

⁹ Douris *frag.* 31 (*Frag. hist. Gr.* ii. 477) ap. Athen. 535 F, Plout. *v. Demetr.* 41.

in a purple garment with golden stars woven into it¹; and, as triumphing general, he would be clad in the *tunica palmata* and the *toga picta* of Iupiter². Nero after his Greek agonistic successes entered Rome in the triumphal car of Augustus, wearing a purple robe and a *chlamys* sprinkled with golden stars³. These are but a few out of many who in their day, as victorious kings or kingly victors, aped the style and claimed the honours of the sky-god. Martianus Capella in his high-flown way tells how Iupiter himself, when assuming his robes of state, 'over a garment of glittering white drew a glassy vesture, which, dotted here and there with starry eyes, shone with quick quivering fires'⁴.

In this connexion we may notice a representation of the sky, which appears repeatedly in Roman art⁵, but has been traced back to a Hellenistic source⁶. The half-length figure of a bearded man is seen holding a mantle arched above his head. E. Q. Visconti⁷ proposed to name him 'le Ciel,' *i.e.* *Caelus*, the Latin rendering of the Greek *Ouranós*; and this proposal has been universally adopted, for the mantle-bearer, though never accompanied by an inscription, clearly symbolises the sky. He is, as Prof. von Duhn observes, a Zeus-like figure⁸. Indeed, the Roman writers from Ennius downwards make *Caelus* first the grandfather and then the father of Iupiter⁹. Nay more, oriental, especially Syrian¹⁰, worshippers identified him with Iupiter himself¹¹. Hence his type affected that

¹ Appian. *Pun.* 66.

³ Suet. *Ner.* 25. Dion Cass. 63. 20 calls it *ἀλουργίδα χρυσόπαστων*, which—as J. E. B. Mayor on Iuv. 10. 38 points out—is the phrase used by Plout. *v. Aem. Paul.* 34 of the triumphal robe.

⁴ Mart. Cap. 66 dehinc vesti admodum candidae obducit amictus hyalinos, quos stellantibus oculis interstinctos crebri vibratus ignium luminabant.

⁵ O. Jahn *Archäologische Beiträge* Berlin 1847 p. 85 n. 28 and in the *Ber. sächs. Gesellsch. d. Wiss.* 1849 p. 63 ff., Matz-Duhn *Ant. Bildw. in Rom* ii. 185 no. 2711, 429 f. no. 3315 f., 445 ff. no. 3341, iii. 4 f. no. 3449, R. von Schneider in the *Arch.-ep. Mitth.* 1895 xviii. 185 f.

⁶ H. Dressel *Fünf Goldmedaillons aus dem Funde von Abukir* Berlin 1906 pp. 25—31 (extr. from the *Abh. d. berl. Akad.* 1906) makes it highly probable that the superb portrait of Alexander the Great on the obverse of a gold medallion found in Egypt (*ib.* p. 9 f. pl. 2, C), though executed in the third century A.D., reproduces with fidelity a cameo of the Hellenistic age. If so, then, as Eisler *op. cit.* i. 65 points out, the sky-god in the centre of Alexander's shield is our earliest monumental evidence of the type.

of Iupiter, who on the column of Trajan appears as a half-length figure with arched mantle launching a thunderbolt against the Dacians (fig. 34)¹—a design destined to influence both Raphael² and Michelangelo³.

By a curious duplication, not to say triplication, Caelus with his mantle spread above him is seen immediately beneath the throne of Iupiter on a sarcophagus at Amalfi (fig. 35)⁴ and on another in the Villa Medici at Rome⁵. This conception too was taken over by Christian art⁶. The famous sarcophagus of Iunius Bassus, a prefect of Rome who died in 359 A.D., shows the same

Fig. 34.

personification of the sky supporting, not Iupiter with a thunderbolt enthroned between Iuno and Minerva or between Sol and Luna, but Christ with a roll enthroned between Saint Peter and Saint Paul (fig. 36)⁷. Another fourth-century sarcophagus in the

Woermann *Geschichte der Kunst* Leipzig and Vienna 1905 ii. 58 pl. 10, and of the

Lateran Museum repeats the type¹, which was probably a stock-pattern. A last trace of it may be detected in a painting at Lucca by Fra Bartolommeo. God the Father, enthroned in heaven, uplifts his right hand in blessing and holds in his left an open book inscribed A ω . Beneath his feet is a small cherub over-arched by drapery².

Fig. 37.

Fig. 38.

That such drapery really represents the sky may be proved by the fact that on a coin commemorating the *consecratio* or apotheosis of the elder Faustina (fig. 37)³ the empress, carried up to heaven by the eagle of Jupiter, has the same wind-blown mantle spangled with stars. Again, the drapery held by Caelus in a relief at Berlin (fig. 38)⁴ is not merely an arc, but almost a complete circle enclosing other concentric circles—an obvious symbol of the sky.

⁴ *Ant. Skulpt. Berlin* p. 364 f. no. 900, a fragmentary relief of white Italian marble. The subject is uncertain: two female figures approach Iupiter, and one of them clasps his knees (in supplication?); the god is seated on the top of a square pillar, Caelus appearing below his footstool.

§ 3. Zeus Lŷkaios.

(a) Wolf-god or Light-god?

On the summit of Mount Lykaion in Arkadia was a far-famed cult of Zeus Lŷkaios. Tradition said that Lykáon, son of Pelasgos, had founded the town of Lykósoura high up on the slopes of the mountain, had given to Zeus the surname of Lŷkaios, and had instituted the festival called Lŷkaia¹. On the significance of this group of names scholars are by no means agreed. Some take them to be pre-Greek or non-Greek². Thus Fick maintains that they represent a Hittite tribe to be identified with the Lycaonians and Lycians of Asia Minor³, while Bérard argues for a Phoenician cult comparable with that of Baal⁴. Most critics, noting the essentially Greek aspect of the names in question, are content to seek an explanation in the language of Greece. But even here opinions are divided. Some, starting from the undeniable fact that the wolf (lŷkos) plays a part in the local myths⁵, hold that Zeus Lŷkaios was in some sense a 'Wolf-god.'⁶ This view, however, is open to a grave objection. The word Lŷkaios cannot

Hartung *Die Religion und Mythologie der Griechen* Leipzig 1865—1866 iii. 6, 26 ff., W. Mannhardt *Wald- und Feldkulte*² Berlin 1904—1905 ii. 342, 346.

⁵ *Infra* pp. 70 ff., 77 ff.

⁶ F. Creuzer *Symbolik und Mythologie*³ Leipzig and Darmstadt 1841 iii. 76 f. Λύκαιος = Λυκόβρογος, Luperkus, 'Protector against the Wolf.' J. A. Hartung *op. cit.* iii. 6, 27 n. 45 Λυκαῖος, 'Wolf-god,' the wolf (λύκος connected with λύσσα) denoting fierceness. O. Jahn 'Über Lykoreus' in the *Ber. sächs. Gesellsch. d. Wiss.* 1847 Phil.-hist. Classe p. 423 drew a parallel between Zeus Λύκαιος of Mt. Lykaion and Zeus Λυκόβρογος of Mt. Parnassos (Steph. Byz. *s.v.* Λυκόβρογος), pointing out that in the myths of both localities the 'wolf' symbolises the exiled founder of the cult. W. Immerwahr *Kult. Myth. Arkad.* i. 21 ff. and W. H. Roscher in the *Jahrb. f. class. Philol.* 1892 xxxviii. 705 follow O. Jahn. O. Gruppe *Gr. Myth. Rel.* p. 805 likewise takes Zeus Λύκαιος to be Zeus god of 'wolves' *i.e.* exiles (*ib.* p. 918 n. 7). H. D. Müller *Ueber den Zeus Lykaios* Göttingen 1851 p. 13 ff. and in his *Mythologie der griechischen Stämme* Göttingen 1857—1861 ii. 78 ff. Λυκαῖος, 'Wolf-god,' the wolf being a symbol of his chthonian character (*ib.* p. 93 f.). V. Jurgiewicz *De Jove Lycæo* Odessæ 1859 pp. 1—32 reaches the same conclusions as H. D. Müller, adding Slavonic and Germanic parallels (*ib.* p. 19 ff.).

Others with more circumspection abandon the slippery path of symbolism. W. Mannhardt *Wald- und Feldkulte*² ii. 336 ff. explains the Λύκαια as a solstice-festival involving a procession of 'Harvest-wolves' (*cp.* the *Hirpi Sorani*). W. Robertson Smith in *The Encyclopædia Britannica*⁹ Edinburgh 1886 xxi. 136 *s.v.* 'Sacrifice,' *Lectures on the Religion of the Semites*³ London 1907 p. 366 n. 5, regards Zeus Λύκαιος as the god

be derived from *lykos*: it must be an adjective formed from a substantive *lyke*¹. But there is in Greek no such word as **lyke*, 'wolf'; and, if there were, it would mean 'a she-wolf', whereas the myths of Mount Lykaion mention none but he-wolves. Far more probable is the theory of those who understand *Lykaios* as 'god of Light'. The word *lyke* is quoted by Macrobius as an old Greek word for 'day-break', and its compound *amphi-lyke* is used in the *Iliad* of 'twi-light'. They belong to a well-known family of words with

of a totemic Wolf-clan. L. R. Farnell *Cults of Gk. States* i. 41 is disposed to accept his theory. J. G. Frazer on Paus. 8. 38. 7 (iv. 386) says: 'The connexion of Lycaean Zeus with wolves is too firmly established to allow us seriously to doubt that he is the wolf-god.' C. W. Vollgraff *De Ovidi mythopoeia* Berolini 1901 pp. 5—36 holds that the ritual of Zeus *Λύκαιος* and the myth of *Λυκάων* presuppose the Arcadian cult of a sacred wolf, to which human victims were offered.

¹ Adjectives in *-aios* naturally derive from *a-* stems. The only exceptions are words like *όδαίος*, *νησαίος*, *κηπαίος*, which have been formed on the analogy of *άγοραίος* etc. and so go back to locatives in *-ai* (K. Brugmann *Griechische Grammatik*³ München 1900 p. 181: see also F. Bechtel in Collitz-Bechtel *Gr. Dial.-Inscr.* iii. 2. 507 no. 5295 and O. Hoffmann *Die Makedonen* Göttingen 1906 p. 173 f.). But *Λύκαιος*, even if we write it as *Λυκαίος*, can hardly be thus explained as a locative formation.

² 'A she-wolf' is regularly *λύκαινα* (cp. *κάπραινα*), never **λύκη*. See W. Pape *Etymologisches Wörterbuch der griechischen Sprache, zur Übersicht der Wortbildung nach den Endsyllben* Berlin 1836 p. 36. *Lyk. Al.* 481 *λυκαινομόρφων* *Νυκτίμου* *κρεανθώνων* is criticized as a gross blunder by Tzetzes *ad loc.* *ό πράγος* (*sic*) *κακώς* *έφη*: *λυκομόρφων* *γάρ* *άφειλεν* *είπειν*: *ού γάρ* *λύκαινας*, *άλλά* *λύκοι* *γεγύνασιν* *οι* *Λυκάωνος* *παίδες* *κατά* *τούτων*.

Welzel *De Iove et Pane dis Arcadicis* Vratislaviae 1879 pp. 4, 22 ('*luce enim clarius est Iovem* 'Αμάριον eundem esse ac Diespitrem et *Λυκαίον* eundem ac *Lucetium*') cp. Macrobi. *Sat.* i. 15. 14), Preller-Robert *Gr. Myth.* i. 127. E. Meyer *Forschungen zur alten Geschichte* Halle 1892 i. 61 (followed by C. Albers *De diis in locis editis cultis apud Graecos* Zutphaniae 1901 p. 33 f.) argues that 'ein in Wolfsgestalt verehrter Gott zum Lichtgott Zeus geworden ist,' but that the names *Λύκαιος*, *Λυκάων*, etc. 'sind Ableitungen von dem verschollenen nomen *λυκα* (*λυκη*) "Licht (Tag?)," und haben mit *λυκο*-s...nichts zu thun.' The latest and most efficient champion of the 'light'-theory is H. Usener *Götternamen* Bonn 1896 pp. 177—216, who holds that *Λύκος* was an ancient god of light replaced by Zeus *Λυκαίος* and Apollon *Λύκειος* or *Λύκος*.

⁴ Macrobi. *Sat.* i. 17. 37 ff. *prisci Graecorum primam lucem, quae praecedit solis exortum, λυκην appellaverunt από του λευκού. id temporis hodieque λυκόφως cognominant. Etc.*

T. παρά την λύγην, ό έστι σκιαν. και λυκόφως τό μεταξύ σκότους και φωτός, and Eustath. *in Il.* p. 689, 15 ff. *τό παρ' ήμιν ιδιωτικώτερον λεγόμενον λυκόφως*, adding derivations from *λύγη* 'darkness' and *λυκή* 'a wolf-skin' as also *ib.* p. 809, 40 ff.*

numerous relatives in both Greek and Latin¹. Indeed, our word 'light' is of kindred origin.

But etymology, unless supported by ritual and myth, can afford no certain clue to the nature of an ancient deity. Fortunately in the present case that support is forthcoming. Zeus *Lýkaios* was sometimes at least conceived as a sky-god, for his priest acted as rain-maker to the district². Again, Achaïos the tragedian, a younger contemporary of Sophokles, appears to have spoken of Zeus *Lýkaios* as 'starry-eyed' (*astérōpos*)³. An epithet of similar formation and of the same meaning (*asterōpós*) is used by Euripides of the *aithér* or 'burning sky' in connexion with Zeus⁴. This suggests that Zeus *Lýkaios* was a god of the *aithér*. Indeed, Creuzer long since pointed out that Zeus *Lýkaios* is none other than the Arcadian Zeus⁵, whom Cicero and Ampelius describe as the son of *Aether*⁶. H. Usener further observes that, just as a Boeotian myth makes Lykos succeed his brother Nykteus on the throne⁷, so the Arcadian myth makes Lykaon succeeded by his son Nyktimos, the inference being that both pairs of names denote the alternation of 'daylight' (*lyk-*) and 'darkness' (*nykt-*)⁸. If Zeus *Lýkaios* was thus a god of daylight, certain statements made by Pausanias *à propos* of his cult gain a fresh significance. *Lykósoura* founded by *Lykáon* was 'the first city that ever the sun beheld.'⁹

¹ Prellwitz *Etym. Wörterb. d. Gr. Spr.*² pp. 266, 275 cites for the stronger form of the root the Latin *lūx, lūceo, lūna*, for the weaker the Greek ἀμφιλίκη, λυκάβας 'year' (lit. 'light-circuit': Fick in the *Gött. Gel. Anz.* 1894 clvi. 240 cp. Hesych. ἄβα' τροχός), λυκανυγής 'twi-light,' λυκόφως 'twi-light,' λυχνος 'lamp,' etc. See further L. Meyer *Handb. d. gr. Etym.* iv. 519 ff., who adds λυκοψία 'twi-light,' and Walde *Lat. etym. Wörterb. s.v.* lūceo p. 349 f., who connects λυγδός 'white marble' with the same group of words.

⁸ H. Usener *Götternamen* p. 199. The myths are collected and analysed in Roscher *Lex. Myth.* ii. 2169 ff., 2183 ff., iii. 492 ff., 498 f. W. H. Roscher *Selene und Verwandtes* Leipzig 1890 p. 140 ff. regards Nykteus and Lykos as personifications of the Evening- and the Morning-star: he is followed by Wörner in the *Lex. Myth.* iii. 496 f.

⁹ Paus. 8. 38. 1.

On the very top of Mount *Lykaion* was a mound of earth, known as the altar of Zeus *Lykaios*, from which the greater part of the Peloponnese was visible: before the altar stood two columns bearing gilded eagles and 'facing the sun-rise'. Finally, Pausanias says: 'Of the wonderful things to be seen on Mount *Lykaion* the most wonderful is this. There is a precinct of Zeus *Lykaios* on the mountain, and no man is allowed to enter it. Should any one disregard the rule and enter, he cannot possibly live longer than a year. It was said too that within the precinct all things, both beasts and men, alike cast no shadow. Consequently, when a beast takes refuge in the precinct, the hunter will not break in along with it, but waits outside and looking at the beast sees no shadow cast by it. Now at Syene on the frontier of Aithiopia, so long as the sun is in the sign of Cancer, shadows are cast neither by trees nor by animals; but in the precinct on Mount *Lykaion* there is the same lack of shadows at all times and seasons². This marvel, which is attested by other grave and respectable authors³, though sceptics were not wanting⁴, probably hangs together with the Pythagorean belief that 'the souls of the dead cast no shadow and do not wink⁵.' The shadowless creature would on this showing be the man or beast already devoted to death. Dr Frazer, commenting on the passage quoted above from Pausanias, writes: 'Untutored people often regard the shadow as a vital part of a man and its loss as fatal. This belief is still current in Greece. It is thought that to give stability to a new building the life of an animal or a man is necessary. Hence an animal is killed and its blood allowed to flow on the foundation stone, or the builder secretly measures a man's shadow and buries the measure under the foundation stone, or the foundation stone is laid upon a man's shadow. It is supposed that the man will die within a year—obviously because his shadow is believed to be buried under the

¹ Paus. 8. 38. 7, cp. Pind. *Ol.* 13. 152 ff. with schol. *ad loc.* and *ad Nem.* 10. 87, Polyb. 4. 33. 2, and *infra* p. 83 f. L.-F. A. Maury *Religions de la Grèce* i. 59, following K. O. Müller *Prolegomena zu einer wissenschaftlichen Mythologie* Göttingen 1825 p. 290 f. and W. Bäumlein in the *Zeitschrift für die Alterthumswissenschaft* 1839 vi. 1193, inferred that Zeus *Λυκαίος* was a solar god. But K. Schwenck in the *Rhein. Mus.* 1839 vi. 541 f. already urged that he was a light-god rather than a sun-god.

² Paus. 8. 38. 6.

³ Theopompus *ap.* Polyb. 16. 12. 7 quoted below, schol. Kallim. *h. Zeus* 13 πάντων ζώων εἰσὶν ἐκεῖ (sc. to the birth-place of Zeus on the mountain in Parrhasia) μεμολυσμένον ἄγονον ἐγγίγνεται καὶ σκιάν τὸ σῶμα αὐτοῦ οὐκέτι ἐπολεῖ.

⁴ Polyb. 16. 12. 7, Plout. *quaest.* Gr. 39.

building'. Trespassers on the precinct of Zeus *Lýkaios* not only lost their shadows, but were actually put to death². Plutarch states that such persons were called 'deer' (*élaphoi*)³, that if they had entered the precinct voluntarily they were stoned to death, and that if they had entered it through ignorance they were sent away to Eleutherai⁴. But, if the ultimate explanation of the shadowless precinct on Mount *Lýkaion* lies in the connexion once thought to exist between shadow and soul, it by no means follows that this was the explanation given by Greeks of the classical period. They may well have forgotten the real meaning of a belief to which they still clung and have attributed it to some irrelevant cause. That is what in point of fact they did. Polybios the historian, who as a native of Megalopolis would take a personal interest in matters Arcadian, writes as follows anent certain Carian superstitions: 'It appears to me that such tales are only fit to amuse children, when they transgress not merely the limits of probability but those of possibility as well. For instance, to assert that some bodies when placed in light cast no shadow argues a state of extreme obtuseness. Yet Theopompus has done this; for he declares that those who enter the holy precinct of Zeus in Arkadia cast no shadow, which is on a par with the statements that I mentioned just now⁵'. Theopompus, then, the historian of Chios, explained the miracle of Mount *Lýkaion* by saying that beasts and men on the summit cast no shadow because they were there 'placed in light⁶'. This can only mean that a divine light encircled the mountain-top and made all shadows impossible. Mount *Lýkaion*, in fact, resembled

¹ J. G. Frazer on Paus. 8. 38. 6 (iv. 384), citing B. Schmidt *Das Volksleben der Neugriechen* Leipzig 1871 i. 196 f. See also *infra* ch. i § 6 (g) vi. The way for this explanation was prepared by Plout. *loc. cit.*, F. G. Welcker *Kleine Schriften* Bonn 1850 iii. 161, E. L. Olympos as described in the *Odyssey*¹, and was itself called Olympos. Pausanias says; 'They speak of it also as Olympos, while others of the Arcadians name it the Sacred Peak².' This Olympic glory, though not, as Theopompos presumably held and as Roscher³ certainly holds, the true explanation of the shadowless precinct, would be in thorough keeping with the character of Zeus *Lýkaios* as a god of light.

(b) Peloponnesian coin-types of Zeus *Lýkaios*.

It is almost certainly Zeus *Lýkaios* whose figure appears on the federal silver coinage of Arkadia throughout the greater part of the fifth century B.C.⁴ These coins bear on their reverse side the legend *Arkadikón*, more or less abbreviated, and appear to have been struck by the Heraeans as presidents of the national Arcadian games held on Mount *Lýkaion*⁵. Early specimens show Zeus seated on a throne with a *himátion* wrapped about his waist: he holds a sceptre in one hand, and over the other flies an eagle (figs. 39, 40)⁶. On later specimens the back of the throne terminates in a swan's neck (figs. 41, 42)⁷, and the eagle occasionally flies *to-wards* Zeus (fig. 43)⁸. Sometimes a thunderbolt is held on the lap of the god (figs. 43, 44)⁹. Sometimes, but rarely, he is repre-

⁴ F. Imhoof-Blumer in the *Zeitschr. f. Num.*, 1874 i. 128 n. 3, *ib.* 1876 iii. 288 f. pl. 7, 1 (in the Hague collection), *cp. ib.* 1875 ii. 6, 139 ff., 246 ff., and in the *Num. Zeitschr.* 1884 xvi. 264 pl. 5, 7 (at Klagenfurt, from the same die). I figure the latter specimen.

be commonly supposed that the rock inscribed *Oly-* or *Olym-* was the Arcadian Olympos, *i.e.* Mount *Lýkaion*. Prof. Brunn alone maintained that the inscription was the signature of the die-engraver¹. Since the publication of the specimens reading *Chari-* Brunn's view has met with almost universal acceptance². Recently, however, Dr Head has suggested that *Olym-* and *Chari-* may be abbreviated names of festivals for which the coins were issued³. Still, the old view is not definitely disproved. It remains possible that the name of the mountain, placed on the coin for purposes of identification⁴, was afterwards replaced by the name of a self-satisfied engraver.

✱ (c) Human sacrifice to Zeus *Lýkaios*.

Across the brightness of Mount Lykaion we have already seen one cloudlet pass. Such was its awful sanctity that the wilful intruder upon the holy ground was doomed to die, while even the unintentional trespasser must needs be banished. But those who knew more intimately the ritual of the mountain-top were aware that a gloom far deeper than this habitually hung about it. There is indeed a persistent rumour of human sacrifice in connexion with the cult. For the said ghastly tradition Platon is at once our earliest and our most explicit authority. Sokrates in the *Republic* remarks that at the sanctuary of Zeus *Lýkaios* he who tasted the one human entrail, which was cut up and mixed with the entrails of other victims, was believed to become a wolf⁵. The author of the Platonic *Minos* implies that human sacrifice occurred on Mount Lykaion⁶; Theophrastos—as quoted by Porphyrios and Eusebios—states that it was offered at the festival of the Lykaia⁷. Pausanias

¹ H. Brunn *Geschichte der griechischen Künstler* Stuttgart 1859 ii. 437.

² *E.g.* F. Imhoof-Blumer *loc. cit.*, Head *Hist. num.*¹ p. 373.

³ Head *Hist. num.*² p. 445 *cp.* ΟΛΥΝΠΙΚΟΝ on coins of Elis, and suggests the 104th Olympiad celebrated by the Arcadians in 364 B.C. He interprets ΧΑΡΙ of the Charisia or Charitesia, festivals of the Charites, and notes that Charisios was the founder of Charisiai in Arkadia (Paus. 8. 3. 4).

⁴ *Cp.* ΠΕΙΩΝ on a coin of Ephesos figured *infra* ch. i § 5 (b). It should also be noticed that the reverse-type of a unique tetradrachm of Messana, now at Berlin, shows a similar figure of Pan, with his *lagobblon* and a hare (symbol of the city): the god is seated on a rock, over which he has thrown his fawn-skin, and by him is the inscription ΠΑΝ (G. F. Hill *Coins of Ancient Sicily* London 1903 p. 130 f. pl. 8, 15). If ΠΑΝ describes Pan, presumably ΟΛΥΜ may describe Olympos.

⁵ Plat. *rep.* 565 D, *cp.* Polyb. 7. 13. 7, Isid. *origg.* 8. 9. 5.

veils the ugly fact by a decent circumlocution: 'On this altar they offer secret sacrifices to Lycaean Zeus, but I did not care to pry into the details of the sacrifice. Be it as it is and has been from the beginning¹.'

The concurrent testimony of these writers may be held to prove that Zeus *Lykaios* was indeed served with human flesh, but it hardly enables us to determine how long this hideous custom survived. Theophrastos, who succeeded Aristoteles as head of the Peripatetic school in 322 B.C., says—'up to the present time'; and he is in general a trustworthy witness. But whether we can infer from the guarded language of Pausanias that five centuries later, in the reign of the refined and philosophical Marcus Aurelius, the same gruesome rite was still kept up seems to me at least very questionable². It would of course be talked about for many generations after it had been as an actual practice mitigated, superseded, or simply discontinued.

We should like to know more of the cannibal who was turned into a wolf. And here fortunately further evidence is forthcoming. We have in fact three parallel accounts, which deserve to be studied side by side. They unfold a most remarkable sequel:

PLINY

nat. hist. 8. 81—82.

'Euanthes, who holds a high place among the authors of Greece, reports the following tradition as derived from Arcadian writings. A man belonging to a clan descended from a certain Anthos is chosen by lot and led to a particular pool in that locality. Here he hangs his clothes on an oak-tree, swims across, and goes off into desert places, where he is transformed into a wolf and for nine years associates with

SAINT AUGUSTINE

de civ. Dei 18. 17.

'To prove this, Varro narrates other equally incredible tales—that of the notorious magician Kirke, who likewise changed the comrades of Odysseus into animals, and that of the Arcadians, who were taken by lot, went across a particular pool, and there turning into wolves lived with beasts like themselves in the desert places of that locality. But, if they did not feed on human flesh, then

PAUSANIAS

6. 8. 2.

¹ Paus. 8. 38. 7 trans. J. G. Frazer.

² From Plin. *nat. hist.* 8. 82 Scopas qui Olympionicas scripsit narrat Demaenetus Parrhasium in sacrificio, quod Arcades Iovi Lycaeo humana etiamtum hostia faciebant, immolati pueri exta degustasse etc. (*infra* p. 72 n. 3) E. Meyer *Forschungen zur alten Geschichte* Halle 1892 i. 53 n. 1 infers that the human sacrifice, still kept up in the days of Demainetos, had been already abandoned when the *Olympionicae* was written.

PLINY

nat. hist. 8. 81—82.

other wolves of the same sort. If during this time he has abstained from attacking men, he returns to the same pool and, having swum across it, gets back his shape looking nine years older than before. The story adds that he resumes the same clothing. The lengths to which Greek credulity will run are really amazing. Any falsehood, however outrageous, has its due attestation.

Again, Skopas, writer of a work on *Olympic Victors*, relates that Demainetos the Parrhasian at a human sacrifice, which the Arcadians were even in his day making to Zeus *Lýkaios*, tasted the entrails of the boy that had been immolated and thereupon turned into a wolf; but that in the tenth year he was restored to athletics, came back, and won a victory in the boxing-match at Olympia.¹

SAINT AUGUSTINE

de civ. Dei 18. 17.

after nine years had gone by they swam once more across the same pool and were transformed into men again.

In conclusion he has actually mentioned by name a certain Demainetos, asserting that he, having tasted the sacrifice of an immolated boy, which the Arcadians were wont to make to their god *Lýkaios*, was thereupon changed into a wolf; and that in the tenth year he was restored to his own form, practised boxing, and won in a match at Olympia.²

PAUSANIAS

6. 8. 2.

‘As to a certain boxer named Damarchos, a Parrhasian of Arkadia by race, I was not prepared to believe—with the exception of his victory at Olympia—the story told by sundry braggarts. For they say that he changed from a man into a wolf at the sacrifice of Zeus *Lýkaios*, and that in the tenth year afterwards he became a man again.’

Pliny and Saint Augustine are obviously drawing from the same well, *viz.* Varro¹. Only, whereas Pliny cites Varro’s sources without Varro’s name, Saint Augustine cites Varro’s name without Varro’s sources. The sources in question are both satisfactory for our purpose—the ascertaining of popular belief. Euanthes was an author of repute, and moreover bore a name which is known to have occurred in Arkadia²: he professedly follows Arcadian writers. Skopas³ was probably wrong about the victor’s name;

¹ Varro *de gente populi Romani frag.* 17 (*Hist. Rom. frag.* p. 233 f. Peter).

² Collitz-Bechtel *Gr. Dial.-Inscr.* i. 357 no. 1247 B 3 cp. 20.

C. Müller *Frag. hist. Gr.* iii. 11 no. 33 would read *Neanthes* for *Euanthes*. But see Jacoby in *Pauly-Wissowa Real-Enc.* vi. 846.

³ C. Müller *Frag. hist. Gr.* iv. 407 suggests that Pausanias derived the story of

for Pausanias read and copied the actual inscription on the man's statue-base¹. But whether the name was Demainetos or Damarchos makes no difference to us: the story told of him is identical.

Varro's statement, as evidenced by the foregoing extracts, is twofold. It contains on the one hand Euanthes' general account of the Arcadian custom, on the other Skopas' particular exemplification of it. Comparing the two, we at once detect a discrepancy. Both agree that a man became a wolf for a period of nine years, after which he returned to human shape. But, whereas Euanthes speaks of him as having been chosen by lot, Skopas describes him as having tasted the entrails of an immolated boy. This discrepancy would indeed vanish altogether, if we assumed that the method of selection indicated by Platon in a passage already quoted—'he who tasted the one human entrail,' etc.—might be viewed as a kind of cleromancy or sortition. But it is better to suppose that the casting of lots was a later and more civilised substitute for the arbitrament of the cannibal feast.

Be that as it may, Euanthes has preserved various details of primitive import. He tells us that those who thus cast lots among themselves (and therefore, presumably, those who at an earlier date gathered about the banquet of human flesh) belonged to a clan descended from a certain Anthos. Now H. W. Stoll² and J. Töpffer³ have pointed out that the names *Ánthos*, *Ánthas*, *Ánthes*, *Ántheus* were given in sundry parts of the Greek world to mythical figures of a common type—the handsome youth who comes early to a cruel death just because he personifies the short-lived vegetation of the year⁴. One of these 'Flower'-heroes, Anthas or

Damarchos from Euanoridas of Elis, whose *Ὀλυμπιονίκαι* he had just mentioned (Paus. 6. 8. 1). Müller further conjectures that in Plin. *nat. hist.* 8. 82 we should read *itaque Euanoridas qui Olympionicas scripsit* (MSS. *item* or *ita* or *itaque copas*, whence Jan cj. *Scopas*, Schwartz in Pauly-Wissowa *Real-Enc.* i. 896 *Harpocras*, Gelenius *Agriopas*). But again see Jacoby in Pauly-Wissowa *Real-Enc.* vi. 845, and cp. Plin. *nat. hist.* index to 8 *Euanthe apoca* or *apocha* (so MSS.: *Scopa* Jan, *Agriopa* Gelenius, *Agrippa* vulg.) *qui Ὀλυμπιονίκας*. Immerwahr *Kult. Myth. Arkad.* p. 13 f. pushes Müller's speculation one stage further and proposes to identify Euanthes with Euanoridas, whom he calls 'Euanoridas-Euagriopas-Euanthes Agrippa'!

¹ Paus. 6. 8. 2. Both *Δαμαλveros* (Collitz-Bechtel *op. cit.* i. 352 no. 1231 B 26, 38, C 42) and *Δάμαρχος* (*ib.* i. 341 no. 1189 A *minor* 15, 358 no. 1246 D 4) are Arcadian names.

² H. W. Stoll in Roscher *Lex. Myth.* i. 369 f.

³ J. Töpffer in Pauly-Wissowa *Real-Enc.* i. 2358.

⁴ Thus Anthos, son of Hippodameia and Autoonos the ruler of a neglected and therefore barren land, was attacked and eaten by his father's horses, which he had driven from their scanty pasture: he was transformed by Zeus and Apollon into the bird *ἀνθος*, and as such still retains his hostility to horses (Ant. Lib. 7: see also D'Arcy W.

Anthes, the son of Poseidon, was driven out of Troizen and founded Halikarnassos¹. His descendants the Antheadai² formed a priestly clan which, as we happen to know from an inscription found at Halikarnassos³, managed the cult of Poseidon in that city for over five hundred years. Poseidon was worshipped at the mother-city Troizen as Poseidon *Phytálmios*⁴, so that the functions of the Antheadai were almost certainly concerned with the propagation of vegetable life⁵. Arguing from analogy, I conclude that in Arkadia likewise the descendants of Anthos were a priestly clan charged with the upkeep of vegetation in connexion with the cult of Zeus *Lýkaios*⁶.

That the 'Flower'-hero might be associated with Zeus no less than with Poseidon we see from an inscription of Roman date found at Athens⁷. It is a list of persons combining to build a gymnasium 'for Zeus *Keraíōs* and Anthas.' Mr J. G. C. Anderson, who published this inscription with a careful commentary, remarked that many of the contributing members bore Boeotian names. He therefore proposed to identify Zeus *Keraíōs* with Zeus *Ámmon* of Thebes⁸ and to regard Anthas either as a separate personage, the

Thompson *A Glossary of Greek Birds* Oxford 1895 p. 33). Anthos, eponym of Anhedon or Anhedonia the old name of Kalaureia, was lost as a child but found again by his brother Hyperes acting as cup-bearer to Akastos or Adrastos at Pherai (Mnasigeiton *ap. Plout. quaest. Gr.* 19). Anthes, son of Poseidon and eponym of Anthana, was slain by Kleomenes, brother of Leonidas, who flayed him and wrote on his skin *τοὺς χρησμούς τηρεῖσθαι* (Philostephanos *frag.* 8 *ap.* Steph. Byz. *s.v.* 'Ανθάνα: but see C. Müller's note in *Frag. hist. Gr.* iii. 30). Antheias, son of Eumelos, was killed by falling from the car of Triptolemos (*infra* ch. i § 6 (d) i (β)). Antheus, son of Antenor, was a beautiful youth loved by Deiphobos and Alexandros, but accidentally struck and slain by the latter (Tzet. *in Lyk. Al.* 132). Antheus, a prince of Halikarnassos, served as a hostage under Phobios, ruler of Miletos: Kleoboia or Philaichme, wife of Phobios, loved him and, unable to compass her desires, asked him to recover a tame partridge or a golden trinket for her from a deep well, and while he was doing it dropped a heavy stone on the top of him (Parthen. *narr. am.* 14).

⁸ Paus. 9. 16. 1, cp. Kaibel *Epigr. Gr.* no. 833. 1 "Ἄμμωνος κεραϊοῖο (Alexandreaia), no. 835. 5 "Ἄμμωνος κερασοῦ (Beirút), Phaistos *ap. schol. Pind. Pyth.* 4. 28 *Ζεὺς Λιβύης Ἀμμων κερατηφόρε.*

eponym of Anthedon in Boiotia¹, or more probably as a cult-title of Zeus comparable with that of Zeus *Anthaleús*, who is mentioned in a sacrificial calendar from the Epakria district². The cult would thus be one of a Zeus presiding over animal and vegetable fertility, a god presumably worshipped by a guild of farmers. Mr Anderson's conclusion is sound, though his premises are shaky. I doubt whether Zeus *Keraíōs* is a mere synonym of Zeus *Ammon*. His 'horns' may be those of a bull, not a ram. In that case he resembled Zeus *Ólbios*, a god of fertility who in northern Greece had bovine horns³, or Zeus *Xénios* (?) of Kypros, to whom the horned *Kerástai* were wont to sacrifice strangers till Aphrodite, offended at their savagery, changed them all into bullocks⁴. Again, O. Höfer objects that, if Anthas had been merely a cult-epithet, we should have expected a repetition of the name Zeus before it⁵. But this objection only brings into clearer light the indisputable fact that in Attiké the hero Anthas stood in intimate relation to Zeus. Anthos occupied a like position on Mount Lykaion.

Now Anthos, son of Autooos and Hippodameia, deprived his father's horses of their pasture and was therefore devoured by them⁶—a fate recalling that of Lykourgos, king of the Thracian Edonoi, who in order that his land might not remain barren was taken by his subjects to Mount Pangaion and there destroyed by horses⁷. That a similar end overtook Anthos on Mount Lykaion is at least a permissible conjecture; for the charred bones found nowadays on the summit of this mountain⁸ are said by the peasants to be 'the bones of men whom the ancients caused to be here trampled to death by horses, as corn is trodden by horses on a threshing-floor'⁹.

Conjecture apart, there is good reason to think that in time of

¹ He is called Anthas (Paus. 9. 22. 5, Steph. Byz. s.v. 'Ανθηδών), Anthios (schol. *Il.* 2. 508, Eustath. *in Il.* 271, 13 ff.), Anthedon (Steph. Byz. and Eustath. *loc. cit.*), and Anthes (Herakleid. *Pont. ap. Plout. de musica* 3); for all these local heroes are obviously one and the same.

⁹ J. G. Frazer on Paus. 8. 38. 2 (iv. 382).

drought Zeus *Lýkaios* was placated with the sacrifice of a boy. Theophrastos indeed is reported to have said that this took place 'at the Lykaia'¹—an expression which, strictly taken, denotes the regular festival celebrated probably at the beginning of May². But the context of that very passage implies that human sacrifice, at least as exemplified by the cults of the Arcadian Zeus and the Carthaginian Kronos, was not a rite recurring at stated intervals but the last resort of a starving populace, practised only when crops failed and famine was imminent³. Even then the responsible clan devolved its blood-guiltiness upon a single man, who expiated his crime by disappearing from the neighbourhood. He hung his clothes upon a certain oak, swam across an adjoining pool, and was lost to sight in the wilderness beyond. What happened to him there nobody knew. It was whispered that he became a were-wolf.

The same combination of drought, oak-tree, and water occurs again in Pausanias' account of rain-magic on Mount Lykaion. It appears that, when the ground was parched and the trees blasted by the heat, the priest of Zeus *Lýkaios* took the branch of an oak-tree, stirred with it the water of the spring Hagno, and so caused the long-desired shower to fall⁴. It can hardly be doubted that the oak-tree and the pool of the one case are the oak-tree and the spring of the other. If so, we have every right to say that

¹ *Supra* p. 70 n. 7.

Welzel *De Iove et Pane dis Arcadicis* Vratislaviae 1879 p. 23 n. 5 on the strength of Xen. 1. 2. 10 ἐνταῦθ' (at Peltai) ἔμεινεν ἡμέρας τρεῖς· ἐν αἷς Ξενίας ὁ Ἄρκας τὰ Λύκαια ἔθυσε καὶ ἀγῶνα ἔθηκε· τὰ δὲ ἄθλα ἦσαν στλεγγίδες χρυσαί· ἐθεώρει δὲ τὸν ἀγῶνα καὶ Κύρος. See also Immerwahr *Kult. Myth. Arkad.* p. 20 f.

³ Theophrast. *ap.* Porph. *de abst.* 2. 27 ἀπ' ἀρχῆς μὲν γὰρ αἱ τῶν καρπῶν ἐγίνοντο τοῖς θεοῖς θυσίαι· χρόνῳ δὲ τῆς ὀσιότητος ἡμῶν ἐξαμελησάντων, ἐπεὶ καὶ τῶν καρπῶν ἐσπάνισαν καὶ διὰ τὴν τῆς νομίμου τροφῆς ἐνδειαν εἰς τὸ σαρκοφαγεῖν ἀλλήλων ὤρμησαν, τότε μετὰ πολλῶν λιτῶν ἰκετεύοντες τὸ δαιμόνιον σφῶν αὐτῶν ἀπήρξαντο τοῖς θεοῖς πρῶτον, οὐ μόνον ὅτι κάλλιστον ἐνῆν αὐτοῖς καὶ τοῦτο τοῖς θεοῖς καθοσιοῦντες, ἀλλὰ καὶ πέρα τῶν καλλίστων προσεπιλαμβάνοντες τοῦ γένους· ἀφ' οὗ μέχρι τοῦ νῦν οὐκ ἐν Ἄρκαδιᾳ μόνον τοῖς Λυκαίοις οὐδ' ἐν Καρχηδῶνι τῷ Κρόνῳ κοινῇ πάντες ἀνθρωποθυτοῦσιν, ἀλλὰ κατὰ περίοδον, τῆς τοῦ νομίμου χάριν μνήμης, ἐμφύλιον αἷμα βάλουσι πρὸς τοὺς βωμοὺς, καίπερ τῆς παρ' αὐτοῖς ὁσίας ἐξειργασῆς τῶν ἱερῶν τοῖς περιρραντηρίοις <καλ> κηρύγματι, εἰ τις αἵματος ἀνθρωπεύου μεταίτιος. The excerpt in Euseb. *praep. ev.* 4. 16. 10 agrees with this *verbatim*, but is shorter, including only ἀφ' οὗ μέχρι τοῦ νῦν... πρὸς τοὺς βωμοὺς. The words τοῖς Λυκαίοις are, I think, either a loose expression for 'in the rites of Zeus *Lýkaios*' or—less probably—a blunder for τῷ Λυκαίῳ Δί, due to haste and inattention on the part of Porphyrios, who did not realise that τῷ Λυκαίῳ Δί is needed to balance τῷ Κρόνῳ and that both together are contrasted as extraordinary sacrifices with the ordinary ritual described in the words κατὰ περίοδον κ.τ.λ. On the other hand M. Mayer in Roscher *Lex. Myth.* ii. 1503f. holds that the words κατὰ περίοδον are corrupt and have expelled the name of some locality.

⁴ *Infra* ch. ii § 9 (a) iii.

an oak-tree sacred to Zeus *Lykaios* grew beside the spring Hagno. The primitive cults of Greece, as of other lands, constantly associated a holy tree with a holy well.

The simple folk of Arkadia were acorn-eaters¹. Pelasgos, their first king,—says Pausanias²—‘introduced as food the fruit of oak-trees, not of all oaks, but only the acorns of the *phégós* oak. Since his time some of the people have adhered so closely to this diet that even the Pythian priestess, in forbidding the Lacedaemonians to touch the land of the Arcadians, spoke the following verses:—

There are many acorn-eating men in Arcadia
Who will prevent you; though I do not grudge it you.’

Plutarch goes further and declares that there was ‘a certain kinship’ between the Arcadians and the oak-tree: they believed that they were the first of men to spring from the ground, just as it was the first of trees³. But the relation of the oak to Zeus on the one hand and to his devotees on the other is a subject to which we shall have to return. For the present I pass on, noting merely that the existence of a clan whose business it was to promote vegetation at an ancient centre of oak-worship, if viewed in connexion with this alleged ‘kinship’ between the worshippers and the tree, is a phenomenon curiously suggestive of totemism.

A rite so unusual and impressive as the human sacrifice on Mount Lykaion had of course its explanatory myth. I quote again the garrulous but profoundly interesting Pausanias. From Pelasgos, introducer of the acorn-diet, he slips on to Pelasgos’ son Lykaon, who gave to Zeus the surname *Lykaios* and founded the Lycaean games. ‘In my opinion,’ he continues, ‘Lycaon was contemporary with Cecrops, king of Athens, but the two were not equally sage in the matter of religion. For Cecrops was the first who gave to Zeus the surname of Supreme, and he refused to sacrifice anything that had life; but he burned on the altar the

³ Plout. *quaest. Rom.* 92 ἢ παλαιὸν ἀπ’ Ἀρκάδων τὸ ἔθος, οἷς ἐστὶ τις συγγένεια πρὸς τὴν δρῦν; πρῶτοι γὰρ ἀνθρώπων γεγονέναι δοκοῦσιν ἐκ γῆς, ὥσπερ ἡ δρῦς τῶν φυτῶν. That this ‘kinship’ with the oak was no mere metaphor appears from Lykophron’s mention of the Arcadians as ἐγγόνων δρυός (*Al.* 480: Tzetz. *ad loc.* has ἐκγόνων δρυός) and the myth of Arkas and the oak-nymph Chrysopeleia (*Class. Rev.* 1903 xvii. 185).

national cakes which the Athenians to this day call *pélanoi*. Whereas Lycaon brought a human babe to the altar of Lycaean Zeus, and sacrificed it, and poured out the blood on the altar; and they say that immediately after the sacrifice he was turned into a wolf. For my own part I believe the tale: it has been handed down among the Arcadians from antiquity, and probability is in its favour. For the men of that time, by reason of their righteousness and piety, were guests of the gods, and sat with them at table; the gods openly visited the good with honour, and the bad with their displeasure. Indeed men were raised to the rank of gods in those days, and are worshipped down to the present time....But in the present age, when wickedness is growing to such a height, and spreading over every land and every city, men are changed into gods no more, save in the hollow rhetoric which flattery addresses to power; and the wrath of the gods at the wicked is reserved for a distant future when they shall have gone hence. In the long course of the ages, many events in the past and not a few in the present have been brought into general discredit by persons who build a superstructure of falsehood on a foundation of truth. For example, they say that from the time of Lycaon downwards a man has always been turned into a wolf at the sacrifice of Lycaean Zeus, but that the transformation is not for life; for if, while he is a wolf, he abstains from human flesh, in the ninth year afterwards he changes back into a man, but if he has tasted human flesh he remains a beast for ever¹.

The myth of Lykaon has come down to us through various channels with a corresponding variety of detail. A useful conspectus is drawn up by O. Gruppe², from which it appears that the sacrifice was offered either by Lykaon himself (this was the common tale)³ or by his sons⁴ (a variant meant to save the face of Lykaon). The victim is described occasionally as a guest of Lykaon⁵, or a Molossian hostage⁶, more often as a child⁷ of the

neighbourhood¹, more often still as Lykaon's son² Nyktimos³ or grandson Arkas⁴. The child was according to one account sacrificed on the altar of Zeus⁵, but according to the usual version dished up for his consumption at table⁶. Punishment for this impious act fell on Lykaon, who was transformed into a wolf⁷, or struck by lightning⁸, or had his house struck by lightning while he himself became a wolf⁹. Some said that his sons suffered with him, all alike being killed by lightning¹⁰, or that they were killed by lightning and he changed into a wolf¹¹; some even said that the sons were punished as guilty and not the father¹². Many added that the flood followed in consequence of the crime¹³.

These rillets of tradition cross and recross one another with such complexity that it is difficult to map them or to make out which after all is the main stream. Nevertheless it seems certain that many, if not most, of them derive from distant sources of genuine folk-lore. Probably we shall not be far wrong, if—anticipating the results of a later section—we attempt to rewrite the story thus. Lykaon, king of the country and representative of Zeus *Lýkaios*, was as such held responsible for the weather and the crops¹⁴. If the land were distressed with drought, the king, in accordance with primitive custom¹⁵, must be put to death, passing on his divine rights and duties to a less impotent successor. In course of time this stern rule was modified¹⁶. The king might

sacrifice his son, or grandson, or the son of one of his subjects, or even, by a further relaxation, a stranger from afar in lieu of his own life. He thus discharged his original debt: but only to incur another of equal magnitude. For by slaying his son or grandson or subject he would render himself liable to the early law of bloodshed: If a man slew a member of an alien tribe or city, he must either be slain himself in return or else pay a sufficient blood price. But if he slew a member of his own tribe or city, no blood price was allowed: he must be put to death, or—it was the only possible alternative—flee into perpetual exile. The king, therefore, taken in this dilemma, sought to escape by the expedient of the common feast, which enabled him to share his guilt with others. The feasters in turn transferred it to a single member of the 'Flower'-clan. And he had forthwith to pay the penalty otherwise incumbent on the king; he had, that is, either to die the death or to flee the country.

It would seem, then, that the myth of Lykaon has in effect preserved the first stages of a custom whose final form is given in the statements of Skopas and Euanthes. Not often does an aetiological myth supply so satisfactory an *aition*. Viewing the story as a whole, we cannot but feel that the connexion of Zeus *Lýkaios* with the light sky is a more fundamental feature of it than the transformation of his worshippers into wolves. He as god of the light sky normally bestowed the sunshine and ripened the crops. They on certain rare and exceptional occasions incurred bloodguiltiness in his service and had to disappear. They might be killed, or they might be exiled. Some of our authorities declare that Zeus struck them with lightning—an appropriate end for worshippers of a sky-god². Others state that they became were-wolves—again an appropriate fate for exiles and vagabonds³. This belief in were-wolves, which has from time immemorial prevailed throughout Europe⁴ and is even now to be traced in

H. E. Seebohm *On the Structure of Greek Tribal Society* London 1895 p. 41 ff. ('The Liability for Bloodshed'). Moreover, 'the sanctity of the stranger-guest, who as early as Homer and probably much earlier was placed under the protection of Zeus, was almost as great as the sanctity of the kinsman's life, and to slay him was a religious sin, for which, according to one legend, Heracles was sold into slavery to Omphale' (Farnell *Cult. of Gr. Stat.* i. 73 with note d).

² *Étude-Lire* 1904 xv. 385 f., 1905 xvi. 324 f.

See the facts collected by Gruppe *Gr. Myth. Rel.* p. 918 n. 7.

Note also that, according to Maerzi *De valle Hadhramaut* Bonn 1866 p. 19 f. (quoted by W. Robertson Smith *Lectures on the Religion of the Semites*² London 1907 p. 88, R. Campbell Thompson *Semite Magic* London 1908 p. 57 n. 1), the Šei'ar in Hadramaut change to were-wolves in time of drought.

⁴ Recent monographs on the subject are S. Baring-Gould *The Book of Were-Wolves*

Arkadia¹, naturally attached itself to the rite of eating human flesh². And lycanthropy often involved metamorphosis for a given term of years, after which the were-wolf returned to human shape³. But nowhere else, so far as I am aware, did this superstition stand in any special relation to the cult of Zeus. I conclude, therefore, that Zeus *Lýkaios* was not essentially, but only as it were by accident, a 'Wolf'-god. His original character was that of a 'Light'-god controlling the sunshine, the rain, and the crops.

(d) The Precinct of Zeus *Lýkaios*.

In 1903 Mr K. Kourouniotes trenched the altar and laid bare the precinct of Zeus *Lýkaios*. I will here summarise the results of the excavation⁴.

The top of Mount Lykaion (fig. 50)⁵ has three crests—*Stepháni*, the highest point (about 4615 ft above sea-level); *Áe Liás*, somewhat lower (about 4550 ft); and *Diaphórti*, on which is a ruined tower, probably Turkish in origin. It is with *Áe Liás* that we are concerned. This summit takes its name from Saint Elias⁶, whose little chapel stands on the south-east edge of a small level space adjoining the crest on its south side. The level is known locally as *Tabérna* from a shop, which was once established here to supply necessaries for the saint's festival.

⁵ From a photograph kindly sent to me by Mr Kourouniotes, through whose generosity I am enabled also to make use of the unpublished photograph (pl. viii) and the illustrations in the *Ἐφ. Ἀρχ. loc. cit.*

⁶ Ἄη Λιᾶς = Ἄγιος Ἡλίας.

The altar of Zeus forms the apex of *Áe Liás*. It is circular in shape and flat like a threshing-floor, measuring 97 ft 6 ins. across. It is composed mainly of the remains of sacrifices, the rock being covered to a depth of 5 ft with a layer of ashes etc. In this layer are numerous bones, mostly those of small animals, but also of oxen and pigs: no human bones were recognised. All the bones had been burnt. Among the débris are large charred stones at

Fig. 50.

irregular intervals, lying singly or gathered together in small heaps. These served to prevent the ashes from being blown away from the exposed and wind-swept height¹. Small fragments of *phialai* and *skýphoi* dating from the fifth and fourth centuries B.C. were found in the sacrificial stratum, also two small *kotyliskoi*, sundry portions of lamps, chips of roof-tiles—one inscribed $\begin{matrix} \text{AP} \\ \text{OEI} \end{matrix}$ in lettering of the

¹ Cp. Plin. *nat. hist.* 2. 240 in Laciniae Iunonis ara sub diu sita cinerem immobilem esse perflantibus undique procellis (quoted by Kourouniotes) and the evidence collected *infra* p. 103 nn. 1—4, with regard to the summits of Olympos, Kyllene, and Athos.

Proof of the sanctity attaching to ashes has come to light at Orchomenos in Boiotia. Inside the houses of the second pre-Mycenaean stratum H. Bulle found numerous $\beta\beta\theta\theta\theta$, carefully lined with yellow clay. These pits were circular in plan and U-shaped in vertical section. They were for the most part filled with ashes, which appear to have been kept for religious reasons (H. Bulle *Orchomenos* München 1907 i. 25 ff.).

82¹

The summit of Mount Lykaion. In the foreground are the bases of the two eagle-bearing columns of Zeus.
See page 83 f., ch. page 81 n. 5.

fourth century—and an almost shapeless terra cotta bird. The metal finds included a silver coin of Aigina (c. 500 B.C.), two small tripods of beaten bronze, and an iron knife—altogether a meagre and disappointing collection.

The precinct, which occupies the level called *Tabérna*, is approximately 180 ft broad by 400 ft long. It is marked out by a line of unworked stones, a boundary that men or beasts could easily cross¹. The earth here is blackish, but has no bones in it. Kourouniotes believes that the discoloration is due to the blood of animals slain as it were on the *próthysis* before they were burnt on the altar. Perhaps a geologist or an analytical chemist could supply a less gruesome explanation. In the soil of the precinct were found fragments of roof-tiles, part of an iron chain, a large key, a greave decorated with swans and serpents in relief and inscribed ΕΝΔΑΣΑΝΕ... ...ΔΙΑΘΑΝΑΙ², a bronze statuette-base, and two bronze statuettes. One of these was a beardless Hermes (c. 490—470 B.C.) in *chitoniskos*, *chlamýs*, *pilos*, and winged boots; the other a later figure, probably of the same god, with *chlamýs* and *pétasos*³.

A little lower down than the eastern limit of the precinct Kontopoulos had discovered in 1897 two large bases about 23 ft apart, undoubtedly those of the two eagle-bearing columns mentioned by Pausanias⁴. In a gully north-east of the summit he had found also one marble drum from a Doric column of twenty flutes, and had erected it on the southern base (pl. viii)⁵. Kourouniotes continued the search, and was rewarded for his pains. He obtained other blocks belonging to the bases, which were thus proved to have resembled the three-stepped statue-bases of the fifth and fourth centuries B.C. The columns themselves were still standing in Pausanias' day, but the gilded eagles had gone⁶. Kourouniotes accounts for their disappearance as follows. He points out that in the market-place at Megalopolis Pausanias saw an enclosure of stones and a sanctuary of Zeus *Lýkaios* containing altars, two tables, and two eagles⁷; and he suggests that these

¹ 'Εφ. 'Αρχ. 1904 p. 159 f. fig. 1.

³ 'Εφ. 'Αρχ. 1904 pls. 9—10.

⁴ *Supra* p. 66 n. 1.

⁵ 'Εφ. 'Αρχ. 1904 p. 173 f. fig. 7, cp. pl. 8, 1.

⁶ Paus. 8. 38. 7 πρὸ δὲ τοῦ βωμοῦ κίονες δύο ὡς ἐπὶ ἀνίσχοντα ἐστήκασιν ἥλιον, ἀετοὶ δὲ ἐπ' αὐτοῖς ἐπίχρσοι τὰ γε ἔτι παλαιότερα ἐπεποιήντο.

⁷ Paus. 8. 30. 2 περίβολος δὲ ἔστιν ἐν ταύτῃ λίθων καὶ ἱερῶν Λυκαίου Διός, ἔσδοδος δὲ ἐς αὐτὸ οὐκ ἔστι· τὰ γὰρ ἐντός ἐστι δὴ σύνοπτα, βωμοὶ τὲ εἰσι τοῦ θεοῦ καὶ τράπεζαι δύο καὶ ἀετοὶ ταῖς τραπέζαις ἴσοι.

eagles had been carried off from the precinct on Mount Lykaion. However that may be, digging close to the northern base on the mountain-side, Kourouniotes came upon an interesting series of bronze statuettes illustrative of the cult¹.

The earliest of them, which he refers to the seventh century B.C., is a clumsy figure of Zeus with short legs and long body. The god stands erect. His raised right hand grasps a thunderbolt, his outstretched left has an eagle perched upon it (fig. 51)².

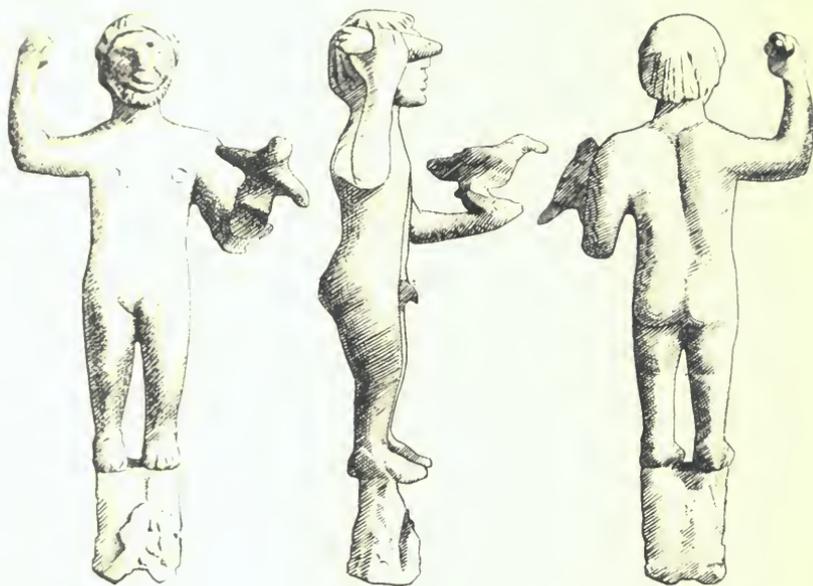

Fig. 51.

The second statuette shows Zeus striding forward with uplifted right hand and extended left. In the former there was once a bolt, in the latter perhaps an eagle (fig. 52)³. Similar statuettes, which

¹ In addition to the bronzes here described there were found two figures of Hermes, showing traces of Polykleitos' style ('*Εφ. Ἀρχ.* 1904 p. 200 ff. figs. 20-22), another in the attitude of a runner (*ib.* p. 206 fig. 24), a coiled snake with two heads (*ib.* p. 211 fig. 27), and a votive *ἀσκός* (*ib.* p. 212 fig. 28). The fact that at least three, probably four, statuettes of Hermes were found in or near the precinct requires explanation. Was there a cult of Hermes on the spot? For the dedication of one deity in the temple of another see the careful collection of facts in W. H. D. Rouse *Greek Votive Offerings* Cambridge 1902 p. 391 ff. But, as Miss Harrison has pointed out to me, T. Zielinski in the *Archiv f. Rel.* 1906 viii. 321 ff., ix. 25 ff. shows that the Hermes of the Hermetic Cosmogony came to Kyrene from Arkadia. The remaining finds included ten engraved rings, one of bronze, the rest of iron.

Fig. 52.

exemplify a type current about 480 B.C.¹, have been found at Olympia (fig. 53)² and at Dodona (fig. 54)³.

Thirdly (fig. 55)⁴ we have Zeus seated squarely on a throne, which is now lost. His hair is long and falls over his back; his beard is pointed; and his lips are drawn up in the usual archaic expression. He wears a *chiton* with short sleeves, and a *himation* draped under his right arm and over his left shoulder. His feet, which are bare, rest on a footstool. Both arms are bent at the elbow, and both hands hold attributes. In the left is the lower

Fig. 55.

half of a thunderbolt; in the right—not, as we should have expected, a sceptre—but a short rod with a knob at the bottom and a crook at the top closely resembling the Roman *lituus*, the direct ancestor of the pastoral staff still borne by our ecclesiastical hierarchy⁵.

¹ See the discussion by Miss C. A. Hutton in the *Ann. Brit. Sch. Ath.* 1896—1897 iii. 149—152 pl. 10, I.

² *Olympia* iv. 18 f. nos. 43—45 pl. 7, 43, 45, pl. 8, 44. See *infra* ch. ii § 3 (c) iv (a).

³ C. Carapanos *Dodone et ses ruines* Paris 1878 pl. 12, 4, *Stais Marbres et Bronzes: Athènes*² p. 362 no. 31. The finest specimen of this type is at Berlin: R. Kekulé von Stradonitz and H. Winnefeld *Bronzen aus Dodona in den königlichen Museen zu Berlin* 1909 pl. 1, A. Frickenhaus in the *Jahrb. d. kais. deutsch. arch. Inst.* 1911 xxvi. 30.

⁴ *Ἐφ. Ἀρχ.* 1904 p. 187 f. figs. 12—14, A. de Ridder in the *Rev. Ét. Gr.* 1906 xix. 170 f.

⁵ On the derivation of the pastoral staff from the *lituus* see the Rev. H. T. Armfield in Smith-Cheetham *Dict. Chr. Ant.* ii. 1565 ff.

Kourouniotes reminds us that, according to tradition¹, Euandros, son of Hermes, led a colony from Pallantion in Arkadia into Italy, where he built a town Pallantion on the Palatine, and introduced the cult of Pan *Lýkaios* and the festival of the Lykaia, later known as the Lupercalia. This tradition points to an early connexion between Arkadia and Italy; and it is open to us to believe that the use of the *lituos* came to the latter from the former. But what exactly was the *lituos*? In shape it differs but little from that of the ordinary crooked stick carried by old-fashioned Greeks². Monsieur H. Thédenat, after a review of the evidence, concludes—on the strength of a note by Servius³—that the augur's *lituos* may have been a royal sceptre⁴. This conclusion is borne out by the Hittite rock-carvings of Boghaz-Keui (c. 1271 B.C.), where the priestly king carries a large, reversed *lituos*⁵. I would venture one step further and suggest that the *lituos* is ultimately the conventionalised branch of a sacred tree⁶. If Zeus *Lýkaios* bears a *lituos*, it is because his sceptre, so to speak, was an oak-branch. His priest—we have seen—took an oak-branch in hand, when he acted as rain-maker on Mount Lykaion⁷. But, whether the *lituos* represents an original branch or not, it certainly serves as a quasi-sceptre. For this statuette (c. 550—500 B.C.) can hardly be dissociated from the fifth-century coinage of Arkadia, which—we have said⁸—shows Zeus *Lýkaios* seated on a throne with a sceptre in his hand. In all probability both the statuette and the coins represent the cult image of the god⁹.

¹ Pauly-Wissowa *Real-Enc.* vi. 839 ff.

² E. Saglio in Daremberg-Saglio *Dict. Ant.* i. 639 ff. A black-figured *amphora* shows Zeus enthroned with a crooked stick as sceptre (*Mus. Etr. Gregor.* ii pl. 48, 2, 2 b).

³ Serv. in Verg. *Aen.* 7. 187 *lituum*, id est regium baculum, in quo potestas esset dirimendarum litium.

⁴ H. Thédenat in Daremberg-Saglio *Dict. Ant.* iii. 1277 f. L. Siret in *L'Anthropologie* 1910 xxi. 303 would connect it with neolithic axe-handles: he sees in its form and theirs the arm of a cuttle-fish!

⁵ J. Garstang *The Land of the Hittites* London 1910 pp. 217, 229 pls. 68, 71.

⁶ Walde *Lat. etym. Wörterb.* p. 345 derives *lituus*, Gothic *lipus*, Old High German *lîd*, 'limb,' from a root **lei-l-*, 'to crook or bend,' which with another determinative gives the Old Icelandic *limr*, 'limb,' *lim*, 'branch,' and the Anglo-Saxon *lim*, 'limb, branch.'

On the royal sceptre as a conventionalised tree see *Folk-Lore* 1904 xv. 370 ff.

⁷ *Supra* p. 65; *infra* ch. ii § 9 (a) iii.

⁸ *Supra* p. 68. Specimens were found by Kourouniotes on Mt Lykaion.

⁹ The *lituos* is not elsewhere known as an attribute of Zeus. A bronze statuette found at Olympia shows him holding in his left hand a broken object, which ends below in a stud or knob. This Furtwängler *Olympia* iv. 17 pl. 7, 40, 40 a took to be the handle of a sword: Kourouniotes would restore it as a *lituos* (so also Staïs *Marbres et Bronzes: Athènes*² p. 289 f. no. 6163).

A fourth figure, more clumsy in style, gives us Zeus standing on a square base. He is clothed in a long *himation*. In his clenched right hand he holds the remains of a thunderbolt; in his clenched left, no attribute at all (fig. 56)¹.

Fig. 56.

A few other fragments—a right hand grasping part of a bolt², the fore-part of a right foot³, and an eagle with spread wings (fig. 57 *a, b*)⁴—possibly belong to a larger statue, or statues, of Zeus, and may be assigned to the early fifth century⁵.

¹ *Εφ. Ἀρχ.*, 1904 p. 193 fig. 15.

³ *Ib.* p. 194 fig. 17.

² *Ib.* p. 194 fig. 16.

⁴ *Ib.* p. 195 f. figs. 18—19.

⁵ It may here be mentioned that the British Museum possesses a silver ingot, said to have been found in Sicily, which is inscribed ΔΙΟΣΛΥΚΑ on one side, ΤΡΥΓΟΝ on the other, and was doubtless dedicated to Zeus *Lýkaios* by one Trygon (*Brit. Mus. Guide Gk. Rom. I etc.* 1908 p. 37 f. no. 70, *Inscr. Gr. Sic. It.* no. 597). The romance imagined by Roehl *Inscr. Gr. ant.* no. 523 is baseless.

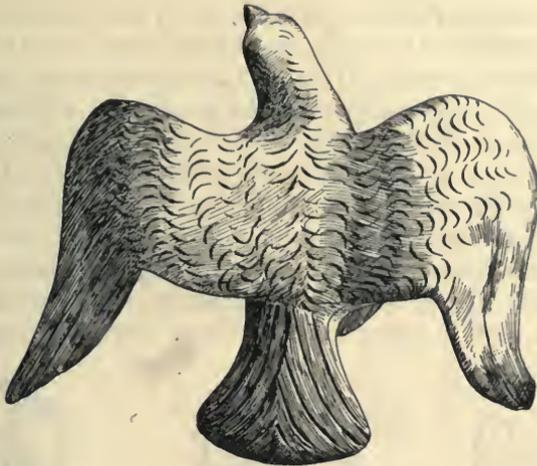

Fig. 57 a.

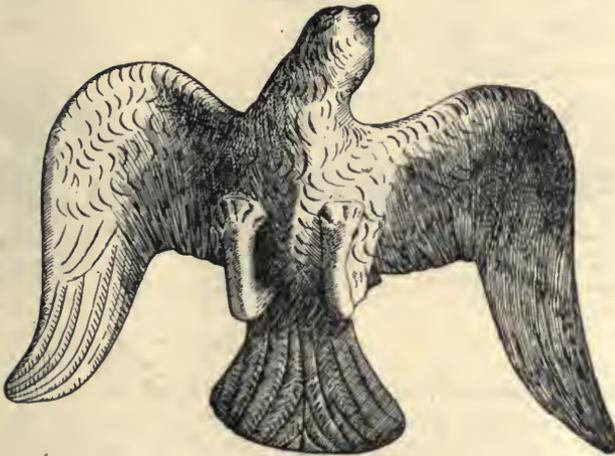

Fig. 57 b.

(e) The Cult of Zeus *Lýkaios* at Kyrene.

The cult of Zeus *Lýkaios* spread from Arkadia to Kyrene. There appears, indeed, to have been some ancestral link between these two places; for more than once Arcadians were called in to settle with authority political disputes that had arisen at Kyrene¹.

¹ Hdt. 4. 161 (Demonax of Mantinea, shortly after 550 B.C.), Polyb. 10. 22. 2 f. and Plout. v. *Philopim.* 1 (Ekdemos and Demophanes, or Megalophanes, of Megalopolis, in the third century B.C.). See also *Archiv f. Rel.* 1906 ix. 42 n. 1.

Herodotos relates that the Persian army, on its return from the capture of Barke (512 B.C.), encamped upon the 'hill of Zeus *Lýkaios*' near Kyrene¹. This certainly implies a Cyrenaic cult of that deity. Moreover, Ludvig Müller pointed out that the figure of Zeus *Lýkaios* on the early silver coins of Arkadia (fig. 43)² is reproduced on a gold *statér* of Kyrene (fig. 58)³. Here too we see the god enthroned towards the left with a sceptre in his right hand, while an eagle flies directly towards him. Other specimens of the Cyrenaic *statér* vary, as did the Arcadian coins, only with more freedom, the position of the eagle, which sometimes flies before Zeus with a snake in its talons⁴, sometimes rests on the

Fig. 58.

Fig. 59.

Fig. 61.

Fig. 62.

Fig. 63.

right hand of the god⁵, sometimes perches behind him on a stem or branch curved like a *lituos* (figs. 59, 60)⁶, and sometimes is absent altogether⁷. The remarkable adjunct of the eagle on a *lituos*-shaped branch cannot, so far as I know, be precisely paralleled.

⁵ L. Müller *op. cit.* i. 49 no. 190, Supplément p. 9 pl. 1, 190, *Bunbury Sale Catalogue* 1896 ii. 95 no. 717, *Montagu Sale Catalogue* 1896 i. 104 no. 801 pl. 10.

⁶ L. Müller *op. cit.* i. 49 nos. 185—187 fig. 185 (my fig. 59). Fig. 60 is from a specimen in the British Museum.

In the *Montagu Sale Catalogue* 1896 i. 104 no. 799 pl. 10 the eagle appears to be seated on a rock. Cp. *O'Hagan Sale Catalogue* 1908 p. 79 no. 786 (?).

⁷ L. Müller *op. cit.* i. 49 no. 189 fig. 189.

An eagle above and in contact with a transverse *lituos* is said to occur on a late bronze coin of Panormos (fig. 61)¹. But a better analogy is afforded by the eagle on a pine-tree before the seated figure of Zeus *Aitnaïos*, which appears on a unique tetradrachm of Aitne (fig. 62)², or by the eagle on a crooked bough, probably representing the oaks of Zeus *Strátios*, which is found on imperial bronze coins of Amaseia (fig. 63)³. In view of the fact that the eagle and the *lituos* were both attributes of Zeus at the precinct on Mount Lykaion⁴ the combination of the two furnishes an additional reason for believing that the throned Zeus of Kyrene was indeed Zeus *Lýkaios*⁵.

Fig. 64.

In one detail the Zeus of these Cyrenaic coins differs from the Zeus of the Arcadian coins. His free arm is consistently shown resting on the low back of his seat in an attitude of easy indolence. Now this is a trait which is not seen in any other representation of Zeus on Greek coins. In fact, the only close parallel to it⁶ in the whole range of ancient Zeus-types is the careless and yet majestic

⁶ Overbeck *Gr. Kunstmyth.* Zeus p. 161.

pose of Zeus in the Parthenon frieze (fig. 64)¹. It is, therefore, highly probable that the cult-statue of Zeus *Lýkaios* existing at Kyrene in the period to which the gold coins belong was the work, if not of Pheidias himself, at least of some sculptor much under his influence. If further evidence be required, one may point to the fact that in a temple of Helios and Selene at Byzantion there was preserved as late as the eleventh century a white marble statue of Zeus ascribed to Pheidias, of which we are told that it 'seemed to be seated on a sofa'. Whether the product of Pheidias art or not, Zeus at Kyrene reclined on his throne in an attitude of unusual repose. This, if I am not mistaken, earned for him the curious *sobriquet* of *Elinýmenos*², Zeus 'Taking his *Siesta*'³.

(f) Zeus *Lýkaios* on a Spartan ('Cyrenaic') *Kýlix*.

F. Studniczka⁴ in dealing with the cults of Kyrene observed that a seated Zeus on a 'Cyrenaic' *kýlix* in the Louvre (fig. 65)⁵ bore a striking resemblance to the seated Zeus of the Arcadian coins, and proposed to identify the former with the latter as Zeus *Lýkaios*. And such he may well be. For the force of Studniczka's comparison is in no way weakened by Mr J. P. Droop's discovery that the original home of 'Cyrenaic' ware was not Kyrene but Sparta⁷. From Mount Lykaion to the Eurotas valley was no far

⁷ *Ann. Brit. Sch. Ath.* 1907—1908 xiv. 2, 44 ff. See also R. M. Dawkins in the *Journ. Hell. Stud.* 1908 xxviii. 322 f. and in *The Year's Work in Class. Stud.* 1908 p. 17, A. J. B. Wace *ib.* 1909 p. 48 f. W. Klein *Euphronios*² Wien 1886 p. 77 had previously conjectured that the 'Cyrenaic' vases were made in Lakonike.

The subject cannot here be discussed in detail. But we must bear in mind that Sparta, as the mother of Thera, was the grandmother of Kyrene. It would not therefore be surprising to find that a ware originating in Sparta was made at Kyrene also. And this seems on the whole to be the simplest assumption in the case of the Arkesilas-*kýlix* (De Ridder *Cat. Vases de la Bibl. Nat.* i. 98 ff. no. 189). See J. R. Wheeler *A Handbook of Greek Archaeology* New York etc. 1909 p. 468 n. 1.

cry; and, if Alkman the great lyric poet of Sparta composed a hymn to Zeus *Lýkaios*¹, the Spartan potters very possibly represented the same deity on their cups. The Louvre *kylix* is on this showing the artistic counterpart of Alkman's poem. Zeus, wearing a *chiton* and tightly swathed in an ornamental *himation*, is seated on his altar—a large stepped structure of stone blocks²—, while his eagle wings its way directly towards him. The god's long hair hangs over his back, and his upper lip is shaved in genuine Spartan style³.

Fig. 65.

Another 'Cyrenaic' *kylix*, now in the Royal Museum at Cassel, shows a male figure enthroned in conversation with Hermes (fig. 66)⁴. It is at first sight tempting to regard this too as a representation of Zeus *Lýkaios*, in whose precinct sundry statuettes of Hermes were

¹ Alkman *frag.* 1 ff. Bergk⁴. Himer. *or.* 5. 3 (Alkman) *ἐτύρχαγε μὲν διὰ τῆς Σπάρτης εἰς Διὸς Λυκαίου κομίζων ἄσματα, κ.τ.λ.*

Fig. 67.

found¹. But the bird behind the throne is, as J. Boehlau remarked², merely put in to fill up the blank space and cannot pass muster as the eagle of Zeus. Moreover the vase is not to be dissociated from two others of the same sort. One of these, a *kýlix* in the Munich collection, again depicts a male figure on a lion-legged throne, conversing with similar gestures. His interlocutor is a female figure, conceived on a smaller scale and enthroned over against him. The supports of the larger throne are in the shapes of a tree and an animal—species difficult to determine (fig. 67)³. The second vase, a fragmentary *kýlix* in the British Museum, once more shows a man on a lion-footed throne. Before him stands a woman, who raises her left hand with a gesture of reverence and in her right hand presents a pomegranate (fig. 68)⁴. This last vase fortunately enables us to fix the character of the other two; for its resemblance to the contemporary funereal reliefs of Lakonike⁵ is quite unmistakable. Indeed, further inspection reveals numerous points of contact between all three vases and the reliefs in question. I conclude, therefore, that what the reliefs were in sculpture the vases were in ceramic art—a memorial of the divinised dead. This satisfactorily accounts for the enthronement

Fig. 68.

² *Jahrb. etc. loc. cit.*

³ Jahn *Vasensamml. München* p. 229 f. no. 737, *Arch. Zeit.* 1881 xxxix pl. 13, 5, F. Studniczka *op. cit.* p. 8 fig. 3.

This vase is commonly thought to represent a *genre* scene—a man talking with a woman. But on 'Cyrenaic' ware religious or mythological types predominate (H. B. Walters *History of Ancient Pottery* London 1905 i. 341), and we may fairly suspect a deeper meaning. Studniczka *op. cit.* p. 23 suggests Apollon with the Hesperid Kyrene.

The animal supporting the throne has been variously interpreted as a hare (O. Jahn *loc. cit.*) or a dog (A. Dumont—E. Pottier *Les céramiques de la Grèce propre* Paris 1884 i. 302, Reinach *Rép. Vases* i. 434).

⁴ *Brit. Mus. Cat. Vases* ii. 51 no. B 6 (Apollon? and Kyrene), Studniczka *op. cit.* p. 23 fig. 18 (Apollon or Aristaios? or Battos?? and Kyrene) and in Roscher *Lex. Myth.* ii. 1729 (Battos and Kyrene).

⁵ The best collection of facts concerning these reliefs is that given by M. N. Tod and A. J. B. Wace *A Catalogue of the Sparta Museum* Oxford 1906 p. 102 ff.

of the man and the woman, for the presence of Hermes the 'Conductor of Souls,' for the reverential attitude of the worshipper, and for her gift of a pomegranate. Finally, just as the funereal

Fig. 69.

reliefs tended towards simplification of type¹, so a 'Cyrenaic' *kylix* in the National Museum at Athens reduces the whole scene of the enthroned dead to a mere head and shoulders (fig. 69)².

(g) Zeus-like deities in wolf-skin garb.

A small bronze statuette, found in the Rhine-district and procured by F. G. Welcker for the Museum of National Antiquities at Bonn, was believed by J. Overbeck to represent Zeus *Lykaios*. The god stands erect holding a deep bowl or pot in his outstretched right hand and leaning with his raised left hand on some object now lost. He is clad over head, shoulders, and back in a wolf-skin; the fore-paws of which have been cut off, sewn on inside, and

Fig. 73.

knotted round the wearer's neck (fig. 70)¹. It will not be denied that this interesting bronze shows a Zeus-like god wearing a wolf-skin. But we shall not venture to describe him as Zeus *Lýkaios*. For there is neither literary nor epigraphic evidence to prove that the Arcadian Zeus travelled as far north as he did south. And, even if that had been the case, his cult-type was widely different from this. Rather we shall agree with S. Reinach², who ranges the Bonn statuette³ along with a whole series of bronzes representing the Gallo-Roman *Dis pater*, the ancestor—Caesar tells us⁴—of all the Gauls. Such figures regularly hold a bowl in one hand and rest the other on a long-handled mallet. Many of them also wear a wolf-skin hood (fig. 71)⁵, though the nature of the skin is seldom so clearly marked as in this example. Reinach himself suggests that the Gaulish mallet-god may have got his wolf-skin from some Greek identification of him with the Arcadian Zeus *Lýkaios*⁶. But it must not be forgotten that in Etruscan tomb-paintings at Orvieto (fig. 72)⁷ and Corneto (fig. 73)⁸ Hades likewise is coifed in a wolf-skin⁹; and from the Etruscan Hades to the Gallo-Roman *Dis pater* there is but a short step.

¹ J. Overbeck in the *Jahrb. d. Vereins v. Alterthumsfreund. im Rheinl.* 1851 xvii. 69—74 pl. 2, *id. Katalog der königl. preuss. rhein. Mus. vaterländ. Alterthümer* Bonn 1851 p. 98 no. 5, *id. Gr. Kunstmyth.* Zeus p. 266 f. Overbeck is followed by Gruppe *Gr. Myth. Rel.* p. 1116 n. 8.

Another fine specimen from Vienne (Isère) is in the British Museum (*Brit. Mus. Cat. Bronzes* p. 142 no. 788, *Gaz. Arch.* 1887 xii. 178 pl. 26).

⁶ Reinach *op. cit.* p. 141 n. 2, *cp.* p. 162 n. 8.

⁷ G. Conestabile *Pitture murali e suppellettili etrusche scoperte presso Orvieto nel 1863 da Domen. Golini* Firenze 1865 pl. 11, Roscher *Lex. Myth.* i. 1807 f.

⁸ *Mon. d. Inst.* ix pls. 15 and 15 a, W. Helbig in the *Ann. d. Inst.* 1870 xlii. 27, C. Scherer in Roscher *Lex. Myth.* i. 1805.

⁹ W. H. Roscher in the *Abh. d. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1897 xvii. 3. 44 f., 60 f. compares Lykas the hero of Temesa, who was 'horribly black' and wore a wolf-skin (Paus. 6. 6. 11) and Lykos the hero of Athens, who had the form of a wolf (Eratosth. *ap. Harpokr. s.v. δεκάζων, alib.*), arguing that in Greece as elsewhere 'die Todtengerister Wolfsgestalt annehmen.' A gold pendant seal of the sixth century B.C. from Kypros shows a male figure with the head and tail of a wolf thrusting a sword through a panther or lion (*Brit. Mus. Cat. Jewellery* p. 167 no. 1599 fig. 49 pl. 26). Furtwängler *Masterpieces of Gk. Sculpt.* p. 80 n. 1 recognises as Thanatos a winged youth with a wolf-skin or dog-skin cap, who carries off a girl on an Attic statuette-vase belonging to the end of the fifth century B.C. (*Ath. Mitth.* 1882 vii. 381 ff. pl. 12). A beardless head wearing a wolf-skin occurs on a copper coin of Sinope (H. Dressel in the *Zeitschr. f. Num.* 1898 xxi. 218 pl. 5, 6, Waddington-Babelon-Reinach *Monn. gr. d'As. Min.* i. 196 pl. 26, 15); but this, to judge from a copper coin of Amisos (*Brit. Mus. Cat. Coins Pontus* etc. xvi, 20 pl. 4, 3, *Head Hist. num.*² p. 497 (Amazon Lykastia?), Imhoof-Blumer *Gr. Münzen* p. 46 pl. 3, 20), is probably female. Furtwängler *loc. cit.* interprets

§ 4. *Zeus and Olympos.*

(a) The cult of Zeus on Mount Olympos.

Olympos was an ancient, perhaps a pre-Greek¹, name for a whole series of mountains in Greece and Asia Minor. Of the Arcadian Olympos I have already spoken. Lakonike had its Olympos near the town of Sellasia². Pisa in Elis was situated between two mountains named Ossa and Olympos³, homonyms of the greater Ossa and Olympos in Thessaly and Makedonia. A mountain near Laurion in Attike is still called Olympos⁴, as is another and loftier height near Eretria in Euboa⁵, and a third in Skyros⁶. A mountain-village in Karpathos bears the same name⁷. The Mysian Olympos is a mountain-chain forming the boundary between Bithynia and Mysia. It was sometimes confused with Mount Ide: indeed four peaks of Mount Ide opposite to the town of Antandros bore the name Olympos⁸. There was another Olympos in Galatia⁹, unless we should identify it with the Mysian range, another in Lydia¹⁰, another in Lykia¹¹, yet another in Kilikia¹². Lesbos too had its Mount Olympos¹³, and Kypros had two heights that bore that name¹⁴. Finally Panchaia, the fabulous island of Euhemeros, had an Olympos of its own¹⁵.

the head on the Amisos coin as that of Perseus wearing the cap of Hades, and similarly explains the wolf-skin or dog-skin cap of Athena in the Villa Albani (Hielbig *Guide Class. Ant. Rome* ii. 46 no. 781, Brunn-Bruckmann *Denkm. der gr. und röm. Sculpt.* pl. 226) and on two Roman monuments found near Trèves (F. Hettner *Die römischen Steindenkmäler des Provinzialmuseums zu Trier* Trier 1893 p. 20 f. no. 27 d, p. 40 f. no. 55). Cp. also the antefixes from Ruvo (*Mon. d. Inst.* iii pl. 8, b, *Ann. d. Inst.* 1839 xi. 225 ff.) and Tarentum (British Museum, Terracotta Room, case 43—uncatalogued) showing the Gorgon's head in a skin cap. For a late (s. xii?) relief of a man with a wolf's or dog's head see O. M. Dalton *Byzantine Art and Archaeology* Oxford 1911 p. 160 fig. 92.

¹ A. Fick *Vorgriechische Ortsnamen* Göttingen 1905 pp. 77, 127, 164 suggests that it may have been a Phrygian name. *Id. Hattiden und Danubier in Griechenland* Göttingen 1909 prefers to regard it as 'Pelagian.'

I

Mount Olympus (the Homeric *μακρὸς Ὀλυμπος*) from the port of Litokhoro.

[This photograph was taken by Mr A. J. B. Wace about 7.30 o'clock on an August morning, when there was still a little snow on the summit.]

See page 101.

2

Diagram showing Mount Olympus rising through the *air* into the *aithēr*.

See page 101, ff.

Of all these mountains the most important, from a religious and mythological point of view, is the great Macedonian ridge that culminates in a peak still known as *Élymbo*¹. Soaring to a height of 9,754 feet above sea-level, it affords a wide panorama: the eye travels south to Mount Parnassos, south-west to the range of Pindos, north to the confines of Makedonia, east to Mount Athos and the sea beyond². Equally striking is the view of the mountain from below³. Dr Holland, who saw it from *Litókhoros*, writes: 'We had not before been aware of the extreme vicinity of the town to the base of Olympus; but, when leaving it...and accidentally looking back, we saw through an opening in the fog, a faint outline of vast precipices, seeming almost to overhang the place; and so aerial in their aspect, that for a few minutes we doubted whether it might not be a delusion to the eye. The fog, however, dispersed yet more on this side, and partial openings were made; through which, as through arches, we saw the sunbeams resting on the snowy summits of Olympus⁴.' Dr Holland adds that these summits 'rose into a dark blue sky, far above the belt of clouds and mist that hung upon the sides of the mountain.'

The ancients were much impressed by the fact that Olympus rears its crest above the rain-clouds⁵. They fancied that birds could not fly over it⁶, and that at such an altitude the air was too thin to support human life⁷. In short, Olympus penetrated the *aér* or 'moist sky' and reached the *aithér* or 'burning sky' (pl. ix 1, 2)⁸. It was in the Greek sense of the term an 'aetherial'

¹ E. Dodwell *A Classical and Topographical Tour through Greece* London 1819 ii. 106, W. M. Leake *Travels in Northern Greece* London 1835 iii. 342, 349, 407, A. Fick *Vorgriechische Ortsnamen* p. 77.

The same form of the name *Élymbo* or *Élymbos* is given by the modern Greeks to the mountains in Attike and Euboia (*supra* p. 100 nn. 4, 5).

² L. Heuzey *Le Mont Olympe et l'Acarmanie* Paris 1860 p. 135.

³ E. Dodwell *Views in Greece* London 1821 ii. 105 has a coloured plate of *Élymbo* as seen from the south between Larissa and Baba. The views given in most books of travel and topography are very inadequate. Heuzey devotes a large illustrated volume to the mountain, but provides no picture of it at all!

⁴ H. Holland *Travels in the Ionian Isles, Etc.* London 1815 p. 302.

Fig. 74.

height¹, and therefore formed a fitting abode for Zeus the 'aetherial' god². It is sometimes stated³ that the only evidence of a Zeus-cult on Mount Olympos is the name of the town *Díon*⁴ at its foot. But that is a mistake. Maximus Tyrius informs us that 'in primitive times men dedicated to Zeus likewise, in place of statues, the tops of mountains, Olympos and Ide and any other mountain that nears the sky⁵'. An anonymous Latin mythographer records an actual cult of Zeus on Mount Olympos⁶. And sundry details concerning it are mentioned by Solinus, Plutarch and Augustine. On the summit of the mountain there was an altar to Zeus, and it was believed that offerings left upon it would not be affected by

¹ Cp. *aetherius* used of *Olympus* by Verg. *Aen.* 8. 319, 10. 621, 11. 867, Mart. *ep.* 9. 3. 3.

² *Supra* p. 26.

³ Farnell *Cults of Gk. States* i. 51.

⁴ At *Δίον* Archelaos king of Makedonia established a festival of Zeus *Ὀλύμπιος* (Diod. 17. 16, Arrian. 1. 11. 1, Ulp. *in Dem. de fals. leg.* p. 242, cp. Steph. Byz. *s.v. Δίον*, Dion Chrys. *or.* 2 p. 73 Reiske), which was celebrated also by Philippos ii (Dem. *de fals. leg.* 192, Diod. 16. 55, Dion Chrys. *or.* 2 p. 73 Reiske), and by Alexandros iii (Diod. 17. 16, cp. Arrian. 1. 11. 1), who intended to rebuild the temple there (Diod. 18. 4). The existing temple was pillaged by a band of Aetolians under Skopas in the reign of Philippos v (Polyb. 4. 62, 5. 9). In 169 B.C. the Romans under the consul Philippus treated the temple with greater respect (Liv. 44. 7). Later a Roman colony was founded at *Dium* (Ptolem. 3. 13. 15, Plin. *nat. hist.* 4. 35); and coins struck there in imperial times show Zeus standing with *phidde*, sceptre, and eagle (*Brit. Mus. Cat. Coins Macedonia* etc. p. 71, Rasche *Lex. Num.* iii. 349 f. cp. 351, Suppl. ii. 605 ff.), with a snake erect before him (fig. 84) or on either side of him (Rasche *op. cit.* iii. 350, Suppl. ii. 607), with thunderbolt and sceptre (*id. ib.* Suppl. ii. 606), standing in a distyle temple (*id. ib.* iii. 349 f., Suppl. ii. 606). The snakes occur also with the figure of Athena (*Brit. Mus. Cat. Coins Macedonia* etc. p. 71, Rasche *op. cit.* iii. 350, Suppl. ii. 605 f., 608). L. Heuzey—H. Daumet *Mission Archéologique de Macédoine* Paris 1876 Texte p. 268 identify the site of the temple of Zeus at Dion with that of the church of *Haghia-Paraskévi*.

⁵ Max. Tyr. *diss.* 8. 1 Dübner *ἐπεφήμισαν δὲ καὶ Διὶ ἀγάλματα οἱ πρῶτοι ἄνθρωποι κορυφὰς ὄρων, Ὀλυμπον καὶ Ἴδην καὶ εἰ τι ἄλλο ὄρος πλησιάζει τῷ οὐρανῷ*, cp. Loukian. *de sacr.* 10.

We must distinguish from this dedication of a mountain to a definite deity the old and originally zoistic belief that the mountain had a divine life of its own: Dion Chrys. *or.* 12 p. 405 f. Reiske *πολλοὶ τῶν βαρβάρων πενία τε καὶ ἀπορία τέχνης ὄρη θεοὺς ἐπονομάζουσι*, Max. Tyr. *diss.* 8. 8 Dübner *ὄρος Καππαδόκiais καὶ θεὸς καὶ ὄρκος καὶ ἀγαλμα*, cp. the *ἀγαλμα* of Mount Argaios on coins of Kaisareia in Kappadokia (*Brit. Mus. Cat. Coins Galatia* etc. p. xxxviii ff., G. Macdonald *Coin Types* Glasgow 1905 pp. 167 ff., 216). On the later personification of mountains in general see A. Gerber *Die Berge in der Poesie und Kunst der Alten* München 1882, Gruppe *Gr. Myth. Rel.* p. 1059 n. 2, and on that of the Mysian Olympos in particular, W. Drexler in Roscher *Lex. Myth.* iii. 859 f. Fig. 75 shows Mt Sipylos on a copper coin of Magnesia ad Sipylum in my collection (cp. *Brit. Mus. Cat. Coins Lydia* p. 141 f.): the type is probably derived from that of Zeus (see *ib.* p. 139 f. pl. 16, 2 f.).

Fig. 75.

⁶ Myth. Vat. 1. 192 Iovis Olympici, id est caelestis; qui dictus Olympicus ab Olympo monte, ubi colebatur, et poetae pro caelo ponere solent; est enim mirae altitudinis.

wind or weather, but would be found again after a year's interval precisely as they had been left¹. Every year victims were led in procession up the mountain-side, and those who led them, on reaching the top, found intact certain letters formed in the ashes on the occasion of their last visit². The same beliefs attached to Mount Kyllene in Arkadia³ and to Mount Athos in Chalkidike⁴. The Zeus-cult of Mount Olympos has even survived, in a modified form, to the present day. On the highest peak of the mountain is a small chapel of Saint Elias, built of rude stones collected on the spot. To it once a year go the monks from the monastery of Saint Dionysios in the ravine of *Litókhoros*. Their procession starts at night by torch-light, and they say a mass in the chapel on the summit⁵. Here, as elsewhere⁶, Zeus himself has been replaced by Saint Elias. But his eagle still haunts the height, at least in the popular imagination. A folk-song heard by Mr J. S. Stuart-Glennie, when ascending from the pass of Petra, makes Olympos exclaim:

¹ Solin. 8. 6 ara est in cacumine Iovi dicata, cuius altaribus si qua de extis inferuntur, nec difflantur ventosis spiritibus nec pluviis diluuntur, sed volvente anno cuiusmodi relicta fuerint eiusmodi reperiuntur: et omnibus tempestatibus a corruptelis aurarum vindicatur quidquid ibi semel est deo consecratum. After *consecratum* codd. A. P., two good manuscripts, insert *litterae in cinere scriptae usque ad (ad usque P.) alteram anni ceremoniam permanent*. Th. Mommsen does not admit this addition into his text (Berolini 1864); but at least it agrees with the authorities cited *infra* n. 2. See further *supra* p. 82 n. 1.

² Plout. *frag.* 96 Dübner *ap.* Philop. in Aristot. *met.* 1 p. 82 τὰ γὰρ ὑψηλότατα τῶν ὀρῶν ὑπερνεφῆ τέ ἐστι καὶ ὑπερήμεμα. τέφραν γὰρ ἐν τισὶ τοῦτων ἀποθέμενοί τινες ἢ καὶ ἐκ θυσῶν τῶν ἐν ἐκείνοις γενομένων ἀπολειπόμενοι, μετὰ πλείστοις ἐνιαυτοῦ περιεργασάμενοι, κειμένην εὖρον αὐτὴν οὕτως ὡς ἔθεσαν. καὶ ἐν Κυλλήνῃ δέ φασιν ('Αρκαδίας δ' ὄρος) βληθεῖσαν, μήτε ὑπὸ πνευμάτων διεσκεδασμένην. Ἰστορεῖ δὲ Πλούταρχος καὶ γράμματα μείναι εἰς ἑτέραν τῶν ἱερῶν ἀνάβασιν ἐκ τῆς προτέρας ἐν τῷ Ὀλύμπῳ τῷ Μακεδονικῷ, Aug. *de Genesi ad litt. imperf.* 1. 14 in illo autem neque nubes concrescere asseruntur neque aliquid procellosum existere, quippe ubi ventus adeo nullus est, ut in vertice Olympi montis, qui spatia huius humidi aeris excedere dicitur, quaedam litterae in pulvere solere fieri perhibeantur et post annum integrae atque illaesae inveniri ab iis qui solemniter memoratum montem ascendebant.

Probably omens were drawn not only from the flame and the smoke of the sacrifice (L.-F. A. Maury *Religions de la Grèce* Paris 1857 ii. 444 ff.), but also from the accidental arrangement of the ashes on the altar. It was customary to leave these undisturbed from one sacrifice to the next (Pers. *sat.* 6. 44 l., Plin. *nat. hist.* 2. 240).

³ Plout. *loc. cit.*, Gemin. *elem. astr.* 1. 14 (the thigh-pieces and ashes of the yearly sacrifice to Hermes on the top of Mount Kyllene are found undisturbed by those who take part in the next year's procession, because the summit is cloudless and windless).

⁴ Solin. 11. 33 (Mount Athos is believed to be too high for rain to fall on its summit, because the altars there have none of their ashes washed away and lose nothing of their bulk).

infra ch. i § 5 (f).

I seventy mountain-summits have, and two-and-sixty fountains;
 To every bush an Armatole, to every branch a Klephtë.
 And perched upon my highest peak there sits a mighty eagle;
 A mirror, in his talon grasped, he holds on high exalted,
 And in it he his charms admires, and on his beauty gazes!¹

(b) Dionysiac traits in the cult of Zeus
 on Mount Olympos.

The Zeus of Olympos was associated with other mountain powers. Such were the Muses, whose name—as Prof. J. Wackernagel has shown—is most simply derived from *mont-* ‘mountain.’ According to the orthodox tradition, the Muses were daughters of Zeus³, the Zeus of Olympos⁴, by Mnemosyne⁵; but variants are not wanting⁶, and it is permissible to suppose that in the far past Zeus had as his consort the *Moüsa* or ‘Mountain’-mother, whose pipes and timbrels were borne by a band of inspired female followers. Zeus, says Ovid⁷, took the form of a shepherd when he met Mnemosyne—a tale which recalls that of Attis and Kybele; indeed hundreds of terra-cottas representing Attis as a shepherd

¹ L. M. J. Garnett—J. S. Stuart-Glennie *Greek Folk Poesy* London 1896 i. 51 f.

The mirror probably stands for the sun. The eagle’s test of its genuine offspring was that it should look straight at the sun (D’Arcy W. Thompson *A Glossary of Greek Birds* Oxford 1895 p. 6 collects the evidence, from Aristot. *hist. an.* 9. 34. 620 a 1 ff. onwards); and certain philosophers, very possibly following popular belief, conceived the sun to be a sort of mirror (so Philolaos the Pythagorean in Stob. *ecl. phys.* 1. 25. 3 d Wachsmuth and in Plout. *de plac. phil.* 2. 20 εσπτροειδής; Empedokles *frag.* 44 Diels *ap.* Plout. *de Pyth. or.* 12, cp. Plout. *de plac. phil.* 2. 20 and *ap.* Euseb. *praep. ev.* 1. 8. 10).

² J. Wackernagel in the *Zeitschrift für vergleichende Sprachforschung* 1895 xxxiii. 571—574, Walde *Lat. etym. Wörterb.* p. 393.

This derivation (which occurred independently to Dr Giles, to myself, and doubtless to others also) is supported by the fact that all the most important cult-centres of the Muses were on mountains or hills. O. Bie in Roscher *Lex. Myth.* ii. 3239 ff. shows that their worship originated on Olympos and spread thence to Helikon (Strab. 471, Paus. 9. 29. 1—4), Delphoi, Athens, etc. Gruppe *Gr. Myth. Rel.* p. 1077 n., though not accepting the derivation from **μοντ-* ‘mountain,’ cites in its support Cornut. *theol.* 14 p. 17, 16 Lang *ἐν δὲ τοῖς ὄρεσι φασὶ χορεύειν, κ.τ.λ.* Cp. also Hes. *theog.* 54 *Μνημοσύνη γουνοῖσιν Ἐλευθῆρος μεδέουσα* with schol.

³ Already in the Homeric poems they are *κοῦραι Διὸς αἰγιόχοιο* (*Il.* 2. 598), *κοῦραι Κρονίδεω Διὸς* (*h. Sel.* 2), *κοῦραι Διὸς, ἀγλαὰ τέκνα* (Hom. *ep.* 4. 8), *Διὸς αἰγιόχοιο | θυγατέρες* (*Il.* 2. 491 f.), *Διὸς θυγάτηρ μέγαλοιο* (*h. met. th.* 2), *Διὸς πάρις* (*Od.* 8. 488).

⁴ *Ὀλυμπιάδες* (*Il.* 2. 491 and Zenodot. in *Il.* 2. 484), *Ὀλύμπια δώματ’ ἔχουσαι* (*Il.* 2. 484, 11. 218, 14. 508, 16. 112).

⁵ First in Hes. *theog.* 915 ff., *h. Herm.* 429 f., Eumelos *frag.* 16 Kinkel *Μνημοσύνης καὶ Ζηνὸς Ὀλυμπίου ἐνθά κοῦραι ap.* Clem. Al. *strom.* 6. 2 p. 430, 9 f. Stählin, *alib.*

⁶ See Gruppe *Gr. Myth. Rel.* p. 1075 n. 2.

⁷ It was as a shepherd that Zeus wooed Mnemosyne (Ov. *met.* 6. 114, Clem. Rom. *hom.* 5. 14 (ii. 184 Migne)), with whom he passed nine nights (Hes. *theog.* 56 f. with schol., Cornut. *theol.* 14 p. 17, 20 ff. Lang, Nonn. *Dion.* 31. 168 ff.).

were found by Monsieur P. Perdrizet at Amphipolis¹. Again, not only in the Muse-mother Mnemosyne, but also in the prominence originally accorded to *one* of the Muses, Kalliope² or Thaleia³, we may detect a trace of the ancient goddess, whose glory had paled before the rising light of Zeus. Kalliope was said by some to have borne children to Zeus⁴. And as to Thaleia we have evidence both monumental and literary. A red-figured vase-painting from Nola

Fig. 76.

¹ *Bull. Corr. Hell.* 1895 xix. 534, Roscher *Lex. Myth.* ii. 2906 f.

² O. Bie in Roscher *Lex. Myth.* ii. 3243 notes that in Hes. *theog.* 79 Kalliope is *πρόφερεστάτη... ἀπασέων*, and that on the François-vase (600—550 B.C.) she is distinguished from the other Muses by her full-face position and her *sphinx* (Furtwängler—Reichhold *Gr. Vasenmalerei* i. 5 pl. 1—2 ΚΑΛΙΟΠΕ). She is not named by Homer (*h. Hel.* 1 f. is late), though Eustath. in *Il.* pp. 10, 9 f. and 161, 32 ff. ep. *Il.* 1. 604 *ὄπι' καλῆ*.

³ *Infra* p. 105 f.

⁴ Strab. 472, *infra* p. 106.

formerly in the Hamilton collection (fig. 76)¹ shows Zeus as a mighty eagle in a blaze of celestial splendour carrying Thaleia from earth to heaven. The maiden has been playing at ball and picking flowers on a mountain-side. The mountain is indicated by the little Satyr on high ground. To the right are the ball and the basket of Thaleia; to the left, the flowers and the altar of Zeus, too near to which she had ventured. The myth, as preserved for us by Clement of Rome², Rufinus³, and Servius⁴, makes this Thaleia a nymph of Mount Aitne in Sicily, whom Zeus in the form of a vulture (or eagle?) wooed and won. He subsequently entrusted her to the earth-goddess, in whose domain she brought forth the twin Palikoi. In all probability Thaleia the mountain-nymph is only the romanticised Sicilian form of Thaleia the mountain-muse; and, if so, her story hints at a relationship between Zeus and the Muses other than that of the Homeric and Hesiodic tradition.

Thaleia the muse became by Apollon mother of the Korybantes⁵. Another account made their parents Zeus and Kalliope, and explained that the Korybantes were one with the mystic Kabeiroi⁶. Others declared that Korybas, eponym of the Korybantes, was a son of Iasion by Kybele⁷, the Asiatic mountain-goddess. Others again—for the theme had many variations⁸—spoke of the

⁶ Strab. 472.

⁷ Diod. 5. 49, cp. interp. Serv. *in Verg. Aen.* 3. 111.

⁸ The Korybantes were sons of Kronos and Rhea (Strab. 472 *ἔτι δὲ Κρόνον τινὲς <καὶ 'Ρέας>*: the last two words have been expelled by τοὺς Κορύβαντας repeated from the line below. Cp. schol. Aristoph. *Lys.* 558 *ἦσαν δὲ τῆς 'Ρέας παῖδες*=Soud. *s.v.* Κορύβαντες), sons of Apollon and Rhytia (Pherekyd. *ap.* Strab. 472: see Roscher *Lex. Myth.* iv. 127), sons of Helios and Athena (a Rhodian version *ap.* Strab. 472), sons of Sokos and Kombe (Nonn. *Dion.* 13. 135 ff.). Korybas was the son of Kore without a father (interp. Serv. *in Verg. Aen.* 3. 111).

Korybantes as the first men, who had sprung from the ground in the shape of trees¹. It all comes to the same thing. The Korybantes were akin to the great mountain-goddess or earth-mother, whom they served with wild enthusiastic rites. Their name, if I am not mistaken, is derived from **korybé* the Macedonian form of *koryphé*, 'a mountain-peak,' and means the 'Peak'-men². In Roman times, if not earlier, the Korybantes were connected with Mount Olympos. According to Clement of Alexandria³, they were three brothers, two of whom slew the third, wrapped his head in a crimson cloak⁴, decked it with a wreath and buried it, bearing it on a bronze shield to the foot of Olympos. Bloodshed and burial were the essential features of their mysteries⁵. The priests of the mystics, who were known as *Anaktotelestai*⁶ or 'initiates of the Kings,' forbade wild celery (*sélinon*) with its roots to be placed on the table, believing it to be sprung from the blood of the slain Korybas⁷. Further, these Korybantes—says Clement—were called Kabeiroi; and the story told of them was that the two fratricides took up the basket containing the member of Dionysos and brought it to Etruria⁸, where they lived in exile teaching the Etruscans to worship the

¹ *Frag. adesp.* 84 Bergk⁴ (33 Hiller), 6 f. *ap.* Hippol. *ref. haeres.* 5. 7 p. 97 Miller ἡ Φρύγιοι Κορύβαντες, | οὗς Ἄλιος πρῶτους ἐπέιδεν δένδροφνεῖς ἀναβλαστύνας. Cp. Nonn. *Dion.* 14. 25 f. Γηγενέες Κορύβαντες ὀμήλυδες, ὧν ποτε Πείη | ἐκ χθονὸς αὐτοτέλεστος ἀνεβλάστησε γενέθλη.

² Dr Giles, whom I consulted on the matter, writes (July 15, 1911): Κορύβαντες 'might as you say be Macedonian. The formation is odd. It looks like a participle from κορυφάμι—not κορυφάω—if, as Hoffmann argues, Macedonian was a kind of Aeolic.'

A. F. Pott in the *Zeitschrift für vergleichende Sprachforschung* 1858 vii. 241 ff. derived Κορύβαντες from κορυφή, 'crown of the head,' and rendered the word: 'im wirbel sich drehend,' 'taumelnd,' 'in orbem saltantes' (cp. Κύρβας, κύρβεις). He is followed by O. Immisch in Roscher *Lex. Myth.* ii. 1607. Gruppe too (*Gr. Myth. Rel.* p. 257 n. 12, p. 899 n. 1) favours the connexion of Κορύβας with κορυφή, but appears to interpret the name of a 'peaked' head-dress. He compares the alternative form Κύρβας (Soph. *frag.* 778 Nauck², Kallim. *h. Zeus* 46, Lyk. *Al.* 78, Strab. 472, Orph. *h. Koryb.* 39. 2, Nonn. *Dion.* 14. 35, Soud. *s.v.* Κύρβας, Hesych. *s.v.* Κύρβαντες, *et. mag.* p. 547, 39 ff.) with κυρβάσια (used of a cock's crest, the upright tiara of the Persian king, the conical cap of the Sali, etc.: see Stephanus *Thes. Gr. Ling.* iv. 2137 A—C).

³ Clem. Al. *protr.* 2. 19. 1—4 p. 15, 1 ff. Stählin. Cp. the abbreviated accounts in Arnob. *adv. nat.* 5. 19, Firm. Mat. 11.

⁴ So the Korybantes found the infant Bacchos, left as a horned child among the rocks, πορφυρέω κεκαλυμμένον ὀνοπι πέπλω (Nonn. *Dion.* 13. 139).

⁵ Orph. *h. Koryb.* 39. 6 φοίνιον, αἰμαχθέντα κασιγνήτων ὑπὸ δισσωίν.

⁶ Hesych. ἀνακτοτελευταί (leg. ἀνακτοτελέσται) · οἱ τὰς τελευταῖς (leg. τελετὰς) ἐπιτελοῦντες τῶν ἱερῶν (? leg. τῶν Καβείρων οἱ τῶν ἱερῶν <ἀνάκτων>).

⁷ Orph. *h. Koryb.* 39. 1 βασιλῆα μέγιστον, 5 ἀνακτα. On the Ἄνακες, Ἄνακοί, Ἄνακτες see O. Jessen in Pauly-Wissowa *Real-Enc.* i. 2033 f., Gruppe *Gr. Myth. Rel.* p. 718 F.

⁸ The wreath of σέλιων worn by the Nemean and Isthmian victors perhaps originally marked them out as re-incarnations of the dead—a point to which I must return.

⁹ See further Roscher *Lex. Myth.* ii. 1621 f.

basket and its contents¹. Note that the dead Kabeiros is here termed Dionysos and that a portion of him is kept in a basket to serve as a nucleus of fresh life.

Firmicus Maternus adds that the slain brother 'consecrated beneath the roots of Mount Olympos' was 'the Kabeiros to whom the inhabitants of Thessalonike used to make supplication with blood-stained mouth and blood-stained hands².' This Kabeiros is known to us from coins (figs. 77, 78)³ as a young man with a

Fig. 77.

Fig. 78.

Fig. 79.

large ring or rings round his throat, who holds a species of double-axe and a *rhytôn* or drinking-horn. The *rhytôn* ends in the forepart of a goat⁴—a fact which leads us to conjecture that it was a *cornu copiae*, like the horn of Amaltheia⁵. Indeed, a horn or horns must have been part of the ritual furniture of the cult; for some coins show the Kabeiros with a horn apparently planted in the ground beside him (fig. 79)⁶, others with a horn erect on a base to the right and a flaming altar to the left (fig. 80)⁷, others again with a pair of horns set in bases on either hand (fig. 81)⁸. The double-axe, the

horns, the goat, the feast of raw flesh, all suggest a religious context resembling that of the Cretan Kouretes.

Fig. 80.

Fig. 81.

Elsewhere too the Kabeiroi were marked by the same characteristics. One of Strabon's sources, after identifying the Korybantēs, children of Zeus by Kalliope, with the Kabeiroi, states that the latter departed to Samothrace, previously called Melite, and adds that their doings were of a mystical nature¹. The names borne by the Samothracian Kabeiroi—Axieros, Axiokersa, Axiokersos—are probably to be connected with a word for 'axe'². An amulet found at Vindonissa (*Windisch*) represents the head of a double-axe or hammer inscribed with these three names reduced in each case to the significant abbreviation AXI (fig. 82)³. The initiates wore purple waist-bands⁴ and rings of iron and gold⁵. Statius definitely compares the sacred dances of the Samothracians to those of the Kouretes⁶. A relief of imperial date from Hierapolis in Phrygia, now at Berlin (fig. 83)⁷, shows three youths advancing side by side: they have bushy hair, a thick ring round the neck, a loin-cloth about the waist, and a heavy double-axe or hammer resting on the right shoulder; part of a fourth youth is visible beside them. O. Kern

in 1900 recognised these youths as the Kabeiroi wearing their Samothracian rings: their loin-cloths too are clearly the Samothracian bands. Kern further adduced another relief, which he had

Fig. 83.

seen in 1893 at *Üzümlü*, a village near Magnesia on the Maiandros: this represented four nude males, each carrying a hammer on the right shoulder and moving to the left, led by a fifth, draped and hammerless¹. A. Conze² and O. Puchstein³ have made it probable that yet another Kabeiros swinging a double-axe or hammer is to be seen in the nude bearded god attacking a bovine giant on the southern frieze of the great Pergamene altar⁴. At Pergamon, as Puchstein observes, the Kabeiroi were said to have witnessed the birth of Zeus⁵. Their general resemblance to the Cretan Kouretes

is, in fact, beyond dispute; and we are free to contend that in the district of Olympos the Korybantēs and Kabeiroi were essentially Curetic.

Their cult was flourishing in the third Christian century. Cyprian, bishop of Antioch, was as a youth of fifteen initiated for forty days on Mount Olympos by seven hierophants into certain obscure mysteries⁶. In this home of the gods he was taught the meaning of musical notes and sounds. He had a vision of 'tree-trunks and' herbs of divine potency. He witnessed the

⁵ *Corp. inscr. Gr.* ii no. 3538, 17 ff., *infra* Append. B Mysia.

⁶ *Acta Sanctorum* edd. Bolland. Septembris vii. 222 ('Confessio S. Cypriani' 1—2) *ἐγενήθη* καὶ ἐν τῷ Ὀλυμπίῳ ὄρει, τῶν θεῶν ὡς λέγουσιν οἰκητηρίῳ, καὶ ἐμνήθη ἤχους ὀμιλιῶν (leg. ὀμιλιῶν) καὶ ψόφων διήγησιν. εἶδον ἐκεῖ φαντάζοντα πρέμνα καὶ πῶας ἐνεργεῖν δοκούσας θεῶν ἐπισκοπαῖς. εἶδον ἐκεῖ ὠρῶν διαδοχάς, πνευμάτων ὑπαλλασσόντων, καὶ ἡμερῶν διαφορότητα ὑπὸ τινων ἐνεργειῶν ἐναντίων συνισταμένων. εἶδον ἐκεῖ χοροὺς δαιμόνων ὑμνούστων καὶ ἄλλων πολεμούντων καὶ ἐτέρων ἐνεδρευόντων, ἀπατώντων, συγχρονούντων, καὶ ἐκάστου θεοῦ καὶ θεᾶς ἐθεασάμην ἐκεῖ τὴν φάλαγγα, μείνας αὐτόθι ἡμέρας τεσσαράκοντα· ὁπόθεν ὡς ἐκ βασιλείων ἀποστέλλονται τὰ πνεύματα, ἐνεργεῖν ἕκαστον αὐτῶν ἐν τῇ γῆ καὶ ἐν πᾶσι τοῖς ἔθνεσι. καὶ εἰσιτούμην ἀκρόδρα μόνον μετὰ δύσιν ἡλίου, καὶ δὴ ὧν ἔτι ἑτῶν πεντεκαίδεκα ἐμνούμην τὴν ἐκάστου αὐτῶν ἐνέργειαν ὑπὸ τῶν ἐπὶ τὰ λεροφαντῶν· λλαν γὰρ οἱ ἐμοὶ γονεῖς ἔσπευδόν με ἐπιγνώσαι τὰ γῆς, ἀέρος καὶ θαλάσσης, οὐ μόνον τὰ κατὰ φύσιν φθορᾶς καὶ γενέσεως ποῶν καὶ πρέμων καὶ σωματῶν (leg. σωματῶν), ἀλλὰ καὶ <τὰς> ἐν πᾶσιν αὐτοῖς ἐνεργείας, ἃς ὁ ἀρχῶν τοῦ αἰῶνος τούτου ἐνετύπωσεν, ἐναντιούμενος πρὸς τὴν τοῦ θεοῦ διατύπωσιν.

succession of seasons and the difference of days, the changing spirits that caused the former and the opposing influences that determined the latter. He beheld choruses of *daímones* chanting, warring, lying in ambush, deceiving and confounding each other. He saw too the phalanx of each several god and goddess. After sundown he fed on fruits (not meat). And, generally speaking, he was initiated into the decay and birth of herbs, trees, and bodies. It is altogether a singular recital, but we can hardly be wrong in supposing that these were puberty-rites, Corybantic or Cabiric in character¹.

It would seem, then, that from first to last certain orgiastic quasi-Dionysiac elements appear in the cults of Olympos, and it is highly probable that throughout the worship of Zeus was affected by them. In early days the Muses were to Zeus what the mountain-roaming Maenads were to Dionysos. This explains Hesychios' statement that the Macedonians called the Muses *thoúrides*²—a name elsewhere given to the Maenads³. Eustathios' assertion that the Muses, like the Maenads, were nurses to Dionysos⁴ may be a Byzantine blunder⁵; but the very possibility of such blundering proves the similarity of Muse and Maenad. At Dodona⁶,

¹ L. Preller in *Philologus* 1846 i. 349 ff. argues that the reference is to Orphic rites in the neighbourhood of Olympos. Orphic admixture is indeed likely enough. Orpheus, himself the son of one of the Muses, played for them on Olympos (Eur. *Bacch.* 560 ff.), there taught Midas (Konon *narr.* 1), and there according to many met his death (Hyg. *poet. astr.* 2. 7) and was buried (*Anth. Pal.* 7. 9. 1 f. Damagetos, cp. Apollod. 1. 3. 2): see further O. Gruppe in Roscher *Lex. Myth.* iii. 1082 f. L. Heuzey—H. Daumet *Mission Archéologique de Macédoine* Paris 1876 Texte p. 270 f. identify Orpheus' tomb with a tumulus near the village of *Karítsa*.

² Hesych. *θοούριδες· νύμφαι· μούσαι· Μακεδόνες*.

³ O. Hoffmann *Die Makedonen*, Göttingen 1906 p. 97 n. 132 argues that *θοούριδες* is a Thessalian or Macedonian form of *θεωρίδες* (Hesych. *θεωρίδες· αἱ περὶ τὸν Διόνυσον βάρκλαι*, cp. Nonn. *Dion.* 9. 261 and probably Soph. *frag.* 698 Nauck² *ap.* Athen. 592 B).

⁴ Eustath. *in Od.* p. 1816, 4 ff. *λέγονται δέ, φασί, καὶ Μούσαι Διονύσου τροφῶν, νύμφαι τῶν οὔσων καὶ αὐτῶν, ὡς καὶ παρὰ Λυκίῳ εἴρηται*.

⁵ Yet Dionysos was often associated with the Muses: see Gruppe *Gr. Myth. Rel.* pp. 76 n. 9, 213 f., 245 n. 6, 743 n. 3, 829 n. 3, 1427 n. 7, 1435 n. 1.

⁶ Six nymphs of Dodona, identified with the Hyades and named Kisseis, Nysa, Erato, Eriphia, Bromie, Polyhymno, or Arsinoe, Ambrosie, Bromie, Kisseis, Koronis, were by some apparently regarded as the nurses of Zeus (Hyg. *fab.* 182), though others explained that Zeus had given them Dionysos to tend (Pherekyd. *frag.* 46 (*Frag. hist. Gr.* i. 84 Müller) *ap. schol. Il.* 18. 486, *Myth. Vat.* 1. 120, *alib.*). See Gruppe *Gr. Myth. Rel.* p. 825 n. 4: 'Die Hyaden sind Erzieherinnen des Bakchos...; in verschollenen dodonäischen Legenden vielleicht auch des Zeus, wie ihre Gleichsetzung mit den Dodonides...und der N. der Hyade Dione nahelegen.'

Strab. 329 relates on the authority of Soudas the historian (= Kineas *frag.* 3 (*Frag. hist. Gr.* ii. 463 Müller)) that the cult of the Dodonaean Zeus came originally from the Pelasgian district about Skotoussa, that most of the women of Skotoussa followed along with it, and that the priestesses of Dodona were descended from them.

at Tegea¹, at Megalopolis², on Mount Ide near Gortyna³, on Mount Ide in Phrygia⁴, on Mount Arkton near Kyzikos⁵, Zeus had his troop of nursing nymphs. Why not on the slopes of Mount Olympos? In late times the Dionysiac connexion was intensified. Korybantēs and Kabeiroi came to the fore; and certain shrewd persons recorded their conviction that the original Kabeiroi had been two in number—Zeus the elder and Dionysos the younger⁶.

¹ The altar of Athena Ἀλέα at Tegea, made by Melampous, was decorated with figures of Rhea and the nymph Oinoe holding the infant Zeus, flanked by two groups—Glauke, Neda, Theisoa, Anthrakia on the one side; Ide, Hagno, Alkinoe, Pnixia on the other. Near it were statues of the Muses and Mnemosyne (Paus. 8. 47. 3).

² In the precinct of the Great Goddesses at Megalopolis on a table set before Herakles the Idaean Daktylos were represented not only two Horai, Pan, and Apollon, but also Neda holding the infant Zeus, Anthrakia another Arcadian nymph with a torch, Hagno with *hydria* and *phidde*, Anchiroe and Myrtoessa with *hydriai* from which water was flowing. Within the same precinct was a temple of Zeus *Philius*. The statue, by Polykleitos of Argos, represented Zeus in the guise of Dionysos: he was shod with buskins, and held a cup in one hand, a *thyrsos* with an eagle perched upon it in the other (Paus. 8. 31. 4).

³ *Et. mag.* p. 227, 39 f. Γεραισιτάδες· οὕτω νέμφαι καλοῦνται ἐν Γορτύνη τῆς Κρήτης, ὅτι τὸν Δία τρέφουσαι ἐγέραιρον. Cp. *ib.* p. 227, 44 f. Γεραισιτιον· χωρίον τῆς Ἀρκαδίας, παρὰ τὸ γέρας· ὅτι τίμιον ἔστι διὰ τὸ ἐκεῖ τὸν Δία σπαργανωθῆναι. An inscription found at Phaleron records a dedication Ἐστία, Κηφισίω, Ἀπόλλωνι | Πυθίω, Ἀθηαί, | Ἀρτέμιδι Λοχίω, Ἰλειθείω, Ἀχιελείω, Καλλιφύω, Γεραισιταῖς Νύμφαις γενεθλίαις, Ῥαψοί (B. Staes in the *Εφ.* Ἀρχ. 1909 p. 244 ff. fig. 1, Svoronos *Ath. Nationalmus.* p. 493 ff. pls. 181 f.).

Helike and Kynosoura, two Cretan nymphs, nursed the infant Zeus. He, when pursued by Kronos, changed them into bears and himself into a snake. Hence the constellations Ursa Major, Ursa Minor, and Serpens (schol. Q. *Od.* 5. 272, schol. Arat. *phaen.* 46, *alib.*: see Roscher *Lex. Myth.* i. 1985, ii. 1706). Arat. *phaen.* 26 ff. and Aglaosthenes *Naxiaca frag.* 1 (*Frag. hist. Gr.* iv. 293 Müller) *ap.* pseudo-Eratosth. *catast.* 2, Hyg. *poet. astr.* 2. 2, schol. Caes. Germ. *Aratea* p. 382, 9 ff. Eysenhardt connect both Helike and Kynosoura with the Cretan Ide.

Melisseus or Melissos, king of Crete, was father of the nymphs Adrasteia and Ide (Apollod. 1. 1. 6, Zenob. 2. 48, Orph. *frag.* 109 Abel *ap.* Herm. in Plat. *Phaedr.* p. 148, cp. Plout. *symp.* 3. 9. 2, and Hyg. *fab.* 182 Idothea Amalthea Adrastea), or Adrasteia and Kynosoura (schol. Eur. *Rhes.* 342), or Amalthea and Melissa (Didymos *ap.* Lact. *div. inst.* 1. 22), who reared the new-born Zeus on the milk of a goat accustomed to bearing twins (Parmeniskos *ap.* Hyg. *poet. astr.* 2. 13).

⁴ Charax *frag.* 2 f. (*Frag. hist. Gr.* iii. 637 Müller) *ap.* Steph. Byz. s.vv. Ἀδράστεια and Ἰδή connects Melissos, Adrasteia and Ide with the Phrygian Mt Ide: cp. Ap. Rhod. 3. 133 ff., Diod. 17. 7, Plout. *de fluv.* 13. 3, and see further Roscher *Lex. Myth.* ii. 104.

⁵ Schol. Ap. Rhod. 1. 936 (cp. 1. 941 cod. Paris.) Ἄρκτον (leg. Ἄρκτων ὄρος)... ἐπειδὴ φασι τὰς τροφούς τοῦ Διὸς ἐκεῖ διατριβοῦσας εἰς ἄρκτους μεταβληθῆναι.

F. W. Hasluck *Cyzicus* Cambridge 1910 p. 221 in this connexion remarks that both Adrasteia (Ap. Rhod. 1. 1116 πεδίων Νηπίων Ἀδρηστειῆς) and Kynosoura (*Corp. inscr. Gr.* ii no. 3679, 5 a society of Βάκχοι Κυνουσιρεῖται at Kyzikos) appear to have been local goddesses. See also Gruppe *Gr. Myth. Rel.* p. 942 n. 8.

⁶ Schol. Ap. Rhod. 1. 917 cod. Paris. οἱ δὲ φασι δύο πρότερον εἶναι τοὺς Καβείρους, Δία τε πρεσβύτερον καὶ Διόνυσον νεότερον. So also *et. mag.* p. 482, 31 ff., *et. Gud.* p. 289, 25 ff. Cp. the notion that Dionysos, a king of Asia, was the son of Kabeiros (Cic. *de nat. deor.* 3. 58, Ampel. 9. 11, Lyd. *de mens.* 4. 51 p. 107, 9 f. Wünsch). The Dionysiac character of the Kabeiros e.g. at Thebes is well attested (Roscher *Lex. Myth.* ii. 2536 ff.).

If the Zeus worshipped at Dion was thus Dionysiac in character, akin to the Phrygian Zeus *Sabázios*¹, we can understand why he has the snake as his attribute (fig. 84)²: the slain Korybas became a snake³, and snakes were all-important in the mysteries of *Sabázios*⁴. Twelve miles south of Dion was a town, which the *Tabula Peutingeriana* calls *Sabatium*⁵, i.e. *Sabázion*, a cult-centre of *Sabázios*⁶. It may even be suggested that the monastery of Saint Dionysios, from which starts the modern counterpart of the ancient procession to the altar of Zeus⁷, has in the name of its patron saint preserved a last echo of the Dionysiac cult.

Fig. 84.

Whether these Dionysiac traits in the worship of Zeus were original and essential, or whether they are to be explained as merely the result of contamination with an alien cult, is a large problem that still awaits solution. It will be convenient to deal with it, not at the present stage of our argument, *à propos* of Olympos, but in a later chapter, when we shall be taking a more comprehensive survey of the relation of Zeus to Dionysos.

(c) Development in the meaning of *Ólympos*.
Zeus Ólympios.

In the Homeric, the Hesiodic, and the Orphic poems Olympos, the seat of the gods, is to be identified with the Macedonian mountain; and the same identification holds good for the Alexandrine epic of Apollonios Rhodios⁸. The poet of the *Odyssey* describes Olympos in a passage of surpassing beauty:

¹ Roscher *Lex. Myth.* iv. 232 ff.

² Rasche *Lex. Num.* iii. 350 and Suppl. ii. 607 records a small copper of Gallienus with Zeus standing between two snakes. The specimen figured is in the Leake collection (W. M. Leake *Numismata Hellenica* London 1856 European Greece p. 46 Gallienus).

³ Orph. *h. Koryb.* 7 f. Δηοῦς δὲ γνώμησιν ἐνήλλαξας δέμας ἀγρόν, | θηρόντων θέμενος μορφήν ἀνοφεροῖο δράκοντος.

⁴ Roscher *Lex. Myth.* iv. 252 ff.

⁵ F. C. de Scheyb *Tabula Itineraria Peutingeriana* Lipsiae 1824 segm. 7 b, K. Miller *Weltkarte des Castorius genannt die Peutinger'sche Tafel* Ravensburg 1888 segm. 8, 1.

⁶ L. Heuzey *Le Mont Olympe et l'Acarnanie* Paris 1860 p. 100. ⁷ *Supra* p. 103.

⁸ The evidence is collected and considered by Mackrodt in Roscher *Lex. Myth.* iii. 849 ff. He holds that only in two Homeric passages (*Il.* 8. 18—27 and *Od.* 6. 41—46) does the later conception of *Óλυμπος* as 'heaven' or 'sky' occur. But, to my thinking, even in these passages the mountain is meant. In *Il.* 8. 18 ff. Zeus boasts that if he let down a golden rope from heaven and all the other gods and goddesses hung on to it, they could not pull him down from heaven to the plain, but he could pull them up, land and sea and all, bind the rope about a peak of Olympos and let them dangle there. Whatever

So spake bright-eyed Athena and withdrew
 To Olympos, where men say the gods' sure seat
 Stands firm for ever: neither wind can shake,
 Nor rain can wet, nor snow come nigh the same.
 Cloudless the brilliance that is there outspread
 And white the glitter that is over all.
 Therein blest gods have joyance all their days¹.

This is the literary echo of the folk-belief that attributed a windless, cloudless *aithér* to the mountain-top². Homeric and Hesiodic poetry spoke of 'the palace of Zeus,' sometimes 'the palace of Zeus with its floor of bronze,' as built by Hephaistos upon Olympos³. And here too we may detect the creed of the country-side. For L. Heuzey, writing in 1860 of the villagers from the neighbourhood of Olympos, says⁴: 'If you tell them that you have ascended the highest peaks, they always ask—"Well, what did you find there?"' Some of them described me a mysterious palace adorned with columns of white marble, adding that these had been seen long ago by a shepherd, but that they would not be seen now-a-days. Others spoke to me of a huge circus in which the ancients held their games. The Klephts too have always attributed marvellous virtues to the fresh air of Olympos, its snows, and its icy mountain-springs. It figures in their songs as a paradise, whither they go to recover from the contests of the plain below: here the body gets stronger, wounds heal themselves, and limbs grow lithe for fresh fighting. Throughout the rest of Greece a magic potency attaches to the following words:

From Olympos, the summit,
 From the three peaks of Heaven,
 Where are the Fates of Fates,
 May my own Fate
 Hearken and come!⁵

may be the precise picture here intended, the phrases *πεδώνδε* and *περὶ βίον Οὐλύμποι* surely prove that the poet is contrasting the gods on the plain with Zeus on the mountain. As to *Od.* 6. 41 ff., cited on p. 114, the absence of wind, rain, snow, and cloud, there described as characteristic of Olympos, agrees well with Greek beliefs about the mountain-top (*supra* p. 102 f.), while the presence of 'bright sky' and 'white glitter' is no less suitable; indeed *αἰγλη* recalls *αἰγλήεις*, which Mackrodt takes to be an epithet of the earthly mountain in *Il.* 1. 532, 13. 243, *Od.* 20. 103.

¹ *Od.* 6. 41 ff.

² *Supra* p. 101 ff.

³ *Il.* 1. 425 f., 531 ff., 566 ff., 11. 75 ff., 20. 4 ff., 21. 438, 505, Hes. *sc. Her.* 471.

⁴ L. Heuzey *Le Mont Olympe et l'Acarmanie* Paris 1860 p. 138 f., N. G. Politis *Παραδόσεις* Athens 1904 i. 97 no. 173, ii. 777. My friend Mr A. J. B. Wace, when at Salonika, was told by a man from the neighbourhood of Olympos that somewhere on the mountain there are said to be the remains of a temple with columns.

⁵ 'Ἀπὸ τῶν Ὀλυμπων τὸν κόρυμβον, | τὰ τρία ἄκρα τοῦ Οὐρανοῦ, | ὅπου αἱ Μοῖραι τῶν Μοιρῶν, | καὶ ἡ ἐδική μου Μοῖρα | ὡς ἀκούσῃ καὶ ὡς ἐλθῇ! B. Schmidt *Das Volksleben der Neugriechen* Leipzig 1871 i. 219 n. 1 would read Πτὸν for Ἀπὸ τῶν, τ' οὐρανοῦ for τοῦ

Development in the meaning of *Ólympos* 115

By the fourth, and even by the fifth, century before our era the word *Ólympos* had acquired a further significance. It meant no longer the mere mountain, but the 'sky' above it. Thus Sophokles in his *Antigone* makes Kreon, when at Thebes, swear 'by yon Olympos', and Euripides in his *Andromeda* makes the heroine apostrophise Night as follows:

O holy Night,
How long the course thou drivest,
Charioting the starry ridges
Of holy *aithér*
Through dread Olympos².

Both poets contrast Olympos in the sense of 'sky' with 'earth'.³ The same usage is found in prose. The author of the Platonic *Epinomis* speaks of the visible heaven as 'the *kósmos* or Olympos or sky, whichever you choose to call it',⁴ while the author of the Aristotelian treatise *On the Universe* declares that God 'being pure has his station above in a pure place, even that which we truly name *ouranós*, since it is the "boundary" (*hóros*) of things "above" (*áno*), and *Ólympos* as "wholly-shining" (*holo-lampés*) and separate from all such darkness and disorderly movement as arises among us by means of storm and stress of winds'.⁵

The change in meaning from Olympos the 'mountain' to Olympos the 'sky' would readily follow from the belief that the mountain rose into the *aithér*. And for the prevalence of this belief there is abundant evidence⁶. It is even probable that in ancient days the inhabitants of the district actually spoke of the

Ούρανοῦ, Μοῖρα for Μοῖρα. N. G. Polites *Μελέτη ἐπὶ τοῦ βίου τῶν Νεωτέρων Ἑλλήνων* Athens 1874 ii. 228 gives κ' ἢ for καὶ ἢ. J. C. Lawson *Modern Greek Folklore and Ancient Greek Religion* Cambridge 1910 p. 128 prints the third line as *θπου ἢ Μοῖραις τῶν Μοιρῶν*. He justly draws attention to the ancient word *κόρυμβον*, citing variants with *κόλυμβον* (a dialect form, or else a corruption due to assonance with *Ὀλυμπος*) and *Κόροιβον* (for which he proposes *κόρυβον*). The word *κόρυμβος* is akin to *κορυφή*, which was used of Olympos (e.g. *Il.* 1. 499, Aristoph. *nub.* 270) and gave rise to its *Κορύβαυτες* (*supra* p. 107).

summit of Mount Olympos as 'heaven'.¹ Modern peasants call it 'the three peaks of Heaven'.² And a primitive notion that has left traces of itself in almost every country of Europe regards a mountain as the natural abode of souls.³

Mount Ide in the Troad, which also bore the name of Olympos,⁴ was likewise supposed to rise into the *aithér*. Aischylos in his *Niobe* mentions Tantalos and his family as—

near akin to gods
And nigh to Zen, men who on Ide's height
Have built an altar of Ancestral Zeus
In *aithér* and still vaunt the blood divine.⁵

and wide throughout the Greek area (fig. 86)¹, even where there was no mountain with which his cult could be associated².

§ 5. *The Mountain-cults of Zeus.*

X (a) Chronological Development of the Mountain-cults.

The mountain-cults of Zeus may be grouped roughly in chronological order according as they centred round (1) a simple altar, (2) an altar with a statue of the god, (3) an altar with a statue enclosed in a temple³.

Examples of the earliest type occur in several Greek myths. Deukalion, for instance, according to one version of his legend, was borne safely over the waters of the flood to a mountain-height above Argos and in gratitude for his escape built upon it an altar to Zeus *Aphésios*⁴. Althaimenes, who fled from Crete to Rhodes lest he should unwittingly become the slayer of his father Katreus, put in to shore at a place which in memory of his former home he named Kretenia: on climbing Mount Atabyrion he got a distant view of Crete and, thinking still of Cretan cults, there set up an altar to Zeus *Atabýrios*⁵. Herakles, after sacking Oichalia and carrying off Iole the daughter of king Eurytos, went to Mount Kenaion the north-western promontory of Eubóia, and there dedicated altars and a leafy precinct to Zeus *Patrôios*⁶. On Mount Helikon, near the spring Hippokrene, Zeus *Helikónios* had an altar, round which the Muses were believed to dance⁷. On the peak of Mount Ide called Gargaros there was an altar and a precinct of Zeus *Idaios*, where Hektor was wont to sacrifice⁸. Mount Arachnaion in Argolis had altars of Zeus and Hera⁹. The singular ritual of Mount

river flowing to the right show the nature of the mountain-side. This god has been taken to be Zeus (Overbeck *Gr. Kunstmyth.* Zeus pp. 155, 161, Münzf. 2, 16, Müller-Wieseler-Wernicke *Ant. Denkm.* i. 89 pl. 9, 5, *Class. Rev.* 1904 xviii. 80). But Imhoof-Blumer *Gr. Münzen* p. 82 f. no. 144 pl. 6, 16 regards him as the mountain-god Olympos. *Infra* p. 124. Another coin of the same town has a seated Zeus inscribed ΠΡΟΥΣΑΕΙΣ ΔΙΑ ΟΛΥΜΠΙΟΝ (Head *Hist. num.*² p. 444).

¹ *Inscr. Gr. ins.* iii Suppl. no. 1345 (a rock-cut inscription of the third century B.C. in the precinct of Artemidoros at Thera: see F. Hiller von Gaertringen *Die Insel Thera* Berlin 1904 iii. 89 ff.) Διὸς Ὀλυμπίου. | ἀετὸν ὑψιπετῆ Διὸς ἀγγελῶν Ἀρτεμίδωρος | ἀέναου πόλει εἶσε καὶ ἀθανάτοισι θεοῖσι. | ἀφθιτοί, ἀθάνατοι καὶ ἀγήραοι ἀεναὸί τε | βωμοί, ὅσοις ἱερῆς τέμενος κτίσεν Ἀρτεμίδωρος.

² See the list given in Roscher *Lex. Myth.* iii. 840—847, cp. Farnell *Cults of Gr. States* i. 155 f.

³ The evidence is collected in Append. B, where the arrangement of it is topographical.

⁴ *Ib.* Phlissia.

⁵ *Ib.* Rhodes.

⁶ *Ib.* Eubóia.

⁷ *Ib.* Boiotia.

⁸ *Ib.* Troas.

⁹ *Ib.* Argolis.

Kithairon, which will claim our attention later, involved the erection on the mountain-top of temporary wooden altars destined for the bonfires of Zeus *Kithairónios*¹. High up on the Cretan Mount Ide was a permanent rock-cut altar of Zeus *Idaios*². Thus with some variety of detail, according to local circumstances, the primitive cult of Zeus required an altar on the summit or as near it as might be.

Even where that cult was celebrated

On a tall mountain, cited to the top,
Crowded with culture!

hieratic conservatism was apt to maintain the open-air altar. A case in point is furnished by Pergamon. The Akropolis of that marvellous city crowns a hill that rises a thousand feet above sea-level and commands a view of unequalled beauty over the valleys of Teuthrania. Thanks to the excavations begun by A. Conze and K. Humann on behalf of the Prussian government in 1878, a fairly accurate picture may be drawn of Pergamon in its glory, as it was when Pliny called it 'by far the most famous town in the province of Asia'.³ The silhouette of the city seen from below against the sunrise (pl. x)⁴ shows the sky-line cut by two magnificent temples. In the centre rises the Doric fane of Athena *Poliás* or *Nikephóros*, a building of greyish trachyte, flanked on its northern and eastern sides by a two-storeyed *stoá* or 'colonnade.' Immediately behind the northern *stoá* are the halls in which the Pergamene Library was lodged. Further north, and therefore in our illustration more to the left, stands out the huge temple of the deified Trajan, a sumptuous Corinthian pile of white marble, surrounded on three sides by airy colonnades. Athena, then, had her temple, and Trajan had his. But Zeus⁵ was content with the altar that smokes

¹ Append. B Boiotia.

³ Plin. *nat. hist.* 5. 126. The most convenient summary of what is known about Pergamon is still that contained in Baumeister *Denkm.* ii. 1206—1227 (history, topography, and architecture by E. Fabricius), *ib.* 1227—1287 (art by A. Trendelenburg). But the great Berlin publication (*Altertümer von Pergamon*, here cited as *Pergamon*) is slowly approaching completion: two volumes have already been devoted to the altar built by Eumenes ii (197—159 B.C.), viz. *Pergamon* iii. 1. 1—128 (*Der grosse Altar. Der obere Markt.* Berlin 1906) with an Atlas of 34 plates, by J. Schrammen; *Pergamon* iii. 2. 1—250 (*Die Frieze des grossen Altars* Berlin 1910) with an Atlas of 36 plates, by H. Winnefeld.

⁴ Based on the Berlin panorama by A. Kips and M. Koch (Baumeister *Denkm.* ii pl. 36), which in turn utilised the drawing by R. Bohn in *Die Ergebnisse der Ausgrabungen zu Pergamon* Berlin 1888 iii pl. 2. See also E. Pontremoli and M. Collignon *Pergame, restauration et description des monuments de l'acropole* Paris 1900.

⁵ J. Schrammen in *Pergamon* iii. 1. 82 points out that the name of the deity to whom

118

Pergamon, showing the great altar of Zeus.

See page 118 ff.

on the terrace adjoining the Akropolis. True, it was an altar on a colossal scale (fig. 87)¹. A substructure, measuring about 100 feet

Fig. 87.

square by about 18 feet in height, was mounted by means of a broad staircase and adorned all round with a frieze, which represented in high relief the battle of the Gods and the Giants. The substructure was topped by an Ionic colonnade, the back wall of which was decorated with a smaller frieze depicting scenes from the mythical history of the town. Above all rose the actual altar of burnt offering, which, to judge from our only representation of it, a Pergamene coin struck by Septimius Severus (fig. 88)², was protected by a soaring baldachin; the adjoining colonnades were surmounted by statues of deities, and the flight of steps was

Fig. 88.

the great altar was dedicated is not attested by the extant blocks of the votive inscription. M. Fränkel in *Pergamon* viii no. 69 supposes that the altar was that of Zeus and Athena *Nikephoros*; A. Brückner in the *Jahrb. d. kais. deutsch. arch. Inst.* 1904 xix Arch. Anz. p. 218 ff., that it was dedicated to all the gods. But it is commonly regarded as the altar of Zeus alone.

¹ *Pergamon* iii. 1 pl. 19. Ground-plan *ib.* pl. 15. Elevation of west side *ib.* pl. 18.

² *Brit. Mus. Cat. Coins Mysia* p. 152 pl. 30, 7. That this coin shows the great altar was first recognised by A. Héron de Villefosse in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1901 p. 823 ff. figs. and in the *Rev. Num.* 1902 p. 234 ff. See also *Jahrb. d. kais. deutsch. arch. Inst.* 1902 xvii Arch. Anz. p. 12 fig., *Am. Journ. Arch.* 1902 vi. 461, *Pergamon* iii. 1. 4 f. fig., 65 f., *Head Hist. num.*² p. 536.

flanked by two figures of humped bulls on large pedestals. The whole complex of marble was reckoned one of the wonders of the world¹. Built into and concealed by its foundations was a previously existing building with an apse at one end². It bears so close a resemblance to the apsidal Kabeirion of Samothrace³ that I would venture to see in it a shrine of the Kabeiroi, who appear on another coin of Pergamon⁴ and are said to have witnessed the birth of Zeus on this very hill⁵. But, if the site of the great altar was once occupied by a Kabeirion, where was the former altar of Zeus?

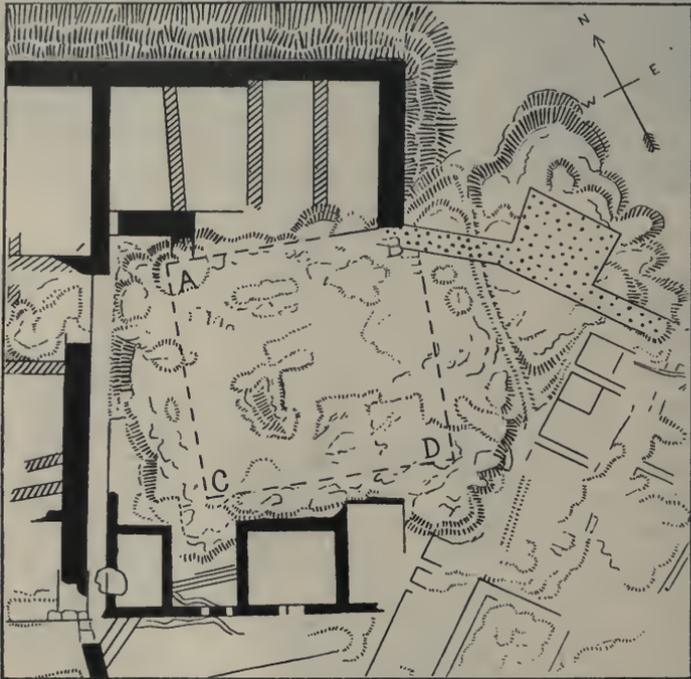

Fig. 89.

Just where we should have expected it to be—higher up, on the actual summit. J. Schrammen observes that the extreme point still shows traces of a square structure (fig. 89)⁶, and acutely

conjectures that the altar of Zeus mentioned by Pausanias was not the gorgeous monument of Eumenes ii but this more homely place of sacrifice¹. If so, it was impressive from its sheer simplicity. Like the altar of Zeus *Olympios* in the Altis at Olympia, it was a mere heap of ashes, consisting entirely of the calcined thighs of victims sacrificed to Zeus².

The dedication of an altar with neither temple nor statue of the god is characteristic of the early so-called aniconic stage of Greek religion. But it must not be supposed that the absence of a visible representation of Zeus was due merely to the backward state of sculptural art at the time when the cult in question was founded. Rather it must be traced back to the primitive conception of Zeus as the Bright Sky, alive and potent, but not as yet anthropomorphic³, and therefore not as yet represented by a statue.

With the change to anthropomorphism came the introduction of statues into the mountain-cults of Zeus. Where there had been an altar and nothing more, there was now, if the cult moved with the times, an altar and a statue of the god standing beside it. Thus on the top of Mount Hymettos there was an altar and statue of Zeus *Hymettios*⁴. On Mount Parnes Zeus was worshipped under several names: as *Ómbrios* and *Apémios* he received sacrifices on one altar, as *Semaléos* on another; and, apparently beside this latter, was a bronze statue of Zeus *Parnéthios*⁵. Mount Laphystion, near Orchomenos in Boiotia, had a precinct and a stone statue of Zeus *Laphýstios*: tradition told how king Athamas was here on the point of sacrificing his own son and daughter, Phrixos and Helle, when in the nick of time Zeus sent the ram with the golden fleece to aid their escape⁶. The summit of Mount Athos was sacred to Zeus *Athôios*, who had there one or more altars and a (bronze?) statue⁷. Doubtless too the statue of Zeus *Aitnaíos* on Mount Aitne⁸, that of the Chaeronean Zeus on the crag called Petrachos⁹, and that of Zeus *Anchésmios* on Mount Anchesmos near Athens¹⁰ had altars of their own.

A third and final stage in the evolution of the cult was reached, when the figure of the god came to be suitably housed in a temple. But this was an innovation not brought about all at once. Zeus *Ithomátas*, for example, was worshipped on the top of Mount Ithome

in Messene; but the statue of the god, made by the famous Argive sculptor Hageladas, was kept in the house of a priest annually appointed for the purpose¹. At last Zeus was installed in a house of his own. And splendid indeed must have been the effect of a Greek temple with its ivory-white columns and its richly-coloured entablature seen against the dazzling blue of a southern sky. Hardly less beautiful would it appear when its marbles glimmering in the moonlight contrasted with the mysterious shadows of its colonnade². The first temple built upon a height for Zeus of which we have any record is the temple of Zeus *Polieus* constructed by Phalaris in the first half of the sixth century on the Akropolis of Akragas some 1200 feet above sea-level. Polyainos³ tells the following tale with regard to its foundation:

‘Phalaris was a contractor of Akragas. The citizens of that town desired to make a temple of Zeus *Polieus* at a cost of 200 talents on their Akropolis: the site was rocky, the foundation very solid, and moreover it would be the right thing to establish the god on the highest available point. So Phalaris tendered an offer that, if he were appointed as overseer of the work, he would use the best craftsmen, furnish materials without extravagance, and provide satisfactory sureties for the funds. The people, considering that his life as a contractor had given him experience in such matters, entrusted him with the task. On receipt of the public moneys, he hired many strangers, purchased many prisoners, and brought up to the Akropolis plenty of materials—stones, timber, and iron. While the foundations were being dug, however, he sent down a crier with this proclamation: “Whosoever will denounce those persons that have stolen stone and iron from the Akropolis shall receive such and such a reward.” The people were angered at the theft of the materials. “Well then,” said Phalaris, “suffer me to fence in the Akropolis.” The city granted him permission to fence it in and to raise a circuit-wall. Hereupon he freed the prisoners and armed them with his stones, axes, and double-axes. He made his attack during the festival of the Thesmophoria, slew most of the citizens, secured the women and children, and thus became tyrant of Akragas.’

Again, on the summit of the Larisa or Akropolis of Argos, a rocky cone rising abruptly from the plain to a height of 950 feet, there was a cult of Zeus *Larisatos*. Pausanias, who visited the spot

¹ Append. B Messene.

² Time has broken and defaced all existing Greek temples. Among the least imperfect are the ‘Theseum’ at Athens, a temple of unknown dedication at Segesta, the temple of ‘Concordia’ at Girgenti. But though these have preserved the form, they have lost the colour, of a Doric structure. Nor is there to be seen any really accurate model or even complete picture, say of the Parthenon, showing its shapes as they were, optical corrections and all, and its colouring as it probably was. Doubtless some details would be conjectural, but the facts are so far certain that an attempt at adequate representation might be, and ought to be, made.

³ Polyain. 5. 1. 1. See further Append. B Sicily. The site of the temple is shown in W. Wilkins *The Antiquities of Magna Graecia* Cambridge 1807 Agrigentum pl. 1 view, Pauly-Wissowa *Real-Enc.* i. 1189 f. plan.

in the second century of our era, says that the temple of Zeus *Larisaios* had no roof and that his statue, made of wood, was no longer standing on its base¹. This implies that the temple was then a ruin; but when it was first founded is not known. Mount *Sagmatas*, the ancient Mount Hypatos, is a bold, rocky eminence above Glisas in Boiotia, attaining a height of 2434 feet. 'From the summit,' says Dr Frazer, 'the view is extensive and fine, embracing the great expanse of the Copaic plain (a lake no longer), the dark blue water of the deep lake of Hylica environed by barren and rugged mountains, the Euboean sea, and on the horizon the peaks of Parnassus, Helicon, and Cithaeron².' Upon the flat top of this mountain Pausanias found a cult-statue and temple of Zeus *Hypatos*³; but again we cannot tell the date of its foundation. The same is true of the temple of Zeus *Akraios* on the Pindos range between Thessalia and Epeiros⁴, of the temple of Zeus *Kásios* built by the descendants of the Dioskouroi on Mount Kasion in Egypt⁵, and of the temple dedicated to Zeus *Kásios* at Kasiope in Korkyra⁶. Probably they were all comparatively recent. The temple of Zeus *Solymeús* on Mount Solymos in Pisidia does not appear to have been a very ancient structure⁷. And in several cases it is clear that the primitive altar of Zeus received the additional glory of a temple at a much later date. Althaimenes, we saw, set up a simple altar to Zeus *Atabýrios* on the Rhodian Mount Atabyrion: but Mr C. Torr notes that the temple-walls and precinct-wall of Zeus are still to be seen on the mountain 4070 feet above the sea⁸. Herakles, we said, dedicated altars and a leafy precinct to Zeus *Patrôios* on the headland of Mount Kenaion: but Seneca in his tragedy *Herakles on Oite* writes—

Here on a soaring rock no cloud may strike
Shines the old temple of Kenaian Zeus⁹.

The precinct of Zeus *Kýnthios* and Athena *Kynthía* on the top of Mount Kynthos in Delos included a small temple, the position of which can still be traced; but this is expressly said by M. Lebègue to be of late date¹⁰.

fulgent templa Cenaei Iovis. Mr G. A. Papabasileiou, who most courteously travelled from Chalkis to the Kenaion promontory on my behalf, reports (Oct. 17, 1911) that at Dion in a spot named after a church of Saint Konstantinos he could trace the foundations of a temple and fair-sized precinct with a circular base of three steps at the east end. These remains he took to be those of a temple and altar of Zeus built in historic times on the site consecrated by Herakles.

Dattendungen
OGIS 1

(b) The Mountain as the Throne of Zeus.

The mountain sacred to Zeus was sometimes regarded as his seat or throne. Coins of Gomphoi or Philippopolis from about 350 B.C. onwards show Zeus *Akraios* seated on a rock and holding a sceptre in his right hand (fig. 90)¹: in place of the rock, which must represent Mount Pindos, later specimens substitute a throne (figs. 91, 92)². Again, coins of Kyrrhos in Syria struck by Trajan and

Fig. 90.

Fig. 91.

Fig. 92.

other emperors have Zeus *Kataibates* sitting on a rock with thunderbolt, sceptre, and eagle³: the rock is presumably some neighbouring height. Similarly a coin of Ankyra in Galatia struck by Antoninus Pius represents Zeus, with a sceptre in his right hand and a Victory in his left, seated on a rock⁴: Ankyra too was situated in a mountainous district. We have already noted an imperial coin of Prousa in Bithynia, which shows Zeus or a Zeus-like mountain-god reclining on the summit of the Mysian Olympus (fig. 85)⁵.

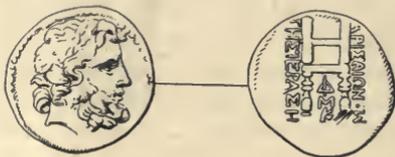

Fig. 93.

I add a few other numismatic examples, the interpretation of which is more doubtful. Copper coins of Larisa on the Orontes, struck in the first century B.C., have the head of Zeus as their obverse and the throne of Zeus as their reverse type (fig. 93)⁶. This perhaps implies that a neighbouring height was regarded as

the god's seat. Similarly the throne and thunderbolt of Zeus on coppers of Olba in Kilikia, struck probably at the end of the first century B.C. (fig. 94)¹ and the beginning of the first century A.D. (fig. 95)², may mean that *Uzundja-Burdj*, 'Tall Castle' (3800 ft.

Fig. 94.

Fig. 95.

above sea-level), on which Zeus *Ólbios* had his *hierón*³, was conceived as his sacred seat, though here an allusion to an actual throne occupied by the priestly king⁴ is equally possible.

Vase-painters of the fourth century B.C. sometimes represent Zeus seated or reclining on a mountain in the upper register of their design. Thus a fine *hydria* from Ruvo, painted in the style of the potter Meidias⁵ and now preserved at Karlsruhe⁶, introduces the god as part of a Polygnotan background to a familiar scene—the judgment of Paris (pl. xi)⁷. In the midst sits Paris himself, here as often named Alexandros. As a Phrygian he wears a rich Oriental costume; but as a shepherd he carries a short thick staff and is accompanied by his dog. He turns to speak with Hermes, who has brought the three goddesses to Mount Ide. The laurels and the rocky ground mark the mountain-side. Aphrodite,

confident of success, is seated quietly behind Hermes. She rests one hand on a sceptre, the other on a little Eros, whose brother she has already sent forward to whisper seductive words in the ear of the judge. Above her we see Eutychia, the goddess of good luck, and an attendant maiden preparing wreaths for the coming victory. In front of Paris, but wholly disregarded by him, stands Athena—a majestic figure closely resembling the Parthenos of Phcidias. Hardly less majestic, and not a whit more successful in attracting the notice of Paris, is Hera, who draws near on the left supported by her maid Klymene. In the background appears Eris, who first brought about the strife and now would watch its *dénouement*. On the right Helios drives up his four-horse chariot from behind the mountain, recalling an analogous figure in the eastern pediment of the Parthenon. On the left sits Zeus, leaning on the rocky slope. He wears a laurel-wreath in his hair and a *himátion* wrapped about his knees. His right hand holds a sceptre; his left, a winged thunderbolt. Helios and Zeus give the setting of the scene in time and place¹. For Ide is the home of Zeus *Idaios*². Moreover, it was in obedience to the bidding of Zeus that Hermes brought the goddesses before Paris³.

Equally essential is the relation of Zeus to the main design in the case of the Poniatowski vase—a great Apulian *kratér* with medallion handles, which was found near Bari and is now in the Vatican collection⁴. Its obverse (fig. 96) shows Triptolemos on his winged car drawn by two serpents. He is wreathed with myrtle, and holds in his left hand a sceptre and a bunch of corn. One of his serpents is feeding from a *phidie* held by a seated goddess, possibly one of the Horai. The other turns towards a standing goddess, almost certainly Demeter, who holds a wheel-torch under her left arm and is offering more corn to Triptolemos. Behind her at a lower level stands another goddess, probably Hekate, bearing a lighted torch. Above and beyond these figures rises a mountain, indicated by broken dotted lines, upon which we see two goddesses and higher up two gods. The goddesses cannot be identified with

certainly, but are in all probability meant for Aphrodite and Peitho¹. The gods are Hermes and Zeus. Hermes has his usual attributes, and, with one foot raised on the rocky ground, balances the similarly posed figure of Peitho. Zeus, crowned with laurel, reclines on the mountain-top. He has a *himátion* folded about his legs, shoes on his feet, a bracelet on his left arm, and an eagle-sceptre in his left hand. The moment depicted seems to be this. Zeus has

Fig. 96.

sent Hermes to bring back Persephone from the Underworld². Demeter—her wrath thereby appeased—is instructing Triptolemos in the art of agriculture and sending him forth on his mission of

¹ The identification of the goddesses on this vase has been much canvassed: see Overbeck *op. cit.* pp. 552—562. I have relied on another Apulian vase, now at St Petersburg (*infra* ch. i § 6 (d) i (β)), which represents the same scene in a very similar fashion and fortunately supplies us with the inscribed names ΤΡΙΠΤΟΛΕΜΟΣ (in serpent-car), ΔΗΜΗΤΗΡ (on the left filling a *phiale* for him), ΞΩΡΑΙ (further to the left, one standing, the other seated), ΑΦΡΟΔΙΤΗ (on the right at a higher level, seated), ΠΕΙΘΩ (further to the right, standing beside Aphrodite with knee raised on rock), ΝΕΙΛΟΣ (river at foot of main design).

² *H. Dem.* 334 ff., *alib.* (see R. Foerster *Der Raub und die Rückkehr der Persephone* Stuttgart 1874 pp. 29—98 'Der Mythos in der Dichtkunst').

civilisation. On this showing the mountain upon which Zeus reclines is the Macedonian Olympos¹.

An Apulian *pelike* from Ruvo, now at Naples², has on one side a design (pl. xii)³, the background of which somewhat closely resembles that of the vase just described. The scene is laid on a mountain near the Phrygian Kelainai, where Marsyas the flute-playing Silenos was defeated and flayed by Apollon⁴. In the centre of the composition sits Apollon, wreathed with laurel and wearing a *himation* drawn up over the back of his head. He is already victorious, and a winged Nike is presenting him with the victor's fillet, but his fingers still play with the four chords of his lyre. Below him on a spotted skin sits the defeated Silenos. His skin flute-case lies behind on the ground. He holds the flutes in his left hand and leans his head on his right in deep dejection. And no wonder. For of the three Muses, who are present as judges of his skill⁵, one, though she has flutes herself, stands spell-bound listening to Apollon's strains, another is seated harp in hand chanting the victor's praises to the delight of a pet-dog from Malta, while the third has risen from her judgment-seat and is reading out of a roll the fearful penalty prescribed for the vanquished. Behind her a girl is already bringing up a basket with flowers and a fillet, as though for a sacrifice. Marsyas himself will be the victim. On the mountain-top are three seated deities; but not one of them is likely to help. Zeus naturally sympathises with his son, Artemis with her brother. Aphrodite, who scoffed at the effects of flute-playing⁶, is unconcernedly holding a *phidie* to serve as a divining-glass for Eros⁷. Still less does the she-goat cropping its food in the corner take thought for Marsyas' fate. Confining our attention to Zeus, we note that his connexion with the tragedy is but slight. He is here mainly⁸ as the divine dweller on the

1282

Relief signed by Archelaos of Priene.

heights above Kelainai, and he adopts the attitude now familiar to us as that of the mountain-god.

This type of Zeus reclining occurs again on a relief signed by Archelaos son of Apollonios, a native of Priene¹. That well-known work of art, referable to the end of the third century B.C., was found near Bovillae about 1650 A.D. and is now in the British Museum (pl. xiii)². Its subject is usually described as the apotheosis of Homer. Before us rises a steep mountain-side, at the foot of which *Hómēros* is seen enthroned. He holds a roll in his right hand, a sceptre in his left. His throne is supported by two kneeling female figures inscribed *Iliás* and *Odýsseia*: the former carries a sheathed sword, the latter holds up the stern-ornament of a ship. In front of Homer's footstool lies another roll with a mouse at one end of it, a frog (?) at the other, to indicate the *Battle of the Frogs and Mice*. Behind the poet stands a woman named *Oikouménē*, 'The World,' who is holding a wreath above his head, and a man, named *Chrónos*, 'Time,' who is uplifting a roll in either hand. Since in features and hair these two figures (fig. 97) resemble Ptolemy iv Philopator and his wife Arsinoe, it has been conjectured that we have here the king and queen of Alexandria portrayed as allegorical personages³. Before the poet is a lighted altar inscribed ΛΛ, behind which stands a humped bull. The sacrificial attendant with jug and bowl is *Mýthos*. *Historía* strews incense on the altar, *Pótesis* holds up two flaming torches, while *Tragodia*, *Komodía*, a smaller figure named *Phýsis*, 'Nature,' and a group of *Areté*, 'Virtue,' *Mnéme*, 'Memory,' *Pístis*, 'Faith,' and *Sophía*, 'Wisdom,'

Smith in the *Brit. Mus. Cat. Sculpture* iii. 253 f.

³ C. Watzinger *op. cit.* p. 17 ff. figs. 8—9, following and improving upon the identifications proposed by S. Sharpe, viz. Ptolemy vi Philometor and his-mother Kleopatra. Both E. Braun and Sir C. T. Newton remarked a family likeness between the head of *Xpónos* and those of the later Ptolemies. F. Hauser in the *Jahresh. d. oest. arch. Inst.* 1905 viii. 85 f. fig. 28 (=Imhoof-Blumer *Monn. gr.* pl. II, 13, cp. *Num. Chron.* Fourth Series 1904 iv 307 ff. pl. 15, 11) proposes a fresh identification based on the coin-portraits of the Syrian king Alexandros i Balas and his wife Kleopatra. The alleged likeness is to me, I confess, hardly convincing. Mr A. H. Smith, however, whom I consulted by letter, kindly writes (Oct. 17, 1911): 'I think Hauser has a better case than Watzinger. His coin is surprisingly like. But I gather, from what Hauser says, that the other version of the coin rather shook his own faith.'

draw near with gestures of acclamation. The whole scene takes place in front of a curtained colonnade. Above it stands Apollon in a cave with a *kithára* in his hand and an *omphalós* at his feet: against the *omphalós* lean the bow and quiver of the god, and one of the Muses¹ raising a roll stands before him. To the right of the cave and immediately in front of a large tripod with domed cover is the statue of a man holding a roll, which statue—as Goethe was the first to suggest—probably represents a poet² who has won

Fig. 97.

a tripod in some poetical contest³ and has celebrated the event by dedicating this votive relief. To the left of the cave and above it, winding up the mountain-height, are the eight remaining Muses,

¹ This figure has often been called the Pythian priestess. Her true character was determined by S. Reinach, and replicas were cited by W. Amelung: see C. Watzinger *op. cit.* p. 6.

² Others have interpreted the figure as Homer, Hesiod, Orpheus. But, had a famous poet of ancient date been meant, his name—as in the case of ΟΜΗΡΟΣ—would have been inscribed below him. The existing head is a restoration.

³ C. Watzinger *op. cit.* p. 21 cp. Paus. 9. 31. 3. Brückner *ib.* cites a yet closer parallel, *viz.* an inscribed slab from Teos (middle of 2nd cent. B.C.), now in the Fitzwilliam Museum at Cambridge, which concludes a decree in honour of the flute-player Kraton thus: παραρθεσθαι δὲ καὶ ἐν ταῖς θέαις καὶ ἐν ταῖς πομπαῖς παρὰ τὸν ἀνδριάντα τὸν Κράτωνος, τὸν ἐν τῇ θεάτρῳ τριπόδᾳ τε καὶ θυματήριον κ.τ.λ. (*Corp. inscr. Gr.* ii no. 3068, 22 ff.=Michel *Recueil d'Inscr. gr.* no. 1016, 22 ff.).

arranged in typical attitudes and furnished with conventional attributes. Higher still, and on a larger scale than the Muses, is their mother Mnemosyne¹. All these lead upwards to Zeus himself (fig. 98), who is seated or reclining on the mountain-top with a *himátion* wrapped about his legs, a sceptre in his right hand, and an eagle at his feet.

The significance of the whole design is tolerably clear. The ideal poet, inspired by Apollon and the Muses, ultimately derives his message from their omnipotent sire; he delivers to mankind the oracles of Zeus. Nay more, in a sense he *is* Zeus. Enthroned as a divine king on earth he is a human counterpart of the divine king enthroned in heaven², heaven being located on the summit of

Fig. 98.

the mountain. Nor was this a mere fancy-flight of Hellenistic imagination. It was, as we shall see in due course, a religious conviction inseparably bound up with immemorial Hellenic customs.

But the relief before us has a special as well as a general significance. C. Watzinger, who follows W. Amelung in ascribing the types of Apollon and the Muses to Philiskos of Rhodes³, and further attempts to explain the reclining Zeus as a Rhodian development of an originally Dionysiac *motif*⁴, suggests the following possibilities. Apollonios Rhodios, or some other epic poet

This identification, first proposed by G. Cuper in 1683, is now commonly accepted.

C. Watzinger *op. cit.* p. 17 justly says: 'In zeusähnlicher Haltung sitzt Homer,' and *ib.* p. 20 calls attention to the actual cult of Homer established at Alexandria by Ptolemy iv Philopator (*Ail. var. hist.* 13. 22) and existing also at Smyrna (*Strab.* 646).

³ C. Watzinger *op. cit.* p. 4 ff.

⁴ *Id. ib.* p. 14 ff.

of the Rhodian school, was successful in a poetical contest, held at Alexandria on behalf of Apollon and the Muses¹. He commemorated his victory by dedicating in a temple at Rhodes a votive relief made for him by Archelaos of Priene, a sculptor belonging to the Rhodian school of art. The locality of the contest thus accounts for the portraits of Ptolemy iv and Arsinoe, for the divine honours paid to Homer², and for the emphasis laid on Apollon and the Muses, while the nationality of the poet and the artistic traditions of the sculptor explain the adoption of Philiskos' types. Zeus, himself of a Rhodian type, is Zeus *Atabyrios* reclining on the highest peak of the island³. He was worshipped also on the akropolis of Rhodes, as was Apollon, in whose sanctuary Philiskos' group presumably stood.

Watzinger's reconstruction of the circumstances is attractive and hangs well together. But it is beset by uncertainties. We do not *know* that these types of Apollon and the Muses were those devised by Philiskos⁴, or that the *motif* of a reclining Zeus originated in Rhodes. The former is at most a probable guess; the latter is at most an improbable guess. Again, we do not *know* that Archelaos the sculptor belonged to the Rhodian school of sculpture, or that the supposed poet belonged to the Rhodian school of poetry, or that the contest took place at Alexandria, or that it had anything to do with the cult of Apollon and the Muses. In short, the whole explanation is hypothetical. And other hypotheses are equally possible. For example, it might be maintained that an epic poet of the Alexandrine school won a prize-tripod⁵ at the Panionia, the great festival of Poseidon *Helikónios* held in the territory of Priene⁶. He naturally got a local sculptor to carve his votive tablet. The sculptor of course introduced Homer as the prototype of all epic poets, paid the customary compliment to the king and queen of his patron's town, and—possibly prompted by the epithet *Helikónios*⁷—represented Mount Helikon with Zeus *Helikónios*⁷ on its summit and the Muses descending its side. The Muses suggested Apollon, and, at the expense of topographical accuracy, Mount Helikon is merged in another height of the same range and reveals Apollon, *omphalós* and all standing in his Delphic cave⁸.

⁸ A. H. Smith in the *Brit. Mus. Cat. Sculpture* iii. 248: 'It has been generally proposed that the rocky terraces on which the Muses appear in this relief represent

But guess-work is fatally facile. It will be more profitable to notice a point which, so far as I am aware, has escaped the observation of Watzinger and his predecessors—the extraordinary similarity of the Archelaos relief to the Marsyas vase from Ruvo. In both the artist has portrayed success in a contest of poetry or music. In both we see a mountain-side with Apollon half way up it playing the *kithára* or lyre. In both there are the Muses arranged at different levels on the slope—one holding two flutes, another seated to play the *kithára* or harp, a third standing with a roll in her hand. Lastly, in both the mountain is topped by a strikingly similar figure of Zeus. I would infer that Archelaos was indebted for his design, or at least for essential elements of his design,—not indeed to vase-painters of the fourth century B.C.—but to contemporary fresco-painters, who like their humbler brethren of the potter's trade were still at work under the far-reaching influence of Polygnotos¹.

Fig. 99.

There are extant two other representations of Zeus on the mountain to which allusion must here be made. A bronze medallion of Lucius Verus shows Zeus seated on a mountain, holding a thunderbolt peacefully on his knee with his left hand, while his right arm leaning on the mountain-top supports his head. The emperor in military costume and himself crowned by

Parnassus, and in this case the cave within which Apollo is standing would be the Corycian cave on that mountain.⁷ Not necessarily: it might be the actual *μαρτεῖον* at Delphoi, which is described as *ἄντρον* (Strab. 419, Eur. *Phoin.* 232 cp. *I.T.* 1245 ff.: A. P. Oppé in the *Journ. Hell. Stud.* 1904 xxiv. 214 ff. has not said the last word on the subject).

¹ Thus in the case of the art-type of Zeus reclining on a mountain-top the vase-paintings appear to form a link between some lost fresco of Polygnotos in the fifth century B.C. and the relief of Archelaos in the third. Later (ch. iii § 1 (a) iii) we shall see, in the case of the art-type of Zeus seated on a rock with Hera standing before him, how the vase-paintings bridge the interval between a Selinuntine metope of the fifth century B.C. and a Pompeian fresco of the first century A.D.

an armed figure of Roma is offering to the god a small wreath-bearing Nike (fig. 99)¹. The inscriptions on this medallion² prove that it was struck in the year 167 A.D. and commemorates the victories won for Verus in the east by his stern lieutenant Avidius Cassius. Not improbably the artist hinted at the name of the actual victor by depicting the emperor making his presentation to the mountain-god Zeus *Kásios*³. Lastly, a bronze coin of Ephesos, struck under Antoninus Pius, represents Zeus seated on a throne, which is set upon the flat summit of a mountain. Beneath this mountain lies another mountain-god holding a horn of plenty and inscribed *Peion*. Over his head descends a shower from the raised right hand of Zeus, while the left hand of that deity supports a thunderbolt. At the foot of the mountain on which Zeus sits enthroned is a temple; at the back of the same mountain, a three-storeyed building; and in the distance, perched upon rocks, appear two similar buildings and a clump of cypress-trees between them (fig. 100)⁴. There can be no doubt that Zeus is here represented as

Fig. 100.

enthroned on Mount Koressos, a height which dominates the whole valley of Ephesos and looks down on its neighbour Mount Peion.

The foregoing examples of a mountain conceived as the throne of Zeus must not be attributed to any original effort of imagination on the part of the Hellenistic artist. Behind the die-sinker and the sculptor lay popular belief and long-standing ritual practice. Those who in

ancient days visited Argos to see the famous statue of Hera, made by Polykleitos of ivory and gold, found the goddess in her temple seated on her throne. In one hand she carried a pomegranate, in the other a sceptre; and about both of them stories were told. The story about the pomegranate was mystic in character and too sacred to be rashly bruited abroad. That about the sceptre aimed at explaining the odd fact that a cuckoo was perched on the tip of it, and was as follows. When Zeus was in love with the maiden Hera, he transformed himself into a cuckoo, was caught and petted

by her, and so gained his desires. The scene of this idyll was Mount *Kokkýgion*, or the 'Cuckoo' Mount, near Hermione, on the top of which there was a sanctuary of Zeus, while on the top of the neighbouring Mount Pron was a corresponding sanctuary of Hera. Now the older name of Mount Kokkýgion was *Thórnaξ* or *Thrónaξ*, which means the 'Throne'.¹ It seems, therefore, highly probable that this mountain was regarded by the Greeks as the throne of Zeus. Indeed, it is possible that an actual throne, reputed to be that of Zeus, was visible on the mountain. When Pythagoras made a pilgrimage to Crete, he entered the cave near the top of Mount Ide wearing black wool, stayed there according

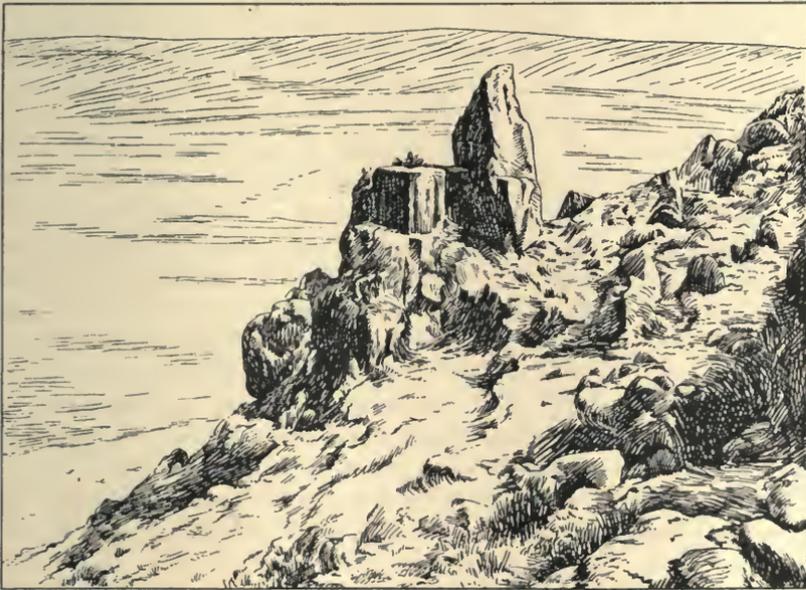

Fig. 101.

to custom thrice nine days and, among other ritual acts, inspected the throne which was strewn for Zeus once a year². It is noticeable, too, that Pergamon, whose altar to Zeus we have already considered, is described in *The Revelation of S. John the divine* as the place 'where Satan's throne is'.³

It is not, then, to be wondered at, if the Greeks brought into connexion with their Zeus a remarkable series of cult-monuments scattered up and down the mainland of Asia Minor, the islands of the Archipelago, and even Greece itself. Throughout these districts the tops of mountains and hills have been by some unknown people

¹ Append. B Argolis.

³ *Ib.* Mysia.

at some unknown date—possibly by the Hittites in the fourteenth and following centuries B.C.—adorned with thrones, large or small, cut out in the living rock. H. Gelzer records a ‘throne of Nahat’ on a mountain in Armenia¹. Near Ikonion in Lykaonia F. Sarre climbed an isolated rocky mound named *Tuzuk-Dagh*, some 150 feet above the level of the plain, and found on the summit a rock-cut seat or throne with traces of steps leading up to it². On the

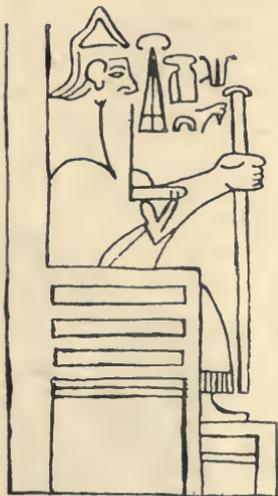

Fig. 102.

Kara-Dagh or ‘Black Mountain,’ an outlying ridge of Tauros, is an isolated hill the *Kizil-Dagh*, which rises sharply from the plain to a height of about 360 feet. Here in 1907 Prof. Sir W. M. Ramsay and Miss G. Bell found ‘a pinnacle of rock forty feet high, roughly carved into the shape of a seat or throne with high back’ (fig. 101)... ‘On the throne is incised a figure of the god, sitting, holding a sceptre in the left hand and a cup in the right’³. Prof. A. H. Sayce regards the seated figure as that of a king and interprets the Hittite inscription that accompanies it as the royal name Tarkyanas (fig. 102)⁴. Dr J. Garstang accepts this reading as against Prof. Ramsay’s Tarkuattes, but adds: ‘it is conceivable that we have here a representation of the deity called by a name which was that used also by the priest’⁵. The priestly king thus postulated was doubtless the dynast of Barata at the mountain-foot⁶. Rock-cut thrones have been repeatedly seen in Phrygia by A. Körte⁷. The rock-cut

⁶ A copper of Barata struck by Otacilia Severa shows Tyche with *kdlathos*, branch (?) and *cornu copiae* seated on a rock, a river-god at her feet (*Brit. Mus. Cat. Coins Lycaonia* etc. p. 2 pl. 1, 3). Another noteworthy coin-type of the same town is a standing Zeus, who rests on a sceptre and holds a *phidle* or globe, with an eagle beside him (*ib.* p. xix). Head *Hist. num.*² p. 713. Is Tyche enthroned on a rock the successor of a pre-Greek mountain-mother?

⁷ W. Reichel *Über vorhellenische Götterculte* Wien 1897 p. 31.

altars of Kybele discovered by Prof. Sir W. M. Ramsay on the plateau of *Dóghanlu*, the Phrygian town of Midas, resemble thrones at least as much as altars¹. The most striking example of these rock-cut thrones is, however, one on Mount Sipylus in Lydia. Pausanias, a native of the locality, calls it the 'throne of Pelops²'. And Dr Frazer in his commentary describes the scenery as follows³: 'On the south side of the fertile valley of the Hermus, Mount Sipylus (*Manissa-dagh*) towers up abruptly, like an immense wall of rock. Its sides are very precipitous, indeed almost perpendicular. The city of Magnesia, the modern *Manissa*, lies immediately at its foot. About four miles east of Magnesia the mountain wall of rock is cleft, right down to the level of the Hermus valley, by a narrow ravine or cañon, which pierces deep into the bowels of the mountain. It is called by the Turks the *Yarik Kaya* or "rifted rock." The cañon is only about 100 feet wide; its sides are sheer walls of rock, about 500 feet high; there is a magnificent echo in it. A small stream flows through the bottom; it is probably the Achelous of Homer (*Iliad*, xxiv. 616). It is plain that the ravine has been scooped out in the course of ages by the stream wearing away the limestone rock; but it would naturally be regarded by the ancients as the result of a great earthquake, such as are common in this district. On the western edge of the cañon, half-way up the mountain-wall of Sipylus, there shoots up a remarkable crag, which stands out by itself from the mountain-side. On one side it is possible from its summit to drop a stone 900 feet sheer into the cañon; on all other sides it rises with a perpendicular face 100 feet from the mountain. Even to reach the foot of this crag from the plain, stout limbs and a steady head are needful; for the ancient mule-path, partly hewn out of the rock, partly supported on walls on the edge of precipices, has mostly disappeared; and there is nothing for it but to cling as best you can to the bushes and the projections of the rock. In this way you at last reach the foot of the cliff, the sheer face of which seems to bar all further advance. However, on the western side of the crag there is a cleft or "chimney" (*cheminée*), as they would call it in Switzerland, which leads up to the top, otherwise quite unapproachable, of the crag. In antiquity there seems to have been a staircase in the "chimney." The first few steps of it may be seen under the bushes with which the rocky fissure is overgrown. The upper surface of the crag, reached

¹ Perrot-Chipiez *Hist. de l'Art v.* 148 ff. figs. 102—104, W. M. Ramsay in *Journ. Hell. Stud.* 1882 iii. 13 f. figs. 4 f., 42 fig. 9, pl. 21 B. On the thrones of Kybele and the Korybantés see further Gruppe *Gr. Myth. Rel.* p. 1523 n. 4.

² Append. B Lydia.

³ J. G. Frazer on Paus. 5. 13. 7 (iii. 552 f.).

through this cleft, is nowhere level; on the contrary, it slopes like the roof of a house and is indeed so steep that to climb up it is difficult. There are, however, twenty or thirty foundations of houses cut in the rock and rising one above the other like the steps of an immense staircase. Also there are seven or eight bell-shaped cisterns.

The ancient settlement on the summit of this remarkable crag would seem to be that to which classical writers gave the name of Tantalus or the city of Tantalus. They affirmed, indeed, that the

Fig. 103.

city had disappeared into a chasm produced by an earthquake; but probably the immense ravine beneath suggested the idea of the earthquake, and popular mythology completed the legend by asserting that the old city had been hurled down into its depths. See Pausanias, vii. 24. 13; Pliny, *Nat. Hist.* ii. 205, v. 117; Aristides, *Orat.* xv. vol. 1. p. 371 *sq.*, ed. Dindorf; cp. Strabo, i. p. 58.

On the very topmost pinnacle of the crag there is a square cutting in the rock, resembling the seat of a large armchair, with back and sides complete. It is about 5 feet wide, 3 feet from front to back, and 3 feet high at the back. The back of the seat (as it may be called) is simply the top of the precipice, which falls straight down into the ravine, a sheer drop of 900 feet. Across the ravine soars the arid rocky wall of Sipylus. On the other side the eye

ranges over the valley of the Hermus, stretched like a map at one's feet. There seems to be little doubt that this remarkable rock-cut seat, perched on the pinnacle of the dizzy crag, is no other than the "throne of Pelops" mentioned by Pausanias in the present passage. What the original intention of the cutting may have been, is a different question. Professor W. M. Ramsay thinks it was probably an altar on which offerings were laid.'

C. Humann, who discovered this throne in the year 1880, gives a most graphic account of his experiences in reaching it; and I am indebted to his article for the accompanying sketch (fig. 103)¹. W. Reichel adds the suggestion that the houses built on the upper part of the peak belonged in reality to a colony of priests, whose duty it was to serve the god represented by the throne above them. He also conjectures that this god was Apollon or some other form of the sun-god, if not *Hýpsistos* himself, and that the name of Pelops became attached to the throne as did that of Danaos to the throne of Apollon *Lýkios* at Argos, or that of Midas to the throne at Delphoi². Reichel holds that in all these cases the empty throne was by rights the throne of a god, which came to be regarded wrongly as the throne of a by-gone king. Its transference from a god to a king is—I would point out—much facilitated, if we may suppose that the king was viewed as the god incarnate. And in the case before us there are good reasons for suspecting that Pelops was regarded as in some sense a human Zeus³. Thus a rocky seat connected by the Greek inhabitants of Magnesia with Zeus, the chief Magnesian god⁴, would readily come to be called the 'throne of Pelops.' This does not of course preclude the possibility that the original possessor of the throne was neither Pelops, nor Zeus, but some other pre-Greek occupant such as Plastene, Mother of the Gods, whose primitive rock-cut image is still to be seen in its niche on the mountain-side 300 feet above the plain⁵.

¹ C. Humann 'Die Tantalosburg im Sipylos' in the *Ath. Mitth.* 1888 xiii. 22—41. The measurements of the throne, as given by him, are: height above sea-level 350^m or 1120 feet, length 1.55^m, depth 1.30^m, height 1.20^m.

⁴ W. M. Ramsay in the *Journ. Hell. Stud.* 1882 iii. 56: 'on the autonomous coins of Magnesia Zeus is the most characteristic type.' Cp. Append. B Lydia.

⁵ W. M. Ramsay in the *Journ. Hell. Stud.* 1882 iii. 33 ff., C. Humann in the *Ath. Mitth.* 1888 xiii. 26 ff. with map and pl. 1, 2, J. G. Frazer on Paus. 5. 13. 7 (iii. 553 f.).

However that may be, the Greeks do seem to have associated these rock-cut thrones with Zeus. High up on the south-eastern slope of Mount Koressos at Ephesos is another example of them. At the top of a precipitous cliff two steps are hewn out, which give access to a large oblong seat with end-pieces or arms and a high vertical back. In the angle made by this seat and its back another

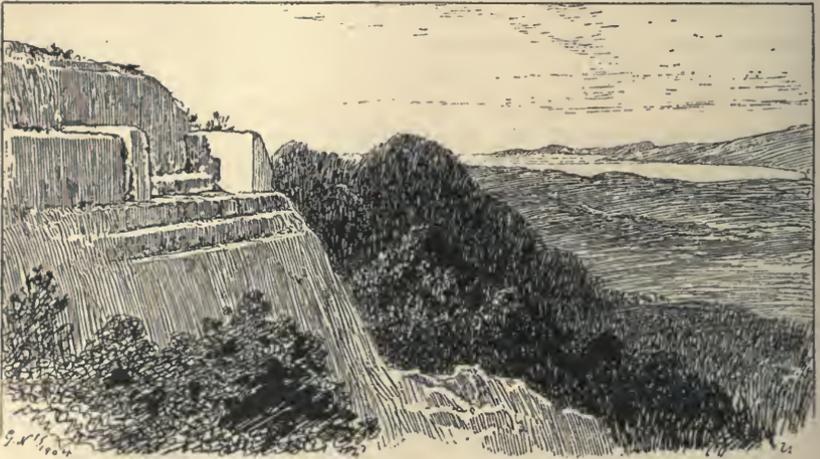

Fig. 104.

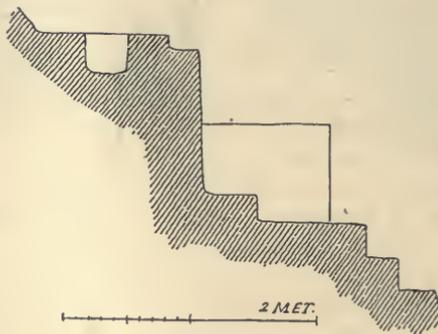

Fig. 105.

step is contrived, standing on which a man can easily reach a hole, presumably a receptacle for offerings, excavated behind the back in a second and higher horizontal surface. The whole arrangement is clearly seen in a sketch and section by Niemann (figs. 104—105)¹. There is no traditional name attached to this throne; nor is there

¹ From O. Benndorf *Forschungen in Ephesos* Wien 1906 p. 56 f. figs. 19, 20.

any inscription showing to what deity it was dedicated. Nevertheless, in view of the fact that the coin of Antoninus Pius cited above (fig. 100) actually represents Zeus enthroned upon Mount Koressos, it will hardly be denied that the Ephesians must have deemed this rock-cut seat the throne of Zeus. Whether the throne itself was the work of a Hellenic or of a pre-Hellenic population remains, as before, an open question. Possibly it had once belonged to the Amazonian mother-goddess, who continued to be worshipped at Ephesos as Artemis *Protothronie*, 'She of the First Throne!'

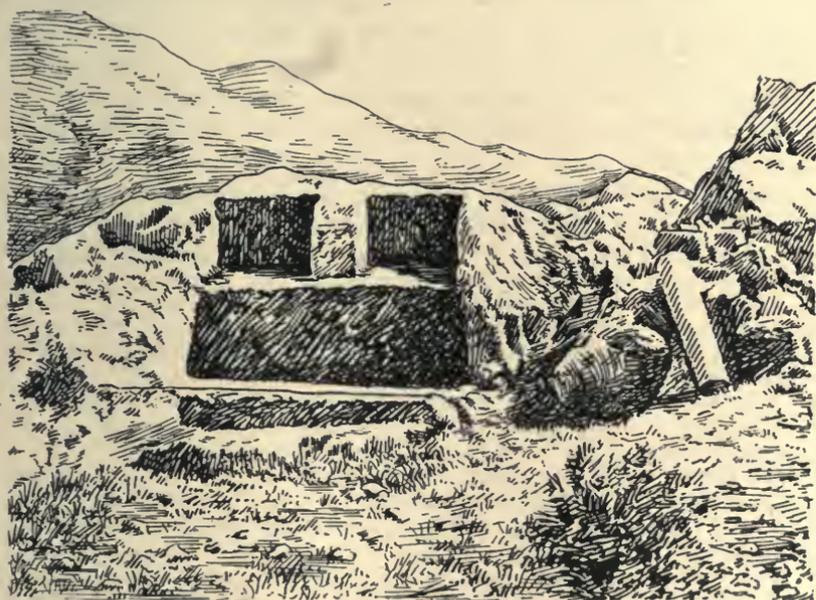

Fig. 106.

Sometimes the name of the god to whom the Greeks referred the throne is happily settled by means of an inscription. Off the west coast of Rhodes lies the little island Chalke, where on a hill-top are to be seen numerous traces of an ancient Greek Akropolis. Among these traces F. Hiller 'von Gaertringen noted a double rock-cut throne (fig. 106)². A single step leads up to two seats with a common arm between them. The seats exhibit a circular smoothing or polish; and on their front surface in late and rude characters is an inscription recording the names of Zeus and

¹ Paus. 10. 38. 6 ὑπὲρ τοῦ βωμοῦ τῆς Πρωτοθρονίης καλουμένης Ἀρτέμιδος, cp. Kallini. *h. Artem.* 228 πρωτόθρονη.

² *Arch.-ep. Mitth.* 1895 xviii. 3f. fig. 2. The dimensions are: width about 1.30^m, height 0.95^m (=back 0.40^m+seat 0.55^m), depth of seat 0.55^m, height of step 0.14^m.

Hekate¹. In Rhodes itself, not far from Lartos, there is a rock-cut throne some nine or ten feet above the road-way: over against this throne, on the opposite side of the road, is an inscription carved on the face of a steep rock, eighteen feet or so above the ground, in letters not later than the third century B.C.; the inscription is a votive couplet dedicating a tablet (now lost) to Hekate². Again it must be considered doubtful whether Zeus and Hekate were the original occupants of these thrones.

That doubt hardly arises in connexion with a remarkable series of rock-cuttings accompanied by inscriptions found at Thera in 1896³. At the south-eastern end of the ridge on which the town of Thera stood, and fully 1000 feet above sea-level, are the ruins of a very ancient building in polygonal masonry, possibly a *herôion* of the eponym Theras⁴. Below the floor of this building, and therefore older yet, is a group of inscriptions graven on the underlying rock⁵. Three of them give the name *Zeús*⁶, two *Kourés*⁷, one both *Zeús* and *Kourés*⁸, the rest *Apóllon*⁹, *Boreatós*¹⁰ i.e. Zeus *Boreatós*, *Deúteros*¹¹, *Dióskouroi*¹², *Khtron*¹³, *Lokhaía Damía*¹⁴, *Háidas* or *Potidás*¹⁵, *Pelórios*¹⁶ and *Polieús*¹⁷ i.e. Zeus (?) *Pelórios* and Zeus *Polieús*. lastly *Melchios* in the fourth¹ and *Zeùs Melchios* in the fourth or third century². Beside most of these inscriptions, both within and without the old building, certain small sinkings, round, square, or irregularly shaped, and hardly more than a foot in length and breadth, are made in the rock. These look as though they had been intended to receive altars or dedications of some sort, or perhaps, as F. Hiller von Gaertringen suggests, to serve instead of altars themselves³. P. Wolters, however, describes them as 'seat-shaped cuttings' (*sitzartigen Einarbeitungen*)⁴, and W. Reichel goes so far as to call them 'rock-thrones' (*Felsthronen*)⁵. The principal deities worshipped at an early date in this 'agorá of the gods'⁶ were clearly Zeus and Koures. Not improbably—as E. Maass has argued⁷—*Kourés* was a cult-epithet of Zeus himself⁸. If so, the Curetic cult of Thera was analogous to the Curetic cult of Crete⁹. In this connexion a dedication of hair to the Dymanian nymphs is noteworthy¹⁰. Moreover, it can hardly be accidental that the same site was later occupied by the Gymnasium of the *éphēboi*¹¹. It is likely too that the cult stood in some relation to the adjoining grotto, where warm currents of moist air issue from two holes in the rock-wall and an intermittent roar—perhaps that of the sea far below—can be faintly heard. The explorers' workmen would not risk sleeping in the cave. If it was to the Kouretes of Thera what the Dictæan and Idaean caves were to the Kouretes of Crete¹², we may legitimately suspect that it once contained a throne of Zeus.

¹ *Inscr. Gr. ins.* iii no. 406 εὐστὰ | Μηλίχι[ος]=Collitz-Bechtel. *ib.* no. 4752. On εὐστρόν see L. Ziehen in the *Ath. Mitth.* 1899 xxiv. 267 ff.

⁴ P. Wolters in the *Ath. Mitth.* 1896 xxi. 255.

⁵ W. Reichel *Über vorhellenische Götterculte* Wien 1897 p. 31.

⁶ On the deities named in the rock-inscriptions of Thera see F. Hiller von Gaertringen *Die archaische Kultur der Insel Thera* Berlin 1897 p. 17 ff. and *Die Insel Thera* i. 149 ff., iii. 63 f.

⁷ E. Maass in *Hermes* 1890 xxv. 406 n., taking *Kourḗs* to be for *Kouroptrófos* (which is improbable) and comparing Apollon *Kouréas* of Teos (*Dittenberger Syll. inscr. Gr.*² no. 445 Ἀπόλλωνος | Κουρέου | Πολλιδῶν | καὶ [Φ]αυαῖδων, cp. Michel *Recueil d'Inscr. gr.* no. 807 = *Bull. Corr. Hell.* 1880 iv. 168).

⁸ Cp. *supra* pp. 15, 104 ff.

⁹ H. Usener in F. Hiller von Gaertringen *Die Insel Thera* i. 149 n. 34 compared the *kourḗs* of Thera with the *πρωτοκούρης* of Ephesos and most ingeniously suggested that the enigmatic personage *Δεύτερος* may have been the 'second' in command of a band of human *kourḗtes*. I incline, however, to think that *Δεύτερος* means 're-born' (*δευτερό-ποτμος*) and is an epithet of *Kourḗs*, the youthful Zeus.

¹⁰ *Inscr. Gr. ins.* iii no. 377 [Δ](ν)(μ)άν(ω)ν | [Νόμ]φαι | κό(μ)(α)μ...β' = Collitz-Bechtel *ib.* no. 4741. See F. Hiller von Gaertringen *Die Insel Thera* i. 284.

¹² Append. B Crete.

Between Megara and Eleusis lies the mountain-range of Kerata. The highest of its four peaks (1527 ft)—as Prof. A. Milchhöfer first noted¹—is thought by the peasants of Megara to have been the spot whence Xerxes on his throne watched the battle of Salamis. Since the site agrees with Akestodoros' description², W. Reichel twice visited it in order to verify Milchhöfer's report. At the south-east corner of the little plateau that crowns the topmost peak he found an isolated rock partially hewn into the shape of a seat with rounded back and projecting footstool (fig. 108)³. The seat commands a wide view, but is so placed that one sitting on it would face north and look directly away from Salamis! Reichel concludes that it is a very ancient

Fig. 108.

mountain-throne, to which in popular belief the story of Xerxes has become attached⁴.

In an angle of the Mouseion Hill at Athens there are no less than seven such seats (figs. 109–110)⁵. Carefully cut in the rock along one side of a platform or terrace, with a single step in front of them, they give the impression of being a row of seats

¹ See W. Reichel *Über vorhellenische Götterculte* Wien 1897 p. 21.

² Akestodoros (*Frag. hist. Gr.* ii. 464 Müller) *ap. Plout. v. Them.* 13 *ἐν μεθορίῳ τῆς Μεγαρίδος ὑπὲρ τῶν καλουμένων Κεράτων.*

³ W. Reichel 'Ein angeblicher Thron des Xerxes' in the *Festschrift für Otto Benndorf* Wien 1898 pp. 63–65 with fig. (sketched by E. Gilliéron from a photograph).

⁴ The actual throne was a golden chair (Akestodoros *loc. cit.*) with silver feet, preserved on the Akropolis at Athens (Dem. in *Timocr.* 129 with schol.) in the Parthenon (Ἱερὸν κρῆσιν ἀργυρόπους δίφρος).

⁵ E. Curtius and J. A. Kaupert *Atlas von Athen* Berlin 1878 p. 19f. description, plan, and section; pl. 6, 4 view.

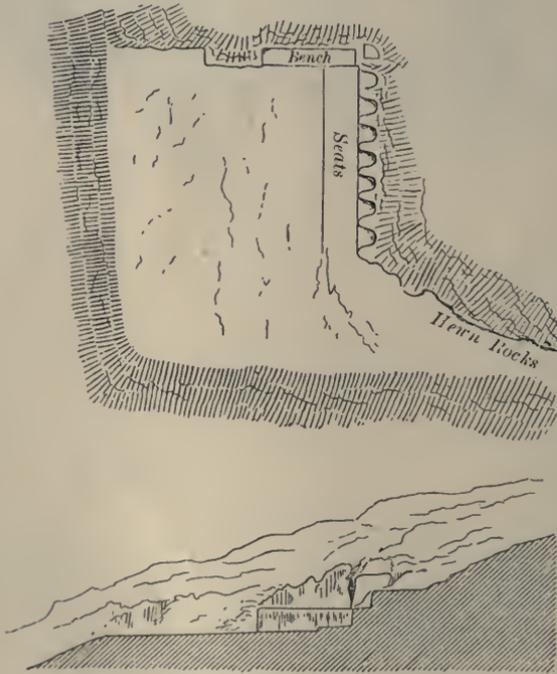

Fig. 110.

for judges or the like, forerunners perhaps of the Council on the Areiopagos. They are about two hundred yards from the rock-cut niche in the Pnyx where Zeus *Hypsistos* was worshipped¹. It seems possible, therefore, that we have here an open-air tribunal at which decisions were delivered under the inspiration of Zeus. In fact, I incline to identify the seven seats with the so-called 'Seats of Zeus,' the place at Athens where, according to old tradition, Athena when she contended with Poseidon for possession of the Akropolis, begged Zeus to give his vote for her, promising on her part to sacrifice the first victim on the altar of Zeus *Polieus*².

Fig. 111.

At Phalasarna in western Crete three sandstone thrones are hewn in the lower slopes of a coast-hill near the necropolis. The best-preserved of them was described by R. Pashley in 1837 as 'a great chair—cut out of the solid rock: the height of the arms above the seat is two feet eleven inches; and its other dimensions are in proportion³.' But the most interesting feature of this throne, the pillar carved on the inner surface of its back, was first observed and drawn by L. Savignoni and G. de Sanctis in 1901 (figs. 111,

¹ *Infra* Append. B.

³ Append. B Crete.

which he is said to have built a city¹) and, later², in a cave high up on the side of Mount Ide³. Both districts had strange stories to tell of the way in which the divine child had been nurtured by doves

Fig. 116.

Fig. 117.

or bees, a goat or a pig, while Kouretes and Korybantēs clashed their weapons to drown his infant cries (figs. 116, 117)⁴. But Lydia

¹ Diod. 5. 70 ἀνδρωθέντα δ' αὐτὸν φασὶ πρῶτον πῶλον κτίσαι περὶ τὴν Δίκταν, ὅπου καὶ τὴν γένεσιν αὐτοῦ γενέσθαι μυθολογοῦσιν· ἢς ἐκλειφθείσης ἐν τοῖς ὑστερον χρόνοις διαμένειν ἐτι καὶ νῦν ἔρματα τῶν θεμελιῶν. Sir Arthur Evans identifies this city with the extensive prehistoric ruins at Goulàs (see his 'Goulàs: The City of Zeus' in the *Ann. Brit. Sch. Ath.* 1895—1896 ii. 169 ff.; cp., however, the more thorough investigations of J. Demargne in the *Bull. Corr. Hell.* 1900 xxiv. 222, 1901 xxv. 282 ff., 1903 xxvii. 206 ff., and of A. J. Reinach in the *Jahrb. d. kais. deutsch. arch. Inst.* 1910 xxv Arch. Anz. p. 404 f.).

² There is evidence that the cult of the Dictæan cave was in time superseded by that of the Idaean cave. With very rare and sporadic exceptions, the Dictæan antiquities do not come down lower than the Geometric period, i.e., probably the opening of the eighth century B.C.' (D. G. Hogarth in the *Ann. Brit. Sch. Ath.* 1899—1900 vi. 115). Further, a treaty between Lyttos and Olous (*Corp. inscr. Att.* ii. 1 no. 549 b, 5 = Collitz-Bechtel *Gr. Dial.-Inscr.* iii. 2. 380 f. no. 5147 b, 5) makes the Lyttians swear by Τῆνα Βιδάταν, 'Zeus of Ide,' while another inscription (*ib.* iii. 2. 301 ff. no. 5024, 22 f.) mentions a temple of Zeus τῷ Βιδάρῳ on the frontier of Priansos: Lyttos and Priansos are so near to Mt Dikte that, had the Dictæan cult still been flourishing, Zeus would presumably have been invoked as Δικραῖος, not Βιδάρας (R. C. Bosanquet in the *Ann. Brit. Sch. Ath.* 1908—1909 xv. 349).

³ Append. B Crete.

⁴ Von Rohden-Winnefeld *Ant. Terrakotten* iv. 1. 8 f., following E. Braun (*Mon. d. Inst.* iii pl. 17, *Ann. d. Inst.* 1840 xii. 141 ff. pl. K), distinguish two types of terra-cotta reliefs: (1) the Caeretan type shows the infant Zeus in the arms of a female seated on a throne with two Kouretes to right and left; the best example is in the Ny Carlsberg collection (*Ant. Terrakotten* pl. 10). (2) The Roman type, referable to the Augustan age, shows the infant Zeus seated on a rock and introduces a third Koures; the best

was prepared to dispute with Crete the honour of having been his birth-place¹: Mount Sipylus², Mount Tmolos (fig. 118)³, and Mount Messogis (figs. 119, 121)⁴ were in that respect rivals of Dikte

Fig. 118.

Fig. 119.

Fig. 120.

Fig. 121.

Fig. 122.

and Ide. It is probable that the legends of Zeus' birth and infancy were localised on the mountains of Phrygia also; for coins of Akmoneia (figs. 122, 123)⁵, Apameia (fig. 124)⁶, Laodikeia on the

example is in the British Museum (*Ant. Terrakotten* pl. 25, cp. pl. 135 a variant of the second century in the Louvre).

I figure two specimens of the second type: (a) fig. 116 (after O. Benndorf in the *Jahresh. d. oest. arch. Inst.* 1902 v. 151 f. fig. 38) a fragment of terra-cotta, the design of which differs in some respects from that of the reliefs enumerated by Overbeck *Gr. Kunstmyth.* Zeus p. 336 f. Atlas pl. 4, 4: the infant is named ΖΕΥC and is seated on a rock with a wingless thunderbolt behind him.—(b) Fig. 117 the corresponding part of the above-mentioned relief from Cervetri (?) acquired by the British Museum in 1891 (*Brit. Mus. Cat. Terracottas* p. 379 no. D 501 pl. 39, H. B. Walters *The Art of the Romans* London 1911 p. 136 pl. 58): the inscription is here ΖΕΥ[C].

Seleukeia on the Kalykadnos (figs. 126¹, 127²) may have reference to the Corycian Cave in Mount Korykos³. It is not, however, certain that the child seated on a throne and surrounded by dancing Kouretes is Zeus, at least in the ordinary acceptation of that name. It may be that the Greeks would rather have termed him Dionysos; for a coin of the Ionian Magnesia (fig. 128)⁴ shows

Fig. 128.

Fig. 129.

the same childish figure seated in like manner on a princely seat with a covered basket and snake visible beneath it⁵. But we have not yet exhausted the list of mountains where Zeus was said to

⁵ Cp. Imhoof-Blumer *ib.* p. 120 ff. no. 314 pl. 8, 34, no. 316 pl. 8, 32, no. 317, no. 318 pl. 8, 31, no. 318a.

An ivory relief in the Milan Museum (*Arch. Zeit.* 1846 iv. 217 ff. pl. 38, *Ann. Brit. Sch. Ath.* 1908—1909 xv. 320 fig. 5) shows the child Dionysos seated on a stool in front of a rocky cave flanked by Kouretes and Maenads.

Another relief (E. Gerhard *Antike Bildwerke München Stuttgart & Tübingen* 1828—1844 p. 348 pl. 104, 1), said to be in the Vatican (but see F. Matz in the *Ann. d. Inst.* 1870 xlii. 100 n. 3), represents him seated on a shield, while Kouretes clash their weapons about him: to the right a snake crawls out of a half-open basket on the lid of which a goat-footed Pan is stamping; beyond Pan is a shaggy Silenos.

have been born. Pergamon¹ certainly, and possibly Mount Ide in the Troad², were of the number. Among the Greek islands Naxos had its own story of the birth of Zeus³, connected perhaps with Mount Drios⁴. Kronos was said to have swallowed the stone that Rhea gave him instead of Zeus at Chaironeia in Boiotia, on a rocky height called Petrachos⁵: Thebes too claimed to be the birth-place of Zeus⁶ and could point to a place that took its name from the event⁷. In Messenia local piety declared that Zeus had been, if not born, at least brought up by the nymphs upon the summit of Mount Ithome⁸. But of all the non-Cretan districts Arkadia had established the strongest claim to be considered the cradle of Zeus⁹: here on Mount Thaumasion Kronos had swallowed the stone¹⁰, and here on Mount Lykaion Zeus was born¹¹ and reared¹².

(d) The Mountain as the Marriage-place of Zeus.

The union of Zeus with Hera was likewise referred by the Greeks to a variety of mountain-tops. The *Iliad* in a passage of more than usual beauty describes how the two slept together on a peak of the Trojan Ide :

So Kronos' son, and clasped his bride to his breast.
Beneath them Earth divine made grass to grow
New-nurtured, and the dewy lotus-bloom,
Crocus and hyacinth, thick and soft withal,
Which raised them from the ground. Thereon they lay,
And o'er them spread a cloud magnificent
And golden : glittering dew-drops from it fell.
Thus slumbered still the Sire on Gargaros' height,
Vanquished by sleep and love, his wife in his arms¹³.

Mount Taygeton as seen from Sparta.

[Mount Talcion is the highest point towards the southern (left-hand) end of the range.]

See page 155 f.

Others named Mount Oche in Euboea, Mount Kithairon in Boiotia, Mount Kokkygion in Argolis, as the scene where Zeus took Hera for his bride¹. It was said too that Zeus met Semele on Mount Sipylus², that he consorted with Leto in a shady nook and natural bower on Mount Kithairon³, that he seduced Kallisto in the neighbourhood of Mount Lykaion⁴, that he carried off Europe to his cave in Mount Dikte⁵. He formed *liaisons*, moreover, with more than one mountain-goddess or mountain-nymph. Mount Agdos, a rocky summit of Galatia, bore to him a bisexual child Agdistis, about whom one of the wildest and most archaic of all Greek tales was told⁶. According to the Orphic cosmogony, the original rulers of 'snowy Olympos' were Ophion and the Oceanid Eurynome: the former gave place to Kronos, the latter to Rhea, who in their turn were eclipsed by Zeus⁷. But Eurynome became by Zeus the mother of the Charites⁸ and of Asopos the river-god⁹. Again, the ancient systematisers of mythology, who recognised five different Athenas, distinguished one as the daughter of Zeus and Koryphe, adding that this, the fourth, Athena was identical with the inventress of four-horse chariots, whom the Arcadians called Koría¹⁰. Pausanias speaks of the Arcadian temple of Athena Koría as standing on the *koryphé* or 'peak' of a mountain¹¹. It is, therefore, practically certain that in Arkadia Zeus was paired with a mountain-goddess or mountain-nymph named Koryphe. Another of his amours was with Taygete, Atlas' daughter¹², of whom was born Lakedaimon, the eponym of the Lacedaemonians¹³. But Taygete was herself the eponym of Mount Taygeton¹⁴, the fine range which stretches some seventy miles from Belbina to Tainaron and culminates in Mount Taleton (7902 feet) above Sparta (pl. xiv). Colonel Mure says of this majestic mountain-mass: 'Whether from

its real height, from the grandeur of its outline, or the abruptness of its rise from the plain, (it) created in my mind a stronger impression of stupendous bulk and loftiness than any mountain I have seen in Greece, or perhaps in any other part of Europe.¹ Here surely was a mountain-bride worthy of Zeus himself. Pelasgos, the forefather of the Pelasgians, was, according to one account, the son of Zeus by Larissa², whose name repeatedly occurs as that of a Pelasgian burgh or rock-fortress³. And lastly a Sicilian myth told how Aitne, the name-sake of Mount Aitne, had been embraced by Zeus and then, through fear of Hera, hidden away in the Earth till she bore twin sons, the Palikoi, whose strange volcanic springs still interest travellers that visit the *Lago dei Palici* near the town of *Palagonia*⁴.

Mountain-eponyms were either female or male. Zeus not only consorted with the former, but also became the father of the latter. Thus Gargaros⁵, Geraistos⁶, Olympos (?), Solymos⁸, Tainaros⁹, were all regarded as his sons. Atlas, the supporter of the sky, who as early as the middle of the fifth century B.C. was identified with a great mountain in north-western Africa¹⁰, was, according to one genealogy, the son of Zeus¹¹. A daughter of Atlas¹² named Plouto¹³ bore to the same god Tantalos, whose name was given to

a mountain in Lesbos¹ and whose town was situated on an almost inaccessible crag of Mount Sipylos².

The remarkable tradition, current in the vicinity of Mount Olympos, that heaven and earth once met upon the summit will be discussed in another connexion.

(e) The Mountain as the Burial-place of Zeus.

The Cretans declared that Zeus was a prince, who had been ripped up by a wild boar and buried in Crete,—an assertion which is supposed to have earned for them their traditional reputation as liars³. Numerous writers of Hellenistic and Byzantine times mention the tomb of Zeus as an object of interest in Crete⁴, though they do not agree as to its exact locality. Ennius⁵ places it at Knossos, Varro⁶ and Porphyrios⁷ on Mount Ide, Nonnos⁸ on the top of Mount Dikte. Conceivably more districts than one had a local legend of Zeus dead and buried on a mountain. His tomb

¹ Steph. Byz. *s.v.* Τάνταλος, *cp. s.v.* Πόλιον.

² *Supra* p. 137 ff.

³ My friend Dr J. Rendel Harris 'The Cretans always Liars' in the *Expositor* 1906 pp. 305—317 cites from the *Gannat Busamé* or 'Garden of Delights' (a Nestorian commentary on Scripture full of extracts from Theodore of Mopsuestia etc.) the following note on Acts 17. 28: "In Him we live and move and have our being." The Cretans used to say of Zeus, that he was a prince and was ripped up by a wild boar, and he was buried: and lo! his grave is with us. Accordingly Minos, the son of Zeus, made over him a panegyric and in it he said: "A grave have fashioned for thee, O holy and high One, the lying Kretans, who are all the time liars, evil beasts, idle bellies; but thou diest not, for to eternity thou livest, and standest; for in thee we live and move and have our being."³ Dr Rendel Harris suggests that the panegyric in question may be the poem by Epimenides on Minos and Rhadamanthys (Diog. Laert. 1. 112) and *cp.* Kallim. *h. Zeus* 8f. Κρήτες ἀέλ ψεύσται· καὶ γὰρ τάφον, ὃ ἄνα, σείο | Κρήτες ἐτεκτῆσαντο. σὺ δ' οὐ θάνα· ἔσσι γὰρ ἀέλ. appears to have been marked by a stone¹, and to have borne an inscription, which is variously recorded². In the first century of our era Pomponius Mela says that the tomb with its inscribed name affords 'hardly a clear trace of Zeus who is there buried³.' But a thousand years later Michael Psellos notes the legend as still living, and relates that the Cretans show a hill or cairn above the grave of Zeus⁴. Buondelmonti, who visited Mount Juktas in 1415, speaks of a cave on the right hand side of a road leading thither and states that at the upper end of the cave is the tomb of Zeus bearing an illegible inscription⁵. Belon in 1555 reports that the sepulchre of Jupiter as described by the ancients is yet to be seen on the mountain of the Sphagiotes⁶. Modern travellers have the same tale to tell. When R. Pashley visited Crete in 1834, he stayed at Arkhanes on the eastern side of Mount Juktas. 'I was

⁶ P. Belon *Observations sur Plusieurs Singularités* Paris 1555 i cap. 17 p. 31 cited by N. G. Politis *Παραδόσεις* Athens 1904 ii. 778.

of course anxious,' he says¹, 'to hear something of the sepulchre of Zeus; but it was in vain that I inquired of my host...for any cave on the mountain. He knew of nothing of the kind; and all that I could learn from him was that, about a mile off, there is a fountain with an inscription on it. When I had thus failed in obtaining any information about the cave, I said, rather meaning to tell him an old story, than supposing that I should learn any thing, that one Zeus, a god of the Hellenes, was said to have been buried there; and that it was his tomb that I wished to see². I had

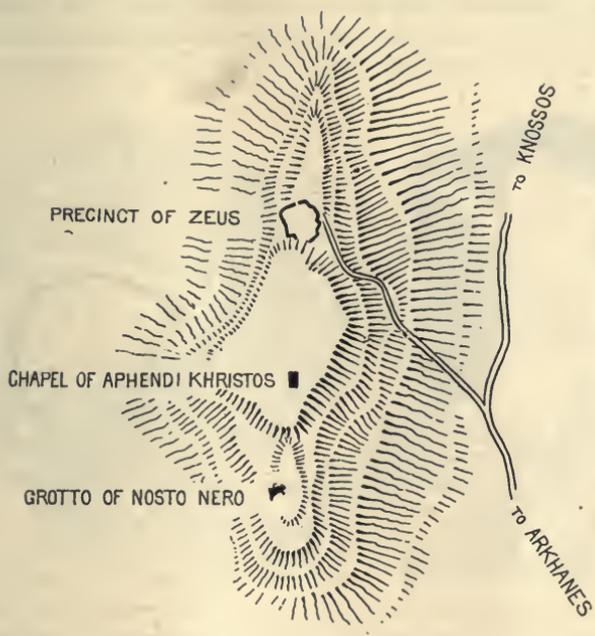

Fig. 130.

pronounced the very name by which a place on the summit of the mountain is known to all the people in the neighbourhood, although only a few shepherds have ever seen it. My host had never heard it called by any other name than the tomb of Zeus, and therefore had not understood me at first, when I inquired after a cave.... I found, as a guide up the mountain, a shepherd, who had become acquainted with the tomb of Zeus in tending his flock. A good hour was spent in reaching the summit, towards the northern

¹ R. Pashley *Travels in Crete* Cambridge 1837 i. 211 ff.

² *Id. ib.* i. 211 n. 2 says: 'Τοῦ Διὸς τὸ μνημεῖον, ἢ τοῦ Διὸς τὸ μνήμα, were my words.' N. G. Polites *Παραδόσεις* Athens 1904 i. 97 no. 174 gives the name in actual use as 'τὸ Δία τὸ μνήμα.

extremity of which I observed foundations of the massive walls of a building the length of which was about eighty feet. Within this space is an aperture in the ground, which may perhaps once have led into a moderate-sized cave; but, whatever may have been its former size, it is now so filled up, that a man cannot stand in it, and its diameter is not above eight or ten feet.'

In 1899 Mr A. Taramelli published a sketch-plan of Mount Juktas (fig. 130)¹, marking a grotto near its southern summit and the precinct-wall on its northern summit. The grotto is a natural cavern facing west and known as the *Nostò Nerò*. It is about six metres from front to back and has two small fissures running left and right into the rock (fig. 131)². The earth on the floor of the

Fig. 131.

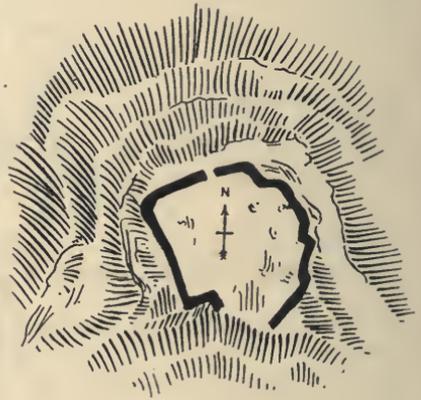

Fig. 132.

cavern, perhaps a metre in depth, has yielded terra cotta figures of animals and fragments of pottery³. The precinct-wall forms an irregular square of 'Cyclopean' masonry (fig. 132)⁴. On the north, where it rises to an average height of three metres and at a few points to five metres (fig. 133)⁵, there seems to have been a gateway.

¹ A. Taramelli in the *Mon. d. Linc.* 1899 ix. 350 fig. 23.

² *Id. ib.* 1899 ix. 357 fig. 27.

³ My friend Prof. R. C. Bosanquet writes (June 9, 1911): 'There is a cave on Mt Juktas, a long narrow cleft, into which I have crawled and in which I have found Hellenic pottery. It is on the left of the present path from Arkhanais to the peak on which Evans has begun to explore a Minoan sanctuary. There was a monastery of some importance on the peak in Buondelmonti's time; he obtained a manuscript from it. See Legrand's edition of B. (preface, I think)' [É. Legrand *op. cit.* p. xxv *Anno Domini* M.CCCC.XV, v mensis septembris, ego presbyter Christoforus de Bondelmontibus de Florentia emi hunc librum in monte Iucta in monasterio S. Salvatoris insulae Creta, hyperperis XI.].

⁴ A. Taramelli in the *Mon. d. Linc.* 1899 ix. 353 ff. fig. 25.

⁵ *Id. ib.* 1899 ix. 353 fig. 24.

To the south the wall abuts on a rocky elevation, which forms the highest peak of the mountain and shows clear traces of artificial cutting. Mr Taramelli, who notes 'scanty traces of a building in the middle of this precinct',¹ inclines to regard it as a stronghold. He found in it much broken pottery of various dates, including pieces of Minoan *pithoi*.

This account is confirmed by Sir Arthur Evans, who was told by Dr J. Hazzidakis, president of the Cretan Syllogos at Kandia and now ephor of antiquities, that the remains on the top of Mount Juktas are still known to the country folk as *Mnēma toû Ziá*, 'the Tomb of Zeus'.² Sir Arthur Evans himself explored the summit

Fig. 133.

twice, and says³: 'All that is not precipitous of the highest point of the ridge of Júktas is enclosed by a "Cyclopean" wall of large roughly oblong blocks, and within this enclosure, especially towards the summit, the ground is strewn with pottery dating from Mycenaean to Roman times, and including a large number of small cups of pale clay exactly resembling those which occur in votive deposits of Mycenaean date in the caves of Dikta and of Ida, also intimately connected with the cult of the Cretan Zeus. No remains of buildings are visible in this inner area, which tends to show that the

¹ *Id. ib.* 1899 ix. 355 'dalle scarse tracce di un edificio sorgente nel centro di questo recinto si può pensar ad un *temenos* fortificato, dove, in caso di pericolo, fosse possibile agli abitanti del piano di rifugiarsi e difendere le provviste ed i tesori del tempio,' etc.

² *Journ. Hell. Stud.* 1901 xxi. 121 n. 8.

³ *Ib.* 1901 xxi. 121 f.

primitive enclosure was the temenos of a sanctuary, rather than a walled city. On the uppermost platform of rock, however, are remains of a building constructed with large mortarless blocks of which the ground-plan of part of two small chambers can be roughly traced. A little further on the ridge is the small church of Aphendi Kristus [*sic*], or the Lord Christ, a name which in Crete clings in an especial way to the ancient sanctuaries of Zeus¹ and marks here in a conspicuous manner the diverted but abiding sanctity of the spot. Popular tradition, the existing cult, and the archaeological traces point alike to the fact that there was here a "holy sepulchre" of remote antiquity.

Mount Juktas is not the only Cretan locality that claims connexion with Zeus. A. Soutzo², writing in 1829, states that a village situated at the foot of Mount Ide is called *Zoúlakkon*³, 'the Valley of Zeus,' and records the local tradition that the god, when he came to visit the summits of Ide, used to descend here. Soutzo adds that the inhabitants of the country still invoke Zeus by using the ejaculation 'Hear me, god *Zónos*!' This is confirmed

¹ Sir Arthur Evans adds in a footnote: 'See *Academy*, June 20, 1896, p. 513. The eastern and western ranges of Dikta, the sites respectively of the Temple and Cave of Zeus, are known as the Aphendi Vouno, from *Ἀφέντης Χριστός*, or "Christ the Lord." A votive deposit, apparently connected with some Zeus cult, on a peak of Lasethi is also known as Aphendi Christos. It is, perhaps, worth noting in this connexion that at "Minóan" Gaza Zeus Krétagenés was known as Marnas, a form of the Syrian word for "Lord." B. Schmidt *Das Volksleben der Neugriechen* Leipzig 1871 i. 27 thinks it possible that *Ἐφέντη-βουνό*, the local name for a high peak in the easternmost part of Crete (eparchy Siteia), has reference to a former cult of Zeus, and *ib.* n. 4 cites *Ἀφέντης* as the name of a summit in the eparchy of Lasithi. These are the 'eastern and western ranges' mentioned by Sir Arthur Evans.

² A. Soutzo *Histoire de la révolution grecque* Paris 1829 p. 158 'D'après une tradition orale des Crétois, Jupiter avait coutume d'y descendre lorsqu'il venait visiter les sommets de l'Ida: c'est pour cette raison qu'on le nomme *Zoúlakkon*, "vallée de Jupiter," et, ce qui n'est pas moins curieux, les indigènes du pays conservent encore l'invocation suivante de leurs ancêtres, corrompue par le temps *Ἡκοῦτέ μου Ζῶνε θεέ!* "Exauce-moi Jupiter!" cited by N. G. Polites *Μελέτη ἐπὶ τοῦ βλοῦ τῶν Νεωτέρων Ἑλλήνων* Athens 1871 i. 41 n. 1, *Παραδόσεις* Athens 1904 ii. 778, B. Schmidt *Das Volksleben der Neugriechen* Leipzig 1871 i. 27, R. Rodd *The Customs and Lore of Modern Greece* London 1892 p. 132 n. 1, J. C. Lawson *Modern Greek Folklore and Ancient Greek Religion* Cambridge 1910 p. 74.

³ With *Zoúlakkon* B. Schmidt *op. cit.* i. 27 n. 5 compares *Zouvoláko* (another name of the same village in the eparchy Mylopotamo), *Zoú* (in Siteia), *Zήντα* (in Arkadia). The last of these has, he considers, most claim to be connected with Zeus.

I have failed to find either *Zoúlakkon* or *Zouvoláko* on the Admiralty Chart of western Crete. There is, however, a *Zutulana* in Mylopotamo, the position of which is approximately 24°. 50' E. by 35°. 18' N. Is this a third name of the same place? The German reduction of Capt. Spratt's map (*Die Insel Candia oder Creta*) marks *Zutulako* about 1½ miles S.W. of Axos.

On Mt Kentro in the eparchy Amario is a field called *Zoú κάμπος* (N. G. Polites *Παραδόσεις* Athens 1904 i. 98 no. 174).

⁴ With *Ἡκοῦτέ μου Ζῶνε θεέ* C. Wachsmuth cp. the Albanian oath *περ τένε ζῶνε*, 'By

by A. Papadakes, who in 1879 reports that at Anogeia¹ in Mylopotamo there is a place named *Zoh tò lakkò* after the tomb of Zeus. The dwellers in the district, if troubled or displeased at what they hear, will sometimes throw up their hands and cry 'Hear me, god *Zònos*!' or 'Hear me for the sake of God's seat!' or 'for the sake of God's throne²!' I. D. Kondylakes in 1896 gives their exclamation in the form 'God *Zànos*³!'.

If these names are indeed to be connected with that of Zeus, they must be regarded as masculine forms corresponding with the feminine *Díone*⁴. In that case we should obtain a Greek parallel to the Latin *Dianus*, *Diana*.

(f) Zeus as a Mountain-god superseded by Saint Elias.

Apart from the tomb of Zeus in Crete, the surviving traces of these mountain-cults in the place-names of modern Greece are few in number.

In the centre of Naxos rises a conical mountain, 3737 feet in height, from the summit of which it is possible to count some twenty-two islands and to see on the horizon the mountain-chains of Asia Minor⁵. This peak, known as *Drylos* in ancient times⁶, now bears the name *Zia*⁷ or *Dia*⁸—a name which connects it not only

our Lord,' or *περ τε ῥζόνε*, 'By the Lord, by God' (*Das alte Griechenland im neuen* Bonn 1864 p. 50, J. G. von Hahn *Albanesische Studien* Jena 1854 ii. 106, iii. 37).

The expressions *θεε τῆς Κρήτης* or *ὦ θεε τῆς Κρήτης* or *γιά τὸ θεὸ τῆς Κρήτης*, often used at Arachova on Mt Parnassos and elsewhere in the sense of 'Tell that to the marines!', are explained by B. Schmidt *op. cit.* i. 28 as a survival from the days when the Christians ridiculed the Cretan belief in a buried Zeus (Orig. *c. Cels.* 3. 43 *καταγελῶμεν τῶν προσκυνούντων τὸν Δία, ἐπεὶ τάφος αὐτοῦ ἐν Κρήτῃ δεικνυταί*).

¹ Prof. R. C. Bosanquet informs me that Anogeia 'is the nearest village to the Idaean Cave. It lies very high on Ida, and the natives, shepherds and snow-carriers, are different from their neighbours in dress, customs, etc.'

² 'Ἡκοῦτε μου, Ζῶνε θεε, or 'Ἡκοῦτε μου γιά τὰ θρόνια τοῦ θεοῦ or γιά τὸ θρόνος τοῦ θεοῦ (N. G. Polites *Παραδόσεις* Athens 1904 i. 97 f. no. 174, ii. 777 f.).

³ I. D. Kondylakes in the Athenian journal *Ἔστια* June 26, 1896, quoted by N. G. Polites *loc. cit.*

⁴ Zeus is paired with Dione at Dodona, and the oath *περ τένε ζόνε* is described as Albanian (*supra* p. 162 n. 4). The geographical coincidence is noteworthy.

My friend Mr R. M. Dawkins kindly tells me that *à priori* he would have expected the name *Zeús* to survive in modern Greek as *Διάς*. The acc. *Δία* would normally become *Δα* or *Διαν*, pronounced *Διά* or *Διάν*, whence a new nom. *Διάς* with gen. *Διά* would be formed.

second was a revolution from beneath—the spiritual unrest and upheaval of the lower orders, which found expression in many an upward effort, the passionate cult of Dionysos with its rites of death and rebirth, the pure precepts of Orpheus bringing hopes of a bright hereafter, the Pythagorean *propaganda* eager to explain the true course of human life, the sacramental mysteries claiming to guard men's souls through the grave itself. Thirdly there was a revolution from without—the influx of foreign faiths from Egypt, Syria, Asia Minor, Persia, which in bewildering succession poured into the Mediterranean area till Mithraism, modified into the solar monotheism of Aurelian, seemed like to merge all other creeds in that of *Sol Invictus*, 'the Unconquered Sun.' These were indeed Titanic forces. But Zeus, who had vanquished the Titans, somehow still held his own. Philosophers, elaborating the presuppositions of popular belief, found it convenient to give the name of Zeus to their ultimate principle or at least to one of their cosmic elements¹. Again, points of contact between the Orphéo-Dionysiac rites and the religion of Zeus were not wanting. If Orpheus was priest of Dionysos, and if Dionysos was son of Zeus, a *modus vivendi* was after all not impossible². Further, the importers of strange cults from the east inevitably began by identifying their unfamiliar sanctities with the familiar gods and goddesses of Greece, and in an age of syncretism soon obtained recognition for various types of solar Zeus³. In short, the Hellenic sky-god, thanks to his own all-embracing character, was not readily submerged by the rising waters of rationalism, mysticism, and orientalism.

The revolution from above, the revolution from beneath, the revolution from without, had alike ended in something of a compromise. Then for the first time—and here I desert the lead of Dieterich⁴—came a revolution from within. It was in its essence a movement of great simplicity, nothing more than the response of human hearts to the call of Jesus Christ. Nothing more, but also nothing less. And that call, once heard, left no room for compromise. 'They forsook all,'—we read—'and followed him.'

Had they but continued as they began, the victory was already assured. There is a sound of coming triumph in the words

⁴ Dieterich *op. cit.* p. 480 says 'Die Revolution von *unten* ist zugleich aber auch eine Revolution von *innen*.' That is in a sense true; and accordingly we find the nearest approaches to Christianity neither in the rationalism of Greece nor in the orientalism of Rome, but in the heart-felt aspirations of Orphic and Dionysiac devotees. It was by no accident that the art of the Catacombs repeated again and again the figure of Orpheus, or that the literature of the dark ages described the tragedy of Calvary in language borrowed from the *Bacchants* of Euripides.

of Paul: 'The weapons of our warfare are not of the flesh, but mighty before God to the casting down of strong holds.' His converts should have gone on conquering and to conquer. But, alas for champions who knew not of what Spirit they were. Fain to reinforce that Spirit's sword, they turned aside to the old armoury of argument, altercation, and abuse. Pagan attacks were met by Christian counter-attacks, and the apologists with all their merits were in some cases men mainly remarkable for their erudition. As the new religion spread, matters were equalised externally and more than equalised: the persecuted became the persecutors. Gratian urged on by the influence of Ambrose began to plunder heathen temples for the benefit of Christian priests. Theodosios prohibited under the severest penalties the perpetuation of pagan worship. Justinian carried on and completed the outward victory. But meantime those who thus tried to secure an intellectual and temporal ascendancy were shrewd enough to perceive that the scathing periods of church-fathers¹ and even imperial mandates of extermination were powerless to suppress the long-standing rites of paganism. They concluded that definite substitutes must be found for the discredited objects of popular cult. And found they were. Indeed, it is not too much to say that in the fourth century of our era a momentous transformation was already in progress, by which Christian saints gradually usurped the position of pagan gods and demigods.

How far this process of substitution was due to deliberate policy and official action on the part of church or state, is a question hotly disputed, and in the comparative dearth of contemporary evidence² hard to decide. *A priori* arguments of course are not wanting. On the one hand the great majority of Christians then, as now, were 'corrupted from the simplicity and the purity that is toward Christ.' Such persons presumably followed the dictates of worldly wisdom³. On the other hand we have also to reckon with a cause less conspicuous than ecclesiastical interference, but

¹ The Christian apologists largely ignored the small fry of Greek mythology and saved their finest scorn for the inconsistencies and immoralities of Zeus: see e.g. Clem. Al. *protr.* 2. 36. 5—2. 37. 4 p. 27, 19 ff. Stählin, Arnob. *adv. nat.* 5. 20—23, Firm. Mat. 12. 1—9, Rufin. *recogn.* 10. 20—23, Aug. *epist.* 5, *de civ. Dei* 4. 25, *alib.*

³ An instructive case is the proposed rebuilding of the Marneion at Gaza as a Christian church with the old pagan ground-plan: *συνεβούλευον οὖν τινες κτισθῆναι αὐτὴν κατὰ τὴν θέσιν τοῦ εἰδωλείου* (Marcus Diaconus v. *Porphyrīi episcopi Gazensis* 75)—a course eventually disallowed (*infra* ch. ii § 9 (g)).

even more potent—the incalculable force of old associations. These affected at once places, circumstances, and names. Men would resort to the familiar cult-centre and expect the new occupant of the shrine to bestow the customary blessing. Again, folk-tales, even if raised to the rank of myths by the sanction of literature, would readily attach themselves afresh to new heroes, provided that these in their doings and sufferings bore some resemblance to the old. Especially would Christian saints whose names happened to be derived from those of heathen deities tend to acquire powers and prerogatives properly belonging to the said deities. In these and other such ways the old order changed; or rather, the old order did not change, but at most submitted to a new nomenclature. Causation apart, the practical result was this: the old gods and goddesses, the old heroes and heroines, often with their precincts, their temples, and their very statues¹, were re-christened and re-consecrated in the service of the new religion². For a second time and in a subtler sense *Græcica capta ferum victorem cepit*.

A few typical cases will be in point. At Byzantion the pagan twins Kastor and Polydeukes had been wont to cure the sick by means of incubation. The Christian twins Kosmas and Damianos followed suit, doing the same thing at the same place; indeed, unconverted Greeks are reported to have called them Kastor and Polydeukes and to have been solemnly rebuked by them for the very pardonable misnomer. These Christian Dioskouroi, like their pagan predecessors, appeared to persons imploring their aid as

¹ Examples are collected by L. Friedländer *Erinnerungen, Reden und Studien* Strassburg 1905 i. 370 ff., who *inter alia* cites from E. Müntz *Histoire de l'art pendant la renaissance* 1889 i. 21 a mediæval misinterpretation of Iupiter with his eagle as John the Evangelist.

² A general treatment of the subject will be found in F. Piper *Mythologie und Symbolik der christlichen Kunst* Weimar 1847—1851, V. horsemen, and even as stars¹. Other cases are recorded by Ioannes Malalas². After telling how the Argonauts founded at Kyzikos a temple of Rhea Mother of the gods, which the emperor Zenon transformed into a church of Mary Mother of God, he continues: 'The Argonauts...were next attacked by Amykos, and fearing his might took refuge in a certain bay thickly covered with wildwood. Here they saw in a vision a man of dreadful aspect with wings as of an eagle on his shoulders, a spirit who came to them from the sky and announced that they should conquer Amykos. So they took heart and attacked him. Having conquered him they showed their gratitude by founding a sanctuary on the spot where they had beheld the vision and erecting there a statue of the spirit seen by them. They called the place or the sanctuary itself *Sosthènes*, because they had fled thither and been saved; and the place still bears the name. When Byzantion had become the seat of empire, Constantine the Great saw this sanctuary, in fact he left home in order to restore it. Being now a Christian, he observed the statue standing there on its pillar and remarked that from the Christian point of view it looked like an angel in the garb of a monk. Awed by the place and its fane, he went to sleep there after praying that he might learn what angelic spirit the statue represented. He was told in a vision the name of the spirit, offered prayer towards the east, and called the place of prayer, or the locality, by the name of the holy archangel Michael.' Again, one of the principal deities of Byzantion was, as we might have expected, Poseidon³. The emperor Justinian selected a spot on the Golden Horn and there built a church to Saint Priskos and Saint Nikolaos, laying the foundations of it actually in the water⁴. Similarly at the entrance to the harbour of Mykonos—another centre of Poseidon-worship⁵—stands a shrine of Saint Nikolaos, who calms the waves⁶. It may be supposed that in these and many other places the saint has succeeded to the god, but the continuity of the mariner's cult remains unbroken. 'There is no vessel, great or small, upon

⁴ Procop. *de aedificiis* 1. 6 (iii. 193 Dindorf). The house of Basilides, a quaestor of Justinian, was also turned into a church of St Nikolaos (Codinus *de aedificiis Constantinopolitans* 62 B), who was in fact titular saint of four churches at Byzantion (C. d. F. Ducange *Constantinopolis Christiana* 4. 6. 67—70 p. 130 ed. Paris. 1680).

Greek waters,'—says Mr G. F. Abbott—'which has not the saint's icon in its stern, with an ever-burning lamp in front of it, or a small silver-plated picture of the saint attached to its mast. In time of storm and stress it is the name of St Nicholas that instinctively rises to the lips of the Greek mariner, and to him candles are promised, and vows registered. He is to the modern sailor all that Poseidon was to his ancestors¹.'

As in cult, so in legend pagan elements are still to be traced. Saint Niketas has a cavern with a painted roof by way of a chapel near Cape Sudsuro in south-eastern Crete. Four or five centuries ago, says local tradition, a girl was carried off from the chapel by a Barbary corsair but miraculously restored on the anniversary of her captivity by Saint Niketas. He flies through the air on a white-winged horse, and marks on the rock still show where the horse alighted. Captain T. A. B. Spratt, who visited the chapel, mindful of Pegasos and Hippokrene, justly concludes that the saint is 'a sort of Bellerophon².' Again, many well-known figures in classical mythology are said to have been saved from the sea by riding on the back of a dolphin (Arion, Eikadios, Enalos, Koiranos, Phalanthos, Taras, Theseus, etc.): others had their corpses brought ashore by a dolphin, which itself expired on reaching land (so with minor variations in the case of Palaimon or Melikertes, Dionysios and Hermias of Iasos, Hesiod, and an anonymous boy at Naupaktos). Both incidents reappear in the records of the hagiographers. Saints Martinianos of Kaisareia, Kallistratos of Carthage, Basileios the younger of Constantinople, were each rescued from a watery grave by a couple of dolphins; and the corpse of Saint Loukianos of Antioch was brought ashore by a gigantic dolphin, which breathed its last on the sand³. Or again,—to take an example that will appeal to students of Homer—'Saint Elias had been a sailor, but left the sea repenting of the evil life he had led. Others say he left because of the hardships he had suffered. He determined to go where it was not known what the sea or boats were. Shouldering an oar, he went on asking people what it was. When he came to the top of a hill he was told it was wood. He saw that they

had never seen boats or the sea, and he stayed on the hilltops¹. Who fails to recognize Odysseus²?

Sometimes the shift from heathen deity to Christian saint is barely disguised by a slight deflection of the ancient name; sometimes it dispenses with any disguise at all. At Athens the Tritopatris were superseded by the Trinity³. Dionysos lives on in the person of Saint Dionysios, to whom his cult⁴ and myth⁵

¹ Miss M. Hamilton in the *Ann. Brit. Sch. Ath.* 1906—1907 xiii. 356 n. 1 after N. G. Polites *Ἰαπαδοῦς* Athens 1904 i. 116 no. 207, ii. 801f. My friend Dr W. H. D. Rouse in *The Cambridge Review* 1905—1906 xxvii. 414 tells how he heard the same tale from an old Coan skipper:—"Ah well," says Giorgis, "'tis a poor trade this, as the holy Elias found." "What was that?" I asked. "The prophet Elias," quoth he, "was a fisherman; he had bad weather, terrific storms, so that he became afraid of the sea. Well, so he left his nets and his boat on the shore, and put an oar over his shoulder, and took the hills. On the way, who should he see but a man. 'A good hour to you,' says he. 'Welcome,' says the man. 'What's this, can you tell me?' says St Elias. 'That?' says the man, 'Why that's an oar.' Eh, on he goes till he meets another man. 'A good hour to you,' says St Elias. 'You are welcome,' says the man. 'What's this?' says St Elias. 'Why, that's an oar, to be sure,' says the man. On he goes again, until he comes to the very top of the mountain, and there he sees another man. 'Can you tell me what this is?' asks St Elias. 'That?' says the man, 'Why, that's a stick.' 'Good!' says St Elias, 'this is the place for me, here I abide.' He plants his oar in the ground, and that is why his chapels are all built on the hill tops."

² *Od.* 11. 119ff., 23. 266ff. ³ A. Struck *Griechenland* Wien u. Leipzig 1911 i. 131f.

⁴ The ancient deme of Ikaria is habitually called by the peasants *Dionysos*—a clear trace of the god Dionysos. When Chandler visited the place in 1766, its church was sacred to St Dionysios, presumably Dionysios the Areopagite (C. D. Buck in *Papers of the American School of Classical Studies at Athens* 1886—1890 v. 47ff.: see also Miss M. Hamilton *Greek Saints and Their Festivals* Edinburgh and London 1910 p. 15f.).

Mr J. C. Lawson *Modern Greek Folklore and Ancient Greek Religion* Cambridge 1910 p. 43 says: 'It is perhaps noteworthy too that in Athens the road which skirts the south side of the Acropolis and the theatre of Dionysus is now called the street of S. Dionysius the Areopagite. I was once corrected by a Greek of average education for speaking of the theatre of Dionysus instead of ascribing it to his saintly namesake.'

⁵ Prof. C. Siegel of Hamburg at Kokkino in Boiotia in 1846 heard the following folk-tale:—"When Dionysios was still a child, he travelled through Hellas on his way to Naxia. But, since the road was long, he got tired and sat on a stone to rest. As he sat there looking in front of him, he saw a little plant spring from the ground at his feet, and thought it so pretty that he at once resolved to take it with him and plant it. He pulled it up and went off with it. But the sun was so hot that he feared it might wither before he reached Naxia. Thereupon he found a bird's leg, stuck the plant in it, and went on. However, in his holy hand the plant grew so fast that it soon came out at both ends of the bone. Again he feared it might wither, and thought what he could do to prevent it. He found a lion's leg, which was bigger than the bird's leg, and stuck the bird's leg with the plant into the lion's leg. But the plant soon grew out of the lion's leg also. Then he found an ass's leg, which was still bigger than the lion's leg, and stuck the plant with the bird's leg and the lion's leg into the ass's leg, and so came to Naxia. When he wanted to plant the plant, he found its roots twined fast about the bird's leg, the lion's leg, and the ass's leg. As he could not pull the roots out without hurting them, he planted the plant just as it was. It sprang up quickly and to his delight bore the finest of grapes. Of these he at once made wine for the first time and gave it to men to drink. But now what wonders followed! When men drank of it, at

have inevitably passed. Saint Merkourios, who nowadays cures ear-ache in Samos¹, is described by Malalas in terms of Mercurius

as a divine messenger commissioned to slay the emperor Julian². Another Latin deity first canonised in Italy and then naturalised in Greece is Venus, who is known as Saint Venere in western Albania and as the Holy Mother Venere among the Vlachs of Pindos. The myth of Hippolytos is told afresh of his Christian name sake³, while his consort the virgin goddess has handed over her festival to the Virgin of the victorious faith⁴. Even gender proved no bar to such reformations. Saint Artemidos in Keos is the protector of ailing children, being—as Mr J. T. Bent was the first to observe—credited with the attributes of Artemis⁵.

Just they sang like birds. When they drank deeper, they became strong as lions. When they drank deeper still, they resembled asses.' The tale is published in translation by J. G. von Hahn *Griechische und albanesische Märchen* Leipzig 1864 ii. 74 ff. 60, 76; N. G. Polites *Μελέτη ἐπὶ τοῦ βίου τῶν Νεωτέρων Ἑλλήνων* Athens 1871 i. 43 f. H. Camoy in *La Tradition* 1887 i. 89. For parallels see O. Dähnhardt *Natursagen* Leipzig and Berlin 1907 i. 308 f. Cp. also C. Wachsmuth *Das alte Griechenland im neuen* Bonn 1894 p. 24 f. and Miss M. Hamilton in the *Ann. Brit. Sch. Ath.* 1906—1907 xiii. 350 ff. and in *Greek Saints and Their Festivals* p. 16 f., who concludes that the Dionysios in question was the monk of Meteora of the twelfth century because—according to N. G. Polites *Παραδόσεις* i. 98 f. no. 175, ii. 778 ff.—the saint was journeying to Naxos from Mt Olympos.

The ground-plan of the precinct at Lousoi in Arkadia published by W. Reichel and A. Wilhelm (*Fahrts- u. arch. arch. Inst.* 1901 iv. 26 f. fig. 16, cp. *ib.* p. 23 fig. 13 section and p. 32 fig. 19 view) shows in direct superposition: (1) the temple of Artemis *Παρθένω*, (2) a Byzantine church, (3) a chapel of the Panagia built c. 1850.

⁵ J. T. Bent *The Cyclades* London 1885 p. 457: 'In Keos St Artemidos is the patron of these weaklings, and the church dedicated to him is some little way from the town on the hill-slopes; thither a mother will take a child afflicted by any mysterious wasting, "struck by the Nereids," as they say. She then strips off its clothes and puts on new ones, blessed by the priest, leaving the old ones as a perquisite to the Church; and then if perchance the child grows strong she will thank St Artemidos for the blessing he has vouchsafed, unconscious that by so doing she is perpetuating the archaic worship of Artemis, to whom in classical times were attached the epithets *παιδοτρόφος*, *κουρότροφος*, *φιλομειράς* [*λεξι. παιδοτρόφος, κουροτρόφος, φιλομειράς*]; and now the Ionian idea of the

172

Kistophoros from Eleusis, known as Saint Demetra.

See page 173 n. 1.

Similarly Demeter changed her sex, but retained her sanctity, in the cult of Saint Demetrios¹; Eileithyia in that of Saint

fructifying and nourishing properties of the Ephesian Artemis has been transferred to her Christian namesake. We found traces of the worship of Artemis having existed in Keos along with that of Apollo in ancient times, for Barba Manthos had a little image of the Ephesian Artemis in his collection, which he had found in a temple at Karthaia.' See further J. T. Bent in *The Journal of the Anthropological Institute* 1885-6 xv. 392, J. C. Lawson *Modern Greek Folklore and Ancient Greek Religion* p. 44, Miss M. Hamilton *Incubation* London 1906 p. 174, in the *Ann. Brit. Sch. Ath.* 1906-1907 xiii. 352, and in *Greek Saints and Their Festivals* p. 17 f.

¹ At Eleusis the cult of Demeter was hard to kill, as will be admitted in view of the following facts. In the Fitzwilliam Museum at Cambridge is the upper half of a colossal *κιστοφόρος* in Pentelic marble, referable to the fourth or third cent. B.C. (pl. xv). It was found at Eleusis in 1801 by E. D. Clarke and J. M. Cripps 'on the side of the road, immediately before entering the village, and in the midst of a heap of dung, buried as high as the neck, a little beyond the farther extremity of the pavement of the Temple. Yet even this degrading situation had not been assigned to it wholly independent of its ancient history. The inhabitants of the small village which is now situate among the ruins of *Eleusis* still regarded this *Statue* with a very high degree of superstitious veneration. They attributed to its presence the fertility of their land; and it was for this reason that they heaped around it the manure intended for their fields. They believed that the loss of it would be followed by no less a calamity than the failure of their annual harvests; and they pointed to the *cars of bearded wheat*, among the sculptured ornaments upon the head of the figure, as a never-failing indication of the produce of the soil' (E. D. Clarke *Travels in various countries of Europe Asia and Africa*⁴ London 1818 vi. 601). 'The Eleusinians, whose superstitions^b [^bIt was their custom to burn a lamp before it, upon festival days.] respecting it were so great that Dr. Chandler paid a large sum for permission to dig near it, relate, that as often as foreigners came to remove the statue, some disaster ensued. They believed that the arm of any person who offered to touch it with violence, would drop off; and said, that once being taken from her station by the French, she returned back in the night to her former situation' (E. D. Clarke *Greek Marbles brought from the shores of the Euxine, Archipelago, and Mediterranean*, etc. Cambridge 1809 p. 32 f.). On the evening preceding the removal of the statue an ox, loosed from its yoke, butted with its horns against the marble and then ran off, bellowing, into the plain of Eleusis. This roused all the terrors of the peasantry, whose scruples were not removed till the priest of Eleusis arrayed in his vestments struck the first blow with a pickaxe. Even then the people maintained that no ship would ever get safe to port with the statue on board. Curiously enough the *Princessie*, a merchantman conveying it home from Smyrna, was wrecked and lost near Beachy Head, though the statue itself was recovered. As to the notion that the absence of the statue would cause the crops to fail, E. D. Clarke adds: 'The first year after the departure of the Goddess, their corn proved very abundant, and they were in constant expectation that Ceres would return. The next year, however, was not so favourable; and they begin to fear she has deserted them.' He justly cp. Cic. in *Verr.* 2. 4. 114 *Ceres violata, omnes cultus fructusque Cereris in his locis interiisse arbitrantur* (*id. ib.* p. 35 ff.). The statue—on which see also A. Michaelis *Ancient Marbles in Great Britain* trans. C. A. M. Fennell Cambridge 1882 p. 242 ff.—has been called successively Demeter, a *καρηφόρος*, a *καλαθηφόρος*, and more accurately a *κιστοφόρος*. Lenormant states that the inhabitants of Eleusis spoke of it as *Ἁγία Δήμητρα* and, in order to secure good harvests, used to present it with garlands of flowers (F. Lenormant *Monographie de la voie sacrée éleusinienne* Paris 1864 i. 398 n.). In 1860, when he undertook his excavations at Eleusis, he made careful enquiries concerning this *Ἁγία Δήμητρα*—a saint unknown to the calendar. An Albanian *papas* or priest, who was said to be

114 years old and was certainly a centenarian, told him the tale here summarised (*cf. l. c. p. 99 ff. n. 1*):

St. Dhimitra was a charitable old woman, who lived at Athens. She had a daughter of wondrous beauty: none so fair had been seen since mistress Aphrodite (Κίρα Φροῦς ἑρμ). One day as the girl was combing her hair, which was golden in colour and reached to the ground, a Turkish *aga* from the neighbourhood of Souli saw her and fell in love with her. He was a wicked man and a magician. When she rejected his advances, he resolved to carry her off to his *harem*. So one Christmas night, while Dhimitra was at church, the *aga* burst open the house-door, seized the maiden, and despite her cries of distress rode off with her on his horse. The horse was a marvellous creature: it was black with fiery nostrils, and could in a single bound spring from east to west. In a few moments it carried the ravisher and his victim into the mountains of Epeiros. Dhimitra on her return from church was broken-hearted at the loss of her daughter. She asked the neighbours, who, dreading Turkish vengeance, dared not tell what they knew. She questioned the Tree that grew in front of the house, but the Tree could give no information. She enquired of the Sun, the Moon, the Stars, but all in vain. At last the Stork that nested on the roof of her house said: "We have long been living side by side. You are as old as I am, and have always been kind to me. Once you helped me to drive off a bird of prey, which wanted to steal my little ones. So I will tell you what has happened. A Turk on a black horse has carried off your daughter towards the west. Come, I will help you look for her." They set out together over the snowy mountains. But those whom they met by the way either mocked at them or gave no answer to their questions. Dhimitra wept and wailed, and men—since they do not care for sorrow—closed their doors against her. On reaching Lepsina (Eleusis) she fell, overcome with fatigue; indeed she would have died, had not Marigo, wife of Nicolas the *khodja-bachi* or headman of the village, seen her by the road-side and taken her in. In return for the hospitality of Nicolas and Marigo, Dhimitra blessed their fields and made them fruitful. Nicolas' son, the smartest *pallikar* in the district, pursued the quest, on condition that he might wed the stolen girl. Accompanied by the faithful Stork, he walked for many days, and one night in the heart of the mountains found forty dragons watching a great cauldron, which was boiling on a fire. He lifted the cauldron with one hand, lighted a torch at the fire, and replaced the pot. The dragons, astonished at his strength, took him with them to help in getting possession of a maiden kept by a magician in a very high tower. Nicolas' son drove nails into the tower, climbed up withdrawing the nails after him lest the dragons should follow, and squeezed through a narrow window at the top. He then told the dragons to do the same. This gave him time to kill them one by one as they entered and to throw their bodies down on the other side of the tower, where there was a large court-yard and a magnificent garden and castle. He afterwards went down into the tower and found Dhimitra's daughter. While he was making love to her, the *aga* fell upon him, and they wrestled together. The *aga* transformed himself into a lion, a serpent, a bird of prey, a flame, and in these various disguises struggled for three days, till at last he slew and quartered the young *pallikar*. He then forced the daughter of Dhimitra to yield to his desires, though he had hitherto respected her virginity. But in the night the Stork flew off, fetched a magic herb, and rubbed it on the lips of the dead youth; whereupon he came to life again, and attacked the *aga* with greater fury than before. He invoked the aid of the Panaghia, vowing that, if successful, he would become a monk in the monastery of Phaneromeni (in Salamis). He thus prevailed and overthrew his adversary. The Stork pecked out the *aga's* eyes and also a white hair from his black top-knot—the hair on which the magician's life depended. The *pallikar* brought the girl back to Lepsina just at the beginning of spring, when the flowers first appear: he then became a monk in accordance with his vow. St. Dhimitra with her daughter quitted the place, and no one knows where they have gone; but ever since, thanks to her benediction, the fields of Lepsina have been fertile.'

Eleutherios¹. Sometimes the actual name of the deity was dropped, but the cult-title preserved and the distinctive characteristics that went with it assigned to the Christian homonym. Thus H. Usener has made it probable that behind Saint Pelagia lurks the goddess Aphrodite *Pelagia*², behind Saint Tychon the god Hermes *Týchon*

This folk-tale has been impugned by J. Psichari *Études de philologie néo-grecque* Paris 1892 p. lxxxix, but is justly vindicated by L. M. J. Garnett *Greek Folk Poesy* London 1896 ii. 171 ff., 451 ff. and J. C. Lawson *Modern Greek Folklore and Ancient Greek Religion* Cambridge 1910 p. 79 ff. N. G. Polites *Μελέτη ἐπὶ τοῦ βίου τῶν Νεωτέρων Ἑλλήνων* Athens 1871 i. 46 ff. cites as partial parallels J. G. von Hahn *Griechische und albanesische Märchen* Leipzig 1864 ii. 33 ff. no. 68 and 112 ff. no. 97. It would seem, then, that the rape of Persephone by Hades (transformed under Ottoman misrule into a Turkish *aga*), the wanderings and woes of Demeter, the hospitality of Metaneira and Keleos (here Marigo and Nicolas: the latter name—as Lenormant remarks—has in Albanian the diminutive *Kolio*), and the travels of Keleos' son Triptolemos, all survive in the long-lived memory of the people.

Lenormant *op. cit.* i. 402 n. supposes that a shift of sex has taken place in the legend of St Demetrios, a young man who on account of his good looks was carried off by a *tehişlik-bachi* named *Kara-Scheitân* ('Black Devil') and done to death for refusing his infamous desires. The cult of this saint originated near Jannina. J. G. Frazer *Pausanias* v. 6 records G. B. Grundy's conjecture that the church of St Demetrios or Demetrios about a mile to the north of Kriekouki in Boiotia occupies the site of a sanctuary of Demeter mentioned by Hdt. 9. 57, 62, 65 and Plout. v. *Aristid.* 11. Miss M. Hamilton in the *Ann. Brit. Sch. Ath.* 1906—1907 xiii. 350 = *Greek Saints and Their Festivals* p. 13 f. writes: 'St Demetrios is the popular patron of Greek husbandmen and shepherds, and the protector of agriculture in general. The functions of the Earth-Mother are perpetuated in him, and his festival in October [Oct. 26], just before sowing-time, has great importance in the land of peasant-farmers. All over the country, at Eleusis as in every other district, his churches are found.' Miss Hamilton does not, however, consider it proved 'that St Demetrios was given to the new converts as representative of the banished Demeter.' But, whether this is a case of ecclesiastical policy or not, J. T. Bent is at least justified in asserting that 'the attributes of Demeter have been transferred to St Demetrios' (*The Journal of the Anthropological Institute* 1885—6 xv. 392). The same writer elsewhere observes: 'Demeter, in the present order of things, is also represented by a man, St Demetrios, who in certain places is the special protector of flocks, herds, and husbandmen, and in this capacity is called "of the dry land" (*Στεριανός*), as opposed to St Nicholas, the saint of the sea' (*The Cyclades* London 1885 p. 339): cp. J. C. Lawson *op. cit.* pp. 43 f., 79.

¹ The old metropolitan church of Athens is called not only after the Panagia Gorgoepekoos (*infra* ch. ii § 9 (h) ii (a)) but also after St Eleutherios, a saint invoked by women in childbirth (*ἐλευθερώει τὰς γυναῖκες*, they say). The church stands on ground once occupied by a cult of Eileithyia (*Corp. inscr. Att.* ii. 3 no. 1586, cp. Paus. i. 18. 5). Popular etymology transformed *Εἰλεθῖα*, *'Ελεθῖα* into *'Ελευθῖα*, *'Ελευθῖα*, *'Ελευθῶ* etc. (Pauly-Wissowa *Real-Enc.* v. 2102 f.), whence the transition to *'Ελευθέριος* was simple: see B. Schmidt *Das Volksleben der Neugriechen* Leipzig 1871 i. 38 n. 7 and especially K. Michel and A. Struck in the *Ath. Mitth.* 1906 xxxi. 314 ff. In Crete too Eileithyia has been succeeded by St Eleutherios (E. Bybilakis *Neugriechisches Leben* Berlin 1840 p. 2). Indeed, the same thing has happened throughout the archipelago (J. T. Bent in *The Journal of the Anthropological Institute* 1885—6 xv. 392). See further Miss M. Hamilton *Greek Saints and Their Festivals* p. 18 f.

² H. Usener *Legenden der heiligen Pelagia* Bonn 1879 p. iv ff. (supplemented by F. C. Burkitt in *The Journal of Theological Studies* 1910 xi. 61 ff. and E. Maas 'Aphrodite und die heilige Pelagia' in the *Neue Jahrb. f. klass. Altertum* 1910 xxv

or Aphroditos *Týchon*¹; and Dr J. Rendel Harris has shown some reason for believing that Saint George himself is but Zeus *Georgós* in a thin disguise².

457 ff.) argues that the cult of Aphrodite in the Levant produced a whole crop of saints. These include among others of like origin (1) Pelagia nicknamed Margarito, a dancer of Antioch, who being converted by Bishop Nonnos donned male attire and lived for three years on the Mount of Olives as the monk Pelagios. Festival Oct. 8. (2) Margarita, who fled from her bridal chamber in male costume to become the monk Pelagius. On account of her blameless conduct she was made prior of a nunnery; but, when the nuns' female porter was found to be with child, the prior was accused and driven out. She now retired to a cave and led the hard life of a hermit. Shortly before her death, however, she avowed her sex, thereby proving her innocence, and was thenceforth known as St Reparata. The legend probably belongs to the Maronite monastery of Kanobin on Mt Lebanon. On Oct. 8 the Romish church worships a St Reparata, a virgin of Kaisareia in Palestine, of whom it is said that, when she was beheaded by Decius, her soul flew up to heaven in the form of a white dove. (3) Porphyria, a prostitute of Tyre, who became the nun Pelagia. (4) Pelagia, a virgin of Antioch, who finding her house surrounded by troops dressed herself as a bride and committed suicide probably by leaping from the roof. Festival, according to the Roman calendar June 9; according to the Greek *synaxária* June 9, June 10, or more often Oct. 8. (5) Pelagia of Tarsos, who was betrothed to a son of Diocletian, but became a Christian and was baptised by Klinon. The news of her baptism caused the young man to kill himself; whereupon Pelagia, after refusing to marry his father, was done to death in the jaws of a red-hot bronze bull. Festival May 4, May 5, Oct. 7, or more commonly Oct. 8.

For *Πελαγία* as an epithet of Aphrodite see Artemid. *oneir.* 2. 37 'Αφροδίτη ἡ πελαγία, Lyd. *de mens.* 4. 64 p. 117, 21 Wunsch *πελαγία δὲ ἡ 'Αφροδίτη*, *Corp. inscr. Lat.* iii no. 3066 (Dessau *Inscr. Lat. sel.* no. 3179) Veneri Pelagiae. For *Porphyria*, *Anakr. frag.* 2, 3 Bergk⁴ *πορφύρεη τ' 'Αφροδίτη*, interp. Serv. in Verg. *Aen.* 1. 720 Venus... dicitur...et Purpurissa. For *Μαργαριτώ*, *Margarita*, Plin. *nat. hist.* 9. 116 divus Iulius thoracem quem Veneri Genetrici in templo eius dicavit ex Britannicis margaritis factum voluerit intellegi (cp. *ib.* 37. 11). The shift from *Πελαγία* to *Πελάγιος* suggests the shift from 'Αφροδίτη to 'Αφρόδιτος and the cult of the masculine Venus, on whom see K. Tümpel in Pauly-Wissowa *Real-Enc.* i. 2794 f. and Gruppe *Gr. Myth. Rel.* p. 1359 n. 3.

¹ H. Usener *Der heilige Tychon* Leipzig and Berlin 1907. St Tychon was bishop of Amathous in Kypros. The central incident in his career is the following. He was present, when certain vine-dressers were pruning vines at a place called Ampelon. Taking one of the withered branches rejected by them, he prayed that it might have *ικμάδα ζωῆς, εὐφορίαν καρπῶν, σταφυλῆς ἡδύτητα καὶ πρῶμιον βλάστησιν*. He then planted it with his own hands and bade the vine-dressers witness the result. It sprang up to be a memorial of him; and on his festival, June 16, when grapes are not yet fit to eat, the vine of St Tychon bears clusters that are either ripe or rapidly ripening. Indeed, when laid on the holy table and distributed to the communicants, they at once become dark and sweet, though a moment before they may have been light and bitter.

Usener detects as the *heidnische Unterlage* of this saint the minor Dionysiac divinity *Tύχων*, sometimes identified with Hermes (O. Kern *Die Inschriften von Magnesia am Mäander* Berlin 1900 p. 136 no. 203 'Ερμῆς εἰμὶ Τύχων κ.τ.λ., Clem. Al. *protr.* 10. 102. 1 p. 73, 17 Stählin τὸν Τύχωνα 'Ερμῆν—so Meursius for mss. τυφῶνα, cp. Theognostos in Cramer *anecd. Oxon.* ii. 33, 31 Τύχων Τύχωνος· ὁ 'Ερμῆς, Hesych. Τύχων· ἔνειο τὸν 'Ερμῆν, ἄλλοι δὲ τὸν περὶ τὴν 'Αφροδίτην), sometimes with Aphroditos (Papadopoulos-Keramevs *Lexicon Sabbaiticum* St Petersburg 1892 p. 3, 19 'Απολλοφάνης Κρησίν· 'Ασκληπιῶς Κόννειος, 'Αφρόδιτος Τύχων).

² Zeus *Γεωργός* was worshipped at Athens on Maimakterion 20 with bake-meats and a dish of mingled grain (*Corp. inscr. Att.* iii. 1 no. 77, 12 ff. *Μαιμακτηριῶνος Δαὶ Γεωργῶ κ' πόπανον | χοινικιαῖον ὀρθνῶφalon δωδεκῶφalon, | ναστὸν χοινικιαῖον ἐπιπεπλασμένον,*

Cases of this kind could be multiplied without much difficulty. But the facts are sufficiently notorious. Confining our attention to the mountain-cults of Zeus, we note that as a rule they were transferred to Saint Elias. The precise extent to which this was done on Greek soil will be seen from the map accompanying Appendix B. Inspection shows that Saint Elias has succeeded to

πανκαρπίαν νηφάλιον). His import was obviously agricultural, and his festival fell in the season of sowing: see Nilsson *Gr. Feste* p. 115.

St George too is an agricultural power. F. C. H. L. Pouqueville *Voyage de la Grèce*² Paris 1827 vi. 142 f. says: 'saint Georges protège les laboureurs et les moissons.' G. F. Abbott *Macedonian Folklore* Cambridge 1903 p. 44 quotes a folk-song from Sochos, in which St George carries 'wheat and barley, and grains of pearl,' and is asked to 'Give to the bride chestnuts and to the groom walnuts.' J. Rendel Harris *The Annotators of the Codex Bezae* London 1901 p. 83 shows that in south Italy St George 'is the protector of cattle' with an 'agricultural and pastoral value,' and *op. cit.* p. 100 f. cites from Frazer *Golden Bough*² i. 209 ff. [*ib.*³ The Magic Art ii. 75 f., cp. 79 for a Russian parallel] evidence that in Carinthia and among the gypsies of Transylvania and Roumania the chief figure on the festival of St George (April 23) is a 'Green George' clad in leaves and blossoms, who is carried in procession along with a tree, or officiates beside a young willow tree set up in the ground, and is finally ducked in person or in effigy with the express intention of securing rain and food for the cattle.

Dr Rendel Harris can therefore urge similarity of name and similarity of function in favour of his proposed identification. Yet we must not jump to hasty conclusions with Mr J. O'Neill, who in his book *The Night of the Gods* London 1893 i. 198 wrote: 'Of course we have...a supreme antique origin for St George's Day in the Athenian pagan calendar which put the feast of Zeus Geörgos [*sic*] in the month of Mémaktérion [*sic*] (Nov.-Dec.).' Dr Rendel Harris *op. cit.* p. 100 does not thus blink the difficulty: 'the confirmation is lacking of a connexion between Zeus Georgos and April 23rd, the inscription being incomplete, and we must leave this part of the problem unsolved, merely remarking that on the Latin side of the house the date in question is that of the Vinalia, which can be demonstrated to be sacred to Jupiter.'

Further evidence is, however, available. The chief centre of the cult of St George was Lydda or *Dibspolis*—the 'city of Zeus'—in Samaria. Here he was born; here, after his martyrdom at Nikomedeia, he was buried; and here a church was subsequently erected in his honour (E. Robinson *Biblical Researches in Palestine* etc. London 1841 iii. 51). The saint stood in some relation to a sacred pillar. According to the Greek *menata* as reported in the *Acta Sanctorum* edd. Bolland. Aprilis iii. 142, when the church at Ramleh was being built, a pious widow wished to contribute a column. She had bought it and conveyed it as far as the coast, when the prefect or curator Palatinus refused her gift and would not transport it by sea with the other columns. Hereupon the widow besought St George, who appeared and, after writing on the marble with his finger 'Let this column of the widow occupy the second place on the right hand side of the church,' helped her to fling it into the sea. Next day it was found lying in the mouth of the harbour, having reached its destination before all the other columns, to the amazement of Palatinus, who acknowledged his error. Arculfus *de locis sanctis* 3. 4, a work written down by Adamnan c. 688 A.D. and translated by J. R. Macpherson (*Palestine Pilgrims' Text Society* London 1895 iii. 1 ff.), states that in a house at Diospolis there was a 'marble column of George the Confessor, to which, during a time of persecution, he was bound while he was scourged, and on which his likeness is impressed.' An unbeliever, mounted on horseback and instigated by the Devil, struck with his lance at the saint's likeness. The head of the lance penetrated the marble as if it were mere snow and could not be withdrawn; its shaft was broken against the outside. The horse too fell dead on the

Zeus at many, not to say most, of the important cult-centres both on the mainland (Mount Olympos, Mount Lykaion, Mount Arachnaion, Mount Taleton, etc.) and in the archipelago (Mount Kenaion, Mount Oche, Mount Kynados, etc.).

Mr N. G. Polites in a valuable monograph on the sun in modern Greek folk-tales has argued that Saint Elias represents, not only the mountain-Zeus, but Helios as well¹. There is, to

pavement, where the bloodmarks from its haunch were still to be seen. Its rider put out his hands to the marble column and his fingers stuck fast in it. He was released by prayer and penitence; but his finger-prints remained, and Arculfus had seen them. Again, a layman on horseback, before starting on an expedition, vowed that, if he returned in safety, he would present St George with his horse. He did return in safety, and tried to cheat the saint by depositing 20 *solidi* of gold as the price of his horse; but he found that the horse remained rooted to the spot. A second time he tried, depositing 30 *solidi*, with the same result. Four times he mounted and dismounted, till 60 *solidi* lay before the column. At last he offered the saint the 60 *solidi* and the horse; after which he departed with joy. It seems probable that the column represented St George as a horseman armed with a lance, and by no means impossible that it portrayed his triumph over the dragon; for as early as 346 A.D. an inscription from Ezr'a or Edhr'a in southern Syria speaks of him as τοῦ καλλιῶκου ἀγίου μάρτυρος Γεωργίου (*Corp. inscr. Gr.* iv no. 8627, 7), and, when the race of the Bagratides ascended the throne of Georgia towards the end of the sixth century, one of the devices that they emblazoned on their arms was that of St George slaying the dragon (*Rev. S. C. Malan A Short History of the Georgian Church* London 1866 p. 15 n. 10, p. 28 n. 19); see the *Rev. G. T. Stokes in Smith-Wace Dict. Chr. Biogr.* ii. 646. If the column at Diospolis was of this type, it must have resembled the 'Jupiter-columns' of Germany, Belgium and France, which are commonly surmounted by a sky-god, probably *Ziu*, conceived as a warlike Jupiter on horse-back spearing a serpent-legged giant (E. Wagner 'Neptun im Gigantenkampf auf römischen Monumenten' in the *Westdeutsche Zeitschrift* 1882 i. 36 ff., F. Hettner 'Jupitersäulen' *ib.* 1885 iv. 365 ff., Haug 'Die Wochengöttersteine' *ib.* 1890 ix. 17 ff., *id.* 'Die Viergöttersteine' *ib.* 1891 x. 9 ff., 125 ff., 295 ff., A. Prost 'Les travaux consacrés au groupe de l'Anguipède et du Cavalier jusqu'en 1891' in the *Mémoires de la Société des Antiquaires de France* 1891 pp. 15—54, Friedhof *Die sogen. Gigantensäulen* (Beilage zum *Jahresbericht des Lyzeums Metz* 1892), G. A. Müller *Die Reitergruppe auf den römisch-germanischen Gigantensäulen* Strassburg and Bühl 1894, A. Riese 'Über die sogen. Jupitersäulen' in the *Jahrbuch der Gesellschaft für lothringische Geschichte und Altertumskunde* 1900 xii. 324 ff., Forrer *Reallex.* p. 389 f. *s.v.* 'Jupitersäulen,' and especially F. Hertlein *Die Jupitersgigantensäulen* Stuttgart 1910). However that may be, the legend of St George and the dragon suggests comparison with that of Zeus and Typhoeus, and furnishes a fresh *point d'appui* for the conjecture that St George is a modification of Zeus *Georgós*.

I may here note one or two recent works bearing on the subject. The monograph by E. Siecke *Drachenkämpfe: Untersuchungen zur indogermanischen Sagenkunde* Leipzig 1907 must be used with the greatest caution (see R. Wünsch in the *Archiv f. Rel.* 1911 xiv. 561 ff.). C. S. Hulst *St. George of Cappadocia in Legend and History* London 1909 is chiefly of value for its list of monuments (pp. 135—149) and bibliography (pp. 150—156). J. F. Campbell *The Celtic Dragon Myth* with additions by G. Henderson Edinburgh 1911 includes many Celtic folk-tales. The most important contribution of late years is that of Dr J. G. Frazer *Golden Bough*³: The Dying God pp. 105—112 'The Slaughter of the Dragon' (a suggested reconciliation of the totemic with the cosmological interpretation).

¹ N. G. Polites 'Ὁ "Ἡλιος κατὰ τοὺς δημῶδεις μύθους Athens 1882 p. 45 ff., cp. *Μελέτη ἐπὶ τοῦ βλου τῶν Νεωτέρων Ἑλλήνων* Athens 1871 i. 19 ff. Others too have held that St Elias is the successor of Helios (*e.g.* T. Trede *Das Heidentum in der römischen Kirche*

begin with, the obvious fact that *Elias* or *Heltas* and *Hélios* sound much alike—a fact expressly noted by Sedulius, a Christian poet writing c. 430 A.D.¹ Again, Christian art in the fourth century

the same century Chrysostom declared that poets and painters had borrowed their conception of Helios' car from the scriptural account of the prophet Elias¹, his blunder was not unnatural. Finally, rites that are probably derived from a primitive sun-worship are still celebrated in honour of Saint Elias. On July 20—a day described in the Greek calendar as that of 'The fiery ascent to heaven of the holy and glorious prophet Helias the Thesbite²'—pious folk toil up to the topmost peak of Mount Taygeton, now known as *Hágios Ellas* or *Hagioliás*. Here, when it gets dusk, they kindle numerous bonfires and throw plenty of incense on to them as an offering to Saint Elias. The dwellers of the district, especially those inhabiting the village of Kardamyle, as soon as they see the blaze on the mountain-top, set light to heaps of hay and straw, and keep the day by dancing round or leaping over them. This custom takes the place of the midsummer fires kindled elsewhere in Greece, and indeed throughout Europe, on June 24, the festival of Saint John the Baptist³. Miss M. Hamilton notes 'that the ikon of St Elias in the shrine on the top of Taygetos bears the inscription, "The Prophet of the Sun⁴."'

The foregoing arguments may be held to prove that in the fourth century and later Saint Elias was sometimes viewed as the Christian counterpart of Helios. But they do not suffice to prove that Saint Elias is worshipped on mountain-tops in virtue of his equation with that deity. For of all the heights on which Saint Elias has a chapel, and they are very numerous, the only one possessing a definite tradition of Helios-cult is Mount Taleton in Lakonike, where horses used to be sacrificed to the sun⁵. On the

⁵ Append. B Lakonike. A text which appears to have escaped notice in this connexion is Fest. p. 181 a 2 ff. Müller multis autem gentibus equum hostiarum numero haberi

other hand, a fair number of the heights in question, including Mount Taleton, were well known as centres of Zeus-worship. It appears, therefore, that on the mountains Saint Elias is the successor of Zeus rather than of Helios¹.

But we have yet to ask why the mountain-Zeus was replaced by this saint in particular². Probably, in the first instance, the memorable scene on Mount Carmel, where Elijah prevailed over the priests of Baal³, impressed the popular mind with a vivid picture of the prophet as a mountain-power. The still more majestic scene of Elijah on Mount Horeb⁴ doubtless deepened the same impression. And the final appearance of Elijah on the Mount of Transfiguration⁵ would give a Christian sanction to the Jewish tradition. Again, Elijah, like Zeus, controlled atmospheric

testimonio sunt Lacedaemoni, qui in monte Taygeto equum ventis imolant, ibidemque adolent, ut eorum flatu cinis eius per finis quam latissime differatur. et Sallentini, apud quos Menzanae Iovi dicatus vivos conicitur in ignem, et Rhodi, qui quod annis (*quotannis* Lindemann) quadrigas soli consecratas in mare iaciunt, quod is tali curriculo fertur circumvehi mundum. This passage not only gives us fresh and interesting information with regard to the burnt-sacrifice of a horse on Mt Taygeton, but also compares it with the burning of a live horse for Jupiter *Menzana* by the Sallentini. Now these Sallentini were Messapians (K. Penka *Die vorhellenische Bevölkerung Griechenlands* Hildburghausen 1911 p. 35) or, more exactly, a Cretan colony settled in south Italy by Idomeneus of Lyttos (Strab. 282, Varro *ap. Prob. in Verg. ecl. 6. 31 p. 352 f.* Lion and Fest. p. 329 a 32 ff. Müller, Paul. ex Fest. p. 328 Müller, Verg. *Aen. 3. 400 f.*). I should conjecture that their Jupiter *Menzana* (perhaps = *Montanus*, cp. *mentum*, *mentula*, etc. as related to *mons*) was a mountain-god closely akin to the Cretan Zeus, whose solar character is shown by his cult-title Ταλαίος, Ταλλαῖος (*infra* ch. i § 6 (h) v). On this showing the horse burnt on Mt Taygeton was originally a sacrifice to Zeus Ταλειττας (Append. B Lakonike), a Cretan solar Zeus. The Rhodians' annual rite of flinging a solar team into the sea can be paralleled from Illyricum: nonnulli Saturno, cum suos devoraret, pro Neptuno equum oblatum devorandum tradunt, unde Illyricos quotannis ritu sacrorum equum solere aquis immergere: hoc autem ideo, quod Saturnus humoris totius et frigoris deus sit (interp. Serv. *in Verg. georg. 1. 12*), vel quod equuleus, ut putant, loci eius suppositus Saturno fuerit, quem pro Neptuno devoraret;...cui ob hoc in Illyrico quoternos equos iaciebant nono quoque anno in mare (Paul. ex Fest. p. 101 Müller: see G. Wentzel in *Philologus* 1891 l. 389).

¹ Zeus was in Hellenistic times not infrequently identified with Helios, especially with the solar Sarapis and Mithras (*infra* p. 186 ff.). But it is reasonable to suppose that the early Christians would have based their substitution of St Elias for Zeus on some universally recognised characteristic rather than on some exceptional aspect of the latter. Besides, we have no cause to think that Zeus Helios was worshipped on mountains.

² We cannot here assume any verbal confusion. Of Zeus Ἐλειός nothing is known beyond Hesych. Ἐλειός Ζεὺς ἐν Θήβαις.

³ 1 Kings 18. 18—40. Mount Carmel 'became known as Mount St Elias, and behind the high altar in the chapel is shown the grotto in which St Elias is said to have dwelt. Pilgrimages to this place have always been made, and on return home pilgrims would in many cases piously erect a local Carmel, dedicating the chapel to the saint' (Miss M. Hamilton in the *Ann. Brit. Sch. Ath. 1906—1907* xiii. 355).

⁴ 1 Kings 19. 8—18.

⁵ Matthew 17. 1 ff., Mark 9. 2 ff., Luke 9. 28 ff.

phenomena. 'He prayed fervently that it might not rain; and it rained not on the earth for three years and six months. And he prayed again; and the heaven gave rain, and the earth brought forth her fruit¹.' On the former occasion 'the heaven was shut up².' On the latter, as a Greek liturgy has it, 'Elias by his fasting opened the heavens³.' Carmel was connected with 'clouds and wind, and...a great rain⁴;' Horeb, with 'a great and strong wind⁵': even on the Mount of Transfiguration 'there came a cloud overshadowing them⁶.' During the time of drought Elijah was fed by ravens⁷, as Zeus was fed by doves⁸. Lastly, Elijah, like Zeus, was associated with various manifestations of celestial brightness. On Carmel 'the fire of the Lord fell⁹.' Horeb witnessed 'after the earthquake a fire; but the Lord was not in the fire: and after the fire a still small voice¹⁰.' Twice Elijah, from the hill-top on which he dwelt, called down fire from heaven and destroyed the troops of Ahaziah king of Israel¹¹. When the end came, 'there appeared a chariot of fire, and horses of fire,...and Elijah went up by a whirlwind into heaven¹².' Such an one fitly shared in the glory of the Transfiguration. And such an one, we may add, was not unsuitably substituted by the Christian church for the Greek sky-god Zeus.

'This hilltop saint,' says Miss M. Hamilton¹³, 'is believed by the peasants to be lord of sunshine, rain, and thunder. In several ways these powers are indicated in his worship; the site of his chapels is the place where the sun shines longest from its rising to its setting, and where rain is first seen and felt...On the island of Kastellorizo¹⁴...the festival of St. Elias is celebrated by the

performance of a rain-charm wrought through the imitative magic of vicarious drenching. In the morning all the children throw each other into the sea, and later on old men and young join with them, until no person clad in dry clothes can walk through the streets with impunity. Those who resist are dealt with by strong fishermen. This compulsory bathing continues till Vespers, and then the bells call the drenched multitudes to church. The town itself looks as if a heavy rain-storm had fallen. And then the dwellers on that island, where drought causes the greatest suffering, pray to St. Elias for a good wet season.'

At Constantinople and in its vicinity people think that thunder is caused by the prophet Elias speeding across the sky on his chariot—a relic of the belief, which in the middle ages was common throughout Greece, that thunder was due to God or Saint Elias pursuing a dragon in heaven. Another relic of the same belief is the frequent phrase: 'The lightning is chasing the snakes!.' A manuscript at the monastery of Leimon in Lesbos records the following conversation between Epiphanius and Andreas with regard to Byzantine notions on the subject:

Epiphanius. Do they speak truly who declare that the prophet Elias is in his chariot thundering and lightening among the clouds, and that he is pursuing a dragon?

Andreas. Far from it. To accept such a statement on mere hearsay is utter folly. Men bereft of sense have concocted the tale out of their own imagination, as also the story that Christ made sparrows out of clay in the sight of the Jews, threw them into the air, and away they flew, or that he turned snow into flour. Those stories are false, and so is this, and all the extravagant doctrines forged by heretics.... Elias, then, did not go up to heaven (far from it!), nor does he sit on a chariot; but he has power over the rain, and can ask God that in time of drought he will give rain to the earth.... As to the fact that lightning burns a dragon, I have no doubts. The thing is true. Only, the hurler of the lightning is not Saint Elias but the angel of the Lord appointed for the purpose. A dragon is produced thus: the Devil observes etc.²

Saint Elias has taken the place of the thunder-god not only in Greece but throughout a wide area of Europe and even of Asia. A folk-tale from Bukowina in Austria makes Saint Elias steal thunder and lightning from the Devil, who had misused them³. Another from the same place, current also in Hungary, tells how

¹ N. G. Polites *Δημώδεις μετεωρολογικοί μύθοι* (extract from *Παρνασσός*) Athens 1880 p. 4 ff., where further evidence bearing on the phrase *ἡ ἀστραπή κυνηγᾷ τὰ φίδια* is collected.

² *Id. ib.* p. 7 f. and earlier in his *Μελέτη ἐπὶ τοῦ βίου τῶν Νεωτέρων Ἑλλήνων* Athens 1871 i. 23 f. (after D. A. M. Charikles in *Σμύρνη* Aug. 6, 1871), J. T. Bent *The Cyclades* London 1885 p. 87.

³ O. Dähnhardt *Natursagen* Leipzig and Berlin 1907 i. 139.

Elias drove all evil spirits out of heaven by causing thunder, lightning, and a torrent of rain for forty days and nights¹. In a Rumanian tale Judas steals the sun and moon from heaven, while Petrus is asleep: Elias offers to vanquish him, is armed with lightning and thunder, and succeeds in binding him to a column with iron fetters². In Servian songs Elias is expressly called *gromovnik Iliya*, the 'thunderer Elias': he controls lightning, thunder, and the clouds of heaven³. According to Mr W. R. S. Ralston, 'The Servians say that at the division of the world Ilya received the thunder and lightning as his share, and that the crash and blaze of the storm are signs of his contest with the devil. Wherefore the faithful ought not to cross themselves when the thunder peals, lest the evil one should take refuge from the heavenly weapons behind the protecting cross. The Bulgarians say that forked lightning is the lance of Ilya who is chasing the Lamia fiend: summer lightning is due to the sheen of that lance, or to the fire issuing from the nostrils of his celestial steeds. The white clouds of summer are named by them his heavenly sheep, and they say that he compels the spirits of dead Gypsies to form pellets of snow—by men styled hail—with which he scourges in summer the fields of sinners⁴.' Mr Ralston further shows that Elias has inherited the attributes of the old Slavonic thunder-god Perun. The Russians hold that 'the Prophet Ilya thunders across the sky in a flaming car, and smites the clouds with the darts of the lightning. In the Vladimir Government he is said "to destroy devils with stone arrows".... On his day the peasants everywhere expect thunder and rain, and in some places they set out rye and oats on their gates, and ask their clergy to laud the name of Ilya, that he may bless their cornfields with plenteousness. There are districts, also, in which the people go to church in a body on Ilya's day, and after the service is over they kill and roast a beast which has been purchased at the expense of the community. Its flesh is cut up into small pieces and sold, the money paid for it going to the church. To stay away from this ceremony, or not to purchase a piece of the meat, would be considered a great sin; to mow or make hay on that day would be to incur a terrible risk, for Ilya might smite the field with the thunder, or burn up the crop with the lightning. In the old Novgorod there used to be two churches, the one dedicated to "Ilya the Wet," the other to "Ilya the Dry."

To these a cross-bearing procession was made when a change in the weather was desired: to the former in times of drought, to the latter when injury was being done to the crops by rain. Diseases being considered to be evil spirits, invalids used to pray to the thunder-god for relief. And so, at the present day, a *zagovor* or spell against the Siberian cattle-plague entreats the "Holy Prophet of God Ilya" to send "thirty angels in golden array, with bows and with arrows" to destroy it!¹ Similarly J. Grimm argued that Saint Elias had stepped into the shoes, not only of the Slavonic

Fig. 135.

Perun, Perkun, but also of the Germanic thunder-god Thor or Donar. As Thor overcame the Midgardh-serpent and yet, touched by its venomous breath, sank dead upon the ground, so in the ninth-century Bavarian poem *Muspilli* Eliah does indeed destroy Antichrist, but in the act himself receives a deadly wound². 'The comparison,' says Grimm, 'becomes still more suggestive by the fact that even half-Christian races in the Caucasus worship *Elias*

¹ W. R. S. Ralston *Russian Folk-tales* London 1873 p. 337 ff., cp. his earlier work *The Songs of the Russian People*² London 1872 p. 246 f., where however the date of Ilya's festival should be given as July 20, not July 29.

² J. Grimm *op. cit.* i. 173 f., cp. *ib.* 810 ff., 1341, P. D. Chantepie de la Saussaye *The Religion of the Teutons* trans. B. J. Vos Boston and London 1902 p. 130 f.

as a god of thunder. The Ossetes think a man lucky who is *struck by lightning*, they believe *Ilia* has taken him to himself; survivors raise a cry of joy, and sing and dance around the body, the people flock together, form a ring for dancing, and sing: *O Ellai, Ellai, eldaer tchoppei!* (O Elias, Elias, lord of the rocky summits). By the cairn over the grave they set up a long pole supporting the skin of a black he-goat, which is their usual manner of sacrificing to Elias...They implore Elias to make their fields fruitful, and keep the *hail* away from them¹. Olearius already had put it upon record, that the Circassians on the Caspian sacrificed a goat on *Elias's day*, and stretched the skin on a pole with prayers (fig. 135)². Even the Muhammadans, in praying that a thunder-storm may be averted, name the name of *Ilya*³.

In view of the wide popularity of Saint Elias both within and without the confines of Greece, it is not surprising that the very name of Zeus has been erased from the memory of the people or at most drags on a hole-and-corner existence in out-of-the-way islands.

§ 6. Zeus in relation to the Sun.

(a) Direct identifications of Zeus with the Sun.

That Zeus as god of the bright sky was essentially connected with the sun is *à priori* probable enough. But in the domain of religion *à priori* argumentation is apt to be misleading; and, owing to the notorious vagaries of solar mythology, it must be rigorously excluded from the present section of our subject.

Philosophical writers of Hellenistic and Byzantine times definitely identify Zeus with the sun. Thus Cornificius Longus, a grammarian of the Augustan age, said that, when Homer spoke of Zeus visiting the Aithiopes, he really meant the sun⁴. Diogenes Laertios about the year 200 A.D. commemorates the death of Thales in the following epigram:

Thales the sage once watched the racers' strife
When thou, O Zeus the Sun, didst snatch his life
Hence to the very heaven: I praise thee, for
Grown old on earth he saw the stars no more⁵.

⁵ *Anth. Pal.* 7. 85. ἰ ἡλιε Ζεῦ, cp. Diog. Laert. 1. 39.

A century later Arnobius describes the identification of Zeus with the sun as a tenet of the philosophers¹. The emperor Julian, a neo-Platonist of the Syrian school, who wrote his remarkable oration in praise of *The Sovereign Sun* for the Saturnalia of 361 A.D., is a case in point². He notes that the Cypriote priests had common altars and common precincts for the Sun and for Zeus³; nay more, that Apollon himself had declared—

Zeus, Hades, Helios Sarapis—one⁴.

About 400 A.D. Macrobius, an equally enthusiastic advocate of solar cult, devotes a whole chapter to proving that Zeus must be the sun⁵. Ioannes Laurentius the Lydian in his work on the Roman calendar, which was written in the early part of the sixth century, repeatedly takes that view⁶. And Eustathios, archbishop of Thessalonike, who lived during the latter half of the twelfth century, does the same in his learned commentary on the *Iliad* and *Odyssey*⁷. These authors and others like them attempt to justify their opinion by citing certain passages from Homer⁸, Hesiod⁹, Orpheus¹⁰, Pherekydes¹¹, Sophokles¹², and Platon¹³. But it is obvious that speculations of this sort, whether ancient or modern, deserve no credence whatever unless they are supported by evidence of actual cult.

And, even if such evidence is forthcoming, we must not at once conclude that Zeus was a sun-god in his own right. It may be merely a case of international worship, the syncretistic identification of Zeus with a foreign solar deity.

Fig. 136.

For instance, among the religious phenomena of the Hellenistic age few are more remarkable than the vogue of Sarapis or Serapis. This deity, whatever his origin¹, was regarded by Egyptians of the Ptolemaic period as the Apis of Osiris (*Āsār-Hāpi*), a human mummy with a bull's head and the sun's disk between his horns². The Greeks conceived him as a chthonian Zeus³ (fig. 136)⁴ and indicated his solar powers by means of a rayed crown (fig. 137)⁵. All round

¹ In recent years there has been much discussion as to the origin of Sarapis (see e.g. the *résumés* of Gruppe *Myth. Lit.* 1908 p. 611 ff. and of R. Wünsch in the *Archiv f. Rel.* 1911 xiv. 579 n. 1). Three possible views have been mooted: (1) that Sarapis was from the first an Egyptian deity, who arose from the fusion of Osiris with the Apis of *Se-n-hapi*, the 'Place of Apis,' near Memphis. This is held to explain not merely the compound names 'Ὀσάραπισ, 'Ὀσέραπισ, 'Ὀσίραπισ, etc. (Gruppe *Gr. Myth. Rel.* p. 1576 n. 1), but also the tradition that the statue of Sarapis was brought to Alexandria from Sinope (Plout. *de Is. et Os.* 28 f., Tac. *hist.* 4. 83 f.), since *Se-n-hapi* was known to the Greeks as Σινώπιον (Dionys. *per.* 254 f. Μακηδόσιον προλιεθρον, | ένθα Σινωπίτραο Διός μεγάλιοι μελαθρον with Eustath. *ad loc.* Σινωπίτης δὲ Ζεὺς ἢ ὁ Μεμφίτης· Σινώπιον γὰρ ὄρος Μέμφιδος· ἢ ἀπὸ Σινώπης τῆς Ἰοντικῆς, κ.τ.λ.). So A. Bouché-Leclercq in the *Revue de l'histoire des religions* 1902 xlvi. 1 ff., I. Lévy *ib.* 1909 lx. 285 ff., 1910 lxi. 162 ff., G. Lafaye in Daremberg-Saglio *Dict. Ant.* iv. 1248 ff.

(2) That Sarapis was originally the Babylonian god Ea, whose cult-title *šar apsi*, 'King of the Ocean, King of the Deep Sea,' became by a series of normal changes *šar apsi*, **šar aps*, **šar apš*, **šar apis*. Sarapis is first mentioned in connexion with Babylon (Plout. *v. Alex.* 73, 76, Arrian. 7. 26. 2). His ancient cult at Sinope may go back to an early Assyrian occupation of the town. His worship was introduced into Egypt by Ptolemy i Soter, who deliberately identified him with Osiris-Apis. This arrangement of the facts explains *inter alia* the relation of Sarapis to Iao, whose name is the final form of the Babylonian Ea (*Eau* or *Eaú*, later *Iau* or *Iaú*). So C. F. Lehmann-Haupt in Roscher *Lex. Myth.* iv. 338—364, cp. A. Dieterich *Kleine Schriften* Leipzig and Berlin 1911 p. 159 ff.

(3) That Sarapis was a barbaric European deity known to the Macedonians and by them equated with the Babylonian god (evidence discussed in Roscher *Lex. Myth.* iv. 352 ff.).

² E. A. Wallis Budge *The Gods of the Egyptians* London 1904 ii. 195 ff. with figs., P. D. Scott-Moncrieff in the *Journ. Hell. Stud.* 1909 xxix. 87, C. F. Lehmann-Haupt in Roscher *Lex. Myth.* iv. 345 f., *infra* ch. i § 6 (g) i.

A papyrus of the second century A.D. found at Oxyrhynchos preserves the following question addressed to his oracle:

To Zeus the Sun, the mighty Serapis, and to the gods that share his temple. Nike asks whether it is expedient for her to buy from Tasarapion her slave Sarapion also called Gaion. Grant me this¹.

The so-called Anastasy papyrus in the British Museum, a book of magical *formulae* written probably in the fourth century A.D.², equates Zeus the Sun not only with Sarapis but also with the ancient Indo-Iranian god Mithras³, who under Chaldean influence came to be regarded as the sun⁴, commencing one of its mystic sentences with the words:

I invoke thee, O Zeus the Sun, Mithras, Sarapis, the Unconquered, etc.⁵

² F. G. Kenyon *The Palaeography of Greek Papyri* Oxford 1899 p. 116.

³ Dr J. H. Moulton *Early Religious Poetry of Persia* Cambridge 1911 p. 36 f. 'An extremely important Aryan god whose province came very near that of Dyaus was Mithra (Skt. *Mitra*, Av. *Mithra* etc.). He seems to have belonged to the upper air rather than to the sun. Prof. E. V. Arnold says there is little support in the Veda for the solar connexion, unless it be in hymns which compare Agni to Mitra. Nor is the Avestan *yazata* decisively sun-like. His name has no very convincing cognates in Indo-European languages, and we are rather tempted to speculate on a prehistoric link between the Aryans and Babylon, or some source influenced by Babylon. The "firmament" of the first chapter of Genesis was very prominent in early Semitic mythology; and it is remarkable that the Assyrian *meṭru*, "rain," comes so near to Mithra's name*. [*I owe this to my colleague Prof. H. W. Hogg. See further p. 47 below. J. H. M.] If this is his origin, we get a remarkable basis for the Avestan use of the word to denote a *contract*, as also for the fact that the deity is in the Avesta patron of Truth, and in the Veda of Friendship. He is "the Mediator" between heaven and earth, as the firmament was by its position, both in nature and in mythology: an easy corollary is his function of regulating the relations of man and man.'

F. Cumont *Die Mysterien des Mithra*² trans. G. Gehrich Leipzig 1911 p. 1 ff. is still content to regard Mithra as an Indo-Iranian god of light ('Beide Religionen erblicken in ihm eine Lichtgottheit, welche zugleich mit dem Himmel angerufen wird, der dort Varuna, hier Ahura heisst' etc.).

The now famous cuneiform records of Kappadokia show that Mitra, Varuna, Indra, and Nasatya were already worshipped by the Mitani, an Indo-Iranian people dwelling next to the Hittites in the north of Mesopotamia, as far back as c. the fourteenth century B.C. (E. Meyer 'Das erste Auftreten der Arier in der Geschichte' in the *Sitzungsber. d. Akad. d. Wiss. Berlin* 1908 p. 14 ff. and in his *Geschichte des Altertums* Stuttgart 1907 i. 2. 579, 829, 837).

⁴ F. Cumont in Roscher *Lex. Myth.* ii. 3056 ff. Dr J. H. Moulton *op. cit.* p. 35: 'Mithra...is sufficiently solar to give his name to the Sun in modern Persian (*Mihr*).'

⁵ C. Wessely *Griechische Zauberpapyrus* Wien 1888 p. 103, 5f. επικαλουμαι σε ζευ • ηλιε • μθρα • σα'ραπι • ανικητε κ.τ.λ.

Cp. F. Cumont *Textes et monuments figurés relatifs aux mystères de Mithra* Bruxelles

Philon of Byblos, who flourished *c.* 100 A.D., wrote what purported to be a translation of an ancient Phoenician history by a certain Sanchouniathon of Berytos¹. An extract from the translation preserved by Eusebios states :

The descendants of these men (Aion and Protogonos) were called Genos and Genea, and dwelt in Phoinike. When a drought befell, they stretched their hands to heaven towards the sun ; for he was the one god that they worshipped as lord of heaven, calling him *Beelsamen*, which signifies 'Lord of Heaven' among the Phoenicians or 'Zeus' among the Greeks².

Fig. 138.

Zeus is here the Greek equivalent of the Phoenician *Ba'al-samin*, 'Lord of Heaven,' who was honoured not only in Phoinike and its colonies but throughout the whole of Syria³, and was sometimes at least conceived as a sun-god⁴. It is he who appears on a fine bronze disk at Brussels published by Monsieur F. Cumont (fig. 138)⁵.

192 Direct identifications of Zeus with the Sun

The mask of Zeus wearing an oak-wreath is seen between the spread wings of an eagle, which stoops its head and grips with its talons a snake coiled in a circle. The tail of the reptile, first seized by its jaws and then passed round its neck, symbolises both the universe and eternity¹, and attests the character of the Syrian Zeus.

At Tripolis in Phoinike the local *Baal* was Hellenised as a celestial and probably solar Zeus *Hágios*. Coins of imperial date show a square-topped and sometimes battlemented structure with a radiate bust of the god in a pediment and a lighted altar below

Fig. 139.

Fig. 140.

between figures representing the sun and moon (figs. 139, 140)². This is perhaps a great altar of semi-oriental form, comparable with the Persian fire-altars³.

¹ Horapoll. *hierogl.* 1. 1 αἰώνα...γράψαι βουλόμενοι ὄφιν ζωγραφοῦσιν ἔχοντα τὴν οὐρανὸν ὑπὸ τὸ λοιπὸν σῶμα κρηπτομένην, *ib.* 1. 2 κόσμον βουλόμενοι γράψαι ὄφιν ζωγραφοῦσι τὴν ἑαυτοῦ ἐσθλοντα οὐρανὸν, Macrob. *Sat.* 1. 9. 12 hinc et Phoenices in sacris imaginem eius experimentes draconem finxerunt in orbem redactum caudamque suam devorantem, ut appareat mundum et ex se ipso ali et in se revolvi, Lyd. *de mens.* 3. 4 p. 39, 1 ff. Vat. 3. 1. 1 Saturnum...draconem etiam flammivomum, qui caudae suae ultima devorat, in dextra tenentem inducunt—collected by Cumont, who cites also a Mithraic relief showing a bearded serpent of this sort with rays on its head and a crescent on its tail (F. Cumont *Textes et monuments figurés relatifs aux mystères de Mithra* Bruxelles 1896 ii. 208 no. 25 fig. 36). The same idea recurs in the magical papyri: G. Parthey *Zwei griechische Zauberpapyri* Berlin 1866

Fig. 141.

p. 124 pap. 1, 145 f. κύκλῳ δὲ αὐτοῦ δράκοντα | οὐρηβόρον in a charm πρὸς ἥλιον, C. Wessely *Neue griechische Zauberpapyri* Wien 1893 p. 39 pap. Lond. 121, 596 f. ο δράκων | ονοβορος = F. G. Kenyon *Greek Papyri in the British Museum* London 1893 i. 102 f. no. 121, 586 f. in a charm πρὸς δαίμονας, πρὸς φαντάσματα, πρὸς πᾶσαν νόσον καὶ πάθος, cp. *Corp. inscr. Att.* App. defix. p. xiii tab. Berol. 1 a 7 ἀκρουροβόρη with R. Wünsch's n. *ib.* p. xx b.

Many illustrations may be found in the Abraxas-gems published by Montfaucon *Antiquity Explained* trans. D. Humphreys London 1721 ii. 227 ff. pl. 48 ff., e.g. p. 230 pl. 50 no. 8 (my fig. 141) after Chifflet, obviously a solar talisman.

² *Brit. Mus. Cat. Coins* Phoenicia pp. cxxii 214 ff. pls. 27, 14, 17, 28, 3, 4, 43, 11 (my fig. 140), 12 (my fig. 139), *Hunter Cat. Coins* iii. 262 pl. 76, 30.

³ Sir Cecil Smith *ib.* p. cxxii n. 2. See, however, G. F. Hill in the *Journ. Hell. Stud.* 1911 xxxi. 62 n. 28.

Again, a series of inscriptions from Trachonitis establishes the cult of a deity, whose full title was 'Zeus the unconquered Sun, the god Aumos'.¹ Thus a stone over the door of a cell in the monastery of *Deir el Leben* records the following act of piety:

Of Zeus the unconquered Sun, the god Aumos. The enclosure of the court was founded by Kassios Malichathos of the village of Reimea and by Paulos Maxininos of the village of Faithful Mardochoi².

Fig. 142.

Passing from Palestine to Asia Minor, we still find local sun-gods identified with Zeus. A sample will serve. A *stèle* from Maionia (*Menneh*) now at Koloë (*Koula*) associates the radiate bust of a Lydian sun-god, here called Zeus *Masphalatenós*, with that of the moon-god Men (fig. 142)³.

¹ Zeus ἀνίκητος Ἡλιος θεὸς Ἀῦμος Lebas-Waddington *Asie Mineure* etc. nos. 2392—2395 Deir-el-Lében, 2441 Aerita, 2455 Agraina, 2390? Merdocho.

² *Corp. inscr. Gr.* iii no. 4590 Διὸς ἀνίκητου Ἡλίου θεοῦ Λυ[δί]ου, where for Λυ[δί]ου we must read Ἀῦμου (Lebas-Waddington *op. cit.* no. 2394, W. Drexler in Roscher *Lex. Myth.* ii. 2164).

³ Lebas-Reinach *Voyage Arch.* p. 117 f. pl. 136, 1. The inscription (cp. *Corp. inscr. Gr.* ii no. 3439) runs: κατὰ τὴν τῶν θεῶν ἐπιταγὴν ἱερὸς δοῦμος εὐχὴν | Διὶ Μασφαλατηνῷ καὶ Μηνί Τυάμου Μηνί Τυράννῳ | ἐκέλευσεν τηρεῖσθαι ἀπὸ ἡμερῶν θ. εἰ τις δὲ τούτων ἀπειθήσι, ἀναγνώσεται | τὰς δυνάμεις τοῦ Διός. ἐπιμελησαμένου Διονυσίου | Διοδώρου καὶ Ἑρμογένους Βαλερίου, ἔτους σνξ' | (μητρὸς) Δύστρου. Cp. Lebas-Reinach *id.* p. 118 pl. 136, 2.

At Baluklaou, a day's ride south from Lystra, W. M. Calder and Sir W. M. Ramsay found a dedication of the first century A.D., which associates Ἐρμῆν | Μέγιστον with Δι

Obviously these and other such identifications¹ do not suffice to

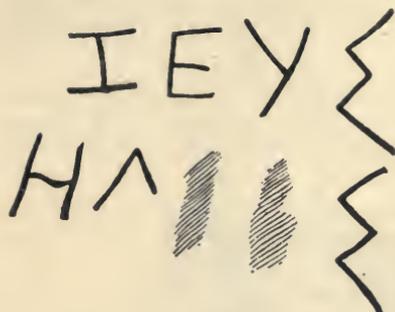

Fig. 143.

prove that Zeus himself, the Greek Zeus, was essentially solar in character. At most they show that his attributes permitted of his being identified roughly and for practical purposes with a variety of barbaric sun-gods. The only example of Zeus being worshipped as the Sun on Greek soil is to be found at *Kastri*, on the site of Arkesine, in Amorgos, where a very early rock-cut in-

scription reads (fig. 143):

Zeûs
Ἡ[Λ]ῶς

Zeus
the Sun².

If the second word has been rightly deciphered by Monsieur Dubois³, we are driven to conclude that at least as early as the fifth century B.C. the inhabitants of Amorgos recognised a solar Zeus. This isolated case must then be due, as Dr Farnell saw, to 'some peculiar

[ἩΛῶς] and so illustrates Acts 14. 12 Barnabas=Zeus, Paul=Hermes (*The Times* Nov. 11, 1909, *Am. Journ. Arch.* 1910 xiv. 102).

¹ Zeus *Ádadós* (Iupiter *Heliopolitanus*), Zeus *Dolichaíos* (Iupiter *Dolichenus*), Zeus *Talaíos*, *Tallaíos*, *Talettas*, Zeus *Ámmon*, Zeus *Askraíos*, etc. will be separately considered in later sections.

A seated Zeus radiate occurs on silver coins of Antialkidas (*Brit. Mus. Cat. Coins Greek and Scythic Kings* p. 25 f. pl. 7, 9, 14) and Hermaios (*ib.* p. 62 pl. 15, 1, 2, 3, 5) and on copper coins of Manes (*ib.* p. 70 pl. 16, 9) and Spalirises (*ib.* p. 101 pl. 22, 2); a standing Zeus radiate on silver coins of Heliokles (*ib.* p. 21 pl. 7, 3; p. 23 pl. 7, 5 f.), Azes (*ib.* p. 73 pl. 17, 8—11), Spalahores with Vonones (*ib.* p. 98 pl. 21, 7 f.), Spalagadames with Vonones (*ib.* p. 99 pl. 21, 10), and Spalirises (*ib.* p. 100 pl. 22, 1). The majority of these are described as laureate, not radiate, by Prof. P. Gardner *loc. cit.*: he admits, however, that pl. 17, 8 Azes and pl. 22, 2 Spalirises are radiate, and such may well be the character of them all.

Iupiter Capitolinus has a rayed crown on a terra cotta lamp from Herculaneum now at Naples (*Antichità di Ercolano Napoli 1792* viii (Le Lucerne ed i Candelabri d'Ercolano) 1 f. pl.). Doubtful examples of a radiate Iupiter in wallpaintings are Helbig *Wandgem. Camp.* p. 22 no. 67 Atlas pl. 2=Overbeck *Gr. Kunstmyth.* Zeus p. 189 μ Atlas pl. 1, 42, and E. Gerhard *Hyperboreisch-Römische Studien für Archäologie* Berlin 1833 p. 106=L. Stephani *Nimbus und Strahlenkranz* p. 14 no. 3. *Deuarii* of the gens *Egnatia* show a distyle temple in which are two standing deities, Iupiter with sceptre and radiate head, and Libertas; above the former is a thunderbolt, above the latter a Phrygian cap (so Babelon *Monn. rép. rom.* i. 474 f. fig. after Cavedoni, cp. H. A. Grueber in the *Brit. Mus. Cat. Rom. Coins* Rep. i. 399 n. 3, 400 pl. 42, 16: on the temple of Iupiter Libertas see H. Jordan—C. Hülsen *Topographie der Stadt Rom im Alterthum* Berlin 1907 i. 3. 167).

² H. Roehl *Imagines inscriptionum Græcarum antiquissimarum*² Berolini 1898 p. 55 no. 28, E. S. Roberts *An Introduction to Greek Epigraphy* Cambridge 1887 i. 191 no. 160f.

³ *Bull. Corr. Hell.* 1882 vi. 191.

local syncretism or foreign influences¹. But unfortunately it is far from certain that Monsieur Dubois' restoration of the second line is sound. Monsieur Delamarre, who has recently edited the inscription for the Berlin *Corpus*, argues from the analogy of dedications in Thera that we need rather the name of the dedicator in the genitive case². And, if that be so, the inscription is no longer in point.

(b) Cult-epithets of Zeus that may be solar.

But, if it must be admitted that the Greeks did not directly identify Zeus their sky-god with the sun, it can hardly be denied that indirectly Zeus was connected with solar phenomena. Some of his cult-epithets are suggestive of such a connexion. Thus at Chios Zeus was entitled *Aithiops*, 'He of the Burning Face³,' a name elsewhere given to a son of Hephaistos, eponym of Aithiopia⁴, and to one of the horses of the Sun⁵. Conceivably, however, Zeus may have been termed *Aithiops* in his character of *Aithér*, 'the Burning Sky⁶,' rather than in any solar capacity. Again, at Thorikos on the south-east coast of Attike, an unworked block of stone has been found bearing the inscription⁷:

Ὁρός	Boundary
ἱεροῦ	of the precinct
Διὸς	of Zeus
Ἀθαντῆ-	<i>Auanté-</i>
ρος	<i>r.</i>

This Zeus *Auantér*, 'the Scorcher,' is explained by Mr N. G. Polites as the god of summer heat⁸—a conception which might refer to the glowing sky in general, but with more probability attaches to the sun in particular.

¹ Farnell *Cults of Gk. States* i. 44.

⁴ Plin. *nat. hist.* 6. 187.

⁵ Hyg. *fab.* 183 *Aethiops quasi flammeus est, concoquit fruges...huic rei auctor est Eumelus Corinthius.* M. Schmidt reads *Aethops*, a conjecture based on the fact that Eur. *frag.* 896 Nauck² *ap.* Athen. 465 B and *ap.* Eustath. in *Il.* p. 883, 62 called one of the Sun's horses *Αἴθωψ* in the lines *Βακχίου φιλανθέμον | Αἴθωπα πεπαλοντ' ὀρχάτους ὄπωρινούς, | ἐξ οὗ βροτοὶ καλοῦσιν οἶνον αἴθωπα.* Cp. Nonn. *Dion.* 29. 301 *αἴθωπος Ἡελίου μεσημβρίζουσαν ἰμάσθλην.*

⁶ *Supra* p. 27 ff.

⁷ Δελτ. Ἀρχ. 1890 p. 140 f. in letters of the fourth century B.C. *ΑΤΑΝΤΗΠΟΣ* is a blunder for *ΑΤΑΝΤΗΠΟΣ*.

⁸ N. G. Polites '*Zeus Ἀθαντῆρ*' in *Εστία* 1890 no. 41 (see *Ath. Mitt.* 1890 xv. 443, Pauly-Wissowa *Real-Enc.* ii. 2264) derives *Ἀθαντῆρ* from the same root as *αἰθάλω*, 'I scorch' or 'parch,' cp. Aristoph. *ran.* 194 *τὸν Αἰθαίνου λίθου.*

(c) The Sun as the Eye of Zeus.

Fortunately evidence of a less equivocal nature is to hand. There is reason to think that the Greeks, like various other peoples¹, at one time regarded the sun and moon as the eyes of the animate sky². The sun especially was the eye of *Aithēr*, 'the Burning Sky'³, and might therefore be called the eye of Zeus. Euripides in his tragedy *The Mysians* spoke of Zeus as 'sun-eyed'⁴. A magical hymn preserved in a papyrus of the Berlin Museum addresses the sun-god thus:

Sun famed-for-steeds, Zeus' earth-embracing eye,
All-bright, high-travelling, fallen-from-Zeus, heaven-ranging⁵.

And Macrobius states that 'antiquity calls the sun the eye of Zeus⁶.' The phrase seems to have been current in the jargon of later oracles also—witness sundry responses of Apollon first published by N. Piccolos⁷. The god bade one Poplas attain his ends—

Praying the ageless eye of all-seeing Zeus⁸.

On another occasion he advised the same man to propitiate—

The brilliant eye of Zeus, giver of life⁹.

⁹ *Id. ib.* 6. 153. 1 ἰλάσκου Ζηνὸς βιοδώτορος ἀγλαδὸν ὄμμα.

And again he announced to a second worshipper, Stratónikos by name:

Thou still hast long to live; but reverence
The eye of life-giving Zeus with offerings meet¹.

An Orphic hymn, after identifying Zeus with various parts of the cosmic whole—the sun and moon included, goes on to say more expressly:

As eyes he has the sun and the shining moon².

Another Orphic hymn likewise describes the sun as at once the eye of the world and Zeus:

Immortal Zeus,
Clear-skied, all-radiant, circling eye of the world³.

In a somewhat similar vein Nonnos of Panopolis in Egypt, a poet who wrote about the year 400 A.D., makes Dionysos address to the sun-god of Tyre a remarkable hymn, in which that divinity is saluted not only as 'Sun' and 'all-bright eye of *Aiθēr*,' but also by a fusion of religious ideas as 'the Assyrian Zeus' and 'the cloudless Zeus of Egypt⁴.'

It may be added that the Greeks of the Peloponnese still speak of the sun as 'God's eye⁵,' and that the Albanians swear by the eye of the sun or of the star⁶.

(d) The Sun as a Wheel.

i. The Solar Wheel in Greece.

Another conception of the sun that has left its mark upon Greek mythology and religion is that of a revolving wheel⁷.

¹ Cougny *ib.* 6. 154. 1 f. ἀλλὰ σεβάξου | ζωοδότου Διὸς ὄμμα θνητοῖσι ἀγαρήϊον.

⁵ N. G. Politis *op. cit.* p. 33.

⁶ J. G. von Hahn *Albanesische Studien* Jena 1854 ii. 106.

⁷ For this conception among other peoples see J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass ii. 701 f., iv. 1499 f., H. Gaidoz in the *Rev. Arch.* 1884 ii. 7 ff., 136 ff., 1885 i. 179 ff., 364 ff., ii. 16 ff., 167 ff., A. Bertrand *La religion des Gaulois* Paris 1897 p. 185 ff., J. Rhys *Hibbert Lectures 1886*³ London 1898 p. 450 ff., *Folk-Lore* 1906 xvii. 58, W. Simpson *The Buddhist Praying-wheel* London 1896, G. Maspero *The Dawn of Civilization*⁴ London 1901 p. 656 f.

Euripides the poet-philosopher is represented by Aristophanes as declaring that *Aithér* at the creation devised—

The eye to mimic the wheel of the sun¹.

Again, Aristophanes, who makes fun of everybody including himself, in his comedy *Daïdalos* seems to have shown the sun as a wheel spinning in the air, and puts into the mouth of one of his characters the illusion-destroying couplet:

Stage-carpenter, when you want to send the wheel
Spinning aloft, say, 'Hail, thou light of the sun²!

The conception of a solar wheel is, however, seldom expressed in extant Greek literature. For the most part it has been obscured by progressive civilisation and lies half-hidden beneath later accretions. For all that, it can be detected by patient search as the ultimate explanation of not a few myths, ritual objects, and divine *insignia*.

(a) Ixion.

I begin with the myths—and *in primis* that of Ixion, a personage of paramount importance for the proper understanding of early Greek beliefs. The orthodox tale with regard to him is told succinctly by the scholiast on Euripides: 'Ixion was a Lapith by race, and married Dia the daughter of Eïoneus. He plotted against his father-in-law, when he came to fetch the bridal gifts. He dug a pit in his house, filled it with fire, and flung Eïoneus into it. Wherefore he incurred the wrath of heaven. But Zeus took pity on Ixion and received him and let him be in his own holy place, giving him a share of immortality too. He in his wantonness saw Hera and was enamoured of her. She, not brooking his mad desires, told Zeus. Whereupon Zeus was wrathful and, wishing to learn whether the thing was true, made a cloud (*nephéle*) in the likeness of Hera. Ixion on seeing it thought it to be Hera and lay with it and begat a child of double nature, part man, part horse, wherefrom the rest of the Kentauroi are sprung. But Zeus in anger bound Ixion to a winged wheel and sent him spinning through the air. Ixion under the lash repeats the words: "We must honour our benefactors." Some say that Zeus hurled him into Tartaros. Others, again, that the wheel was made of fire³.'

¹ Aristoph. *thesm.* 17. In Soph. *Ant.* 1065 τροχούς ἀμλλητήρας ἡλίου all the mss. have τροχούς, 'wheels'; but Jebb rightly accepts Erfurdt's cj. τροχούς, 'courses.'

² Aristoph. *Daëdalos frag.* 234 Dindorf *ap.* Erotian. p. 42 Klein ὁ μηχανοποιός, ὅποτε βούλει τὸν τροχὸν | ἔαν (ἐλάν cj. Bergk, Ελκειν Cobet) ἀνεκάς, λέγε, χαίρε φέγγος ἡλίου.

³ Schol. A. C. M. Eur. *Phoen.* 1185. The ultimate source of the *scholion* appears to be Pherekydes *frag.* 103 (*Frag. hist. Gr.* i. 96 f. Müller).

To Ixion and his offence we must return at a later stage of our argument: it is the peculiar character of his punishment that is here in point. Since Theodor Panofka first discussed the matter in 1853¹, it has been commonly agreed that Ixion bound to his blazing wheel and sent spinning through the upper air or under the nether gloom must be the sun-god and no other². Hence his constant association with fire: he was called the son of *Phlegyas*, the 'Flaming,' by Euripides³, the son of *Atthon*, the 'Glowing,' by Pherekydes⁴; and it was by means of a fiery pit thinly covered with logs and dust that he entrapped and slew Etoneus the father of Dia⁵.

Moreover, Ixion's wheel as represented in Greek, Etruscan, and Roman work is possibly solar. At least, its claims to be regarded as solar are deserving of further investigation. The extant representations include the following:

A brown chalcedony scarab from the Castellani collection, now in the British Museum, shows Ixion as a nude bearded figure, whose hands are bound to the rim of a large wheel. Between the spokes is the Etruscan inscription *Ichsiun*. This gem (fig. 144)⁶ may be assigned to the second half of the fifth century.

Contemporary with it, if not somewhat earlier (about 450—440 B.C.), is a red-figured *kántharos* of fine style, likewise in our national collection. Its reverse design (fig. 145)⁷ depicts the preparations for the punishment of Ixion. The culprit, held fast by Ares and Hermes, stands before the throne of Hera, while Athena⁸ brings up a four-spoked wheel fitted with a pair of wings.

Fig. 144.

¹ T. Panofka 'Zufluchtsgottheiten' in the *Abh. d. berl. Akad. 1853* Phil.-hist. Classe p. 285 ff.

² Roscher *Lex. Myth.* ii. 770. L. Laistner *Das Rätsel der Sphinx* Berlin 1889 i. 299 ff. holds that the myth of Ixion is essentially akin to German folk-tales of elves appearing in the form of a fiery wheel, which creaks, pipes, screams etc. But such tales are themselves meteorological in origin (E. H. Meyer *Germanische Mythologie* Berlin 1891 p. 62).

³ Eur. *Ixion frag.* 424 Nauck². Strab. 442 makes him the brother of Phlegyas.

⁴ Pherekyd. *loc. cit.* *Ατθωνος*, which Müller corrected into *Αθωνος*.

⁵ Pherekyd. *ib.*

⁶ *Brit. Mus. Cat. Gems* pp. 22, 68 no. 334 pl. E, Furtwängler *Ant. Gemmen* i pl. 18, 10, ii. 87.

⁷ *Brit. Mus. Cat. Vases* iii. 143 f. no. E 155. The most satisfactory interpretation of the vase as a whole is that propounded by Sir Cecil Smith in the *Class. Rev.* 1895 ix. 277—280. I have borrowed his fig. *b*, which is more accurate than Raoul-Rochette *Monumens inédits d'antiquité figurée* Paris 1833 pl. 40, 1, being based on a tracing by Mr F. Anderson.

⁸ *Infra* p. 231 n. 8.

A great Apulian *amphora* with volute handles, found at Ruvo and now preserved in the Hermitage at St Petersburg, has for its obverse decoration a pair of contrasted scenes. The body of the vase shows Hades enthroned in his palace between Persephone and Hermes. Grouped near by are Apollon and Artemis on the one side, Aphrodite, Eros and Pan on the other. And below are six of the Danaïdes with their water-pots¹. The neck (fig. 146)² gives us the upper, not the under, world. Here in the centre we see Ixion, clothed indeed, but fast fettered to a triple wheel, from whose outer

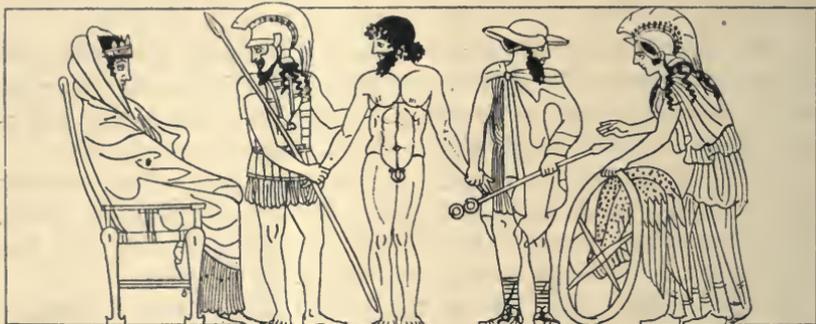

Fig. 145.

rim rays dart forth in all directions. On the right Hephaistos³ leans against a tree-trunk, still holding the hammer with which he has riveted the fetters. On the left a winged Erinys⁴ with snakes in her hair is engaged in turning the wheel. Two other figures complete the scene—Iris⁵ the counterpart of Hermes, and Zeus⁶ the counterpart of Hades. Iris with wings and a *caduceus* occupies the

¹ *Infra* ch. ii § 9 (d) ii (γ), where the bibliography of the vase is given.

² Raoul-Rochette *op. cit.* pl. 45.

³ 'Le Charon grec' (Raoul-Rochette *op. cit.* p. 179 n. 3), 'Éaque (?)' (Reinach *Rép. Vases* i. 355)!

⁴ 'Iris (?) ou Érinys (?)' (Reinach *loc. cit.*)!

⁵ 'Érinys' (Reinach *ib.*)!

⁶ 'Aiacos' (Raoul-Rochette *loc. cit.*), 'Hadès (?)' (Reinach *loc. cit.*). But these suggestions miss the intended contrast between the Upper- and the Under-world. Apulian vases that have the Under-world on the body normally have the Upper-world on the neck, either on the obverse or on the reverse side. Thus Karlsruhe 388 (Reinach *op. cit.* i. 108) has obverse Helios in his *quadriga* (*ib.* i. 258). Munich 849 (*ib.* i. 258) has obverse Helios and Heos in *quadrigae* conducted across the sea by Phosphoros (Furtwängler-Reichhold *Gr. Vasenmalerei* i. 51). Naples 3222 (Reinach *op. cit.* i. 167) has reverse Helios in his *quadriga*, Selene on horseback, and Eros between them, crossing the sea (*ib.* i. 312). St Petersburg 426 (*ib.* i. 479) has obverse Eros in a *quadriga*—presumably the sun's chariot (*ib.*). In fact, the only exception among the large-sized Under-world

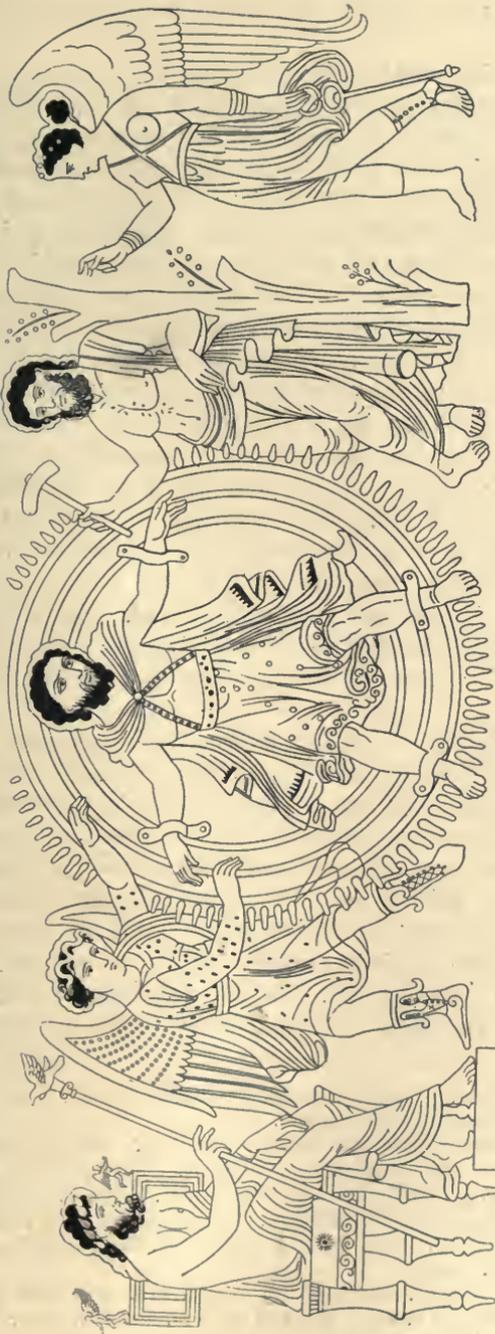

Fig. 146.

extreme right; Zeus enthroned and holding his eagle-sceptre, the extreme left.

A Campanian *amphora* from Cumae, now at Berlin, has another striking representation of the scene as its principal design (pl. xvi)¹. The figures composing it have been first drawn in accordance with the usual technique of the vase-painter and subsequently coloured in more or less natural tints—the result being a polychrome decoration suggestive of fresco-work. Raised aloft in mid air is Ixion. He is naked and bound, spread-eagle fashion, to the four spokes of a double wheel. His bonds are so many serpents; and two of them, twining about his legs and body, raise their heads to bite him on the shoulders. The rims of his wheel, which are painted a whitish yellow, a bright and a dark red, send forth red tongues of flame; these, however, do not radiate light outwards, but heat inwards, and so add to the anguish of the sufferer. Immediately beneath him a winged Erinys rises from the ground with snaky hair and uplifted torch. Ixion's wheel is turned by a couple of winged female figures, who have been interpreted as Nephelai². Hephaistos, having completed his ghastly work, stands back to survey it, cap on head and hammer in hand. He is balanced by a second spectator, Hermes, who turns his back upon the scene but, fascinated by it in spite of himself, glances upwards in the direction of Ixion.

A wall-painting, which still adorns a dining-room in the house of the Vettii at Pompeii, provides us with yet another type (fig. 147)³. The artist, realising that the agony of Ixion must be suggested to the mind rather than presented to the eye, has given us but a glimpse of the hero fastened face downwards on a mighty eight-spoked wheel. Behind him stands the grim figure of Hephaistos, who lays his left hand on the wheel and with his right is about to grasp a spoke and set it in motion. His anvil, hammer and pincers are near him on the ground. At this supreme moment, when the torture is on the point of commencing, Hermes the mandatory of

vases is Naples Santangelo 709 (*ib.* i. 455), which has obverse a female head in a floral device, reverse a horse attacked by griffins.

¹ Furtwängler *Vasensamm.* Berlin ii. 840 f. no. 3023. The best reproduction is that by A. Kluegmann in the *Ann. d. Inst.* 1873 xlv. 93—98 pl. I—K (badly copied in Baumeister *Denkm.* i. 767 fig. 821 and Roscher *Lex. Myth.* ii. 769 f.).

² Nephelai (Kluegmann after Helbig *loc. cit.*, Furtwängler *loc. cit.*, Baumeister *loc. cit.*, Wagner in Roscher *Lex. Myth.* iii. 182), Erinyses (P. Weizsäcker *ib.* ii. 771), Nikai (Reinach *op. cit.* i. 330).

2021

Amphora from Cumae: Ixion on his wheel.

See page 202.

Zeus¹ arrests the wheel and looks round to see if there is any sign of relenting on the face of Hera. Hera, however, is already enjoying her anticipated triumph and, prompted by Iris² at her elbow, hardens her heart: the dread sentence will be duly carried out. In the foreground sits a swathed figure, who turns with an imploring look and gesture, not indeed towards Hera—that would be useless,

Fig. 147.

—but towards the more sympathetic Hermes. She has been justly regarded as Nephele³ interceding for her lover. The whole picture

¹ Hyg. *fab.* 62.

² Iris is neatly characterised by the *nimbus* round her head.

³ See Herrmann *loc. cit.*, who successfully disposes of the rival interpretations—Erinys or Nemesis (Herrlich), the mother of Ixion (Sogliano), 'a personification of the spirit of one who has died' (Mau). Wagner in Roscher *Lex. Myth.* iii. 182 argued that she must be Nephele on account of her swathed form.

is finely conceived and almost certainly repeats a Greek *motif*. Indeed, we have seen the same *dramatis personae* in the vase-paintings already reviewed—Hera seated on her throne, Iris standing with raised right hand, Hephaistos with his hammer beside the wheel, Hermes with his *caduceus* glancing round, and even Nephele, though here by a fine original touch she is represented as doing her best to avert, not to forward, the punishment of Ixion. It seems possible to go one step further and to determine the date of the Greek prototype. Here much help is afforded by the style of Hermes, its most prominent figure. He might well be a bronze statue by Lysippos. The proportions of head, trunk, and legs, the pose of the feet, the attitude of the head turned away from the leg that bears the weight, would all support this contention. And the resemblance of the whole figure to the Lansdowne Herakles, pointed out by G. Rodenwaldt¹, would go to confirm it, if—as Prof. P. Gardner has urged²—the Herakles is essentially Lysippian in character. On this showing we may conclude that the Pompeian picture had as its direct ancestor a Greek fresco dating from the age of Alexander the Great.

An Etruscan mirror recently acquired by the British Museum and hitherto unpublished³ (pl. xvii) figures Ixion bound to a great winged wheel in the early 'running' attitude⁴, which here denotes rapid revolution. He is nude except for the fillet about his hair and the bands that fasten him to the eight-spoked wheel. The flower twice introduced between adjacent spokes serves as a stop-gap and has no special significance. The mirror is referred by Mr H. B. Walters to the third or possibly to the fourth century B.C. The ivy-wreath and the rendering of hands, feet, etc. suffice to prove that it is archaistic, not archaic.

Finally, a Roman sarcophagus, found in a brick sepulchral monument behind the second mile-stone on the *Via Appia Nuova* and now in the *Galleria dei Candelabri* of the Vatican, has its right end decorated with reliefs symbolic of the Under-world (fig. 148)⁵.

¹ G. Rodenwaldt *Die Komposition der pompejanischen Wandgemälde* Berlin 1909 p. 178.

² P. Gardner in the *Journ. Hell. Stud.* 1903 xxiii. 128 ff., 1905 xxv. 240, 256. The attribution of this type to Lysippos was first suggested by A. Michaelis *Ancient Marbles in Great Britain* trans. C. A. M. Fennell Cambridge 1882 p. 451. B. Graef in the *Röm. Mitth.* 1889 iv. 189 ff. referred it to Skopas; Furtwängler *Masterpieces of Gk. Sculpt.* p. 296 ff., to Skopas in his first or Polyclitan period; A. Kalkmann *Die Proportionen des Gesichts in der griechischen Kunst* Berlin 1893 p. 60 n. 3, to Polykleitos himself.

Etruscan mirror: Ixion on his wheel.

See page 204.

Sisyphos raises the stone above his head. Tantalos lifts the water towards his mouth. And between them Ixion revolves on a strong seven-spoked wheel, his attitude recalling the earlier representation of him on the Etruscan mirror (pl. xvii).

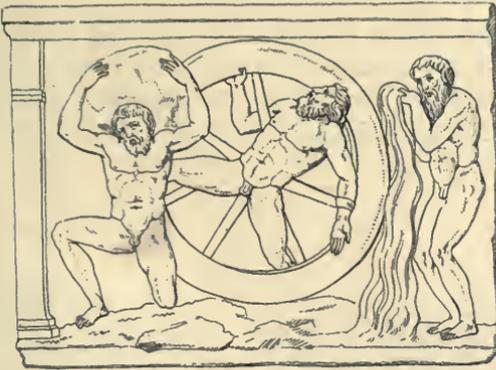

Fig. 148.

It remains to enquire how far the foregoing figures bear out the suggestion that Ixion's wheel was solar. A wheel, a winged wheel a wheel darting rays outward, a wheel flaming inwards and bound about with snakes—all these are beyond question conceivable ways

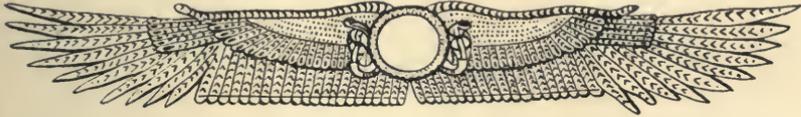

Fig. 149.

of depicting the sun. For example, the Egyptians used to place a winged solar disk flanked by two *uraeus*-snakes over the gateway of every temple-court (fig. 149)¹. This custom was explained by

¹ On the origin of the winged disk see S. Reinach 'Aetos Prométheus' in the *Rev. Arch.* 1907 ii. 59—81=*id.* *Cultes, Mythes et Religions* Paris 1908 iii. 68—91, *infra* ch. i § 6 (d) i (e); and on its development Count Goblet d'Alviella *Recherches sur l'histoire du globe ailé hors de l'Égypte* Bruxelles 1888 (extr. from the *Bulletins de l'Académie Royale des Sciences, des Lettres et des Beaux-Arts de Belgique* iii Série 1888 xvi. 623 ff. no. 12). Cp. also Stevenson 'The Feather and the Wing in Mythology' in *Oriental Studies* (Oriental Club of Philadelphia) Boston 1894 pp. 236—239. In Egypt the winged disk is found as early as the sixth dynasty, e.g. on a triumphal *stèle* of Pepi i in *Wadi-Maghara* (Sinai) published by J. de Morgan *Recherches sur les origines de l'Égypte* Paris 1896 i. 235 fig. 596. I figure a fine eighteenth-dynasty example from the door to the chapel of Thothmes i at *Deir el Bahri*, drawn by R. E. F. Paget for A. Wiedemann *Religion of the Ancient Egyptians* London 1897 p. 75 fig. 14. The wings are probably those of the falcon (*falco peregrinus*), not the sparrow-hawk: see G. Bénédict in the *Mon. Piot* 1909 xvii. 5 ff.

means of the following myth¹. Heru-behūtet², the Horos of Edfū, when he fought the enemies of his father Râ, changed himself into a winged disk of many colours. As such he flew up to the sun, sighted his foes, and started in pursuit. He took with him Nekhebet the goddess of the South and Uatchit the goddess of the North in the form of two snakes that they might destroy the adversaries. Having gained the day, Heru-behūtet was thenceforward called 'the Darter of Rays who emergeth from the horizon'; and Râ ordained that the winged solar disk should be set over every sacred spot for the banishing of evil.

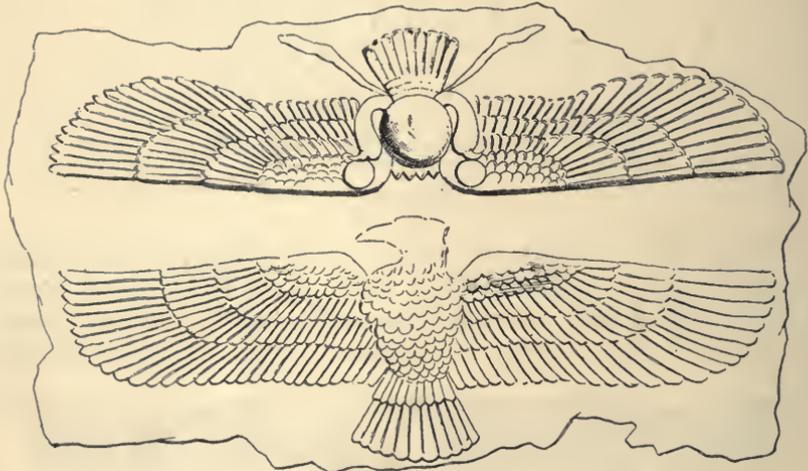

Fig. 150.

The winged disk is found also, with slight modifications, in Phoinike, where it was similarly used to consecrate the lintels of temple-buildings³. An interesting example, discovered by E. Renan⁴

¹ The text was published by É. Naville *Textes relatifs au mythe d'Horus dans le temple d'Edfou* Genève 1870 pls. 12—19. It is translated into German by H. Brugsch in the *Abh. d. gött. Akad. 1869* Phil.-hist. Classe xiv. 173—236, and into English by A. Wiedemann *op. cit.* p. 69 ff. Cp. also E. A. Wallis Budge *The Gods of the Egyptians* London 1904 i. 483, A. Erman *A Handbook of Egyptian Religion* trans. A. S. Griffith London 1907 p. 10 fig. 8.

² The precise form and significance of the name borne by the solar disk is disputed: see A. Erman in the *Zeitschrift für ägyptische Sprache und Altertumskunde* 1882 xx. 8, Le Page Renouf in the *Proceedings of the Society of Biblical Archaeology* 1886 viii. 143, A. Wiedemann *ib.* 1895 xvii. 196 ff.

³ Count Goblet d'Alviella *op. cit.* p. 5 ff.

⁴ E. Renan *Mission de Phénicie* Paris 1864 p. 68 ff. Atlas pl. 9, V. Bérard *De l'origine des cultes arcadiens* (*Bibliothèque des écoles françaises d'Athènes et de Rome* Paris 1894. lxxvii) p. 89, Miss J. E. Harrison in the *Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 159 fig. 11.

at *Ain el-Hayât*, the 'Fountain of the Serpents,' is confronted by an eagle with spread pinions (fig. 150). This arrangement suggests that the solar disk was regarded as a sort of bird¹.

Without attempting to trace in detail the further fortunes of the winged disk—a task which has been undertaken by Count Goblet d'Alviella²—we may glance for a moment at its oriental analogue. The symbol has two main varieties in Mesopotamian art. One is a disk, sometimes transformed into a rosette or a wheel, with open wings and a fan-shaped tail: this disk is surmounted by a scroll resembling a pair of inverted volutes, from which depend two undulating streamers (fig. 151)³. The other shows a half-length human figure emerging from its centre: the

Fig. 151.

Fig. 152.

tail serves him for a kilt, and the scroll appears on either side of his head (fig. 152)⁴. This is the well-known sign of Ashur (Zeus *Assyrios*)⁵, patron god of the city Ashur and head of the Assyrian pantheon. On sculptured slabs and cylinders it is commonly seen hovering above the king or priest. And, mounted on a pole, it was actually borne as a sacred standard into battle⁶.

From Assyria both varieties of winged disk passed into Persia. The first lost its scroll, but retained its two undulating appendages.

¹ *Infra* ch. i § 6 (e).

² Count Goblet d'Alviella *op. cit.* p. 8 ff. I have followed this lucid and well-informed writer in the main lines of his classification.

³ A. H. Layard *The Monuments of Nineveh* First Series London 1849 pl. 6.

⁴ *Id. ib.* First Series pl. 13.

⁵ Nonn. *Dion.* 40. 393, *supra* p. 197 n. 4.

⁶ M. Jastrow *The Religion of Babylonia and Assyria* Boston etc. 1898 p. 194 n. 1 cites a description of this symbol given in a text of Sennacherib (Meissner—Rost *Bauinschriften Sannherib's* p. 94). While not committing himself to the view that Ashur was ever a nature-god, Dr Jastrow concludes (*op. cit.* p. 195 f.): 'it we are to assume that Ashur personified originally some natural power, the symbol of the winged disc lends a strong presumption in favor of supposing him to have been some phase of the sun.'

The second with equally little alteration served as the emblem of Auramazda (Zeus Oromasdes)¹. He appears in the reliefs of

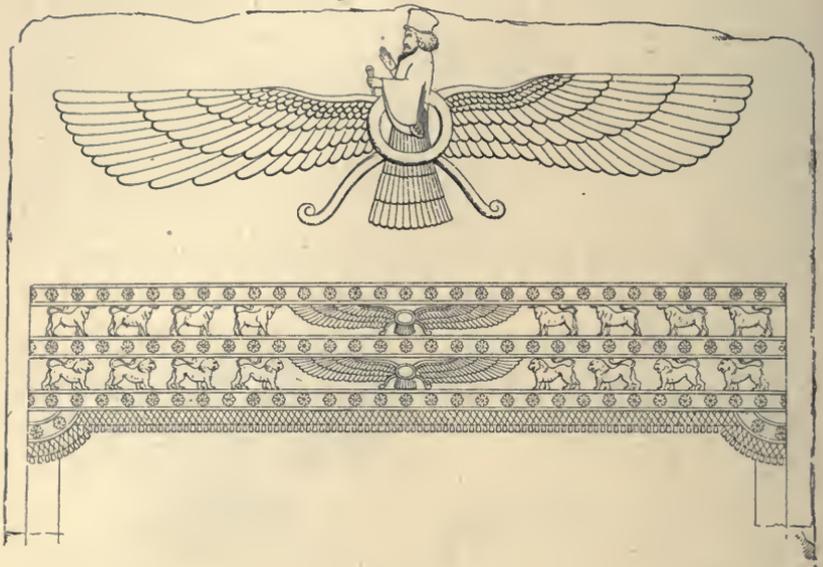

Fig. 153.

Persepolis encircled by the same solar² ring, which is winged and furnished with the like appendages: his royal robe (*kándys*), as before, passes into the tail-feathers³. A specimen figured by F. Lajard illustrates both types at once, the latter being superposed on the former (fig. 153)⁴. Cilician coins struck by the Persian satrap Tiri-bazos (386—380 B.C.) show the same deity Auramazda rising from a similar ring or wheel: he holds a wreath in one hand, a lotus-flower in the other (fig. 154)⁵.

Fig. 154.

¹ *Supra* p. 10 n. 1.

² Sepulchral reliefs from Persepolis give the symbol a lunar significance, the crescent moon being inscribed in the ring (see G. Hüsing 'Iranischer Mondkult' in the *Archiv f. Rel.* 1901 iv. 349—357).

⁵ *Brit. Mus. Cat. Coins* Lycaonia etc. Issos p. 90 pl. 15, 3; Mallos p. cxxii (cp. *Hunter Cat. Coins* ii. 537 pl. 59, 15); Soloi p. 148 pl. 26, 2; Tarsos p. 164 pl. 29, 1. I have figured the coin of Tarsos. *Head Hist. num.*² pp. 722, 724, 728, 730.

Sir G. Rawlinson¹ and Monsieur J. Menant² have argued that the winged disk of Mesopotamia had its prototype in a sacred bird. And it is certainly possible to arrange an evolutionary series of extant forms, if we may assume the successive loss of head, legs, and tail (fig. 155)³. But it is doubtful whether such a series affords the best explanation of the scrolls and curvilinear appendages noticed above. These suggest rather a combination of snake-forms with bird-forms, as was demonstrably the case in Egyptian art.

However that may be, the various types of solar disk do make it possible to believe that Ixion's wheel stood for the sun. And this possibility is raised to a probability, when we take into account certain other features of his myth to be discussed later and certain other myths to be considered almost immediately.

Assuming, then, that Ixion's wheel in some sense stood for the sun, we have yet to explain the peculiar use that is made of it in the myth. A mortal man, raised to the abode of Zeus and gifted with immortality, aspires to the hand of Hera. He expiates his sacrilege by being bound to a solar wheel, on which he is both lashed with a whip and burnt with fire. Prof. G. Lafaye has recently argued that the punishment meted out to Ixion was but the mythological echo of a punishment actually inflicted on delinquents⁴. The culprit was stretched upon a wheel and, while it revolved, was flogged, burnt, and on occasion beheaded. This

⁴ G. Lafaye in Daremberg—Saglio *Dict. Ant.* iv. 896 s.v. 'rota.'

mode of torture, which can be traced back to the fifth¹ and even to the sixth century B.C.², is often mentioned by Hellenic and Hellenistic writers. Aristophanes, for example, in his *Peace* makes the chorus curse any man that seeks war for his personal profit :

May he be stretched and flogged upon the wheel³.

Similarly in the romance of Achilleus Tatios the ill-starred Leukippe, brought to bay by her tyrannical master, defies him in the following terms: 'Order up your tortures. Bid him bring a wheel. Here are my hands; let him stretch them out. Bid him bring whips too. Here is my back; let him lay on. Bid him fetch fire. Here is my body, ready to be burnt. Bid him bring a sword as well. Here is my throat; let him cut it! Behold a novel sight—a single woman pitted against your whole array of tortures and triumphant over all!' Later, her lover Kleitophon finds himself in an equally sensational plight: 'I, as a condemned criminal, was to be tortured that they might discover whether Melitte had been privy to the murder. Already I was bound, stripped of my clothing, and hoisted up by nooses. Some were fetching whips, others fire and a wheel. Kleinias with a groan was calling upon the gods, when lo, the priest of Artemis, wreathed with bay, was seen approaching.' Etc.⁵ The verb commonly used of this torture, *trochizein*, 'to punish on the wheel,' is employed by the epigrammatist Asklepiades in an allusion to Ixion⁶; and the emperor Elagabalos, who bound parasites to a water-wheel, spoke of them as 'Ixions of the stream'.⁷ Torture by the wheel, regarded by the Romans as a specially Greek institution⁸, is well known in connexion with Christian martyrdoms and mediaeval punishments. The final relic of it—the 'Catharine wheel' of our November fireworks—by a curious reversion, or rather by an interesting survival, still brings before us, if we have eyes to see it, the blazing wheel of Ixion.

But, while fully admitting Prof. Lafaye's contention that the

wheel of the mythical Ixion was the torture-wheel of real life, I would urge that we have not thus got to the bottom of the matter. Why were men burnt upon a revolving wheel? Why on an engine of this particular shape? Why not tied to a stake, or cross-bar, or triangles, for instance? Because—I venture to reply—this form of punishment, like so many others (impaling, hanging, crucifixion, perhaps even ordinary flogging), originated in the service of religion, or at least in a definitely religious idea. And the idea in the present case was that the victim represented the sun. The mythical Ixion, if I am not mistaken, typifies a whole series of human Ixions, who in bygone ages were done to death as effete embodiments of the sun-god. Evidence in support of this view will be forthcoming in subsequent sections.

(β) Triptolemos.

Triptolemos is first mentioned in the Homeric *Hymn to Demeter*, a poem referable to the seventh century B.C., as one of the 'kings' or chiefs at Eleusis, whom Demeter instructed in mystic rites for the fertility of the soil¹. Apart from the fact that his name thrice heads the list, there is nothing to distinguish him from the other chieftains of the place—Diokles or Dioklos, Dolichos, Eumolpos, Keleos, Polyxeinos. The position of divine nurseling and favourite is reserved for Demophon, son of Keleos and Metaneira. But in course of time Triptolemos appears to have usurped the place of Demophon. His story is thus told by Apollodoros²: 'Metaneira the wife of Keleos had a child, whom Demeter took and reared. Wishing to make the babe immortal, she put it down every night in fire and so took off its covering of mortal flesh. Demophon—for that was the child's name—grew so fast by day that Metaneira kept watch, found him plunged in fire, and shrieked aloud. Consequently the babe was destroyed by the fire³, and the goddess revealed herself. But for Triptolemos, the elder of Metaneira's children, she made a chariot-seat (*diphros*) of winged snakes. She gave him grain, and he, soaring aloft through the sky, sowed the whole world with it.' Others make Triptolemos the son of Eleusis⁴,

¹ *H. Dem.* 474 ff., cp. 153 ff.

² Apollod. 1. 5. 1—2.

³ In the *h. Dem.* 250 ff. (cp. *Ov. fast.* 4. 555 ff.) the child is not destroyed by the fire, but only robbed of immortality through his mother's interruption of the rite—a ceremony of purification (F. B. Jevons *An Introduction to the History of Religion* London 1896 p. 365, E. E. Sikes on *h. Dem.* 239) and initiation (W. R. Halliday in the *Class. Rev.* 1911 xxv. 8 ff.).

⁴ Panyasis *frag.* 24 Kinkel *ap.* Apollod. 1. 5. 2.

or of Eleusius by Hioma¹, or of Eleusinus by Cathonea² or Cyntania³—variants which attest his connexion with Eleusis. The hero Eleusis was said by some to be the son of Hermes by Daeira, daughter of Okeanos⁴; and it is noteworthy that another account represented Triptolemos as the child of Okeanos and Ge⁵. Verses ascribed to Orpheus asserted that Eubouleus and Triptolemos were sons of Dysaules, and that Demeter, as a reward for information given her about her daughter, entrusted them with grain to sow⁶. Dysaules, Triptolemos, and Eubouleus were reckoned by the Orphists among the 'earth-born' dwellers of Eleusis⁷. Choirilos, an early tragedian of Athens, took Triptolemos to be the son of Raros⁸. Others made him the son of Rar⁹, or the son of Keleos son of Raros¹⁰—names which point to the Rarian Plain near Eleusis. One late writer, doubtless by a mere confusion, has him as the son of Icarus (*sic*), eponym of the Attic deme Ikaria¹¹. But in the time of Pausanias there was only one real rival to the Athenian tradition, namely that of the Argives, who maintained that Trochilos, a priest of the mysteries, had fled from Argos to Attike and had become by an Eleusinian wife the father of two sons—Eubouleus and Triptolemos¹².

In this tangle of names Aristophanes found ample material for a parody of the divine pedigree¹³. But it will be observed that, so far as Triptolemos is concerned, all roads lead to Eleusis. His cult left traces of itself from Syracuse to Gordyene, from Scythia to Egypt; but all such traces are compatible with the belief that Eleusis was its prime centre¹⁴. It is, therefore, to Attic art that we naturally turn for further light on the wheeled seat of Triptolemos¹⁵.

¹⁵ The vases, sculptures, wall-paintings, coins, and gems, illustrating the myth of Triptolemos have been collected and studied by Gerhard *Auserl. Vasenb.* i. 217 ff. pls. 41—46, *id.* *Ueber den Bilderkreis von Eleusis* Berlin 1865 ii. Beilage A (*Gesammelte akademische Abhandlungen* Berlin 1868 ii. 370 ff., 415 ff.), Lenormant—de Witte *Él. mon. chr.* iii. 97 ff. pls. 46—48, L. Stephani in the *Compte-rendu St. Pét.* 1859 p. 82 ff., 1862 pp. 32, 58, 1873 p. 115 n. 1, C. Strube *Studien über den Bilderkreis von Eleusis* Leipzig

Vase-illustrations of the sixth century differ in some respects from those of the fifth, and again from those of the fourth. Sixth century vases, of which some seven are known, show Triptolemos as a bearded man holding a bunch of corn and sitting on a wheeled seat. The seat is a more or less simple affair, and is arranged in profile towards the right. Hence one wheel only is visible. This

Fig. 156.

has four spokes and sometimes rests on the ground, sometimes rises into the air (fig. 156)¹. Wings and snakes are wholly absent².

1870, *id. Supplement zu den Studien über den Bilderkreis von Eleusis* Leipzig 1872, and above all by that master of detailed investigation Overbeck *Gr. Kunstmyth.* Demeter—Kora pp. 530—589 Münztaf. 9, Gemmentaf. 4, Atlas pls. 14—16.

¹ Gerhard *Auserl. Vasenb.* i pl. 44, Lenormant—de Witte *op. cit.* iii pl. 67, Overbeck *op. cit.* Atlas pl. 15, 1, Reinach *Rép. Vases* ii. 33, 7 f. This black-figured *amphora*, once in the Fontana collection at Trieste, is now at Berlin.

² A black-figured *kylix* from Boiotia now at Athens (Collignon—Couve *Cat. Vases d'Athènes* p. 308 no. 967) shows Triptolemos with a sceptre in a car winged and drawn by a snake. This vase is presumably a belated example of the black-figure technique like the pseudo-archaic Panathenaic prize-jars, on which the columns of Athena are sometimes surmounted by a small representation of Triptolemos holding corn-ears in

Further, there is a remarkable similarity between the equipment of Triptolemos and that of Dionysos. A small *amphora*, formerly in the collection of M. Lenormant, has Triptolemos with corn-ears and sceptre on its obverse, Dionysos with *kántharos* and vine-branches on its reverse, side. Both are seated in the same attitude on approximately similar thrones, and are obviously travelling across the world to dispense their respective bounties of corn and wine (fig. 157 *a* and *b*)¹. Another *amphora*, which passed from the

Fig. 157 *a*.Fig. 157 *b*.

collection of Viscount Beugnot into the Musée Vivienel at Compiègne, represents Triptolemos conducted by Hermes on one side, Dionysos conducted by Seilenos on the other. Triptolemos has corn-stalks; Dionysos, a *kántharos* and a vine with grape-branches. Their travelling seats are similar, but not identical; for that of Dionysos has old-fashioned spokes² and is fitted with wings

a winged car drawn by snakes (*Brit. Mus. Cat. Vases* ii. 277 ff. nos. B 603, B 604, B 607, B 608).

¹ Lenormant—de Witte *op. cit.* iii pl. 49 A, Overbeck *op. cit.* Atlas pl. 15, 5 *a* and 5 *b*. C. Strube *Studien über den Bilderkreis von Eleusis* Leipzig 1870 p. 8 takes the figure with the *kántharos* and vine-branches to be Ikarios, not Dionysos. The hero favoured by Dionysos would then balance the hero favoured by Demeter.

² On these see A. C. Haddon *The Study of Man* London and New York 1898 p. 161 ff. ('The Evolution of the Cart') and H. L. Lorimer 'The Country Cart of Ancient Greece' in the *Journ. Hell. Stud.* 1903 xxiii. 132 ff.

Fig. 158 a.

Fig. 158 b.

(fig. 158 *a* and *b*)¹. *A propos* of this resemblance between Triptolemos and Dionysos we must here notice a red-figured *kylix* from Vulci, now at Berlin (fig. 159)². Dionysos is again seen sitting on

Fig. 159.

a winged and wheeled seat. As on the Lenormant and Beugnot vases, he is wreathed, wears a *chiton* and a *himation*, and carries a *kantharos*. Only, in place of a vine he grasps a double axe, the 'ox-slaughtering servitor of king Dionysos,' as Simonides termed it³.

¹ Gerhard *op. cit.* i pl. 41, Lenormant—de Witte *op. cit.* iii pls. 48 f., Overbeck *op. cit.* Atlas pl. 15, 4, Reinach *op. cit.* ii. 32, 4—6. For Strube's view see *supra* p. 214 n. 1.

² Furtwängler *Vasensamml. Berlin* ii. 548 no. 2273, Gerhard *op. cit.* i pl. 57, 1 f., Lenormant—de Witte *op. cit.* i pl. 38, Reinach *op. cit.* ii. 38, 8 f. The inscription according to Furtwängler, reads ΚΕΦΙ · ΤΟΣΚΑ · ΟΣ, i.e. perhaps Κηφί[σ]ιος κα[λ]ός, not—as had been previously supposed—Ἡφαιστος καλός. The god with a double axe on a mule escorted by a Satyr and two Maenads in Laborde *Vases Lamberg* i pl. 43 (=Inghirami *Vas. fitt.* iii pl. 263) is probably Hephaistos rather than Dionysos, cp. Tischbein *Hamilton Vases* iv pl. 38 (=Inghirami *op. cit.* iii pl. 265, Lenormant—de Witte *op. cit.* i pl. 43).

³ Simonid. *frag.* 172 Bergk⁴ *ap.* Athen. 84 c f. For further evidence connecting Dionysos with the double axe see *infra* ch. ii § 3 (c) i (o).

Furtwängler *loc. cit.* takes this axe-bearing figure to be Triptolemos, not Dionysos,—a most improbable view, though accepted by Reinach *op. cit.* ii. 38.

Triptolemos and Dionysos dispensing their several bounties of corn and wine from a two-wheeled throne suggest comparison with a spring custom observed at *Kostl* in northern Thrace. 'A man, called the *χάχωστος* or *κοικηρός*, dressed in sheep or goat

Passing from the sixth century to the fifth, or at least from black-figured to red-figured vases, we find Triptolemos invariably depicted as a beardless youth, not a bearded man. His seat is always winged and sometimes, especially on the later¹ vases, furnished with snakes. In the great majority of cases the scene represented is that of Triptolemos starting on his long journey. Demeter for

Fig. 161.

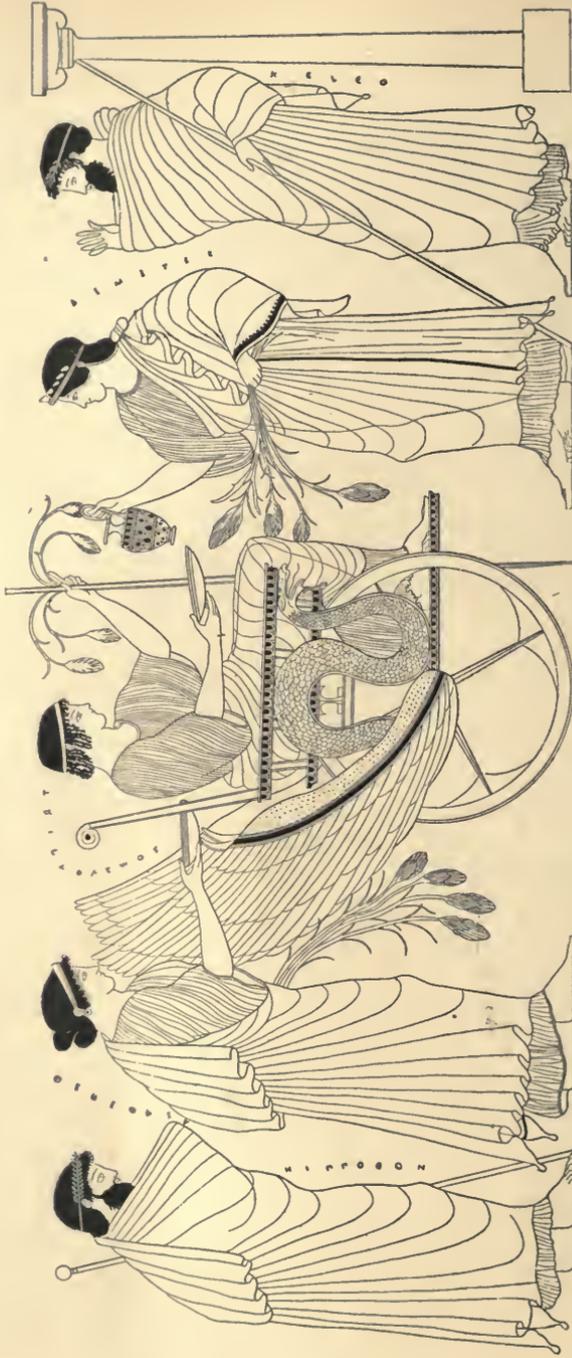

the most part fills him a *phiale*, that he may pour a libation before he goes. Two vases, out of many, will serve as illustrations. A

skins, wearing a mask and with bells round his neck, and in his hand a broom of the kind used for sweeping out ovens, goes round collecting food and presents. He is addressed as king and escorted with music. With him is a boy carrying a wooden bottle and a cup, who gives wine to each householder, receiving in return a gift. They are accompanied by boys dressed as girls. The king then mounts a two-wheeled cart and is drawn to the church. Here two bands are formed of married and unmarried men respectively, and each tries to make the king throw upon themselves the seed which he holds in his hands. This he finally casts on the ground in front of the church. He is then thrown into the river, stripped of his skin clothes (*διδύμοσ*), and then resumes his usual dress' (R. M. Dawkins in the *Journ. Hell. Stud.* 1906 xxvi. 201 f.).

¹ Cp. an electrum *stater* of Kyzikos c. 450—400 B.C., which shows the hero with his corn-ears drawn by two winged snakes (*Brit. Mus. Cat. ¹ Steph. Byz. *s.v.* "Αγρα καὶ Ἀγραί. The schol. Aristoph. *Plout.* 1013 states that the μικρὰ μυστήρια were devised by the Athenians in order to provide for the initiation of Herakles, who as a stranger could not otherwise have been initiated, but does not mention Agra.

² Schol. Aristoph. *ran.* 501.

(more probably) into the greater mysteries at Eleusis¹. A *pelike* from Kertsch, now at St Petersburg (fig. 163)², shows Demeter seated in the centre with Persephone standing beside her. The former has a high head-dress and a sceptre; the latter leans on a column and holds a long torch. Between them stands the youthful Ploutos with a horn of plenty. To the left we see Aphrodite, Eros, and a male figure holding two torches—probably Eumolpos rather than a mere *daidoúchos*; to the right, a seated female figure, whom we cannot identify with any assurance, and Dionysos

Fig. 163.

characterised by his ivy-wreath and his *thýrsos*. In the background, on the left, Herakles approaches. He carries his club in his right hand, but as an initiate wears a myrtle-wreath and holds in his left hand a *bácchos* or bundle of sacred boughs³. Above all—like the

sun-god in the sky—hovers Triptolemos on his winged car. A bell-*kratér* from Santa Agata de' Goti, now in the British Museum (fig. 164)¹, again depicts Demeter seated and Persephone standing beside her—the one with a sceptre, the other with a torch. Triptolemos on his wheeled seat, which is fitted with large wings and snakes, faces towards and converses with Demeter. To this Eleusinian company two *daidōhchoi* (perhaps we may venture to regard them as Eubouleus and Eumolpos) are about to introduce Herakles and the Dioskouroi. Herakles has his club;

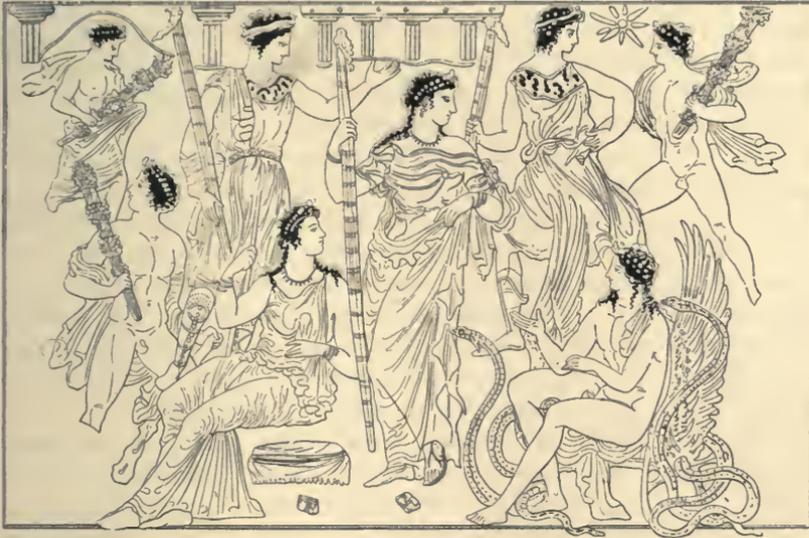

Fig. 164.

one of the Dioskouroi is accompanied by his star; all three wear wreaths and carry the mystic *bácchoi*. In the background, over a hill, appears a Doric building and two Doric columns: these may be taken to represent the *Telestérion*. In the foreground is set a stool (?), near which lie two uncertain objects of oblong shape, possibly tablets (?) required by the initiates.

The later group of fourth-century vases is decorated with a scene probably drawn from the theatre, not the *Telestérion*, though

βάκχος appears on silver (*Brit. Mus. Cat. Coins Attica*, etc. p. 29 pl. 8, 3, p. 73 pl. 13, 6) and copper coins of Athens (*ib.* p. 23 pl. 6, 14 f., pp. 81, 91 pl. 15, 17), and on copper coins of Eleusis (*ib.* p. 112 ff. pl. 20, 1—4). It is also carved on the frieze of the small Propylaea (*Durm Baukunst d. Gr.*² p. 118 coloured plate) and on that of the great altar at Eleusis (*Daremborg-Saglio Dict. ant.* ii. 561 fig. 2633), as well as on that of the altar from the *Eleusinion* at Athens (*ib.* ii. 570 fig. 2638).

¹ *Brit. Mus. Cat. Vases* iv. 45 f. no. F 68, Lenormant—de Witte *op. cit.* iii. 180 f. pl. 63 A, E. Gerhard *Gesammelte akademische Abhandlungen* Berlin 1868 pl. 71, 1, Overbeck *op. cit.* Atlas pl. 18, 19.

attempts to connect it with the *Triptolemos* of Sophokles have failed for lack of evidence¹. These vases, of which four are known², regularly exhibit the departure of Triptolemos, though with considerable variations and innovations as to the surrounding figures, landscape, etc. A common feature is their treatment of the hero's wheeled seat, which in three out of the four cases has become a chariot facing us full-front and drawn by two monstrous snakes. As the snakes increase in size, the wings diminish³ and on two of the vases are absent altogether. One of these, an Apulian *amphora* from the Pizzati collection now at St Petersburg, is here reproduced (pl. xix)⁴. It shows Demeter, as on the earlier red-figured vases, filling the *phidole* of Triptolemos, who richly clad in a stage costume stands erect in his chariot. A trait new to the vase-painters is that two ears of corn are visible in his hair, which is confined by a white band⁵. Close to Demeter and Triptolemos are two Horai appropriately holding corn-stalks. The background is occupied by figures frequent on Apulian vases and of no special significance here, *viz.* a group of Aphrodite, Eros, and Peitho on the right, and Pan with his *syrinx* leaning against a tree-trunk on the left. In the foreground flows a river inscribed *Néilos*, 'the Nile.' The locality is further indicated perhaps by the flora, certainly by the fauna. Lotiform plants are growing on the river-bank, and a lynx-cat with a bird in its mouth is decidedly reminiscent of Egypt⁶.

With the St Petersburg *amphora* F. Matz⁷ and O. Kern⁸ justly compare two other monuments that exhibit Triptolemos in an Egyptian setting—the *tazza Farnese* of the Naples Museum, a magnificent sardonix cup probably fashioned at Alexandria in the Ptolemaic period⁹, and the Petrossa cup of the Vienna collection, a gold *phidole* of later, clumsier workmanship found in 1837 by a

peasant between Jassy and Bucharest¹. Both these cups associate Triptolemos with Isis and the Nile-god, the inference being that on Egyptian soil the Greek agricultural hero was identified with Osiris.

On the *tazza Farnese* Triptolemos has not only a bag of seed on his left arm, but a plough-pole and yoke in one hand, a plough-share in the other. On the Petrossa *phiale* he holds a couple of ploughs. O. Kern² argues that all the evidence, whether literary³ or monumental⁴, connecting Triptolemos with the plough is comparatively late, in fact that he first became a ploughman in the Alexandrine age owing to his identification with Osiris, who was regarded by the Greeks and Romans as the inventor of the plough⁵. This view has, however, been successfully refuted by O. Rubensohn⁶, who points out that in genuinely Egyptian sources Osiris is never conceived as a ploughman, so that in Hellenistic times he must have got the plough from Triptolemos, rather than Triptolemos from him. Moreover, Rubensohn is able to adduce two vases of the pre-Hellenistic period, on which Triptolemos is definitely associated with a plough. One is a bell-*kratér* of Attic make, which may be dated about 450 B.C. It was found at Cumae and is now in the Bibliothèque Nationale at Paris. On it we see (pl. xx)⁷ Triptolemos, who has had his lesson in ploughing from Demeter and is about to start on his tour of instruction. He is in the act of mounting his winged seat, the high back of which terminates in a griffin's head. He takes with him his sceptre and a bunch of corn, but turns for a final word of advice or farewell to Persephone, who carries two torches, and her mother, who still holds the plough⁸. The other vase cited by Rubensohn is a *skýphos*

⁸ So Gerhard, Lenormant and de Witte, Rubensohn, de Ridder. Overbeck thought that the holder of the torches was meant for Demeter, the holder of the plough for Persephone. But cp. Soud. *s.v.* Παριάς... ἡ Δημήτηρ τὸν ἀπύγονον Πάρου Τριπτόλεμον

of Boeotian fabric at Berlin, referable to the fifth century or at latest to the early decades of the fourth century B.C. Triptolemos here (fig. 165)¹ holds the plough himself, while Demeter presents him with the corn-stalks and Persephone, as before, carries a couple of torches². The *skýphos* thus forms a pendant to the *kratér*. On the *kratér* the goddess grasped the plough, her *protégé* the corn. On the *skýphos* their positions are precisely reversed. But it can hardly be doubted that both vases alike represent Triptolemos about to start on his mission. The winged car is absent from the *skýphos*, either because this vase depicts a slightly earlier moment

Fig. 165.

than the other, or perhaps merely by way of simplifying a somewhat ambitious design.

However that may be, it is plain that Triptolemos' association with the plough is not only Hellenistic, but Hellenic too. We need not, therefore, hesitate to accept the derivation of his name put forward by Agallis of Korkyra in the third century B.C.³ *Triptólemos* is indeed the hero of the 'thrice-ploughed' (*tripolos*) field⁴. And Dr P. Giles has argued from the form of his name

ἔδιδάξε τὴν τοῦ σίτου γεωργίαν· παρέσχε δὲ αὐτῷ καὶ ἄρμα πτηνῶν δρακόντων, εἰς δ' ἐποχούμενος ὁ Τριπτόλεμος περιήει πᾶσαν τὴν γῆν, διδάσκων τὴν τοῦ σίτου γεωργίαν—a passage well illustrated by our vase.

¹ *Ath. Mitth.* 1899 xxiv. 67 ff. pl. 7.

² The mother is clearly distinguished from the daughter by her sceptre, her more imposing head-dress, her richer clothing, and her more maternal form.

³ Schol. *Il.* 18. 483 *τριπολον δὲ τὴν ἀρουράν φησιν ἐπεὶ Τριπτόλεμος πρῶτος ἔσπειρε σίτον, ὃν βασιλεῖα φησίν.* *Infra* ch. ii § 9 (h) ii (δ).

⁴ Cp. Plout. *coniug. praecipit.* 42 Ἀθηναῖοι τρεῖς ἀρότους ἱερῶς ἀγούσι· πρῶτον ἐπὶ

with its *-pt-*, not *-p-*, that his worship came to Eleusis along with improved methods of cultivation from the fertile plains of northern Greece¹.

If such be the name and nature of Triptolemos, what are we to make of his wheeled seat? I believe it to have been simply an early expression to denote the sun. Just as Herakles, when he crossed the sea, voyaged in the solar cup lent him by Okeanos or Nereus or Helios himself², so Triptolemos, when he crosses the earth, travels on the solar wheel received at the hand of Demeter. It will be observed that this explanation of the myth squares well with its progressive representation. The earliest vase-paintings showed Triptolemos sitting on a one-wheeled seat. This we naturally took to be a two-wheeled seat seen in profile³. But I now suggest that it arose from a yet earlier religious conception, that of the hero sitting on the single solar wheel. A possible survival of this conception occurs in the *Astronomica* of Hyginus, where we read that Triptolemos 'is said to have been the first of all to use a single wheel, that so he might avoid delay on his journey⁴.' It is noteworthy, too, that in the Argive tradition⁵ the father of Triptolemos was *Trochilos*, 'he of the Wheel' (*trochós*), the inventor—

Σκίρω τοῦ παλαιοτάτου τῶν σπόρων ὑπόμνημα· δεύτερον ἐν τῇ Ῥαρίᾳ· τρίτον ὑπὸ πῶδιν τὸν καλούμενον Βουξύγιον. τούτων δὲ πάντων ἱερώτατός ἐστιν ὁ γαμήλιος σπόρος καὶ ἄροτος ἐπὶ παλῶν τεκνώσει with the remarks of O. Kern in Pauly—Wissowa *Real-Enc.* ii. 1215 ff. s.v. Ἄροτοι ἱεροί.

³ *Supra* p. 213.

⁴ Hyg. *poet. astr.* 2. 14 qui primus omnium una rota dicitur usus, ne cursu moraretur.

J. Déchelette *Manuel d'archéologie* Paris 1910 ii. 1. 416 n. 3 calls attention to a passage in the *Rig-veda* i. 164, 2, which describes the solar chariot 'of the single wheel' drawn by 'the single horse' of seven-fold name.

This raises a suspicion that more than one mythical charioteer, who lost a wheel and thereby came to grief, was originally a solar hero. Myrtilos, the charioteer of Oinomaos, who compassed his master's death by inserting a linch-pin of wax, or by not inserting a linch-pin at all, and was subsequently thrown out of Pelops' car into the sea near Geraistos, is a figure comparable with Phaethon; indeed, according to one version he was the son of the Danaïd Phaethousa (schol. Ap. Rhod. 1. 752, schol. Eur. *Or.* 998): on Apulian vases he often has as his attribute a wheel (Reinach *Rép. Vases* i. 128, 3, 140, 2, 290) or a couple of wheels (*ib.* i. 167, Heydemann *Vasensamm. Neapel* p. 524 f. no. 3227). In a parallel myth (*Class. Rev.* 1903 xvii. 270 f.) from Thrace Dryas, like Oinomaos, is killed through the removal of his linch-pins (Parthen. *narr.* am. 6, cp. Konon *narr.* 10).

K. Tümpel in Roscher *Lex. Myth.* ii. 3318, 3320, Pauly—Wissowa *Real-Enc.* ii. 2261 has drawn up a list of handsome young charioteers, who came to an untimely end. He regards them all as various forms of the solar hero common to the coast-districts of the eastern Aegean. They include the following names—Apsyrtos, Atymnos, Killas, Malaos, Myrtilos, Phaethon, Tenages. To these we may add Sphairos, a suggestive name given by the Troezenians to Killas (Paus. 5. 10. 7), and the great Troezenian hero Hippolytos himself, not to mention his *alter ego* Virbius.

⁵ *Supra* p. 212.

some said—of the first chariot¹. But the word *trochilos* means also 'a wren.' And it can hardly be fortuitous that the Athenians made Triptolemos the son of *Keleós*, the 'Green Woodpecker,' while the Argives made him the son of *Trochilos*, the 'Wren.' Conceivably both birds were bound to a wheel, like the *ixyx*, and used as a solar charm². But, to return from fancy to fact, red-figured as distinct from black-figured vases added wings and snakes to

Fig. 166.

Triptolemos' seat³. In this again it followed the example of the solar vehicle; for a whole series of black-figured Attic vases at Cambridge⁴, Paris⁵, Berlin⁶, Vienna⁷, Athens⁸, Boston⁹, represents

¹ Tertull. *de spectac.* 9.

² The matter is discussed *infra* ch. i § 6 (d) i (ε).

³ *Supra* p. 217. The snakes themselves are not winged till the second century B.C. (Apollod. i. 5. 2 *δίφρον...πτηνῶν δρακόντων*). The earliest extant monuments that so represent them are of Roman date (Overbeck *op. cit.* p. 554 Atlas pl. 16, 11, 12: *infra* p. 248 n. 7). See further Gruppe *Gr. Myth. Rel.* p. 807 n. 2.

⁴ E. A. Gardner *Cat. Vases Cambridge* p. 52 no. 100 fig. The reproduction in E. ⁹ Robinson *Cat. Vases Boston* no. 335.

Helios rising as a draped male figure standing between (*i.e.* on a car drawn by) two winged horses, the solar disk being visible over his head. The Berlin vase joins to the disk a couple of serpentine-form appendages, thereby recalling the winged and snaky disks of Egyptian and Assyrian art¹. Indeed, a late bas-relief in black stone brought by E. Renan from Gharfin near Gábeil, the ancient Byblos, shows Triptolemos, who stands in a car drawn by two snakes and scatters grain, within a *naískos* actually decorated with the Egyptian disk (fig. 166)². This, however,—as F. Lenormant was careful to point out—may be a matter of mere decoration. The crescent moon associated with the hero suggests rather that Triptolemos was here identified with the Phrygian god Men³, as elsewhere with the Egyptian Osiris⁴, the Lydian Tylos⁵, and the Cilician *Ba'al-tarz*⁶. Finally, the corn-ears borne along on Triptolemos' wheeled seat are comparable with the corn-ears attached to the *triskellés* on the coins of Panormos, etc.⁷—a symbol which, as we shall see, was solar in origin and, moreover, equipped with both wings and snakes.

In the foregoing section we have traced the gradual development of Triptolemos' snake-drawn chariot from the simple solar wheel. This derivation is emphatically confirmed by the myth of Antheias, as told in Pausanias' account of Patrai:

'Those who relate the earliest traditions of Patrai declare that Eumelos, a native of the soil, was the first to dwell in the land as king over a few people. When Triptolemos came from Attike, Eumelos received cultivated crops and, being taught to build a city, named it Aroe after the tilling of the ground. They say that once, when Triptolemos had fallen asleep, Antheias the son of Eumelos was minded to yoke the snakes to the chariot of Triptolemos and to try his own hand at sowing. But fate overtook him and he fell out of the chariot. Thereupon Triptolemos and Eumelos founded a city in common and called it Antheia after the name of Eumelos' son⁸.'

Antheias falling off the car of Triptolemos is, as O. Gruppe

⁷ *Infra* ch. i § 6 (d) v.

⁸ Paus. 7. 18. 2—3.

observes¹, 'a genuine variant of the Phaethon legend,' and supports our contention that Triptolemos' car was of solar origin.

Triptolemos was said to have received his car from Demeter²—a statement which cannot be traced back beyond the second century B.C.³ It must, however, have been commonly accepted in Roman times, for a cameo at Paris (fig. 167)⁴ shows Claudius and Messalina in the guise of Triptolemos and Demeter; the former scatters the grain from his *paludamentum*, the latter leans forward with corn-ears and poppies in her left hand, a roll in her right.

Fig. 167.

Moreover, later literature makes Demeter travel in a snake-drawn chariot when in search of her daughter Persephone. In this way

¹ Gruppe *Gr. Myth. Rel.* p. 544 n. 5.

Possibly Demeter Ποτηριοφόρος of Antheia (Athen. 460D) was a figure analogous to the drink-bearing Demeter of the Triptolemos vases (*supra* p. 217 f.).

² Gruppe *Gr. Myth. Rel.* p. 807 n. 2.

³ Apollod. 1. 5. 2 is our earliest authority.

⁴ Babelon *Cat. Camées de la Bibl. Nat.* p. 144 f. no. 276 Album pl. 30. Müller—Wieseler *Denkm. d. alt. Kunst* i. 92 f. pl. 69, 380 identify the divinised pair as Germanicus and Agrippina, arguing that Germanicus appears again as a Roman Triptolemos on the silver *patera* from Aquileia at Vienna (*Mon. d. Inst.* iii pl. 4, *Ann. d. Inst.* 1839 xi. 78—84). In the middle ages this cameo was thought to represent the triumph of Joseph in Egypt!

she approached Eleusis¹, and in this way she quitted it again². Art follows suit. Demeter in her snake-chariot appears first on Roman *denarii* of the moneyer M. Volteius about the year 88 B.C.³, then on those of C. Vibius Pansa in 43 B.C.⁴, and not infrequently on late Greek coins⁵. Occasionally she holds corn-ears and a sceptre⁶, or a poppy-head and a sceptre⁷, more often a couple of torches (fig. 168)⁸, rarely corn-ears and torches too⁹. The scene of her quest was common on *sarcophagi* of Roman date;

Fig. 168.

The goddess has one torch only on imperial coins of Kretia-Flaviopolis (Waddington—Babelon—Reinach *op. cit.* i. 337 no. 25 pl. 54, 10), Claudio-Seleucia (*Brit. Mus. Cat. Coins Lycia* etc. p. 254).

⁹ So on imperial coins of Hyrkanis (*Brit. Mus. Cat. Coins Lydia* p. 125 pl. 13, 9), Sardeis (*ib.* Lydia p. 273).

and here she is seen holding a torch and drawn by two monstrous snakes usually winged near the chariot-wheels¹, or in more agitated guise holding two torches and drawn by snakes winged at the neck². *Sarcophagi* of the former type show the snake's tail twined about the hub of the wheel, which takes the form of a lion's head (fig. 169)³. This detail perhaps points to the solar character of the vehicle in question⁴. For Greeks and Romans alike, therein agreeing with the Egyptians⁵ and the nations of the

Fig. 169.

nearer east⁶, looked upon the lion as an animal full of inward fire and essentially akin to the sun⁷. The lion on Roman military

¹ Overbeck *op. cit.* p. 612 f. Atlas pl. 17, 1, 3=R. Foerster in the *Ann. d. Inst.* 1873 xlv. 72 ff. pl. EF 1, 2.

⁷ Ail. *de nat. an.* 12. 7, Tertull. *adv. Marc.* 1. 13, Macrob. *Sat.* 1. 21. 16, Myth. Vat. 3. 8. 13.

standards was interpreted as a solar emblem¹. The Mithraic sun-god was figured with a lion's face². The sign Leo was called 'the house of the sun³,' and—be it noted—the sun was in Leo when Persephone was carried off⁴. What is perhaps more to the point, it was Helios that took pity on Demeter and told her where her daughter was to be sought⁵. Did he not also lend her his chariot for the search⁶?

Other deities too on occasion appear in a like conveyance. Dionysos, according to certain ceramic artists of the sixth and fifth centuries B.C., roamed the world *à la* Triptolemos on a wheeled and winged seat⁷. And even Athena is represented, on a red-figured *pyxis* of fine style at Copenhagen, as drawn in a chariot by yoked snakes to the judgment of Paris⁸.

¹ Lyd. *de mens.* 1. 22 p. 12, 15 Wünsch.

³ Ail. *de nat. an.* 12. 7, Macrobr. *Sat.* 1. 21. 16, Serv. *in Verg. georg.* 1. 33.

⁴ Schol. *Arat. phaen.* 150. ⁵ *H. Dem.* 62 ff.

⁶ In *h. Dem. loc. cit.* 63, 88 Helios has a chariot drawn by horses. So has the questing Demeter on many *sarcophagi* (Overbeck *op. cit.* p. 627 ff. Atlas pl. 17, 4, 8, 10, 11, 17, 18, 19, 23). But another line of tradition gave Helios a snake-drawn chariot: see *infra* ch. i § 6 (d) i (γ, δ).

Gruppe *Gr. Myth. Rel.* pp. 130, 538 n. 2, 546, 1138 n. 2, 1145, 1149, 1167 n. 1 suggests that Helios was often associated in cult with Demeter. But of this I find no convincing proof. ⁷ *Supra* p. 214 ff.

⁸ A. Conze *Heroen- und Göttergestalten der griechischen Kunst* pl. 102, 1, A. Dumont—J. Chaplain—E. Pottier *Les céramiques de la Grèce propre* Paris 1888 i. 368 f. pl. 10=Roscher *Lex. Myth.* iii. 1617 f. fig. 7. Hera's chariot on this vase is drawn by four horses; that of Aphrodite by two Erotes. Probably the artist gave Athena a team of snakes because the snake was associated with her on the Akropolis at Athens: cp. also the cults of Athene *Παπela* on the road from Sparta to Arkadia (Paus. 3. 20. 8), of Athene *Τρυαλα* at Acharnai (Paus. 1. 31. 6) and Athens (Paus. 1. 23. 4 with J. G. Frazer *ad loc.*), and the word *δρακίνα* used of Athene in Orph. *h. Ath.* 32. 11.

Athena is not normally connected with the solar wheel. In a vase-painting already described (*supra* p. 199) she brings up the winged wheel of Ixion and may perhaps be regarded as Athene *Ἐργάνη* later replaced by Hephaistos (*supra* p. 200 ff.). Certain small silver coins of Lampsakos (fig. 170) have as their reverse type a head of Athene, whose helmet is marked with a wheel (*Brit. Mus. Cat. Coins Mysia* p. 80 no. 21. The specimen figured is from my collection): cp. a silver obol of Massalia c. 500 B.C. with obv. archaic head wearing a helmet on which is a wheel, rev. a four-spoked wheel (E. Muret—M. A. Chabouillet *Catalogue des monnaies gauloises de la Bibliothèque Nationale* Paris 1889 p. 12, H. de la Tour *Atlas de monnaies gauloises* Paris 1892 no. 520 pl. 2, Head *Hist. num.*² p. 6), and a barbarised copy of it—both found at Morella in Spain (E. Muret—M. A. Chabouillet *loc. cit.*, H. de la Tour *op. cit.* no. 524 pl. 2, R. Forrer *Keltische Numismatik der Rhein- und Donaulande* Strassburg 1908 p. 81 figs. 154, 155 pl. 7). A. de Ridder *Collection de Clercy* Paris 1905 iii (Les Bronzes) 206 f. no. 296 pl. 48 publishes a bronze statuette of Athene holding lance and owl. The crest of her helmet is supported by 'une rouelle,' as on Panathenaic amphoras found in Kyrenaike (*ib.* p. 203; but see G. von Brauchitsch *Die panathenäischen Preisamphoren* Leipzig and Berlin 1910 p. 46 ff.).

Fig. 170.

In this connexion we must take account of a unique silver *drachmé* or quarter-shekel, which has been for many years in the British Museum¹ (pl. xxi and fig. 171 *a, b*)². It is struck on the Phoenician

Fig. 171.

standard³. The obverse shows a bearded head in three-quarter position (not double-struck) facing towards the right and wearing a crested Corinthian helmet with a bay-wreath upon it. The reverse has a square incuse surrounded by a spiral border, within which we see a bearded divinity enthroned. He wears a long garment, which covers his right arm and extends to his feet. He is seated on a winged and wheeled seat: the wing is archaic in type and rises high behind his back; the wheel has six spokes and an inner ring round its axle. The god has an eagle (or hawk?)⁴ on his outstretched left hand. Before him in the lower right hand corner of the square is an ugly bearded head. In the field above the seated deity are the Phoenician letters YHW , that is, *YHWH*⁵.

The credit of being the first to decipher and to interpret aright the inscription belongs to Monsieur C. Clermont-Ganneau. As far back as 1880 he suggested to Prof. P. Gardner and Dr B. V. Head that it was the trilateral form of the divine name Jehovah; and in

¹ Taylor Combe *Veterum populorum et regum numi qui in Museo Britannico adservantur* London 1814 p. 242 no. 5 pl. 13, 12, H. de Luynes *Essai sur la Numismatique des Satrapies et de la Phénicie sous les rois Achéménides* Paris 1846 p. 29 no. 1 pl. 4, C. D. Ginsburg in the *Palestine Exploration Fund. Quarterly Statement for 1881* London p. 19 ('Jehu in his carriage...the name Jehu in the old Hebrew characters exactly resembling the letters on the Moabite stone, only in fact more perfectly written'), A. Neubauer in the *Revue des Études juives* 1881 ii. 290 cp. *ib.* 154, E. Babelon *Les Perses Achéménides* Paris 1893 p. lxxvi fig. 30, J. P. Six in the *Num. Chron. ² Pl. xxi is an enlarged photograph of a cast of the reverse.

³ It weighs 50.7 grains (3.3 grammes), and is therefore somewhat lighter than the average quarter-shekel. It is a well-preserved specimen.

⁴ The bird is described as a hawk by Taylor Combe, J. P. Six, and E. Babelon (with a query).

⁵ See e.g. the comparative tables of Phoenician, Egyptian Aramaic, Old Hebrew, etc., forms given by J. Euting *Tabula scripturae Hebraicae* Argentorati 1882, Forrer *Reallex.* p. 714 pl. 202.

232¹

Quarter-shekel of Gaza showing the Hebrew Godhead as a solar Zeus.

See page 232 ff.

1892, when lecturing at the *Collège de France* he treated it as such¹. Dr Ginsburg's rival attempt to read it as the name of Jehu, king of Israel, makes shipwreck—as A. Neubauer was prompt to point out—on the chronology, the coin being nearly five centuries later than Jehu's reign². There can, in fact, be little doubt that we have here a gentile representation of the Hebrew Godhead.

Now a bearded god enthroned with an eagle on his hand is a common art-type of Zeus. And it will be remembered that in 168 B.C. Antiochus iv Epiphanes transformed the temple at Jerusalem into a temple of Zeus *Olympios* and the temple on Mount Gerizim into a temple of Zeus *Xénios*³ or *Hellenios*⁴. Further, the winged wheel is, as we have seen, solar in its origin. It follows that the coin represents Jehovah under the guise of a solar Zeus⁵.

This conclusion is confirmed by the fact that *Iáo*—the form usually taken by Jehovah's name in magical texts of the Hellenistic age⁶—was equated sometimes with Zeus, sometimes with Helios. A papyrus at Berlin, acquired by Lepsius at Thebes in Egypt and published by Parthey in 1866, records an incantation, which begins by summoning Apollon in company with Paian to quit Parnassos and Pytho, and then continues in a quasi-Semitic strain :

Come, foremost angel of great Zeus *Iáo*,
And thou too, Michael, who holdest heaven,
And, Gabriel, thou the archangel, from Olympos⁷.

The Anastasy papyrus of the British Museum, published by Wessely in 1888, includes among other magical *formulae* the following prose invocation: 'I summon thee the ruler of the gods—Zeus, Zeus,

¹ In the Judæo-Aramaean *papyri* recently found at Elephantine (*Assuan*) the name of Jehovah is similarly trilateral (A. H. Sayce and A. E. Cowley *Aramaic Papyri discovered at Assuan* London 1906 p. 37 n. on pap. B, 4, E. Sachau *Aramäische Papyri und Ostraka aus... Elephantine* Leipzig 1911 p. 277 Index).

² C. D. Ginsburg and A. Neubauer *loc. cit.*

³ 2 Maccab. 6. 1 f., Euseb. *chron. ann. Abr.* 1850 (*v. l.* 1848) ii. 126 f. Schoene.

⁴ Ioseph. *ant. Jud.* 12. 5. 5, Zonar. 4. 19 (i. 317 Dindorf). See Append. B Samaria.

⁵ Mrs H. Jenner *Christian Symbolism* London 1910 p. 67 states that in the convent church of Kaisariani on Mt. Hymettos 'the winged fiery wheel is a throne for the Divine feet of Almighty God.'

⁶ W. W. Baudissin *Studien zur semitischen Religionsgeschichte* Leipzig 1876 i. 179—254, G. A. Deissmann *Bibelstudien* Marburg 1895 pp. 1—20, Gruppe *Gr. Myth. Rel.* p. 1603 n. 3 ff. This is not, of course, necessarily inconsistent with the view that Iao is the final form of the Babylonian god Ea (see C. F. Lehmann-Haupt in Roscher *Lex. Myth.* iv. 358 ff., *supra* p. 188 n. 1).

⁷ G. Parthey *Zwei griechische Zauberpapyri des Berliner Museums* Berlin 1866 p. 128. Pap. 1. 300 ἀγγελε πρωτεύων (so Kirchhoff for MS. πρωτεύουσι) Ζητὸς μεγάλιο Ἰάω· κ.τ.λ. Baudissin *op. cit.* i. 198 observes that ἀγγελε here refers to Apollon, the theme of the preceding lines. Zeus is identified with Jehovah, and Apollon his mouthpiece with the angel of Jehovah.

that thunderest on high, king Adonai, lord Iaoouee!'. Apollon *Klarios*, whose ancient oracle near Kolophon in Asia Minor enjoyed a new lease of life in Roman times², was once questioned concerning the nature of the dread mysterious Iao³. His answer has—thanks to Macrobius—been preserved:

They that know mysteries should conceal the same.
But, if thy sense be small and weak thy wit,
Mark as the greatest of all gods Iao—
In winter Hades, Zeus when spring begins,
Helios o' the summer, autumn's soft Iao⁴.

¹ C. Wessely *Griechische Zauberpapyrus von Paris und London* Wien 1888 p. 115 Brit. Mus. pap. 46. 483 ff. ἐπικαλοῦμαι σε τὸν δυνάστην τῶν θεῶν, ὑψιβρεμέτα Ζεῦ Ζεῦ, τύραννε Ἀδωνάι (so Buresch for MS. αδαίαι sic), κύριε Ἰαουουε (sic) = F. G. Kenyon *Greek Papyri in the British Museum* London 1893 i. 80 no. 46, 469 ff.

² K. Buresch *Klaros* Leipzig 1889 p. 38 ff.

³ Hardly less remarkable was the response given by Apollon *Klarios* touching his own godhead (Cogny *Anth. Pal. Append.* 6. 140, cp. the Tübingen Χρησμοὶ τῶν Ἑλληνικῶν θεῶν in Buresch *op. cit.* p. 97 f.; *Lact. div. inst.* 1. 7). The two oracles are confused in Kedren. *hist. comp.* 41 c f. (i. 73 f. Bekker).

⁴ *Orac.* (Cogny *Anth. Pal. Append.* 6. 135) *ap.* Macrob. *Sat.* 1. 18. 19 ff. Macrobius introduces the oracle as follows: *eis* Ζεὺς, *eis* Ἄιδης, *eis* Ἥλιος, *eis* Διώνυσος. huius versus auctoritas fundatur oraculo Apollinis Clarii, in quo aliud quoque nomen soli adicitur, qui in isdem sacris versibus inter cetera vocatur Ἰάω. Clearly, then, the autumn-god of the oracle must be some form of Dionysos. Hence for the concluding words ἀβρὸν Ἰάω C. A. Lobeck *Aglaophamus* p. 461 ingeniously conjectured ἀβρὸν Ἀδωνι and L. Jan *ad loc.* yet more ingeniously ἀβρὸν Ἰακχων. Baudissin *op. cit.* i. 215 quotes in support of Jan's emendation a gem inscribed ΙΑΩ ΙΑ Η ΑΒΡΑ ΙΑΧΗ ΙΩ ΦΩΞ ΑΩ, which he renders: 'Iao, Ia, der volle Jubelruf, Io, Licht, AO.' But Buresch *op. cit.* p. 52 f. surmises that the gem should be read ΙΑΩ ΙΑΗ ΑΒΡΑΣΞ ΗΙΩ etc.; in which case Baudissin's argument collapses. Indeed, Baudissin now (*Adonis und Esmun* Leipzig 1911 p. 124) supports Lobeck's conjecture. Buresch himself *op. cit.* p. 49 and Gruppe *Gr. Myth. Rel.* p. 1603 n. 4 defend the text ἀβρὸν Ἰάω, on the ground that the epithet ἀβρὸν suffices to describe the Dionysiac character of the Jewish deity.

This identification of Jehovah with Dionysos is later than the identification with Zeus. In fact it seems possible to trace the steps by which the transition was effected. On the Phoenician coin under discussion Jehovah appears as a solar Zeus (*supra* p. 232 f.). To Antiochos Epiphanes he was Zeus *Olympios*, *Xénios*, *Hellenios* (*supra* p. 233). Varro, perhaps following Poseidonios, equated him with Iupiter *Capitolinus* (Gruppe *Gr. Myth. Rel.* p. 1603 n. 4, quoting Reitzenstein *Zwei religionsgesch. Fr.* p. 78 n.). The first hint of the new comparison occurs in the age of Tiberius (Val. Max. 1. 3. 3 Cn. Cornelius Hispalus...Iudaeos, qui *Sabazi* Iovis cultu Romanos inficere mores conati erant, repetere domos suas coegit). After this we find successive identifications with Bacchos (Plout. *symph.* 4. 6. 2), Liber pater (Tac. *hist.* 5. 5), Dionysos (Lyd. *de mens.* 4. 53 p. 111, 7 ff. Wünsch).

The connexion of Jehovah with Helios may have been facilitated by the belief that *Iáo* meant 'Light' (Lyd. *de mens.* 4. 53 p. 110, 25 ff. Wünsch ó δὲ Ῥωμαῖος Βάρρων περὶ αὐτοῦ διαλαβὼν φησι παρὰ Χαλδαίους ἐν τοῖς μυστικοῖς αὐτὸν λέγεσθαι Ἰάω ἀντὶ τοῦ φῶς νοητὸν τῇ Φοινίκων γλώσσῃ, ὡς φησὶν Ἐρέννιος, Kedren. *hist. comp.* 169 A (i. 296 Bekker) ὅτι Ἡαὼ παρὰ Χαλδαίους ἐρμηνεύεται φῶς νοητὸν τῇ Φοινίκων γλώσσῃ where for *Haw* Baudissin rightly read Ἰάω). The gem cited above has φῶξ for φῶς, as another gem gives *Mίθραξ* for *Mίθρας* (Baudissin *Studien zur semitischen Religionsgeschichte* i. 215). The Anastasy papyrus invokes φωσφόρ' Ἰάω (C. Wessely *op. cit.* Brit. Mus. pap. 46).

Iao is here expressly identified with both Zeus and Helios. These identifications might be illustrated by some of the bizarre devices to be seen on Gnostic amulets. For example, an onyx published by Spon (fig. 172)¹ represents a youthful, beardless Zeus enthroned with sceptre, thunderbolt, and eagle, the legend on the back being *Iao Sabao(th)*².

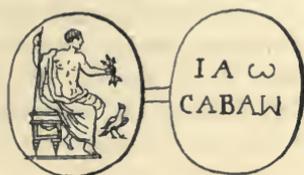

Fig. 172.

The Phœnician quarter-shekel—to judge from its weight, style, and fabric—was struck about 350 B.C., and therefore furnishes our earliest evidence of Jehovah conceived by the gentiles as Zeus. Unfortunately we do not know where the coin was issued. The eminent numismatist J. P. Six ascribed it, along with a series of somewhat similar pieces, to Gaza *Minóa* in southern Palestine³. If this attribution is sound—and it has been widely accepted⁴,—I would suggest that the helmeted head with a bay-wreath on the obverse is that of Minos the eponymous founder, who figures as a helmeted warrior holding the branch of a sacred bay-tree on later coins of the town (fig. 174)⁵. The grotesque face or mask on the

179 f. = F. G. Kenyon *op. cit.* i. 70 no. 46, 175 f.) and *δέσπορ* 'Ίάω φωσφόρε (Wessely *ib.* 46. 304 f. = Kenyon *ib.* i. 74 no. 46, 300 f.): see H. van Herwerden in *Mnemosyne* N.S. 1888 xvi. 323 f. Finally, in the Gnostic gospel *Pistis Sophia* 26, 34, 193, 322 we get *Ieīl* (who is distinguished from three several divine powers named *Iaō*: see Baudissin *op. cit.* i. 186) described as the 'ἐπισκοπος of Light,' cp. the prayers *ib.* 357 *ἀπέραντων* Light: *αεινωσ, ἰάω, αὐῶ, ῥῖα...Ιεου, Σαβαωθ, 375 ἀπέραντων* Light: *ἰάω ἰουω' ἰάω' αὐῶ' ῥῖα...ἰᾶ' ἰᾶ' ἰᾶ'.* The ultimate source of these conceptions is, doubtless, 'the glory of the LORD' familiar to us from the Old Testament (B. Stade *Biblische Theologie des Alten Testaments* Tübingen 1905 i. 94 f.).

¹ J. Spon *Miscellanea erudite antiquitatis* Lugduni 1685 p. 297 f. 'Amuleta' no. 14, Montfaucon *Antiquity Explained* trans. D. Humphreys London 1721 ii. 232 pl. 50, 34.

² Another gem given by Montfaucon *op. cit.* 1725 Suppl. i. 242 pl. 52, 4 = fig. 173 bears no inscription, but exhibits the same latter-day syncretism. It shows Zeus enthroned with a sceptre (?) in his hand amid a group of signs apparently representing the heavenly bodies—a winged globe, the moon, the evening star, the constellation Cancer, and other symbols of more doubtful meaning. For Babylonian and Greek ideas were freely blended in an omniscendulous age.

³ J. P. Six in the *Num. Chron.* New Series 1877 xvii. 229 f., cp. *ib.* 1878 xviii. 125 'dans le sud de la cinquième satrapie.'

⁵ Eckhel *Doctr. num. vet.*² iii. 449, 451, Rasche *Lex. Num.* Suppl. ii. 1196, Head *Hist. num.*² p. 805, inscr. **MEINΩ**. K. B. Stark *Gaza und die philistäische Küste* Jena 1852 p. 580 ff. regards the alleged connexion of Minos with Gaza as 'eine gelehrte Sagenbildung aus römischer Zeit'; but he is over-sceptical.

Fig. 173.

reverse is probably, as E. Babelon surmised, that of Bes¹; and the bust of Bes too is a known type on autonomous silver coins of Gaza². Further, there was at Gaza an image of Io the moon-goddess with a cow beside it³. And Iao, the supposed sun-god, was early represented as a golden calf⁴. Is it not permissible to think that the inhabitants of Gaza imported the cult of the Jewish deity as a pendant to that of their own Io? Certainly their Cretan ancestors had worshipped the sun and the moon as a bull and a cow respectively⁵. Nor need we be surprised at their

Fig. 174.

Fig. 175.

in Syria¹—better known as Antiocheia on the Orontes²—, and even settled in Gordyene beyond the Tigris³. If Triptolemos followed Io thus far afield, he may well have pursued her to Gaza⁴.

(i. 453 Foerster) states that Triptolemos founded at Ione a sanctuary of Zeus Νέμειος, whom the inhabitants after learning agriculture called Zeus Ἐπικάρπιος.

¹ Io. Malal. *chron.* 2 p. 28 ff. Dindorf, *Chron. Paschale* i. 74 ff. Dindorf, cp. Io. Antioch. *frag.* 6. 14 (*Frag. hist. Gr.* iv. 544 Müller), Kedren. *hist. comp.* 20 D ff. (i. 37 f. Bekker), Soud. *s.v.* Ἴώ, Exc. Salmasii in Cramer *anecd. Paris.* ii. 387, 22 ff. The narrative of Ioannes Malalas, our fullest source, is as follows:—In the days of Pikos Zeus a certain man named Inachos, of the tribe of Japheth, arose in the west. He was the first king over the land of Argos, where he founded a town and named it Iopolis; for he worshipped the moon, and *Íō* is a mystic name by which the Argives have known the moon from that day to this (*infra*, ch. i § 6 (g) viii). Inachos, then, built a temple to the moon with a bronze *stèle* inscribed Ἴώ μάκαιρα λαμπαδηφόρε. His wife Melia bore him two sons, Kasos and Belos, and a fair daughter called Io after the moon. Pikos Zeus, king of the west, sent and carried off Io, by whom he became the father of Libye. Io, in shame and anger, fled to Egypt and stayed there; but on learning that Hermes, son of Pikos Zeus, ruled over Egypt she was afraid and went on to Mt. Silpion in Syria, the site of the later town of Antiocheia. According to Theophilus, Io died in Syria; according to others, in Egypt. Inachos meantime sent her brothers and kinsfolk in search of her under the guidance of Triptolemos. The men from Iopolis in Argos heard that she had died in Syria. So they went and sojourned there awhile, knocking at the door of each house and saying Ψυχὴ Ἰοῦς σωζέσθω. But, when they had a vision of a heifer that spoke with human voice and said to them Ἐνταῦθά εἰμι ἐγὼ ἡ Ἴώ, they decided to stop where they were on Mt. Silpion, arguing that Io must be buried on that very mountain. They therefore founded a sanctuary for her there and a town for themselves, named Iopolis. They are in fact still called Ionitai by the Syrians of the district. And to this day the Syrians of Antiocheia, in memory of the search-party of Argives sent out to find Io, year by year at the self-same season knock on the doors of the Hellenes. The reason why these Argives took up their abode in Syria was because Inachos had bidden them either return with his daughter to Argos, or not return at all. So the Ionitai aforesaid founded a sanctuary of Kronos on Mt. Silpion. The sources other than Malalas give no important variants (*ἱερὸν Κρονίωτος* for *ἱερὸν Κρόνου Chron. Paschale*: *κρούοντες εἰς τὰς ἀλλήλων θύρας κατ' ἔτος ἔλεγον Ἴώ Ἴώ* Soud.).

In this, as in other Levantine stories of Io, we may suppose that the Argive heroine was but the Greek equivalent of a foreign deity. In Egypt she was identified with Isis, cow-goddess and moon-goddess (*infra* ch. i § 6 (g) viii); in Syria, with Astarte, whose art-type with bovine horns and lunar disk was determined by that of Isis (E. Meyer in Roscher *Lex. Myth.* i. 652). Cp. Philon Bybl. *frag.* 2. 24 (*Frag. hist. Gr.* iv. 569 Müller) Ἀστάρτη δὲ ἡ μεγίστη καὶ Ζεὺς Δημαροῦς καὶ Ἄδωδος βασιλεὺς θεῶν ἐβασίλευον τῆς χώρας Κρόνου γνῶμη. ἡ δὲ Ἀστάρτη ἐπέθηκε τῇ ἰδίᾳ κεφαλῇ βασιλεῖας παράσημον κεφαλῆν ταύρου· περιουτούσα δὲ τὴν οἰκουμένην κ.τ.λ. (*infra* ch. ii § 10 (b)). The *θυροκοπία* of the Antiochenes probably implies a ritual search for Astarte as a goddess of fertility annually lost and found (cp. Gruppe *Gr. Myth. Rel.* p. 970 n. 8, *infra* ch. iii § 1 (a) i). The Babylonian form of this incident was the well-known 'descent of Ishtar,' daughter of the moon-god Sin, into the nether world (M. Jastrow *The Religion of Babylonia and Assyria* Boston etc. 1898 p. 563 ff.). ² Strab. 750.

³ Strab. 747, 750, Steph. Byz. *s.v.* Γορδυναία (from Gordys, son of Triptolemos). Cp. the supposed image of Io with budding horns at Nineveh (Philostr. *v. Apoll.* i. 19 p. 19 Kayser).

Others told how Inachos sent out Kyrnos (not Triptolemos), who founded Kyrnos in Karia (Diod. 5. 60), and Lyrkos, son of Phoroneus, who settled at Kaunos in Karia (Parthen. *narr. am.* i. 1 ff. = *Frag. hist. Gr.* iv. 313 f. Müller).

⁴ That the influence of Triptolemos was felt at Gaza might be inferred from the fact

(γ) Kirke.

Another mythological personage that travelled in the sun's wheeled chariot was Kirke, the first mistress of magic. In the *Argonautica* of Valerius Flaccus she is carried off from Kolchis by a team of winged snakes¹, and Aphrodite, personating Kirke, is believed to have returned thither in the same equipage². O. Gruppe thinks that this trait was borrowed by the poet from the myth of Medeia³; and that is certainly a possibility to be reckoned with⁴. At the same time it must be remembered that Kirke was the daughter of Helios and as such might well claim to use the solar car. Apollonios of Rhodes had in fact described how Helios once took her in his own car from east to west, from Kolchis to Etruria⁵; and Apollonios, according to a Greek commentator, was but following the still earlier narrative of Hesiod⁶. So that, whether Valerius Flaccus was or was not the first to mention Kirke's team of snakes, Kirke riding in the solar chariot is a much older conception. Conformably with it the author of the Orphic *Argonautiká* invests her with a solar halo:

Straightway a maiden met them face to face,
The sister of Aietes great of soul,
Daughter of Helios—Kirke was the name
Asterope her mother and far-seen
Hyperion gave her. Swift to the ship she came,
And all men marvelled as they looked upon her;
For from her head floated the locks of hair
Like glittering sunbeams and her fair face shone,
Yea, gleamed as with a gust of flaming fire⁷.

In a Pompeian wall-painting Kirke's head is surrounded by a circular blue *nimbus*⁸. But a Roman lamp and a contorniate medal

that Dagon the chief god of the Philistines is described as Zeus *Arótrios* in Philon Bybl. *frag.* 2, 20 (*Frag. hist. ⁷ Orph. *Arg.* 1214—1221. In Ap. Rhod. 4. 725 ff. Kirke recognizes Medeia by her possession of a similar halo: πᾶσα γὰρ Ἡελίου γενεῆ ἀρίδηςλος ἰδέσθαι | ἦεν, ἐπεὶ βλεφάρων ἀποτηλόθι μαρμαρυγῆσιν | οἶόν τε χρυσέην ἀντώπιον ἴεσαν ἀγλήην.

⁸ Helbig *Wandgem. Camp.* p. 293 no. 1329, F. Mazois *Les ruines de Pompéi* Paris

show her wearing a rayed crown¹, the proper attribute of a solar power, whose island-home is placed by Homer precisely at the sunrise².

That Kirke was in some sense solar is further shown by the parallels to her myth which can be adduced from various quarters. Thus in the Celtic area we have many accounts of the Otherworld-visit. These fall into two well-defined groups. On the one hand, in such tales as *The Voyage of Bran*, *The Adventures of Connla*, *Oisín*, *The Sick-bed of Cuchulain*, and *Laegaire mac Crimthainn* the hero crosses the sea to an Elysian island, where he mates with a divine queen and so becomes its king. On the other hand, in such tales as *The Adventures of Cormac*, *The Adventures of Tadg*, and *The Bailé an Scáil* he is entertained, but not married, by the queen, and receives at her hands a magic cup, after which he returns home in safety. Intermediate between the two groups is *The Voyage of Mael-Duin*, where we get at once the marriage, the entertainment, and the safe return. I have discussed these tales elsewhere³ and here would merely point out that the goddess-queen inhabiting with her maidens the Otherworld island is regularly solar⁴. Indeed, in the story of *Laegaire mac Crimthainn* she bears the appropriate name *Deorgreine*, 'Tear of the Sun.' J. G. von Hahn compared the Kirke-myth with a modern Greek folk-tale from Wilza in Çagori, in which a princess living with her maidens in an island mates with a prince described as 'sprung from the sun' and subsequently tries to kill him through the machinations of an iron dervish⁵. But the closest parallel⁶ to the Homeric story is cited by

Miss J. E. Harrison¹ and K. Seeliger² from *The Thousand and One Nights*, viz. *The Tale of King Bedr Bâsim*³. I quote Miss Harrison's summary of it :

'King Bedr Bâsim, like Odysseus, is seeking to return to his kingdom. He is shipwrecked, and escapes on a plank to [a tongue of land jutting out into the deep, on which is a white city with high walls and towers]; he desires to go up to it. But as he tries to approach, "there came to him mules and asses and horses, numerous as the grains of sand, and they began to strike him and prevent him from going up from the sea to the land." Later on a sheykh, who plays the part of Hermes, tells him that this is the city of the Enchanters, wherein dwells Queen Lab, an enchantress, who is like to a she-devil. A curious, and, I think, significant fact is, that the [Old] Persian word "lab" means sun⁴. We remember that Circe was daughter of Helios. The conceptions of magic and sun-worship seem to have been closely interwoven, and this seems the more natural if the Greek myth were of Eastern origin. The sheykh tells Bedr Bâsim that the strange mules and horses and asses are the lovers of this wicked witch. With each of them she abides forty days, and after that enchants them into beast-shapes. Queen Lab sees Bedr Bâsim, and falls in love with him. He goes up to her castle, but after some suspicious experiences begins to fear that his appointed day is drawing nigh. [He has seen a white she-bird consorting with a black bird beneath a tree full of birds, and has learnt that this was Queen Lab with one of her many lovers.] His friend the sheykh gives him a magic "saweek." This "saweek," which he is to give to the queen in place of her own magic potion, is the meal of parched barley made into a sort of gruel—thick, but not too thick to drink—a curious parallel to the "mess of cheese and barley meal and yellow honey mixed with Pramnian wine." Queen Lab fares worse for her evil deeds than did Circe. Bedr Bâsim gives her the "saweek," and commands her to become a dappled mule. He then puts a bridle in her mouth and rides her forth from the city, and the sheykh thus addresses her :—"May God, whose name be exalted, abase thee by affliction."

The name *Kirke* denotes a 'Hawk' (*kirkos*)⁵. But this does not militate against our solar interpretation of the myth. For not only in Vedic mythology is Sūrya, the sun, sometimes conceived as a bird⁶, but Mithraic worshippers spoke of Helios as a hawk⁷. In

homer. Gedichte Darmstadt 1878 p. 22 ff.; on both, Gruppe *Gr. Myth. Rel.* p. 708 n. 2. Cp. also the tales noted by the Rev. J. A. MacCulloch *op. cit.* p. 385 f.

² K. Seeliger in Roscher *Lex. Myth.* ii. 1195 f.

³ Nights 751 ff. ed. Captain Sir R. F. Burton. The name *Badr Bâsim* means 'Full moon smiling.'

⁴ So Burton; but Profs. E. G. Browne, A. A. Bevan, and J. H. Moulton, to whom I have applied, all view the statement with the greatest suspicion. The last-named wittily declares that *lab* is 'moonshine'!

⁵ This rather obvious derivation has, I find, been anticipated by C. de Kay *Bird Gods* New York 1898 p. 164, of whose ornithological interpretations ('*Æetes*' = eagle, '*Oulixes*' = owl, etc.) the less said, the better.

⁶ A. A. Macdonell *Vedic Mythology* Strassburg 1897 pp. 31, 152, E. W. Hopkins *The Religions of India* Boston etc. 1895 pp. 45, 49, 113, 123 f., 140, 164.

⁷ Porph. *de abst.* 4. 16 τὸν δὲ "Ἥλιον σαῦρον, λέοντα, δράκοντα, ἰέρακα with the preceding context.

Egypt too the hawk was sacred to the sun¹, or to Horos, Râ, Osiris, Seker, and other solar deities²: it was here regarded as the only bird that could look with unflinching gaze at the sun³, being itself filled with sunlight⁴ and essentially akin to fire⁵. These beliefs certainly found an echo in Greek literature⁶; and they may serve to explain the frequent association of the hawk with Apollon⁷. To Homer the hawk was the 'swift messenger of Apollon⁸', who himself on occasion took its form⁹. Aristophanes implies that Apollon was sometimes represented with a hawk on his head or on his hand¹⁰. The mythographers told how Apollon had transformed Daidalion son of the Morning Star into a hawk¹¹. And later writers agreed that the hawk was the sacred bird of Apollon¹² or of Helios Apollon¹³. All this goes to make it probable that *Kirke* was originally a solar power conceived as a 'Hawk.' A relic of her ornithomorphic state may perhaps be traced in the curious Homeric description of her as a 'dread goddess endowed with human speech¹⁴.' Had she been purely anthropomorphic, the phrase would have been superfluous, not to say impertinent. Given that her name betokened her nature, the explanation is not only pardonable, but necessary. Again, it might fairly be urged that the Italian myth of Kirke's love for Picus¹⁵ becomes more intelligible if the

¹⁴ *Od.* 10. 136, 11. 8, 12. 150 δεινὴ θεὸς αὐδήεσσα. The same expression is used of Kalypso (*Od.* 12. 449), who in various respects is the doublet of Kirke (O. Immisch in Roscher *Lex. Myth.* ii. 940 ff.) and may well have borrowed an epithet belonging to her. Similarly of the horse Xanthos, gifted with human speech, we read: *Il.* 19. 407 αὐδήεντα δ' ἔθηκε θεὰ λευκώλενος Ἴρη. Conversely Leukothea, ἡ πρὶν μὲν ἔην βροτὸς αὐδήεσσα (*Od.* 5. 334), dives into the sea αὐθιγὴ εἰκυῖα (*ib.* 353, cp. 337).

¹⁵ K. Seeliger in Roscher *Lex. Myth.* ii. 1202, 22 ff. collects the evidence. Πικόλοος, the giant who fled to Kirke's isle and was there slain by Helios—the plant μῶλν springing from his blood—(Alexandros of Paphos *ap.* Eustath. *in Od.* p. 1658, 49 ff.), is possibly related to the Lithuanian deity *Pikūlas* or *Pikullos* (H. Usener *Götternamen* Bonn 1896 p. 98).

former was, like the latter, a humanised bird. And the parallel of the 'Speaking Bird,' which in a Sicilian folk-tale turned men into statues¹, is at least worth noting.

The exact species of the *kirkos* cannot be determined from the casual notices of it found in ancient authors². But the same word is used by the modern Greeks³ of the gyr-falcon (*falco gyrfalco* Linnæus), a bird so called from its wheeling flight. Now there was another word *kirkos* in ancient Greek, which was akin to the Latin *circus*, *circulus*, and meant 'circle'⁴. It is, therefore, tempting to suppose with A. Kuhn⁵ that the bird *kirkos* derived its name from the circularity of its motion. Circular motion would make it all the more appropriate as a symbol of the sun. Still, in view of the enormous number of purely onomatopoeic bird-names, it is safer to assume⁶ that *kirkos* the 'hawk' was so called on account of the shrill cry *kirk! kirk!* with which it wheels its flight⁷. If so, any connexion with *kirkos* a 'circle' must be due to popular misconception⁸.

J. F. Cerquand long since surmised that Kirke's name was related to *circus*, a 'circle'; but he regarded Kirke as a moon-goddess and Odysseus as a sun-god⁹. Obviously, however, the connexion with *circus* would suit a sun-goddess as well as, if not

¹ Append. F.

² D'Arcy W. Thompson *A Glossary of Greek Birds* Oxford 1895 p. 83 f. *Ail. de nat. an.* 4, 5, 4, 58 distinguishes the *κίρκη* from the *κίρκος*, as does Eustath. in *Il.* p. 1262, 50 ff., *id. in Od.* p. 1613, 65 f. But one author is late, the other later.

⁶ So Boisacq *op. cit.* p. 458, cp. p. 440 f. s.v. *κέρκαξ*. See also Eustath. in *Il.* pp. 1126, 46 ff., 1262, 59 ff., in *Od.* p. 1734, 21 ff.

⁷ L. Hopf *op. cit.* p. 93.

⁸ Since this paragraph was written A. Fick has discussed the word *κίρκος* in the *Zeitschrift für vergleichende Sprachforschung* 1911 xlv. 345 ff. He rejects the rendering 'der Kreisende' and inclines to the onomatopoeic explanation 'der Kreischer.' He adds, however, a third possibility, that the bird was so called from its 'crooked' claws, cp. Aristoph. *nub.* 337 *γαμψοῦς οἰωνοῦς* for *γαμψώνυχας*, Paul. ex Fest. p. 88 Müller *falcones...* a similitudine *falcis*, Hesych. *ἄρπη* εἶδος ὀρνέου. καὶ δρέπανον... ἢ ἰκτῖνον Κρήτες. After this he gives free rein to his fancies. *Κίρκη* *Alatῆ* is the goddess of the circular or rather semicircular path described by Eos and Helios in the course of the year. She is inconstant, because the point at which Eos rises is always shifting. As mistress of the zodiac she is surrounded by the lion (summer), the swine (winter: *ῦς* suggests *ῦει*), the wolf (*λύκος* plays on *λύκη*, *λυκάβας*). Her four maidens are the four Seasons. Etc. etc.

⁹ J. F. Cerquand *Études de Mythologie grecque. Ulysse et Circé. Les Sirènes.* Paris 1873 pp. 28 ff., 67 ff. So too R. Brown *The Myth of Kirke* (reviewed by H. Bradley in *The Academy* 1884 xxv. 40 f.). W. H. Roscher *Über Selene und Verwandtes* Leipzig 1890 pp. 15, 99, 144 likewise derives *Κίρκη* from *κίρκος* = the moon's disk.

better than, a moon-goddess¹. Moreover, it is easy to imagine more ways than one in which a circle might be fittingly attributed to a solar Kirke. She was a 'Hawk,' and the hawk may have been fastened *tynx*-like to a solar wheel². She was a magician, and magicians have always dealt in magic circles³. But above all she was a goddess comparable with the island-queen of Celtic myths⁴, and Celtic myths—especially in their Welsh form—spoke of the island-palace as the 'Revolving Castle'⁵. In that castle was a mystic vessel, the pagan original of the Holy Grail. And it is to be noticed that the heroes best qualified to seek the Grail on the one hand are the chief representatives of the 'Table Round,' and on the other stand in intimate relation to the hawk⁶. Thus Arthur's favourite knight was *Gwalchmei*, the 'Hawk of May,' whose brother, even stronger than himself, was *Gwalchaved*, the 'Hawk of Summer.' The latter is better known to us as Galahad; the former, as Gawain—a name which Sir John Rhŷs derives from *Gwalch-gwyn*, the 'White Hawk,' or *Gwalch-hevin*, the 'Summer Hawk'⁷. Now in the myth of Kirke it is easy to recognize the mystic vessel and the human Hawk. But can we also detect any trait to correspond with the 'Revolving Castle' or the 'Table Round'? In short, has the notion of circularity left any mark upon it? Not, I think, on Greek soil, real or imaginary. But it is to Italy rather than to Greece that we should look for correspondence with Celtic myth; and the Italian Kirke seems to have dwelt on a circular island. In the territory of the *Volsci*—whose name may be akin to that of the *Welsh*⁸

¹ Io. Antioch. *frag.* 24. 10 (*Frag. hist. Gr.* iv. 551 Müller) Καλυψὼ καὶ Κίρκη Ἥλιου καὶ Σελήνης ἦσαν ἰέρειαι is indecisive.

Squire *The Mythology of the British Islands* London 1905 pp. 319 n. 3, 366 ff., J. L. Weston *The Legend of Sir Perceval* London 1909 ii. 266 n. 1.

⁵ *Peredur Paladr-hir*, the 'Spearman of the Long Shaft' (Sir Percivale), is not so related to the hawk. But then Miss J. L. Weston *The Legend of Sir Perceval* London 1906 i. 171 f., 1909 ii. 301, 305 ff. proves that Perceval was not the original hero of the Grail.

⁶ J. Rhŷs *op. cit.* pp. 13 f., 166 ff., C. Squire *op. cit.* p. 369.

⁷ F. Kluge *Etymologisches Wörterbuch der deutschen Sprache*⁶ Strassburg 1899 p. 420 compares *welsch* with the Celtic tribal name *Volcae*. So do W. W. Skeat *A concise Etymological Dictionary of the English Language* new ed. Oxford 1901 p. 599 s.v.

and consequently denote a 'Hawk' tribe¹—was the coast town of *Cercci*, later called *Circei* (the modern *Circelli*), at the foot of the *Cerceius* or *Circeius mons* (*Monte Circello*). This calcareous and cavernous mountain was originally an island; and here the myth of *Kirke*, the 'Hawk,' was localised², where her image was said to catch the first rays of the rising sun³. Nonnos makes her as the mother of the Italian Faunus inhabit—

Deep-shaded circles of a rocky home⁴.

He is presumably referring to *Monte Circello* and, if I mistake not, intentionally hinting at its circularity.

On the whole I am disposed to conclude that *Kirke* began life as a solar hawk, that originally and in Greece she had nothing to do with Revolving Castles or Tables Round, but that later and in Italy⁵, under the influence of folk-etymology, she may have been brought into connexion with Celtic ideas of the solar circle.

(δ) Medeia.

We come now to *Medeia*, the niece or, according to some, the sister of *Kirke*⁶. As grand-daughter of *Helios* she too could summon the solar chariot at need. *Diodoros*⁷ relates that *Medeia*, when she fled from *Kolchis* with the *Argonauts*, put in to *Iolkos* and there plotted the death of king *Pelias*. She made a hollow image of *Artemis*, stuffed it with all sorts of charms, and passed herself off as a priestess of the goddess. She declared that *Artemis* had come from the country of the *Hyperboreoi*, travelling through the air in a car drawn by serpents and seeking the world over for the most pious of kings, in order that she might establish her cult with him and bless him with renewed youth. As proof of her

⁸ *Diod.* 4. 51 f.

words, Medeia changed her own looks from those of an old woman to those of a maid, and further by means of her enchantments caused the alleged serpents to appear in visible form. The king, convinced of her powers, bade his daughters do whatever she commanded. Medeia came by night to the palace and ordered them to boil the body of their sleeping father in a caldron. When they demurred, she took an old ram, bred in the house, cut it limb from limb, boiled its body, and by her magic art produced out of the caldron the figure of a lamb. The maidens, thus persuaded, slew their father, whom Medeia cut up and boiled. She then sent them up to the palace-roof with torches, saying that she must offer a prayer to Selene. The torches served as a fire-signal to the Argonauts, who were lying in wait outside the city. They at once attacked it, overcame all resistance, and secured the palace. In this romantic narrative Diodoros is following the *Argonautai* or *Argonautika* of Dionysios Skytobrachion, an Alexandrine grammarian of the second century B.C.¹ The snaky chariot is here that of Artemis the moon-goddess, as on a copper coin of Aureliopolis in Lydia, struck under Commodus, which shows Artemis with a crescent moon on her head in a chariot drawn by two serpents². But Artemis, thinly disguised as Hekate³, is in this story made the mother of Medeia and daughter of Helios. The serpent-chariot, therefore, may have been either solar or lunar in its origin.

Ovid, after recounting the murder of Pelias, adds that Medeia would have had to pay the penalty of her crime, had she not forthwith mounted into the air on her winged snakes⁴ and made her way by a devious track to Corinth. His version of her escape seems modelled on the common account of her disappearance from Corinth, not without some admixture of Triptolemos' tour.

As to what happened at Corinth, various tales were told⁵. According to our oldest authority, Eumelos⁶, whose *Korinthiaka* was composed about 740 B.C., Helios had by Antiope two sons, Aloeus and Aietes: Helios gave Arkadia to the former, Corinth to

the latter. But Aietes, dissatisfied with his portion, went off to Kolchis, leaving Bounos¹, a son of Hermes by Alkidameia, as regent on behalf of himself and his descendants. On the death of Bounos, Epopeus, son of Aloeus, succeeded to the throne. Marathon, son of Epopeus, fled to Attike to escape the lawless violence of his father, and, when Epopeus died, divided the kingdom between his own two sons, Sikyon and Korinthos. Korinthos leaving no issue,

Fig. 178.

the Corinthians sent to Iolkos for Medeia, daughter of Aietes, to come and reign over them. Iason was king in virtue of his wife's descent. The children born to them Medeia hid in the sanctuary of Hera, thinking to make them immortal. In this she failed. Iason detected her action and would not forgive it, but sailed away to Iolkos. So Medeia too took her departure and left the kingdom to Sisyphos.

¹ The eponymous founder of the sanctuary of Hera *Bouvala* (Paus. 2. 4. 7), 'of the Hill' (*Bouvbís*), = Hera *'Akapala* (Pauly—Wissowa *Real-Enc.* i. 1193).

This genealogy throws some light on early Corinthian religion; for it enables us to see that the kings of Corinth were regarded as near akin to Zeus, or perhaps even as successive incarnations of him. Korinthos, the eponym of the town,—who must be carefully distinguished from Korinthos, the personification of the town¹,—is represented on a bronze mirror, found at Corinth and now in the Louvre, as a majestic Zeus-like man seated on a throne and holding a sceptre. A *himátion* is wrapped about him, and Leukas the Corinthian colony is in the act of placing a wreath upon his head (fig. 178)². This Korinthos, according to Eumelos, was the son of Marathon. But Pausanias, who cites the Eumelian pedigree, begins by the following naïve admission: ‘That Korinthos was the son of Zeus has never yet, to my knowledge, been seriously asserted by anybody *except by most of the Corinthians themselves*’³. The claim of the Corinthians was indeed so well known to the Greeks in general that it passed into the proverb ‘Korinthos son of Zeus’ used in cases of wearisome iteration⁴. If then the Corinthian populace regarded Korinthos, son of Marathon, as the son of Zeus, it is not unlikely that Marathon was held to be an embodiment of Zeus. Indeed, a scholiast on Aristophanes—if the text of his *scholion* is sound—declares: ‘This “Korinthos son of Zeus” was the son of Zeus a king of Corinth’⁵. Again, Marathon in his turn was the son of Epopeus; and an epic poet, probably of the seventh century B.C., informs us that Epopeus had the same wife as Zeus⁶. It would seem then that, when Medeia came to Corinth, the kings of the town had for three successive generations (Epopeus, Marathon, Korinthos) stood in a relation of peculiar intimacy to Zeus. What

¹ The former is masculine (Roscher *Lex. Myth.* ii. 1381 f.), the latter feminine (Athen. 201 D).

On the attempts made by the later grammarians to explain this proverb see Appendix C.

⁵ Schol. Aristoph. *ran.* 439 ὁ δὲ Διὸς Κόρινθος παῖς Διὸς βασιλέως Κορίνθου. Unfortunately the text is not free from suspicion. Cod. V omits the word βασιλέως; and F. H. M. Blaydes *ad loc.* would read βασιλεύς. Blaydes' emendation may be right, for another *scholion* on the same passage has ὁ δὲ Διὸς Κόρινθος παῖς Διὸς βασιλεύς Κορίνθου.

⁶ *Infra* ch. i. § 7 (d).

now of Medeia herself? 'Zeus,' says the old scholiast on Pindar, 'was enamoured of her there; but Medeia would not hearken to him, as she would fain avoid the wrath of Hera¹.' Curiously enough the love of Zeus for Medeia was balanced by the love of Hera for Iason². Analogous cases³, to be considered later, suggest that this reciprocity implies the Zeus-hood, so to speak, of Iason⁴ and the Hera-hood of Medeia.

Thus the myth of Medeia as told by Eumelos serves to connect the earliest dynasty of Corinth with Zeus; but it does not help us to decide whether the serpent-chariot was of solar or lunar origin. On this point Euripides is the first to satisfy our curiosity. His Medeia, when about to be banished from Corinth by king Kreon, makes her escape to Athens in the car of Helios—a device somewhat unfairly criticised by Aristotle⁵. Ere she goes, she flings the following defiance at her husband:

Cease this essay. If thou wouldst aught of me,
Say what thou wilt: thine hand shall touch me never.
Such chariot hath my father's sire, the Sun,
Given me, a defence from foeman's hand⁶.

Euripides does not, indeed, definitely state that the Sun's chariot was drawn by serpents. But later writers are unanimous. Medeia, say they, received from the Sun a chariot of winged snakes and on this fled through the air from Corinth to Athens⁷. That her

peculiar conveyance was long felt to be of a specially fiery sort, may be gathered from a high-faluting description of it by Dracontius, who wrote at the close of the fifth century A.D.:

Then came the snakes
Raising their combs aloft and viperous throats
Scaly; and lo, their crested crowns shot flame.
The chariot was a torch, sulphur the yoke,
The pole bitumen; cypress was the wheel;
Yea, poison made that bridle-bit compact,
And lead that axle, stolen from five tombs¹.

In art, as in literature, Medeia escapes from Corinth on a serpent-chariot. Roman *sarcophagi*, which date from the second century of our era, represent her mounting a car drawn from left to right by two winged snakes of monstrous size². In her right hand she grasps a short sword. Over her left shoulder hangs the body of one of her children. The leg or legs of the other child are seen projecting from the car. Of this type there are two varieties. In the first, of which but a single specimen is known, Medeia has a comparatively quiet attitude³. In the second, of which there are seven examples, she adopts a more tragic and pathetic pose, raising her sword aloft and turning her head as if to mark Iason's futile pursuit (fig. 179)⁴. There can be little doubt that this sarcophagus-type was based on the tradition of earlier paintings. In fact, almost identical with it is the scene as shown on an *amphora* from Canosa now at

Fig. 179.

¹ Dracont. *carm. prof.* 10. 556 ff. (*Poet. Lat. Min.* v. 212 Baehrens).

² The *sarcophagi* are collected, figured, and discussed by Robert Sark.-Relfs ii. 205 ff. pls. 62—65. See also K. Seeliger in Roscher *Lex. Myth.* ii. 2508—2511.

³ Robert *op. cit.* ii. 205 pl. 62 no. 193, a fragment formerly at Florence in the Palazzo Martelli. Robert notes that the purse in Medeia's right hand is due to a mistake of the draughtsman or of the restorer—it should be a sword—, and that the scalloped side of the chariot probably implies a misunderstanding of the second dead child's leg. The attempt to distinguish the male snake (bearded and crested) from the female is likewise a suspicious trait.

⁴ *Id. ib.* ii. 213 f. pl. 64 no. 200, formerly at Rome in possession of an engineer named Cantoni; now in the Berlin Museum. This sarcophagus was found in 1887 near the Porta S. Lorenzo. See further the monograph by L. von Urlichs *Ein Medea-Sarkophag* Würzburg 1888 pp. 1—22 pl.

Naples (fig. 180)¹. Medeia on a car drawn by two snakes, which are not winged, holds the reins in her left hand and one end of a fluttering sail-like *himátion* in her right. She turns her face towards Jason, who pursues her hotly on horseback. He is accompanied by a couple of followers, probably the Dioskouroi, for one of them wears a *pilos* and above them we see two stars. Of the children, one lies dead upon the ground, fallen on his face beside the fatal sword; the other, dead also, is with Medeia in the car; the back of his head and one arm being visible beside her. In front of and facing Medeia stands Erinyes, a *nimbus* round her head; she holds a sword in one hand, a torch in the other. Lastly, on the extreme right Selene rides her horse: she too has her head circled with a *nimbus*, which is painted red-brown and yellow. She is present possibly as a goddess of magic, who might naturally be associated with Medeia², but more probably to furnish a variation on the hackneyed sun-and-moon theme, Selene on the lunar horse forming

Fig. 180.

a pendant to Medeia on the solar car. There is every reason to think with L. von Urlichs³ and C. Robert⁴ that the above-mentioned *sarcophagi*—and this *amphora* cannot be separated from them—present us with a scene ultimately derived from Euripides' play. Mr J. H. Huddilston⁵ says with justice: 'I know of no monuments of ancient art that grasp the spirit of a Greek tragedy more effectually than the Medeia sarcophagi. The strange and secret power of the sorceress hovers over and pervades the whole. The dreadful vengeance exacted by the slighted queen is shown in the most graphic manner. Standing before the Berlin replica, which is the best preserved and most beautiful of all the sculptures, one cannot

but feel that he is face to face with a marvellous illustration of the great tragedy. The marble all but breathes; the dragons of Medeia's chariot may be heard to hiss.'

Euripides was not the last to compose a drama about Medeia; and it is in all probability a post-Euripidean play that is illustrated by another Apulian vase, the famous *Medeia-kratér* of Munich¹. This magnificent example of later ceramic art has for its principal theme a representation of the vengeance taken by Medeia on Iason, who in her despite contracted wedlock with king Kreon's daughter (pl. xxii)². In the centre of the scene rises the royal palace containing a throne surmounted by two eagles and a pair of circular shields slung from the roof. The king's daughter Kreonteia³ (*Kreonteia*) has just received from Medeia the fatal gift of a poisoned crown⁴. The casket in which it came stands open on the ground before her. But the poison is potent and is already doing its deadly work. The princess falls in her agony across the throne. Her father ([*Krélon*), dazed with grief, drops his eagle-tipped sceptre, and with one hand clutches at his grey locks, while he supports her prostrate form with the other. From right and left two figures hasten to the rescue. Kreon's son (*Hippotes*)⁵ is first to arrive and vainly attempts to pluck the crown from his sister's head. The queen too (*Merópe*)⁶ hurriedly approaches with gestures of grief and alarm. Behind her are an old *paidagogós* and a young handmaid; the former cautiously advancing, the latter disposed to pull him back. Behind Hippotes is an elderly veiled woman, evidently the princess's nurse, who hastens to escape from the horrible sight.

¹ C. Robert *Bild und Lied* Berlin 1881 p. 37 ff. and J. H. Huddilston *op. cit.* p. 145 ff. hold that this vase was intended to illustrate the *Medeia* of Euripides, and that the points in which its design differs from the subject as conceived by Euripides are to be regarded as natural and legitimate additions or subtractions on the part of the painter. A. Furtwängler in his *Gr. Vasenmalerei* ii. 164 ff. refutes their view and concludes that the vase echoes the work of some unknown poet.

² Jahn *Vasensamml. München* p. 260 ff. no. 810, Furtwängler—Reichhold *op. cit.* ii. 161—166 pl. 90 (which supersedes all previous reproductions). The vase was found in a tomb near Canosa, Sept. 16, 1813.

³ *Kρεοντεία* is her name, not an abbreviation of *Κρεοντεία* (*παίς*), nor of *Κρεόντεία* (*ἀνάκτορα*), nor yet the title of a drama comparable with *Οἰδιπέδεια*, *Ὀρέστεια*, etc. Other sources name her *Γλαύκη* (Roscher *Lex. Myth.* i. 1676 no. 4) or *Κρέονσα* (*ib.* ii. 1426 f. no. 3). In Euripides she is nameless.

⁴ *Hyg. fab.* 25 coronam ex venenis fecit auream eamque muneri filios suos iussit novercae dare.

⁵ The name Hippotes is attested by Diod. 4. 55, schol. Eur. *Med.* 20, *Hyg. fab.* 27, though none of these authors describes him as playing the part here assigned to him.

⁶ The painter of this vase is our sole authority for Merope as the mother of Iason's bride, though elsewhere she is mentioned as the wife of Sisypheos or as the wife of Polybós (Roscher *Lex Myth.* ii. 2838 f.).

Meantime still greater horrors are in progress before the palace. Medeia (*Médeia*), wearing a Phrygian cap and an embroidered oriental costume, has grasped by the hair one of her two boys and is about to run him through with a sword, in spite of the fact that the little fellow has taken refuge on a square altar¹. He is making desperate efforts to reach his father (*Iáson*), who with spear and sword, followed by an armed retainer, is hurrying towards him—but just too late to prevent the murder. Another retainer behind Medeia's back safeguards the second boy, who otherwise would share his brother's fate². Between Iason and Medeia is the chariot drawn by two monstrous snakes, which will carry her beyond reach of his vengeance. In it stands her charioteer, a sinister-looking youth with snakes in his hair and torches in his hands. His name *Oíistros* shows that the artist, doubtless copying the dramatist³, conceived him as a personification of Medeia's frenzy, past, present, and future⁴. Standing on a rocky eminence at the extreme right and pointing with a significant gesture to the over-turned bridal bath⁵ and the whole tragic scene before him is a kingly figure draped in a costume resembling that of Medeia. The inscription *éidolon Aétou*, the 'ghost of Aetes,' suggests that in the play Medeia's father, who during his lifetime had done his best to thwart her marriage, appeared after his death to point the moral. If so, he probably spoke from the *theologeíon*, a raised platform here indicated by the rock. Finally, in the background by way of contrast with all the human action and passion we get the tranquil forms of the gods—Herakles and Athena on one side, the Dioskouroi on the other. Their domain is bounded by a pair of Corinthian columns supporting votive tripods, perhaps a hint that the whole painting was inspired by a successful play.

¹ J. H. Huddilston *op. cit.* p. 149 inclines to think that Medeia has lifted the boy on to the altar in order to slay him there. That is certainly a possible interpretation.

² Cp. Diod. 4. 54 *πλήν γὰρ ἐνὸς τοῦ διαφυγόντος τοῖς ἄλλοις υἱοῖς ἀποσφάζει*.

³ Poll. 4. 142 includes *Oíistros* among a list of *ἐσκενα πρόσωπα* (along with *Δίκη*, *Θάνατος*, *Ἐρινός*, *Λύσσα*, *Ἔβρις* etc.). See also E. Bethe *Prolegomena zur Geschichte des Theaters im Alterthum* Leipzig 1896 p. 147 ff.

⁴ This figure is usually taken to represent the mad rage that drove Medeia to commit the desperate deed. Furtwängler *op. cit.* ii 165 f. prefers to regard it as the embodiment of Medeia's remorse, at least of the torments that await her as a murderess of her own child. He holds that, whereas Euripides had allowed his Medeia to escape, exulting and unpunished, the later dramatist thus hinted at repentance to come. Furtwängler may well be right; but it must be remembered that, from a Greek point of view, the infatuation that instigates to the deed and the punishment that avenges it are one and the same. See e.g. K. Wernicke in Pauly-Wissowa *Real-Enc.* ii. 1898 s.v. *Ate*, 'Personification der Unheil bringenden Verblendung, ebenso aber auch eines durch diese herbeigeführten Frevels und des ihm als Strafe folgenden Unheils.'

⁵ Furtwängler *op. cit.* ii. 163 n. 1.

Krater from Canosa : the vengeance of Medea.

(ε) Iynx.

When the Argonauts first came to Kolchis, Aphrodite helped Iason to win Medeia by means of an *iynx* or 'wry-neck' fastened to a magic wheel. Pindar describes the incident in a noteworthy passage:

Kyprogeneia, queen of the quick shaft,
 Down from Olympos brought
 The wriggling wry-neck bound beyond escape—
 The mad bird—to a wheel of four-spoked shape,
 And then first gave it unto men and taught
 The proper craft
 To the son of Aison, that he might be wise
 With all the wisdom of her sorceries
 And thereby steal Medeia's shame
 Of her own parents,—yea, the very name
 Of Hellas her desire
 With Peitho's whip should spin her heart on fire¹.

We are nowhere told that this *iynx*-wheel stood for the sun. But that it did, is—I think—a possible, even a probable, inference from the following facts. To begin with, the heroes had after a long series of adventures reached their goal—Aia, the land of the sunrise², ruled by Aietes the offspring of Helios,—and more than one event that befell them in this locality is susceptible of a solar interpretation. Again, Aphrodite is stated to have brought the *iynx*-wheel 'from Olympos,' an obvious source for celestial magic³. In his description of the bird on the wheel Pindar uses a peculiar, indeed barely logical, phrase, to which only one precise parallel

¹ Pind. *Pyth.* 4. 213 ff. It should be noticed that there is a certain parallelism between the beginning and the end of this extract. As Iason spins the magic *iynx*-wheel, so Peitho with her whip spins the heart of Medeia (ποθεινὰ δ' Ἑλλάς αὐτῶν | ἐν φρασὶ καιομέναν | δονέοι μαστιγι Πειθοῦς). One form of magic wheel is said to have resembled a whip-top (schol. Ap. Rhod. 1. 1139 ῥόμβος δὲ ἐστὶ τροχίσκος ὃν στρέφουσι λιμᾶσι τύπτοντες, καὶ οὕτω κτύπον ἀποτελοῦσιν, *id. ib.* 4. 144 citing Eupolis *Baptae frag.* 15 Meineke ὦ ῥόμβοισι μαστίξας ἐμέ, Eustath. *in Od.* p. 1387, 42 ff. τροχίσκον δηλοῖ τὸν καὶ ῥόμβον καλούμενον, ὃν τύπτοντες λιμᾶσι καὶ στρέφοντες ἐποιοῦν δινεῖσθαι καὶ ψόβον ἀποτελεῖν, *et. mag.* p. 706, 29 ff. ἐστὶ δὲ τροχίσκος, ὃν τύπτοντες λιμᾶσι καὶ στρέφοντες ποιοῦσι περιδονεῖσθαι καὶ ψόβον ἀποτελεῖν): see P. C. Lévesque in *Histoire et mémoires de l'institut royal de France, classe d'hist. et de litt. anc.* Paris 1818 iii. 5 ff., who argues that the ῥόμβος 'avait le plus souvent la forme du jouet nommé parmi nous *sabot* ou *toupié*,' and O. Jahn in the *Berichte sächs. Gesellsch. d. Wiss. Phil.-hist. Classe* 1854 p. 257. A vase representing such a top is figured by G. Fougères in Daremberg—Saglio *Dict. Ant.* ii. 1154 fig. 3087.

² See J. Escher-Bürkli in Pauly—Wissowa *Real-Enc.* i. 919 f., 942 f.

³ Prof. J. B. Bury in the *Journ. Hell. Stud.* 1886 vii. 157 ff. argues that the *Iynx* was originally a moon-charm or invocation of the moon-goddess 'Iō. But it is very doubtful whether Iō was *ab initio* a moon-goddess (*infra* ch. i § 6 (g) viii), and quite impossible to connect her name with *Iynx* (ἰύξω). See also the criticisms of D'Arcy W. Thompson *A Glossary of Greek Birds* Oxford 1895 p. 73.

could be quoted; and that occurs in the same poet's previous description of Ixion¹. But Ixion's four-spoked wheel, as I have already pointed out², probably represented the sun. It may, therefore, fairly be surmised that the four-spoked *inyx*-wheel also was a mimic sun. We have in fact definite evidence that on the shores of the Euxine Sea the sun was conceived as a four-spoked wheel. Coins of Mesembria in Thrace *c.* 450–350 B.C. have the name of the town (ΜΕΤΑ or ΜΕΣΣΑ) inscribed between the four spokes of a wheel, which is surrounded by rays diverging from its rim (fig. 181)³. This, as Dr B. V. Head observes, is the radiate wheel of the midday

Fig. 181.

Fig. 182.

Fig. 183.

Fig. 184.

Fig. 185.

(*mesembria*) sun⁴. Again, coins of Kalchedon in Bithynia *c.* 480–400 B.C. show a four-spoked radiate wheel (fig. 182)⁵, which on other specimens *c.* 400 loses its rays (fig. 183)⁶: this example is

¹ Cp. Pind. *Pyth.* 4. 214 ποικίλαν ἰνυγα τετράκναμον (462 B.C.) with *Pyth.* 2. 40 τὸν δὲ τετράκναμον ἔπραξε δεσμὸν (475? B.C.). B. L. Gildersleeve's remark—'It was poetic justice to bind Ixion to his own inyx wheel'—is ingenious, but misleading.

likewise a jagged or more probably a pearly edge. This little object was strung on a double cord passing through its centre and was set spinning with a jerk¹; made of glittering bronze² and rotating rapidly on its axis, it would provide the magician with a very passable imitation of the sun (fig. 187).

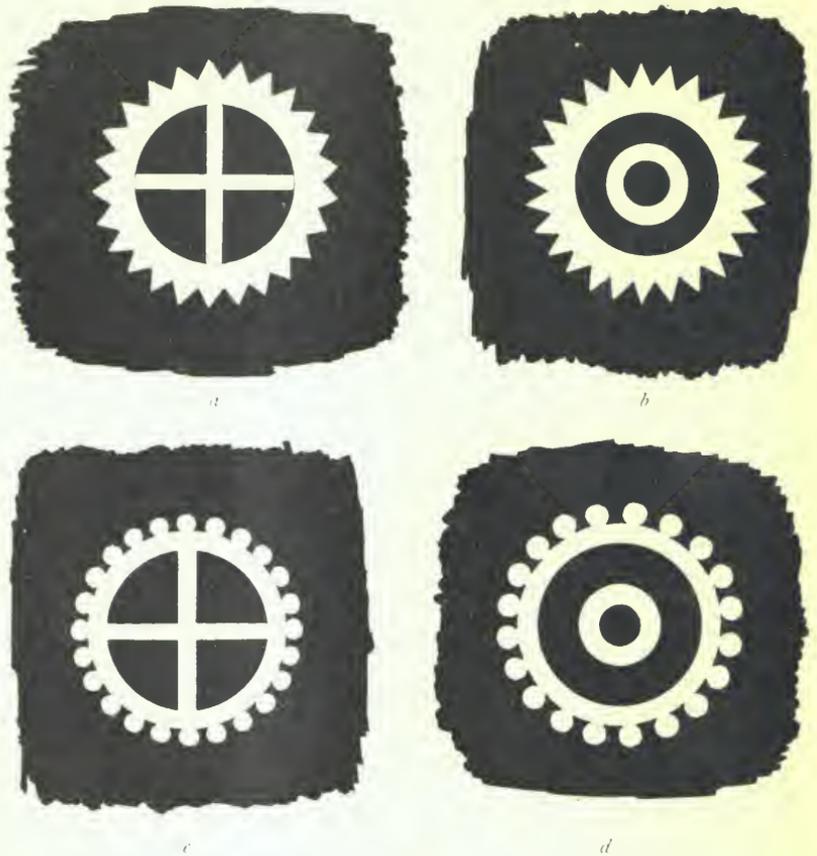

Fig. 187.

On this showing the magic wheel of the Greeks was the western analogue of the eastern 'praying-wheel,' whose essential relation to sun-worship has been satisfactorily established by W. Simpson³.

³ W. Simpson *The Buddhist Praying-Wheel* London 1896 *passim*.

It remains to ask why a wry-neck was attached to the solar wheel. And here we are naturally reduced to mere conjecture. Two main reasons suggest themselves. On the one hand, the bird can and does twist its head round in a most surprising fashion: hence its names *wry-neck* or *writhe-neck* in our own country, *Drehhals* or *Wendehals* in Germany, *torcol*, *tourlicou*, *tourne tête*, etc., in France, *torcicollo* in Italy, *capu tortu* in Sicily¹. This odd faculty of rotary movement may well have been thought to quicken, or intensify the rotation of the (solar wheel). On the other hand, the wry-neck breeds in the hole of a tree and, if disturbed, utters a peculiar hissing noise calculated to make the observer believe that its hole is tenanted by a snake²: this reason, added to the mobility of its neck and tongue, has earned for it the sobriquet of *snake-bird* in Sussex, Hampshire, and Somerset, *Natterwendel* in Switzerland, *Nattervogel* in Germany, *cô de couleuvre* in the department of Meuse³. Now the solar wheel, as we have had occasion to note more than once⁴, tends to be represented with the wings of a bird and a couple of snakes. The wry-neck, combining as it did the qualities of both bird and snake, was a most desirable appendage.

Alexandrine wits were busied over the task of providing the wry-neck with a suitable myth. According to Zenodotos, Iynx was called by some Mintha, being a Naiad nymph whose mother was Peitho⁵. Kallimachos in his work *On Birds* made Iynx a daughter of Echo, who by her spells attracted Zeus to Io and suffered the feathery change at the hands of Hera⁶. Nikandros told how Pieros, king of Pieria, had nine daughters, who vied with the nine Muses in dance and song. A contest was arranged on

Bernhardtj *op. cit.*, cp. Tzetz. *in Lyk. Al.* 310).

Mount Helikon. The mortals, vanquished by the immortals, were transformed into birds; and the *tynx* was one of these¹.

But the earlier unsophisticated view saw in the wry-neck merely a bird appropriate to the solar wheel, and useful therefore as a fertility-charm. This explains its connexion with Dionysos, who bore the titles *Iyngtes* and *Iýngyi*². Finally, the fertility-charm, as so often happens, dwindled into a love-charm, and the *tynx* or *tynx*-wheel was associated with the deities of soft emotion—Aphrodite and Eros, Himeros and Peitho³.

If the *tynx*-wheel was indeed a representation of the sun, we might reasonably expect to find it in the *entourage* of Apollon. For this god, though not himself primarily or originally solar, can be shown to have absorbed into his cult certain features of early sun-magic⁴. In point of fact there is some ground for thinking that the *tynx* was admitted into the Apolline cult at Delphoi. That past master in magic Apollonios of Tyana, when wishing to prove that the Delphic god did not disdain wealth and luxury, remarked that at Pytho Apollon had required temple after temple, each greater than its predecessor, and added that 'from one of them he is said to have hung golden *tynges* which echoed the persuasive notes of siren voices⁵.' This obscure passage has been brought into connexion with another equally obscure. Pausanias, *à propos* of the third or bronze temple at Delphoi, states: 'I do not believe that the temple was a work of Hephaestus, nor the story about the golden songstresses which the poet Pindar mentions in speaking of this particular temple:—

And from above the gable
Sang charmers all of gold.

Here, it seems to me, Pindar merely imitated the Sirens in Homer⁶.

¹ Nikandros *ap.* Ant. Lib. 9.

² Hesych. 'Ιυγγίης · ὁ Διόνυσος and 'Ιύγγυϊ· ὁ Διόνυσος. M. Schmidt suggests 'Ιυγκίης 'quasi ejaculator' in both cases.

The names *κίναϊδος* (schol. Theokr. 2. 17), *κινάλδιον* (schol. Plat. *Gorg.* 494 E, Phot. *lex. s.v.* 'Ιυγξ, Hesych. *s.v.* *τυγξ, κινάλδιον*, Soud. *s.v.* 'Ιυγξ), and *σεισπορυίς* (Soud. *s.v.* *τυγξ*, schol. Theokr. 2. 17, schol. ⁵ Philostr. *v. Apoll.* 6. 11 p. 221, 32 ff. Kayser *ἐνὸς δὲ αὐτῶν καὶ χρυσᾶς τυγγᾶς ἀνάψαι λέγεται Σειρήνων τινὰ ἐπεχούσας* (leg. *ἐπηχούσας*) *πειθῶ*.

Prof. G. Murray thinks that *ἐπεχούσας* might be rendered 'exerting a kind of Siren persuasion,' but himself suggests *ἐπιχεούσας*, 'shedding a kind of Siren spell.'

⁶ Paus. 10. 5. 12 trans. J. G. Frazer. The fragment of Pindar is here cited in the

Now Monsieur S. Reinach in an ingenious and penetrating article has argued that the early Greeks, conforming to a custom widespread throughout western Europe, sought to protect their temples against lightning by means of an eagle, the lightning-bird *par excellence*, bound and fastened to a post in either pediment: the pediment in fact thence derived its name *aetós, aétoma*¹. I would suggest that on or in both pediments of the primitive temple at Delphoi was another bird bound and fastened with like intent—the *íynx* on its wheel (later replaced by a simple *íynx*-wheel), which secured the protecting presence of the sun itself. This suggestion may be reinforced by two lines of argument. On the one hand, when we come to deal with the solar disk, we shall find that the pediment of a sacred edifice was the favourite place for that symbol². On the other hand, Apulian vases often depict a pair of four-spoked wheels hanging from the roof of a temple³ or palace⁴ or chieftain's hut⁵. These wheels are commonly supposed to be chariot wheels⁶. But, although in heroic days the wheels of a chariot when not in use might doubtless be taken off and kept separately⁷, we should hardly imagine that they were habitually

⁶ Raoul-Rochette *Monumens inédits d'antiquité figurée* Paris 1831 p. 210 n. 2, Preller—Robert *Gr. Myth.* i. 805 n. 1. In the *Class. Rev.* 1903 xvii. 176 I adopted this explanation myself, but took the chariot in question to be that of the sun. I was, as I now see, half-wrong, half-right.

⁷ *Il.* 5. 722 f. "Ἡβη δ' ἀμφ' ὀχέεσσι θοῶς βάλε καμπύλα κίκλα, | χάλκεα ὀκτάκνημα, σιδηρέω ἄξονι ἀμφίς. The chariot itself, as distinct from the wheels, was put on a stand and carefully covered with a cloth (*Il.* 8. 441, cp. *ib.* 2. 777 f.). Before the wheels were removed the chariot might be set atilt against the front wall of the building (*Il.* 8. 435, *Od.* 4. 42).

hung from the ceiling of a palace, still less from that of a temple¹. And why—we may pertinently ask—is the rest of the supposed chariot never shown²? A wheel can perhaps serve on occasion as a tachygraphic sign for a chariot³. But the painters of these great Apulian vases would surely sometimes have represented the vehicle

Fig. 188.

as a whole had that been their meaning. It is therefore permissible to conclude that the wheels depending from the roof of temple and palace are rather to be interpreted as magic wheels of a

¹ Raoul-Rochette *loc. cit.* adduces Paus. 2. 14. 4 τοῦ δὲ Ἀνακτόρου καλουμένου πρὸς τῷ ὄρθῳ Πέλοπος ἄρμα λέγουσιν ἀνακείσθαι. But J. G. Frazer translates: 'On the roof of what is called the Anactorum stands a chariot which they say is the chariot of Pelops.' And, if the Ἀνάκτορον at Keleai resembled that at Eleusis (cp. Paus. 2. 14. 1), this may well be right.

² On an Apulian *amphora* from Ruvo at St. Petersburg (Stephani *Vasensamml. St. Petersburgi* i. 215 ff. no. 422 and in the *Compte-rendu St. Pétr.* 1863 p. 267 n. 4, *Mon. d. Inst.* v pl. 11 f., *Ann. d. Inst.* 1849 xxi. 240 ff., Overbeck *Gall. her. Bildw.* i. 472 ff. Atlas pl. 20, 4, Reinach *Rép. Vases* i. 138, 3, 139), which shows the ransoming of Hektor's body (*Ann. d. Inst.* 1866 xxxviii. 246), a chariot is apparently suspended in the background along with a pair of greaves, a shield, and a *phlos*; but, though the scene is probably laid before Achilles' hut, there is no indication of architecture.

³ *E.g.* the wheel of Myrtilos, on which however see *supra* p. 225 n. 4, or the wheel in the *exergue* of a Syracusan coin signed by Euainetos (*Brit. Mus. Cat. Coins Sicily* pp. 166, 173, G. F. Hill *Coins of Ancient Sicily* London 1903 p. 63, *Head Hist. num.*² p. 175), or the wheel held by a reclining female figure named *Via Traiana* on coins of Trajan (Rasche *Lex. Num.* x. 1116, Stevenson—Smith—Madden *Dict. Rom. Coins* p. 858 fig.), or that held by a figure commemorating the Circus-games of 121 A.D. on a medallion and coins of Hadrian (Gnechchi *Medagl. Rom.* iii. 16 no. 56 pl. 144, 5, Rasche *op. cit.* i. 648 ff. Suppl. i. 691 f., Stevenson—Smith—Madden *op. cit.* p. 46 f. fig.).

prophylactic sort, in a word as *tynges*. However that may be, the Delphic *tynx* is evidenced by other works of art. A series of Etruscan funerary reliefs at Florence, Volterra, etc., represents the death of Neoptolemos¹. A *cista* in the Museum at Volterra (fig. 188)² will serve as an example. The hero, suddenly attacked by Orestes, has fled for refuge to the altar in front of the Delphic temple³, and, in order to put himself still more effectually under the protection of the god, clasps with uplifted hand a six-spoked

Fig. 189.

wheel apparently conceived as hanging from the entablature. A priestess on the left would wrest the sacred wheel from his grasp. A priest on the right is horror-struck at the murder. And the scene is completed by the presence of a winged Fury. The wheel,

¹ A list of these reliefs is drawn up by Raoul-Rochette *op. cit.* p. 209, Overbeck *Gall. her. Bildw.* p. 746 f. pl. 30, 15, P. Weizsäcker in Roscher *Lex. Myth.* iii. 176, and above all by Körte *Rilievi delle Urne Etrusche* 1890 ii. pl. 53 ff.

² Körte *op. cit.* ii pl. 54, 4.

³ Cp. the scene of the tragedy as depicted on an Apulian *amphora* in the Jatta collection (*Ann. d. Inst.* 1868 xl. 235 ff. pl. E=Baumeister *Denkm.* ii. 1009 fig. 1215= Roscher *Lex Myth.* iii. 175—176 fig. 5).

with which alone we are concerned, has been very variously interpreted¹. It is I submit none other than the Delphic *kylix*. That this symbol should be found so far west as Etruria need not surprise us. We have here again to reckon with the possibility of Celtic influence. A silver disk forming part of a hoard unearthed in 1836 at Notre-Dame d'Elmençon near Brissac (Maine-et-Loire) and later acquired by the Louvre brings the wheel—presumably the Gallic solar wheel²—into close relation with Apollon (fig. 189)³.

Philostratos, who in his *Life of Apollonios* spoke of the golden *kylixes* that hung from the Delphic temple as 'echoing the persuasive notes of siren voices!' records an interesting parallel from the far east. In describing the palace of the king of Babylon he mentions 'a hall, whose ceiling was vaulted like a sky and roofed with sapphire, a stone of the bluest and most heavenly colour. Images of the gods whom they worship are set up above, and appear as golden figures emerging from the upper air. Here the king passes judgment; and *kylixes* of gold are hung from the roof, four in number, assuring him of divine Necessity and bidding him not to be uplifted above mankind. These the Magians declare that they themselves attune, repairing to the palace, and they call them the voices of the gods.'⁴ We should, I think, attempt to elucidate Philostratos' account in the light of a stone tablet found by the veteran explorer Mr Hormuzd Rassam at Abû-Habbah, the site of the old Babylonian city Sippar (fig. 190)⁵. This monument, which is now in the British Museum, is officially described as follows:

¹ Korte *op. cit.* ii. 130 argues that the figure holding the wheel must be Myrtilos, not Neoptolemos at all, because in one example (pl. 56, 8) four horses are present. But the horses may quite well be those of Neoptolemos or Orestes, or may even represent the race-course at Delphoi, where Orestes according to the feigned tale (Soph. *El.* 681 ff.) was killed by his own restive team. The pillar in the background of our illustration is equally indecisive: it stands, I think, for the Delphic *omphalos*, though it might perhaps be explained as the goal-post of Oinomaos' race. Our real and conclusive reason for regarding the scene as the death of Neoptolemos, not Myrtilos, is that the former was notoriously slain at the altar of Apollon (Roscher *Lex. Myth.* iii. 172), while the latter was no less notoriously flung into the sea by Pelops (*ib.* ii. 3315 ff.).

Tablet sculptured with a scene representing the worship of the Sun-god in the Temple of Sippar, and inscribed with a record of the restoration of the temple by *Nabu-pal-idinna*, king of Babylonia, about B.C. 870. In the upper part of the tablet the Sun-god is seen seated within a shrine upon a throne, the sides of which are sculptured with figures of mythical beings in relief; in his right hand he holds a disk and bar, which may be symbolic of the sun's orbit, or eternity. Above his head are the three symbols of the Moon and the Sun and the planet Venus. The roof of the shrine is supported by a column in the form of a palm-trunk. Before the shrine upon an altar or table stands the disk of the sun, which is held in position by means of ropes tightly drawn in the hands of two divine beings who form part of the celestial canopy. Approaching the disk are three human figures; the first of these is the high priest of the Sun-god, who is leading by the hand the king to do worship to the symbol of the solar

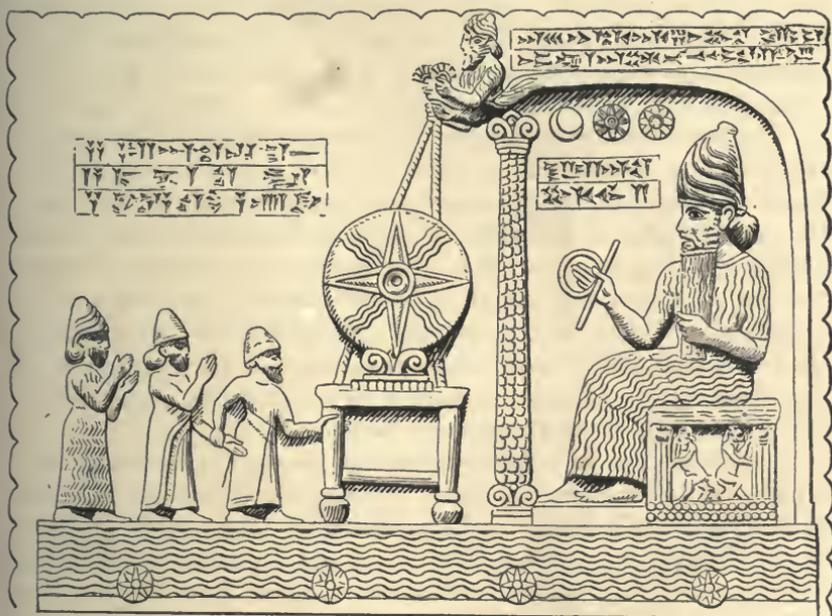

Fig. 190.

deity, and the last figure is either an attendant priest or a royal minister. The shrine of the god stands upon the Celestial Ocean, and the four small disks upon which it rests seem to indicate the four cardinal points. The text describes the restoration of the Temple of the Sun-god by two kings called *Simmash-Shikhu* (about B.C. 1050) and *E-ulbar-shakin-shum* (about B.C. 1020). It then goes on to say that Nabû-pal-idinna, king of Babylonia, found and restored the ancient image of the Sun-god and the sculptures of the temple, which had been overthrown by the enemies of the country....He also beautified the ancient figure of the Sun-god with gold and lapis-lazuli....This tablet was made by Nabû-pal-idinna in the ninth century before Christ, but he probably copied the sculptured scene at the top from a relief of a very much older period¹.

¹ E. A. Wallis Budge *British Museum. A Guide to the Babylonian and Assyrian Antiquities* London 1900 p. 128 f. pl. 22 no. 91,000.

Comparing now the tablet with the words of Philostratos, we note that it exhibits a throne-room with a ceiling vaulted like the sky, from which emerge certain divine figures. It also mentions lapis-lazuli and gold, thereby recalling the sapphire vault and golden images of the Greek author. Above all, the solar disk suspended by cords and the emblems of sun, moon, and star seen beneath the ceiling are analogous to the four *tynges* said to have been hung from the roof. I shall venture to conclude that Philostratos was not talking at random, but was describing an actual chamber in the Babylonian palace, such as we know to have been constructed by various grandees from that day to this¹. Golden disks representing the principal heavenly bodies there dangled from a mimic sky. That of the sun, upheld by two genii of gold, announced by its mobility and resonance the divine will. Indeed, all alike were known as 'the voices of the gods.'

We have thus won our way to an explanation, which further clears up the only difficulty remaining with regard to the Delphic *tynges*. They—we argued—were wheels on or in the pediments of the early temple at Delphoi. Now if, as Philostratos says², these golden *tynges* 'echoed the persuasive notes of siren voices' (literally, 'echoed a certain persuasion of Sirens'), and if, as Pindar says³, 'from above the gable sang charmers all of gold,' we may suppose that the Delphic wheels were suspended from the hands of siren-like figures placed upon the roof much as we see the solar disk suspended on the Babylonian tablet.

That the *tynx* as a bird was sacred among the ancient Babylonians and Persians has been inferred by Dr L. Hopf⁴ and Prof. D'Arcy Thompson⁵. This inference, so far as it is based on the Philostratos-passage above discussed, is obviously precarious. Marinus, it is true, states that Proklos was familiar with Chaldean rites 'and by moving a certain *tynx* in the correct manner caused a rain-fall and freed Attike from a destructive drought⁶.' But that this charm was strictly Chaldean, may well be doubted. And, even if it was, the wheel rather than the bird is probably meant⁷. The

⁷ Yet L. Hopf *loc. cit.* notes that near Radolfszell on the Bodensee wry-necks are called 'Rain-birds' (*Regenvögele*).

same consideration disposes of an allusion to the *tynx* in a supposititious fragment of Zoroastres¹. The Rev. W. Houghton, who has minutely studied the birds of the Assyrian monuments and records, discusses no fewer than fifty-seven species; but the wry-neck is not among them². Clearly, then, we cannot without further proof assert that the wry-neck was a sacred bird in Babylonia and Persia. At most we might maintain that the bird-like solar wheel or disk or ring of Assyrian and Persian art³ originated in the custom of binding a bird, some bird, not necessarily the wry-neck, upon a revolving wheel to serve as an imitative sun-charm.

(ζ) Isis, Nemesis, Tyche, Fortuna.

The *tynx*-wheels suspended at Delphoi suggest comparison with other temple-wheels. Aristotle in his treatise on *Mechanics* alludes to certain revolving wheels of bronze and iron as dedicated in sanctuaries⁴. Dionysios the Thracian (c. 170-90 B.C.) wrote a book on the symbolism of wheels; and Clement of Alexandria cites from it a passage in which mention is made of 'the wheel that turns in the precincts of the gods, being derived from the Egyptians⁵.' Plutarch too has a reference to these Egyptian wheels. By way of explaining Numa's precept that men should turn round when they pay adoration to the gods, he remarks: 'The turning round of the worshippers is said to be an imitation of the rotatory movement of the world. But the meaning would rather seem to be as follows. Since temples face the east, the worshipper has his back to the sun-rise. He here changes his position and turns round towards the (sun-) god, completing the circle, and with it his prayer, by means of both deities (*i.e.* by turning from the sun-god to the god of the temple again). Unless indeed the Egyptian wheels have a hidden significance and this change of position in like manner teaches us that, inasmuch as no mortal matter stands still, it is right to accept with contentment whatever turns and twists God gives our life⁶.' Still more explicit is Heron, an Alexandrine mathematician of the third century B.C., who twice describes the wheels in question. 'In the sanctuaries of the Egyptians,' he says,

¹ Pseudo-Zoroastres *frag.* 54 $\text{C}\alpha\text{O}\text{I}\text{Y}^2$ νοούμεναι ἰνγγες πατρόθεν νοέουσι καὶ αὐταί· | βουλαῖς ἀφθέγκτοισι κινούμεναι ὥστε νοῆσαι.

⁶ Plout. *v. Num.* 14.

'by the door-posts are bronze wheels that can be made to revolve, so that those who enter may turn them about, because bronze is believed to exercise a purificatory influence. There are sprinklers too so that those who enter may sprinkle themselves.' Heron proposes to make a wheel, which, if turned round, shall emit water for the sprinkling¹. Again, another of his problems is the 'construction of a treasury provided with a revolving wheel of bronze, termed a purifier; for this those who come into the sanctuaries are accustomed to turn round.' Heron's idea is to decorate the treasury with a bird, which, as often as the wheel is turned, shall turn itself about and whistle². The first of these passages is accompanied by

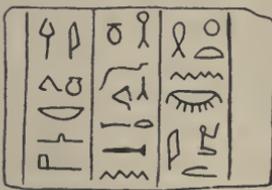

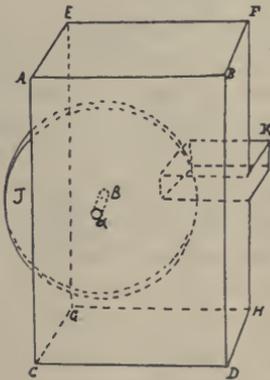

Fig. 191.

a diagram of the wheel, or rather disk, which is thin, solid, and vertical. In the second the wheel is thin and vertical, with six spokes.

In 1900 Prof. A. Erman drew the attention of Egyptologists to these alleged Egyptian wheels³, and with excellent result; for the next year Prof. F. W. von Bissing published a wheel of the sort that he had procured at Thebes (fig. 191)⁴. It is a copper disk revolving on an iron pin in such a way as to project from a copper box once sunk in a wall or gate-post. The box bears an inscription hard to decipher, but apparently referring to the wheel as a 'golden ring (or disk)': hence the discoverer infers that the wheel was formerly gilded.

Whether these wheels were Egyptian in origin or imported into Egypt from some foreign religious system, is a further question. Prof. W. M. Flinders Petrie surmised that Buddhist missionaries in the time of Asoka must have found their way to the valley of the Nile; and Mr W. Simpson, who has done so much for the

elucidation of ritual wheels, inclines to accept that view¹. Count Goblet d'Alviella suggests the following lines of transmission²:

None of these authors call in question Plutarch's statement that the Greeks derived their temple-wheels from Egypt. J. Capart, however, thinks that the current may have set the other way, the custom being introduced into Egypt by the Greeks³. Decisive considerations are not as yet to hand. But, whatever the precise lineage of these Graeco-Egyptian temple-wheels may have been, it can hardly be doubted that they were akin to the 'wheel of Fortune'—a common sight in mediaeval churches, where it was made of wood, hung up to the roof, worked with a rope, and regarded as an infallible oracle⁴. Indeed, it seems probable that the automatic gypsy-wheel of our railway platforms is a degenerate descendant of the same respectable stock.

⁴ H. Gaidoz in the *Rev. Arch.* 1884 ii. 142 ff. Such wheels are still, or at least were recently, to be found in some continental churches (W. Simpson *The Buddhist Praying-Wheel* London 1896 p. 229 n. 1).

The wheel as a cult-utensil gave rise to the wheel as a divine attribute. Fortune's wheel is often mentioned in Latin literature from the time of Cicero onwards¹, but is comparatively seldom seen on the monuments². An example or two from imperial coin-types will serve to illustrate the conception³. Thus a coin of Elagabalos shows Fortuna with a rudder in her right hand, a *cornu copiae* in her left, seated on a throne beneath which is a four-spoked wheel (fig. 192)⁴. On another of Gordianus Pius the

Fig. 192.

Fig. 193.

Fig. 194.

throne has almost vanished and we have Fortuna *Redux* seated apparently upon a mere wheel (fig. 193)⁵. On a third of Gallienus her attributes have passed by a somewhat cynical transition to Indulgentia Augusti, who stands leaning on a short column and holding a rod in her right hand (fig. 194)⁶.

¹ Cic. *in Pis.* 22, Tib. 1. 5. 70, Tac. *dial. de or.* 23, Fronto *de orat.* p. 157 Naber, Amm. Marc. 26. 8. 13, 31. 1. 1, Boeth. *de cons. phil.* 2 *pr.* 1, 2 *pr.* 2, cp. Sen. *Agam.* 71 f. Grimm *Teutonic Mythology* trans. J. S. Stallybrass ii. 866 ff., iv. 1567 f.

² Fortuna standing—a bronze statuette (K. Friederichs *Berlins antike Bildwerke* Düsseldorf 1871 ii. 424 no. 1978 cited in Roscher *Lex. Myth.* i. 1506). Fortuna, with rudder in right hand and *cornu copiae* in left, seated over a wheel—a brown paste at Berlin (Furtwängler *Geschnitt. Steine Berlin* p. 87 no. 1510 pl. 16; *id. Ant. Gemmen* i. pl. 27, 61, ii. 137). Fortuna standing with rudder and *cornu copiae* in her hands and a wheel at her feet—two gems (Montfaucon *Antiquity Explained* trans. D. Humphreys London 1721 i. 197 pl. 89 nos. 16, 17 after A. Gorlay. Modern work?). Cp. Fatum personified as a female standing with left foot raised on a six-spoked wheel and body inclined in the act of writing (*Fata Scribunda*)—a grave-relief (Roscher *Lex. Myth.* i. 1445 after Zoega *Bassirilievi* i pl. 15).

³ The coin-types of Fortuna are most fully listed by Rasche *Lex. Num.* iii. 1135—1179, Suppl. ii. 1089—1110. I figure three specimens from the Cambridge collection.

⁴ Cohen *Mon. emp. rom.* 2 iv. 338 no. 147. A similar design is found on the reverse of a bronze medallion of Albinus (W. Kubitschek *Ausgewählte römische Medaillons der kaiserlichen Münzensammlung in Wien* Wien 1909 p. 8 no. 71 pl. 5, Gneocchi *Medagl. Rom.* ii. 73 nos. 1, 2 pl. 92, 1—3).

⁵ Cohen *op. cit.* 2 v. 31 no. 98. *Id. ib.* no. 96 (the same type in gold) is well figured in the Sale Catalogue of M. le Vicomte de Ponton d'Amécourt *Monnaies d'or romaines et byzantines* Paris 1887 p. 71 no. 481 pl. 18. Mr F. W. Lincoln has a fine specimen of it. A very similar reverse occurs on coppers of the same emperor (Cohen *ib.* nos. 99, 100).

⁶ Cohen *op. cit.* 2 v. 337 no. 331. On a bronze medallion of Gallienus Fortuna *Redux* is standing with a rudder in her right hand, a *cornu copiae* in her left, and a wheel at her feet (Gneocchi *Medagl. Rom.* ii. 107 no. 8 pl. 113, 9).

The wheel of Nemesis, on the other hand, though rarely alluded to in literature¹, is common enough in art². A marble relief, found in the Peiraieus and now in the Louvre (fig. 195)³, represents the goddess as winged and standing on the back of a naked man. In her left hand she holds a measuring rod; beneath her right is a large four-spoked wheel. Beside her a bearded snake raises its head. This sinister figure occupies the interior of a little chapel and is accompanied by the following epigram:

I am—you see—the Nemesis of men,
Well-winged, immortal, dwelling in
the sky.
I flit throughout the world exult-
ingly
And have all mortal tribes within my
ken.
Artemidoros, proud and wise—I
trow—,
Wrought me in stone and duly paid
his vow.

Fig. 195.

³ P. Perdrizet in the *Bull. Corr. Hell.* 1898 xxii. 600 pl. 15, J. Delamarre in the *Rev. Philol.* N.S. 1894 xviii. 266—270. Cp. the coins of Alexandria and the statuettes from Memphis(?) and Sebennytos(?) discussed by P. Perdrizet in the *Bull. Corr. Hell.* 1912 xxxvi. 248—274 pl. 1 f.

A limestone relief in the museum at Gizeh (fig. 196)¹ shows Nemesis in the act of flitting through the world. The sculptor has made a clumsy attempt to combine three different modes of progression—wings spread for flight, limbs in the attitude of running,

Fig. 196.

and a wheel as a vehicle. Beside the goddess is her familiar animal, the griffin, one of its forepaws likewise resting on a wheel. Griffin and wheel are frequently associated with Nemesis on coins and gems². An interesting development of the type occurs at

Fig. 197.

Smyrna, where there was an ancient cult of two wingless Nemeses³. On the reverse of a coin struck by Commodus (fig. 197)⁴ we have a corresponding duplication of attributes; the two Nemeses are drawn by a pair of griffins in a two-wheeled car. The wheel has become a chariot. The same thing has happened on a red jasper in the British Museum (fig. 198)⁵. A winged

Nemesis holding her robe with her right hand and an apple-branch in her left is standing in a car drawn by a large snake. The transformation of the wheel into a chariot

⁴ H. Posnansky *op. cit.* p. 136 pl. 1, 2.

⁵ *Brit. Mus. Cat. Gems* p. 138 no. 1141, H. Posnansky *op. cit.* p. 166 pl. 1, 40. Posnansky would here recognize 'eine Verschmelzung der Nemesis mit Hygieia.' This is hardly necessary. Nemesis had a bearded snake on the Peiraieus relief (*supra* p. 269); and Zeus, according to one version, wooed her in the form of a snake (schol. Clem. Al. *protr.* 2. 37. 2 p. 308, 13 Stählin cited *infra* p. 279 n. 4).

even led to the total disappearance of the former. On a small prase at Berlin the goddess with a wreath or branch in her left hand and a measuring-rod in her right is drawn by a couple of snakes in a car, the wheels of which are not visible at all¹.

Isis too was occasionally represented with a wheel². A billon statuette found in France and formerly in the Charvet collection³ shows the goddess fairly laden with attributes. On her wings are the busts of Sun and Moon. In her left hand she holds a twofold *cornu copiae*; in her right a rudder, corn-ears, fruit, and a purse. Round her right arm coils a snake; and at her feet is a wheel with projecting hub. Again, on an engraved cornelian⁴ she is recognisable by her characteristic head-dress. A snake in her right hand is feeding out of a *phiale* in her left; and at her feet, as before, is the wheel.

Fig. 198.

It is supposed that Isis borrowed her wheel from Nemesis⁵, and that Nemesis in turn borrowed it from Fortuna⁶. These borrowings would be facilitated by the general resemblance subsisting between the deities in question.

Fortuna is commonly regarded as the goddess of luck or destiny⁷, and such she undoubtedly became. But that this was her original character can be maintained only by those who are prepared to leave many features of her cult unexplained. Mr Warde Fowler in his admirable book on *The Roman Festivals* hinted that Fortuna might be ranked among 'deities of the earth, or vegetation, or generation⁸,' being 'perhaps not only a prophetess as regards the children, but also of the good luck of the mother in

¹ Furtwängler *Geschnitt. Steine Berlin* p. 115 no. 2451 pl. 22, O. Rossbach in Roscher *Lex. Myth.* iii. 164. Furtwängler, however, regarded this gem as figuring Nike with wreath and staff standing behind a round altar on the forepart of a ship (?).

childbirth¹. This suggestion was published in 1899; and in 1900 Prof. J. B. Carter considered the problem of Fortuna's origin 'unsolved as yet²'. Nevertheless in 1905 I felt justified in urging that she was at the first no mere personification of luck, but rather a great goddess of fertility³. And that is still my conviction, based on a variety of accepted facts—the derivation of her name from the root of *ferre*, 'to bear', the agricultural and horticultural character of her reduplicated self Fors Fortuna⁴, her own intimate association with the Mater Matuta⁵, her worship by women under the titles *Virgo* or *Virginalis*⁷, *Muliebris*⁸, *Virilis*⁹, *Mammosa*¹⁰, by man as *Barbata*¹¹, her cult at Praeneste as *Primigenia*¹², at Rome as *Viscata*¹³, her tutelage of latrines¹⁴, her attributes the *cornu copiae*¹⁵, the *modius* or grain-measure¹⁶, and the ears of wheat¹⁷. The transition of meaning from fertility to luck, and from luck to destiny, is not hard to follow.

Némesis is popularly conceived as an embodiment of divine indignation or vengeance, her name being explained as the verbal substantive from *némo*, 'I impute¹⁸.' H. Usener regarded her as

the personification of distributive rather than retributive fate, connecting the name with *némo*, 'I assign'.¹ In so doing he revived an etymology already current in Graeco-Roman times². There are, however, grave objections to any such abstract interpretation. The cult of abstractions was comparatively late. The cult of Nemesis was comparatively early. Thus at Rhamnous it was flourishing in the fifth century B.C.³, and at Smyrna in the sixth⁴. Moreover, the attributes of the goddess at Rhamnous and her twin statues at Smyrna do not suggest a transparent personification of the sort required by these hypotheses. There is more to be said for O. Gruppe's view that Nemesis was an earth-goddess, essentially 'wroth' (*nemestzomai*) with those who annually oppressed her, but willing at the same time to give them oracles⁵. Nevertheless this explanation too has its weak spot. We must not derive *Némesis* from *nemestzomai*, but *nemestzomai* from *némesis*. Thus *Némesis* will not mean 'wroth,' but 'wrath.' In short, we are once more involved in the difficulty of supposing that Nemesis was a personification.

In seeking an escape from this *impasse* we should, I think, start from the analogy of Lachesis. As *Láchesis* was a goddess of the lot (*lacheîn*, 'to get by lot,' *láchos*, 'lot'), so *Némesis* was a goddess of the greenwood (*némo*, 'I pasture,' *némos*, 'glade')—a patroness of animal and vegetable life. As such she would correspond with *Nemetona*, a Diana-like deity of the Celts (Celtic *nemeton*, 'sacred wood')⁶. Indeed, she would be the Greek counterpart of the Italian Diana *Nemorensis* (*Nemus*, 'the Glade'). This is no merely speculative philological equation, but a fact borne out by a comparison of cult with cult. Diana *Nemorensis* as a woodland goddess had

¹ H. Usener *Götternamen* Bonn 1896 p. 371.

⁴ *Ib.* iii. 121 ff.

⁵ Gruppe *Gr. Myth. Rel.* pp. 45 n. 8, 1086 n. 2, cp. 45 n. 9.

⁶ On *Nemetona* see M. Ihm in Roscher *Lex. Myth.* iii. 166 f., A. Holder *Alt-celtischer Sprachschatz* Leipzig 1904 ii. 713. She is compared with Diana by A. Bacmeister *Keltische Briefe* ed. O. Keller Strassburg 1874 p. 47.

The word *nemeton* appears in place-names such as *Augustonemetum*, *Δρννέμετον*, *Medionemetum*, etc. See Holder *op. cit.* ii. 712, who cites also from the *Cartulaire de Quimperlé* a. 1031 *silva quae vocatur Nemet*. Hence the Old Irish *nemed*, 'sacred grove, sanctuary,' the Old Frankish *nimid*, 'sacred place in the wood,' and other related words (Holder *loc. cit.*, L. Meyer *Handb. d. gr. Etym.* iv. 275 ff., Prellwitz *Etym. Wörterb. d. Gr. Spr.*² p. 309, Walde *Lat. etym. Wörterb.* p. 409 f., M. Schönfeld *Wörterbuch der altgermanischen Personen- und Völkernamen* Heidelberg 1911 p. 171 s.vv. 'Nemetes,' 'Nemetiales').

both beasts and trees in her charge. On the one hand, many bronze statuettes from her precinct at Nemi represent her as a huntress¹, and two bronze figures of hinds were found at the entrance of her temple. On the other hand, Grattius in his poem on hunting describes as follows the huntsman's festival: 'In the glades beneath the sky we fashion cross-road altars: we set up split torches at Diana's woodland rite; the puppies are wreathed with their wonted adornment; and in the midmost part of the glade men lay their very weapons upon flowers, weapons that are idle during these rites and the festal time of peace. Then comes the cask: the cakes that smoke on their green tray are brought forward, the kid with horns just budding from his gentle brow, and the apples still hanging on their boughs, after the manner of the lustral rite, whereby our whole company purifies itself for the goddess and praises her for the year's capture².' It is a legitimate inference

Fig. 199.

from this passage that apple-branches played an important part in the ritual of Diana *Nemorensis*³. A. Furtwängler has acutely recognised the goddess on a whole series of Italian gems and pastes⁴. The specimen here figured exhibits her as a draped female standing by a wreathed altar with a stag at her side; she holds an apple-branch in her right hand, a bowl of apples in her left (fig. 199)⁵. Furtwängler was at first disposed to identify the goddess on this and other examples of the type with Nemesis—an identification justified in one case at least, where she is lifting her hand towards her chin in the regular Nemesis-attitude (fig. 200)⁶. This raises the question whether we have here Nemesis contaminated with Diana *Nemorensis*, or whether Nemesis in her own right could have apple-branch and stag. Pausanias'

See pages 275, 281.

account of Nemesis at Rhamnous enables us to decide in favour of the latter alternative: 'On the head of the goddess is a crown decorated with stags and small figures of Victory; in her left hand she carries an apple-branch, and in her right a bowl, on which are wrought Aithiopes (pl. xxiii, 1)¹.' Thus Nemesis at Rhamnous had the same insignia as Diana at Nemi, to wit, an apple-branch² and stags; and presumably for the same reason, because the Greek, like the Italian, goddess was a woodland³ power controlling both vegetable and animal life. After this we are not surprised

Fig. 200.

to find that Nemesis was in Roman times identified with Artemis or Diana⁴. Of their identification we have both literary and monumental evidence. A metrical inscription found in 1607 on the Appian Road and commemorating the munificence of Herodes Attikos invokes Nemesis in the following hexameter line;

Thou too that watchest the works of men, Rhamnusian *Oûpis*⁵.

Oûpis, as Dr Farnell remarks⁶, 'was an ancient and half-forgotten name of Artemis...resuscitated by later poetry' and interpreted by the Greeks as the 'Watcher' (*optizesthai*). The cult-image at Rhamnous is described by Pomponius Mela as 'Pheidias' *Nemesis*⁷ and by Julius Solinus as 'Pheidias' statue of *Diana*⁸! Adjoining the amphitheatre at Aquincum (*Alt-Ofen*) in Lower Pannonia was a chapel to Nemesis. Here a dedication 'To the

¹ Paus. i. 33. 3. Pl. xxiii, 1 is a restoration of the statue based on the extant fragment of the head (1^a and 1^b, *Brit. Mus. Cat. Sculpture* i. 264 f. no. 460) and on the coin described *infra* p. 281. See further O. Rossbach in Roscher *Lex. Myth.* iii. 147—155 with fig. 2.

² Nemesis lifting her drapery in one hand and holding an apple-branch in the other occurs on Graeco-Roman gems (*Brit. Mus. Cat. Gems* p. 138 nos. 1140—1142, H. Posnansky *op. cit.* p. 161 f., 166 pl. 1 figs. 23, 24, 27, 40). Quasi-autonomous bronze coins of Smyrna show a somewhat similar figure lifting her drapery in one hand and holding a filleted branch in the other: she is recognized as Nemesis by H. Posnansky *op. cit.* p. 133 pl. 1 fig. 21, but is called Demeter (?) by B. V. Head *Brit. Mus. Cat. Coins* Ionia p. 249 pl. 26, 6.

Mr F. M. Cornford points out to me (May 10, 1911) that, according to Hes. *o. d.* 223 cp. 215 f., Nemesis was of the same family as the apple-guarding Hesperides.

³ Diana was often paired with Silvanus (e.g. Dessau *Inscr. Lat. sel.* nos. 3266—3268: see further A. v. Premerstein in *Philologus* 1894 liiii. 409). So on occasion was Nemesis (Dessau *op. cit.* no. 3747^a, b).

⁴ See A. v. Premerstein *loc. cit.* p. 407 ff., who has collected most of the relevant facts.

⁶ Farnell *Cults of Gk. States* ii. 488.

⁷ Mel. 2. 3. 46 Rhamnus parva, inlustris tamen, quod in ea fanum est Amphiarai et Pheidsiacae Nemesis.

⁸ Solin. 7. 26 Ramne quoque, in qua Amphiarai fanum et Pheidsiacae signum Dianae.

goddess 'Diana Nemesis Augusta' came to light, dated in the year 259 A.D.¹ Similarly at Carnuntum (*Petronell*) in Upper Pannonia the amphitheatre had attached to it a sanctuary of Nemesis, the excavation of which in modern times has led to some remarkable finds². In the apse of the building, on an inscribed base, stood the statue of Nemesis herself (fig. 203)³. The goddess conforms to the late Roman type of Artemis or Diana. She is dressed in a short *chiton*, which leaves the right breast bare, and an outer garment worn like a girdle round the upper part of her figure and falling over her left arm. On her head is a crescent moon with a small disk above it. On her feet are high hunting-boots. She has a winged griffin on one side, a wheel on the other. Her right hand holds both a rudder and a whip; her left hand, a sheathed sword⁴. Close to her and sheltered by the same apse stood a second statue, that of Commodus, on a base which was inscribed in the year 184 A.D. but was subsequently, owing to the official condemnation of the emperor's memory, turned with its face to the wall. The statue seems to have represented Commodus as Jupiter with an eagle at his feet⁵. If he was king, Nemesis was queen; for a neighbouring altar erected in 199 A.D., was inscribed as 'Sacred to Nemesis the

¹ *Corp. inscr. Lat.* iii Suppl. no. 10440=Dessau *Inscr. Lat. sel.* no. 3742.

³ *Ib.* p. 210 fig. 19.

⁴ The nearest parallel to this statue with its complex symbolism is a relief dedicated to Nemesis *Regina* found at Andautonia in Upper Pannonia and now in the Agram Museum (*ib.* p. 229 f. fig. 35 a). Cp. also a sarcophagus from Teurnia in Noricum (*Philologus* 1894 liii. 408).

⁵ *Arch.-ep. Mitth.* 1897 xx. 211, 237 ff., 243 f. Coins of Commodus show not only IVPITER CONSERVATOR protecting the emperor (fig. 201), but also the emperor himself

Fig. 201.

Fig. 202.

as Jupiter standing with thunderbolt in right hand, spear in left, and eagle at his feet (fig. 202) inscribed IOVI IUVENI etc. (*Rasche Lex. Num.* iv. 885 f., cp. *Gnecchi Medagl. Rom.* ii. 56 no. 43 pl. 81, 3), or advancing with thunderbolt in right hand and spear in left, surrounded by seven stars (*Rasche ib.* iv. 878 f. IOVI DEFENSORI etc.), or seated with branch in right hand, spear in left, or again with *patera* in right hand and eagle at his feet (*id. ib.* iv. 882 f. IOVI EXSVP or EXSVPER etc. See *Dion Cass.* 18. 15, *Lamprid. v. Commod.* 11. 8).

Queen and Diana¹. It thus appears that at Carnuntum the consort of this Diana-like Nemesis was a human Jupiter—a fact to be borne in mind when we are comparing the cult of Nemesis with that of Diana *Nemorensis*. It may be objected that the cult of Nemesis at Carnuntum was late, that emperor-worship was ubiquitous, and that therefore the combination of the former with the latter was accidental and of no special significance. But the

Fig. 204.

same combination occurs elsewhere and has antecedents that deserve investigation. A copper coin of Akmonia in Phrygia (fig. 204)² shows the emperor Septimius Severus galloping towards a mountain. He holds a whip in his right hand, and before him flies an eagle apparently grasping a thunderbolt. On the mountain are two female figures in the attitude of Nemesis; at its base is a recumbent youth, naked to the waist, who is probably meant for the local river-god. The interpretation of this scene is difficult and in some points doubtful; but at least it is clear that the emperor, regarded as Zeus, was at Akmonia brought into connexion with the Nemeseis. Confirmation is afforded by a somewhat analogous coin-type of Smyrna. Pausanias *à propos* of the Smyrnaeans writes³: 'The present city was founded by Alexander, son of Philip, in consequence of a vision which he had in a dream. They say he had been hunting on Mount Pagus, and when the chase was over he came to a sanctuary of the Nemeses, and there he lighted on a spring and a plane-tree before the sanctuary, the tree overhanging the water. As he slept under the plane-tree the Nemeses, they say, appeared to him, and bade him found a city there and transfer to it the Smyrnaeans from the old town. So the Smyrnaeans sent envoys to Clarus to inquire about the matter, and the god answered them:—

Thrice blest, yea four times, shall they be
Who shall inhabit Pagus beyond the sacred Meles.

So they willingly removed, and they now believe in two Nemeses instead of one.' Copper coins of Smyrna struck by Marcus Aurelius⁴ and Philippus Senior (fig. 205)⁵ represent this vision of

¹ *Arch.-ep. Mitth.* 1897 xx. 241 f. *Nemesei Reg(inae) et Dean(a)e sacrum*) etc.

² Imhoof-Blumer *Monn. gr.* p. 391 f. no. 50 pl. G, 24 (Vienna). Cp. similar coins, but without the eagle, struck under Volusianus (Imhoof-Blumer *op. cit.* p. 392 no. 51 pl. G, 25, *Brit. Mus. Cat. Coins Phrygia* p. 21 pl. 4, 6).

⁴ *Brit. Mus. Cat. Coins Ionia* p. 279.

⁵ *Ib.* p. 296 pl. 29, 16, G. Macdonald *Coin Types* Glasgow 1905 p. 171 f. pl. 6, 14.

Alexander. The king, a recumbent youth naked to the waist, is sleeping beneath a plane-tree, at the foot of which is a *bucranium*. Beside him lie his shield, spear, and greave. Beyond him stand the two Nemeseis holding a bridle and a cubit-rule respectively, and making their customary gesture. The significance of this gesture has been much discussed¹. I take it to have been originally that of a bride, comparable with Hera's handling of her veil². The goddess, in short, needed a partner; and Alexander, whom Apelles painted at Ephesos with a thunderbolt in his hand³, may have passed muster as her divine consort. This is of course mere surmise. But, if we follow the figure of Nemesis back into the past as far as we are able, we still find her paired with Zeus, not to say with a human Zeus. For the *Kypria*, an early epic of uncertain authorship, told how 'Zeus king of the gods' became by her the father of the Dioskouroi and of Helene⁴. Moreover, since the Dioskouroi and

According to *frag.* 6, Nemesis, when pursued by Zeus, fled across sea and land transforming herself into a fish and other animals to escape his embraces. Cp. Eustath. *in Il.* p. 1321, 38 f. λέγων διὰ τοῦ ποιήσαντος τὰ Κύπρια ὅτι Διοσκούρους καὶ Ἑλένην ἡ Νέμεσις ἔτεκεν, ἡ διωκομένη, φησὶν, ὑπὸ Διὸς μετεμορφουτο. O. Rossbach in Roscher *Lex. Myth.* iii. 119 thinks that the end of the story as told in the *Cypria* is preserved for us by Apollod. 3. 10. 7 λέγουσι δὲ ἔνιοι Νεμέσεως Ἑλένην εἶναι καὶ Διὸς. ταύτην γὰρ τὴν Διὸς φεύγουσαν συνούσαν εἰς χῆνα τὴν μορφὴν μεταβαλεῖν, ὁμοιωθέντα δὲ καὶ Δία κύκνῳ συνελθεῖν· τὴν δὲ ὦδν ἐκ τῆς συνούσιας ἀποτεκεῖν, τοῦτο δὲ ἐν τοῖς ἄλσεσιν (ἄλσεσιν *excerpt. Sabb.*, ἔλεσιw cj. Preller cp. Ptol. *Heph. ap. Phot. bibl.* p. 149 b 5, Tzetz. *in Lyk. Al.* 88, δάσεσιν cj. Bekker) εὐρόντα τιὰ ποιμένα Λήδα κομισάντα δοῦναι, τὴν δὲ καταθεμένην εἰς λάρνακα φυλάσσειν, καὶ χρόνῳ καθήκοντι γεννηθεῖσαν Ἑλένην ὡς ἐξ αὐτῆς θυγατέρα τρέφειν. If so, the myth was not yet localised: ἄλσεσιν (= νέμεσιν) may have been suggested by Νέμεσις, as ἔλεσιw by Ἑλένη. Others (U. v. Wilamowitz-Möllendorf in *Hermes* 1883 xviii. 262 n. 1, R. Kekulé *Festschrift zur Feier des fünfzigjährigen Bestehens des archäolog. Instituts zu Rom* Bonn 1879 p. 9, H. Posnansky *op. cit.* p. 17) suppose that the final scene of the *Cypria* was laid at Rhamnous.

The love of Zeus for Nemesis is variously told. Almost all accounts agree that Zeus took the form of a swan (Clem. *Rom. hom.* 5. 13 (ii. 184 Migne), however, has Νεμέσει τῇ τοῦ Θεστίου, τῇ καὶ Λήδα νομισθείσῃ, κύκνος ἢ χῆν γενόμενος κ.τ.λ. = *infra* ch. i § 8 (d) and schol. Clem. Al. *protr.* 2. 37. 2 p. 308, 13 Stählin says δράκων· ἐπὶ Νεμέσιν = *supra* p. 270 n. 5). Hyg. *poet. astr.* 2. 8 adds that Zeus as a swan was fleeing from Aphrodite as an eagle. Nemesis was secured in the form of a goose (Apollod. 3. 10. 7, Tzetz. *in Lyk. Al.* 88) or of a woman (Isokrat. 10 *Helene* 59, Hyg. *poet. astr.* 2. 8).

A red-figured *kratēr* from Gnathia, now at Bonn (fig. 206), shows the egg deposited on an altar in the precinct of a pillar-Zeus (*supra* p. 40 n. 1), where Leda—originally a

Helene are elsewhere termed the children of Tyndareos¹, it seems reasonable to conjecture that the original consort of Nemesis was a king who bore the part of Zeus. Be that as it may, Nemesis was already associated with Zeus in epic times². The myth was localised at Rhamnous by the comedian Kratinos in his *Nemesis*³; and it is a curious coincidence, if no more, that the same poet in

Fig. 206.

the same play spoke of Perikles as a human Zeus⁴. The fact that this myth first emerges in the *Kypria* recalls a famous *statér* of doublet of Nemesis—discovers it with a gesture of surprise. To the right stand the Dioskouroi, brothers of the unborn Helene; to the left, Tyndareos, reputed father of all three. See further R. Kekulé *Ueber ein griechisches Vasengemälde im akademischen Kunstmuseum zu Bonn* Bonn 1879 pp. 1—26 with figs. and pl.

¹ Roscher *Lex. Myth.* i. 1158 ff.

² Were Zeus *Némeios* and *Νεμεία* (*infra* ch. i § 6 (g) viii) originally an analogous pair of woodland deities?

³ Kratinos *ap. pseudo-Eratosth. catast.* 25 and schol. Caes. Germ. *Aratea* p. 405, 9 ff. Eyssenhardt, cp. schol. Kallim. *h. Artem.* 232: see A. Meineke *Frag. com. Gr.* ii. 81, H. Posnansky *op. cit.* p. 16 ff.

⁴ Kratinos *Nemesis frag.* 10 *ap. Plout. v. Per.* 3 μὲν, ὃ Ζεῦ ξένιε καὶ μακάριε (*v.l.* κάρτε, Meineke cj. καραίε, Sintenis cj. Καραίε: Append. B).

Kypros (pl. xxiii, 2)¹, which has Zeus enthroned as its obverse, Nemesis standing as its reverse type. In the former J. P. Six detected a modification of the masterpiece at Olympia; in the latter, a copy of the cult-statue at Rhamnous. The god has a *phiale* (?) in his right hand, a sceptre in his left. The goddess is wearing a head-dress, which may no doubt be a mere wreath but is possibly² the Rhamnusan crown of stags and small Victories. The *fibula* on her right shoulder is decorated with the head of a griffin, her favourite animal. In her lowered left hand she holds the apple-branch³; in her extended right, a *phiale* with a *thymiatérion* beneath it.

The final proof that Nemesis was near akin to Diana *Nemorensis* may be found in a consideration of the term *Nemesiaci*. Commodianus, a Christian poet of the fifth⁴ century, describes the devotees of Diana as *Nemesiaci*⁵ or 'followers of Nemesis'—a

¹ *Brit. Mus. Cat. Coins* Cyprus pp. lxxiv f. 43 pl. 8, 7, J. P. Six 'Aphrodité-Némésis' in the *Num. Chron.* Third Series 1882 ii. 89—102 pl. 5 (enlarged photograph), *id.* in the *Rev. Coins* p. 170 pl. 10, 27, *Head Hist. num.*² p. 741. Besides the specimen in the British Museum, there is said to be one in the collection of the late W. H. Waddington at Paris (J. P. Six in *Num. Chron.* Third Series 1883 i. 288). The legend on the reverse was read by J. P. Six (*Zeitschr. f. Num.* 1886 xiv. 144 and *Num. Chron.* Third Series 1888 viii. 130) βασιλέφος Τιμοχάρμης. G. F. Hill (*Brit. Mus. Cat. Coins* Cyprus p. lxxiv f.) prefers Τι·μο·χα·ρη·φο·σε (cp. βασιλήφος etc.) and dates the coin c. 385 B.C. (*ib.* p. 43 Paphos no. 45).

² G. F. Hill *ib.* p. lxxv.

³ G. F. Hill *ib.* p. 43 'a branch (of apple).' J. P. Six in the *Num. Chron.* Third Series 1882 ii. 90 n. 3 says: 'Sur le statère les feuilles et les fleurs font penser à ceux du grenadier.' For μήλον = 'pomegranate' see *infra* ch. ii § 9 (h) ii (λ).

⁴ See the *Class. Quart.* 1911 v. 268.

⁵ *Commod. instructiones* 1. 19 an acrostic NEMESIACIS VANIS—

N on ignominium est uirum seduci prudentem
 Et colere tale(a)m aut Dianam dicere lignum?
 M ane ebrio, crudo, perituro creditis uno,
 E x arte qui fincte loquitur quod illi uidetur;
 S euere (diuinum) dum agit, sibi uiscera pascit.
 I ncopriat ciues unus detestabilis omnes
 A dplicuitque sibi similis collegio facto,
 C um quibus historiam fingit, ut deum adornet.
 I pse sibi nescit diuinare, ceteris audet.
 S uccollat, quando libet, eum, et quando, deponit;
 V ertitur a se(se) rotans cum ligno bifurci,
 A c si putes illum adflatum numine ligni.
 N on deos uos colitis, quos isti false prophetaunt:
 I psos sacerdotes colitis in uano timentes.
 S ed si corde uiges, fuge iam sacraria mortis.

I print the poem as it stands in the latest edition, that of B. Dombart (*Corpus scriptorum*

metathesis of names intelligible on the assumption that the Diana in question was *Diana Nemorensis*. That assumption is borne out by the wording of the poem:

Is it not intamous that a prudent man
Should be seduced to worship a cut branch¹
Or call a log- Diana? Ye believe
One drunk at dawn, full-fed, and doomed to die²,
Who speaks just what he thinks with feigned art
And, whilst he plays the god³ full solemnly,
Feeds his own entrails⁴. Thus abominable,
He fouls his fellow-citizens wholesale,
Gathers a brotherhood akin to himself
And with them feigns a tale to adorn the god.
He knows not how his own fate to foretell⁵,
Yet dares to do the like for other folk,—
Shoulders the god at times, at times just drops him.
He turns himself about revolving still
With a two-pronged stick, till you might think he were
Inspired by the godhead of the same⁷.

ca. 1a-tarorum Latinorum xv Vindobonae 1887 p. 24 f. The chief variants are mentioned in the following notes.

¹ The manuscript reading in the first line is *uirum* C. A. edd. antt., *uirium* B. A. *marz.*, and in the second line *talem* C. B. A. edd. antt. Two brilliant emendations have been proposed. E. Ludwig in the Teubner text (1878) adopts his own *ej.* *Non ignominium est Virbium seduci prudentem | et colere talem aut Dianam dicere lignum?* and comments (p. xxxiv): *hoc l. nomen proprium desiderari ex uerbis hisce 'colere talem aut Dianam dicere lignum' adparet; neque uero deae nemoris numen quodlibet coniungi potest, sed solus deus nemoris ac uenationis Dianae similis uel eiusdem deae sacerdos, quem esse Virbium, antiquissimum Regem Nemorensium ac sacerdotem Dianae in nemore Aricensi cultae, codicum scriptura probatur.* B. Dombart keeps *uirum*, which has the support of C. (cod. Cheltenhamensis, s. xi) our best MSS., and very ingeniously *ej. taleam*, 'a cut bough' or 'branch.' In favour of retaining *talem* is C. *mod. instr.* 1. 14. 6 *non te pudet, stulte, tales adorare tabellas?* 1. 17. 12 *sed stipem ut tollant ingenia talia quaerunt.* 1. 18. 18 *gestabant enim, et aruit tale sigillum,* 2. 17. 1 ff. *CHRISTIANVM TALEM ESSE.* The word is, in fact, something of a mannerism in this poet.

² B. Dombart *ep. Arnob. adv. nat.* 6. 11 *coluisse...lignum †Carios †* (so MSS., but the text has been corrected to *tearios* by the aid of Clem. Al. *prot.* 4. 46. 3 p. 35, 17 f. Stahlin and Strub, 639) *pro Diana indolatam.*

³ Dombart *ad l. 1.*: *'p. riturus* ideo dicitur sacerdos Dianae Aricinae, quia cogebatur cum eo certamen singulare inire, qui locum eius petebat.'

⁴ E. Oehler (ed. 1847), content to follow the MSS. (*diu* C. *dum* B. A. edd. antt.), prints: *Seuere dum agit.* E. Ludwig *ej.* *Seuere deum agit.* B. Dombart, after Hanssen's *ej. diuinum*, reads: *Seuere (diuinum) dum agit.* We are not elsewhere definitely told that the priest of Diana acted the part of a god; but *ep.* 14 *ipso sacerdotem colitis.*

⁵ The MSS. have *facit* (so C. A.; *facit* B.) which gives a possible sense—'begs entrails for himself.' But all the editors adopt the reading *facit*: this probably means 'feeds his own entrails, gorges himself' (*ep.* 3 *crudo*).

⁶ Since every moment he is liable to be attacked by his would-be successor (*ep.* 3 *perituro*).

⁷ The poet appears to mean that the priest of Diana held a forked stick, like a dowser's divining-rod, and spun himself round as though inspired by the movement of

These are no gods ye worship : false the claim
 Their priests put forward. 'Tis the priests themselves
 Ye worship with vain fears. Nay, if thou art wise,
 Flee even now the sanctuaries of death¹.

A decree of Honorius and Theodosius, dated 412 A.D., after providing for the recall of runaway slaves, deals with several societies and sects among which runaway slaves might be sought. One such sect is that of the *Nemesiaci* or fanatic followers of Nemesis². They are mentioned again, and for the last time, about the middle of the fifth century by Maximus, bishop of Turin, who in one of his sermons gives an interesting account of their rustic cult and crazy priest (*Dianaticus*)³.

Dr Farnell has argued that Nemesis was from the first no

his stick. 'Nearly all dowzers assert that when the rod moves in their hands...they experience a peculiar sensation, which some describe as felt in the limbs like the tingling of an electric shock, others as a shivering or trembling, and others as an unpleasant sensation in the epigastric region. With all there is more or less of a convulsive spasm, sometimes of a violent character' (Sir W. F. Barrett in the *Proceedings of the Society for Psychical Research* xv. 299 cited by F. W. H. Myers *Human Personality* London 1904 i. 481). This seems to be the first explicit mention of the dowser's rod. But I have elsewhere suggested that it was the origin of the Pythagorean γ (*Class. Rev.* 1902 xvi. 375 f.).

For similar *θεοφοροῦμενοι* see J. E. B. Mayor on *Juv.* 4. 123.

¹ The phrase *sacraria mortis* would be especially appropriate to such a cult as that of Diana Nemorensis, whose priest was ever the murderer of his predecessor.

² *Cod. Theod.* 14. 7. 2 collegiatos et vitutarios et Nemesiacos signiferos cantabrorios et singularum urbium corporatos simili forma praecipimus revocari. quibus etiam supplicandi inhibendam facultatem esse censuimus, ne originem (quod fieri non potest) commutare ulla iussio videatur; ac si forte per sacram auctoritatem cognoscitur aliqui liberatus, cessante beneficio ad originem revertatur. dat. vi kalend. Decemb. Rav. Honor. ix et Theod. v AA. Coss.

It will be remembered that the *rex Nemorensis* was regularly a runaway slave (Frazer *Lect. Hist. Kingship* p. 16).

³ Maximus Taurinensis *serm.* 101 (lvii. 734 Migne) nihil ibi liberum est a scelere, ubi totum versatur in scelere. cum cellam ingressus fueris, reperies in ea pallentes cespites mortuosque carbones, dignum sacrificium daemonis, cum mortuo numini rebus mortuis supplicatur. et si ad agrum processeris, cernis aras ligneas et simulacra lapidea, congruens ministerium, ubi diis insensibilibus aris putrescentibus ministratur. cum maturius vigilaveris et videris saucium vino rusticum, scire debes quoniam, sicut dicunt, aut Dianaticus aut aruspex est; insanum enim numen amentem solet habere pontificem; talis enim sacerdos parat se vino ad plagas deae suae, ut dum est ebrius poenam suam ipse non sentiat. hoc autem non solum de temperantia, sed et de arte faciunt, ut minus vulneca sua doleant, dum vini ebrietate iactantur. vanus plane vates est, qui putat crudelitate astruere pietatem. quam misericors in alienos deos ille qui in suos est pontifices tam cruentus! nam ut paulisper describamus habitum vatis huiusce: est ei adulterinis crinibus hirsutum caput, nuda habens pectora, pallio crura semicincta, et more gladiatorum paratus ad pugnam ferum gestat in manibus, nisi quod gladiatore peior est, quia ille adversus alterum dimicare cogitur, iste contra se pugnare compellitur. ille aliena petit viscera, iste propria membra dilaniat, et, si dici potest, ad crudelitatem illum lanista, istum numen hortatur.

vague personification of a moralising sort, but a definite figure of ancient religion. Her name—he thinks—was a title given at Rhamnous to a goddess of birth and death resembling Artemis, and at Smyrna to two goddesses (originally to one goddess) of vegetation resembling Aphrodite. He holds that the appellative, if Homeric or post-Homeric in date, marked 'the goddess who feels righteous indignation at evil acts and evil words,' if pre-Homeric, 'denoted distribution of any lot, the lot of life to which

Fig 207.

each is born!'. I agree with this able scholar in thinking that Nemesis was a substantial deity of early date akin to Artemis, if not also to Aphrodite; but for that very reason I cannot be content to saddle her with a cult-title denoting either 'indignation' or 'distribution.' The cult of -ations and -utions is late, not early. I incline to believe that *Némesis*, a concrete 'goddess of the

¹ Farnell *Cults of Gk. States* i. 487—498.

Greenwood' (*némos*), became a goddess of vengeance simply through an illogical but almost inevitable confusion with the abstract substantive *némesis* meaning 'righteous wrath.' *Némesis* and *némos*, so far as etymology is concerned, were doubtless sprung from the same parent stem, but in point of usage they belonged to widely divergent branches of it. In the apple-bough held by Nemesis at Rhamnous, perhaps too in the plane-tree before the sanctuary of the Nemeseis at Smyrna, we may detect a last trace of the original character of the woodland goddess.

Returning now to the main topic of the present section—the ritual wheels of Isis, Nemesis, Tyche, and Fortuna—we have yet to notice one extant specimen of a different but analogous sort. It is a wheel of cast lead from the Millingen collection in the British Museum (fig. 207), which was in all probability used for purposes of divination. It revolves upon a central pin, and has four spokes radiating from the angles of an inner square. Between every pair of adjacent spokes is a standing male figure, who holds a wreath in his right hand, a spear or sceptre in his left¹. Round the rim are Roman numerals (VI VII etc.) and groups of letters. Some of these are to me illegible; but over the figure uppermost in my illustration can be clearly seen PREPE, presumably the Greek *prépei*, 'it is fitting,'—a word appropriate to the diviner's art².

It is probable, though not quite certain³, that all such wheels of Fortune were once intended to figure forth the sun. For—apart from the fact that the sun was sometimes, as we have seen, conceived as a wheel by the Greeks—there is the noteworthy circumstance that the dedication-day of the temple of Fors Fortuna was June 24⁴, the summer solstice⁵. Moreover, on the third Sunday in June, which would correspond approximately with Midsummer Day, at Douai a large wheel called the *roue de fortune* used to be carried in procession before a wicker-work giant known

¹ Mr F. H. Marshall in a note dated May 4, 1911 compares the magical disk published by R. Wünsch *Antikes Zaubergerät aus Pergamon* (*Jahrb. d. kais. deutsch. arch. Inst. Ergänzungsheft* vi) Berlin 1905 p. 45 ff. pl. 2, figs. 8 f.—a convex plate of bronze fitted with a swing handle and engraved with concentric circles and two series of *radii*, between which are numerous Greek and Egyptian characters and cabalistic signs. 'The figure with parted arms on the Pergamon disk recalls,' says Mr Marshall, 'those on the lead disk.'

² M. Bréal in the *Rev. Ét. Gr.* 1908 xxi. 113 ff. argues that the use of *prépei*, 'il convient,' explains the second element in *θεοπρόπιον*, 'oracle' (yet see Prellwitz *Etym. Wörterb. d. Gr. Spr.*² p. 182, Boisacq *Dict. étym. de la Langue Gr.* p. 339).

³ W. Warde Fowler *The Roman Festivals* London 1899 pp. 161, 169 f. adopts an attitude of cautious reserve.

⁴ R. Peter in Roscher *Lex. Myth.* i. 1501.

⁵ H. Gaidoz justly emphasised this fact: see W. Warde Fowler *op. cit.* p. 169 f.

as *le grand Gayant* and other figures termed *les enfants de Gayant*¹. This enables us to bring the wheel of Fortune into connexion with a whole series of customs observed by the peasants of central Europe. Dr Frazer has shown that at Midsummer a blazing wheel is trundled down hill²; burning disks or wheels are flung into the air³; a tar-barrel is kindled and swung round a pole⁴; and fresh fire is made by rotating a wheel on a wooden axle⁵. A clue to the meaning of these rites is furnished by G. Durandus in his account of the feast of Saint John the Baptist (Midsummer Day)⁶:

'At this festival three special rites are performed. For in some districts on the eve of the feast men and boys, in accordance with ancient custom, collect bones and certain other unclean things, and burn them together, so that a smoke rises from them into the air. Moreover, they bring brands or torches, and with them go the round of the fields. There is a third rite too; for they roll a wheel. Those who burn the unclean things and make the smoke rise aloft derive this practice from the heathen. For in ancient days dragons, stirred to lust at this time of year on account of the heat, used to fly through the air and often let fall their seed into wells and springs. Thus the waters were infected; and the year was then deadly by reason of the corruption of the air and the waters, for whosoever drank of them died or suffered some grave disorder. Philosophers, remarking this, bade fire be made frequently and everywhere round wells and springs, and any unclean things likely to cause an unclean smoke be burnt there; for they were aware that dragons could be put to flight by a smoke of that sort. And, since such things took place especially at this time of year, the custom is still kept up by some. For dragons are actual animals, as it says in the psalm "Praise the Lord from the earth, Ye dragons," not *thracones*, that is passages of the earth, as some have asserted. These animals fly in the air, swim in the waters, and walk through the earth. They cannot abide anything unclean and flee before a stinking smoke, like elephants before the grunting of swine. There is another reason why the bones of animals are burnt, to wit in memory of the fact that the bones of John the Baptist were burnt by the heathen in the city of Sebaste. Or this may refer to the New Testament; for the boys cast away and burn what is old to signify that, when the new law comes, the Old Testament must cease; for it is said "Ye shall not eat the oldest of the old, and when the new comes in ye shall cast out the old." Brands too or blazing torches are brought and fires are made, which signify Saint John, who "was a burning and a shining light," the forerunner who came before "the true light, even the light which lighteth every man that cometh into

¹ H. Gaidoz in the *Rev. Arch.* 1884 ii. 32 ff. These wicker giants may be descended from the Druid divinities, whose colossal images of wicker-work are described by Caesar *de bell. Gall.* 6. 16.

⁴ *Id. ib.* iii. 272.

⁵ *Id. ib.* iii. 276 f.

⁶ G. Durandus *Rationale divinatorum officiorum* Lugduni 1612 lib. 7 cap. 14 no. 10 ff. This important book was first printed at Mentz in 1459.

the world." As it is said in John vi, He is a burning light, shining before the Lord, who hath prepared a way for the Lord in the wilderness. In some places a wheel is rolled, to signify that just as the sun comes to the highest parts of its circle and can get no higher but then descends in the circle, so too the glory of John, who was thought to be the Christ, descends, according to the witness that he himself bore when he said "He must increase, but I must decrease." And some say that this was said because the days then begin to decrease and at the nativity of Christ to increase. But as to their decreasing before the feast of Saint John and increasing before the birthday of Our Lord, this we must understand of their nativity in the mother, that is to say, of the time when each was conceived; because John was conceived when the days were decreasing, as in September, Christ when they were increasing, as in April. Or take it of the death of each; for the body of Christ was uplifted on the cross, whereas the body of John was cut short by being beheaded.'

From this singular medley of superstition and piety, which agrees with the accounts given by other mediaeval Latinists and can be traced back to the twelfth century¹, one fact stands out clearly. The Midsummer wheel represented the sun. Dr Frazer, after recording in detail a large number of examples, concludes as follows²: 'The best general explanation of these European fire-festivals seems to be the one given by Mannhardt, namely, that they are sun-charms or magical ceremonies intended to ensure a proper supply of sunshine for men, animals, and plants... This view of the festivals is supported by various arguments drawn partly from the rites themselves, partly from the influence which they are believed to exert upon the weather and on vegetation. For example, the custom of rolling a burning wheel down a hill-side, which is often observed at these times, seems a very natural imitation of the sun's course in the sky, and the imitation is especially appropriate on Midsummer Day when the sun's annual declension begins. Not less graphic is the mimicry of his apparent revolution by swinging a burning tar-barrel round a pole. The custom of throwing blazing discs, shaped like suns, into the air is probably also a piece of imitative magic. In these, as in so many cases, the magic force is supposed to take effect through mimicry or sympathy; by imitating the desired result you actually

¹ John Beleth, a Parisian divine, who wrote his *Summa de divinis officiis* about 1162 A.D., appears to have been the immediate source of G. Durandus; for the extract, which J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass ii. 620 f. gives from Beleth *Summa* Dillingen 1572 cap. 137 fol. 256, agrees substantially, in part even verbally, with the corresponding sections of Durandus *Rationale*, which was written in 1286 A.D. Very similar again is cod. Harleian. 2345 art. 100 cited by J. Brand *Popular Antiquities* rev. Sir H. Ellis London 1849 i. 298 n. 1 and more fully by J. M. Kemble *The Saxons in England*² London 1876 i. 361 f. See further E. Kuhn *Die Herabkunft des Feuers und des Göttertranks* Gütersloh 1886 p. 47 ff., W. Mannhardt *Wald- und Feldkulte*³ Berlin 1904 i. 309, Frazer *Golden Bough*² iii. 267.

² Frazer *Golden Bough*² iii. 300 f.

produce it; by counterfeiting the sun's progress through the heavens you really help the luminary to pursue his celestial journey with punctuality and despatch. The name "fire of heaven," by which the midsummer fire is sometimes popularly known¹, clearly indicates a consciousness of the connection between the earthly and the heavenly flame.'

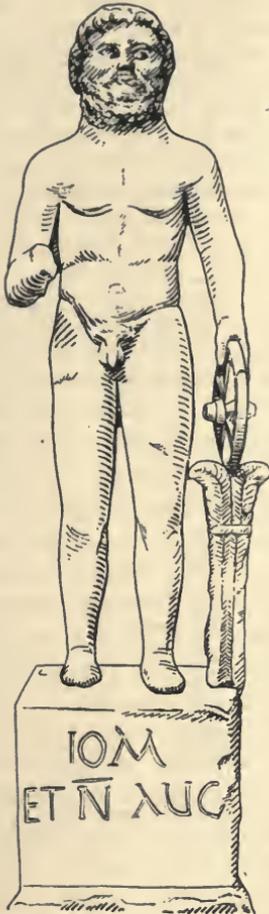

Fig. 208.

ii. Zeus and the Solar Wheel.

But—it may be objected—although it is certain, or almost certain, that the wheel in such ceremonies stands for the sun, what reason is there to suppose that the solar wheel was in any special way connected with Zeus? That is a question to which a full and complete answer can be returned only when we shall have discussed further the relation of Ixion to Zeus. Meantime it may be shown that Iupiter on Celtic soil and Zeus among the Greeks were somehow associated with the wheel.

A Celtic god, whose solar character was determined by Monsieur H. Gaidoz, is represented as holding a wheel on his shoulder². He is sometimes equated with the Roman Iupiter, and then holds the wheel either on a support beside him (fig. 208)³ or on the ground at his feet

¹ A. Birlinger *Volksthümliches aus Schwaben* Freiburg im Breisgau 1861 ii. 57, 97, W. Mannhardt *op. cit.* i. 510, cp. F. Panzer *Beitrag zur deutschen Mythologie* München 1855 ii. 240—cited by Dr Frazer.

² H. Gaidoz in the *Rev. Arch.* 1884 ii. 7 ff. figs. 1—5.

³ A bronze statuette (height .227 m.) originally silvered over. It was found in 1872 at Landouzy-la-Ville (Aisne) and is now in the Musée de Saint-Germain. The god, whose head and neck resemble Hercules rather than Iupiter, held in his right hand some attribute now lost: this may have been a thunderbolt (so A. Héron de Villefosse, comparing fig. 209) or some object with a long staff-like handle (so S. Reinach, noting a possible trace of it on the upper surface of the base). The left hand holds a six-spoked wheel resting on the capital of a pilaster. The base is inscribed IOM | ET N AVG (*Iovis Optimo Maximo | et n(umini) Aug(usti)*). See further A. Héron de Villefosse in the *Rev. Arch.* 1881 i. 1 ff. fig. 1 pl. 1, Reinach *Bronzes Figurés* p. 31 ff. no. 4.

(fig. 209)¹. Altars dedicated to Iupiter and marked with one or more wheels, a wheel and a thunderbolt, a wheel between two thunderbolts, etc., are not uncommon in the Celtic area² and attest the widespread worship of the same solar deity.

In Greece the evidence is literary, not monumental. Lykophron the pedant, who c. 274 B.C. composed his outrageously obscure tragedy the *Alexandra*, included in it the following comparatively lucid lines :

Howbeit one there is, who past all hope
 Helpeth us friendly, he the Oak-tree-god
Promantheüs Aithiops Gyraßios called³.

A colossal stone statue found in 1876 at Séguret (Vaucluse) and now in the Museum at Avignon shows Iupiter in Roman military costume. His lowered right hand grasps a ten-spoked wheel resting on a support. Beside his left foot is his eagle, behind which a snake issues from a tree-trunk (*Rev. Arch.* 1884 ii. 11 f. pl. 1).

¹ A bronze statuette (height 14 m.) found in 1774 at Le Château near Saint-Dizier (Haute-Marne) and now in the Musée de Saint-Germain. The god holds a thunderbolt in his raised right hand, a six-spoked wheel in his lowered left.

On a brass hoop, which passes over his right shoulder and through a handle affixed to his back, are slung nine S-shaped pendants of bronze. See further A. Héron de Villefosse *loc. cit.* i. 3 ff. fig. 2, Reinach *op. cit.* p. 33 ff. no. 5, J. Déchelette *Manuel d'Archéologie préhistorique* Paris 1910 ii. 1. 466 fig. 196.

An altar from Vaison shows Iuno with *patera* and peacock, Iupiter in military costume with a thunderbolt in his right hand, a wheel in his left, and an eagle at his feet (*Rev. Arch.* 1881 i. 5 f., 1884 ii. 12).

On an altar from Theley in the Museum at Trèves a youthful deity with cloak and crown held an object now lost in his right hand, and raises a six-spoked wheel like a shield in his left hand: a smallish bird is perched at his feet (*Rev. Arch.* 1884 ii. 10 f. fig. 7 after F. Hettner 'Juppiter mit dem Rad' in the *Westdeutsche Monatschrift* 1884 iii. 27—30).

With the foregoing monuments Reinach *op. cit.* p. 35 compares two others not definitely identified with Iupiter: (1) A bronze statuette found at Hartsbourg, formerly Saturbourgh, shows the Germanic god Chrodo (? cp. M. Schönfeld *Wörterbuch der altgermanischen Personen- und Völkernamen* Heidelberg 1911 p. 142 s.v. 'Chrodebertus') standing on a fish: he holds a six-spoked wheel in his uplifted left hand, a basket of fruit and flowers in his lowered right (Montfaucon *Antiquity Explained* trans. D. Humphreys London 1721 ii. 261 pl. 56, 3 after H. C. Henninius, cp. M. Mayer in Roscher *Lex. Myth.* ii. 1481). (2) On the marvellous silver bowl found at Gundestrup in Jutland a bearded and partly bald or tonsured god raises both hands and thereby eclipses half of a many-spoked wheel, which is apparently turned by a beardless male figure in a horned helmet (S. Müller 'Det store solukar fra Gundestrup i Jylland' in the *Nordiske Fortidsminder* 1892 pl. 5, A. Bertrand *La Religion des Gaulois* Paris 1897 p. 368 f. fig. 58).

² To the lists in the *Rev. Arch.* 1881 i. 5 ff., *ib.* 1884 ii. 13 f., Reinach *op. cit.* p. 35, J. Déchelette *op. cit.* ii. 1. 467 f. add now J. Curle *A Roman Frontier Post and its People* Glasgow 1911 p. 334 f. fig. 49 an earthenware mould showing Iupiter with helmet, shield, club, and eight-spoked wheel.

³ Lyk. *Al.* 535 ff. ἀλλ' ἔστι γὰρ τις, ἔστι καὶ παρ' ἑλλίδα | ἡμῖν ἀρωγὸς πνευμένης ὁ Δρύμνιος | δαίμων Προμανθεὺς Αἰθιοψ Γυράσιος.

Fig. 209.

Isaac Tzetzes in his twelfth-century commentary on Lykophron's work informs us that the deity here in question was Zeus, and adds that he was named 'the Oak-tree-god' in Pamphylia, *Promantheús* at Thourioi, *Aithtops* and *Gyrápsios* in Chios¹. Not much is known about the Zeus-cults of Chios²; but there are traces of solar deities in the myths of the island³, and the name *Aithiops* or *Aíthops*, 'He of the Burning Face,' is applied elsewhere to one of the sun-god's horses⁴. It is, therefore, not unreasonable to suppose that *Aithtops* *Gyrápsios* denoted Zeus in his solar aspect. But *Gyrápsios* means

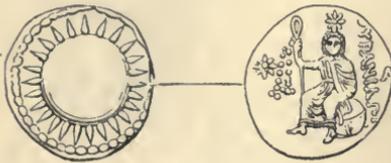

Fig. 210.

'He of the Round Wheel', so that the Chian Zeus is here described as 'He of the Burning Face, He of the Round Wheel'—a combination of epithets that may fairly be referred to the conception of the sun as a glowing wheel. Nevertheless it would be unwise to infer from this passage an early cult of a solar Zeus in Chios. Lykophron, writing in the third century B.C., not improbably found the local worship influenced by that of some Asiatic sun-god. After all, it is but a few miles from Chios to the coast of Asia Minor, where Zeus-cults in general tended to take on a solar character⁶. And the title *Gyrápsios* has the air of being a late and erudite compound rather than an early and popular formation.

¹ Tzetz. *ad loc.* Δρύμιος ὁ Ζεὺς ἦτοι δαίμων οὕτω παρὰ Παμφυλίοις, Προμανθεὺς δὲ παρὰ Θουρίοις, Αἰθίοψ δὲ καὶ Γυράψιος παρὰ Χίοις.

² Zeus Ἐφιππος (Hesych. *s.v.* Ἐφιππος) has been regarded as a god who presided over ovens (*ἰπνός*): see O. Jessen in Pauly—Wissowa *Real-Enc.* v. 2853, Gruppe *Gr. Myth. Rel.* p. 932 n. 3, Boisacq *Dict. étym. de la Langue Gr.* p. 379 f. There were also cults of Zeus Μειλίχιος (*Ath. Mitth.* 1888 xiii. 223) and Zeus Πατρῶος (Dittenberger *Syll. inscr. Gr.*² no. 571, 35); and Zeus Πεlinnaίος was worshipped on Mt. Pelinnaion (Append. B Chios).

³ According to Ion of Chios *ap.* Paus. 7. 4. 8, Oinopion came from Crete to Chios with his sons, including Τάλος (cp. Τάλως *infra* ch. i § 6 (h)). Orion, when blinded by Oinopion, recovered his eyesight by walking eastwards through the sea in such a way as to face the rays of the rising sun (Pherekyd. *ap.* Apollod. 1. 4. 3; Hes. *ap.* pseudo-Eratosth. *catást.* 32, Hyg. *poet. astr.* 2. 34, schol. Nik. *ther.* 15, schol. Caes. Germ. *Aratea* 331; Serv. *in Verg. Aen.* 10. 763).

⁴ *Supra* p. 195 n. 5, *infra* p. 337 n. 3.

⁵ J. Potter on Tzetz. *in Lyk. Al.* 536 'qui formae est orbicularis, et circularem motum circa terram nostram quolibet die et anno peragit.' The epithet is compounded of γυρός, 'round,' and ἀψίς, 'the felloe of a wheel,' which (as I pointed out in the *Class. Rev.* 1903 xvii. 419) is used of the wheel of the Sun's chariot (Eur. *Phaethon frag.* 779, 2 f. Nauck² ἀψίδα σὴν | κάτω διήσει, *Ion* 87 f. τὴν ἡμερῖαν | ἀψίδα) or of the curved course described by the Sun (Archestratos *frag.* 33 Brandt *ap.* Athen. 326 B ὅταν Φαέθων πυμάτην ἀψίδα διφρέη).

⁶ *Folk-Lore* 1904 xv. 273 f.

iii. Zeus and the Solar Disk.

Closely akin to the wheel is its genetic precursor¹ the disk. 'The Paiones,' says Maximus Tyrius, 'worship Helios, and the Paenonian image of Helios is a small disk on the top of a long pole².' With this ritual object I have elsewhere³ compared the sceptre surmounted by a circle held by Aphrodite *Ourania* on coins of Ouranopolis in Makedonia⁴ (fig. 210) and the *kopô* or olive-wood staff topped by a bronze ball representing the sun in the Boeotian *Daphnephoria*⁵. But indeed the same conception could be traced much further afield: it accounts satisfactorily, as I shall hope to show on another occasion, for the various forms taken by May-poles and 'Celtic' crosses throughout Europe.

Confining our attention to Greece, we note that a revolving disk of bronze, originally mounted on a long columnar handle, was

Fig. 211.

¹ On the evolution of the wheel from the disk see A. C. Haddon *The Study of Man* London 1898 p. 168 ff., cp. Schrader *Reallex.* p. 929 ff., H. Hirt *Die Indo-germanen* Strassburg 1905 i. 354 f., M. Hoernes *Natur- und Urgeschichte des Menschen* Vienna and Leipzig 1909 ii. 475 ff. N. Gordon Munro in the *Transactions of the Asiatic Society of Japan* 1911 xxviii. 3. 37 f. rightly assumes the sequence $\bigcirc \bigcirc \oplus$ i.e. the pictograph of the sun, the solar disk, the solar wheel.

found at Corinth and is now in the Berlin Museum. It is decorated on both sides with a love-scene in relief (fig. 211)¹. A very similar disk, likewise found at Corinth, is in the Louvre². Almost the only difference between the two is that on the Paris specimen the young man and the maiden have each a *thyrsos* in hand. The fact that both disks hail from Corinth, where Helios and Aphrodite held the citadel in succession³ and were worshipped in the same temple⁴, is suggestive of solar magic. Nor need the intrusion of a Dionysiac *motif* make difficulties. A well-known Orphic verse identified Dionysos with Helios⁵. However, the exact purpose to which these implements were put, and indeed the precise name by which they were called, escapes us.

Sometimes the solar disk was affixed to buildings by way of prophylaxis⁶. O. Benndorf has shown that the earliest Greek *akrotéria* were developments from the ornamented end of the ridge-pole and consequently were circular or nearly circular in form⁷. He further observes that they were patterned in a variety of ways. The oldest example known to us, that of the Heraion at Olympia (c. 700—650 B.C.), is a great disk of terra cotta measuring some seven and a half feet in diameter. Its interior is strengthened with spoke-shaped ribs. Its exterior is painted with concentric zones and has a radiate rim⁸. Another *akrotérion* from the same precinct was the golden *phiale* with a relief of Medousa, which the Lacedaemonians and their allies set up over the temple of Zeus after the battle of Tanagra (457 B.C.)⁹. In other cases too the disk of terra cotta or marble bore an apotropaic face¹⁰. Thus an Apulian *kratér* in the Louvre shows both gables of a richly decorated

building surmounted by a round *Gorgóneion* (fig. 212)¹. Finally, two Doric temples of a late date near the monastery of *Kourno* on the Taygeton promontory have *akrotéria* shaped like a ring with an inner wheel or rosette². Now all these forms are intelligible as variations of the solar disk; and that they really symbolised the sun may be inferred from the fact that in Roman times they were often replaced by the four-horse chariot of the sun-god himself³.

Again, when we remember the Egyptian custom of putting the solar disk with its *uraeus*-snakes over every sacred doorway⁴, we

Fig. 212.

shall be emboldened to assign a solar origin to the *phidole* or circular shield so frequently found in representations of classical pediments. This *phidole* or shield is at first flanked by a couple of snakes (fig. 213)⁵. But the snakes gradually degenerate into

Occasionally the *quadriga* of the sun-god occupies the pediment: so on a bronze-relief of Zeus *Sabázios* in his shrine (*infra* p. 392 n. 1).

⁴ *Supra* p. 205 f.

⁵ Roulez *Vases de Leide* p. 79 ff. pl. 19. Cp. an Apulian *amphora* at Naples, on which the pediment of Hades' palace has a *Gorgóneion* between two fish-tailed monsters (Heydemann *Vasensamml. Neapel* p. 510 ff. no. 3222, *Mon. d. Inst.* viii pl. 9, Baumeister *Denkm.* iii. 1927 fig. 2042 A).

Early Greek architects commonly filled the angles of their pediments with the tails of snaky or fishy figures, and their example was followed far and wide (see e.g. A. Foucher

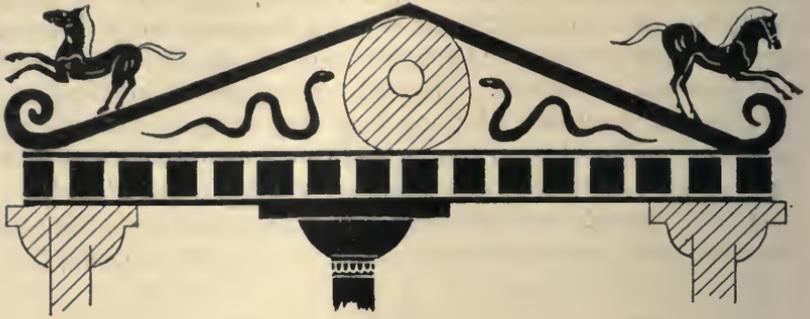

Fig. 213.

Fig. 214.

Fig. 215.

Fig. 216.

Fig. 217.

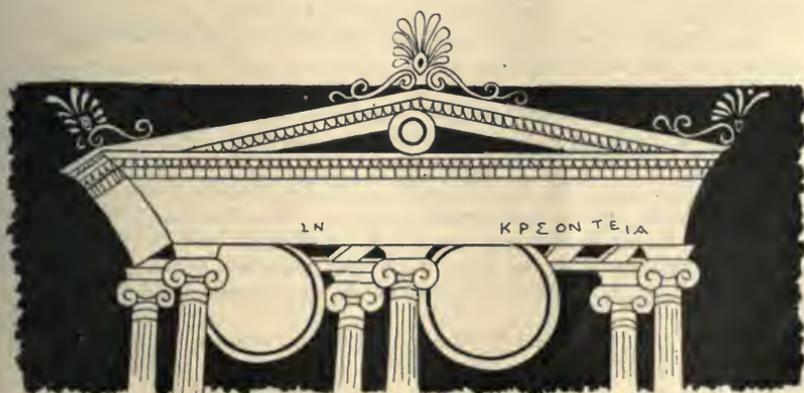

Fig. 218.

a mere pattern (figs. 214—217)¹, and end by vanishing altogether (fig. 218)².

Whether the disks or shields suspended in temples³ and palaces⁴ were ever regarded as *apotrópaia*, we do not know. But at least they afford a close parallel to the wheels hung in like positions, which we took to be *lynges*⁵.

Fig. 219.

On an early silver coin of the Thraco-Macedonian region a disk is borne through the sky by a winged and long-haired figure in the attitude of *Knielauf*⁶ or speedy flight (fig. 219)⁷. This figure is best interpreted as that of the local sun-god⁸. Its nearest

L'Art gréco-bouddhique du Gandhâra Paris 1905 p. 241 ff. figs. 119—123, 125). I surmise that this practice originated in the representation of a solar disk with a snake on either side of it. Artistic convenience may have dictated that the snakes should turn towards the disk, not away from it. But the device was from the first intended to serve a practical purpose, that of safe-guarding the edifice.

¹ Fig. 214 is from an Apulian *pélisse* at Naples, which depicts the rape of the *Palládion* from the temple of Athena (Heydemann *op. cit.* p. 529 ff. no. 3231, *Ann. d. Inst.* 1858 xxx. 246 ff. pl. M).

Fig. 215 is from an Apulian *kratér* in the British Museum (*Brit. Mus. Cat. Vases* iv. 142 f. no. F 284, Inghirami *Vas. fitt.* i. 41 ff. pls. 19, 20).

Fig. 216 is from an Apulian *kálpis* at Cambridge (E. A. Gardner *Cat. Vases Cambridge* p. 83 no. 247 pl. 39).

Fig. 217 is from another Apulian *kratér* in the British Museum (*Brit. Mus. Cat. Vases* iv. 143 f. no. F 286 unpublished: cp. an Apulian *hydria* *ib.* iv. 174 no. F 351 unpublished).

² Furtwängler—Reichhold *Gr. Vasenmalerei* ii. 161 ff. pl. 90 the *Medeia-vase* at Munich, on which see *supra* p. 251 f. Many other examples could be cited, e.g. Furtwängler—Reichhold *op. cit.* i pl. 10, *Mon. d. Inst.* x pl. 27, *Bullettino Italiano* 1862 i pl. 7, Lenormant—de Witte *Él. mon. céer.* iv pl. 27.

In numismatic art too a similar sequence of types could be made out: a good collection of materials is in Anson *Num. Gr.* v pls. 4—13, cp. Stevenson—Smith—Madden *Dict. Rom. Coins* pp. 128, 458, 485, 526f., etc.

The pediment of the Ionic *própylon* at Magnesia was ornamented with a round shield (*Magnesia am Maeander* p. 133 with p. 127 fig. 133).

³ E.g. *Compte-rendu St. Pét.* 1863 p. 251 ff. Atlas pl. 6, 5 (temple of Apollon at Delphoi), *supra* p. 40 fig. 11 (precinct of Zeus at Mykenai).

⁷ *Brit. Mus. Cat. Coins* Macedonia etc. p. 136 fig., *Babelon Monn. gr. rom.* ii. 1. 1257 f. pl. 59, 6. B. V. Head's suggestion (*Brit. Mus. Cat. Coins* Macedonia etc. pp. xix f., xxv ff.; but see *Hist. num.*² p. 203) that the object carried by the running figure may be ☉, the initial of the town Therma, is most improbable (Imhoof-Blumer *Monn. gr.* p. 106 ff.). E. Babelon *loc. cit.* describes it as 'une couronne': but this is ruled out by the central dot.

A silver coin at Paris nearly related to the foregoing shows a similar figure clad in a long *chiton* (Babelon *op. cit.* ii. 1. 1255 ff. pl. 59, 5).

⁸ So P. Gardner in the *Num. Chron.* New Series 1880 xx. 58.

analogue occurs on silver coins of Mallos in Kilikia c. 425—385 B.C. (fig. 220)¹. Here we see a beardless god, draped from the waist downwards, winging his way in hot haste and holding in both hands a disk, on which is an eight-rayed star. Two details deserve attention. The spiral on the top of the god's head recalls the similar adornment of other winged figures² and is suggestive of a feather head-dress³: as such it would point us towards Crete and north Africa. The god's skirt too might be compared with those of the young men on the Haghia Triada sarcophagus⁴. Now Talos the sun-god appears on coins of Phaistos as a beardless youth, winged and hastening along with a round stone in either hand⁵. And the Minotaur, another solar personage, is a very similar figure on coins of Knossos⁶. I should conjecture, therefore, that the disk-bearing god on the coins of Mallos is a solar deity akin to the Cretan Talos or Minotaur. Fortunately it seems possible to trace his type back to earlier forms. A *statér* at Berlin shows him with Janiform

⁶ *Infra* ch. i § 6 (g) xv.

head, holding a disk which is not stellate¹. A *statér* in the Hunter collection gives him four wings and a plain disk (fig. 221)². Another in the same cabinet makes him both Janiform and four-winged, placing beneath him the front part of a man-headed bull (fig. 222)³. Yet another from the same collection adds a bull's head facing us upon the disk (fig. 223)⁴. It may fairly be claimed that these coins

Fig. 221.

Fig. 222.

Fig. 223.

go some way towards connecting the Cilician god with the Minotaur. F. Imhoof-Blumer would see in him Kronos⁵, whose head he identified on a later silver coin of Mallos⁶. And certainly this explanation suits the bull's head borne by the Janiform figure; for Kronos appears elsewhere with that attribute⁷. But we need not therefore disallow the comparison with Talos and the Minotaur. Kronos is essentially connected with both⁸. Perhaps we may venture to regard the older disk-bearer as a solar Kronos, the younger as a solar Zeus. Further, it has been argued by J. N. Svoronos⁹ that Mallos in Kilikia was a colony of Malla in Crete, where the principal cult was that of Zeus *Monnitios*¹⁰. If Svoronos is right, we are justified in pressing the analogy of the Cretan solar deities.

¹⁰ Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 350 ff. no. 5100, 18 f. *οἱ μὲν Ἀστρα[ο]ὶ ἐν Μάλλαι ἐπὶ Μοννιτίω, ib.* iii. 2. 413 no. 5184, 14 *ἀναθήσομεν εἰς τὸ ἱερὸν τῷ Ἰηπὸς τῷ Μοννιτίω*. Coins of Malla in the third or second century B.C. have obv. head of Zeus bearded and laureate, rev. eagle, thunderbolt (Svoronos *op. cit.* i. 240 f., Head *Hist. num.* 2 p. 472).

Hellenistic literature once or twice connects Zeus with the solar disk. Lykophron describes how the body of Aias, cast up on the beach, will be parched by 'the ray of Seirios' and hidden in the sea-weed by Thetis—

Helper of *Diskos*, mightiest power, *Kynaitheús*¹.

The scholiast states that the word *Seirios*, which properly denotes the Dog-star, is here used improperly of the sun; that *Diskos* means Zeus, who was so called in memory of the *diskos* or stone swallowed in his stead by Kronos; and that *Kynaitheús* was a cult-title of Zeus in Arkadia². The scholiast's comment is repeated by Tzetzes³ and apparently postulates a solar Zeus known as *Diskos*. This squares with Nonnos' hymn to the sun, in which the poet invokes that luminary not only as the Assyrian and Egyptian 'Zeus', but also as—

Driving around all heaven with fiery disk⁵.

Finally, it may be suspected that, when Mithraic (?) sun-worshippers spoke of the *Diskos* as 'Father' and 'god', they were not independent of the same religious conception.

iv. The Lycian Symbol.

Lycian coins of the fifth and fourth centuries B.C. are characterised by a symbol, which might be called indifferently a wheel or a disk. It consists of a central ring or circle, from which radiates a

¹ Lyk. *Al.* 397 ἀκτὶς Σεiriα, 400 Δίσκου μεγίστου τάρροθος Κυναιθέως.

² Schol. Lyk. *Al.* 397 ff. *Seirios* is used of the sun by Archil. *frag.* 58 Hiller *ap.* Plout. *symf.* 3. 10. 2 and *ap.* Hesych. *s.v.* Σεiriου κυνὸς δίκην, cp. Hesych. *s.v.* σεiriος· ὁ ἥλιος. καὶ ὁ τοῦ κυνὸς ἀστήρ, Orph. *Arg.* 120 f. σεiriος... ἥλιος, Soud. *s.v.* σεiri, σεiriός· ὁ ἥλιος and Σεiriον· τὸν Κύνα· ὅτε δὲ καὶ τὸν ἥλιον. See further L. Meyer *Handb. d. gr. Etym.* iv. 49 f., Prellwitz *Etym. Wörterb. d. Gr. Spr.*² p. 407. Κυναιθέως is understood by Welcker *Gr. Götterl.* ii. 197 as an epithet of Zeus in the Dog-days, cp. C. von Holzinger on Lyk. *Al.* 400. Paus. 5. 22. 1, 8. 19. 1 describes a statue of Zeus dedicated at Olympia by the Κυναιθαεῖς of Arkadia as holding a thunderbolt in either hand—which hardly supports the connexion with the Dog-star (see, however, Paus. 8. 19. 2 f.).

ducks¹ (fig. 232). On occasion an owl occupies the central ring² (fig. 233). But on the Lycian series the radiating lines are never modified into human legs. The significance of this symbol has been frequently debated. Monsieur Babelon, after passing in

Fig. 231.

Fig. 232.

Fig. 233.

review the various hypotheses that have been put forward, concludes in favour of the solar explanation advanced by L. Müller and Mr E. Thomas³. L. Müller, comparing analogous symbols throughout the west of Europe⁴, and Mr Thomas, doing the same for India and the east⁵, arrived independently at substantially similar results. Both regard the Lycian sign and its parallels as representations of the sun. Mr Thomas sums up in the following sentence: 'As far as I have been able to trace or connect the various manifestations of this emblem, they one and all resolve themselves into the primitive conception of solar motion, which was intuitively associated with the rolling or wheel-like projection of the sun through the upper or visible arc of the heavens, as understood and accepted in the crude astronomy of the ancients⁶.' This verdict, for Lykia at least, is confirmed by the fact that on Lycian coinage after the time of Alexander the Great the radiate head of Helios is a constant type⁷. But, when we seek to define the deity to whom the Lycian wheel originally belonged, we are deserted by the evidence. The conjecture of C. von Paucker⁸ and E. Curtius⁹, that it marked the worship of a three-fold Zeus, is disposed of by the examples with one, two, and four branches.

There is more to be said for Monsieur Babelon's view that it was the symbol of a national god of light, who perhaps originated in Crete, perhaps came from the east¹, but in any case at a later date entered the Greek pantheon and was assimilated to Apollon, being famed throughout the classical world as Apollon *Lykios*².

v. The Lycian Symbol and the Kyklops.

This, however, is to leave unsolved the problem—who or what was the national light-god before the advent of the Greek Apollon? I am disposed to think that he was, or became, the monstrous form known to the Greeks as the Kyklops³. Objections will at once occur to readers familiar with the *Odyssey* and its myth of Polyphemos. How is the plural Kyklopes to be reduced to a singular Kyklops? What had the Kyklopes who kept sheep on the mountains of Sicily, or for that matter the Kyklopes who worked at the underground smithy of Hephaistos, to do with a sun-god? How are we to bridge the distance from Magna Graecia in the west to Lykia in the east? And by what process did a solar wheel develop into a ferocious giant? These are questions that must be answered, if my hypothesis is to be regarded as tenable at all.

To begin with, then, Hellanikos asserts that 'the Kyklopes derived their name from one Kyklops, son of Ouranos⁴.' It follows that his readers in the fifth century B.C. knew of certain Kyklopes, different from the Kyklopes of the Homeric tradition, inasmuch as they were named after a single Kyklops, who passed as being the son of 'the Sky.' This sky-connexion is elsewhere insisted on. The scholiast on Aristeides the rhetorician writes: 'They say that there are three kinds of Kyklopes, those in the *Odyssey*, who are Sicilian; the Cheirogastores; and the so-called Sky-dwellers⁵.'

¹ N. Gordon Munro in the *Transactions of the Asiatic Society of Japan* 1911 xxxviii. 3. 52 ff. supposes that this symbol, as emblem of the solar god Sandas, Sandes, Sandon, travelled across Asia from the west to the farthest east. But he adduces no valid evidence of its connexion with Sandas.

³ *Class. Rev.* 1904 xviii. 326 f.

⁴ Hellanik. *frag.* 176 (*Frag. hist. Gr.* i. 69 Müller) *ap. schol. Hes. theog.* 139 'Ελληνικὸς δὲ τοὺς Κύκλωπας ὀνομάζεσθαι ἀπὸ Κύκλωπος υἱοῦ Οὐρανοῦ, οὐ περὶ τῶν παρ' Ὀμήρῳ Κυκλώπων λέγει.

⁵ Schol. Aristeid. p. 408, 26 ff. Dindorf *τρία γὰρ γένη φασὶν εἶναι Κυκλώπων, τοὺς κατὰ τὸν Ὀδυσσεῖα, Σικελοῦς ὄντας, καὶ τοὺς Χειρογάστορας, καὶ τοὺς καλουμένους Οὐρανοῦς.* M. Mayer *Die Giganten und Titanen* Berlin 1887 p. 110 f. thinks that the scholiast drew his information from Hellanikos, because the schol. *Hes. theog.* 139 after the passage quoted in n. 3 immediately continues *Κυκλώπων γὰρ γένη τρία. Κύκλωπες οἱ τὴν Μυκλήν, τειχίσαντες, καὶ οἱ περὶ τὸν Πολύφημον, καὶ αὐτοὶ οἱ θεοί.* But it is far from clear that this last sentence was taken from Hellanikos: C. Müller *Frag. hist. Gr.* i. 69 does not include it in the excerpt.

Nor can we dismiss this as the figment of a late grammarian; for Hesiod¹, perhaps a thousand years earlier, had spoken of the Kyklopes as *Ouranidai*, 'sons of the Sky,' and Zenon the Stoic c. 300 B.C. gave a physical explanation of the name².

Again, there is reason to connect the Kyklopes with Lykia. The seven Kyklopes, who built the great walls of Tiryns for king Proitos, were brought over for the purpose from Lykia³. Thus, whereas Theophrastos declared that towers were invented by the Tirynthians, Aristotle referred their invention to the Kyklopes⁴. Towers to the modern ear are not suggestive of a sky-god; but we must bear in mind Pindar's mysterious statement that the souls of the righteous—

travel the road of Zeus to Kronos' tower⁵,

and also the names applied by the Pythagoreans to the central fire of the universe, *viz.* 'the tower of Zan,' 'the watch-tower of Zan,' 'the house of Zeus⁶.' A revolving tower, as we have seen⁷, was a Celtic conception of the Otherworld. Some such belief may underlie the reputation, which the Kyklopes enjoyed in ancient times⁸, of being master-builders. We still speak of 'Cyclopean' masonry.

Next we have to consider the possibility of deriving the one-eyed giant of Sicily from the solar wheel of Lycia in point of actual shape. The Lycian symbol appears to have developed in two very different directions. On the one hand, by the beginning of the fourth century B.C. it had become reduced to a simpler combination of lines⁹. The central circle had dwindled to a dot, from which

⁹ The change is already noticeable on a coin of the Lycian dynast *Thiōd.* (Babelon *Monn. gr. rom.* ii. 2. 211 f. pl. 94, 12).

radiated three curved lines or crescents. This form occurs at Olba in Kilikia¹ (fig. 234); at Thebe in Mysia²; at Abydos³, Birytos⁴, and Rhoiteion⁵ in the Troad; in Makedonia⁶; at Argos⁷; and at Megara⁸. On the other hand, the tendency towards theriomorphism and anthropomorphism was also at work.

Fig. 234.

The addition, already observed, of animal heads to the component members of the symbol⁹ was but the commencement of changes, which were carried further in neighbouring lands. Thus the silver coins of Aspendos in Pamphylia from about 500 B.C. onwards are characterised by three human legs, turned either to the right or to the left, but radiating from a common centre and so constituting a genuine *triskelés*¹⁰. Sometimes this *triskelés* is centred about a small four-spoked wheel¹¹ (fig. 235). Occasionally it is superposed on a lion¹² (fig. 236) or an eagle¹³ (fig. 237). But usually it consists of three human legs

⁵ At Istros in Lower Moesia occurs the strange type of two young male heads in juxtaposition, one of the two being upside down (*Brit. Mus. Cat. Coins Thrace etc.* p. 25 f., *Head Hist. num.*² p. 274). *Head ib.*¹ p. 235 held that this design 'probably refers to the cult of the Dioskuri, which was very prevalent on the coasts of the Euxine,' but *ib.*² p. 274 suggests that it 'may be meant for the rising and the setting sun-god' and compares 'the rayless Helios on the early coins of Rhodes.' Since other coins of Istros show a four-spoked wheel (Append. D), I would rather conjecture that the two heads in question are a naive attempt to represent the face of the sun-god in actual rotation.

⁶ Babelon *Monn. v. p. rom.* i. 192 a bronze coin of M. Antonius showing as symbol a *triskelês*, the central dot of which is marked like a face: the coin is of Sicilian mintage.

⁷ G. F. Hill *Coins of Ancient Sicily* p. 155 pl. 11, 10 (my fig. 242), *Brit. Mus. Cat. Coins Sicily* p. 193.

(fig. 242). On an *aureus* struck by the Roman moneyer L. Aquillius Florus in 20 B.C. to commemorate the Sicilian exploits of M'. Aquillius eighty years earlier there is a similar device, but the winged *Gorgoneion* is larger¹ (fig. 243). Bronze coins of Panormos from 254 B.C. onwards adopted the same combination of *triskelés* and *aigls*: moreover, they complicated it still further by the introduction of three ears of barley between the revolving legs² (fig. 244). The design recurs on late copper coins of Iaita³; and on the *denarii* struck in Sicily by L. Cornelius Lentulus Crus and C. Claudius Marcellus, the consuls of 49 B.C., who fled from Rome at the approach of Caesar⁴ (fig. 245). From a numismatic point of view, therefore, Mr G. F. Hill is justified in describing this 'contamination' of the *triskelés* with the *Gorgoneion* as 'of Agathoclean origin⁵'. But it would be interesting to know whether the combined device was invented by Agathokles himself, or borrowed from elsewhere. It may be surmised that Agathokles, who was a soldier rather than an artist, saw it first on the shields of some of his numerous foreign mercenaries. For, not only was the simple *triskelés* a frequent emblem on shields⁶, but Dioskourides, an Alexandrine epigrammatist of the third century B.C., represents a Cretan warrior as dedicating a shield that was adorned with precisely this combination of *triskelés* and *Gorgoneion*:

Fig. 245.

Not vain, methinks, the blazon that Polylos' son doth please,
 Hyllus, who bears his buckler as a mighty man from Crete.
 The Gorgon that turns men to stone and eke the triple knees
 He bade them paint: you'll find them there, saying to all they meet—
 'Look not thou down on me, my foe; that look of thine will freeze'
 Or 'Flee the man who runs apace with these his threefold feet?'

However that may be, it is practically certain that the central face was originally not that of the winged and snaky-tressed Gorgon, but that of the sun-god pure and simple—witness a Punic *stèle*, dating from about the time of Iuba, which was found in 1823 near

⁷ *Anth. Pal.* 6. 126.

308 The Lycian Symbol and the Kyklops

Vacca (*Bedja*) or Sicca Venerea (*Kef*) in Tunis and is now in the museum at Lyon. This stone was erected as a votive offering to *Ba'al-hammân*, the principal Punic deity of north Africa, who, though the word *hammân* probably does not mean 'Fiery',¹ appears to have been a sky-god or sun-god of some sort². W. Gesenius³ translated the accompanying inscription as follows :

To Lord Baal the Sun-god, king eternal,
who hath heard the words of Hicmath-
o and of thy servant Hicembal the governor...

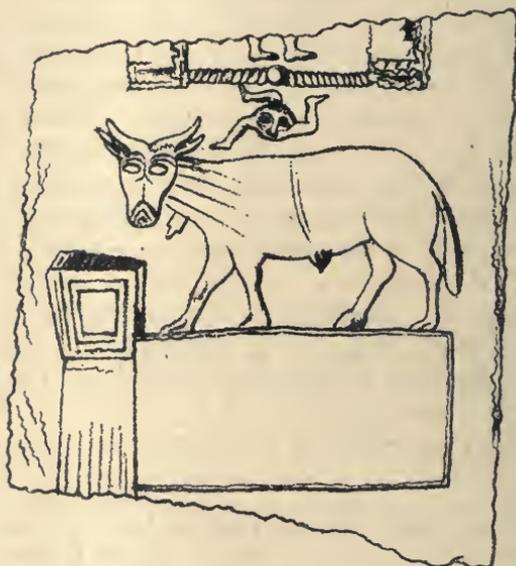

Fig. 246.

Baal had blessed the cattle of this Hiempsal (so his name should be written), governor of a Numidian province. Hiempsal, therefore, by way of a thank-offering caused a representation of himself to be carved (fig. 246) with a cow standing beneath it. The intervening symbol, which for us has the main interest, Gesenius does not attempt to elucidate. But it may fairly be regarded as a sign and token of Baal himself, the sky-god or sun-god, and cited in support of the contention that the *triskelés* had a solar significance. The same explanation probably applies to a very similar *triskelés*

according to M. Agrippa and M. Varro², was over-run by Carthaginians, who would presumably bring the cult of their Punic Baal with them.

vi. The Kyklops of the East and the Kyklops of the West.

Taking into account these zoöomorphic transformations of the solar wheel, I shall venture to propound a fresh classification of the Kyklopes in Greek mythology. Let us distinguish the Kyklopes of the eastern Mediterranean (including the Aegæan) from those of the western Mediterranean (especially Sicily). What is common to the two groups, what in fact enables them to be considered species of a single genus, is the central disk representing the actual orb of the sun: hence the appropriate name for both was *Kyklops*, 'the Round One,' or more exactly, 'He of the Round Aspect.'

The eastern Kyklopes were called also *Cheirogástores*³ or *Gasterócheires*⁴, that is, 'Arm-bellies' or 'Belly-arms,' in connexion with Lykia and Tiryns; *Encheirogástores* or *Engastrócheires*⁵, that

³ Eustath. *in Il.* p. 286, 30 f., apparently quoting Strabon either from memory or in a text different from ours. A comparison of schol. Aristeid. with schol. Hes. (*supra* p. 302 n. 4) shows that the Kyklopes who built Mykenai were sometimes at least known as *Cheirogástores*.

⁴ Strab. 372 and *ap. Eustath. in Od.* p. 1622, 53 f.

⁵ Deiochos *frag.* 5 (*Frag. hist. Gr.* ii. 17 f. Müller) *ap. schol. Ap. Rhod.* i. 989 mentions certain Thessalian ἐγχειρογástορας (vulg.) or ἐγγαστρούχειρας (cod. Paris.). The scholiast identifies them with the Ἰγγυεῖες of Ap. Rhod. *loc. cit.*, monstrous forms with six arms,

is, 'Bellies-in-arms' or 'Arms-in-bellies,' in connexion with Thessaly, Kyzikos, Thrace, Euboa, and Mykenai. Such names would be not unsuitably given to giants, who represented in anthropomorphic guise the solar symbol with its central ring and radiating members.

A distant echo of this mythopoeic stage may be heard in Platon's *Symposium*¹, where Aristophanes, as usual half in jest and half in earnest, makes a speech in praise of Love and in the course of it describes humanity as it was in the remote past :

'Our nature long ago was not what it is now, but otherwise. In the first place, mankind was divided into three sexes. It comprised not only the present two, male and female, but a third as well, which was a compound of them both. The name of this third sex still survives, though it has itself become extinct. In those early times the androgynous was at once a name and a species, being a blend of male and female in one common nature; whereas now-a-days it is merely a name given by way of reproach. Then again, every man's shape was rounded throughout, his back and sides being in the form of a circle². He had four arms, and as many legs as arms, and two faces on a round neck, resembling each other in every respect. On his two faces, which looked opposite ways, he had a single head with four ears. Moreover, he had two sets of generative organs, and everything else to match. He walked upright, as he does still, in whichever of the two directions he pleased. When he started to run fast, he looked like tumblers who bring their legs round so as to point upwards and tumble along in a circle: just in the same way did the men of those days move rapidly along in a circle, resting their weight on their limbs, which were eight in number. The reason why the sexes numbered three may be put thus. The male was originally the offspring of the sun; the female, of the earth; the common sex, of the moon, for the moon too shares the nature of both. They and their mode of progression were alike circular because they resembled their parents. So it came to pass that in point of power and strength

two attached to their shoulders and four to their ribs (*ib.* 944 ff.), who dwelt about the "Αρκτων ὄρος, a mountainous island in the Propontis, and, coming from their mountain, essayed to block the Χυτὸς λιμὴν at Kyzikos with rocks and so secure the Argonauts. The scholiast adds that Polygnostos (vulg.) or Polygnotos (cod. Paris.) in his work *On Kyzikos* rationalised them into pirates, but that tradition made them the offspring of the Nemean lion. According to the latter part of schol. Eur. *Or.* 965 the walls of Mykenai were built by Kyklopes called ἐγχειρογαστορες, who were said to have made the thunderbolt for Zeus. Other *scholia* on the same verse derive the Kyklopes, who came to aid Proitos, from Kouretis (= Euboa) and ultimately from Thrace, where there was a tribe of Kyklopes with an eponymous king Kyklops. See further G. Knaack 'Encheirogastores' in *Hermes* 1902 xxxvii. 292 ff., Gruppe *Myth. Lit.* 1908 p. 441 f.

¹ Plat. *symp.* 189 D—190 C.

² *Id. ib.* 189 E ὄλον ἦν ἐκάστου τοῦ ἀνθρώπου τὸ εἶδος στρογγύλον, νῶτον καὶ πλευρὰς κύκλω ἔχον. That is, every man had the shape of two men joined back to back, so that his body was cylindrical, being circular in horizontal section. The words can hardly be taken to mean that his body was a sphere or disk. Cp. *Tim.* 44 D—E, 73 C—D, where he contrasts the globular (περιφερής) brain in its spherical (σφαιροειδής) cranium with the cylindrical (στρογγύλος καὶ προμήκης) spinal marrow in its vertebral column, and my comment in *The Metaphysical Basis of Plato's Ethics* Cambridge 1895 p. 138 f.

they were terrible ; and in their pride they attacked the gods. Indeed, what Homer says of Ephialtes and Otos refers in reality to these ; I mean, that they attempted to scale the sky, intending to make an assault upon the gods.'

Aristophanes goes on to tell how Zeus frustrated their efforts and punished their pride by cutting them in halves like so many eggs. Ever since that fell catastrophe man has gone about the world in search of his other half. And, if Zeus hears much more of his insolence, he will cut him in halves again, so that in future he will go hopping on a single leg ! This interesting recital, despite the humorous turn given to its *dénouement*, is evidently based on the serious beliefs of the past. When Platon speaks of a third sex compounded of the other two, he has in mind the 'whole-natured types' of Empedokles¹, that is to say, types neither male nor female, but both. And, when Platon relates his human Catherine-wheels to the sun, the earth, and the moon, he recalls the same philosopher-poet's expression 'the swift limbs of the Sun.'² But he is also throughout thinking of Pherekydes' twin Moliones³ and of the Orphic Phanes, first-born of the gods, a strange bi-sexual being⁴, perhaps two-bodied⁵, certainly four-eyed⁶, and commonly identified with the sun⁷. According to one account, Phanes had the heads of rams, bulls, a snake, and a lion⁸, together with golden wings⁹: according to another, golden wings on his shoulders, heads of bulls attached to his sides, and on his head a monstrous snake resembling all manner of wild beasts¹⁰. This composite conception suggests comparison with the various theriomorphic and anthropomorphic modifications of the Lycian solar wheel¹¹.

In the western Mediterranean anthropomorphism went a step further. We hear of no *Cheirogástores* with multiple limbs. The

Kyklopes of Sicily and Italy had originally one large circular eye in the middle of the forehead¹ (fig. 249)². This is throughout the prevailing type of the Kyklops in Greek and Latin literature. But with vase-paintings, wall-paintings, engraved gems, bas-reliefs and sculpture in the round the case was different. Here a growing sense of artistic fitness prescribed, first that the Kyklops should have his normal eyes, whether shut or open, as well as his abnormal eye³, and last that his abnormal eye should dwindle away into nothing, leaving him two-eyed like other folk⁴. Thus it comes about that Servius in the fourth century A.D. can write: 'Many say that Polyphemos had one eye, others that he had two, others

Fig. 249.

again that he had three; but the whole tale is a make-belief⁵. Virgil, in the passage on which Servius was commenting, adheres to the original conception of the western Kyklops and speaks of his eye as—

¹ In the case of Polyphemos this is implied by *Od.* 9. 333, 383, 387, 394, 397, 453, 503, 516, 525, and stated in Kratin. *Odysses frag.* 14 Meineke, Eur. *Cycl.* 77, Lyk. *Al.* 659 f. with Tzetz. *ad loc.*, Theokr. 6. 22, 36, 11. 33, 53, Philostr. *mai. imagg.* 2. 18. 2, *Anth. Pal.* 14. 132. 2, 7, Ov. *met.* 13. 772 f. The Homeric Kyklopes in general had one eye, according to Strab. 21. The Kyklopes of Aitne are one-eyed in Eur. *Cycl.* 21 f.; those of Lipara in Kallim. *h. Artem.* 52 f.; Brontes, Steropes, and Argos in Hes. *theog.* 144 f. Eustath. *in Od.* pp. 1392, 36 ff., 1622, 39 ff. inclines to regard Polyphemos as *ἐτερόφθαλμον*, not *μονόφθαλμον*; cp. Guido de Columna (1287 A.D.), who in his account of the Trojan war gives Polyphemos two eyes and makes Odysseus pluck out one of them (W. Grimm in the *Abh. d. berl. Akad.* 1857 Phil.-hist. Classe p. 27).

⁵ Serv. *in Verg. Aen.* 3. 636, *Myth. Vat.* 2. 174.

Huge, lurking there alone 'neath his fell brow,
Like to some Argive shield or torch Phoebean¹.

This last line draws from Servius the just remark that the one simile refers to the size (and shape), the other to the glow, of Polyphemos' eye: the 'Argive shield' was circular, and the 'torch Phoebean' must be either the moon or the sun². Parmenides in one of his fragments mentions 'the round-eyed (literally *kýklops*) moon³.' But it is more probable that Virgil is comparing the eye of the Kyklops with the sun. Ovid does so expressly in the *Metamorphoses*, where Polyphemos defends his claim to good looks in the following lines:

One only eye my midmost forehead bears,
But like a mighty shield. Yea, all these things
Yon sun beholds, and with one only orb⁴.

Of course no simile or collection of similes can prove that the Kyklops' eye stands for the sun in heaven. But we have seen that according to one version, which can be traced back to Hesiod, the Kyklopes were known as 'children of the Sky⁵'; that, in the words of Hellanikos, they 'derived their name from one Kyklops, whose father was the Sky⁶'; and that the Greeks regarded the sun as the eye of the animate sky⁷. A presumption is thus raised that we are on the right track in investigating the story of the Kyklops as though it were a nature-myth and in identifying the round eye, from which he took his name, with the shining orb of the sun⁸.

The distinction that I have drawn between the many-armed Kyklopes of the east and the one-eyed Kyklopes of the west

⁸ L. Frobenius *Das Zeitalter des Sonnengottes* Berlin 1904 i. 367—412, after a wide survey of analogous myths all the world over, comes to the conclusion that the man-eating ogre (or ogress), who lives in a cave and is a famous builder, must be regarded as a star if he has one eye, as a constellation if he has many heads and arms: he is attacked by the solar hero or sun-god, who wrests from him the means of making fire. On this showing Odysseus would be the sun-god and Polyphemos a star! W. Schwartz *Indogermanischer Volksglaube* Berlin 1885 p. 169 ff. argues that one-eyed beings such as the Kyklopes are storm-powers, their fiery eye denoting the lightning (see *infra* ch. ii § 3 (b)). W. H. Roscher *Lex. Myth.* ii. 1689, 59 ff. suggests that the one eye of the Kyklops refers to the crater of Mt. Aitne, and V. Bérard *Les Phéniciens et l'Odyssee* Paris 1903 ii. 130 has given a similar volcanic explanation: cp. R. Browning *Paracelsus* sc. 5 'groups | Of young volcanos come up, cyclops-like, | Staring together with their eyes on flame.' I follow W. Grimm 'Die Sage von Polyphem' in the *Abh. d. berl. Akad.* 1857 Phil.-hist. Classe p. 27 and A. Kuhn *Die Herabkunft des Feuers und des Göttertranks*² Gittersloh 1886 p. 63.

corresponds fairly well with a difference indicated in Hesiod's *Theogony*. The poet, enumerating the children of Earth (*Gaia*) and Sky (*Ouranós*), writes :

She brought forth too Kyklopes proud of heart,
Brontes and Steropes and strong-souled Arges,
Who gave the thunder and wrought the bolt of Zeus.
They verily in all else were like the gods,
But had one eye amid their forehead set.

[Kyklopes were they named by reason of
A round eye, one, upon their forehead set.]

Power, violence, and guile were in their deeds.

Others again from Earth and Sky were sprung,
Three sons of size and strength, not to be named,
Kottos, Briareos, Gyes, prideful brood.

A hundred arms were waving from their shoulders,
All unapproachable, and fifty heads

Grew from the shoulders on each stalwart neck.

Monstrous their power, strong to match their size¹.

The one-eyed Kyklopes are here mentioned side by side with certain many-armed giants of the self-same parentage. If we may regard these *Hekatóncheires*² as analogous to the *Cheirogástores*, Hesiod's division is just that between the Kyklopes of west and east.

Nor need we be surprised to find the sun conceived in two forms so widely different by people residing within the same area of civilisation. A useful parallel is afforded by the religion of ancient Egypt. The oldest group of Egyptian deities was headed by a divine pair named Nu and Nut, god and goddess respectively of the watery mass of the sky. The pyramid text of Pepi i addresses 'Nut, in whose head appear two eyes'³—presumably the sun and moon. Similarly a late papyrus in the British Museum⁴ makes Nu speak of his Eye in terms which can only refer to the sun⁵. Again, when the attributes of Nu were transferred to the god Rā⁶, the Eye of Rā was identified with a variety of solar

⁶ E. A. Wallis Budge *The Gods of the Egyptians* i. 135. According to G. Maspero *The Dawn of Civilization*⁴ London 1901 p. 88 n. 1 the name Rā 'means the sun, and nothing more.'

powers¹. Rā himself was fused with the Theban deity Āmen, and a hymn written in the time of the twentieth or twenty-first dynasty for the great resultant god Āmen-Rā says :

‘Thou art the beautiful Prince, who risest like the sun with the White Crown, and thou art the lord of radiant light and the creator of brilliant rays.... Thy flame maketh thine enemies to fall, and thine Eye overthroweth the *Sebāu* fiends².’

Rā was likewise fused with Tem the local sun-god of Ānnu, that is On or Heliopolis, thus forming the double god Rā-Tem³ : accordingly we hear of the Eye of Tem as another designation of the sun⁴. Lastly, Rā was fused with Horos⁵ (*Heru*), who was regarded as the Face (*Her* or *Hrā*) of heaven, and said to have two eyes, the sun being the right eye, and the moon the left⁶. But these numerous descriptions of the sun as the eye of this, that, or the other deity by no means prevented the Egyptians from depicting it in curiously incongruous ways. For example, Āmen-ḥetep iv or Amenophis iv, the *Hōros* of Manethon, about the year 1430 B.C., despite the first element in his own name, cut himself off from the old capital Thebes and the Theban cult of Āmen. He adopted a new name, Khut-en-Āten, and founded a new capital, Khut-Āten, some two hundred miles south of Cairo on the east bank of the Nile : the site of his foundation is now marked by the Arab villages of Haggi Ḳandīl and Tell el-‘Amarna. Khut-en-Āten means the ‘Spirit’ or ‘Glory of Āten’ ; and Khut-Āten, the ‘Horizon of Āten.’ This Āten was a very old Egyptian deity, whose original home was near Ānnu or Heliopolis. ‘Āten,’ says Dr Wallis Budge, ‘was the physical body of the Sun⁷.’ And monuments of Khut-en-Āten often show the king, with or without his family, illuminated by the sun’s rays⁸. In these representations the rays

316 The Kyklops of the East and West

of Āten are made to terminate in human hands (fig. 250)¹, which sometimes hold emblems of life and sovereignty in their grasp².

Such solar symbols are, indeed, deep-seated in human nature, and, like many other natural phenomena, contrive to coexist in spite of obvious inconsistencies. A Greek of the classical period at least might speak of the sun as a revolving wheel and yet credit tales of the *Kýklopes* and the *Cheirogástores*, though logically the former should have forced him to identify the disk with the eye of a giant and the latter should have called up the image of a monster's circling hands. Of course, the further we are removed

Fig. 250.

from the exclusiveness of primitive religion, the easier it is to hold simultaneously ideas that in their origin were incompatible. For, as belief wanes, convictions become views, and views pass into a

An Assyrian obelisk shows two hands issuing from a solar disk, the right hand open, the left holding a bow (Count Goblet d'Alviella *The Migration of Symbols* London 1894 p. 26, after G. Rawlinson *The Five Great Monarchies of the Ancient Eastern World*² London 1879 ii. 233).

mere succession of pictures or metaphors. A *fin-de-siècle* poet opens his *Sunset in the City* with the lines—

Above the town a monstrous wheel is turning,
With glowing spokes of red,
Low in the west its fiery axle burning¹—

but at a distance of half a dozen pages changes the scene—

The sun has shut his golden eye
And gone to sleep beneath the sky²—

while elsewhere in the same little volume he prefers to speak of the sunbeams as—

the curious fingers of the day³.

vii. The Kyklops and Zeus.

But, to return to the Greeks, we have next to enquire in what relation the Kyklopes, whether eastern or western, stood towards Zeus. So far as the eastern Kyklopes are concerned, the evidence is of the scantiest. The scholiast on Euripides, probably confusing the many-armed with the one-eyed Kyklopes, states that the former, the *Encheirogástores*, fashioned the thunderbolt for Zeus⁴. And the Platonic Aristophanes in his whimsical narrative tells how certain wheel-shaped and quasi-human beings, who might have been, but are not, called *Cheirogástores*, made an attack upon Zeus and the other gods⁵. Clearly no conclusion can be based on such premises. At most it may be said in quite general terms that the *Cheirogástores* belong to the same category as the *Titánes*. They are, that is, elder and unsuccessful rivals of Zeus.

In dealing with their western compeers, the Kyklopes *par excellence*, we are on firmer ground. Hesiod speaks of the Kyklopes that made the thunder and the thunder-bolt for Zeus as 'like the gods⁶'. And the names that he gives them⁷—*Bróntes*, *Sterópes*, *Árges*—are all but identical with sundry titles of Zeus, namely

¹ R. Le Gallienne *English Poems*⁴ London 1895 p. 89.

² *Id. ib.* p. 83.

³ *Id. ib.* p. 18. Mr Owen Seaman in *The Battle of the Bays* London 1896 p. 39 has an altogether delightful parody entitled 'An Ode to Spring in the Metropolis. (After R. Le G.),' in which occurs the following allusion to our metaphor: 'And O the sun! | See, see, he shakes | His big red hands at me in wanton fun! | A glorious image that! it might be Blake's, | Or even Crackanthurpe's!'

⁴ Schol. Eur. *Or.* 965, *supra* p. 309 n. 5.

⁶ *Supra* p. 314.

⁷ *Ibid.*

Brontôn, 'the Thundering'¹, *steropegérta*, 'the lightning-gatherer'², *argés*, 'the brilliant'³. Again, the Kyklopes not only made the thunder and lightning of Zeus, but could on occasion wield his weapons on their own behalf. The late epic of Nonnos describes in bombastic style how *Arglîpos*, *Sterôpes*, and *Brôntes* fought on the side of the gods against the Indians :

The stout Kyklopes circled round the foe,
 Helpers of Zeus. Above that murky throng
 Argilipos was flashing as he swung
 A radiant brand and, armed with cthonian bolt
 Fire-tipped, took torches for the fray. Thereat
 Quaked the dark Indians, mazed at such a flame
 That matchèd the fiery whirl-wind from the sky.
 He, blazing, led the way: 'gainst hostile heads
 Sparks from his earth-born thunderbolt were shot.
 Ash spears he beat and many a blade, that Kyklops,
 Swaying his hot shafts and his burning pike,
 A brand his dart, and, man on man destroying,
 Still scorched the Indians with his archer flame.
 [Not one Salmoneus only he convicted
 Of bastard bolts, not one god's-enemy
 Alone he slew, nor only one Euadne
 Made moan for Kapaneus extinguished there.]

Steropes next had armed him and was wielding
 A mimic blaze, a gleam that echoed back
 The lightning of the sky, both flash and fade,
 Sprung into being from the western flame,
 Seed of Sicilian fire and glowing hearth.
 A cloud-like robe he wore, within whose fold
 He hid his sheen and then the same revealed
 With double quivering, like the light of heaven;
 For lightning's gleam now goes, now comes again.

Then Brontes went a-warring and beat out
 A song sonorous, while he bellowed back
 The clappings of the thunder and with spray
 Unwonted, made of earth-born snow, shed water
 False-fashioned, little-lasting, from the sky—
 He and his drops, a bastard, cloudless Zeus.

But Zeus the Father marked the Kyklops aping
 His own fell din and laughed amid his clouds⁴.

On terra-cotta brasiers of Hellenistic date there is often stamped a grotesque bearded head, sometimes wearing a pointed cap and

accompanied by a thunderbolt or thunderbolts¹ (figs. 251—253). W. H. Roscher² follows A. Furtwängler in regarding this type as that of the Kyklops. If they are right—and Furtwängler's arguments are plausible³—, we have here monumental evidence of the Kyklops conceived as the owner of the thunderbolt.

Again, a connexion of some sort between the Kyklops and Zeus is implied by the myth of Geraistos. Minos, after the death of Androgeos went to war with Athens, the direct or indirect cause of his bereavement. When the war dragged on and he failed to capture the town, he prayed to Zeus that he might be avenged on the Athenians. Thereupon famine and pestilence befell them, and, at the advice of an ancient oracle, they first slew the daughters of the Lacedaemonian Hyakinthos on the tomb of Geraistos the

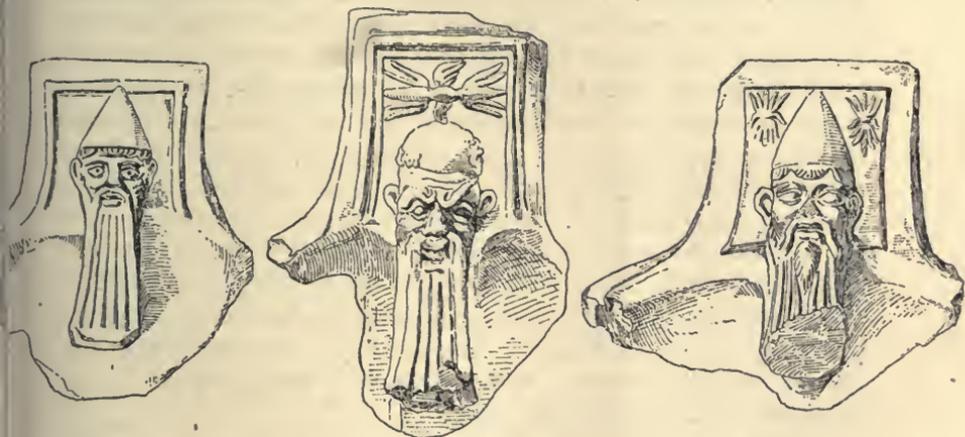

Fig. 251.

Fig. 252.

Fig. 253.

Kyklops (or the son of the Kyklops). This proved unavailing; and they had in the end to listen to Minos' demand of seven youths and seven maidens as food for the Minotaur⁴. But Geraistos, the eponym of the village and promontory in Euboea⁵, who is presumably to be identified with the Geraistos of the Athenian myth, is said to have been the son of Zeus⁶. Thus either Geraistos the

⁴ Apollod. 3. 15. 8 ἐπὶ τὸν Γεραίστου τοῦ Κύκλωπος τάφον κατέσφαξαν, cp. Steph. Byz. s.v. Λουσία, Harpokr. and Soud. s.v. Ἰακινθίδες, Hyg. fab. 238.

⁵ *Supra* p. 156 n. 6, Append. B Euboeia.

⁶ Steph. Byz. s.v. Γεραίστος, Ταίναρος.

Kyklops was the son of Zeus; or Geraistos was, according to some, the son of the Kyklops, according to others, the son of Zeus. Both inferences presuppose that the Kyklops was somehow related to Zeus.

Lastly, T. Panofka¹ and W. Grimm² long since pointed out that the three-eyed Kyklops of Sicily bears a striking resemblance to an extremely archaic statue of Zeus with three eyes seen by Pausanias on the Argive Larisa³. M. Mayer⁴ arrived independently at a similar conclusion. He holds that the original Kyklops was one with the three-eyed Zeus of Argos, who in turn is strictly comparable with other three-eyed figures in Greek mythology in particular with the three-eyed Argos *Panóptes*⁵, with the three-eyed guide of the Herakleidai⁶, and with the various heroes named Triops or Triopas⁷. On this showing, then, the three-eyed Kyklops is but another form of the three-eyed Zeus. When, however, M. Mayer over the section of his work devoted to this question prints the words 'Zeus Kyklops⁸', he is going too far. Polyphemos, it is true, boasts that the Kyklopes care nothing for Zeus, deeming themselves superior to the gods, and that he, the speaker, would not refrain from laying hands on Odysseus through any fear of incurring Zeus' enmity⁹. But nowhere in Greek literature do we get a definite identification of the Kyklops with Zeus. The nearest approach to it is Nonnos' description of the Kyklops Brontes as 'a bastard Zeus¹⁰.' Rather, we must suppose that the Kyklops was originally a sky-god like Zeus, his round eye being the sun and his weapon the thunderbolt. He was, in fact, analogous to, but not identical with, the Hellenic god.

It is not at present possible to determine the race to which this

⁹ *Od.* 9. 275 ff. Dr W. W. Merry *ad loc.*, taking a hint from the scholiast, observes: 'This is inconsistent with what the Cyclopes acknowledged about the power of Zeus, inf. 410; and with Polyphemus' boast that Poseidon was his father.' D. Muelder 'Das Kyklopedgedicht der Odyssee' in *Hermes* 1903 xxxviii. 431 ff. draws attention to the similar inconsistencies of *Od.* 9. 107, 111, 358. *Eur. Cycl.* 320 f. *Ζηνὸς δ' ἐγὼ κεραυνὸν οὐ φέρσω, ξέμε, | οὐδ' οἶδ' ὅ τι Ζεὺς ἐστ' ἐμοῦ κρείσσων θεός* is following the Homeric passage.

¹⁰ *Supra* p. 318.

one-eyed sun-god properly belonged¹. Precisely similar figures are to be met with in Celtic² and Germanic³ mythology—a fact which is suggestive of a remote origin in the past. Moreover, in the Celtic area at least the one-eyed giant is regularly black-skinned⁴. Does this point to his connexion with a melanochrous race?

viii. The Blinding of the Kyklops' Eye.

Polyphemos' claim that the Kyklopes were 'much superior' to the gods has in one respect been substantiated. For Zeus, as we have seen, lives no longer in the mind of the modern peasant, whereas far and wide through southern and central Europe folk-tales still tell the old story of the Kyklops and his lawless deeds. In Appendix E I have collected a number of such tales, and shall here say something by way of comment upon them.

A constant feature of the Kyklops-*Märchen* is the boring out of the giant's eye by means of a red-hot stake. This incident is repeated in a variety of slightly differing forms: we hear of a sharp

¹ According to the schol. Eur. *Or.* 965 the Kyklopes, a Thracian tribe (cp. Aristot. *mir. ausc.* 121) named after its king Kyklops, were driven from their land by war and settled in various parts, most of them in Kouretis: from Kouretis they came to help Proitos and built the walls of Tiryns for him, those of Argos for Akrisios. Lobeck *Aglaophamus* ii. 1132 note d identified this Kouretis with Euboia, where there are other traces of the Kyklopes (*supra* p. 319 f., Istros *ap.* schol. *Il.* 10. 439). Maass in *Hermes* 1889 xxiv. 644 f. thinks that colonists from Chalkis in Euboia brought the Kyklops-myth to Chalkidike, arguing that the mother of Polyphemos, *vis.* Thoösa daughter of Phorkys (*Od.* 1. 71 f.), who according to one account seems to have lived on the coast of Euboia (Lyk. *Al.* 376 Φόρκυνος οικητήριον), was a nymph of Mt. Athos (Θόωσα from *Θόωσ = 'Athōs). W. H. Roscher *Lex. Myth.* ii. 1689, 47 ff. further observes that the Sicilian Kyklopes are located in the Chalcidian colonies Naxos and Leontinoi (Strab. 20, Eustath. *in Od.* pp. 1618, 2, 1644, 42). But these combinations, however ingenious, are altogether too speculative.

Timaios *frag.* 37 (*Frag. hist. Gr.* i. 200 Müller) *ap. et. mag.* p. 220, 5 f. states that Galatia took its name from Galates, son of Kyklops and Galatia. Appian. *Ilyr.* 1 says that Polyphemos the Kyklops had by Galateia three sons, Keltos, Illyrios, and Galas, who ruled over the Keltai, Illyrioi and Galatai respectively.

Io. Malal. *chron.* 5 p. 114 Dindorf asserts that Sikanos, king of Sicily, had three sons, Kyklops, Antiphantes (*sic*), and Polyphemos, who divided the land between them.

² E.g. Balor (H. D'Arbois de Jubainville *Le cycle mythologique irlandais et la mythologie celtique* Paris 1884 p. 208 ff., J. Curtin *Hero-Tales of Ireland* Boston 1894 p. 283 ff., C. Squire *The Mythology of the British Islands* London, Glasgow and Dublin 1905 pp. 48 f., 112 f., 238 f., J. A. MacCulloch *The Religion of the Ancient Celts* Edinburgh 1911 pp. 59, 89), Searbhan Lochlannach (*Folk-Lore* 1906 xvii. 438 ff.), or the giants and ogres of France (P. Sébillot *Le Folk-Lore de France* Paris 1904 i. 37, 272, 295, 434 f., 1903 ii. 125).

³ E. H. Meyer *Germanische Mythologie* Berlin 1891 Index p. 312 *s.v.* Einäugigkeit, J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1888 iv. 1440.

⁴ Append. E. J. Grimm *op. cit.* ii. 516 n. 2 speaks of 'sooty Cyclops' on the strength of Kallim. *h. Artem.* 66 ff.

322 The Blinding of the Kyklops' Eye

red-hot pole (Athens), of a sharp piece of wood (Servia), of red-hot spits (France, Abruzzo, Zakynthos, Kappodokia, Kypros, Sindbad), of a red-hot iron (Harz Mountains, Finland), of a red-hot poker (Érice), of a red-hot knife (Oghuzians), of a stabbing in the eye (Carelia, Yorkshire), or of a molten mass poured in the eyes (Dolopathos, Roumania, Esthonia).

The oldest obtainable version of the story is of course the Kyklops-myth of the *Odyssey*, which in its present shape must be placed at least as early as the year 800 B.C.¹ and in its original form goes back doubtless some centuries further. D. Muelder, after a minute and painstaking criticism of the myth, sets aside all later accretions and interpolations and prints what he conceives to have been the primitive Kyklops-poem². In this the episode of the red-hot stake is of fundamental importance. The passage, as reconstituted by Muelder, runs thus:

This to my thinking seemed the best advice.
Beside the fold the Kyklops' great club lay
Of olive-wood yet green, which he had felled
To bear when dry. We, looking on the same,
Likened its size to the mast of a black ship,
Some merchantman broad-beamed and twenty-oared
That gets to harbour far across the main,
So huge its length, so huge its girth to view.
Therefrom I, standing close, cut off a fathom,
Gave to my men, and bade them fine it down.
They smoothed it: I stood by and pointed it,
And took and turned it in the blazing fire.
Then 'neath the heap of embers I thrust in
The bar to heat it; and my comrades all
I heartened, lest in terror they should fail me.
But, when the olive-bar was like to catch,
Green as it was, and glowed with dreadful light,
I fetched it from the fire, while they stood round.
And some god breathed great courage into us.
They took the olive-bar, so sharp at the point,
And full in his eyeball plunged it. I uplifted
Twirled it above, as a man drills with a drill
A timber for ship-building, while below
His fellows spin their strap and hold amain
Its either end, and still the drill runs on.
Just so we took the fiery-pointed bar,
And twirled it in his eye: the blood flowed round
Its hot end, and the blast singed all about
His lids and eyebrows, as the ball was burnt

¹ A. and M. Croiset *Histoire de la littérature grecque*² Paris 1896 i. 402, W. Christ *Geschichte der griechischen Literatur*³ München 1908 i. 62.

² D. Muelder 'Das Kyklopengedicht der Odyssee' in *Hermes* 1903 xxxviii. 414—455.

Till even its roots were crackling in the fire.
 And, as a man that is a coppersmith
 Dips a great axe or adze all hissing hot .
 In water cold to temper it, for this
 Is the strength of steel, so hissed the Kyklops' eye
 About that bar of olive; and he groaned
 A ghastly groan—yea, round us rang the rock—
 And we in a panic fled, while he from his eye
 Plucked out the bar bedabbled with much blood¹.

Now, if we have been right in supposing, with W. Grimm and A. Kuhn², that the single eye of the Kyklops was an early representation of the sun in the sky, it remains to enquire what was the original significance of this rather gruesome scene? Why should the hero thrust a sharp stake into the solar eye? And why is that stake regularly described as being red-hot?

ix. Prometheus' Theft of Fire.

An answer to these questions would hardly have been forthcoming—since even in the *Odyssey* the incident has been already worked over and incorporated into a wonder-voyage—had it not been for the fortunate preservation of a more or less parallel myth, that of Prometheus. He is said to have stolen fire from Zeus 'in a hollow fennel-stalk³'—an expression cleared up by J. T. Bent, who, writing of the Greek islands, says: 'One can understand the idea well: a peasant to-day who wishes to carry a light from one house to another will put it into one of these reeds to prevent its being blown out⁴.' As to the manner in which Prometheus obtained the

¹ *Od.* 9. 318—328, 375—397.

³ *Hes. theog.* 565 ff., *o. d.* 50 ff. ἐν κοίλῳ νάρθηκι, *Plin. nat. hist.* 7. 178 ignem...adserve ferula Prometheus, *Hyg. poet. astr.* 2. 15 devenit ad Iovis ignem; quo deminuto et in ferulam coniecto, etc., *fab.* 144 Prometheus in ferula detulit in terras, *interp. Serv. in Verg. ecl.* 6. 42 ferula ignem de caelo subripuisse, *Acron in Hor. od.* 2. 13. 37 raptor per ferulam ignis divini.

⁴ J. T. Bent *The Cyclades* London 1885 p. 365. *Id. ib.*: 'In Lesbos this reed is still called νάρθηκα (νάρθηξ).' *Id.* in the *Journ. Anthropol. Inst.* 1885—6 xv. 401 (in Karpathos) 'If a woman wishes to carry a light from one house to the other she puts it into a reed, which here alone have I heard termed νάρθηκα or νάρθηξ, the same word and the same use for the reed which mythology teaches us Prometheus employed when he brought down fire from heaven.' The same custom is found in Kypros, according to Sittl on *Hes. theog.* 567, cited by E. E. Sikes in his ed. of *Aisch. P. v.* p. xvii n. 1, where a further reference is given to Miss M. H. Kingsley *Travels in West Africa* London 1897 p. 600: 'In most domesticated tribes, like the Effiks or the Igalwa, if they are going out to their plantation, they will enclose a live stick in a hollow piece of a certain sort of wood, which has a lining of its interior pith left in it, and they will carry this "fire box" with them.' The schol. *Hes. theog.* 565 and Proklos in *Hes. o. d.* 52 observe that the νάρθηξ, having a soft pith, will keep a fire smouldering within it; and *Plin. nat. hist.* 13. 126 says that

stolen fire, different accounts were current in antiquity. Aischylos possibly, and Accius certainly, represented the fire as stolen from Mount Mosychloś, a wooded volcano in Lemnos now submerged by the sea¹. Platon supposes that Prometheus stole it from 'the common abode of Athena and Hephaistos²', in fact from the celestial Erechtheion, where presumably, as in its terrestrial counterpart, a perpetual fire was kept burning. Platon, however, is philosophising, and an obviously older explanation is given by Servius³:

'It is said that Prometheus, when he had made mankind, ascended by the help of Minerva into the sky, and, applying a small torch to the wheel of the sun, stole fire, which he showed to men.'

An anonymous mythographer of the ninth or tenth century, plausibly identified by Angelo Mai with a certain Leontius mentioned in J. Brassicanus' commentary on Petronius⁴, expands this meagre statement:

'Prometheus was helped by Minerva; and about him the following tale is composed. Prometheus made man out of clay, and moulded him without life or feelings. Minerva, admiring Prometheus' handywork, promised him whatever heavenly gift he would to help him with his work. He said that he did not know at all what good things there were in heaven, but asked whether it was possible for the goddess to raise him to the gods above, in order that he might see with his own eyes and choose what suited his work. So Minerva placed him on her shield and took him to the sky. When he saw there the heavenly bodies animated and invigorated by their flaming heat, he secretly applied a reed to the wheel of Phoebus and stole the fire, which he applied to the breast of man, thereby making his body alive⁵.'

Egyptian *ferulae* are best for the purpose. See further Frazer *Golden Bough*³: The Magic Art ii. 260, who notes that Bent is mistaken in calling the *νάρθηξ* or 'giant fennel' a reed.

⁵ Myth. Vat. 3. 10. 9 clanculum ferulam rotae Phoebi applicans, but later *ib.* a sole faculam accendit. This version of the myth, which occurs with some slight variations also in Myth. Vat. 2. 63 Phoebiacis rotis applicans faculam, can be traced back to Fulgent. 2. 9 clam ferulam Phoebiacis adplicans rotis, *i.e.* to a date c. 480—550 A.D. For the reed cp. a Zakynthian tale *infra* ch. ii. § 3 (c).

x. The Fire-drill in relation to Prometheus,
the Kyklops, and Zeus.

A. Kuhn in his remarkable study on *The Descent of Fire* has made it probable, not to say certain, that this myth of Prometheus thrusting a torch into the solar wheel rests upon the actual custom of obtaining fire by the use of a fire-drill¹. If so, Diodoros was not far wrong when he wrote:

'Prometheus son of Iapetos is said by some mythographers to have stolen fire from the gods and given it to men; but in truth he was the inventor of the fire-sticks, from which fire is kindled².'

The fire-drill, an instrument employed by primitive or backward tribes all the world over³, consists essentially of two sticks, the one vertical, the other horizontal. The former is commonly made of harder wood and regarded as male, the latter of softer wood and regarded as female, the production of fire between them being spoken of as a sexual act. The Rev. J. G. Wood states that the fire-drill may be seen any day in South Africa:

'The operator lays one stick on the ground, and holds it down with his feet, while he places the pointed end of the other stick upon it. This second stick is mostly of harder wood than the first. He then twirls the upright stick between his palms, pressing it slightly downwards, and in a short time he works a small conical hole. Presently, the sides of the hole begin to darken, and a quantity of fine dust falls into it. By the continuous friction so much heat is evolved that the sides of the hole become black, the dust becomes red hot, and, when blown upon, bursts into an evanescent flame. A little fine and very dry grass is then carefully laid upon it, and the blowing continued until the grass takes fire. It is then covered with small dry sticks, and those again with larger, until a good fire is made⁴.'

My illustration (fig. 254) shows a couple of fire-sticks of this sort obtained for me from a Mutoro of Central Africa by my brother-in-law the Rev. H. E. Maddox: three holes have already been drilled in the under stick and a fourth has been commenced. Sometimes the

Sarauw *Le feu et son emploi dans le Nord de l'Europe aux temps préhistoriques et protohistoriques* Gent 1907 (extr. from the Annales du xx. Congrès archéol. et histor. de Belgique i. 196—226).

⁴ Rev. J. G. Wood *op. cit.* p. 415.

upper stick is made to rotate by means of a cord or strap. Thus the Rev. J. Stevenson describes the Brahman's method of getting fire from wood:

'It consists in drilling one piece of arafi-wood into another by pulling a string tied to it with a jerk with the one hand, while the other is slackened, and so on alternately till the wood takes fire. The fire is received on cotton or flax held in the hand of an assistant Brahman¹.'

This type of fire-drill has survived as a toy among the Swiss in the canton of Neuchatel², and as an implement of every-day use among the Eskimo and the inhabitants of the Aleutian Isles (fig. 255)³. Further modifications are occasionally introduced, such as the employment of a bow instead of a strap, or the weighting of the

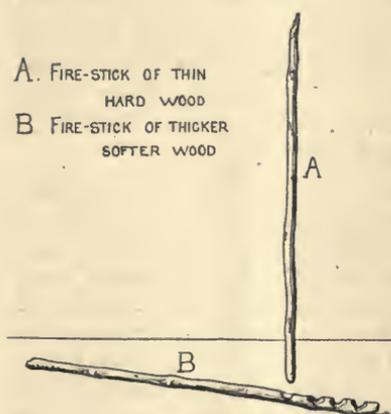

Fig. 254.

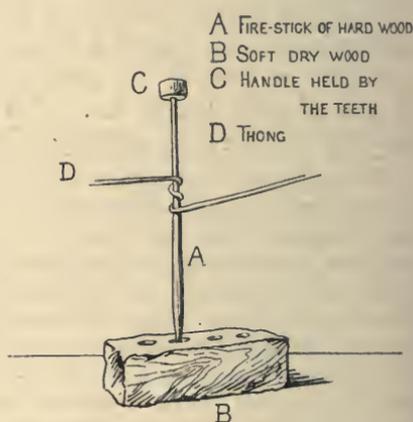

Fig. 255.

spindle with a heavy disk: the former may be seen in a Dacotah fire-drill (fig. 256)⁴, the latter in an ingenious self-winding apparatus used by the Iroquois Indians (fig. 257)⁵. This Iroquois drill bears some resemblance to an eye pierced with a stake. And primitive folk are quick to catch at quasi-human features. Thus Dr Frazer reports that the fire-boards of the Chuckchees in the north-east extremity of Asia

¹ J. Stevenson *Translation of the Sanhitā of the Sāma Veda* London 1842 p. vii f. Cp. W. Crooke *Things Indian* London 1906 p. 209 on the fire-drill as used by the Brahman fire-priests or *Agnihotri*. A full account of their procedure is given by Frazer *Golden Bough*³: The Magic Art ii. 248 ff.

⁴ J. G. Wood *op. cit.* p. 419, cp. E. B. Tylor *op. cit.*³ p. 243.

⁵ J. G. Wood *op. cit.* pp. 420, 422, cp. E. B. Tylor *op. cit.*³ p. 244 f.

'are roughly carved in human form and personified, almost deified, as the supernatural guardians of the reindeer. The holes made by drilling in the board are deemed the eyes of the figure and the squeaking noise produced by the friction of the fire-drill in the hole is thought to be its voice. At every sacrifice the mouth of the figure is greased with tallow or with the marrow of bones¹.'

Now, if uncivilised people can regard the fire-stick in its hole as turned about in the eye of a voracious and supernatural herdsman, who squeaks at the process, it becomes—I think—credible that the myth of Odysseus plunging his heated bar into the *Kyklops*' eye originated in a primitive story concerning the discovery of the same simple utensil. Is it a mere coincidence that the Homeric episode culminates in a simile drawn from a strap-drill²?

On this showing the hero of the *Kyklops*-adventure must have been originally a divine or semi-divine figure comparable with that

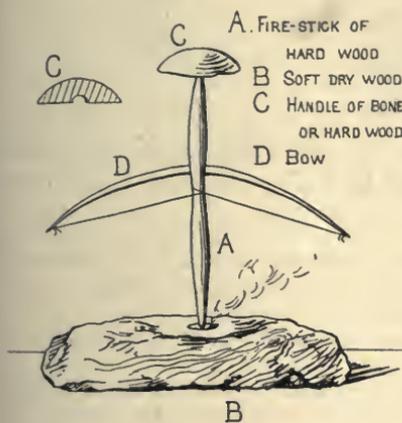

Fig. 256.

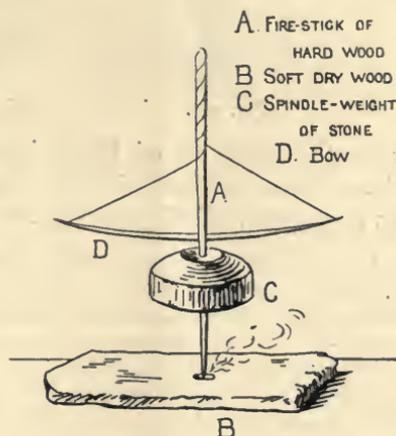

Fig. 257.

of Prometheus. Recently K. Bapp has sought to prove that *Prometheüs* was an appellative or cult-title of the Titan whose true name was Ithas or Ithax³. He relies on two glosses of Hesychios. One of these informs us that Ithas or Ithax was Prometheus the herald of the Titans⁴. The other enables us to connect the name with a verb meaning 'to be heated' (*ithatnesthai*)⁵. The root of this verb is *idh-*, the weak grade of *aidh-* from which *attho*, 'I burn,'

¹ Frazer *Golden Bough*³: The Magic Art ii. 225.

² *Supra* p. 322. Nonnos unconsciously hit the mark, when he described the *Kyklops*' blaze as 'Seed of Sicilian fire and glowing hearth' (*supra* p. 318).

³ K. Bapp in Roscher *Lex. Myth.* iii. 3034.

⁴ Hesych. s.v. 'Ιθάς· ὁ τῶν Τιτάνων κήρυξ Προμηθεύς. τινὲς Ἰθάξ.

⁵ Hesych. s.v. Ἰθαίεσθαι· θερμαίεσθαι, cp. s.v. Ἰθαίνεω· εὐφρονεῖν and Ἰθαρός, 'pure, clear.'

aithér, 'the burning sky,' etc. are formed¹. It thus appears that Prometheus was essentially a 'Fire'-god—a conclusion that suits well his relations to Hephaistos and the Kabeiroi². But his name Ithax can hardly be dissociated from Ithake³, the home of Odysseus *Ithakisios* or *Ithakos*⁴. In short, I suspect that behind Odysseus the hero stands an older and more divine personage akin to Prometheus the fire-god. It is surely significant that Odysseus, when pressed by Penelope on his return to declare his lineage, gives himself out as the grandson of the Cretan Minos and says *totidem verbis*:

My famous name is Aithon⁵.

Further, I would suggest that this is the reason why the art-type of Odysseus, e.g. on coppers of Ithake (fig. 258)⁶, is indistinguishable

Fig. 258.

Fig. 259.

Fig. 260.

from the art-type of Hephaistos, e.g. on coppers of Methana (fig. 259)⁷, and virtually identical with that of the bearded Kabeiros⁸, e.g. on coppers of Birytos (fig. 260)⁹.

¹ On this point our philological authorities are unanimous; see L. Meyer *Handb. d. gr. Etym.* ii. 47 and Prellwitz *Etym. Wörterb. d. Gr. Spr.*² p. 194 s.v. *ἰθαρός*, Boisacq *Dict. étym. de la Langue Gr.* p. 23 s.v. *αἰθήρ, αἴθω*.

² Hyg. *fab.* 31 gives the name of Prometheus' eagle as Aithon (cp. *Il.* 15. 690).

³ Roscher *Lex. Myth.* iii. 3040 f.

⁴ Akousileos *frag.* 30 (*Frag. hist. Gr.* i. 103 Müller) ap. schol. *Od.* 17. 207 states that Ithake was named after Ithakos—*Ἰπερελάου παῖδες Ἰθακος καὶ Χήριτος, ἀπὸ Διὸς ἔχοντες τὸ γένος, φέρον τὴν Κεφαλληνίαν. κ.τ.λ.* Cp. Eustath. *in Il.* p. 307, 8, *in Od.* p. 1815, 44 ff., Steph. Byz. s.v. *Ἰθάκη, et. mag.* p. 470, 7 f.

⁵ Steph. Byz. s.v. *Ἰθάκη*... *Ἰθακος Ὀδυσσεύς ὁμοφώνως τῷ οἰκιστῇ*, Eustath. *in Il.* p. 307, 9 f. So Eur. *Cycl.* 103 *Ἰθακος Ὀδυσσεύς*, cp. Aristoph. *vesp.* 185 *Ἰθακος Ἀποδρασιππίδου*.

⁶ *Od.* 19. 183 *ἐμοὶ δ' ὄνομα κλυτὸν Αἴθων*, cp. Lyk. *Al.* 432 with Tzet. *ad loc.*, Eustath. *in Od.* p. 1861, 36 ff. F. F. Zielinski in *Philologus* 1891 l. 146 ff. argues that Odysseus assumed the name *Αἴθων* because his mother Antikleia, daughter of Autolykos and Mestra (Ov. *met.* 8. 738), was granddaughter of Mestra's father Aithon (Nik. *ap. Ant. Lib.* 17) son of Helios (Soud. s.v. *Αἴθων*): see Pauly—Wissowa *Real-Enc.* i. 1106. It has been conjectured that Achaïos' satyric drama *Aithon* (*Trag. Gr. frag.* p. 747 ff. Nauck²) had reference to Odysseus: but?

Other points of resemblance between the hero of the Kyklops-tale, Prometheus, and

The Sanskrit word for 'fire-drill' is *pramantha*, and persistent attempts have been made to bring the name *Prometheus* into connexion with it¹. Strictly speaking, however, we cannot regard *Prometheus* as the phonetic equivalent of *pramantha*²; and it is only by invoking the uncertain aid of popular etymology that we are enabled to set the two side by side³. On the other hand, it is highly probable⁴ that *pramantha* the 'fire-drill' does explain

the Kabeiros are not lacking. Several versions of the Kyklops-tale make the giant give the hero a ring that binds him to the spot etc. (Append. E Abruzzo, Dolopathos, Oghuzians, Roumania). Zeus, when he fastened Prometheus to Mt. Kaukasos, swore never to release him from his chains; but, on being warned by Prometheus not to marry Tethys, lest he should beget a son to dethrone him as he had himself dethroned Kronos, he did out of gratitude release Prometheus, and, to keep his oath, gave him a ring to wear fashioned out of his chains, in which was set a stone from Mt. Kaukasos (interp. Serv. in Verg. ecl. 6. 42, cp. Hyg. poet. astr. 2. 15, Plin. nat. hist. 37. 2, Isidor. orig. 19. 32. 1). Aisch. frags. 202, 235 Nauck² ap. Athen. 674 D appears to have given Prometheus a garland instead of a ring. An Etruscan mirror shows him wearing a willow(?)-wreath and presented by Herakles and Kastor with two rings (Gerhard Etr. Spiegel iii. 131 pl. 138, Roscher Lex. Myth. iii. 3094 f. fig. 5 b). On the rings of the Kabeiroi see *supra* p. 108 f.

Again, Prometheus, like the Kabeiros (*supra* p. 108 ff.), was an axe-bearer (*infra* ch. ii § 9 (h) ii (η)); and K. Bapp in Roscher Lex. Myth. iii. 3041 acutely compares Axiothea the name of his wife (Tzetz. in Lyk. Al. 1283) with the Cabiric names Axieros, Axiokersa, Axiokersos (*supra* p. 109). Odysseus' wife too is famous for her ordeal of the 'axes' (*Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 194, *infra* ch. ii § 3 (c) i (χ)).

Pott in the *Zeitschrift für vergleichende Sprachforschung* 1860 ix. 189 f., cp. *ib.* 1857 vi. 104, A. Kaegi *The Rigveda* trans. R. Arrowsmith Boston 1886 p. 132 n. 121, E. W. Hopkins *The Religions of India* Boston etc. 1895 pp. 107, 168.

Miss J. E. Harrison has kindly drawn my attention to W. Schultz 'Das Hakenkreuz als Grundzeichen des westsemitischen Alphabets' in *Memnon* 1909 iii. 175 ff. This ingenious, but over-venturesome, writer attempts to connect Prometheus as inventor of the fire-drill with Prometheus as inventor of the alphabet, the link being the *swastika*.

² J. Schmidt *Zur Geschichte des indogermanischen Vocalismus* Weimar 1871 i. 118, A. A. Macdonell *Vedic Mythology* Strassburg 1897 p. 91.

³ *E.g.* by assuming that Prometheus' name was originally Προμανθεός or *Προμηθεός, 'He of the fire-drill,' and that it was distorted into Προμηθεός to suit the supposed connexion with προμήθεια, 'fore-thought.'

⁴ *Pramantha*, the 'fire-drill,' can hardly be separated from *Pramanthu*, the younger brother of *Manthu* and son of *Vira-vrata*, the son of *Madhu* and *Sumanas* (Sir M. Monier-Williams *A Sanskrit-English Dictionary* new ed. Oxford 1899 pp. 685, 1006), who is mentioned in the *Bhāgavata Purāna*. My friend Prof. E. J. Rapson writes to me: 'The names Manthu and Pramanthu occur in a long genealogy of one Priyavrata, a kingly sage, but none of their achievements are recorded. It is quite possible that they may occur elsewhere in the Purānas, but at present I have failed to find them mentioned anywhere else. They belong to a class not of deities, but of mighty men of old who as kings and priests became almost gods on earth.' It is certainly tempting to suppose that the brothers *Pramanthu* and *Manthu* correspond with the brothers *Prometheus* and *Epimetheus*; but evidence is lacking.

Promantheús, a title under which Zeus was worshipped at Thourioi¹. Lykophron mentions him in juxtaposition with Zeus *Aithlops Gyrapios* of Chios²—a combination that strengthens his claim to be considered a god 'of the Fire-drill.' Dr Frazer has cited examples from south-west Africa (the Herero) and north-east Asia (the Koryaks and Chuckchees) of the male fire-stick or fire-board being identified with an ancestor, addressed as 'Father,' and venerated as the supernatural guardian of the hearth and home³. He has further suggested a like origin for the association of Iupiter with Vesta in Italian religion⁴. It is not, therefore, difficult to believe that at Thourioi, a Greek colony in south Italy, analogous ideas expressed themselves in a cult of Zeus⁵.

xi. The Solar Wheel combined with Animals.

From the vantage-ground gained in preceding sections we can explain a whole series of bronzes found by Messrs Saltzmann and Biliotti at Kameiros and now in the British Museum. The graves

¹ *Supra* p. 289 f. A. F. Pott in the *Zeitschrift für vergleichende Sprachforschung* 1857 vi. 103 connected Προμανθεús with μανθάνω and A. Kuhn *Die Herabkunft des Feuers und des Göttertranks*¹ Gütersloh 1858 p. 17, *ib.*² Gütersloh 1886 p. 18, associated both words with *pramantha*.

K. Bapp in *Roscher Lex. Myth.* iii. 3034 f., following Gerhard *Gr. Myth.* p. 97, would read Προμηθεús for Προμανθεús in Lyk. *Al.* 537 and recognise a Zeus Προμηθεús at Thourioi. But the 'early variant' on which he relies is merely a bad reading in Tzetzes' note *ad loc.* (προμαθεús: ed. Müller i. 97 f., 674 'fors. rectius'), not even recorded by E. Scheer (ii. 191).

² *Supra* p. 289 f.

³ Frazer *Golden Bough*³: The Magic Art ii. 222 ff.

⁴ *Id. ib.* ii. 227 ff. On the similar coupling of Zeus ~ Hestia see *infra* ch. iii § 1 (a) ix (a). Note also the Pythagorean identification of the ἐστία τοῦ παντός with the Διὸς οἶκος (*supra* p. 303 n. 6).

⁵ The name Προμανθεús recalls 'Ραδάμανθος (Aeolic Βραδάμανθος for Φραδάμανθος), which might be explained as the 'Rod-twirler,' a compound of the digammated root of ῥάδαμος, ῥάδιξ, ῥάδιος, ῥάδιξ (L. Meyer *Handb. d. gr. Etym.* i. 563, iv. 471 ff., Prellwitz *Etym. Wörterb. d. Gr. Spr.*² p. 393 f., Walde *Lat. etym. Wörterb.* p. 513 f.) and of the root that appears in Sanskrit as *math* or *manth*, 'to stir or whirl about' (Sir M. Monier-Williams *op. cit.* p. 777). A. Kuhn in the *Zeitschrift für vergleichende Sprachforschung* 1855 iv. 90, 123 f. long since anticipated this derivation, but took the Rod-twirler ('*Gertenschwinger*') to be Rhadamanthys as judge of the dead. Certainly in that capacity he had a ῥάβδος (Plat. *Gorg.* 526 c) or σκήπτρον (*Inscr. Gr. Sic. It.* no. 1389 i 47); and Miss J. E. Harrison reminds me of Pind. *Ol.* 9. 33 οὐδ' Ἄϊδας ἀκινήταν ἔχε ῥάβδον (see her *Proleg. Gr. Rel.*² p. 45). Yet the second element in Rhadamanthys' name suits my interpretation better. If he was thus connected with the fire-drill, we can understand his genealogy as set forth by Kinaithon *frag.* 1 Kinkel *ap.* Paus. 8. 53-5 <ὤς> 'Ραδάμανθος μὲν Ἡφαίστου, Ἡφαιστος δὲ ἐπὶ Τάλω, Τάλων δὲ εἶναι Κρητὸς παῖδα. But further evidence *deest*.

from which these little objects came contained geometric pottery of the eighth and seventh centuries B.C. The bronzes themselves are in the form of a wheel with four, six, seven, eight, or nine spokes, from the centre of which rises a shaft supporting either a duck (fig. 263)¹ or the heads of two animals *adossés*. The animals thus combined are mostly goats (figs. 261, 262)², but cows³, rams⁴, and asses (?)⁵ also occur. In one case (fig. 261)⁶ the wheel has become a square base, but remains four-spoked. In another the central shaft terminates in a mere loop, no animals being added to it⁷. In yet another we have a rude human figure winged and mounted on

Fig. 261.

Fig. 262.

Fig. 263.

a similar wheel⁸. Since the principal cult of the early Rhodians was that of Helios⁹, it can hardly be doubted that the wheel represents the sun. And it is reasonable to conjecture that the

animals placed upon the solar wheel are in some sense devoted to Helios¹. If so, the absence of horses is noteworthy².

Fig. 264.

An early colony of the Rhodians was Rhode, the modern *Rosas*, in the north-east corner of Spain. It was founded, according to

¹ J. Déchelette 'Le culte du soleil aux temps préhistoriques' in the *Rev. Arch.* 1909 i. 305 ff., ii. 94 ff. and *Manuel d'archéologie* Paris 1910 ii. 1. 413 ff. claims to have discovered dozens of swans or ducks associated with the solar wheel in the art of the bronze age throughout Europe.

² *Supra* p. 180 n. 5.

Strabon¹, many years before the establishment of the Olympic festival (776 B.C.). In its neighbourhood therefore we might look to find a parallel for the Rhodian bronzes. In point of fact it was near Calaceite in the province of Teruel that a farm-labourer in 1903 discovered, along with a bronze cuirass and two iron swords, the remarkable bronze here shown (fig. 264)². It is a horse which stands on a wheel and bears on its back a column topped by a similar wheel, the whole being some 20 cm. in height. Column and wheels alike are decorated with *guilloche*-patterns. The former has a bell-shaped capital and base; the latter have smaller wheels serving as spokes. The body of the horse is connected with the wheel-base by means of a stay or support with spreading foot. This Iberian bronze may be referred to the 'Dipylon' or 'Villanova' period of the Early Iron Age, *i.e.* approximately to the same date as the Rhodian bronzes. Like them it represents an animal on the solar wheel, or rather in between a pair of solar wheels. We are well on the road towards the conception of the solar chariot.

xii. The Solar Chariot.

The transition from solar wheel to solar chariot was perhaps facilitated by a half-forgotten belief that the sun itself was a horse. That belief meets us in the mythologies of various Indo-European peoples³ and very possibly underlies the Greek practice of offering horses to Helios⁴. When the growth of anthromorphism made men no longer content to regard the sun either as a wheel or as a horse, it needed no great effort of imagination to combine both ideas and henceforward to believe in the driver of a celestial chariot⁵.

Hoernes *Natur- und Urgeschichte des Menschen* Wien und Leipzig 1909 ii. 476 f. fig. 206) and its Irish counterparts (R. A. Smith in the *Proceedings of the Society of Antiquaries of London* 1903 6—13 figs. 5—7).

horse (fig. 266)¹, more rarely a bird² or bull's head³ or lion⁴. Since the Delphic tripod is sometimes treated as a winged vehicle bearing Apollon across the sea⁵, it is conceivable that tripod-handles were assimilated to the sun. But neither of the band from Syros nor of the handles from Olympia can we say that they *must* be solar; they may be merely decorative. More to the point is the earliest type of Helios as a charioteer on Attic black-figured vases⁶ (figs. 267, 268)⁷. The god emerges from the sea with a team of two or four horses. But the only wheel visible is the disk above his head; and his horses turned inwards or outwards, as the

Fig. 267.

Fig. 268.

case may be, recall in effect the back-to-back arrangement of the Rhodian bronzes (figs. 261, 262)⁸.

¹ A. Furtwängler in *Olympia* iv. 72 ff. e.g. no. 574 pl. 30, no. 607 pl. 33, no. 624 pl. 30, no. 640 pl. 30, and the restorations pl. 34, c, d, e. I figure pl. 33, a.

⁶ *Supra* p. 226 f.

⁷ Fig. 104 = *supra* p. 226 n. 4: fig. 105 = *ib.* n. 5.

⁸ Doubtless the grouping of the horses is primarily due to the fact that the artist could not as yet correctly foreshorten his chariot: cp. the metopes from temple C at Selinous (Perrot—Chipiez *Hist. de l'Art* viii. 483 ff. fig. 245, Brunn—Brackmann *Denkm. der gr. und*

Later this type of Helios and his chariot came to be enclosed in the solar disk. A fine example is furnished by a silver-gilt plaque found in a tomb at Elis and acquired in 1906 by the British Museum (pl. xxiv, 1)¹. Its embossed design shows Helios with radiate head driving his horses up from the sea. His cloak is fastened with a big circular stud. A curved exergual line represents the horizon, and two plunging dolphins the sea. Nothing of the chariot is visible. But the whole disk with its shining concave surface and its divergent lines suggests the on-coming sun in a marvellously successful manner. A crescent of bronze (pl. xxiv, 2)² likewise embossed with acanthus-leaves, lotus-work, and two large lilies, equally well suggests the quiet moon. This latter plaque was found in another tomb at Elis along with a whole series of *phálara* or 'horse-trappings'; and such no doubt was the character of our solar disk also. Mr F. H. Marshall dates them all *c.* 300 B.C. These *phálara*, as L. Stephani pointed out, had an apotropæic value³. Indeed, they have it still. My brother-in-law Mr C. H. C. Visick, who owns a good collection of modern horse-amulets ('horses' money'), informs me that most of them are demonstrably derivatives of the sun or moon.

On a red-figured *kratér* from Apulia now at Vienna (fig. 269)⁴ the complete chariot appears surrounded by a rayed disk. The oval shape of this disk was determined by the turn of the horses to right and left, and can hardly have been meant to reproduce the optical illusion of the sun's orb flattened on the horizon. An interesting reminiscence of the solar wheel is the *swastika* on the

röm. Sculpt. pl. 287 a); many black-figured vases (Gerhard *Auserl. Vasenb.* i pls. 1; 2, 62, 2, 106, 6, P. Gardner *Cat. Vases Oxford* p. 6, no. 190 pl. 1, E. A. Gardner *Cat. 2. Lily-work etc., on a bronze crescent.

driver's breast¹. The addition of a thunderbolt to the left of the disk requires explanation². At first sight it is tempting to interpret the scene as that of Phaethon in his father's chariot struck by the bolt of Zeus. But, as T. Panofka long ago observed, this would ill suit the peaceful pose of the charioteer, who extends his hand in

Fig. 269.

greeting, not in terror. Rather we should recollect that two of the sun's steeds, according to the oldest tradition, were named *Bronté* and *Steropé*, 'Thunder' and 'Lightning'³. The sun-god has much in common with the thunder-god.

¹ On the derivation of the *swastika* from the solar wheel see T. Wilson *The Swastika* Washington 1896 *passim* (bibliography pp. 984—996) and recently J. Déchelette in the *Rev. Arch.* 1909 i. 314 ff. and *Manuel d'archéologie* Paris 1910 ii. i. 453 ff.

Miss J. E. Harrison kindly sends me the following criticism: 'I am open to conviction, but I cannot help thinking that the *swastika* precedes the solar wheel and simply represents the four points of the compass in motion. The four points seem to influence tribal arrangements among very primitive people at early stages—see Durkheim et Mauss *Année Sociologique* 1902 p. 1 and 34.'

² Panofka *loc. cit.* p. 305 f. cp. a vase from Apulia of like design and style then in the Betti collection at Naples.

C.

Zeus too was sometimes conceived as driving a chariot¹. But his chariot, in the Greek area at least², is regularly connected with storm³, not sunshine⁴. It cannot, therefore, be maintained that Zeus the charioteer was directly identified with the sun.

xiii. The Solar Wreath.

The first of May is kept as a day of jest and jollity by the modern Greeks. Parties go to picnic in plains and meadows, returning with sprays of the fragrant *protomaïd*. The young folk make wreaths of flowers and corn. These must be left hanging over the door of the house till May-day comes round again. They are then replaced by next year's garlands, and the withered relics are burnt⁵. I figure (pl. xxv) a wreath of the sort, which I obtained in 1901 at Eleusis, where it was hanging over the door of an inn. The inn-keeper told me that such wreaths are thrown on to the bonfire of Saint John the Baptist (June 24), and that the master of the house is expected to jump over the flames⁶. We have already

¹ First in *Il.* 8. 438 ff. *Zeus δὲ πατὴρ Ἴδθηεν ἐύτροχον ἄρμα καὶ ἵππων | Ὀδλυμπον δ' ἐδίωκε κ.τ.λ.*, cp. *Tib.* 4. 1. 130 f. This conception is utilised by *Plat. Phaedr.* 246 E ὁ μὲν δὴ μέγας ἡγεμῶν ἐν οὐρανῷ *Zeus* ἐλαύνων πτηνὸν ἄρμα πρῶτος πορεύεται διακοσμῶν πάντα καὶ ἐπιμελούμενος κ.τ.λ.

² The Persians, who called the whole circle of the sky 'Zeus' (*supra* p. 10 n. 1), had a chariot sacred to him. When Xerxes' army was on the march, this chariot went immediately in front of Xerxes himself (cp. *Longin. de sublim.* 3. 2 τὰ τοῦ Λεοντίου Γοργίου γελᾶται γράφοντος *Ξέρξης ὁ τῶν Περσῶν Ζεὺς*); it was drawn by eight white horses, and their driver followed them on foot, since no man might ascend the chariot-throne (*Hdt.* 7. 40, cp. 7. 55, 8. 115). When Kyros the elder went in procession from his palace, first came four fine bulls for sacrifice to Zeus etc.; then horses for sacrifice to the Sun; next a white chariot with a golden yoke, adorned with garlands, sacred to Zeus; after that the white chariot of the Sun similarly adorned; then a third chariot, the horses of which were spread with scarlet cloths; behind it a fire on a great hearth or portable altar; and lastly Kyros himself in his chariot (*Xen. Cyr.* 8. 3. 11 ff.). In the time of Alexander the Great it was the custom of the Persian kings to set out in procession at sunrise: first went the sacred eternal fire borne on silver altars; then the Magi chanting; after them 365 youths in scarlet cloaks; next a chariot sacred to Zeus, drawn by white horses and followed by a magnificent horse called the horse of the Sun—the leading horses being decked with gold rods and white cloths (*Curt.* 3. 3. 9 ff.). The sumptuous chariot of Darius iii is well shown in the great mosaic from Pompeii (*F. Winter Das Alexandermosaik aus Pompeji* Strassburg 1909 col. pl. 1, *J. Overbeck—A. Mau Pompeji*⁴ Leipzig 1884 p. 613 ff. with col. pl.). Note that the chariot of Zeus is throughout distinguished from the chariot of the Sun.

³ *Infra* ch. ii § 4 (c).

⁴ A copper coin of Alexandria struck by Trajan has for reverse type Zeus *Ammon* in a chariot drawn by two rams (*Brit. Mus. Cat. Coins Alexandria* pp. xl, 49 no. 405, *Head Hist. num.*² p. 862). This may be solar (*infra* ch. i § 6 (f) i).

⁶ See further *Miss M. Hamilton op. cit.* p. 157 ff.

338

May-garland of flowers and corn from Eleusis.

See page 338.

seen that Saint John's bonfire was in all probability a sun-charm¹. If so, the wreath burnt upon it may well have represented the sun itself—another case of the solar *apotrópaion* being fixed above the lintel².

Analogous customs are, of course, common throughout Europe. Here in Cambridge the children are out early on the first of May begging all and sundry to 'Remember the May Lady.' They carry garlands, which vary much in shape. The most complete form that I have come across consisted in two hoops set at right angles to each other and decorated with a branch of may: from the point of intersection dangled a doll (fig. 270, *a*). Other forms in use are a single hoop of flowers or coloured tags with crossed strings and a doll in the centre (fig. 270, *b*), a hoop without the cross and doll (fig. 270, *c*), a cross and doll without the hoop (fig. 270, *d*), a mere cross without hoop or doll (fig. 270, *e*). All alike are dubbed 'the May Lady.' The several shapes attest a progressive degradation (globe, wheel, hoop) and ultimate confusion with a different type (cross). Is it rash to conjecture that the May-garland once stood for the sun³, the doll in the flowery hoop being an effigy of the earth-goddess⁴ blossoming beneath his rays?

The wreath of *protomaîd* hung over the doorway in modern Greece had its ancient counterpart in the *eiresíone*. This is commonly described as a branch of olive (or bay) twined with wool and decked with fruits etc., which was paraded from house to house, hung over the lintel for a twelvemonth, and ultimately burnt⁵. But it is noticeable that the same name was given to 'a wreath of flowers'⁶—a May-garland rather than a May-pole. The festivals with which the *eiresíone* was connected are the Panathenaia, the Pyanepsia and the Thargelia, *i.e.* festivals of the greater city deities. But E. Pfuhl⁷ and A. Dieterich⁸ have shown that the private rite attracted to and absorbed by these public festivals was performed—as the scholiast on Aristophanes affirms—for

Helios and the Horai¹. It is, therefore, open to us to maintain that of old, as to-day, the worthy Greek householder hung over his doorway a solar wreath destined to be burnt as a sun-charm on the midsummer fire.

(e) The Sun as the Bird of Zeus.

In Egypt the sky-god Horos was early confused with the sun-god Râ². 'One by one all the functions of Râ,' says Prof. Maspero, 'had been usurped by Horus, and all the designations of Horus had been appropriated by Râ³.' Thus the sparrow-hawk,—or, as Monsieur G. Bénédite has recently contended⁴, the falcon—which was originally conceived as the embodiment of Horos⁵, came to be regarded as the symbol of Râ⁶, or in other words was transferred from the sky to the sun⁷, and was further developed into the phoenix⁸, whose solar connexions are notorious⁹. Moreover, the Horos of Edfû (Ḥeru-beḥuṭet) was known far and wide as the winged solar disk¹⁰. Now Aischylos in his *Suppliants*, a play dealing with a Graeco-Libyan myth¹¹, makes Danaos, the twin-brother of Aigyptos, say to his daughters—

Call now likewise on yonder bird of Zeus.

¹⁰ *Supra* p. 205 ff.

¹¹ *Infra* ch. ii § 9 (d) ii (a).

The Danaïdes do so in the words—

Lo, thus we call on the saving rays of the sun¹.

This invocation of the sun as the 'bird of Zeus' is probably a deliberate Egyptism on Aischylos' part, and must not in itself be taken to prove that the Greeks entertained the same idea. There are, however, certain beliefs and practices current in ancient Greece which become more intelligible on the assumption that the sun was once viewed as a bird.

The Orphists, jealous guardians of antiquated ideas, opened their *Rhapsodic Theogony* with a somewhat similar invocation:

Sun that soarest aloft on golden wings².

The solar wheel upon which Ixion was bound is not unfrequently figured with wings³; and the solar chariot that took Triptolemos across the world is winged likewise⁴. A bird was on occasion affixed to the *tynx*-wheel⁵. The Lycian symbol is sometimes furnished with bird-heads⁶. The *triskelés* is superposed on a bird⁷, or itself fitted with wings⁸. And the Greeks were familiar with a variety of winged solar deities⁹.

Apart from these examples of the winged sun, several myths merit attention. That of Kirke, as we have seen, presupposes the belief in a solar hawk¹⁰. Ovid tells how Daidalion, grieving for the death of his daughter Chione, flung himself from the summit of Parnassos and, as he fell, was transformed by Apollon into a hawk¹¹. Hyginus adds that *daedalio* means 'a hawk¹².' More probably the name is a mere patronymic, the 'son of Daidalos¹³'; for parallels occur in various versions of the Daidalos-myth. According to Athenian tradition, Talos son of Daidalos' sister was hurled from the Akropolis and in mid air changed by Athena into a partridge¹⁴. But Talos is definitely identified by Hesychios with the sun¹⁵. It would seem, then, that behind the stories of Daidalion

turned into a hawk and of Daidalos' nephew Talos turned into a partridge lay the old conception of the solar bird. Again, in another version, which has been traced back to the *Cretans* of Euripides¹, Daidalos imprisoned in the Labyrinth made wings for himself and his son Ikaros: Daidalos got safely away, but Ikaros soaring too high had his wings melted off by the sun and fell into the sea. Many mythologists, arguing from the analogy of Phaethon etc., have concluded that Ikaros was the sun conceived as falling from the height of heaven². If this conclusion, which squares well with the foregoing account of Talos, is valid, we have once more the sun represented by a bird-like figure. A folk-tale from Zakynthos, in which B. Schmidt recognised certain traits of the Ikaros-myth³, is here to the point:

'In the time of the Hellenes there once lived a king, who was the strongest man of his day; and the three hairs on his breast were so long that you could take them and twist them twice round your hand⁴. Another king once declared war against him, and on a certain month the fighting began. At first the other king was victorious; but afterwards the strong king with his army beat the enemy and pursued them to their town. He would there and then have destroyed them all, had they not given 400,000 dollars to his wife, who betrayed him and cut off his three hairs. This made him the weakest of all men. The enemy then took him prisoner, bound him, shut him up in a fortress, and gave him only an ounce of bread and an ounce of water a day. However, his hairs soon began to grow again. So Captain Thirteen—that was his name—and thirteen of his companions were flung by the enemy into a pit. As he was the last to be flung in, he fell on the top of his companions and escaped death. But his enemies then covered the pit with a mountain. On the second day

¹ C. Robert in Pauly—Wissowa *Real-Enc.* iv. 2001, G. Knaack in *Hermes* 1902 xxxvii. 598 ff., Gruppe *Myth. Lit.* 1908 p. 525 f.

² E.g. Gilbert *Gr. Götterl.* p. 180 and the author of the latest monograph on the subject R. Holland *Die Sage von Daidalos und Ikaros* (Abh. zu dem Ber. der Thomaschule) Leipzig 1902—both cited and criticised by Gruppe *Myth. Lit.* 1908 p. 523 f., who adheres to his opinion that 'Ikaros...ist der im Laufe des April und im Anfang Mai in der Sonnennähe verschwindende Orion' (*Gr. Myth. Rel.* p. 946) or perhaps, like Phaethon (*ib.* pp. 42, 336, 960), the Morning Star (*ib.* pp. 960, 1310). But the analogy of Talos, whom Gruppe admits to have been the sun (*ib.* p. 1310 'Ein Helios war ursprünglich der kretische Talos'), makes strongly for the solar view.

G. von Hahn *Griechische und albanesische Märchen* Leipzig 1864 ii. 279 ff. and another from Kypros in A. A. Sakellarios *Τὰ Κυπριακά* Athens 1855 no. 8, in both of which the hero's strength is vested in three golden hairs on the top of his head. So in a tale from Epeiros (J. G. von Hahn *op. cit.* i. 215 ff.). See further Frazer *Golden Bough*² iii. 358 f., 390 f., *ib.*³ Taboo p. 253 f., Gruppe *Gr. Myth. Rel.* p. 882, O. Höfer in Roscher *Lex. Myth.* iii. 3262 f.

after he was thrown into the pit he found a dead bird somewhere. He stuck its wings on to his hands and flew up. He knocked his head on the mountain and sent it spinning up to the sun. He then flew further afield and soared high into the air. But a rain-storm came on and softened the clay, with which he had stuck the feathers on. So Captain Thirteen fell into the sea. Out came the sea-god¹ and with his three-pronged fork gave him such a blow that the sea turned red with his blood, and changed him into a big fish, a dolphin. He told him too that he could never change back again till he found a girl willing to marry him. Now the sea in which the dolphin lived was of such a sort that no ship entering it could get out again. It so happened that a king and his daughter came that way. They got in easily enough but couldn't get out again; and so fearful a storm overtook them that their ship broke up. Nobody was saved but the princess and the king; for the dolphin took them both on his back to a small island, and then set them ashore on the coast they had come from. The princess resolved to wed the dolphin, and, to get him up to her castle, had a big canal dug from the sea to it. When all was ready for the wedding, the dolphin shook off his skin and changed into a young man of gigantic strength and great beauty. He married the princess, and they lived happily ever after—but we here more happily still.'

This tale combines the characteristics of Ikaros with those of Pterelaos, the Taphian hero whose life depended on a golden hair. Amphitryon and his allies could not capture Taphos till Komaitho the daughter of Pterelaos, in love with the hostile chief, plucked or cut the fateful hair from her father's head². O. Gruppe³ infers from the name *Pterélaos* that a bird played an important part in the Taphian legend⁴, and justly compares the Megarian myth of Nisos and Skylla, which not only contained the same episode of the purple or golden life-lock but also involved the metamorphosis of the father into a sea-eagle and of the faithless daughter into a heron⁵.

Ikaros' tomb was shown on a headland of Ikaria, the island west of Samos⁶. Daidalion and Talos were both precipitated from a rocky eminence. And the story of Skylla was associated with the point Skyllaion near Hermione⁷. This recurrence of a headland suggests comparison with the ritual of the Leucadian promontory. The 'White Rock,' as Homer calls it⁸, is a cliff that

⁸ *Od.* 24. 11 Λευκάδα πέτρην.

rises on one side perpendicularly from the sea to a height of at least 200 ft and has on its summit remains of the temple of Apollon *Leukatas*. Once a year at the festival of Apollon the Leucadians, to avert evil, flung a criminal from the top of their cliff. Wings of all sorts and birds were attached to him in order to lighten his 'leap'; and many persons in small boats waited down below to pick him up and, if possible, get him in safety beyond the boundary¹. Dr Frazer regards 'these humane precautions' as probably 'a mitigation of an earlier custom of flinging the scapegoat into the sea to drown²'. But this hardly explains the peculiar feather-garb, which surely implies that the victim was a quasi-bird like Ikaros. It is significant that the eponym Leukadios was the son of Ikarios³. Further, the Leucadian 'leap' was persistently connected with Sappho's love for Phaon⁴, the favourite of Aphrodite, who was said to have founded a temple for his goddess on the Leucadian rock⁵. But *Phaon*, as K. O. Müller pointed out⁶, is simply a doublet of *Phaethon*, 'the Shining One.' There is, therefore, much to be said for the view recently advanced by A. Fick⁷ that the Leucadian 'leap' was the ritual of a solar festival⁸, that

⁶ K. O. Müller *Dorier*² i. 233, *id.* *Geschichte der griechischen Litteratur*⁴ i. 292 f. On φαῖν, φαέθω see L. Meyer *Handb. d. gr. Etym.* iii. 348 ff., Prellwitz *Etym. Wörterb. d. Gr. Spr.*² p. 482.

⁷ A. Fick *Vorgriechische Ortsnamen* Göttingen 1905 p. 137 ff., *id.* *Hattiden und Danubier in Griechenland* Göttingen 1909 p. 43. Fick ascribes this cult of the sun-bird to the Leleges. His notion that 'Πτερέλας ist der "auf Flügeln Daherfahrende," von πτέρω [sic] und ελα treiben, fahren gebildet' (*Vorgr. Ortsn.* p. 138) ignores the forms Πτερέλαος, Πτερέλεως: the second element in the word is certainly λαός, λεώς (Roscher *Lex. Myth.* iii. 3264).

⁸ On a copper of Nikopolis in Epeiros (?), struck by Trajan, Apollon *Leukates* (ΙΩΛΟΠΑ.ΛΕΥΚΑΤΗΣ) is shown, a nude figure on a pedestal with volutes: he

346 The Ram and the Sun in Egypt

Ikaros, Nisos, Pterelaos are so many mythical expressions of one belief, and that all alike imply the primitive conception of the sun as a bird.

(f) The Sun and the Ram.

i. The Ram and the Sun in Egypt. Zeus *Ammon*.

(a) Khnemu and Amen.

Another animal that came to be associated with the sun in Egypt was the ram. Khnemu, the great god of Elephantine¹, was represented originally as a ram², but in historical times generally as a ram-headed human figure. From the beginning of the New Kingdom (s. xvi B.C.) onwards he was fused with the sun-god Râ and worshipped throughout southern Egypt as Khnemu-Râ, a ram-headed deity often depicted as wearing the solar disk³. Râ himself was on occasion addressed as a ram, to judge from one of *The Seventy-five Praises of Râ* found at Thebes on the walls of royal tombs of the nineteenth and twentieth dynasties:

‘Praise be to thee, o Râ, exalted power. Thou raisest thy head, and thou makest bold thy brow, thou ram, mightiest of created things⁴.’

At Herakleoupolis (*Henen-su*) Khnemu was equated with the local solar god Her-shef, who not only receives many of the titles of Râ but is also represented with a ram’s head⁵. At Mendes too Khnemu

has a quiver and holds a bow in his lowered left hand, a torch in his extended right (J. Friedländer in the *Arch. Zeit.* 1869 xxvii. 103 pl. 23, 21, Imhoof-Blumer *Monn. gr.* p. 141, Head *Hist. num.*² p. 321). The torch suggests that the cult was solar.

¹ Lanzone *Dizion. di Mitol. Egiz.* p. 956 ff. pl. 336 f., W. Drexler in Roscher *Lex. Myth.* ii. 1250 ff., K. Sethe in Pauly—Wissowa *Real-Enc.* iii. 2349 ff.

² This is inferred from the hieroglyphic form of his name (Sethe *loc. cit.* p. 2350).

³ A. Wiedemann *Religion of the Ancient Egyptians* London 1897 p. 128, E. A. Wallis Budge *The Gods of the Egyptians* London 1904 ii. 51 ff., Drexler *loc. cit.* p. 1252 f., Sethe *loc. cit.* p. 2351.

A coin of the Hypselite nome, struck under Hadrian, shows Isis holding in her hand a ram with a disk on its head (*Brit. Mus. Cat. Coins Alexandria* p. 363), i.e. Khnemu-Râ in the form of a ram (cp. Sethe *ib.*).

⁴ E. A. Wallis Budge *op. cit.* i. 342.

⁵ *Id. ib.* ii. 58 ff., Drexler *loc. cit.* i. 1848 ff. and ii. 1252, R. Pietschmann in Pauly—Wissowa *Real-Enc.* ii. 1271 f. Cp. Ariston *Alex. frag.* 3 (*Frag. hist. Gr.* iii. 324 f. Müller) ap. Plout. *de Is. et Os.* 37 Ἀρίστων τοίνυν ὁ γεγραφῶς Ἀθηναίων ἀποικίαν ἐπιστολῆ ται Ἀλεξάρχου περιέπεσεν, ἐν ἣ Διὸς ἱστορεῖται καὶ Ἰσιδος υἱὸς ὦν ὁ Διδόνυσος ὑπὸ Ἀγυπτίων, οὐκ Ὅσιρις, ἀλλὰ Ἀρσαφῆς (ἐν τῷ ἄλφα γράμματι) λέγεσθαι, δηλοῦντος τὸ ἀνδρείον τοῦ ὀνόματος. ἐμφαίνει δὲ τοῦτο καὶ Ὁρμαῖος, ἐν τῇ πρώτῃ Περὶ τῶν Ἀγυπτίων Ὁμβριμον γὰρ φησι μεθερμηνεύμενον εἶναι τὸν Ὅσιρον (Hermaios in *Frag. hist. Gr.* iv. 427 Müller).

A magnificent gold statuette of Her-shef with a ram’s head was found by Prof. Flinders Petrie at Herakleoupolis: it dates from the twenty-fifth dynasty, s. viii B.C. (*Man* 1904

was identified with another local form of Râ, namely *Ba-neb-Ṭettu*, 'the Ram, lord of *Ṭettu*'.

Amen, the provincial god of Thebes², who rose with the rise of Theban power till as Amen-Râ he became 'King of the Gods' of all Egypt³, was another ram-divinity. He was figured sometimes as a ram, more often as a ram-headed or ram-horned god wearing the solar disk. But, whereas the ram of Khnemu belonged to a very ancient Libyan species with goat-like horns projecting horizontally from its head, the ram of Amen, like the rams of 'Minoan' art, had horns curving sharply downwards⁴—a fact of which we are reminded by the 'ammonites' of our geologists. In the time of the eighteenth dynasty (s. xvi B.C.) Khnemu acquired the horns of Amen in addition to his own⁵, while *en revanche* Amen acquired those of Khnemu and was even represented as a ram of the Khnemu-species⁶.

(β) Amen and Zeus *Thebaieús*.

Herodotos, who speaks of Amen-Râ more than once as the Theban Zeus⁷, reports a remarkable myth concerning him:

'All who have a temple of Zeus *Thebaieús* or belong to the Theban nome abstain from sheep and sacrifice goats...But those who possess a temple of Mendes or belong to the Mendesian nome abstain from goats⁸ and sacrifice sheep. The Thebans, then, and those who on their account abstain from sheep explain that this custom of theirs arose in the following way. Herakles was very eager to set eyes on Zeus, and Zeus did not wish to be seen by him. At

last, when Herakles was importunate, Zeus thought of this device. He flayed a ram, cut off its head, donned the skin, held the head in front of him, and so showed himself to Herakles. From this circumstance the Egyptians make the statue of Zeus ram-faced; and the Ammonians have got it from the Egyptians, since they are settlers of the Egyptians and Ethiopians and speak a *patois* of both languages. In my opinion, the Ammonians took their name too from the same event, *Amoûn* being the Egyptian term for Zeus. The Thebans for the reason I have stated do not sacrifice rams but treat them as sacred. However, once a year, on the festival of Zeus, they, like their god, cut up and flay a ram: they thus clothe the statue of Zeus and then bring before it another statue, that of Herakles. When they have so done, all who are round about the temple beat themselves in mourning for the ram and then bury it in a sacred sarcophagus¹.

The rite implied by this myth has not hitherto been found represented on the monuments². But it is by no means improbable that *Âmen-Râ* (Zeus *Thebaïeus*) was annually confronted with Shu (Herakles), who is often called 'the son of Râ³' and as god of the atmosphere 'draws the air before Râ⁴', 'brings the sweet breath of life to the nose of Osiris⁵', etc. The great hymn to *Âmen-Râ* in the Oasis of El-Charge even identifies that god with 'the soul of Shu⁶'.

(γ) *Âmen* and Zeus *Âmmon*.

Herodotos, therefore, did not hesitate to identify the Greek Zeus with *Âmen-Râ*, the Theban ram-god and sun-god. Doubtless, when Lucian in the second century of our era makes *Mômos*, the

¹ Hdt. 2. 42, cp. 4. 181. Zeus *Θηβαιεύς* had a human consort, who slept in his temple (Hdt. 1. 182): she was a woman chosen for good looks and good birth; and she gave her favours to whom she would till she was past the age for child-bearing, when lamentation was made for her and she was bestowed upon a husband (Strab. 816). The journey of Zeus to Aithiopia (*Il.* 1. 423 f.) and his union with Hera (*supra* p. 154 ff.) were localised at Thebes. Every year the shrine of Zeus was taken across the river into Libye, returning after certain days, as though the god had come from Aithiopia; and on the occasion of great public festivals two shrines, presumably for Zeus and Hera, were carried up a mountain, which was strown by the priests with all kinds of flowers (Diod. 1. 97, schol. *Il.* 1. 425). Thebes had a temple dedicated to the parents of Zeus and Hera; and two golden shrines of Zeus, the larger of which belonged to Zeus the sky-god, the smaller to *Âmmon* the former king and father of the people (Diod. 1. 15). On account of this popular cult Thebes came to be called *Διόσπολις* or *Διόσπολις μεγάλη* (Pauly—Wissowa *Real-Enc.* v. 1144 f.).

On the connexion between *Âmmon* and Herakles see Arrian. 3. 3. 1, Eustath. *in* Dionys. *per.* 11, interp. Serv. *in* Verg. *Aen.* 4. 196, Vopisc. *Aur.* 22 ff. (the name *Heraclammon*), and Gruppe *Gr. Myth. Rel.* p. 1506 n. 1.

god of 'Mockery,' ask Zeus how he can permit ram's horns to be affixed to him and makes Zeus apologise for the disgrace¹, Greek refinement had come to despise these barbaric identifications. But in earlier days and with simpler folk it was not so. The Greeks in general delighted to trace an analogy, sometimes quite unessential, not to say far-fetched, between their own deities and those of the foreigners among whom they were sojourning. It was a cheer to meet a familiar face in a strange country, even if the garb was outlandish and some of the accessories novel. If the Egyptian Amen

Fig. 271.

was 'King of the Gods,' pious Greeks would regard him as their own Zeus and would readily discover further points of resemblance². In fact, they would be glad to worship him under his new-found

¹ Loukian. *deor. concil.* 10 f.

² A. Wiedemann *op. cit.* p. 118 remarks that Amen-Râ 'was sometimes coloured blue, probably because that was the colour of the heavens in which he ruled as Sun god' (*ib.* n. 3 'Amen is coloured green in the tomb of Seti I'). If so, we may cp. the blue *nimbus*, globe, and mantle of Zeus (*supra* p. 33 ff.). But Khnemu was coloured blue as a water-god or Nile-god (*supra* p. 347 n. 5, K. Sethe in Pauly—Wissowa *Real-Enc.* iii. 2351). The two alleged reasons are not necessarily incompatible: Homer speaks of the Nile as *διπετέος ποταμοῖο* (*Od.* 4. 477 with schol.).

aspect as Zeus *Ammon*¹. They did not indeed represent him as a ram or even give him a ram's head; for the whole trend of Greek religious art was away from theriomorphism. But they hinted at the animal-conception by adding to the divine head ram's ears and downward-curving horns. The Naples bust (fig. 271)², which goes back to a fifth-century original of quasi-Pheidiac type³ perhaps existent once at Kyrene⁴, shows how far they succeeded in combining the infra-human with the supra-human, the ram with Zeus.

So Zeus through contact with *Āmen* became Zeus *Āmmon*. Where the change first took place, we cannot with certainty determine. It may have been at Thebes, the original *nidus* of the *Āmen*-cult; for Herodotos definitely states that the Ammonians got their worship from that of Zeus *Thebaieus*⁵. On the other hand, the fact that he calls the Theban god Zeus *Thebaieus* rather than Zeus *Āmmon* makes it more probable that we should look away from Thebes to the *Ammonéion*—the remote Oasis of Siwah, where the Theban Pharaohs planted their favourite religion⁶ in a spot destined to become famous throughout the ancient world. Hence the cult radiated, perhaps southwards to Meroë, where the oracular *Āmmon* is known to have been worshipped⁷, certainly northwards to Kyrene, where Zeus was honoured under a variety of titles⁸ and *Āmmon* came to be reckoned as a patron-god⁹.

There is, further, some little uncertainty as to the date at which

⁸ Zeus *Ἐλινώμενος* (*supra* p. 92), *Δύκαιος* (*supra* p. 89 ff.), *Σωτήρ* (R. Murdoch Smith—E. A. Porcher *History of the Recent Discoveries at Cyrene* London 1864 p. 113 inscr. no. 11). Euphemos too, a figure intimately connected with Kyrene, recalls the Zeus *Ἐσφῆμος* of Lesbos (Hesych. *Ἐσφῆμος· ὁ Ζεὺς ἐν Λέσβῳ*, cp. *Ἐσφάμιος· ὁ Ζεὺς*) and the Zeus *Φῆμος* of Erythrai (Dittenberger *Syll. inscr. Gr.*² no. 600, 26 f. *Ζηνὸς | [Φη]μίου καὶ Ἀθηναῖς Φημίας*).

⁹ In Plat. *polit.* 257 B Theodoros of Kyrene (*id. Theaet.* 143 C—D) says εὐ γε νῆ τὸν ἡμέτερον θεόν, ὃ Σώκρατες, τὸν Ἀμμῶνα. See L. Malten *Kyrene* Berlin 1911 p. 118 n. 6. R. Pietschmann in Pauly—Wissowa *Real-Enc.* i. 1856 cp. Synes. 4. 167, where Kyrenaïke is called ἡ Ἀμμωνος γῆ.

this Egyptising Zeus arose. At Kyrene his head first appears on silver coins about the year 500 B.C.¹ The cult seems to have spread as early as the sixth century to Lakonike². A herm of bluish marble found beneath the mediaeval fortress *Passava*, the ancient Las, near Gythion shows a pillar surmounted by a simple ram's head (fig. 272)³. Whether this is, as Miss Harrison has suggested to me, an indigenous ram-god⁴, or whether it should rather be classed as a theriomorphic *Ammon*, we have at present no means of deciding. At Gythion itself Pausanias found a sanctuary of *Ammon* along with Apollon *Kárneios*, a bronze statue of Asklepios, a spring of the same god, a holy sanctuary of Demeter, and a statue of Poseidon *Gaiábchos*⁵. *Ammon* was here in excellent company, Apollon *Kárneios*, Demeter, and Poseidon *Gaiábchos* being old and honoured deities of the land⁶; besides, he was appropriately placed, next to Apollon *Kárneios*, whose cult-title marks him as an ancient ram-god⁷, and to Asklepios, who stood beside him at

⁵ Paus. 3. 21. 8.

⁶ Wide *op. cit.* p. 263.

⁷ S. Wide in Roscher *Lex. Myth.* ii. 961 ff. and O. Höfer *ib.* 964 ff. Hesych. s.vv. *κάρ...* *πρόβατον*, *κάρα*: "...Ἰωνες τὰ πρόβατα, Καρνεῖος ἐπιθετον Ἀπόλλωνος ἰσως ἀπὸ Κάρνου τοῦ Διὸς καὶ Ἐυρώπης, κάρνος...βόσκημα; πρόβατον, καρνοστάσιον ἔπου ἦδ κάρνον ἴσταται. The whole group of words is ultimately connected with *κέρας*, 'horn,' the *κάρνος* being the 'horned' sheep (L. Meyer *Handb. d. gr. Etym.* ii. 361, Prellwitz *Etym. Wörterb. Gr. Spr.*² p. 216 f., Boisacq *Dict. étym. de la Langue Gr.* pp. 414, 437 ff., 498 f.): *κρίος*, 'ram,' is referable to the same root (L. Meyer *op. cit.* ii. 408 f., Prellwitz *op. cit.* p. 245, Boisacq *op. cit.* p. 519). At Sparta *Karneios* surnamed *Oikéttas* (cp. *Corp. inscr. Gr.* i no. 1446) was worshipped before the return of the Herakleidai, having a shrine in the house of Krios, son of Theokles, a sooth-sayer (Paus. 3. 13. 3). Apollon *Karneios* was worshipped by all the Dorians from the time of Karnos an Akarnanian, who was inspired with the gift of sooth-saying by Apollon (*id.* 3. 13. 4, schol. vet. Theokr. 5. 83). A countryman, who claims to be beloved by Apollon, is feeding a fine ram for him against

Kyrene also¹. At Sparta there was another sanctuary of *Ammon*, concerning which Pausanias remarks:

From the earliest times the oracle in Libye is known to have been consulted by the Lacedaemonians more frequently than by the rest of the Hellenes. It is said that when Lysandros was besieging Aphytis in Pallene, *Ammon* appeared to him by night and foretold that it would be better for him and for Lakedaimon to desist from the war with the Aphytaeans. So Lysandros raised the siege and induced the Lacedaemonians to revere the god more than ever: and the Aphytaeans are not a whit behind the Ammonian Libyans in their respect for *Ammon*.²

Certainly Aphytis possessed an oracle of *Ammon*³, whose head appears as the principal type on its coinage from 424 B.C. onwards⁴. Lysandros himself had a brother named Libys after a Libyan king, who was a friend of the family⁵. And, when Lysandros found it expedient to be absent awhile from Sparta, he obtained permission to go on a pilgrimage to Libye⁶. He even attempted to bribe the oracle of *Ammon* in the Oasis, hoping to obtain its support for certain revolutionary measures that he was contemplating; but the god sent emissaries to accuse him before the Spartans. On his acquittal the Libyans withdrew, protesting that, when, in accordance with an ancient oracle, Lacedaemonians came to settle in Libye, Libyan justice would be found superior to that of Sparta⁷. The Spartans, apparently, were in the habit of consulting various oracles, that of *Ammon* among them, on matters of importance⁸; and it was said that the oracle of *Ammon* preferred the laconic brevity of the Spartans to the elaborate ritual of the other Greeks⁹. Another town that had established relations with the Oasis as early as the first half of the fifth century was Thebes. Pausanias speaks of a temple of *Ammon* as built there, and adds:

The image was dedicated by Pindar: it is a work of Kalamis. Pindar also sent a hymn in honour of *Ammon* to the Ammonians in Libye. This hymn was still to be seen in my time on a triangular slab beside the altar which Ptolemaios, son of Lagos, dedicated to *Ammon*¹⁰.

the festival of the Karneia (Theokr. 7, 83). Altogether, the ram-connexion is well-established.

¹⁰ Paus. 9, 16, 1.

A brief fragment of it containing the invocation—

Ammon, lord of Olympos,—

is quoted by a Greek commentator on the Pythian odes¹. Perhaps, as O. Gruppe supposes², a belief that Thebes in Boiotia was connected with Thebes in Egypt may have led the inhabitants of the one to honour with a temple the chief divinity of the other.

Having thus secured a firm footing on Greek soil, the cult of Zeus *Ammon* continued for some centuries to flourish³, though it never spread much further afield⁴. Its most brilliant episode was undoubtedly the visit of Alexander the Great to the Oasis, when the victor was recognised by the god as his very son. This was indeed a memorable moment. No other mortal could claim the allegiance of Europe, Asia, and Africa. No other god united in himself the ideals of the same three continents. The former did well to seek the sanction of the latter when inaugurating for the first time in history a world-wide empire. But the climax marked by Alexander's visit was followed by a decline protracted throughout the Graeco-Roman age⁵. Strabon in the time of Augustus already speaks of the oracle as fallen into much contempt and in fact as well nigh forgotten⁶.

(δ) Ba'al-ḥammân and Zeus *Ammon*.

In the last paragraph I described Zeus *Ammon* as at once European, Asiatic, and African. The description stands in need of further proof; for hitherto we have considered the god only as a blend of the Greek Zeus with the Egyptian *Amén*. It is, however, certain that his cult was not altogether free from Semitic influence.

This appears *in primis* from the fact that, whereas Greek writers invariably call him Zeus *Ammon*, Latin authorities commonly speak of Iupiter *Hammon*. The aspirate has come to him through confusion with Ba'al-ḥammân, a Phoenician deity greatly

⁶ Strab. 813.

venerated along the north coast of Africa¹. The meaning of *Ba'al-ḥammân* is disputed: some Semitic scholars translate 'Fiery Lord'² or 'Lord of Heat'³; but the more probable rendering is 'Lord of the Stone Pillars'⁴. In any case the name not unnaturally modified that of *Āmen* or *Zeus Ammon*. Nor was the borrowing all on one side. If *Ba'al-ḥammân* lent his initial *H* to *Zeus Ammon*, *Zeus Ammon* lent his horns to *Ba'al-ḥammân*. In 1879 Prof. Berger published a short series of monuments which represent *Ba'al-ḥammân* with undeniable ram's-horns⁵. A Cypriote terra cotta formerly in the Albert Barre collection portrays him enthroned, his hands resting on a couple of rams (pl. xxvi, 1)⁶. A leaden plate found in the Baths of Iuba ii at Caesarea Iol (*Cherchel*) in Mauretania shows his head four times repeated (pl. xxvi, 2)⁷. At Carthage, where the ram is his constant attribute⁸, he was associated with *Tanit*⁹, a north-African form of the great Phoenician mother-goddess *Astarte*¹⁰. As chief god and goddess of the district they are the central ornament of a silver band, probably once a priestly diadem, found in a tomb near Batna in Algeria (pl. xxvi, 3)¹¹. The bust of *Tanit* with a mural crown and that of *Ba'al-ḥammân* with ram's-horns are placed on either side of a star (sun?) and flanked by the serpents of *Esmun* twisted round a pair of pillars to right and left: beyond these are the figures of a goat and a ram ridden by two *Erotes*, and a further succession of religious symbols with which we are not here concerned. Again, Count Baudissin¹² cites an inscription from Mauretania Caesariensis, in which *Tanit*, there called *Panthea*, is invoked as 'partner in the rites of the horned

Thunderer...Iuppiter Hammon!¹ Ba'al-ḥammân was in fact completely assimilated to Zeus *Ammon*.

Semitic influence penetrated to the *Ammôneion* itself. Of its ritual in the fourth century B.C. a twofold account has come down to us:

DIODOROS 17. 50.

'The image of the god is surrounded with emeralds and certain other objects, and has a method of divination quite peculiar to itself. It is taken round on a golden boat by eighty priests. They carry the god on their shoulders, proceeding mechanically in whatever direction the will of the god leads their steps. Together with them follows a crowd of girls and women, singing paeans all along the road and chanting traditional hymns to the god.²

CURTIUS 4. 7. 23 f.

'That which is worshipped as a god has not the same shape as artists have commonly given to deities. It looks most like an *omphalos* set with emerald and gems. When a response is desired, the priests bear this deity on a golden boat, many silver saucers hanging on either side of the boat. Women and girls follow them, raising an artless chant in accordance with traditional custom, whereby they think that Zeus will be propitiated and deliver a true oracle.³

Both of these statements were doubtless drawn from the lost work of Kallisthenes, Aristotle's kinsman, who himself took part in Alexander's expedition. H. Meltzer⁴ by a detailed study of discrepancies has made it probable that the Roman writer is more accurate than the Greek: thus, whereas Diodoros uses the vague term 'image' (*χόανον*), Curtius describes the cult-object as most nearly resembling an *omphalos*. Meltzer would see in it the *baitylos* or *baitylion* of Ba'al-ḥammân, a sacred stone, half-fetich,

¹ *Corp. inscr. Lat.* viii no. 9018 = F. Bücheler *Carmina Latina epigraphica* Lipsiae 1895 i. 121 no. 253 [Pan]thea cornigeri sacris adiuncta Tonantis, | [q]uae Libycis Maurisque simul venerabilis oris | [his] etiam colitur te[r]ris, quam Iuppiter Hammon | [inter] utrumque lat[us] m[e]diam cum Dite severo | [dext]er sede tegit: etc. Tanit as Virgo Caelestis is at once Iuno and Ceres, and so is placed between Iupiter and Dis. See Wissowa *Rel. Kult. Röm.* p. 314 n. 8.

² Diod. 17. 50 τὸ δὲ τοῦ θεοῦ ζόανον ἐκ σμαράγδων καὶ τιῶν ἄλλων περιέχεται καὶ τὴν μαντεῖαν ἰδιόζουσαν παντελῶς ποιεῖται. ἐπὶ νεῶς γὰρ περιφέρεται χρυσοῦς ὑπὸ ἱερέων ὀδοσκόκοντα· οὗτοι δ' ἐπὶ τῶν ὤμων φέροντες τὸν θεὸν προάγουσιν αὐτομάτως, ὅπου ποτ' ἂν ἄγγ (sic codd. F. L., ceteri ἀγοί) τὸ τοῦ θεοῦ νεῦμα τὴν πορῆαν. συνακολουθεῖ δὲ πλῆθος παρθένων καὶ γυναικῶν παιάνας ᾄδόντων (sic libri: Wesseling cj. ᾄδουσῶν, L. Dindorf ᾄδον?) κατὰ πᾶσαν τὴν ὁδὸν καὶ πατρίῳ καθυμνοῦντων (sic libri: Wesseling cj. καθυμνοσῶν, L. Dindorf καθυμνοῦν?) ᾗδῃ τὸν θεόν.

³ Curt. 4. 7. 23 f. id quod pro deo colitur non eandem effigiem habet quam vulgo diis artifices accomodaverunt: umbilico maxime similis est habitus, smaragdo et gemmis coagmentatus. hunc, quum responsum petitur, navigio aurato gestant sacerdotes, multis argenteis pateris ab utroque navigii latere pendentibus. sequuntur matronae virginesque patrio more inconditum quoddam carmen canentes, quo propitiari Iovem credunt ut certum edat oraculum.

⁴ H. Meltzer 'Der Fetisch im Heiligtum des Zeus Ammon' in *Philologus* 1904 lxiii. 186—223.

half-idol, mid-way between the aniconic block and the anthropomorphic statue. He reminds us that Ba'al-ḥammân appears to have taken his name from such sacred stones, and notes that the Cypriote Aphrodite was likewise 'worshipped in the form of an *omphalós*'¹.

I am disposed to accept Meltzer's conclusion and to support it by two further considerations. In the first place, Ba'al-ḥammân was akin to the Baal of Tyre, better known as Melqarth or the Tyrian Herakles². If, therefore, the Tyrian Herakles can be shown to have had a cult-object similar to the emerald-set *omphalós* of Zeus *Ammon*, it will—in view of the rarity of such objects—become highly probable that the example in the Oasis belonged by rights to Ba'al-ḥammân and that its usage attests his influence on the cult of Zeus *Ammon*. Now Theophrastos à propos of emeralds has the following paragraph:

'This stone is scarce and of no great size,—unless we are to believe the records concerning the kings of Egypt. Certain writers declare that the king of Babylon once sent to Egypt as a gift an emerald four cubits in length and three in breadth, and that in the sanctuary of Zeus too there were dedicated four obelisks of emerald forty cubits long and from four to two cubits broad. This is what the writers in question assert. Of the so-called Bactrian emeralds the one at Tyre is the largest. It is a good-sized *stèle* in the sanctuary of Herakles,—unless indeed it is of pseudo-emerald, for that species too is to be found.' Etc. etc.³

This passage proves that the Tyrian Herakles had an *agalma* of emerald. It is, I suspect, represented on imperial coins of Tyre, which show a portable shrine containing a sacred stone shaped much like an *omphalós* (fig. 273)⁴. However that may be, our passage further indicates that such emerald-blocks had reached Egypt and that obelisks⁵ of the sort were to be seen there in a precinct of Zeus, *i.e.* of Amen-Râ. Since

Fig. 273.

² Ba'al-ḥammân is himself called Herakles in Polyb. 7. 9. 2 (W. W. Baudissin *op. cit.* p. 285). A bronze statuette at Vienna shows Zeus *Ammon* holding the club of Herakles (Von Sacken *Ant. Bronzen Wien* ii no. 7, Reinach *Rép. Stat.* ii. 12 no. 4): see also *supra* p. 348 n. 1.

³ Theophr. *lap.* 24 f., cp. Plin. *nat. hist.* 37. 74 f.

⁴ *Brit. Mus. Cat. Coins Phoenicia* p. 283 no. 435 Gordianus iii, p. 290 nos. 471 f. Valerianus Senior pl. 34, 14. Mr G. F. Hill *ib.* p. cxl suggests that the type 'may perhaps...be connected with Astarte.'

⁵ Theophr. *lap.* 24 ἀνακεῖσθαι δὲ καὶ ἐν τῷ τοῦ Διὸς ὀβελισκοῦ σμαράγδου τέτταρας, μήκος μὲν τετταράκοντα πηχῶν, εὖρος δὲ τῆ μὲν τέτταρας, τῆ δὲ δύο. But

Ámen-Râ in the tomb of Seti i was himself coloured green¹, it is clear that the choice of emeralds was deliberate. Certain magical virtues belonging to this stone² were connected by Theophrastos with the fact that it is coloured like water³; and it was probably this resemblance to the watery sky that made it appropriate to the service of Zeus *Ámmon*⁴. Perhaps it was as the son of *Ámmon* that Alexander the Great had his portrait engraved by Pyrgoteles on an emerald⁵.

In the second place, the method of divination practised at the *Ámmôneion* was not, as Diodoros and Curtius thought, unique. At Ba'albek the image of Zeus *Ádados*⁶ and at Bambyke that of a Zeus-like Apollon⁷ indicated the divine will in the selfsame manner. Both these cults were Syrian, and we may fairly infer that the usage of the Oasis was Semitic too.

Yet, while admitting H. Meltzer's contention that the *omphalós* of Zeus *Ámmon* was Semitic, I would point out that the golden boat on which it journeyed is hardly to be explained by oriental

Plin. *nat. hist.* 37. 74 et fuisse apud eos in Iovis delubro *obeliscum e quattuor smaragdís* quadráginta cubitorum longitudine, latitudine vero in parte quattuor, in parte duorum is much more credible.

¹ *Supra* p. 132 n. 2.

² The term *σμάραγδος*, strictly used, denotes a crystalline green quartz: it was, however, loosely applied to other green stones (Furtwängler *Ant. Gemmen* iii. 394, cp. 388).

³ Theophr. *lap.* 4 and 23, cp. Timoth. *Pers.* 32 f., Nonn. *Dion.* 5. 178 ff.

⁴ Similarly the non-crystalline green quartz (*ὁ χλωρὸς λάσπις*) known to us as 'plasma' or 'plasma di smeraldo' would conciliate the gods and secure a plenteous rain-fall (Orph. *lith.* 267 ff.). It was credited also with medicinal powers, especially if engraved with the Khnemu-snake (Galen. *de simplicium medicamentorum temperamentis ac facultatibus* 9. 2. 19 (xii. 207 Kühn)): many 'Gnostic' examples are extant (Furtwängler *op. cit.* iii. 388, W. Drexler in Roscher *Lex. Myth.* ii. 1258).

'Plasma' was occasionally used for the figure of Zeus enthroned (Furtwängler *Geschnitt. Steine Berlin* p. 111 no. 2355 pl. 22, p. 266 no. 7134) or for that of Asklepios enthroned as Zeus (*id. ib.* p. 111 no. 2356, T. Panofka in the *Abh. d. berl. Akad.* 1845 Phil.-hist. Classe p. 289 pl. 1, 10). I append a laureate head of Zeus carved in high relief out of 'plasma,' from a ring in my possession (fig. 274, enlarged $\frac{1}{2}$):

Fig. 274.

the stone is good work of Roman date.

Plat. *Phaed.* 110 D describes *σάρδια τε καὶ λάσπιδας καὶ σμαράγδους καὶ πάντα τὰ τοιαῦτα* as fragments of the earth's true surface, which have slipped from the *aithér* into the *atr*—a notion probably based upon folk-belief. Cp. Ex. 24. 10, Ezek. 1. 26, 10. 1, Rev. 4. 3.

⁵ Plin. *nat. hist.* 37. 8.

⁶ *Infra* ch. i § 6 (g) xx (a).

⁷ *Infra* ch. i § 6 (g) xx (δ).

ideas of a cosmic ship¹, but is simply the Egyptian solar barque. *Ammon* was identified with 'the setting sun of Libya'²; and the Egyptians believed that the sun-god, after travelling all day in his morning barque, at night-fall reached the Mountains of the West, where he was received by the goddess of the West and entered his evening barque to begin his nightly voyage through the Underworld³. Sesoosis, *i.e.* Sesostris (Rameses II), is even said to have dedicated in the temple of Amen-Râ at Thebes a boat of cedar wood, 280 cubits in length, gilded without and silvered within⁴. If, then, we assume a combination of the Semitic *omphalós* with the Egyptian boat, the whole ritual becomes intelligible⁵.

(c) Zeus *Ammon* and the Snake.

Ammon was said to have transformed himself into a snake in order to win his bride⁶; and snakes at Kyrene were called by the

¹ See R. Eisler *Weltonmantel und Himmelszelt* München 1910 ii. 576 n. 4, 622, 725 ff.

² Macrob. *Sat.* i. 21. 19 Ammonem, quem deum solem occidentem Libyæ existimant.

³ A. Erman *A Handbook of Egyptian Religion* trans. A. S. Griffith London 1907 p. 11; cp. Plout. *de Is. et Os.* 34.

There are but few certain traces of the solar barque in Greek literature or art. The Pythagorean *ólakós* was cosmic, not solar (Philolaos *frag.* 12 Diels). Herakleitos described sun and moon as *σκαφοειδείς... τοῖς σχήμασι* (Aët. 2. 22. 2, 24. 3, 27. 2, 28. 6, 29. 3=H. Diels *Die Fragmente der Vorsokratiker*² Berlin 1906 i. 59, 4 ff.). An Apulian *kratér* from Basilicata, now in the Louvre, shows Helios and Selene in a four-horse chariot, which rises out of a boat: on the left Phosphoros (?) acts as leader; on the right a Koures brandishes his sword (E. Gerhard *Über die Lichtgottheiten auf Kunstdenkmälern* Berlin 1840 p. 8 f. pl. 3, 3 (extr. from the *Abh. d. berl. Akad.* 1838 Phil.-hist. Classe p. 383 ff.), Welcker *All. Denkm.* iii. 67—71 pl. 10, 1, A. M. Migliarini in the *Ann. d. Inst.* 1852 xxiv. 97 ff. pl. F, 3, Lenormant—de Witte *Él. mon. égr.* ii. 384 ff. pl. 114, Reinach *Rép. Vases* i. 291, 1, Miss J. E. Harrison in the *Ann. Brit. Sch. Ath.* 1908—1909 xv. 335 fig. 8).

The solar cup in which Herakles crossed Okeanos (Athen. 469 C—470 D): a black-figured vase in the *Rom. Mith.* 1902 xviii. 107 ff. pl. 5; the red-figured Vatican *kýlix* in E. Gerhard *op. cit.* p. 9 pl. 1, 4 and *Ausert. Vasenb.* ii. 84 ff. pl. 109, Reinach *Rép. Vases* ii. 59, 6) is, however, comparable with the cup-shaped boats of Assyrian art (Preller—Robert *Gr. Myth.* i. 435 n. 4).

⁴ Diod. 1. 57.

⁵ Monsieur E. Naville, the distinguished Egyptologist, has recently ('Le dieu de Poasis de Jupiter Ammon' in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1906 pp. 25—32) suggested that the schist palettes referred by him to the first three dynasties, which are often shaped like shields and have on one side a nearly central circular sinking, were intended to serve as base for a precious stone or perhaps a piece of metal or wood representing the *omphalós* or boss of the shield and worshipped as 'le dieu ombilic.' This somewhat *bizarre* view must be left for other Egyptologists to criticise. But it can hardly claim the support of Curt. 4. 7. 23 umbilico maxime similis; for Curtius' *umbilicus* is presumably a translation of Kallisthenes' *ὀμφαλός*, and *ὀμφαλός* would not convey to any classical reader the idea of 'shield-boss' unless there were an express allusion to a shield in the immediate context (see Stephanus *Thes. Gr. Ling.* v. 2002 C—D).

⁶ *Anth. Pal.* 9. 241. 1 ff. (Antipatros of Thessalonike) *βουκόλος ἔπλεο, Φοῖβε,*

name of *Ammon*¹. The association of the god with this reptile was probably due not so much to Semitic as to Egyptian influences.

Fig. 275.

Ποσειδάων δὲ καβάλλης, | κύκνος Ζεὺς, Ἄμμων δ' ὠμφιβόητος ὄφης — | χοί μὲν ἐπ' ἠιθέας, σὺ δὲ παιδικός — ἔφρα λάθοιτε· κ.τ.λ. This has been explained as a reference to the story of Alexander's parentage (Plout. *v. Alex.* 2 f. ὤφθη δὲ ποτε καὶ δράκων κοιμωμένης [τῆς] Ὀλυμπιάδος παρεκτεταμένος τῷ σώματι· κ.τ.λ., Apollin. *Sid. carm.* 2. 80 draconigenae... hosti, and especially Cougny *Anth. Pal. ¹ Hesych. Ἄμμων (Ἀμμώνια cj. Boeckh)· ἐορτὴ Ἀθήνησιν ἀγομένη. καὶ ὄφεις. Κυρηναῖοι.

True, we have already seen the snakes of Esmun, the Punic Asklepios¹, brought into connexion with the horned Ba'al-ḥammān²; we cannot, therefore, exclude the possibility that the snake of Zeus Ammon owed something to the Semites.

But snakes undoubtedly played a large part in Egyptian religion³. Of the *viperā cerastes*, which has been found at Thebes in mummified form⁴, Herodotos writes:

'In the neighbourhood of Thebes there are sacred snakes, which do no harm to man. They are small of size and have two horns springing from the top of the head. When they die, they are buried in the sanctuary of Zeus; for they are deemed sacred to this god⁵.'

It is very possible, then, that the snake of Amen, the Theban Zeus, was transferred to Zeus Ammon⁶.

Again, Isis and Sarapis were often represented as a pair of human-headed *uraeus*-snakes or asps⁷. Sarapis alone appears in the same shape on imperial coins of Alexandria⁸. A handsome bronze formerly in the Demetriou collection and now at Athens (fig. 275)⁹ shows a Sarapis of this sort equipped with the horns of Ammon¹⁰. The god raises himself from an oblong base perhaps meant for his *kiste* or sacred 'chest¹¹'. On his head are traces of the usual *kálathos* or *modius*. Over his shoulders is a cape incised with a net-work pattern, probably a form of *agrenón*. Round his neck hangs an amulet shaped like a small shrine. The arms are missing. The body is that of a scaly asp, adorned in front with

¹ At Kyrene (*supra* p. 351 f.) and at Gythion (*supra* p. 351) Ammon was linked with Asklepios: see Gruppe *Gr. Myth. Rel.* p. 1558 n. 5. Cp. the pantheistic type figured *infra* p. 361.

¹⁰ P. Kabbadias and S. Reinach *loc. cit.* prefer to describe him as Zeus Ammon.

¹¹ Cp. fig. 276 = *Brit. Mus. Cat. Coins Alexandria* p. 81 no. 677 Hadrian pl. 1 (bust of Zeus Ammon with a solar disk on his head, the whole set on an oblong base or box dotted to indicate an inscription).

Fig. 276.

four inlaid eyes and ending in a bearded snake's-head. The aesthetic effect of this complex whole is surprisingly good. If man and beast are to be blended at all, the Greek method of representing a snake's body with a human head was infinitely preferable to the Egyptian method of representing a snake's head with a human body.

But syncretism went further even than this. The pantheistic type of Sarapis, as it is commonly called¹, or the pantheistic type of *Ammon*, as P. Kabbadias would term it², appears on gems³ and coins of imperial date. For example, a coin of Alexandria struck by Hadrian (fig. 277)⁴ represents Zeus with the rays of Helios, the *modius* of Sarapis (Zeus Helios Sarapis⁵), the horizontal ram's-horns of Khnemu, the spiral ram's-horn of *Ammon*, the *cornu copiae* of Neilos, and the trident of Poseidon combined with the serpent-staff of Asklepios⁶.

Fig. 277.

(ζ) Zeus of the Oasis a Graeco-Libyan god.

Stripping off these later accretions and subtracting also the earlier Semitic traits, we are left with the Greek Zeus and the Egyptian Amen-Râ, who at some period prior to the fifth century B.C. and probably in the Oasis of Siwah coalesced into the sun-god Zeus *Ammon*. But we have yet to ask how Zeus found his way into the Oasis, and what was the original aspect of his worship in that isolated spot.

Here we must take account of a startling hypothesis put forward in 1871 by J. Overbeck⁷. That admirable scholar argues at length⁸

⁶ Cp. the cult of Zeus Ἥλιος Σωτήρ (G. Plaumann *Ptolemais in Oberägypten* (Leipzig hist. Abh. xviii) Leipzig 1910 p. 89, R. Wünsch in the *Archiv f. Rel.* 1911 xiv. 581).

⁷ On the controversy, to which this hypothesis gave rise, see H. Meltzer in *Philologus* 1904 lxiii. 213 f.

⁸ Overbeck *Gr. Kunstmyth.* Zeus p. 273 ff.

in support of the view that Zeus *Ammon* was essentially a Greek god¹, whose cult had spread from Europe to Africa, not *vice versa*. His conclusion rests largely on the alleged fact that *Āmen* was never represented by the Egyptians as ram-headed. But that fact we now know to be no fact. Overbeck was misled by G. Parthey²; and Lepsius was able to prove that such representations occur as far back as the reign of Seti i (c. 1300 B.C.)³. This blunder has unfortunately blinded the eyes of subsequent critics to the force of other arguments adduced by Overbeck. He justly lays stress on the early appearance of Zeus *Ammon* among the accepted gods of Greece and on the wide popularity that in course of time he achieved. Of what really barbaric god could it be shown, for example, that he was portrayed for cult-purposes by Kalamis⁴ and other fifth-century artists⁵, or that he was honoured with public rites at Athens in 333 B.C.⁶? In view of these circumstances it is worth while to enquire whether after all there was not some long-standing affinity between the Zeus of the Oasis and the Zeus of continental Greece.

Now it is a well-established fact that during the nineteenth dynasty Egypt was twice attacked by a combination of northern tribes. Rameses ii c. 1300 B.C. had to fight the Hittites (*Kheta*) and their allies, who included Lycians (*Luka*), Dardanians (*Dardenui*), Mysians (*Masa*), Maeonians? (*Maunna*?), or Ionians? (*Yaunna*?), Padasians (*Pidasa*), and Cilicians (*Qalagīša*)⁷. Again, in the reign of Merenptah c. 1250 B.C. Egypt was invaded by Achaeans (*Āqaiwaaša*), Tyrsenians (*Thuirša*), Sardinians? or Sardians? (*Šardina*), Sagalassians (*Šakalaša*), and Libyans (*Labū*)⁸. Similarly during the twentieth dynasty Rameses iii between 1200

¹ In Soud. s.v. Ἄμμων ὄνομα θεοῦ Ἑλληνικοῦ Küster would read Λιβυκοῦ (cp. Dionys. per. 212 with Eustath. ad loc. τέμενος Λιβυκοῦ θεοῦ, Nonn. Dion. 40. 392 Λίβυς κεκλημένους Ἄμμων, Eudok. viol. 75 Ἄμμων Λιβυκός ἐστὶ θεὸς κ.τ.λ., Prop. 4. 1. 103, Ov. ibis 313), or else understand Ἑλληνικοῦ as ἐθνικοῦ, 'gentile': see G. Bernhardt ad loc. The latter is the right alternative.

and 1150 B.C. witnessed yet another attempted invasion by northerners, among whom were Philistines (*Pulusatha*), Siculo-Pelasgians? (*Zakkala*), Oaxians? (*Waašaša*), Teucrians (*Tákarai*), and Danaans (*Daànau, Danauna*)¹. Several of these identifications are doubtful; but that Egypt was thus repeatedly exposed to a general movement of Mediterranean peoples, many of whom were forefathers of the historical Greeks, is fortunately beyond all question. Prof. Flinders Petrie would even carry back the said Graeco-Libyan league well into the third millennium B.C.² This extreme view must be left for Egyptologists to criticise. But on the strength of the ascertained facts I have elsewhere suggested that the invaders may have planted in the Oasis a cult of their sky-god Zeus, who at some later date was fused firstly with the Theban *Ámen-Râ* and secondly with the Punic *Ba'al-ḥammân*³. If so, we should expect to find that the cult of Zeus in the *Anmónieion* resembled the most archaic cults of the same god on Greek soil, e.g. that of Zeus *Náios* at Dodona. Was this actually the case?

The Zeus of the Oasis is by Nonnos termed Zeus *Asbýstes* after the Asbystai, a Libyan tribe occupying the *Hinterland* of Kyrene, and under that denomination is compared with the Zeus of Dodona:

Lo, Zeus *Asbystes*' new-found answering voice
The thirsty sands oracular sent forth
To the Chaonian dove⁴.

The same comparison of the Libyan with the Dodonaean Zeus was made some 850 years earlier by Herodotos, who not only declares that—

‘The oracular usage of Thebes in Egypt and the oracular usage of Dodona in point of fact resemble one another⁵’

—but also reports at first hand with every appearance of fidelity the local myths of both cult-centres:

‘This is the tale that the Egyptians tell concerning the oracles of Hellas and Libye. The priests of Zeus *Thebaieús* stated that two priestesses were

⁴ Nonn. *Dion.* 3. 292 ff. καὶ Διὸς Ἀσβύστια νέην ἀντίρροπον ὀμφήν | Χαοινή βοῶσι πελειάδι διψάδες ἄμμοι | μαντιπόλοι (v.l. μαντιπόλφ), cp. 13. 370 ff. καὶ Διὸς Ἀσβύστια μεσημβρίζοντα ἐναίλους, | μαντιπόλου κερέντος, ὅπη ποτὲ πολλάκις Ἄμμων | ἀρνεῖοι τρέλικτον ἐχων ἰθαλμα κεραίης | ὀμφαίοις στομάτεσσιν ἐθέσπισεν Ἑσπέριος Ζεὺς.

⁵ Hdt. 2. 58.

carried off from Thebes by Phoenicians, that one of them—so they had heard—was sold into Libye, the other into Hellas, and that these women were the original founders of the oracles among the aforesaid peoples. When I asked them of the evidence on which this definite statement was based, they said in reply that a great hue and cry had been made by them for these women, and that they had been unable to find them, but that they had subsequently learnt about them just what they told me. The foregoing account, then, I heard from the priests at Thebes. The following is the statement made by the prophetesses at Dodona. Two black doves started to fly from Thebes in Egypt. One came to Libye, the other to Dodona, where it settled on an oak and announced with human voice that on that very spot must be established an oracle of Zeus. Deeming this a divine injunction, they had acted accordingly. They say that the dove which went to Libye bade the Libyans make an oracle of *Ammon*; and that too belongs to Zeus. This was the tale told by the priestesses of Dodona, the eldest of whom was named Promencia, the next Timarete, the youngest Nikandra; and the other Dodonaean dwelling about the sanctuary agreed with them¹.

Herodotos, who—if any man—was acquainted with the facts, clearly believed that the cult of the Oasis and the cult of Dodona were akin. Two priestesses according to the Egyptian version, two doves according to the Greek version, had simultaneously founded the twin oracles of Zeus. This testimony on the part of one who had himself visited both Thebes and Dodona is not lightly to be set aside or explained away as a case of Aigypto-mania.

The same story with some interesting differences of detail occurs in later writers. Thus Silius Italicus in the first century of our era relates that Hannibal after the capture of Saguntum sent Bostar to enquire of *Ammon* what the issue of the war would be, and that Bostar on reaching the Oasis was welcomed by the Libyan Arisbas:

• These shady woods and tree-tops heaven-high,
Groves trodden by the foot of Jupiter,
Worship with prayer, friend Bostar. All the world
Knows of his bounty, how he sent twin doves
To settle in mid Thebes. Whereof the one
That winged her way to the Chaonian coasts
Fills with her fateful coo Dodona's oak.
The other, wafted o'er Carpathian waves,
With the same snowy pinions crossed to Libye
And founded this our fane—Cythereia's bird,
Here, where ye see an altar and dense groves,
She chose a ram (I tell the miracle)
And perched betwixt the horns of his fleecy head
Chanted her answers to Marmaric tribes.
Then on a sudden sprang to sight a wood,

¹ Hdt. 2. 54—55.

A grove of ancient timber, and the oaks
That now touch stars came from that primal day.
Hence our forefathers feared; for lo, the tree
Hath deity and is served with altar-flames¹.

It will be noticed that Silius is not simply paraphrasing Herodotos. He makes the doves start from Thebes in Greece, not from Thebes in Egypt, as is clear from his reference to the Carpathian sea, and he adds the episode of the dove settling on the ram. The latter feature, if not the former, reappears in the learned *scholia* on Servius² and points to the existence of a non-Herodotean tradition³. Silius' statement about the ancient grove and the oak-tree with altars burning before it is of considerable moment, because—if true—it goes far towards proving the essential similarity of the Dodonaean and the Libyan cults. We cannot, I think, reject the statement on the ground of botanical improbability. Authorities both ancient and modern mention several species of oak as growing in north Africa⁴; and Pliny even states that in the neighbourhood of Thebes at a distance of 300 stades from the Nile was a wooded tract with springs of its own (an oasis?) producing oaks, olives, etc.⁵ Again, *Ammon* appears to have had a sacred grove on the shores of the Syrtis⁶; and various writers attest the existence in

¹ Sil. It. 3. 675—691. The concluding lines (688 ff.) run: *mox subitum nemus atque annoso robore lucus | exiluit, qualesque premunt nunc sidera quercus | a prima venere die: prisco inde pavore | arbor numen habet coliturque tepentibus aris*. Cp. *ib.* 10 f. *corniger Hammon | fatidico pandit venientia saecula luco, 666 f. lucos nemorosaque regna | cornigeri Iovis*.

² Interp. Serv. in Verg. *Aen.* 3. 466 Iuppiter quondam Hebae (*leg.* Thebae) filiae tribuit duas columbas humanam vocem edentes, quarum altera provolavit in Dodonae glandiferam silvam Epiri, ibique consedit in arbore altissima, praecepitque ei qui tum eam succidebat, ut ab sacrata quercu ferrum sacrilegum submoveret: ibi oraculum Iovis constitutum est, in quo sunt vasa aenea, quae uno tactu universa solebant sonare. altera autem columba pervenit in Libyam, et ibi consedit super caput arietis, praecepitque ut Iovis Ammonis oraculum constitueretur.

Stat.* ii. 771, 8) published a bronze at Berlin, which according to him represents the dove on the head of the Ammonian ram. More probably it is a variation of the type of an eagle on a ram's head (Babelon—Blanchet *Cat. Bronzes de la Bibl. Nat.* p. 494 no. 1252 fig., Reinach *op. cit.* ii. 771, 7).

⁴ Plin. *nat. hist.* 16. 32 (*parva aquifolia ilex = quercus coccifera* Linn.); *La Grande Encyclopédie* x. 1065 b, 1066 a, b (*qu. ballota* Desf., *qu. suber* Linn., *qu. Mirbeckii* Durieu).

⁵ Plin. *nat. hist.* 13. 63 circa Thebas haec, ubi et quercus et persea et oliva, CCC a Nilo stadiis, silvestri tractu et suis fontibus riguo.

⁶ Skyl. *per.* 109 (*Geogr. Gr. min.* i. 85 Müller) *ἐν δὲ τῷ κοιλοτάτῳ τῆς Σύρτιδος (ἐν τῷ μυχῷ) Φιλαίνου βοιωτοῦ, ἐπὶ νίον ἄμμονες ἀλοῦς (leg. ἐπὶ νεῖον, Ἄμμωνος ἄλσος) τῆς Σύρτιδος*. The great *Ammonéion* is loosely connected with the Syrtis by Lucan. 4. 673, 10. 38, Prudent. *apoth.* 443.

the *Ammóneion* of an oracular grove without specifying oak-trees¹. Finally, Clement of Alexandria and Eusebios allude to an ancient oracular oak as worshipped amid the desert sands². This can be none other than the oak of *Ámmon*³. I conclude, therefore, that Šilius' statement is not to be dismissed as a mere poetic fiction, but to be accepted as a fact.⁴

If Zeus had an oak-cult of immemorial antiquity in the *Ammóneion*, we might reasonably expect that it would figure in the earliest traditions of the Libyan tribes. Now the Oases of the eastern Sahara were occupied in classical times by the Garamantes⁴, whose eponym was Garamas—also called Amphithemis—the son of Apollon by Akakallis daughter of Minos⁵. Of the Garamantes in general it is recorded that they were pious folk, who had a temple or temples established in their midst⁶; but of Garamas in particular we fortunately possess an older and more definite account. A lyrical fragment⁷ attributed by Schneidewin to Pindar and recognised by Bergk as coming from the *Hymn to Zeus Ámmon*⁸ declares that in the beginning men sprang from Mother

This is Bergk's restoration of the MS. Λίβες δὲ Τάρβαντα φασὶ πρωτόγονον αὐχμηρῶν ἀναδύοντα πεδίω, γλυκελάς ἀπάρξασθαι Διὸς βαλάνου. Hiller reverts to Schneidewin's cj. Ἰάρβαντα. But T. Zielinski in the *Archiv f. Rel.* 1906 ix. 42 n. 1 gives reasons for preferring Bergk's emendation.

⁸ *Supra* p. 352 f.

Earth, though it is hard to discover who was the first of her sons. After naming in true Pindaric fashion various possible claimants our fragment proceeds:

The Libyans say that first-born Garamas
Rose from parched plains and made his offering
Of Zeus' sweet acorn.

May we not venture to see in these lines another confirmation of Silius' statements concerning the oaks of the Oasis?

Again, the fauna as well as the flora of the two oracular centres was alike. Birds, according to Aristophanes, were an essential feature of both¹. The doves of Dodona are sufficiently notorious². But, as we have already seen, the sister oracle in the Oasis was likewise founded by a dove from Thebes. Moreover, Semiramis is said to have learnt her destiny from *Ammon*³ and to have fulfilled it by becoming a dove⁴. Finally, small wild doves are numerous in the Oasis nowadays⁵.

The institution of both oracles was also connected with a shepherd. Proxenos, a contemporary of king Pyrrhos, in his *History of Epeiros* wrote⁶:

'A shepherd feeding his sheep in the marshes of Dodona stole the finest of his neighbour's flocks and kept it penned in his own fold. The story goes that the owner sought among the shepherds for the stolen sheep, and, when he could not find them, asked the god who the thief was. They say that the oak then for the first time uttered a voice and said—"The youngest of thy followers." He put the oracle to the proof, and found them with the shepherd who had but recently begun to feed his flock in that district. Shepherds go by the name of followers. The thief was called Mandylas⁷. It is said that he, angered against the oak, wished to cut it down by night; but that a dove showed itself from the trunk and bade him desist from so doing. He in fear gave up the attempt and no longer laid hands on this sacred tree. The Epeirotes, however, were wroth with him for his rash deed.' Etc.⁸

Similarly with regard to the Oasis Leon of Pella, a contemporary

¹ Aristoph. *av.* 716 ἐσμέν δ' ὑμῖν Ἀμμων... Δωδώνη. Alexander the Great was guided to the oracle of *Ammon* by two or more ravens (Aristoboulos *ap.* Arrian. 3. 3. 6; Kallisthenes *ap.* Plout. *v. Alex.* 27, Strab. 814; Diod. 17. 49, Curt. 4. 7. 15, Eustath. *in* Dionys. *per.* 211).

⁴ *Id.* 2. 20.

⁵ G. Rohlfs *Von Tripolis nach Alexandrien*² Bremen 1882 ii. 115 ff., 121 mentions that the Fountain of the Sun is known locally as *Ain el hammam*, which he renders 'the Doves' Bath.' But this appears to be a mistranslation: *infra* p. 382.

⁶ Proxenos *Epirotica frag.* 2 (*Frag. hist. Gr.* ii. 462 Müller) *ap.* schol. *Od.* 14. 327.

⁷ Μανδύλας Q. Μαρδύλας V. Μανδρεύλας cj. C. Müller.

⁸ The concluding sentence ὅθεν καὶ λαβόντας δίκην ταύτην εἰσπράξασθαι τῆς ἀπ' αὐτοῦ ὑπομονῆς (ἐπιμονῆς cod. Barnes.) τὸν μάντιν προάγει stands in need of emendation.

of Alexander the Great, in his treatise *On the gods of Egypt* observed¹:

'When Dionysos ruled over Egypt and all its borders and was said to have been the original inventor of everything, a certain Hammon came from Africa and brought him a vast flock of sheep, partly to secure his favour and partly to win the credit of having invented something himself. In return for this present Dionysos is said to have granted him a domain over against the Egyptian Thebes; and those who make effigies of Hammon furnish him with a horned head in order that men may remember how he was the first to discover sheep.'²

It was probably this Hellenistic romance which led Pausanias to remark: 'Ammon derived his name from the shepherd who founded the sanctuary.'³ Nor must we forget the tradition noticed above which makes the foundress dove settle on the head of a ram⁴.

Both sites possessed a miraculous spring. Pliny observes:

'At Dodona the spring of Zeus is cold and puts out torches that are plunged in it, but kindles such as are put out and brought near to it. It always fails at midday, wherefore they call it the Resting Water; but it soon increases till it is full at midnight, from which time onwards it again gradually fails¹....The pool of Zeus *Hammon*, cold by day, is hot by night².'

Many other writers from Herodotos to Eustathios describe this pool as 'the Fountain of the Sun' and assert that throughout the morning it grows cooler and cooler till at midday it is quite cold, but that as the day declines it gains in warmth becoming tepid at sundown and fairly bubbling with heat at midnight³. The current explanation of the phenomenon was that by night the sun went below the earth and there boiled the water—a view which Lucretius is at pains to disprove⁴.

¹ Leon *περὶ τῶν κατ' Αἰγυπτίον θεῶν frag. 6 (Frag. hist. Gr. ii. 332 Müller) ap. Hyg. poet. astr. 2. 20.* The sequel is quoted *infra* p. 373 n. 9.

² Paus. 4. 23. 10. So in Byzantine times Eudok. *viol.* 75, Eustath. *in Dionys. per.* 211.

³ Gerhard *Gr. Myth.* p. 166 f. suggested rather vaguely that the ram-symbolism properly belonging to some old Greek cult led to the confusion of a Greek with an Egyptian ram-god. It is by no means unlikely that the ram was sacred to a Graeco-Libyan Zeus before this god came to be identified with Amen-Râ. But the indications recorded in the text do not suffice to prove it.

⁴ So Mela 2. 43, Solin. 7. 2, Aug. *de civ. Dei* 21. 5, Methodios *ap. et. mag.* p. 98, 22 ff. Cp. Ov. *met.* 15. 311 f. The interp. Serv. *in Verg. Aen.* 3. 466 states that the spring flowed from the roots of a huge oak and itself gave oracles by means of its murmuring sound.

⁵ Plin. *nat. hist.* 2. 228, cp. 5. 31.

⁶ Hyd. 4. 181, Lucr. 6. 848 ff., Ov. *met.* 15. 308 ff., Diod. 17. 50, Val. Max. 8. 15. 3 *ext.*, Curt. 4. 7. 22, Mela 1. 39, Sil. It. 3. 669 ff., Arrian. 3. 4. 2, Solin. 27. 45, Aug. *de civ. Dei* 21. 5, Eustath. *in Dionys. per.* 211. Cp. Serv. *in Verg. Aen.* 4. 196 *locum quendam in quo aries terram pede suo scalpsit, e quo loco fons manavit.*

⁷ Lucr. *loc. cit.*

In short, it appears that the whole apparatus of the oracle at Dodona—its grove, its oak of special sanctity, its doves, its holy well—was to be matched in the Oasis of *Ammon*. Strabon adds that both oracles gave their responses in the self-same manner, 'not by means of words, but by certain tokens' such as the flight of doves¹.

Nor was the character of Zeus himself different at the two cult-centres. Zeus *Náios* of Dodona was essentially a god 'of Streaming Water²': the oracular spring—we are told—burst from the very roots of his famous oak³. So with Zeus *Ammon*. The close connexion between his cult and water comes out clearly in Diodoros' description of the Oasis⁴:

'The Ammonians dwell in villages, but have in the midst of their territory an *akrópolis* secured by a threefold wall. Its first rampart encloses a palace of the ancient rulers; the second, the 'womens' court, the apartments of the children, wives, and kinsfolk⁵, together with guard-houses, and besides the precinct of the god and the sacred spring, which is used to purify all that is offered to him; the third includes the quarters of the king's body-guard and their guard-houses. Outside the *akrópolis* at no great distance is built a second temple of *Ammon* shaded by many large trees. Near this temple is a fountain, which on account of its peculiar character is called the Fountain of the Sun.' Etc.

The same association of the desert-god with water occurs in a tale for which our earliest authority is Hermippos the pupil of Kallimachos (c. 250 B.C.)⁶. When Dionysos in the course of his

¹ Strab. 329 frag. 1. οὐ διὰ λόγων, ἀλλὰ διὰ τινων συμβόλων, cp. 814 οὐχ ὥσπερ ἐν Δελφοῖς καὶ Βραγχιδαῖς τὰς ἀποθεσιπίσεις διὰ λόγων, ἀλλὰ νεύμασι καὶ συμβόλοις τὸ πλεόν, ὅς καὶ παρ' Ὀμήρω· ἦ καὶ κτανέησιν ἐπ' ὄφρῦσι νεύσε Κροτῶν. To the same effect Eudok. *itol.* 75 οὐ τινος αἰ μαντεῖαι διὰ συμβόλων γίνονται, ἦτοι διὰ σχημάτων τινῶν καὶ κατανεύσεων καὶ ἀνανεύσεων = Eustath. *in* Dionys. *per.* 211. See also Hdt. 2. 58 cited *supra* p. 363.

Yet Zeus *Náios* and Zeus *Ammon* both gave oracles in verse. For those of the former see Cougny *Anth. Pal. Append.* 6. 175 f.; for those of the latter, Cougny *ib.* 6. 179 and J. Parthey 'Das Orakel und die Oase des Ammon' in the *Abh. d. berl. Akad.* 1862 phil.-hist. Classe p. 143.

² Schol. *Il.* 16. 233 ὁ δὲ Δωδωναῖος καὶ Νάιος· ὑδρηλὰ γὰρ τὰ ἐκεῖ χωρία. Cp. *Nata* spring at Teuthrone in Lakonike (Paus. 3. 25. 4). Other cognates are *náw*, *váma*, *ασμός*, *ναρός*, *Νηρέος*, *Νηιάς*, etc. (L. Meyer *Handb. d. gr. Etym.* iv. 230 f., Prellwitz *Etym. Wörterb. d. Gr. Spr.*² p. 306 f., Walde *Lat. etym. Wörterb.* p. 415). See further *Class. Rev.* 1903 xvii. 178 f. and O. Höfer in Roscher *Lex. Myth.* iii. 2 f.

³ *Supra* p. 368 n. 4.

⁴ Diod. 17. 50. This and the parallel passage in Curt. 4. 7. 20—22 are derived from the same source, presumably Kallisthenes.

⁵ Diod. *loc. cit. συγγενῶν*: Curt. *loc. cit.* pellicibus. Curtius has again (*supra* p. 355) reserved a detail dropped by Diodoros.

⁶ Hermippos *ap. Hyg. poet. astr.* 2. 20, Nigidius *ap. schol. Caes. Germ. Aratea* 401, 6 ff. Eyssenhardt, *Amp.* 2, Lact. Plac. *in Stat. Theb.* 3. 476, Serv. *in Verg. Aen.* 196, schol. Lucan. 4. 672.

triumphal progress came into Africa, he was overtaken by thirst in the desert and like to perish with all his host. A ram appeared to them in their extremity and having led them safely to a plentiful pool in the Oasis there vanished¹. Dionysos founded on the spot a temple of Zeus *Ammon*, and set the helpful ram among the stars, ordaining that when the sun was in Aries all things should revive with the fresh life of spring. In this connexion it should be observed that from Berytos in the east to Pompeii in the west *Ammon*-masks were used as fountain-mouths².

Finally, as Zeus *Náios* was paired with Dione, so Zeus *Ammon* had a female partner worshipped at Olympia as Hera *Ammonia*³ and associated with him on certain extant gems (fig. 278)⁴. Or, if

Fig. 278.

Fig. 279.

it be urged that the original consort of Zeus at Dodona was Ge rather than Dione⁵, I would point to the fact that in the Libyan Oasis too we have found a tradition of Mother Earth⁶—a tradition the more noteworthy because in purely Egyptian religion the earth-deity was not a goddess, but a god.

The conclusion to which the evidence here adduced appears to

¹ The ram was presumably Zeus himself in animal form. Another late aetiological tale told how the gods, when attacked by Typhoeus, fled in a panic to Egypt and disguised themselves as animals, Zeus becoming a ram, etc. (Ov. *met.* 5. 327 f., Lact. *Plac. narr. fab.* 5. 5, Myth. *Vat.* 1. 86, cp. Apollod. 1. 6. 3, Diod. 1. 86, Plout. *de Is. et Os.* 72, Loukian. *de sacrif.* 14, Hyg. *poet. astr.* 2. 28).

² *Corp. inscr. Gr.* iii no. 4535 (Berytos)=Cougny *Anth. Pal. Append.* 1. 317, Overbeck *Gr. Kunstmyth.* Zeus pp. 277, 285.

³ Paus. 5. 15. 11 with J. G. Frazer's n. *ad loc.* (iii. 584). On the association of Zeus with Hera at Thebes in Egypt see *supra* p. 348 n. 1.

⁴ I figure a garnet in the Berlin collection: the original is inscribed $\Lambda\text{I}\Sigma\Lambda$ in careless lettering (Furtwängler *Geschmitt. Steine Berlin* p. 73 no. 1121 pl. 14, Müller—Wieseler *Denkm. d. alt. Kunst* ii. 40 pl. 5, 65 omitting inscr., Overbeck *Gr. Kunstmyth.* Zeus p. 301 Gemmentaf. 4, 13). Cp. also a prase at Florence (fig. 279), on which the female head has no *stephane* and is rather Dionysiac in character (Overbeck *op. cit.* Zeus p. 301 Gemmentaf. 4, 11). The existence of double busts representing Zeus *Ammon* and Hera *Ammonia* is more problematic (*id. ib.* p. 288 f.).

⁵ *Class. Rev.* 1903 xvii. 179 f.

⁶ *Supra* p. 366 f.

point is that the cult of Zeus in the Oasis was, as Herodotos declared, really akin to the cult of Zeus at Dodona. I submit that it was a relic of an early Graeco-Libyan occupation of north Africa¹.

(η) The youthful *Ámmon*.

On gold, silver (figs. 280—283), and copper coins of Kyrene struck c. 431—285 B.C. we have not only a bearded but also a beardless

Fig. 280.

Fig. 281.

Fig. 282.

Fig. 283.

Fig. 284.

Fig. 285.

type of *Ammon*². The same mature and youthful heads with a downward-curving ram's-horn appear on electrum *héktaí* of Lesbos c. 440—350 B.C.³, on coppers of Aphytis c. 424—358 B.C.⁴, on silver

¹ The myth of Danaos and the Danaïdes belongs to the same Graeco-Libyan *stratum* (*infra* ch. ii § 9 (d) ii (a)). Diod. 17. 50 states that the precinct of Zeus *Ámmon* was founded by Danaos (τὸ μὲν οὖν τέμενος φασὶν ἰδρύσασθαι Δαναὸν τὸν Αἰγύπτιον).

² Bearded: Head *Coins of the Ancients* p. 53 pl. 26, 44 (= my fig. 280), *id. Hist. num.*² pp. 865, 869 ff., *Hunter Cat. Coins* iii. 570 pl. 92, 7 f., 572, 574 pl. 92, 16. Fig. 281 is from a specimen in the McClean collection, fig. 282 from another in the Leake collection, at Cambridge (W. M. Leake *Numismata Hellenica* London 1856 African Greece p. 2).

Beardless: Head *Coins of the Ancients* p. 69 pl. 35, 40 (= my fig. 283), *id. Hist. num.*² pp. 865, 869, 871 fig. 388, *Hunter Cat. Coins* iii 569 ff. pl. 92, 6, 10—12.

³ Bearded: *Brit. Mus. Cat. Coins* Troas etc. p. 161 pl. 32, 26, *Babelon Monn. gr. rom.* ii. 2. 1219 f. pl. 160, 15.

Beardless: *Brit. Mus. Cat. Coins* Troas etc. p. 167 pl. 34, 21 f., *Babelon Monn. gr. rom.* ii. 2. 1227 f. pl. 161, 30 f., Head *Hist. num.*² pp. 210, 559.

All these heads have in front a curious set of upstanding curls (?), perhaps derived from an Egyptian head-dress misunderstood (cp. the coin of Kyrene discussed by J. Müller *Numismatique de l'Antienne Afrique* Copenhagen 1860 i. 85, Overbeck *Gr. Kunstmyth.* Zeus p. 295 Münztaf. 4, 16).

372 The Ram and the Sun in Egypt

(figs. 284, 285) and copper coins of Tenos from the fourth to the second century B.C.¹, and on coppers of Mytilene in the second and first centuries B.C.² Similarly in the west on silver coins of Metapontum *c.* 400—350 B.C. both types occur (fig. 286)³, and on silver coins of Nuceria Alfaterna after *c.* 308 B.C. the younger without the older head⁴.

Fig. 286.

The identification of this youthful figure is a matter of some difficulty. The general trend of fourth-century religious art is doubtless towards juvenile forms. But the usual succession of bearded and beardless types hardly accounts for the simultaneous recognition of a senior with a junior *Ammon*. The latter must be either a different god from the former, or at least a distinct phase of his personality. Among names suggested are Aristaïos⁵ and Apollon *Karneïos*⁶. Aristaïos was worshipped as Zeus in Arkadia⁷ and bears a name which appears to have been a cult-title of Zeus⁸; he was also an important figure in the mythological history of Kyrene⁹, and he not improbably passed for a shepherd-god¹⁰. But we have not the least

F. Hiller von Gaertringen in Pauly—Wissowa *Real-Enc.* ii. 856 says: 'Die Wortstellung ist chiasmisch. Ἀγρεύς und Νόμιος sind Beinamen des Apollon...A[ristaïos] des Zeus.'

⁹ L. Malten *Kyrene* Berlin 1911 *passim*.

¹⁰ *Supra* n. 8 ὀπάνα μῆλων. F. Studniczka *Kyrene* Leipzig 1890 p. 105 f. translates

reason to suppose that he was himself ever regarded as a ram or represented with ram's horns. There is more to be said for the proposed identification of the youthful horned head with that of Apollon *Karneios*. This deity too was worshipped as Zeus at Argos¹; moreover, he was essentially a ram-god², and one who, as we have already seen³, was associated at Gythion with Zeus *Ammon*. Nevertheless a comparison of the towns issuing coins of the youthful *Ammon* type⁴ with the known cult-centres of Apollon *Karneios*⁵ is disappointing. Kyrene is the only name common to the two lists.

L. Müller in his great work on the coinage of north Africa was the first to set this question on a more satisfactory basis by adducing the available literary evidence⁶. He pointed out that Zeus *Ammon* was connected with Dionysos, partly by certain tales recorded above—how the former brought sheep to the latter⁷, how the latter founded the temple of the former⁸—but partly also by the definite belief that Dionysos was the son of *Ammon* and horned like his father⁹. Hence L. Müller¹⁰ and subsequently L. Stephani¹¹ did not hesitate to identify the youthful *Ammon* of the coins with the Libyan Dionysos¹². By way of confirmation they note that on the coins of Aphytis, Ténos, and Mytilene the reverse type is

the *δοσπόλος δαλμῶν* of Pind. *Pyth.* 4. 49 f. as 'a sheep-pasturing god' and identifies him with Aristaios. Welcker *Gr. Götterl.* i. 489 cites from J. R. Pacho *Relation d'un Voyage dans la Marmarique, la Cyrénaïque*, etc. Paris 1827—1829 pl. 51 a Cyrenaic tomb-painting, which shows Aristaios with a ram on his back, a *pedum* in his hand, surrounded by sheep and encircled by fish.

¹ Theopomp. *frag.* 171 (*Frag. hist. Gr.* i. 307) *ap. schol. vet. Theokr.* 5. 83 *ὅτι τὸν αὐτὸν (sc. Κάρνειον Ἀπόλλωνα) καὶ Δία καὶ Ἡγήτορα καλοῦσιν Ἀργεῖοι, διὰ τὸ κάκεινον ἡγήσασθαι τοῦ στρατοῦ*. Perhaps, however, Theopompus merely meant that at Argos Apollon bore the title Ἀγήτωρ (Pauly—Wissowa *Real-Enc.* ii. 41) as Zeus did at Sparta (Wide *Lakon. Kulte* pp. 1, 13).

The context is given *supra* p. 368.

⁹ L. Müller *loc. cit.*

¹⁰ L. Stephani in the *Compte-rendu St. Pét.* 1862 p. 76 ff.

¹¹ The first to suggest Dionysos was Eckhel *Doctr. num. vet.*² iv. 118; and his suggestion has been widely accepted (see L. Müller *op. cit.* i. 102 f.).

commonly Dionysiac—a *kántharos*, a bunch of grapes, a herm of Dionysos. But this is an argument on which it is easy to lay too much stress.

Stephani further drew attention to a series of double busts which combine the head of *Ammon* with that of a more or less certain Dionysos¹. Sometimes a bearded head with ram's horns is joined to a bearded and hornless head². Where the latter is wreathed with vine-leaves³ or ivy-leaves⁴, it undoubtedly represents Dionysos. Where the wreath is absent⁵, we cannot feel the same assurance. Again, a bearded head with ram's horns is joined to a beardless head with short bovine horns⁶. Here opinion is divided, some supposing that *Ammon* is combined with a semi-bovine Dionysos⁷, others that he is linked to a second water-god, the Libyan Triton⁸. Exceptional is a double bust in the Vatican, which yokes two youthful heads, one having ram's horns and a slight beard, the other small bovine horns⁹. Stephani concludes that the artist wished to unite the Libyan with, the Greek Dionysos¹⁰; Overbeck, that the head with ram's horns is more probably a portrait in the guise of *Ammon*¹¹. Another isolated example is a double herm of *Ammon* and a satyr at Berlin, surmounted by a capital in the form of a *kálathos*¹². On the whole, a survey of these double busts makes it clear that *Ammon* stood in close relation to the Dionysiac circle.

Finally, Stephani published an Apulian bell-*kratér* at Saint

Petersburg, on which is a scene of considerable interest (fig. 287)¹. A youthful god with ram's horns stands leaning on a pillar, a bay-branch in his left hand. He is conversing with a matronly female figure seated before him. Behind him Pan with goat's horns holds a larger branch of bay with leaves and berries. He is balanced by a second female figure raising a *phiale*. The sanctity of the place is shown by the *bucranium* and fillet hung in the background, by the incense-burner visible between the two principal persons, and perhaps by the sprigs of bay etc. in the foreground. Stephani, followed by S. Reinach, suggests that we have here the horned Dionysos of Libye² promising pardon

Fig. 287.

¹ Stephani *Vasensamml. St. Petersburg* i. 380 ff. no. 880, *Compte-rendu St. Pétr.* 1862 p. 79 ff. Atlas pl. 5, 2 and 3, Reinach *Rép. Vases* i. 13, 1 f.

² This identification is confirmed by an unpublished Apulian jug at St Petersburg (Stephani *Vasensamml. St. Petersburg* ii. 28 f. no. 1119, though F. Wieseler in the *Nachr. d. kön. Gesellsch. d. Wiss. Göttingen* Phil.-hist. Classe 1892 p. 226 f. says Apollon *Karneios*), which represents a definitely Dionysiac scene. In the centre sits a young man (Dionysos) with ram's horns, originally painted yellow, on his head: he wears an upper garment, which has slipped on to his lap, and yellow shoes. In his right hand he holds a cup, in his left a lyre, both partly yellow. Before him stands a woman (Ariadne?) in *chiton* and *himation*, who offers him a bunch of grapes with her left hand, a white wreath with her right: her arm-bands and necklaces are yellow. Behind Dionysos stands a second woman leaning on a pillar, which is yellow in part. She wears a *chiton*, a small fluttering garment, shoes, arm-bands and necklaces, and holds in her right hand an *aldabstron* (?). At her back is a fillet; and in the field are four partly yellow rosettes.

to Rhea¹. If so, the scene is presumably laid in the *Ammonéion*. The bay-branches suggest that the Apulian artist based his conception of this far off spot on the more familiar oracle of the Delphic Apollon. But it may be remarked that the elder *Ammon* wears a bay-wreath on coins of Kyrene, Tenos, and Metapontum, as does his younger counterpart on coins of Metapontum and Tenos. We are not, therefore, forced to assume a confusion or contamination of cults.

In view of the foregoing evidence it would, I think, be unsafe to conclude that the connexion between Zeus *Ammon* and Dionysos was essentially late. Herodotos² states that at Meroë, where Zeus (*Ammon*) had an oracle, the only gods worshipped were Zeus and Dionysos. And the coins at least suffice to prove the existence of a youthful *Ammon* as early as the fifth century B.C.

(θ) The Oasis of Siwah.

The last glimpse that we get of the *Ammonéion* in classical times is a sad one. Athanasios states that in 356 A.D. many elderly bishops of the Egyptian church were driven out by Georgios the Arian persecutor; those from Libye were banished to the Great Oasis, those from the Thebaïd to the Ammonian district³. After this, darkness descends and shuts out the view.

From the fourth to the eighteenth century we know nothing of the *Ammonéion* beyond a few casual and partly fantastic references

¹ According to the romantic version of Diod. 3. 71—73, Rhea and Kronos took with them the Titans and attacked *Ammon*, who thereupon fled to Crete and, having married Krete the daughter of one of the reigning Kouretes, became lord of the district. Meantime Kronos and Rhea had usurped the realm of *Ammon*. But Dionysos, helped by the Amazons and Athena, vanquished the Titans and reinstated his father. He took the usurpers captive, but promised them forgiveness and exhorted them to be reconciled with him. Rhea loyally accepted his overtures: Kronos was insincere. After this, Dionysos founded the oracle of *Ammon*, and made the child Zeus king of Egypt. Etc., etc.

² Hdt. 2. 29. We must, however, remember that Dionysos may mean Osiris (*id.* 2. 42, 144).

³ Cp. Hdt. 2. 42 'Αμοῦν γὰρ Αἰγύπτιοι καλέονσι τὸν Δία, Plin. *nat. hist.* 6. 186 (of Meroe) delubrum Hammonis et ibi religiosum et toto tractu sacella.

⁴ Athanas. *ad imp. Const. apol.* 32 (i. 316 f. ed. Bened.) οἱ δὲ θαυμαστοὶ πλέον τι τῆς σῆς προσταξίως τοδιωτίως ὑπὲρ τριῶν ἐπαρχίας εἰς ἐρήμους καὶ ἀήθεις καὶ φοβεροὺς τόπους ἐξώρισαν γερωντας ἀνθρώπων καὶ πολυετείς ἐπισκόπους. οἱ μὲν γὰρ ἀπὸ τῆς Λιβύης εἰς τὴν μεγάλην Ὅασιν, οἱ δὲ ἀπὸ τῆς Θεβαΐδος εἰς τὴν Ἀμμωνιακὴν τῆς Λιβύης ἀπεστάλησαν, *hist. in Arabic geographers¹. The Arabs obtained possession of Egypt and presumably of the Oases also in the seventh century. A certain king Kofthim—we are told—built two towns in remote Oases and equipped them with palaces, fountains, pools, brazen pillars and magic idols: the traveller who set eyes upon the idols stood rooted to the spot until he died, unless one of the natives released him by blowing in his face². Another king Ssa, son of Assad, established a town in a distant Oasis (probably that of *Ammon*), which was attacked in 708 A.D. by Musa, son of Nosseir. Musa marched his troops for seven days through the desert, but found the town protected by walls and gates of brass. He made a futile attempt to take it, and was forced to retire with heavy losses³. In 943—944 A.D. the king of the Oases was Abdemelik Ben Meruan, of the Lewatah tribe, who had several thousand riders under his command. Seven years later the king of the Nubians came, explored the Oases, and carried off many prisoners. The devastation must have been great; for Edrisi, the *Geographus Nubiensis*, says that in his day (*s. xii*) the small Oases had no inhabitants, though water, trees, and ruined buildings were still to be seen⁴. It was otherwise with the Oasis of Santariah or Siwah, which in Edrisi's time was occupied by Mohammedans with a resident *Imam*⁵. Abulfeda (1273—1331 A.D.) describes the Oases with their palm-groves and springs as islands in the sand⁶. Makrisi (1364—1441 A.D.) has more to say:

'The town Santariah forms part of the Oases and was built by Minakiush, one of the old Coptic Kings, founder of the town Achmîm.... He built it (Santariah) in the form of a square of white stone. In each wall there was a gate, from which a street led to the opposite wall. Each of these streets had gates right and left, leading to streets that traversed the town. In the middle of the town was a circus surrounded by seven rows of steps and crowned by a cupola of laquered wood resting on costly marble columns. In the middle of the circus rose a marble tower supporting a statue of black granite, which every day turned on its axis, following precisely the course of the sun. Under the dome on every side figures were suspended, which whistled and spoke in diverse languages. On the highest step of the circus the king took his place, and beside him his sons, his kinsfolk, and the princes. On the second step sat the high priests and the viziers; on the third, the commanders of the army; on

¹ These were collected by Langlès 'Mémoire sur les oases d'après les auteurs arabes' in F. C. Hornemann *Voyages dans l'intérieur de l'Afrique* Paris 1802 Appendice no. 2, and are conveniently summarised by G. Parthey 'Das Orakel und die Oase des Ammon' in the *Abh. d. berl. 378 The Ram and the Sun in Egypt

the fourth, philosophers, astronomers, physicians, and masters of learning ; on the fifth, builders ; on the sixth, foremen of guilds ; and lastly on the seventh, the bulk of the commoners. Each class was bidden "to look upon those only that were below it, not those that were above it, for they would never be on an equality with their betters." This rule was an education in itself. The wife of Minakiush slew him with a knife : so he died after a reign of sixty years¹.

Makrisi further tells at third hand how the officer of a certain *Emir* saw in the country of the Oases an orange-tree, which every year bore 14,000 ripe fruit². The Oasis of Santariah or Siwah was in his own day inhabited by 600 Berbers, who spoke a dialect akin to Zialah or Zenatah and suffered much from fevers and evil spirits³. Leo Africanus (c. 1517 A.D.) speaks of the Oases as a district situated to the west of Egypt in the Libyan desert. The district comprised three fortresses, numerous houses, fruitful fields and dates in great abundance. Its inhabitants were almost wholly black, very rich, and remarkably avaricious⁴.

The first European to reach the Oasis of Siwah in modern times and to recognise in it the long-lost *Ammôneion* was the English traveller W. G. Browne, who left Alexandria with a caravan of Arab traders on February 24, 1792, and, following much the same route as Alexander the Great, entered Siwah on March 9. Here he stayed four days, making geographical, ethnographical, and archaeological notes⁵. A few years later came the German F. C. Hornemann, who, obtaining a permit from General Bonaparte then in Egypt, joined a large company of pilgrims returning from Mecca *viâ* Cairo to the west of Africa and spent eight days in Siwah, September 22—29, 1798. His observations confirmed those of Browne⁶. The French were next in the field. The incautious and ill-starred engineer Boutin or Butin towards the middle of 1819⁷, and the more careful and successful traveller Cailliaud at

⁵ W. G. Browne *Travels in Africa, Egypt and Syria, from the year 1792 to 1798* London 1799. There is also a German translation (Leipzig und Gera 1800).

⁶ *Fr. Hornemanns Tagebuch seiner Reise von Cairo nach Murzuck, der Hauptstadt des Königreichs Fessan in Afrika in den Jahren 1797 und 1798*, aus der deutschen Handschrift desselben herausgegeben von Carl König, Weimar 1802. Hornemann himself, having been commissioned to explore north Africa by the London Association for promoting the Discovery of the Interior Parts of Africa, continued his route westwards from Siwah and never returned home. But his letters were forwarded to England by Bonaparte. The minute-book of the African Association containing an account of them formed part of the Leake collection and is now preserved at Cambridge.

⁷ Parthey *op. cit.* p. 177. Boutin took with him a portable boat, in which to navigate

its close', both reached their distant goal. Others followed suit, among whom may be specially mentioned the Prussian general H. von Minutoli and his party (1820)², the Englishmen G. A. Hoskins (1835)³ and Bayle St John (1847)⁴, the Scot J. Hamilton (1853)⁵, and the German G. Rohlfs (1869, 1874)⁶. But the journey even now-a-days is seldom undertaken: the desert is a serious deterrent⁸, and the inhabitants have no great love for strangers⁹.

the mysterious Lake Arashieh; but the inhabitants of Siwah burnt his boat, and did their best to rob and murder the explorer—a fate that ultimately overtook him in the mountains of Syria.

⁸ Archonides or Andron of Argos, a man who all his life ate plenty of dry salt food without feeling thirsty or drinking, travelled twice to the Oasis of Ammon on a diet of dry meal; and Magon of Carthage did so thrice (Aristot. *frag.* 99 Rose 1494 a 7 ff.). Their 'record' remains unbroken!

⁹ A certain Mr Blunt, who came to Siwah disguised as an Arab, was detected and

white salt: it was dug up in large crystals, packed in palm-baskets, and taken by certain priests of *Ammon* to Egypt as a gift for the Persian king or other favoured individual, being in request for sacrificial purposes¹. It is still an article of export. As to the shells mentioned by Eratosthenes, G. Rohlfs found and figured a variety of fossils, including astroite, ostracite, etc.² He also obtained from a running ditch near Siwah a number of small fish, which K. A. Zittel identifies with the *Cyprinodon dispar* discovered by Desor in the artesian wells of Algeria and regards as a relic of the primeval Sahara-lake³.

Fig. 289.

Despite the saline character of its soil, the Oasis can boast more than thirty springs of fresh water. Of these the most famous, though no longer the most copious, is *Ain el hammam* (fig. 289)⁴

¹ Arrian 3. 4. 5 f., *itin. Alex.* 52 p. 160 Müller, Deinon *Persica frag.* 15 (*Frag. hist. Gr.* ii. 92 Müller) *ap.* Athen. 67 A—B, Eustath. *in Od.* p. 1500, 2. traditionally identified with the Fountain of the Sun¹. It measures about 110 paces in circumference, and is enclosed by an early wall still in excellent repair². The ancients believed that its temperature varied inversely with the height of the sun³—an error refuted by modern thermometers⁴ and due to the fact that the observers were themselves warmer by day than by night. G. Rohlfs took *Ain el hammam* to mean 'the Fountain of the Doves'; but G. Steindorff points out that it is rather 'the Fountain of the Bath'—he himself saw women and children bathing in it. I may add that *hammam*, 'bath,' is in reality the same word as that which forms the second element of *Ba'al-hammam*, so that the name of Zeus *Ammon* still haunts the Oasis at least in this modified and unrecognised shape.

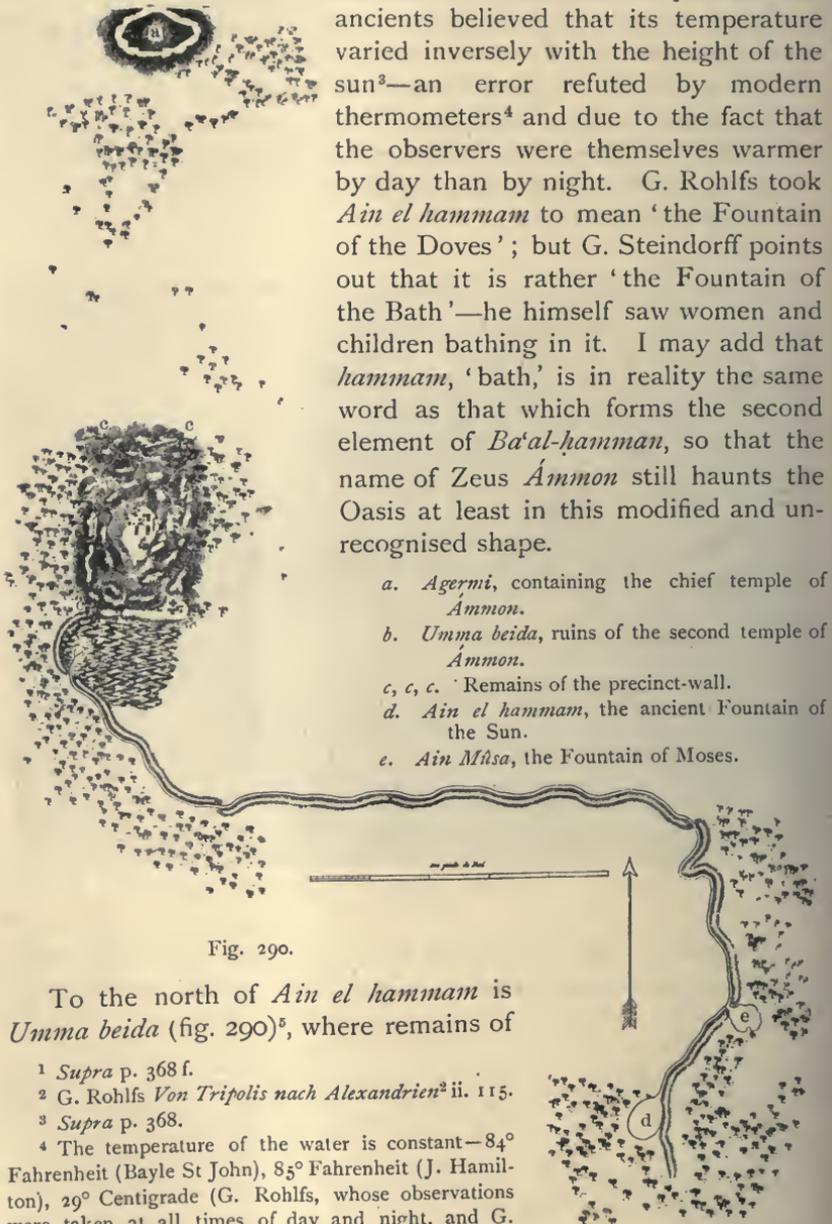

Fig. 290.

To the north of *Ain el hammam* is *Umma beida* (fig. 290)⁵, where remains of

¹ *Supra* p. 368 f.

² G. Rohlfs *Von Tripolis nach Alexandrien*² ii. 115.

³ *Supra* p. 368.

⁴ The temperature of the water is constant—84° Fahrenheit (Bayle St John), 85° Fahrenheit (J. Hamilton), 29° Centigrade (G. Rohlfs, whose observations were taken at all times of day and night, and G. Steindorff, who made repeated experiments always with the same result).

⁵ H. von Minutoli *Reise* etc. p. 372 Atlas pl. 6, 1: a = the village *Agermi*, b = the

the second or smaller temple of *Ammon*¹ are still to be seen. It is, however, falling more and more into decay. W. G. Browne (1792) saw five of its roofing stones yet in position and one on the ground. He gives the inside dimensions of the building as 32 ft long by 15 ft broad. F. C. Hornemann (1798) estimates the length roughly at 10 to 12 paces, the whole breadth at about 24 ft. But it is to H. von Minutoli (1820) that we owe the first detailed description of the temple². It appears from his account that the precinct, 70 paces long by 66 wide, was surrounded by a wall, of which the great corner-stones were *in situ*. Within this wall were traces of other walls—direction and purpose

Fig. 291.

uncertain. In the middle of the precinct rose a mass of limestone rock, artificially shaped to serve as a platform or stylobate some 8 ft high. The temple itself was built of limestone blocks, large and small, bonded with mortar. Orientated north and south, it comprised two parts—a *pronaos* and a *naos*. On the north the extant portion of the *pronaos*-wall was not quite $9\frac{1}{2}$ ft in length, and the larger of its side-walls was of about the same size. The temple-doorway was still standing. Minutoli sketched it from the

ruins *Umma beida*, *c* = remains of the precinct-wall, *d* = the Fountain of the Sun, *e* = another spring connected with it and forming a marsh to the south of the ruins.

¹ *Supra* p. 369.

north-east (fig. 201)¹ and from the south with the village *Agermi* in the distance (fig. 202): he also had copies made of its reliefs, which represent *Ammon* in Egyptian form (fig. 293)². In addition to this main doorway the *pronaos*, to judge from the gaps in its walls, had two side-entrances opposite to each other. The walls of the *naos* to east and west were still $15\frac{1}{2}$ ft long, $4\frac{2}{3}$ ft thick, and over 10 ft high³. The south wall had completely disappeared, so that the original length of the structure could not be determined. Three of the huge roofing stones, 5 ft broad by 3 ft thick, still spanned the entire breadth of the building ($24\frac{1}{3}$ ft): of

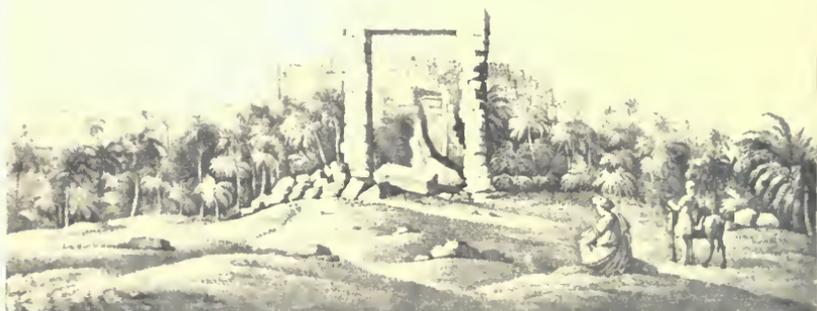

Fig. 292.

the five seen by Browne two had been overthrown through an earthquake in 1808⁴. The whole temple was covered, inside and outside, with reliefs and hieroglyphs. On the exterior and on the larger figures of the interior all traces of colour had vanished. Elsewhere the prevailing green and blue was fairly well preserved. Near the main entry was a ruined vault, which, Minutoli thought, might perhaps have belonged to a secret passage giving access to

¹ H. von Minutoli *op. cit.* Atlas pl. 7, 1.

² *Id. ib.* Atlas pl. 7, 2—taken from the hill *Gebel Drara-Enbrik*, where the quarries are situated.

³ *Id. ib.* Atlas pl. 10, 2—designs on the left of the main entry (pl. 7, 1).

⁴ Hornemann put the height at 27 ft: probably, as E. H. Toelken suggests, this included the stylobate of rock.

⁵ Cailliaud dates the earthquake in 1811.

the inner shrine. His guides spoke of an underground way from the temple to a hill full of catacombs just beyond the Fountain of the Sun. But the vault could not be explored without pumping apparatus.

G. Rohlfs¹ in 1869 found nothing of the precinct-wall left save the huge blocks forming its south-east angle. He reports that 'the upper part of the limestone rock, either by art or by nature, exhibits great blocks of alabaster, in which are curiously crystalized rosettes in many cases a foot in diameter.' The precise orientation of the temple was 348° with a deviation of 15° . No

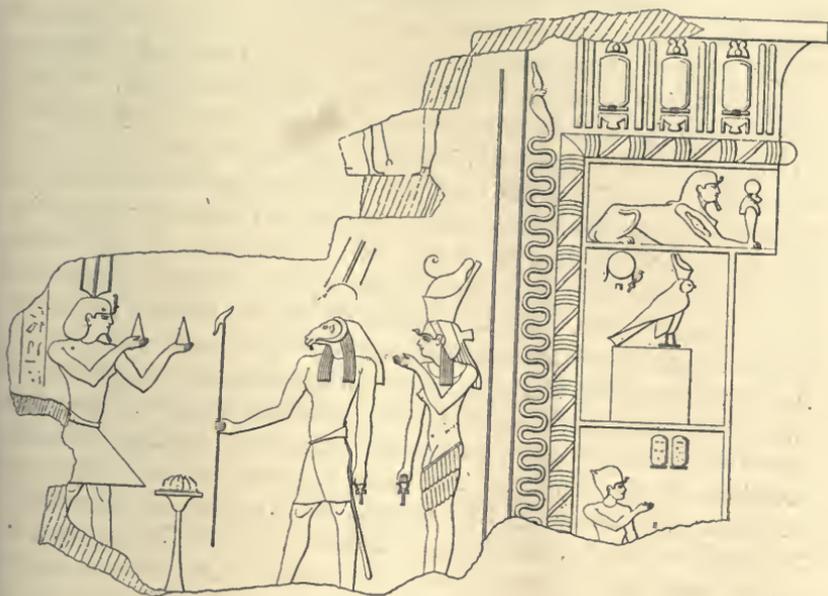

Fig. 293.

subterranean corridors are now to be seen, though the people talk of secret passages to Agermi and Siwah. Rohlfs further notes that the doorway seen by H. von Minutoli (1820) and by Bayle St John (1847), and with it the whole *prónaos*, have gone. He found, however, the side-walls of the *naós* standing to a height of about 25 ft and separated by a space of 16 ft. The extant walls were 14 and 10 ft long respectively, and were roofed in by three colossal monoliths, which on their under surface showed well-preserved eagles (*sic*) with outspread wings. Two roof-stones lay on the ground and fragments of perhaps two others. The outside of the *naós* appeared never to have had any hieroglyphs on it; and

¹ G. Rohlfs *Von Tripolis nach Alexandrien*² ii. 128 ff.

its reliefs were wholly weather-worn. But the inside still exhibited on the east wall 53 columns of hieroglyphs, of which the middle 47 were complete, and on the west wall 52, with 49 complete. The small blocks of the lower courses and the large blocks of the upper courses were alike covered with them. Below and above them were symbolic designs, between which in many places the original colouring, especially green and blue, could be seen. The best-preserved figure was that of the horned *Ámmon* seated at the south end of the temple to receive the homage of human figures with the heads of jackal and sparrow-hawk. Within the temple was a great block of marble, which on all four sides showed a large human head with ram's horns: this may have been the base on which stood the statue of Zeus *Ámmon*. The head, a hideous fright of twice life-size, doubtless had reference to him¹. Rohlfs was told by the natives that the temple had been built by *Iskender* (Alexander), the founder of *Skendria* (Alexandria)².

Thirty years later (1899) G. Steindorff³ was still able to do good service by making an accurate survey of the rapidly dwindling ruin and a transcript of its hieroglyphs. The west side-wall of the inner chamber has now collapsed, and with it the last of the roof-blocks have fallen. These blocks, of which several strew the ground, were decorated on their under surface with two rows of *uraeus*-snakes and vultures, representing Uatchit the goddess of the North and Nekhebet the goddess of the South⁴: the reliefs were enclosed by three bands of inscriptions dealing with the erection of the temple. The east side-wall, though damaged at the top, is standing to a height of 6.12 m. It consists of 26 limestone blocks, which attain a maximum length of 7 m. Its upper part had originally an ornamental frieze, sparrow-hawks sheltering the king's name with their wings, and below a series of sacrificial scenes in which the ruler of the Oasis also took part. Beneath these comes a lengthy ritual text in 51 columns. It speaks of the princely builder of the temple as 'the chief of the foreigners, Un-Amon, the blessed, the son of Nefret-ronpet.' Under the ritual text are reliefs in three registers. The highest tier shows a ram-headed Egyptian deity enthroned beneath a canopy. He has the horns of both Khnemu and Ámen⁵, the double plumes, the

¹ G. Rohlfs *ib.*² ii. 105 f. R. Pietschmann in Pauly—Wissowa *Real-Enc.* i. 1858 points out that *Ámmon* is often figured in Egyptian art with four ram's heads.

⁵ *Supra* p. 347.

solar disk and *uraeus* on his head. In his right hand he holds a sceptre, in his left the symbol of life, which he extends to a man kneeling before him. The deity is 'Amen-Râ, the lord of the councillors¹, the great god, who dwells in the Oasis.' His suppliant, Un-Amon, has an ostrich-feather upright on his brow, therein resembling the Timihû or Libyans as depicted in Egyptian art². Behind Amen-Râ stands his wife Mut, the 'Mother'-goddess, wearing the united crowns of the South and the North. Behind Un-Amon are seen several other deities including the human-headed Amen-Râ of Thebes (*Zeus Thebaïcus*)³ and his consort Mut. The next tier of reliefs shows a god with the head of a sparrow-hawk, Shu (Herakles)⁴ representing the dry atmosphere and his wife the lion-headed Tefnut representing the moisture of the sky, Set (Typhon), the earth-god Seb with his wife the sky-goddess Nut, and another goddess whose name is lost. The lowest tier figures Horos with the head of a sparrow-hawk, Uatchit and Nekhebet, and the ram-headed Khnemu of Elephantine. Steindorff notes that Un-Amon appears to have built this temple in the reign of Nehtarheb (Nektanebes), a king of the thirtieth dynasty, who reigned 378—361 B.C., and points out that it was therefore standing in all its glory at the time of Alexander's visit.

The chief temple of *Ammon* was however that situated on the Akropolis of the Ammonians, now known as *Agermi*⁵. This limestone hill has on its summit an open *piazza* surrounded by houses, in one of which lives the *sheikh*, the richest man of the whole Oasis. H. von Minutoli caught a glimpse of the temple wall, which crowns the precipitous northern side of the hill, but was prevented from entering the place and did not discover its true character. J. Hamilton made his way into the building, and was the first to report that it is an Egyptian temple with *pronaos* and *naos* complete. He also found near by an ancient well some 50 ft deep. A more detailed account of this temple was given by G. Rohlfs, who recognised in it the great temple of Ammon. He had many obstacles to overcome. Grime, smoke and darkness combined to make investigation difficult. And, worse still, the temple had been largely filled in and blocked by the houses of a crowded modern population. Nevertheless this indefatigable explorer contrived to make out the main outlines of the ancient structure. Its

¹ This title marks Amen-Râ as a giver of oracles.

⁵ This identification was first made by the French consul-general Drovetty in 1820.

388 The Ram and the Sun in Egypt

prónaos, now roofless, is a chamber 15 ft long by 10 ft broad, with a single great doorway as the main entry on the south side (fig. 294). No hieroglyphs were here to be seen. On the north two large doors of Egyptian design 18 ft high lead into the *naós*. This measures 24 ft long by 18 ft broad and is 18 ft in height. In

Fig. 294.

it Rohlfs found numerous hieroglyphs and reliefs. With the help of several candles he copied some of them and in due time submitted them to the Egyptologist H. Brugsch. Brugsch reported 'that the texts are written in old Egyptian script, that they refer to a series of male deities which, to judge from their extant crowns,

represent Ammon and the ram-headed Harschaf the Arsaphes of the Greeks, and lastly that the texts contained speeches of those deities addressing a god named Urtestu that is Lord of the nations. This appellative proves that the king was not a native but must have belonged to a foreign dynasty.' Here again more exact results were obtained by Steindorff¹. The reliefs are accompanied by inscriptions of the fourth century B.C. On one side of the *naôb* stands Set-erdaïs, 'chief of the foreigners, the son of the chief of the foreigners, Retneb,' and pays homage to a row of deities with Amen himself at their head. The chief, whose figure is much damaged, wears the costume of an Egyptian king but, like the light-skinned Libyans mentioned above, has an ostrich-plume in his hair. On the other side of the *naôb* a similar scene shows the real Pharaoh making an offering to the gods. He wears the crown of Lower Egypt; and the name inscribed in his cartouche may be completed as *Khnenma-Re*, the first name of Akoris or Hakoris, a king of the twenty-ninth dynasty, who reigned at Mendes 396—383 B.C. and succeeded in freeing his realm from the Persian yoke. Whether he actually built this temple or merely redecorated it, can hardly be decided.

Rohlfs also discovered in the thickness of the inner long wall on the east side a secret passage 2 ft broad leading to a great spring on the south side of the *piazza*. This spring filled a deep and roomy cutting in the rock. Looking down into it, he could see just above the level of the water a small platform on which the priests' passage ended. To the south of the temple he found a great wall of colossal blocks, but was unable to trace it far. Outside *Agermi* on the south-west are other remains of walls, perhaps those of an outer precinct. The net result of these discoveries was fully to confirm the accuracy of the description cited above from Diodoros².

About a furlong to the south of *Agermi* Rohlfs detected the ruins of a Greek temple lying east and west. Its outline could be made out by means of blocks projecting from the soil; but of the upper part of the structure nothing was to be seen beyond the shafts of two fluted columns. The *débris* formed a mound 18 paces long by 14 broad.

Some twelve kilometers to the east of *Agermi* Steindorff³ found the remains of another building known as *Qasr el-Ghashashâm*.

¹ G. Steindorff *Durch die Libysche Wüste zur Amonsoase* pp. 60, 118 with figs. 67, 68 (here reproduced as fig. 294).

² *Supra* p. 369.

³ G. Steindorff *Durch die Libysche Wüste zur Amonsoase* p. 125 f. with fig. 78.

A single wall faced with limestone blocks is *in situ*. But a lintel decorated with the winged solar disk and a few lengths of dentils suffice to prove that here stood a Graeco-Egyptian temple. An adjacent mound yielded Greek sherds and copper coins, while away to the east stretch the relics of a once flourishing Greek community.

Lastly¹, at a distance of 1½ hours to the south-west of Siwah, on the edge of the oasis and the sand dunes, Rohlfs discovered a mound 12 ft square on which are sundry limestone blocks. The name *Bab el medina*, 'the Town-gate,' suggests that here once stood a triumphal arch. A marble ram (fig. 295)² obtained from

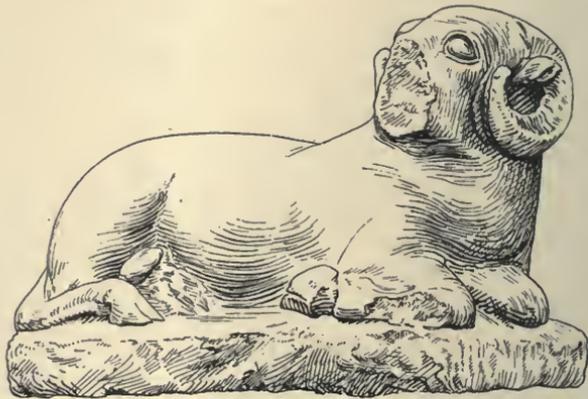

Fig. 295.

this remote spot was brought back in triumph to the Berlin Museum.

ii. The Ram and the Sun in Phrygia. Zeus *Sabázios*.

Another cult in which the ram played an important part was that of the Phrygian Zeus *Sabázios*.

The extant representations of this deity have been carefully collected and discussed first by C. Blinkenberg and subsequently by Eisele. The latter concludes that, though they may all belong to the Roman imperial age, yet in most cases they imply an older Phrygian type, probably that of some famous cult-image³. The

¹ The ruins of *Bled el rum* in the extreme west of the oasis, regarded by W. G. Browne as a Doric temple (!) and first recognised by Bayle St John as a copy of the temple at *Umma beida*, are described by G. Rohlfs *Von Tripolis nach Alexandrien*² ii. 92 f. and by G. Steindorff *Durch die Libysche Wüste zur Amonsoase* p. 126 f. with figs. 79, 80, 81.

⁴ Eisele *loc. cit.* p. 248 (especially the bronze from Amiens published in the *Rev. Arch.* 1894 ii. 373 f., Reinach *Rép. Stat.* ii. 478 no. 3, and its fellow in Babelon—Blanchet *Cat. Bronzes de la Bibl. Nat.* p. 289 no. 674 fig. = my fig. 297).

⁵ Eisele *loc. cit.* p. 248.

on the ram's head (pl. xxvii)¹. The persistence of the ram as a footstool is most noteworthy. In the art of the Babylonians, Hittites, etc., a god standing on an animal is commonly explained as a superposition of the later on the earlier form of the same divine being. Similarly I should conjecture that the Phrygian *Sabazios* was originally conceived as a ram and remained essentially a ram-god.

But, just as the Egyptian ram-god *Immon* had sacred snakes, and was said to have become a snake to win his bride², so the Phrygian ram-god *Sabazios* had sacred puff adders³ and was himself said to have taken their form for the like purpose. Both animals figure in his myth, which has come down to us with some rhetorical embellishment in the pages of Clement and other apologists⁴. Their accounts, printed in full below, may be thus

¹ Cf. Blinkenberg *Die Kerkelzische Studien* Copenhagen and Leipzig 1904 p. 90 ff. pl. 2 (on a scale of 2) in the Nationalmuseet at Copenhagen. In the centre stands *Sabazios* wearing Phrygian costume. His right hand holds a pine-cone; his left, a sceptre tipped with a votive hand. His right foot rests on a ram's head. Round him are numerous attributes etc., including the thunderbolt and eagle of Zeus. All these are placed in a distyle temple, the pediment of which contains the sun-god's chariot between two stars. The upper angles of the plate are occupied by the Dioskouroi with their horses.

summarised :—Zeus, desiring to consort with his own mother Deo or Demeter, turned himself into a bull and so compassed his end.

μητέρα τὴν Δηώ, ἐκλαθόμενος τοῦ προτέρου μύσου [πατὴρ καὶ φθορεὺς κόρης ὁ Ζεὺς] καὶ μίγνυται δράκων γενόμενος, ὅς ἦν, ἐλεγχεῖς. Σαβαζίων γοῦν μυστηρίων σύμβολον τοῖς μνουμένοις ὁ διὰ κόλπου θεός· δράκων δέ ἐστιν οὗτος, διεκλόμενος τοῦ κόλπου τῶν τελουμένων, ἔλεγχος ἀκρασίας Διός. κενεὶ καὶ ἡ Φερέφαττα παῖδα ταυρόμορφον· ἀμέλει, φησί τις ποιητῆς εἰδωλικός,

ταῦρος δράκοντος καὶ πατὴρ ταύρου δράκων.

ἐν ὄρει τὸ κρῆφιον, βουκόλος, τὸ κέντρον (κέντριον? Dieterich),

βουκολικόν, οἶμαι, κέντρον τὸν νάρθηκα ἐπικαλῶν, ὃν δὴ ἀναστέφουσιν οἱ βᾶκχοι.

Arnob. *adv. nat.* 5. 20 f. erat nobis consilium praeterire, praetervehi illa etiam mysteria, quibus Phrygia initiatur atque omnis gens illa, nisi nomen interpositum his Iovis prohiberet nos strictim iniurias eius ignominiasque transire... quomdam Diespiter, inquit, cum in Cererem (*inicare* codd.: *inire* Scaliger) suam matrem libidinibus improbis atque inconcessis cupiditatibus aestuaret, (nam genetrix haec Iovis regionis eius ab accolis traditur) neque tamen auderet id quod procaci adpetitione conceperat apertissima vi petere, ingeniosas comminiscitur captiones, quibus nihil tale metuentem castitate imminueret genetricem: fit ex deo taurus et sub pecoris specie subessoris animum atque audaciam celans in securam et nesciam repentina immittitur vi furens, agit incestius (v. l. *incestus*) res suas et prodita per libidinem fraude intellectus et cognitus evolat: ardescit furii atque indignationibus mater, spumat; anhelat, exaestuatur, nec fremitu continere tempestatemque irarum valens ex continua passione Brimo (*primo* codd.) deinceps ut appellaretur adsumpsit, neque alia cordi est res ei, quam ut (*quin* codd.) audaciam filii poenis quibus potis est persequatur. Iuppiter satagit fractus metu nec quibus remediis leniat violatae animos reperit. fundit preces et supplicat: obstructae sunt dolentes (v. l. *dolentis*) aures. adlegatur deorum universus ordo: nullius auctoritas tanta est ut audiatur; ad postremum filius vias satisfactionis inquirens comminiscitur remedium tale. arietem nobilem bene grandibus cum testiculis deligit, exsecat hos ipse et lanato exiit ex folliculi tegmine. accedens maerens et summissus ad matrem et, tamquam ipse sententia condemnasset se sua, in gremium proicit et facit (*iacit* codd.) hos eius. virilitate pignoris visa sumit animum mitiorem et concepti fetus revocatur ad curam: parit mensem post decimum luculenti filiam corporis, quam aetas mortalium consequens modo Liberam, modo Proserpinam nuncupavit. quam cum verveceus (*virviriceus* codd.) Iuppiter bene validam, floridam et suci esse conspiceret plenioris, oblitus paulo ante quid malorum et sceleris esset adgressus et temeritatis quantum, redit ad priores actus, et quia nefarium videbatur satis patrem cum filia comminus uxoria coniugatione misceri, in draconis terribilem formam migrat, ingentibus spiris pavefactam colligat virginem et sub obtentu fero mollissimis ludit atque adulatur amplexibus. fit ut ipsa de semine fortissimi compleatur Iovis, sed non eadem condicione qua mater: nam illa filiam reddidit liniamentis descriptam suis, at ex partu virginis tauri species (*specie* codd.) fusa, Iovialis monumenta pellaciae. auctorem aliquis desiderabit rei: tum illum citabimus Tarentinum notumque senarium, quem antiquitas canit dicens: *taurus draconem genuit, et taurum draco.* ipsa novissime sacra et ritus initiationis ipsius, quibus Sebadii nomen est, testimonio esse poterunt veritati, in quibus aureus coluber in sinum demittitur (*dimittitur* codd.) consecratis et eximitur rursus ab inferioribus partibus atque imis. *Id. ib.* 5. 37 Iuppiter, inquit, in taurum versus concubitum matris suae Cereris adpetivit: ut expositum supra est, nominibus his tellus et labens pluvia nuncupatur. legem allegoricam video tenebrosis ambiguitatibus explicatam. irata Ceres est et exarsit et arietis proles pro poena atque ultione suscepit. hoc iterum video communibus in proloquiis promptum; nam et ira et testes, satisfactio, suis in moribus et condicionibus dicta sunt. quid ergo hic accidit, ut ab Iove, qui pluvia, et ab Cerere, quae appellata est terra, res transiret ad verum Iovem atque ad rerum simplicissimam dictionem?

Firm. Mat. 10 Sebazium colentes Iovem anguem, cum initiant (v. l. *initiantur*), per

Deo in fierce anger took the title *Brimó*, 'the Wrathful,' and would not be appeased till Zeus came before her in a mood of mock-repentance, pretended to have made a eunuch of himself, and in proof of his words flung the severed parts into her lap. In reality they were those of a fine ram, which he had gelded. The issue of his union with Deo was Kore or Pherephatta, with whom he again had intercourse under the form of a monstrous snake. This time the offspring was shaped like a bull. Hence the well-known line:

Bull begat Snake, Snake begat Bull.

Hence too the practice of those who were initiated into the rites of Zeus *Sabázios* by passing a golden adder through their bosoms and out below.

In this crude, not to say repulsive, tale we have beyond a doubt the aetiological myth of the *Sabázios*-cult. The devotees of the great mother-goddess sacrificed to her their own virility or, failing that, the virility of a ram¹. Why they did so, we do not know for certain. Dr Farnell² suggests that they wished to assimilate themselves to her and took this desperate way of becoming feminine, or at least non-masculine. But this explanation hardly fits all the facts³. More probably the worshippers sought to increase the

sinum ducunt, *id.* 26. 1 sequitur adhuc aliud symbolum, quod pro magno miserorum hominum credulis auribus traditur: ταύρος δράκοντος καὶ ταύρου δράκων (δράκων ταύρου Wower) πατήρ.

¹ H. Hepding *Attis seine Mythen und sein Kult* Gieszen 1903 p. 192: 'Diese Erzählung sieht aus wie das *atvion* für Ablösung der Selbstentmannung durch ein Widderopfer (*criobolium*?).' So too Frazer *Golden Bough*³: Adonis Attis Osiris² p. 224 n. 1.

² Farnell *Cults of Gk. States* iii. 300 f. (of the Γάλλοι): 'Even the self-mutilation necessary for the attainment of the status of the eunuch-priest may have arisen from the ecstatic craving to assimilate oneself to the goddess and to charge oneself with her power, the female dress being thereupon assumed to complete the transformation.' Cp. also W. Leonhard *Hettiter und Amazonen* Leipzig and Berlin 1911 p. 131 ff.

Gruppe *Gr. Myth. Rel.* p. 1545 n. 5 is content to explain the rite as primarily 'eine Poenitz' and cp. Arnob. *adv. nat.* 5. 7 *mammās sibi demetit Galli filia pellicis, ib.* 5. 13 *quid admiserat Gallus, quid pellicis filia, ut ille se viro, haec manmarum honestate privaret?* But this aetiological tale is equally intelligible on Farnell's showing (assimilation to the Amazonian goddess). Nor can we lay stress on the view of the Naassenes (Ophites) that the emasculated Attis symbolises the soul freed from sensuality (Hippolyt. *ref. haeres.* 5. 7 p. 99 Miller). Other practices of the Γάλλοι Gruppe regards as vices arising 'aus den niedrigsten Motiven.' Yet even these might be covered by Farnell's charitable hypothesis.

E.g. the deposition of the *genitalia* in the 'chambers' of Rhea *Lobrine* (schol. Nik. *alex.* 8 Λοβρίνης θαλάμαι (θαλάμοι *codd.*)· τόποι ἱεροὶ ὑπὸ γείῳ, ἀνακειμένοι τῇ 'Ρέα, ὅπου ἐκτεμνόμενοι τὰ μῆδεα κατετίθεντο οἱ τῶν Ἄττει καὶ τῇ 'Ρέα λατρεύοντες. εἰσι δὲ τὰ Λόβρινα ὄρη Φρυγίας ἢ τόπος Κυζίκου· κ.τ.λ.). On Mt. Lobrinon see F. W. Hasluck *Cyzicus* Cambridge 1910 p. 219. Apparently the relics were buried in the ground and *stélai*,

fertilising powers of their goddess by thus thrusting upon her their own fertility. As Dr Frazer¹ has argued *à propos* of eunuch priests in the service of Asiatic goddesses generally,—‘These feminine deities required to receive from their male ministers, who personated the divine lovers, the means of discharging their beneficent functions: they had themselves to be impregnated by the life-giving energy before they could transmit it to the world.’ Further reflexion will, I think, show that herein lies the true explanation of the Phrygian rite. *Sabázios*-mystics referred their action to the example of the god—‘this wether-sheep Zeus’ (*verveceus Iuppiter*), as Arnobius contemptuously calls him². Nay more, they were believed to have borrowed his name and to have been dubbed *Saboi* because he was *Sabós*³. It is therefore hard to resist the

possibly of phallic form, erected over them: this I infer from Hesych. θαλάμια· στήλαι ἐπικείμεναι τοῖς αἰδοίοις τῶν ἀποκόπων. See further the passages quoted by Hepding *op. cit.* p. 164. Gruppe *Gr. Myth. Rel.* p. 1545 f. justly observes that such practices attest ‘die alte Vorstellung von der Ehe mit der Göttin.’

¹ Frazer *Golden Bough*³: Adonis Attis Osiris² p. 224.

² Arnob. *adv. nat.* 5. 21 cited *supra* p. 392 n. 5 *med.*

A. de Gubernatis *Zoological Mythology* London 1872 i. 414 gives an interesting parallel from the legend of Alfalyâ in the *Râmâyana*: ‘It is said in this passage that the god Indras was one day condemned to lose his testicles by the malediction of the fishis Gâutamas, with whose wife, Ahalyâ, he had committed adultery. The gods, moved to pity, took the testicles of a ram and gave them to Indras, who was therefore called Meshâṅḍas; on this account, says the Râmâyana, the Pitaras feed on wethers, and not on rams, in funeral oblations.’ Indras is himself called a ram in a Vedic hymn (*Rig-veda* I. 51. 1 cited *ib.* i. 403).

³ Phot. *lex. s.v.* Σαβούς καὶ Σαβάς καὶ Σαβαζίου· τοὺς βακχεύοντας τῷ Σαβαζίῳ· τὸ γὰρ σαβάζειν τῷ θεῷ τοῦτο· ὑπὸ δὲ τινῶν ὁ Διόνυσος Σαβός καλεῖται, Harpokr. *s.v.* Σαβοί· Δημοσθένης ὑπὲρ Κτησιφώντος (Dem. *de cor.* 260 εὐοῖ σαβοῖ). οἱ μὲν Σαβούς λεγέσθαι τοὺς τελουμένους τῷ Σαβαζίῳ, τοῦτέστι τῷ Διονύσῳ, καθάπερ τοὺς τῷ Βάκχῳ Βάκχους. τὸν δὲ αὐτὸν εἶναι Σαβάζιον καὶ Διόνυσον φασὶν ἄλλοι τε καὶ Ἀμφίθεος δευτέρῳ περὶ Ἡρακλείας (*Nymphis frag.* 11 (*Frag. hist. It is obvious that such passages would lend themselves indifferently to two opposite views: (a) that the *Saboi* were called after *Sabós*, (b) that *Sabós* was called after the

conviction that the initiate actually posed as the divine consort of the mother-goddess. Nevertheless, as A. Dieterich has pointed out¹, the culminating rite of *Sabázios* was a sacred marriage in which the god, represented by the golden adder, was drawn through the bosom of his worshipper; and here the worshipper, whether man or woman, is conceived as female, being none other than the bride of the god. We have, then, in this difficult and complex cult to reckon with the amazing fact that the mystic was identified first with the god, and then with the goddess! Two ways of escape from this improbable situation present themselves. Either we must fall back after all on Dr Farnell's explanation; or—and this I should prefer—we must assume that in course of time, perhaps with the shift from mother-kin to father-kin, the ritual had altered. The old rite, in which the initiate played the part of the god, was indeed retained, at least in a mitigated form; but its meaning was forgotten², and it was supplemented by a new rite, in which the initiate played the part of the goddess.

That development of some sort had taken place within the cult seems clear. Originally, as we have said, *Sabázios* appears to have been a ram-god. But in later times it was the snake not the ram that characterised him in the eyes of the multitude. Agreeably with this, the ram figures in the relations of Zeus *Sabázios* to the older goddess Deo or Demeter, the snake in his relations to the younger goddess Kore or Pherephatta. Behind both goddesses looms the venerable form of the earth-mother, from whom they were alike differentiated. For most scholars will certainly accept the well-considered verdict of Dr Farnell, who insists that in Demeter and Kore 'the single personality of the earth-goddess is dualized into

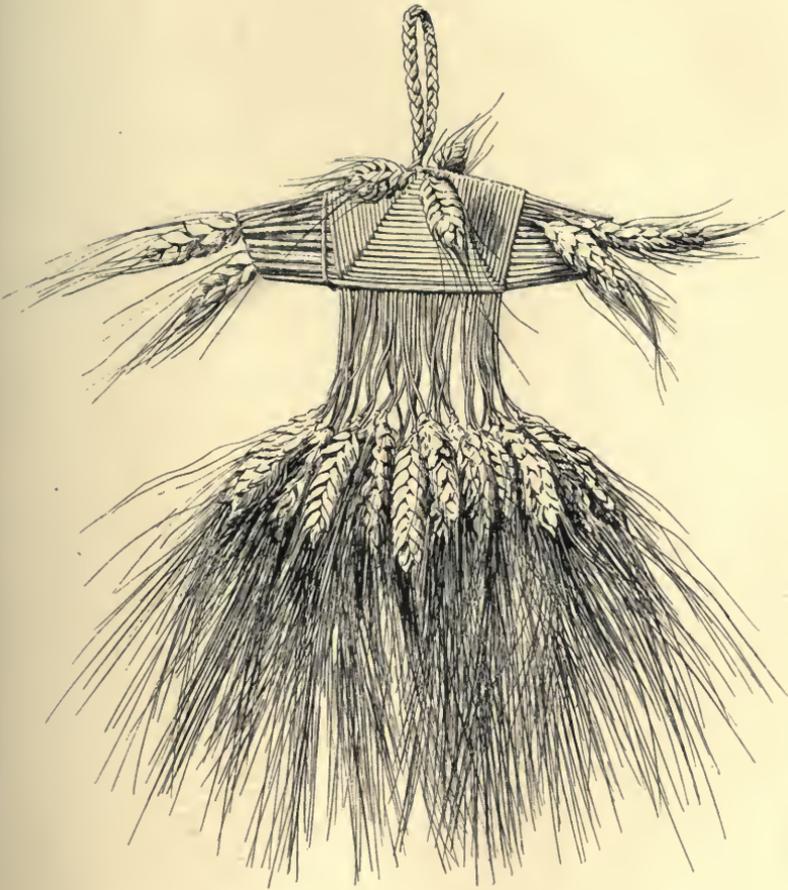

Saboi. Broadly speaking, we may say that the former is the ancient and the latter the modern interpretation.

¹ A. Dieterich *de hymnis Orphicis Marpurgi Cattorum* 1891 p. 38 f. (= *Kleine Schriften* Leipzig and Berlin 1911 p. 98 f.), *id. Mutter Erde* Leipzig and Berlin 1905 p. 110 ff., *id. Eine Mithrasliturgie*² Leipzig and Berlin 1910 p. 123 ff.: 'Der Ritus der durch den Schoss des Mysten gezogenen Schlange kann gar nichts anderes bedeuten sollen als die geschlechtliche Vereinigung des Gottes mit dem Einzuweihenden. Dem Sinne des rituellen Symbols ist es kein Anstoss, dass das Bild real unvorstellbar wird, wenn der Myste ein Mann ist. Dem Gotte gegenüber sind sie weiblich, wie das bei analogen Bräuchen gerade auch in jener späten Zeit die Gnostiker deutlich aussprechen. Der Gott ist immer das Männliche gegenüber dem Menschen, der sich ihm leiblich eint, mag man nun die $\psi\upsilon\chi\eta$ als weiblich in Auffassung und Deutung des Rituals ausdrücklich gemeint haben oder nicht.'

On the snake as phallic see F. L. W. Schwartz *Die altgriechische Schlangengottheiten*² Berlin 1897 p. 31, Gruppe *Gr. Myth. Rel.* p. 866 n. 1, R. Eisler *Weltenmantel und Himmelszelt* München 1910 i. 123 n. 4. J. Maehly *Die Schlange im Mythos und Cultus der classischen Völker* Basel 1867 p. 26 misses the point.

² See Varro *ap. Aug. de civ. Dei* 7. 24, Lucr. 2. 614 ff.

396¹

A Corn-maiden from Lesbos.

See page 397 n. 4.

two distinct and clearly correlated personalities¹, 'pre-Homeric offshoots of Gaia².' He further notes the significant fact that Demeter was often worshipped without her daughter, Kore rarely without her mother³. It is therefore permissible to suggest that there was a time when the Phrygian cult recognised one goddess not two, the earth-mother rather than the corn-mother and corn-daughter. Whatever the origin of the corn-daughter⁴, she may well have been later than the earliest form of the said cult.

I am therefore emboldened to hazard the provisional guess that *ab initio* the Phrygians worshipped a fertilising sky-father and a fertilised earth-mother; that originally and for long the goddess was of more importance than the god, being duplicated for the sake of fuller recognition; but that ultimately their positions came

¹ Farnell *Cults of Gk. States* iii. 114.

² *Id. ib.* iii. 119.

³ *Id. ib.* iii. 117.

⁴ Dr F. B. Jevons in his able book *An Introduction to the History of Religion* London 1896 p. 364 f. suggested that in the primitive rites of Eleusis a sheaf of ripe corn was dressed up as an old woman (cp. *h. Dem.* 101 γρητ̄ παλαιγενεί̄ ἐναλίγκιος of Demeter) and preserved from harvest to seed-time as the Corn-mother, and that the green blade or young plant when it appeared above ground was known as the Corn-maiden. He argued *ib.* p. 239 that rites appropriate to Kore were celebrated in the spring, rites appropriate to Demeter later in the year. Dr J. G. Frazer *Golden Bough*² ii. 216 f. advocates a similar view: 'It is probable, therefore, that Demeter and Proserpine, those stately and beautiful figures of Greek mythology, grew out of the same simple beliefs and practices which still prevail among our modern peasantry, and that they were represented by rude dolls made out of the yellow sheaves on many a harvest-field long before their breathing images were wrought in bronze and marble by the master hands of Phidias and Praxiteles. A reminiscence of that olden time—a scent, so to say, of the harvest-field—lingered to the last in the title of the Maiden (*Kore*) by which Proserpine was commonly known. Thus if the prototype of Demeter is the Corn-mother of Germany, the prototype of Proserpine is the harvest-Maiden, which, autumn after autumn, is still made from the last sheaf on the Braes of Balquhiddy. Indeed if we knew more about the peasant-farmers of ancient Greece we should probably find that even in classical times they continued annually to fashion their Corn-mothers (Demeters) and Maidens (Proserpines) out of the ripe corn on the harvest-fields.'

These opinions gain much in probability from a discovery made by my friend Dr W. H. D. Rouse, who obtained in Lesbos an actual Corn-maiden of strikingly human shape. By his kind permission I have had a drawing (pl. xxviii) made from the original, now deposited by the Folk-Lore Society in the ethnographical collection at Cambridge. Dr Rouse in *Folk-Lore* 1896 vii. 147 pl. 1 writes: 'The *first ears* are plaited into a curious shape; they call it ψάθα, or "mat," and no one could (or would) tell me any more about it. But its shape strikes me as very odd, and it bears no small resemblance to a human figure in a cloak, with arms outstretched....In some of them the neck is adorned with a necklace of beads. I saw these in all parts of Lesbos, always with the same shape; and also on the mainland of Greece, where they called it στράπι ("corn"). Is it fanciful to imagine that this is really a corn-baby? It ought, however, to be made of the last sheaf, not the first.' The scruple here expressed by Dr Rouse is surely of little import. If Kore was the *young* corn as distinguished from the old corn, her puppet might well be made of the first ears.

to be equalised or even reversed. Certain wiseacres in antiquity, venturing to expound the true inwards of the *Sabázios*-mysteries, asserted that Zeus was the rain and Demeter the earth¹. Arnobius takes them to task; but perhaps they were not after all so utterly misguided. Whether the bull-shaped offspring of the sky-father and the earth-mother was from the first a sharer in their cult is a question that may for the moment be postponed. There is no *à priori* reason to doubt it.

The Sabazian myth has much in common with Orphic tradition. For Orpheus too represented Zeus as united successively with his mother Rhea or Demeter and his daughter Phersephone or Kore. Rhea, to avoid him, turned into a snake. Thereupon he became another snake, and twined about her with the so-called Heracleian knot, which is symbolised by the *caduceus* of Hermes. Rhea bore to him Phersephone, a horned child with four eyes, two in their normal position, two on the forehead, and an extra face on the back of her neck. Zeus, again taking the form of a snake, consorted with his own monstrous progeny. The child born of this second union was Dionysos², *i.e.* the chthonian Dionysos or Zagreus³. Nonnos in Orphic vein describes him as a horned infant, who mounted the throne of Zeus himself and sat there grasping the thunderbolt in his tiny hand. But Hera soon roused the Titans to smear their faces with gypsum and to attack him as he was looking in a mirror. In his efforts to escape he took the forms of a youthful Zeus brandishing the *aigis*, an aged Kronos dropping rain, a babe of shifting shape, a wildly excited youth (*koûros*), a lion, a horse, a horned snake, a tiger, and a bull; in which final disguise he was cut to pieces by the knives of the Titans⁴. Elsewhere the same poet makes Dionysos himself recall his former exaltation:

‘Grant to my love one grace, o Phrygian Zeus.
Rhea my nurse told me while yet a child
How Zagreus—Dionysos long ago—
Once lisped thy name, and lo, thou gavest him

¹ *Supra* p. 392 n. 5 *sub fin.*

³ Hesych. *s.v.* Ζαγρεύς, *et. mag.* p. 406, 46 f. For a full collection of authorities see Lobeck *Aglaophamus* i. 547 ff.

⁴ Nonn. *Dion.* 6. 155 ff. Orphic influence again underlies Nonnos's statement (*Dion.* 7. 309 ff.) that Zeus, when he wooed and won Semele at Thebes, became successively a human form with bull's horns, a lion, a leopard, and a snake. The *ménagerie* was simultaneous, not successive, in the case of the Orphic Phanes, who combined in his own person the heads of rams, bulls, a snake and a lion (*supra* p. 92).

The lightning, thine own fiery shaft, and with it
 The roaring thunder and the rushing drops.
 So, still a babe, he was a second Zeus
 And sent the rain-storm!¹

With the details of this myth and their ritual implications we are not here concerned. But in passing we note one point of importance: Dionysos was conceived as in some sense Zeus reborn². This squares with the *Sabázios*-myth, in which the tauriform offspring of Kore duplicated the tauriform Zeus.

It would seem, then, that the myth of the Phrygian Zeus *Sabázios* and the myth of the Orphic Zeus were closely related but not identical. Reciprocal influence between the kindred cults is probable enough; and a certain assimilation to that of Attis will not be denied³. But, broadly speaking, we may claim that the parallelism of the Phrygian and Orphic traditions is best explained on the assumption that both alike were rooted in the religion of the old Thracο-Phrygian stock. Nor need we hesitate to describe the early Thracο-Phrygian god as Zeus, provided that we recognise once more the Dionysiac character of his cult. For we have already found evidence in north-eastern Phrygia of a very primitive

¹ *Id. ib.* 10. 292 ff., cp. 39. 71 ff.

² This made it easy for the systematisers to identify Dionysos, son of Zeus by Persephone, with *Sabázios*: Diod. 4. 4 μυθολογοῦσι δὲ τινες καὶ ἕτερον Διόνυσον γεγενῆσθαι πολὺ τοῖς χρόνοις προτεροῦντα τούτου. φασὶ γὰρ ἐκ Διὸς καὶ Φερσεφῶνης Διόνυσον γενέσθαι τὸν ὑπὸ τινῶν Σαβάζιον ὀνομαζόμενον, οὗ τὴν τε γένεσιν καὶ τὰς θυσίας καὶ τιμὰς νυκτερινὰς καὶ κρυφίους παρεισάγουσι διὰ τὴν ἀσχύνην τὴν ἐκ τῆς συνοσίας ἐπακολουθοῦσαν. λέγουσι δ' αὐτὸν ἀγγλισιὰ δινεγκεῖν, καὶ πρῶτον ἐπιχειρήσαι βοῦς ἐνγυρίου καὶ διὰ τούτων τὸν σπόρον τῶν καρπῶν ἐπιτελεῖν· ἀφ' οὗ δὴ καὶ κερατῶν αὐτὸν παρεισάγουσι, cp. *Lyd. de mens.* 4. 51 p. 106, 21 ff. Wünsch.

³ Farnell *Cults of Gk States* v. 185, Eisele in Roscher *Lex. Myth.* iv. 261 f.

Attis is identified with the Phrygian Zeus by Psell. *περὶ τῶν ὀνομάτων τῶν δικῶν* p. 109 Boissonade *ἔστι γὰρ ὁ μὲν ἄτις* (*Dem. de cor.* 260) *τῇ φρυγίᾳ γλώσση ὁ Ζεὺς, τὸ δὲ οὖς εὐκτικὸν ἔστι, τὸ δὲ σάβα ἔθνικόν· ὡς τὴν ἑλλην. εὐχὴν τοιαύτην εἶναι· “ὄϊς ὦ ζεῦ σαβάζε οὖϊς.”* Similarly Arrian. *frag.* 30 (*Frag. hist. Gr.* iii. 592 Müller) *αφ.* Eustath. *in II.* p. 565, 4 ff. *ἐν ταῦθα δὲ χρῆσιμον καὶ τὸ τοῦ Ἀρριανοῦ εἰπόντος ἐν Βιθυνιακοῖς ὅτι ἀνιόντες εἰς τὰ ἄκρα τῶν ὄρων Βιθυνοὶ ἐκάλεον Πάπαν τὸν Δία καὶ Ἄττιν τὸν αὐτόν.* The statement that Attis was called Πάπας is borne out by Diod. 3. 58 *τὸν προσαγορευόμενον μὲν Ἄττιν ὑπερον δ' ἐπικληθέντα Πάπαν*, Hippolyt. *ref. haeres.* 5. 9 p. 118 f., Miller *Ἄττι· σὲ καλοῦσι ... | οἱ Φρύγες ἄλλοτε μὲν Πάπαν κ.τ.λ., Corp. inscr. Lat.* v no. 766 (Aquilicia) *Attē Papa* etc.: see F. Cumont in Pauly—Wissowa *Real-Enc.* ii. 2180, H. Hepding *Attis seine Mythen und sein Kult* Gieszen 1903 p. 112 n. 5. That the Phrygian Zeus too was Πάπας appears from inscriptions: *Journ. Hell. Stud.* 1884 v. 260 no. 12 near Nakoleia Δι Πάπᾱ | εὐχὴν, *Corp. inscr. Gr.* iii no. 3817 Παπία Δι Σωτήρι εὐχὴν καὶ | Ἰρακλῆ Ἀνικῆτ[ω].

In the *Class. Rev.* 1904 xviii. 79 I drew attention to these equations, and suggested that Ἄττις and Πάπας alike meant ‘Fathér,’ the one being related to ἄττα, the other to πάππα. The Phrygian Zeus *Brontῶν* was entitled Πατήρ (*Jour. Hell. Stud.* 1882 iii. 123 f., *infra* ch. ii § 4 (d)). See further Hepding *op. cit.* p. 187 f.

Zeus, whose Dionysiac nature was clear from his altar adorned with two grape-bunches and a plough¹. Moreover, the name *Sabázios* is, as all admit, a mere ethnic². The *Sáboi* are called by Eustathios Thracians³, by Stephanos Phrygians⁴. Their god *Sábos* or *Sabázios* was a Thraco-Phrygian Zeus, whose *avatar* was a Thraco-Phrygian Dionysos.

Finally Zeus *Sabázios* came to be identified with the sun⁵. An inscription from Nikopolis in Moesia records a dedication to 'Zeus Helios the Mighty Lord, the Holy Sebazios⁶.' And in Thrace on the hill Zilmissos there was a circular hypaethral temple of *Sol Liber Sebadius*, the Dionysiac form of the same deity⁷.

¹ *Supra* p. 4. Note also Hesych. s.v. Βαγαῖος... ἡ Ζεὺς Φρύγιος. P. Kretschmer *Einleitung in die Geschichte der griechischen Sprache* Göttingen 1896 p. 81 'von *baga, gr. φᾶγος' showed that this epithet implied an early 'Oak'-god: cp. *Class. Rev.* 1904 xviii. 79.

² A. Fick *Vorgriechische Ortsnamen* Göttingen 1905 p. 65 f. 'Σάος oder Σάον Berg auf Samothrake, Σάος und Σαδώνησος die Insel selbst. Der thrakisch-phrygische Gott, der von den Griechen meist Σάβος, Σαβάζιος genannt wurde, hiess eigentlich Σάφος Σαφάδιος, was aus der phrygischen Inschrift von Blaundos Δι Σααζίω [Roscher *Lex. Myth.* iv. 236, 243 fig. 2] und σανάδα, σαδοῖ Hesych, wie nach Amerias die Silenen bei den Makedonen hießen, zweifellos, erwiesen wird. Σάβοι, richtiger demnach σάφοι "hiessen auch seine (des Gottes) Heiligthümer und die Geweihten" [Preller—Robert *Gr. Myth.* ii. 701 n. 1]. Damit ist der Sinn der Namen Σάος, Σαδ-ωνησος völlig aufgehellt; auch die thrakischen Σάιοι, mit denen Archilochos zu kämpfen hatte, mögen nach dem Gotte Σάφος benannt sein; *id. Hattiden und Danubier in Griechenland* Göttingen 1909 p. 46 f. 'Auf die thrakische Herkunft des Dionysos-Dienstes weisen Namen und Beinamen des Gottes. Διώνησος ist bloss gräzisiert, die richtige Form ist Δευ-Δεο-. Diese finden wir in Δενάδαι· οἱ Σάιοι ὑπ' Ἰλλυρίων Hesych... die Δενάδαι, Verehrer des Gottes Δευ-, hießen bei den Illyriern die thrakischen Diener des Gottes Σανος. Von den Thrakern überkamen zunächst die Makedonen den Dienst des Σανος, *Savadios*; darauf zielt die Glosse Hesychs σανάδα, σαδοῖ· Ἀμερίας τοὺς σειλείνους οὕτω καλεῖσθαι φησιν ὑπὸ Μακεδόνων. Die richtige Form wird wohl σανάδοι sein.' O. Hoffmann *Die Makedonen, ihre Sprache und ihr Volkstum* Göttingen 1906 p. 6 (cp. p. 97 f.): 'Die Σανάδαι lassen sich nicht trennen von dem Namen des thrakisch-phrygischen Gottes Σανάζιος (inschriftlich), Σαβάζιος, *Sabadios*, der als Vegetationsgott dem Dionysos am nächsten stand und gleich diesem durch orgiastische Feste gefeiert wurde (Strabo x 471).'

³ Eustath. *in Dionys. per.* 1069 ἦσαν δὲ καὶ ἔθνος Θρακικὸν Σάβοι, ὅπερ τοὺς Βάκχους ὀηλοῖ Φρυγία διαλέκτω.

⁴ Steph. Byz. s.v. Σάβοι· ἔθνος Φρυγίας. λέγονται καὶ ἀντὶ τοῦ Βάκχου παρὰ Φρυγί.

⁵ P. Perdrizet in the *Bull. Corr. Hell.* 1896 xx. 101 holds that *Sabázios* as a sun-god was the Phrygian counterpart of Men the moon-god, with whom he was certainly brought into connexion (see Eisele in Roscher *Lex. Myth.* iv. 262 and especially Prokl. *in Plat. Tim.* iii. 41, 10 f. Διὸς παρελήφραμεν καὶ παρὰ Φρυγί Μῆνα Σαβάζιον ὑμνούμενον [καὶ] ἐν μέσαις ταῖς τοῦ Σαβαζίου τελεταῖς). But Eisele *loc. cit.* p. 255 views the solar aspect of *Sabázios* as due to Orphic influence in the case of the Thracian cult and perhaps to late solar monotheism in the case of the Moesian inscription.

⁶ *Arch.-ep. Mitth.* 1886 x. 241 no. 6 an altar from Nikopolis (*Jeni-Nikup*) inscribed [ὐλφ θεᾶς] Ἰδέας μεγάλης [μητρ]ῶ[ς] Διὶ Ἡλίω μεγάλ[ω κυρ]ίω Σεβαζίω ἀγ[ί]ω. For the cult-title Ἀγίω cp. the solar Zeus Ἄγιος at Tripolis (*supra* p. 192).

⁷ Macrob. *Sat.* i. 18. 1 item in Thracia eundem haberi solem atque Libetium accipimus, quem illi Sebadium nuncupantes magna religione celebrant, ut Alexander

If the foregoing considerations are well founded, it follows that there was no small resemblance between Zeus *Ámmon* and Zeus *Sabázios*. In both cases a ram-god developed into a sun-god. In both the deity became a snake. The Libyan Zeus had his sacred oak¹: the Phrygian Zeus as *Bagaios* was an oak-god². Zeus *Ámmon* had a goddess to wife, possibly Mother Earth herself³, and begat a youthful *Ámmon* most probably identified with the Libyan Dionysos⁴. Zeus *Sabázios* consorted with Demeter and Kore, perhaps before them with the earth-mother, and likewise begat a Phrygian Dionysos.

Now there are strong reasons for believing that the Graeco-Libyans were near akin to the Thraco-Phrygians, and that both sets of tribes had relatives among the early Cretans⁵. It is therefore of interest to find in Crete, the half-way house between them, sundry traces of the same worship. We do not, it is true, get here any 'Minoan' evidence of Zeus as a ram-god, unless indeed we may see with Sir Arthur Evans in a clay sealing from the palace at Knossos (fig.

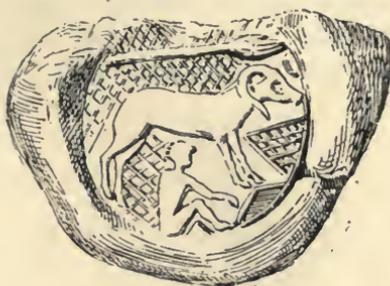

Fig. 298.

298)⁶ the infant Zeus nursed by a horned sheep. But observe that in Crete the ram gave place to other animals of a like significance, especially to the *agrimi* or wild-goat and to the bull⁷.

scribit : eique deo in colle Zilmissos aedes dicata est specie rotunda, cuius medium interpatet tectum. rotunditas aedis monstrat huiusce sideris speciem : summoque tecto lumen admittitur, ut appareat solem cuncta vertice summo lustrare lucis inmissu, et quia oriente eo universa patefiunt. Perhaps we may compare the story of Perdikkas in Hdt. 8. 137 f. W. Tomaschek in the *Sitzungsber. d. kais. Akad. d. Wiss. in Wien* Phil.-hist. Classe 1868 lx. 358 derived *Zilmissos* from ζῆλα, 'wine' (Hesych. s.v. ζῆλαι · ὁ οἶνος παρὰ Θραξί with M. Schmidt's note *ad loc.*).

¹ *Supra* p. 364 ff.

² *Supra* p. 400 n. 1.

³ *Supra* p. 370.

⁴ *Supra* p. 371 ff.

⁵ The evidence is persuasively marshalled by Sir Arthur Evans in the *Journ. Hell. Stud.* 1897 xvii. 372 ff. ('Crete the Meeting-point of Thraco-Phrygian and Libyan Elements'). For a review of recent research in the same direction see K. Penka *Die vorhellenische Bevölkerung Griechenlands* Hildburghausen 1911.

⁶ A. J. Evans in the *Journ. Hell. Stud.* 1901 xxi. 129 fig. 17 and in the *Ann. Brit. Sch. Ath.* 1902—1903 ix. 88 fig. 60. The sealing is enlarged (½).

⁷ *Infra* ch. i § 6 (g) xvi.

At Gortyna there appears to have been an annual festival (Τῆστροι), in which Zeus as a Satyr (Τῆστρος) consorted with the earth-goddess Europe (*infra* ch. i § 6 (g) xviii). Now, according to Serv. in Verg. *aecl.* 1 prooem., Laconum lingua Tityrus dicitur aries

The well-known fragment of Euripides' *Cretans*¹ suffices to prove that the mysteries of Zeus *Idaios*, the mountain-mother, and Zagreus were already connected with that island in the fifth century B.C. Not improbably they had been celebrated there from time immemorial. Silver coins of Priansos in Crete from c. 430 B.C. onwards represent a goddess enthroned beneath a palm-tree, who caresses with her hand the head of a great snake (fig. 299)². F. Lenormant³, Prof. P. Gardner⁴ and Mr W. Wroth⁵ have made out a strong case for regarding this goddess as Persephone the mother of Zagreus. J. N. Svoronos would see in her Hygieia⁶. Dr B. V. Head cautiously observes: 'The goddess fondling the serpent may be Persephone approached by Zeus in the likeness of a serpent..., or possibly Hygieia⁷.' Whatever her name, she could doubtless claim kinship with the snake-goddess of Knossos, Gournia, and Palaikastro⁸. Other silver coins, probably struck at

Fig. 299.

Fig. 300.

Fig. 301.

Gortyna between 66 and 31 B.C., belong to the large series of *kistophóroi*. This quasi-federal currency had on its obverse side

maior qui gregem anteire consuevit: sicut etiam in comoediis invenitur. And Gruppe *Gr. Myth. Rel.* p. 1388 n. 8 thinks that this use of *τρύπος* came to Sparta from Crete. It is therefore just possible that at Gortyna Zeus was originally a ram-god. But?

The head of Zeus *Ammou*, both bearded and beardless, occurs on coins of the Cretan towns Arkadia c. 300 B.C. (J. N. Svoronos *Numismatique de la Crète ancienne* Macon 1890 i. 26 f. pl. 2, 16—21, *Brit. Mus. Cat. Coins Crete* etc. p. 12 pl. 3, 7 f., *Hunter Cat. Coins* ii. 170, *Head Hist. num.*² p. 458) and Knossos c. 200—100 B.C. (Svoronos *op. cit.* i. 78 f. pl. 6, 24, 26, *Brit. Mus. Cat. Coins Crete* etc. p. 23 pl. 6, 9, *Hunter Cat. Coins* ii. 176 pl. 41, 4, *Head Hist. num.*² p. 462).

⁶ J. N. Svoronos *loc. cit.*

⁷ *Head loc. cit.*

⁸ The examples of a 'Minoan' snake-goddess are listed by H. Prinz in the *Ath. Mith.* 1910 xxxv. 157 f.

an ivy-wreath enclosing a *kiste* with half-open lid, from which a snake creeps out, and on its reverse two snakes twisted together with a bow-case between them. The Cretan modification of the latter type introduces Zeus with thunderbolt and eagle in place of the bow-case (fig. 300)¹.

The early Cretans are known to have carried their civilisation westwards as far as Sicily and south Italy. They took with them their cult of a god identified with Zeus². For this among other reasons³ we may accept Eckhel's⁴ interpretation of a type occurring on certain small fifth-century silver coins of Selinous (fig. 301)⁵: Persephone seated on a rock, as befits the daughter of a mountain-mother, coquets with Zeus, who approaches her as a bearded snake. The same type is found on a small silver coin of Segesta⁶. No wonder Orphic and Pythagorean doctrines received so ready a welcome in Magna Graecia. It was their old, though not their oldest, home.

iii. The Golden or Purple Ram of the Etruscans and Italians.

Etruscan books declared that a ram born of a remarkable or unusual colour portended universal prosperity to the emperor⁷. Tarquitius, who translated into Latin an Etruscan collection of omens, wrote: 'If a sheep or ram be sprinkled with purple or golden colour, it increases plenty and great prosperity for the prince of the order and clan; the clan continues to have illustrious descendants and becomes more flourishing in them⁸.' Hence

Memmius c. 60 B.C., on which Ceres appears enthroned with three corn-ears in her right hand, a torch in her left, and a snake at her feet (*Babelon Monn. rép. rom.* ii. 218 fig.)—a type revived in imperial times (Rasche *Lex. Num.* viii. 696).

⁷ *Serv. in Verg. ecl.* 4. 43, Macrobian *Sat.* 3. 7. 2.

⁸ Macrobian *loc. cit.* Rheginos *ap. Tzetz. chil.* 1. 468 f. cites from Isigonos (*frag.* 5 Westermann) the statement that sheep have wool of a golden colour.

Virgil in his famous fourth *Eclogue*, anticipating the dawn of a brighter age, says:

Nor wool shall learn its parti-coloured lies;
But in the meadows of himself the ram
Shall change his fleece for sweetly-blushing purple
Or saffron stain, and of its own accord
Scarlet shall clothe the lambs what time they graze¹.

One of the omens portending the accession of Diadumenus was that twelve purple sheep, one of them parti-coloured, were born on his father's estate².

In the folk-tale of *Cupid and Psyche* the second task imposed on the unhappy Psyche is thus described by Apuleius³:

'Just as Aurora drove up, Venus called Psyche, and began: "Do you see that wood, all along the banks of the river that flows past, with its lower waters falling into the fountain close by us? There are sheep there with gleaming fleeces that grow with the colour of gold, grazing and wandering about, with no one looking after them. Seek out one tuft from all that growth of costly fleece, any way you like, and bring it to me: that is my command." Psyche went off with a will, not however with the intention of doing as she was bid, but to seek rest in her misfortunes by hurling herself from the cliff over the stream. But the green reed by the river, the nursling of soft music, was divinely inspired by the gentle rustling of the balmy breeze, and gave its oracle forth. "O Psyche, exercised by great and numerous woes, pollute not my sacred waters by thy most wretched death, nor yet approach the formidable sheep on yonder bank. For they are wont to become heated from the raging sunshine and rush about madly and savagely, bringing death to mortals in their fury, with their sharp horns and stony foreheads and, sometimes too, envenomed teeth. But when midday has assuaged the heat of the sun, and the cattle have settled down to rest in the cool that comes up from the river, thou canst hide thyself secretly beneath that giant plane-tree, which drinks from the same current as myself: and then, when the sheep have passed from their first fury and are relieved of mental tension, strike the foliage of the neighbouring wood: there thou shalt find the golden wool, which is everywhere clinging and cleaving to the undergrowth." So spake the reed, so frankly and humanely, and taught poor Psyche the way of health, though her sickness was unto death. She did not fail to put in practice the instruction she had received through her hearing, and of which she had no cause to repent. She was careful in everything, and, by an easy exercise of petty theft, she filled her bosom with the soft yellow gold, and brought it back to Venus.'

Fulgentius, writing about the year 500 A.D., describes these sheep with golden fleece as 'the flocks of the Sun⁴.' And he is probably right; for their fury varied, as Apuleius says, with the heat of that luminary. Psyche finding the fleece of gold adhering

The Golden or Purple Lamb of Atreus 405

to the tree-stems near the big plane-tree will—I suspect—prove to be a doublet of Iason finding the fleece of gold hung on an oak-tree in the grove of Ares¹.

iv. The Golden or Purple Lamb of Atreus.

Analogous beliefs in Greece appear to connect the purple or golden ram not only with the prosperity of the ruler but also with the sun. A Greek commentator on the *Iliad* tells the following tale:

'Atreus, son of Pelops and king of the Peloponnese, once vowed that he would sacrifice to Artemis the fairest offspring of his flocks. But, when a golden lamb was born to him, he repented of his vow and kept the lamb shut up in a chest. Proud of his treasure he used boastful language in the market-place. Thyestes, vexed at this, made love to Aërope and induced her to give him the treasure. Having secured it he told his brother that he had no right to boast in that way, and asserted in the hearing of the multitude that the man who had the golden lamb ought to have the kingdom. When Atreus had agreed to this, Zeus sent Hermes and bade him make a compact about the kingdom, informing him that he was about to cause the sun to travel backwards. Atreus made the compact, and the sun set in the east. Wherefore, inasmuch as heaven had borne witness to the avarice of Thyestes, Atreus received the kingdom and drove Thyestes into banishment².'

This tale was celebrated in antiquity. It can be traced back to the *Alkmaionis*³, an Argive epic probably written in the sixth century B.C. And Euripides, who took a special interest in primitive religious ideas, has repeated allusions to it⁴. The myth has come down to us with the usual number of slight variations⁵,

¹ Apollod. i. 9. 6.

² Schol. *Il.* 2. 106 (codd. A. D.), cp. schol. Eur. *Or.* 812 (codd. A. C. Fl. 33).

³ *Alcmaeon. frag.* 6 Kinkel *ap.* schol. Eur. *Or.* 997: see T. Voigt *De Atr. et Thyest. fab.* p. 26 ff.

⁴ Eur. *I. T.* 811 ff., *Or.* 995 ff., *El.* 700 ff.

⁵ The lamb was brought to Argos by Ant[ops?] (*Alcmaeon. frag.* 6) or Hermes (Eur. *Or.* 995 ff.) or Pan (Eur. *El.* 700 ff.); or was found in the flocks of Atreus through the wrath of Hermes, who wished to avenge the murder of his son Myrtilos (schol. Eur. *Or.* 812 Gu. I., *ib.* 990 A. B. I. C., *ib.* 995 A. B. M. I., *ib.* 998 A. B. M. I., Tzetz. *chil.* 1. 433 ff.), or through the wrath of Artemis (Pherekydes *ap.* schol. Eur. *Or.* 997 A. B. I.); or was simply born in the flocks of Atreus (schol. Eur. *Or.* 812 Fl. 33. A, schol. *Il.* 2. 106 A. D.). The sun and the Pleiads reversed their usual course for a single day (schol. Eur. *Or.* 812 Gu. I., *ib.* 998 A. B. M. I., Tzetz. *chil.* 1. 444 ff.) or permanently (Plat. *politic.* 268 E—269 A). The myth is sometimes combined with that of Thyestes' feast (Eur. *Or.* 1007 f., schol. Eur. *Or.* 812 Gu. I., Tzetz. *chil.* 1. 447 ff.), sometimes not (Eur. *I. T.* 811 ff., *El.* 700 ff., schol. Eur. *Or.* 812 Fl. 33, *ib.* 990, 995, 997, 998, schol. *Il.* 2. 106). One account makes Atreus strangle the golden lamb that appeared and then keep it in a box (Apollod. *epit.* 2. 10 f., Apollonios *ap.* Tzetz. *chil.* 1. 436 ff.); another makes him sacrifice to Artemis the flesh of the golden lamb born in his flocks, but save its fleece (schol. Eur. *Or.* 812 C.; cp. *ib.* Fl. 33).

406 The Golden or Purple Lamb of Atreus

among which the most interesting are perhaps Simonides' statement that Atreus' golden lamb was purple¹, and Seneca's mention of a ram, not a lamb:

Pelops' high steading hath a noble beast,
A magic ram, leader of that rich flock.
Over and o'er its body hangs the hair,
One wave of gold; and from its back new kings
Tantalean their golden sceptres bear.
Its owner reigns—the whole line's fortune follows it.
Safely it grazes in a place apart,
A thing of sanctity shut in by stone².

Atreus' golden lamb was regarded by some ancient writers as a silver bowl or cup enriched with a gold lamb in the centre of it³.

Fig. 302.

Others perhaps identified it with the sceptre 'which Hephaistos made for Zeus, and Zeus gave to Hermes, and Hermes to Pelops, and Pelops bequeathed to Atreus, and Atreus to Thyestes, and Thyestes passed on to Agamemnon⁴.' For an *olpé* by the painter Amasis (550—530 B.C.) shows Herakles holding bow and arrow in his left hand and extending his right towards a king, whose

¹ Simonid. *frag.* 200 A Bergk⁴ *ap.* Tzetz. *chil.* i. 430 f. Bergk *ad loc.* cites Schneidewin's opinion that Tzetzes is importing into the story of Atreus a statement that Simonides really made about the Colchian fleece (see *infra* p. 419 n. 4).

³ Herodoros of Herakleia *frag.* 61 (*Frag. hist. Gr.* ii. 41 Müller) *ap.* Athen. 231 C *φιάλη*, Eustath. in *Il.* p. 868, 49 f. *φιάλιον*, *ib.* p. 1319, 47 f. *ποτήριον*. For royal gold cups adorned with special animal forms see *Folk-Lore* 1906 xvii. 168 n. 3.

⁴ Paus. 9. 40. 11, on which see *Folk-Lore* 1904 xv. 371.

sceptre ends in a ram's head (fig. 302)¹. This may be interpreted as Herakles with Eurystheus, whose successor was Atreus of the golden lamb.

But such *regalia* cannot explain the myth; at most they presuppose it. It seems certain that the golden lamb (or ram) belongs to a very ancient *stratum* of Greek religion. And in view of the ram-Zeus, whom we have found among the Graeco-Libyans and Thraco-Phrygians, I shall venture to suggest that the golden lamb was a theriomorphic epiphany of Zeus, the forefather of the Pelopidai. This might account for the repeated mention of a ram in connexion with the family. Pausanias, when describing the route from Mykenai to Argos, says:

'We come to the grave of Thyestes on the right. Over the grave is the stone figure of a ram, because Thyestes obtained the golden lamb, after he had committed adultery with his brother's wife².'

A little further on he speaks of Thyestes' tomb as 'the Rams'³ in the plural. At Olympia the annual magistrates used to slay a victim into a pit for Pelops, the father of Atreus and Thyestes, and the victim was a black ram, the neck of which was given to the 'woodman' of Zeus⁴. Pelops himself had won the kingdom from Oinomaos, king of Pisa, whose practice it was to sacrifice a ram to Zeus before starting on the chariot-race with the competitor for the hand of his daughter Hippodameia⁵. The scene is

¹ *Wien. Vorlegebl.* 1889 pl. 4.

Note that a ram's head was a frequent design on thrones, e.g. that of Zeus on the *krater* of the Villa Papa Giulio and on the Madrid *puteal* (*infra* ch. ii § 9 (h) ii (η)), or that of Damasistrate on her *stèle* (Stais *Marbres et Bronzes: Athènes*² p. 124 f. no. 743; Reinach *Rép. Reliefs* ii. 401 no. 3).

² Paus. 2. 18. 1. On ancient Phrygian and modern Armcnian tombs marked by stone rams see J. G. Frazer *ad loc.*

³ Paus. 2. 18. 3.

⁴ Paus. 5. 13. 2 f.

Cp. the black sheep, male and female, slain into a pit by Odysseus for Teiresias etc. (*Od.* 10. 516 ff., 11. 23 ff.): Polynotos in the Cnidian *Lésche* at Delphi represented the victims as black rams (Paus. 10. 29. 1); a vase at Paris shows a black-striped sheep and a ram's head by the mouth of the pit (Furtwängler—Reichhold *Gr. Vasenmalerei* i. 300 pl. 60, Reinach *Rép. Vases* i. 126, 1 f., Roscher *Lex. Myth.* iii. 671 f. fig. 10). So at Lebadeia a ram was sacrificed over a pit for Agamedes (Paus. 9. 39. 6). Those who consulted the oracle of Kalchas on a hill called Drion in Daunia sacrificed to him a black ram and slept on its skin (Strab. 284). Near the foot of the same hill was a sanctuary of Podaleirios (Strab. *ib.*) and his tomb: Daunians who slept there on sheep-skins received oracles in dreams (Lyk. *Al.* 1050 ff., Timaios *frag.* 15 *ap.* Tzetz. *in* Lyk. *Al.* 1050). At the sanctuary of Amphiarao near Oropos enquirers slew a ram and likewise slept on its skin (Paus. 1. 34. 5). The nymph Albunea had a dream-oracle near Tibur: those who consulted it slept on the skins of slain sheep (Verg. *Aen.* 7. 81 ff.). See further Loukian. *de dea Syr.* 55 on a similar practice at Hierapolis, and Hieron. *comm. in* *Ies.* 65 (xxiv. 657 Migne) on incubation in the cult of Aesculapius.

⁵ Diod. 4. 73.

represented on a vase from Ruvo (fig. 303)¹. Pelops in Phrygian attire clasps the hand of Hippodameia over a flaming altar. By the bride stands her father Oinomaos in full armour. Behind him a wreathed attendant, perhaps Myrtilos, brings the ram for the sacrifice: the wheel at his feet is a short-hand indication of the approaching chariot-race. The Fury on the right and Aphrodite with Eros on the left suggest the two alternatives of death or victory. A fine polychrome vase from S. Agata de' Goti, now in the Naples collection, depicts the scene as viewed a few moments later (fig. 304)². Pelops and Hippodameia, already mounted on the four-horse car, are glancing backwards at Oinomaos, who,

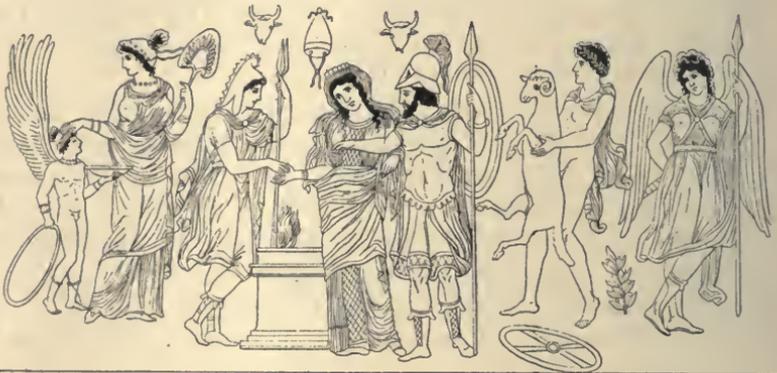

Fig. 303.

helped by a couple of wreathed attendants, is about to sacrifice the ram at an altar burning before a high pedestalled statue of Artemis. The goddess carries in either hand a bow and a *phiale*; her head-dress is topped by three letters, which yield no intelligible sense. Behind the ram is a youthful, but unnamed, spectator with two spears and a shield; he too is wreathed and sits upon his *chlamys*. In the upper register Myrtilos, wearing a wreath and the long *chiton* of a charioteer, brings up the four-horse car of Oinomaos. The statue of Artemis is flanked by the figures of Poseidon and Athena, the remaining corner being filled in by a group of Zeus with the boy Ganymedes, hoop and hoop-stick in hand, and a daintily-dressed Aphrodite. P. Weizsäcker suggests that the attitude of Zeus, who turns his back upon the sacrifice, is

¹ *Ann. d. Inst.* 1851 xxiii. 298 ff. pl. Q—R. See also Reinach *Rép. Vases* i. 290, 3, Roscher *Lex. Myth.* iii. 777 f. fig. 4.

² *Arch. Zeit.* 1853 xi. 49 ff. pl. 55. See also Reinach *Rép. Vases* i. 379, 1, Roscher *Lex. Myth.* iii. 779 f. fig. 5.

meant to imply that the god will not hear the prayer of Oinomaos¹. If so, the artist is guilty of some confusion; for the statue before which the offering is about to be made is certainly not a Zeus, but an archaic Artemis. However, other representations of the same scene—and they are fairly common—consistently show the pillar or statue in the central position to be that of Zeus²; and this agrees with the literary tradition³.

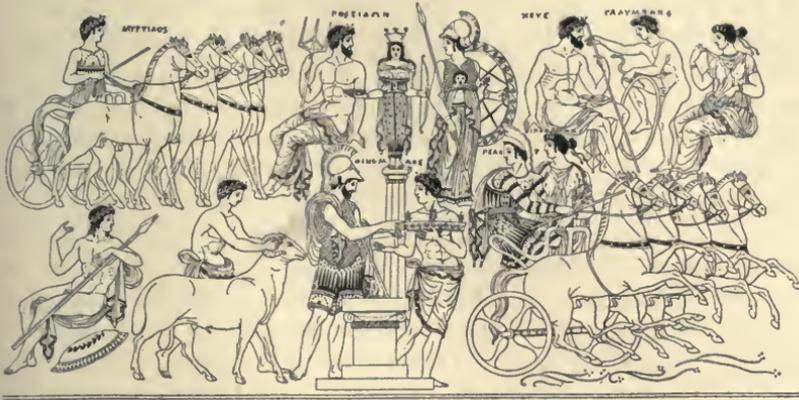

Fig. 304.

In the myth of Atreus possession of the golden lamb and control of the sun's course were alike accepted as proofs of fitness to reign. Hence I formerly conjectured that the golden lamb symbolised the sun itself⁴. This, however, is an ill-supported guess: solar symbolism was at best a secondary development of the myth, not its primary meaning.

v. The Cattle of the Sun.

In Homeric times the Sun-god was looked upon as the owner of cattle both great and small. He had seven herds of oxen and seven fair flocks of sheep in the island of Thrinakie. In each herd

¹ P. Weizsäcker in Roscher *Lex. Myth.* iii. 777.

² *Supra* p. 36 ff. pls. iii, iv, I, v.

³ Diod. 4. 73. On the Argive identification of Apollon *Kárneios* with Zeus see *supra* p. 373 n. I.

⁴ *Class. Rev.* 1903 xvii. 184, *Folk-Lore* 1904 xv. 271.

Later rationalists explained away the golden lamb and the reversal of the sun's course by saying that Thyestes discovered the constellation of Aries and that Atreus pointed out the difference between the real and apparent motions of the heavenly bodies: see *Eur. frag.* 861 Nauck² *ap.* Achill. Stat. *isag. in Arat. phaen.* 123 E, Polyb. *ap.* Strab. 23, Loukian. *de astrolog.* 12. Tzetz. *chil.* 1. 470 takes Hermes to be the planet Mercury and Artemis to be the moon.

or flock were fifty oxen or sheep, as the case might be. They were not subject to birth or death; and they were tended by Phaethousa and Lampetie, two nymphs, whom Neaira bore to the Sun-god himself¹. Apollonios Rhodios describes Phaethousa as shepherding the sheep with a silver staff in her hand, while Lampetie kept the oxen with a crook of shining mountain-bronze: the oxen themselves were milk-white with golden horns². Aristotle gave what the Greeks called a 'physical' explanation of this myth, referring the 350 (= 7 × 50) oxen to the days of the lunar year³: the scholiast on the *Odyssey* grasps at the clue and surmises that the 350 (= 7 × 50) sheep in like manner denote the corresponding nights⁴. F. G. Welcker half a century since defended and reinforced this view⁵. But are we prepared to interpret in the same way the oxen of the Sun-god, which the giant Alkyoneus drove from Erytheia⁶ and kept at Phlegrai on the Thracian Isthmos⁷? And what of the cattle lifted by Hermes, which, according to one account, belonged to the Sun⁸? It is surely of more moment to observe that, even in historical times, actual flocks and herds were kept for the Sun-god in various parts of Greece. There were cattle of the Sun at Gortyna in Crete⁹. The Homeric hymn to the Pythian Apollon, which cannot be later than the year 586 B.C. and may be much older¹⁰, relates that certain Cretans—

Passing Lakonis reached the sea-girt town
And fields of the Sun that brings delight to men,
Even Tainaron, where the deep-fleeced sheep are fed
Of the kingly Sun and range a lovely land¹¹.

Lastly, at Apollonia in Illyria the Sun-god had flocks about which we are better informed. Herodotos¹² in one of his delightful digressions gives us the following narrative:

¹¹ *H. Ap.* 232 ff.

¹² *Hdt.* 9. 93 f. and *ap. Eustath. in Od.* p. 1717, 45 f. Konon the mythographer, who

'At this same Apollonia are sheep sacred to the sun. By day they feed beside a river, which flows from Mount Lakmon through the district of Apollonia and enters the sea near the harbour of Orikos. But by night they are guarded by certain chosen men, the richest and noblest of the citizens, each guardian keeping watch for a twelvemonth. For the Apollonians set great store by these sheep in consequence of an oracle. And the flock is folded in a cave at a distance from the town. Here then on the occasion of which I speak this man Euenios, chosen for the post, was mounting guard. One night he fell asleep while on duty; and wolves, creeping past into the cave, destroyed some sixty of the sheep. He, when he saw what had happened, kept his counsel and told no man, intending to buy other sheep and substitute them. However, the Apollonians discovered the facts, and, on ascertaining what had occurred, brought him before a tribunal and condemned him to forfeit his eyesight, since he had slept at his post. But, as soon as they had blinded Euenios, their sheep ceased to have lambs and their land no longer bore crops as before. Responses were given them both at Dodona and at Delphoi, when they enquired of the priests the reason of their present misfortune, to the effect that they had sinned in depriving of his eyesight Euenios, the guardian of the sacred sheep, for that they (the gods) had sent the wolves, and now would not desist from avenging him till the citizens had paid for their misdeeds whatever penalty he himself chose and deemed right; but that, if this were duly done, the gods on their part would bestow upon Euenios a gift that would make many a man call him blessed. These were the oracles delivered to the Apollonians. They kept strict silence about the matter, and entrusted the management of it to certain citizens, who acted in the following way. When Euenios was sitting on his seat, they came and sat beside him. They began to talk of one thing and another, and at last fell to sympathising with his calamity. Thus taking him in, they asked what penalty he would choose, supposing the Apollonians were minded to promise reparation for their misdeeds. He, not having heard the terms of the oracle, made the following choice: if they would give him fields that belonged to such and such citizens—and here he named those whom he thought to possess the two finest plots in Apollonia—and in addition a house, which he knew to be the best in the town, why, once possessed of those, he said, he would have no grievance left and would be well content with that as a penalty. So he said his say, and the men sitting beside him replied: "Euenios the Apollonians hereby pay you this as a penalty for the blinding of your eyes, in accordance with oracles that they have received." At this he was much put out, realising the whole plot, and how he had been deceived: but they bought the property from its owners and gave him what he had chosen. And from that time onwards he had prophetic powers implanted in him, so that his fame spread far and wide¹.

The story of Euenios, who kept the sheep of the Sun-god in a cave and was blinded for losing them by sleeping at his post, bears a superficial resemblance to the myth of Polyphemos. But

lived in the time of Julius Caesar and dedicated his work to Archelaos, king of Kappadokia, told the same story, except that he spoke of *Εὐήσιος* as *Πειθήσιος* (Konon *narr.* 30 *ap. Phot. bibl.* p. 136 a 6 ff. Bekker).

¹ Hdt. 9. 95 states that Deiphonos, the son of this Euenios, was seer of the Greek fleet before the battle of Mykale (479 B.C.), but adds, on hear-say, that the former was a pretender who travelled through Greece usurping the name and fame of the latter.

the inference that I wish to draw from it is this. If, about the year 500 B.C., the inhabitants of Apollonia jealously guarded a flock of sheep under the belief that they belonged to the Sun-god and ensured the fertility of their own flocks and fields, it seems highly probable that the myth of the golden lamb presupposes a similar custom in the heroic age. The luck of the Pelopidai depended on the safe-guarding of a particular sheep, believed to be—if I am right in my surmise—not merely the property, but the visible embodiment, of Zeus.

vi. The Golden Lamb in a folk-tale from Epeiros.

This connexion between the golden lamb and Zeus goes far towards explaining a remarkable folk-tale heard by Dr J. G. von Hahn at Kapéssovo, a village in the district of Zagóri to the north-east of Jánnina in Epeiros¹ :—

‘There was once a king, who had three sons and great riches; and, before he died, he divided his substance among his sons. The two elder sons lived a merry life, year in year out, squandering and scattering their father’s treasures till there was nothing left and they were reduced to poverty. The youngest on the other hand kept house with his share, took a wife, and had by her a most beautiful daughter. When she grew up, he built for her a big underground palace, and killed the architect who had built it. Then he shut up his daughter in it, and sent heralds throughout the world to announce that, who-soever could succeed in finding the king’s daughter, should have her to wife; but that, if he failed to find her, he must be put to death. So many young men came to essay the adventure. But all their efforts were in vain: they could not find the princess, and they lost their heads.

After many had already met their deaths, there came one young man, as clever as he was handsome, bent on pursuing the quest. He went therefore to a herdsman and begged him to hide him in a sheep-skin with a golden fleece and to bring him in this disguise before the king. The shepherd agreed to do so, took a sheep-skin which had a golden fleece, sewed up the fellow inside it, gave him also food and drink and sheep’s-droppings, and so brought him before the king. The king, on seeing the golden lamb, asked the herdsman: “Have you got that lamb for sale?” But the herdsman rejoined: “No, sire, not for sale; but, if it takes your fancy, I will gladly do you a service and lend it you without pay for three days. But you must then give it back to me.”

The king promised to do so, and repaired with the lamb to his daughter. Having led it into his castle and through many chambers, he came to a door and cried: “Open, Tartara Martara of the earth²!” Thereupon the door flew

¹ The modern Greek text is printed from J. G. von Hahn’s manuscripts by J. Pio ΝΕΟΕΛΛΗΝΙΚΑ ΠΑΡΑΜΥΘΙΑ *Contes populaires grecs* Copenhague 1879 p. 52 ff. There is a German translation by J. G. von Hahn *Griechische und albanesische Märchen* Leipzig 1864 i. 124 ff.

² Ἀνοίξετε τάρταρα μάρταρα τῆς γῆς! For the phrase *τάρταρα τῆς γῆς* cp. A. Passow

open of itself; and, after they had gone through many more chambers, they came to a second door. Here the king again cried: "Open, Tartara Martara of the earth!" Then the door flew open of itself; and they came to the room, where the princess lived. Its floor, walls, and ceiling were of solid silver. The king, when he had greeted the princess, gave her the lamb. She was delighted with it: she stroked it and fondled it and played with it. But when, shortly afterwards, the lamb eased itself, the princess said to the king: "Father, the lamb has eased itself!" And he replied: "It is just a lamb, why should it not?" Then he left the lamb with the princess and went his way.

During the night the young fellow drew off the skin. And the princess, seeing that he was so handsome, fell in love with him and asked: "Why did you hide in the skin and come here?" He replied: "When I saw that so many failed to find you and lost their lives, I contrived this trick and came to you." Then the princess exclaimed: "Ah, you have done well! But you must know that, even if you have found me here, your wager is not yet won. For then my father changes me and my maidens into ducks and asks you: 'Which of these ducks is the princess?' But I will turn my head round and plume my feathers with my beak, so that you can recognise me."

When they had prattled away for three days together, the herdsman came back to the king and demanded his lamb. And the king went to his daughter to fetch it. She was woe-begone at her sporting with the lamb being so soon over. But the king said: "I cannot leave it with you, for it is only lent." He took it away and returned it to the herdsman.

The young fellow now pulled off the skin, went to the king and said: "Sire, I can find your daughter." The king, seeing the handsome lad, answered him: "I'm sorry for your youth, my boy. This adventure has already cost so many their lives, and it will be the death of you too." "I stand by my word, sir king; I will either find her or lose my head." So saying, he went in front of the king, and the king followed him till they came to the great door. Then said the young man to the king: "Speak three words, and it opens." And the king made answer: "What words are they? Shall I say: Lock, Lock, Lock?" "No," cried he, "say: Open, Tartara Martara of the earth!" The king did so, and the door opened. They went in, and the king bit his moustache for anger. Then they came to the second door, where the same thing happened over again. They entered, and found the princess.

Next the king said: "Well done, you have found the princess. But now I am going to turn her and her maidens into ducks; and, if you can guess which of them all is my daughter, then you shall have her to wife." And without more ado the king changed all the maidens into ducks, brought them before the young man, and said to him: "Now show me, which is my daughter." Then the princess, as she had agreed to do, plumed her wings with her beak; and the young man answered: "The one yonder, pluming her wings, is the princess." There was then no help for it; the king had to give her to him for a wife, and he lived with her in grandeur and in happiness.

Popularia carmina Græciæ recentioris Lipsiæ 1860 no. 368. Ἰ Κάτω στὰ Τάρταρα τῆς γῆς, κάτω στὸν κάτω κόσμος, J. C. Lawson *Modern Greek Folklore and Ancient Greek Religion* Cambridge 1910 p. 98. The same word Τάρταρα survives in Rhodes as a name for the deepest part of Hades (B. Schmidt *Das Volksleben der Neugriechen* i. 235 citing Benetoklis in the *Ἐφημερίς τῶν Φιλομαθῶν* 1860 p. 1257). Μάρταρα is a meaningless jingle formed on the analogy of Τάρταρα (J. Pio *op. cit.* p. 238).

414 The Golden or Purple Ram of Phrixos

Dr J. G. von Hahn points out—and indeed it is sufficiently obvious—that the folk-tale recalls the myth of Danaë¹. It is instructive to summarise the two in parallel columns:—

The myth of Danaë.

Akrisios, king of Argos, kept his daughter Danaë shut up in an underground chamber of bronze.

Despite the king's precautions, Zeus visited her in a shower of gold, and became by her the father of Perseus.

The king enclosed Danaë and Perseus in a chest, and flung them into the sea.

The folk-tale from Epeiros.

A certain king kept his daughter shut up in an underground chamber of silver.

Despite the king's precautions, a young man visited her in the fleece of a golden lamb, and won her for his wife.

A comparison of the myth, localised at Argos, dated in the reign of king Akrisios, and throughout marked by definite names, with the folk-tale, which, like so many *Märchen*, is placeless, timeless, nameless, shows at once that the former is more developed than the latter. In particular, the whole episode of Danaë and Perseus in the chest, which forms so striking a feature of the myth, is a sequel added to the original tale. It re-appears in quite a different connexion in another folk-tale from the same village of Kapéssovo². But the first part of the Danaë-myth is strictly parallel to the first folk-tale, and the gold-showering Zeus of the one is comparable with the golden lamb of the other. This variation is intelligible, if, as I have supposed, the golden lamb of Atreus and Thyestes was the epiphany of Zeus himself.

vii. The Golden or Purple Ram of Phrixos.

The golden lamb of the Pelopidai, with its relations to Zeus on the one hand and to the sun on the other, can hardly be discussed without reference to the golden ram of Phrixos and Helle. The myth in question has come down to us through a large number of channels, good, bad, and indifferent³. The oldest version

¹ J. G. von Hahn *op. cit.* ii. 206. Other resemblances to the Danaë-myth are noted *ib.* ii. 201, 310 f.

² 'Ο μισὸς ἄδρωπος, 'The Half-man': text in J. Pio ΝΕΟΕΛΛΗΝΙΚΑ ΠΑΡΑΜΥΘΙΑ p. 21 ff., German translation in J. G. von Hahn *Griechische und albanesische Märchen* i. 102 ff. The princess, her child, and the Half-man, who is suspected of being its father, are enclosed together in an iron vessel with a lid and sent adrift on the sea, but are rescued by magic means. The situation is that described by von Hahn as the 'Danaë-formula' and illustrated by him from Walachian and Italian tales (see J. G. von Hahn *op. cit.* i. 49).

³ The evidence, literary and monumental, is put together by J. Escher-Bürkli in Pauly-Wissowa *Real-Enc.* ii. 1929—1933, K. Seeliger in Roscher *Lex. Myth.* i. 669—675, 2028—2029, Türk *ib.* iii. 2458—2467.

accessible in its entirety is that of Sophokles, who told the tale in the following form¹. Athamas had two children, Phrixos and Helle, by the goddess Nephele. Afterwards he deserted her and took to him a mortal woman in her stead. Nephele out of jealousy flew up to the sky, and punished him by sending a drought upon his realm. Envoys dispatched to consult the Pythian Apollon were bribed by the step-mother to bring back word that the drought could be stayed only if Athamas sacrificed Phrixos and Helle. Athamas, on hearing this, sent to fetch his children from the flocks, when a ram speaking with human voice warned them of their danger. They fled with the ram. Helle, in crossing the strait at Abydos, fell from the ram and was drowned in the sea, called after her *Helléspontos*, 'Helle's sea.' But Phrixos, riding on the ram, got safely to the country of the Kolchoi. Here he sacrificed the ram, which by the agency of the gods had become golden-fleeced, to Ares or to Hermes. Phrixos settled in these parts, which in memory of him were named *Phrygia*, 'Phrixos' land.' Meantime Nephele proceeded to avenge her children. Athamas in his turn, garlanded like a victim, was led out to be sacrificed at the altar of Zeus. But in the nick of time Herakles appeared and rescued him.

In Sophokles' version the step-mother is anonymous. But names were easy to supply. Pindar called her Demodike, Hippias Gorgopis, and Pherekydes of Leros Themisto². More popular, however, than any of these was Ino, the daughter of Kadmos and Harmonia, king and queen of Thebes. Her story was linked with that of Athamas at least as early as the fifth century B.C.³ The resultant myth is thus set out by Apollodoros⁴:

'Of the sons of Aiolos Athamas, ruler of Boiotia, became by Nephele the father of two children, Phrixos a boy and Helle a girl. Again he married Ino, of whom were born to him Learchos and Melikertes. Ino, plotting against the

children of Nephele, persuaded the women to parch the wheat. They took it without the knowledge of the men and did so. The earth receiving wheat that was parched failed to give her yearly crops. Consequently Athamas sent to Delphoi to ask how he could be rid of this barrenness. But Ino induced the messengers whom he had sent to declare that, according to the oracle, the curse upon the crops would be removed, if Phrixos were sacrificed to Zeus. Athamas, hearing this, was compelled by the inhabitants of the land to obey, and set Phrixos beside the altar. But Nephele caught him up along with her daughter, and, having obtained from Hermes a ram with a golden fleece, gave it to them. Carried by the ram through the sky, they traversed land and sea. But, when they were over the sea that lies between Sigeion and the Cherronesos, Helle slipped off into the deep; and, as she perished there, the sea was called Hellespontos after her.¹ Phrixos came to the Kolchoi, whose king was Aietes, son of the Sun-god and of Perseis, and brother of Kirke and Pasiphaë the wife of Minos. Aietes welcomed him and gave him Chalkiope, one of his daughters. Phrixos slew the ram with the golden fleece as a sacrifice to Zeus *Phýxios* and gave its skin to Aietes: he nailed it round an oak-tree in a grove of Ares. Phrixos moreover had by Chalkiope the following children, Argos, Melas, Phrontis, and Kytisoros. At a later date Athamas, owing to the wrath of Hera, was deprived of his children by Ino also. For he himself went mad and shot Learchos, while Ino flung herself and Melikertes with her into the sea. Driven out of Boiotia, Athamas enquired of the god where he should dwell. The oracle replied that he should dwell wherever he was entertained as a guest by wild beasts. So he travelled through much country, till he fell in with wolves dividing sheep among themselves: they, when they caught sight of him, left their shares and fled. Athamas settled there, called the land Athamantia after his own name, married Themisto, the daughter of Hypseus, and begat Leukon, Erythrios, Schoineus, and Ptoös.²

The myth of the golden ram was connected with two cult-centres of Zeus *Laphýsios*, one at Halos in Thessaly³, the other near Orchomenos in Boiotia⁴. In both localities there was an Athamantine Plain⁵; and it is reasonable to assume that a Thessalian tribe, of whom Athamas was the eponymous king, had migrated into Boiotia⁶, and that there the story of Athamas had been blended with that of the Boeotian heroine Ino. Another cult-centre brought into connexion with the same myth was in the territory of the Moschoi, at the eastern end of the Black Sea, where Strabon records a sanctuary of Leukothea (that is, Ino) founded by Phrixos and possessing an oracle once wealthy but plundered by Pharnakes and Mithridates: there, he says, no ram is offered in sacrifice⁷. Tacitus adds that the neighbouring tribes

⁴ Cp. Paus. 9. 34. 6 f.

⁵ Strab. 498.

of Hiberi and Albani regarded themselves as descended from Iason and his Thessalians¹.

But, without attempting to determine the ethnology of this myth, for which task the data available are hardly sufficient, we may at least note that the golden ram has something to do with Zeus. Athamas is about to sacrifice Phrixos to Zeus, when the ram appears and carries him in safety through the air to a land in the far north-east². Much the same thing happened to Iphigeneia, when she was on the point of being sacrificed to Artemis at Aulis³: the goddess suddenly substituted for her a stag, according to the usual tradition, or a bear⁴, or a bull⁵, or an old woman⁶, and carried off the intended victim in a cloud to be her own priestess among the Tauroi. Now these animals, the stag, the bear, the bull, are precisely those that were regarded as most sacred to Artemis herself⁷. It is therefore highly probable that the golden ram was the sacred animal—whatever that implies—of Zeus *Laphystios*. This accounts for the belief, current in the vicinity of the Boeotian Mount Laphystion, that it was Zeus who sent the ram with the golden fleece⁸. The commonly received version of the myth makes Phrixos sacrifice the ram that has saved him to Zeus *Phyxios*, 'the god of escape⁹.' Hyginus says simply 'to Zeus,' and adds that the hero 'fastened the skin in the temple¹⁰,' that is, in the temple of Zeus¹¹. The Latin commentary on the *Aratea* of Germanicus Caesar states that Phrixos 'sacrificed the ram, and dedicated its golden fleece to Zeus¹².' Finally, we are told by Apollonios that Aietes would not have received Phrixos in his halls, had not Zeus himself sent Hermes from heaven to prepare the way before him¹³. Clearly Zeus had his share in the action throughout¹⁴.

¹⁴ Other deities involved are Ares, Hermes, and Poseidon. The fleece was hung on an oak in the grove of Ares (Apollod. 1. 9. 1, Tzet. *in Lyk. Al.* 22, Val. Flacc. 5. 228 ff., cp. 1. 528 f., Ap. Rhod. 2. 1147 f., Hyg. *fab.* 188) or in the temple of Ares (Hyg. *fab.* 3, Myth. Vat. 1. 23, 2. 134). Hermes supplied the ram (Apollod. 1. 9. 1, Tzet. *in Lyk. Al.* 22), or gilded its fleece (Ap. Rhod. 2. 1146 f. with schol.): it was sacrificed to Zeus

418 The Golden or Purple Ram of Phrixos

But, while recognising that the golden ram was intimately related to Zeus, we have yet to ask—what was the significance of the ram itself? In ancient times this question called forth an amazing crop of rationalistic replies, stupid, stupider, and stupidest¹. The only one worth weighing at all is that put forward by Strabon, who, in his account of Kolchis, writes as follows of the Soanes, a tribe inhabiting the heights of Mount Kaukasos above Dioskourias :

'In their country, so it is said, the torrents bring down gold, which is caught by the barbarians in vats pierced with holes and on fleecy skins; from which practice arose the myth of the golden fleece².'

But religion in general, and mythology in particular, has suffered much at the hands of would-be rationalists. The only really reasonable method of solving such problems is to abjure ingenious guesses, get back to the earliest ascertainable form of the myth and seek to understand it in comparison with other analogous myths. Now the earliest ascertainable form of the myth in question is that utilised by Sophokles. In his version Phrixos and Helle were with the flocks of Athamas, when they were warned

Φύξιος at his bidding (Ap. Rhod. 4. 119 ff.), or to Ares or Hermes (Sophoclean version: *supra* p. 156, cp. Eudok. *viol.* 954): Phrixos was brought home to Athamas by Hermes (Hyg. *poet. astr.* 2. 20). The ram was the offspring of Poseidon and Theophane (Hyg. *fab.* 3, 188), daughter of Bisaltis; when she was besieged by a multitude of suitors, he carried her off to the island of Crumissa, changed her into a sheep, himself into a ram (cp. Ov. *met.* 6. 117, Paus. 8. 8. 2, and see further: Overbeck *Gr. Kunstmyth.* Poseidon pp. 344—347), the inhabitants of Crumissa into flocks, the suitors into wolves, and consorted with her in animal form (Hyg. *fab.* 188): he also rescued and had intercourse with Helle (Roscher *Lex. Myth.* i. 2028).

¹ Dionysios of Mytilene, an Alexandrine grammarian of the second century B.C., in his mythological novel *The Argonauts* represented the 'Ram' as a *paidagogós* named *Krios*, who warned Phrixos of Ino's plot (schol. Ap. Rhod. 1. 256, 2. 1144, 4. 177, Eudok. *viol.* 262, cp. Palaiph. 30, Apostol. 11. 58, Eudok. *viol.* 342, 954). When Phrixos was captured by the Kolchoi, Krios was sacrificed to the gods, and his skin, in accordance with an old custom, was nailed to the temple: Aietes, being warned by an oracle that he would perish as soon as strangers landed and carried off the skin of Krios, built a wall about the precinct, established a guard there, and covered the skin with gold to make it seem worth guarding (Diod. 4. 47). Others preferred to suppose that the ram was the figure-head of Phrixos' ship, and that Helle, while suffering from sea-sickness, leaned overboard and fell into the sea! (schol. Ap. Rhod. 1. 256, Diod. 4. 47, Eudok. *viol.* 954). This must surely have been the theme of some farcical performance such as the *Athamas*, a satyric play by Xenokles (Ail. *var. hist.* 2. 8), or the pantomimes written about the flight of Phrixos and Helle etc. (Loukian. *de saltat.* 42, 67). Further choice samples may be found in Eudok. *viol.* 262: the golden fleece was a treatise on alchemy written on skins, or, according to Charax of Pergamon *frag.* 14 (*Frag. hist. Gr.* iii. 639 Müller), a hand-book on the art of writing with gold ink bound in parchment (cp. Eustath. *in Dionys. per.* 689). See further Soud. *s.v.* δέρας, anon. *de incredib.* 3 p. 321 f. Westermann, Favorin. *lex.* p. 1877, 5 f.

² Strab. 499, cited by Eustath. *in Dionys. per.* 689. My friend and colleague Prof. W. Ridgeway *The Origin of Metallic Currency and Weight Standards* Cambridge 1892 p. 70 finds this explanation 'extremely plausible.' 'Plausible,' yes; probable, no.

and rescued by the miraculous ram¹. In fact, the golden, or subsequently gilded, ram was found among the flocks of Athamas, just as the golden lamb was found among the flocks of Atreus². Another point of resemblance between the two is that Simonides, who spoke of Atreus' golden lamb as purple³, spoke also of Athamas' golden ram as white, and again as purple⁴. I am therefore disposed to see in the golden ram of Athamas, as in the golden lamb of Atreus, a theriomorphic epiphany of Zeus. This, in fact, is definitely stated by the first Vatican mythographer, who says that Pelias sent Iason to Kolchis 'in order that he might fetch thence the golden fleece *in which Zeus climbed the sky*'⁵. The words that I have italicised are indeed, as G. H. Bode observes, foreign to the usual tradition⁶; but they are not on that account open to suspicion, and they must be accepted as a record of the belief that the golden ram, when he ascended the sky, was none other than Zeus in animal form.

Again we may suspect a solar interpretation as a secondary development of the myth. Thus the analogy between Helle, who fell from the golden ram into the Hellespont, and Phaethon, who fell from the sun's chariot into the river Eridanos⁷, becomes intelligible. And the elevation of the ram to a position among the signs of the zodiac⁸ is seen to be appropriate. It is noticeable that the constellation of Aries 'rules the season of the year when wheat is sown' or 'when all things are born anew⁹'. Medeia the grand-daughter of the Sun-god, naturally chose a ram for her experiment in rejuvenation¹⁰.

viii. Zeus *Aktaïos* or *Akraïos* and his Fleeces.

But, if the myth of the golden lamb and that of the golden ram imply animal epiphanies of Zeus, we are encouraged to look round for further evidence of him as a ram-god in the actual rites of the Greek area.

And here we must first turn our attention to Mount Pelion in Magnesia. On the summit of this mountain there was a sanctuary of Zeus *Aktaïos*, to which once a year a peculiar procession wended its way. When the dog-star rose and the heat was at its greatest, the priest of Zeus chose out the chief men of the district, being careful to select only those that were in the prime of life. They proceeded to make the ascent of the mountain, clad in fleeces that were thick and fresh¹. Why they did so, they probably could not have explained. *Dikaiarchos*, the disciple of Aristotle, thought that they wore the skins as a protection against catching cold on the mountain heights². But it is certain that the details of the rite were determined by religious, not hygienic, considerations. I would suggest that those who took part in the procession were originally endeavouring to assimilate themselves to Zeus the ram-god³. Zeus scaled the sky as a ram with a golden fleece, and his worshippers put on thick new fleeces when they mounted to his abode. If I am

ἐκ Πηλῆως γενομένους αὐτῇ παῖδας, βουλομένη εἰδέναι, εἰ θνητοὶ εἰσι (Aegim. frag. 2 Kinkel ap. schol. Ap. Rhod. 4. 816). Lastly, a dedication found at *El-Burdj* below *Kala'at-Jendal* on the east slope of Mt Hermon runs: ὑπὲρ σωτηρίας αὐτοκράτορος | Τραϊανοῦ Νέρωνα Σεβαστοῦ | υἱὸς Σεβαστοῦ Γερμανικοῦ | Δακικὸς Μεννέας Βεελιάβου | τοῦ Βεελιάβου πατρὸς Νε|τρίρου, τοῦ ἀποθεωθέντος | ἐν τῷ λέβητι δι' οὗ αἱ ὄραται ἄγων|ται, ἐπίσκοπος πάντων τῶν ἐν|θάδε γεγοῶτων ἔργων κατ' εὐ|σεβείας ἀνέθηκεν θεᾷ Λευκο|θέα Σεγελῶν ☽ (C. Clermont-Ganneau *Recueil d'archéologie orientale* Paris 1898 ii. 74 f., 1901 iv. 250 sees in this a survival of human sacrifice: C. Fossey in the *Bull. Corr. Hell.* 1895 xix. 303—306 thinks that ἀποθεοῦν means merely 'enterrer' and that the ashes of Neteiras were 'déposées dans un vase sacré': Dittenberger *Orient. Gr. inscr. sel.* no. 611 follows Fossey, but refers δι' οὗ κ.τ.λ. to the man, not to the caldron). These passages might be used to support the conclusions of Mr F. M. Cornford, who detects in the Pelops-myth the ritual of a New Birth (J. E. Harrison *Themis* Cambridge 1912 p. 243 ff.).

¹ Append. B. A possible parallel to this rite in the Naxian cult of Zeus *Μηλώσιος* ('Clad in a sheep-skin'?) has been already noted (*supra* p. 164 f.). Mr A. J. B. Wace in his interesting account of 'The Mayday Festival on Pelion' (*Ann. Brit. Sch. Ath.* 1909—1910 xvi. 244—249) observes that the γέρος or 'old man,' who is killed and brought to life again, wears a black sheep-skin mask. Mr Wace (*ib.* p. 251) holds that this character 'is in all probability the representative of Dionysos, of whose worship...these festivals are to be regarded as a survival.'

² *Dikaiarch.* 2. 8 (*Geogr. Gr. min.* i. 107 Müller).

³ Gilbert *Gr. Götterl.* p. 148 thinks that the fleeces were worn on the mountain in order to imitate, and thus produce, the fleecy rain-clouds for which the country-side was thirsting. If so, cp. the means by which the rain-maker elsewhere assimilates himself to rain (Frazer *Golden Bough*³: The Magic Art i. 260 f., 269 f.) and the use of a fleece in the modified rain-charm (?) of Judges 6. 36—40. But Gilbert's whole explanation of the rite is precarious.

right in holding further that the golden ram came to symbolise the sun, it is easy to see why the procession made the ascent of the mountain at the hottest season of the year.

The Zeus of Mount Pelion was honoured, not only as *Aktaïos* 'He of the Point,' but also as *Akraïos*, 'He of the Summit.' It appears from an inscription that white victims without blemish were sacrificed to him as *Akraïos*, and further that their skins were sold on the sixteenth day of the month Artemision by sundry important officials including his priest¹. The sixteenth of Artemision, according to the Attic calendar, would be the sixteenth of Mounichion². Hence we might look to find fresh light on the cult of Zeus *Akraïos* from ceremonies observed in Attike on Mounichion the sixteenth. It is therefore of interest to remark that the day was considered as in some respects critical for the sun and moon. Cakes called *amphiphôntes* were then brought to the sanctuary of Artemis *Mounichia*³ and to the shrines of Hekate at the cross-roads⁴. They were called '*amphiphôntes*, 'shining on both sides,' because they were made when the sun and moon were both shining in the morning⁵, moon-set being, so to speak, caught up by sun-rise and the sky lit with a two-fold illumination⁶. Apollodoros preferred to derive the name from the fact that the cakes, which were made of cheese⁷, had small torches stuck in them round about and kindled for the occasion⁸—a custom surviving still in the be-candled loaves of the Greek Church⁹. The festival of Artemis *Mounichia* was so far analogous to that of Artemis *Brauronta* that A. Mommsen treats the two as one and the same¹⁰. It is, then, noteworthy that at the Brauronian celebration girls between

¹⁰ Mommsen *Feste d. Stadt Athen* p. 453 ff.

the ages of five and ten, selected for the purpose, acted as bears before the goddess and in that capacity wore saffron robes¹. For we are thus enabled to complete the correspondence of the Attic with the Thessalian cults. The parallel traits are as follows:—

THESSALY	ATTIKE
<i>Ram-cult.</i>	<i>Bear-cult.</i>
Zeus, once regarded as himself a ram, wears the golden fleece belonging to the ram.	Artemis, once regarded as herself a bear ² , is called <i>Chitónē</i> or 'She who wears the <i>chitón</i> ³ .'
Men clad in new fleeces honour Zeus with a procession. The skins of white victims (rams?) slain for Zeus are sold on Artemision the sixteenth.	Girls clad in saffron robes honour Artemis with a mimicry of bears. The festival takes place apparently on Mounichion the sixteenth.
Solar significance probable.	Lunar significance probable.

On this showing the saffron robes of Artemis' devotees would hold to the cult of the moon-goddess the same relation that the new fleeces of Zeus' worshippers held to the cult of the sun-god. It seems possible that in both cases the colour of the ritual-garb was determined by the colour of the celestial body. However, other views are tenable⁴, and the point cannot be pressed.

ix. Zeus *Meilíchiος*, Zeus *Ktésios*, and the Fleece of Zeus.

The skin of a victim sacrificed to Zeus was used by the Greeks in various purificatory rites. Individuals, who wished to be purified, stood upon it supporting themselves on their left foot only⁵. When a multitude or a locality was to be cleansed, it is more probable that the skin was carried round in procession⁶. This was done towards the close of the month Maimakterion, the victim having been slain for Zeus *Meilíchiος*⁷. Further, the skins of

⁷ Eustath. *in Od.* p. 1935, 8 ff. καὶ οἱ τὸ διοπομπεῖν δὲ ἐρμηνεύοντές φασιν ὅτι διὸν ἐκάλουν κώδιον ἱερίου τιθέντος (leg. τυθέντος) Διὶ Μελιχίῳ ἐν τοῖς καθαρμοῖς φθίνοντος Μαιμακτηριῶνος μηνός, ὅτε ἤγοντο τὰ πομπαῖα. καὶ καθαρμῶν ἐκβολὰ εἰς τὰς τριόδους ἐγίνοντο. εἶχον δὲ μετὰ χεῖρας πομπόν· ὅπερ ἦν, φασί, κηρύκιον, σέβας Ἐρμοῦ. καὶ ἐκ τοῦ τοιοῦτου πομποῦ καὶ τοῦ ρήθεντος διου τὸ διοπομπεῖν. καὶ τοῦτο μὲν οὕτως ἐξ ἱστορίας. ἄλλως δὲ κοινότερον διοπομπεῖν καὶ ἀποδιοπομπεῖν ἐφάβητο τὸ Διὸς Ἀλεξικάκου ἐπικλήσει ἐκπέμειν τὰ φάβλα.

animals sacrificed to Zeus *Meilichios* and to Zeus *Ktésios* were kept and used by those who marshalled the procession of the Skirophoria, by the torch-bearer at Eleusis, and by others who directed rites of purification¹. It follows that this purificatory skin, though used in a variety of ceremonies, was in every case the skin of a victim sacrificed to Zeus². Moreover, it was regularly called the 'fleece of Zeus' or the 'Zeus-fleece'³. These names may be taken to imply that Zeus was originally believed to be, not merely the god to whom as to an owner the fleece belonged, but the very animal from which the fleece was stripped. Hence to stand upon the fleece, or to have the fleece carried round one, was to claim identification with the deity and consequent freedom from guilt. The same idea may underlie the old Roman custom that a man who had unwittingly perpetrated a homicide must take his stand upon a ram⁴. The Romans themselves derived their custom from that of the Athenians⁵.

A few representations of the 'fleece of Zeus' have come down to us in Greek vase-paintings and Roman reliefs. A red-figured *hydria* in the Lambert collection (fig. 305)⁶ shows a scene of initiation, probably at Eleusis. In the centre a nude youth crouches beside a large shallow bowl with his left foot on a spotted object. This object is plausibly regarded by F. Lenormant⁷ and J. de Witte⁸

¹ Soud. s.v. Διὸς κώδιον. οὐ τὸ ἱερεῖον Διὶ τέθνται· θύουσι τε τῷ τε Μειλιχίῳ καὶ τῷ Κτησίῳ Διὶ. τὰ δὲ κώδια τοῦτων φυλάσσουνσι, Δία (δία J. E. Harrison, Διὸς T. Gaisford) προσαγορεύοντες. χρώνται δ' αὐτοῖς οἱ τε Σκιροφορίων τὴν πομπὴν στέλλοντες καὶ ὁ δαδούχος ἐν Ἐλευσίνι καὶ ἄλλοι τινες ὑποστορνύντες αὐτὰ τοῖς ποσὶ τῶν ἐναγῶν.

² I cannot, therefore, but regard as somewhat misleading Miss J. E. Harrison's statement (*Proleg. Gk. Rel.* 2 p. 24): 'this fleece was by no means confined to the ritual of Zeus.' Indeed, I dissent wholly from her view (*ib.* p. 23) that the Διῶσια of Zeus Μειλίχιος and the Δίων or Διὸς κώδιον of Zeus Μειλίχιος and Zeus Κτησίος had originally nothing whatever to do with Zeus, but are rather to be referred to the root that appears in Latin as *dīro-* (Greek *δῖρο- δῖο-) and denote consequently a 'festival of curses' with its associated 'rites of placation and purification.' True, we cannot derive Διῶσια from Δῖος; but we can and ought to derive it from Δῖος, the adjective meaning 'of' or 'belonging to Zeus' (*supra* p. 3 n. 3). I would explain in the same way the Δία of Teos (Michel *Recueil d'Inscr. gr.* no. 1318, Nilsson *Gr. Feste* p. 33) and the Πάνδια of Athens (Phot. *lex. s.v.* Πάνδια, Bekker *anecd.* i. 292, 10 f., Harpokr. s.v. Πάνδια, Mommsen *Feste d. Stadt Athen* p. 432 f.). The termination of the word Διῶ-σια may be due, as my friend Dr P. Giles suggests, to the analogy of Διονύσια, Γενέσια, Νεκύσια, Νεμέσια, etc.

³ Διὸς κώδιον or Δίων κώδιον. The latter phrase gave rise to the verbs *διοπομπεῖν*, *ἀποδιοπομπεῖν* (*supra* p. 422 n. 7), 'to send away evil by means of the Zeus-fleece': see Stephanus *Theor. Gr. Ling.* ii. 1528 D—1529 A, i. 2. 1420 D—1421 C.

⁴ Cic. *top.* 64, Serv. in Verg. *eccl.* 4. 43, *georg.* 3. 387.

as the skin of the sacrificed ram. Behind the youth are three women holding torches and a *plemochœ* (a top-shaped vase used for libations in the Eleusinian ritual¹); before him are two others

Fig. 305.

with uncertain objects in their hands, a pot on a brazier and a pitcher in a high receptacle. Another red-figured vase formerly in the Hamilton collection (fig. 306)² has a somewhat similar

Fig. 306.

design. A nude youth, wearing a string of amulets, kneels upon his right knee and seems about to catch a mouse in the presence of two women. Monsieur S. Reinach³ has suggested that we have here a fragmentary scene resembling that of the Lambert *hydria*, i.e. the purification of an *éphēbos* before the Eleusinia by means of the 'fleece of Zeus.' Since, however, the mouse figured among

¹ C. Michel in Daremberg—Saglio *Dict. Ant.* iv. 509 f. fig. 5708.

² Tischbein *Hamilton Vases* ii. 42 ff. pl. 17, Inghirami *Vas. fitt.* iv. 117 pl. 387, Lenormant—de Witte *Él. mon. chr.* ii. 353 ff. pl. 107 (=my fig. 306).

³ Reinach *Rép. Vases* ii. 297, 2.

the attributes of Zeus *Sabázios*¹, I would rather suppose the scene taken from the mysteries of that god². Nor do I feel at all confident that the line upon which the youth kneels is meant for the contour of a fleece³.

The Roman evidence is less shaky. Terra-cotta reliefs of the Augustan age exhibit the initiation of Herakles into the Eleusinian

Fig. 307.

mysteries as a pair of pendant panels⁴. In one we have the assembled deities. Demeter is seated on a *kíste*, which is covered with a fleece⁵: round the goddess and her seat twines the sacred snake. Behind her stands Kore; before her, Iakchos⁶ in fringed *chiton* and *nebris*, leaning upon his leafy *bacchos*⁷ and caressing the snake (fig. 307)⁸. In the other panel we have the purification of Herakles.

¹ *Supra* p. 391 f. pl. xxvii.

² *Sabázios* was sometimes confused with the *κύριος Σαβαώθ* (*supra* p. 234 n. 4: see O. Höfer in Roscher *Lex. Myth.* iv. 231 and especially Eisele *ib.* iv. 263 f.): hence presumably the cult-title *μεγά[λω κυρ]ῶ Σεβαζίῳ ἀγ[λω]* (*supra* p. 400 n. 6).

My friend and colleague Prof. R. H. Kennett *The Composition of the Book of Isaiah* (The Schweich Lectures 1909) London 1910 p. 61 suggests that ritual mouse-eating (Isa. 66. 17) was a heathen practice introduced into Jewish worship, in the days of Menelaus, perhaps from the Greek area. Possibly it was derived from the *Sabázios*-mysteries of Asia Minor.

³ I have reproduced the line as it appears in Lenormant—de Witte *loc. cit.*; but Tischbein and Inghirami *loc. citt.* show a mere ground-line.

⁴ Von Rohden—Winefeld *Ant. Terrakotten* iv. 1. 7 f., 261 f. pls. 45 f.

⁵ F. Hauser in the *Röm. Mitth.* 1910 xxv. 288 n. 1 cp. *h. Dem.* 195 f. *πρὸν γ' ὅτε δὴ οἱ ἐθήκεν Ἰάμβη κέδν' εἰδυῖα | πηκτὸν ἔδος, καθύπερθε δ' ἐπ' ἀργύφρον βάλε κῶας.*

⁶ So Hauser *ib.* p. 289.

⁷ *Supra* p. 220 n. 3.

⁸ I figure the example in the Louvre no. 4154 after G. P. Campana *Antiche opere in*

He sits on a stone seat spread with a skin, which in the most authoritative examples of the type appears as a lion-skin¹. At his feet is a ram's head, representing—as F. Hauser has pointed out—the 'fleece of Zeus²,' and recalling—as we may add—the Sabazian foot-stool³. The hero holds a torch in his left hand. Above his bowed and veiled head—a priestess raises the *liknon*. A priest bears

Fig. 308.

poppy-capsules in a *phiale* and pours a libation over a pig held by an attendant. Later variants in marble modify the figures to right and left (figs. 308⁴, 309). They also combine the two panels in a

plastica Roma 1842 p. 70 ff. pl. 17, reversing his design in accordance with the photograph published by Von Rohden—Winnefeld *op. cit.* iv. 1. 8 fig. 9. Overbeck *Gr. Kunstmyth.* Demeter-Kora pp. 510, 564, 579 Atlas pl. 16, 10 and F. Lenormant in Darenberg—Saglio *Dict. Ant.* i. 1070 fig. 1311 perpetuate Campana's error. The lower part of Kore belongs to another relief of the same type; and the middle part of her is a faulty modern restoration. The best specimen, that in the *Museo delle Terme* at Rome no. 4358 (Von Rohden—Winnefeld *op. cit.* pl. 45), is unfortunately defective as regards Demeter's seat.

¹ G. E. Rizzo in the *Röm. Mitth.* 1910 xxv. 121 ff. claims this skin as the Διὸς κώδιον. But see F. Hauser *ib.* p. 287 f.

² *Id. ib.* p. 288, cp. Harrison *Proleg. Gk. Rel.*² p. 547.

³ *Supra* p. 391 f.

⁴ Here again the best specimen in terra-cotta, that of the *Museo delle Terme* no. 4357 (Von Rohden—Winnefeld *op. cit.* pl. 46), fails us at the critical point—the ram's head. Indeed, all terra-cotta examples are fragmentary. I have therefore figured a marble relief at Naples (*Guida del Mus. Napoli* p. 167 no. 568), of post-Augustan date, perhaps part of a sarcophagus-front, which was published in reverse by G. Winckelmann *Monumenti antichi inediti* Roma 1821 ii pl. 104 and with extensive modern restorations in the *Real Museo Borbonico* Napoli 1829 v pl. 23, *Bull. Comm. Arch. Comun. di Roma* 1879 pl. 4—5, 2 (see Von Rohden—Winnefeld *op. cit.* iv. 1. 8 n. 1 bis, G. E. Rizzo in the

single frieze of ample dimensions. This is the case with an urn of Greek marble found in 1878 near the Porta Maggiore at Rome and perhaps derived from the *columbarium* of the *gens Statilia*¹. But the finest example of the frieze is the front of a splendid sarcophagus of Pentelic marble found in 1903 at Torre Nova on the *via Labicana* (fig. 309)². With regard to the prototype of the whole series, H. von Rohden and H. Winnefeld assume a date not earlier than the second century B.C.³, while Schreiber⁴, Pringsheim⁵ and others argue that it represented the Alexandrine rather than the Attic Eleusinia⁶. Recently, however, J. N. Svoronos has made a most ingenious attempt to prove that the Torre Nova sarcophagus

Fig. 309.

together with certain Athenian reliefs, coins, etc. preserves the types of the Eleusinian triad (Demeter, Kore, Iakchos) designed by Praxiteles for the *Iakcheion* at Athens⁷.

⁷ J. N. Svoronos in the 'Εφ. 'Αρχ. 1911 pp. 39—52.

Analogous customs are still observed here and there on Greek soil. Sir Arthur Evans in his remarkable account of a pillar-shrine at Tekekiöi, a Turkish village between Skopia and Istib in Macedonia, says: 'The floor is strewn with the fleeces of sacrificed rams'.¹ And Dr W. H. D. Rouse, describing another Moslem shrine on the highest point of the citadel at Mytilene, notes: 'They keep *sheepskins* here, and the worshippers *wrap themselves in these* when they pray'.² He justly suggests comparison with the 'fleece of Zeus.'

It will be seen that these scattered indications of a divine ram in the cults of Zeus *Meilichios*, Zeus *Ktésios*, etc. fit on to and corroborate the evidence already adduced of a Graeco-Libyan³ and Thraco-Phrygian Zeus⁴, who appeared sometimes as a ram, sometimes as a snake. For both Zeus *Meilichios* and Zeus *Ktésios* were likewise anguiform, as we shall have occasion to note when we come to discuss their cults. Moreover, just as Zeus *Ammon*⁵ and Zeus *Sabázios*⁶ had a secondary Dionysiac form, so Zeus *Meilichios* was replaced in Naxos by Dionysos *Meilichios*.⁷

x. The Significance of the Ram in the cults of Zeus.

We have now passed in review the various cults in which Zeus appears as a ram-god, and it is time to draw conclusions. From the welter of detail and local divergence two or three facts of constant import emerge. In the first place it is clear that over a wide area of the ancient world, from Meroe in the south to Moesia in the north, Zeus was intimately associated with the ram: the Graeco-Libyan Zeus *Ammon*, the Thraco-Phrygian Zeus *Sabázios*, the Thessalian Zeus *Laphýstios*, the Zeus *Aktaïos* or *Akraïos* of Mount Pelion, the Zeus *Meilichios* and the Zeus *Ktésios* of Athens, are cases in point. Secondly, it would seem that in the long run most of these cults took on a solar character; but that

⁶ *Supra* p. 395 n. 3, p. 398 ff.

⁷ *Andriskos frag.* 3 (*Frag. hist. Gr.* iv. 304 Müller) and *Aglaosthenes frag.* 5 (*Frag. hist. Gr.* iv. 294 Müller) *ap.* Athen. 78 c, *Plout. v. Ant.* 24, *de esu carn.* 1. 2, *quaest. conviv.* 1. 1. 3, *non posse suav. vivi. sec. Epic.* 22, *Eustath. in Od.* p. 1964, 18 f., *F. Creuzer Meletemata e disciplina antiquitatis Lipsiae* 1817 p. 22, *Schöll—Studemund anecd.* i. 268, 276, 282.

this aspect of them was usually late¹, seldom early², and never original. Thirdly, it will not be denied that there was a well-marked tendency for the ram-Zeus to mate with the earth-mother and to beget a son in his own likeness—a god commonly known as Dionysos.

These are the broad facts; and they do not countenance the idea that the ram was a solar animal³ and on that account associated with Zeus. Rather it was the principal beast of a pastoral population, an obvious embodiment of procreative power⁴, and as such

¹ E.g. the cult of Zeus Helios *Sebázios* belongs to Roman times (*supra* pp. 390, 400).

² Zeus was already identified with Amen-Râ in the sixth century B.C. (*supra* p. 350f.).

³ K. Schwenck *Etymologische mythologische Andeutungen* Elberfeld 1823 p. 41, A. de Gubernatis *Zoological Mythology* London 1872 i. 400 ff.

The curious statement that the ram sleeps on its left side from the autumnal to the vernal equinox, but on its right side during the other half of the year (Ail. *de nat. an.* 10. 18, Macrobian *Sat.* 1. 21. 18, Myth. Vat. 3. 15. 1, cp. Plout. *terrestr. an aquat. anim. sint callidiora* 21), at most proves that a bond of sympathy was believed to unite the earthly ram with its heavenly counterpart, the constellation Aries.

⁴ To the Greeks, as to others, the ram was *von Haus aus* a fertilising force. On the amatory propensities of the creature see Aristot. *hist. an.* 6. 19. 573b 17 ff., Varr. *rer. rust.* 2. 1. 17, 2. 2. 13f., Colum. *de re rust.* 7. 3, Plin. *nat. hist.* 8. 188. A strip of ram's skin was used in a love charm (Plin. *nat. hist.* 30. 141); ram's wool, as an aid in child-birth (*id. ib.* 20. 6) and female disorders (*id. ib.* 29. 32). A ram was said to have been enamoured of Glauke a Chian citharist (Theophr. *ap. schol. Theokr.* 4. 31, Ail. *de nat. an.* 1. 6, 5. 29, 8. 11, *var. hist.* 9. 39, Plout. *terrestr. an aquat. anim. sint callidiora* 18, Plin. *nat. hist.* 10. 51). The tomb of Laïs at Corinth was surmounted by a lioness standing over a prostrate ram (Paus. 2. 2. 4, cp. Imhoof-Blumer and P. Gardner *Num. Comm. Paus.* i. 19 pl. E, 73—76, *Brit. Mus. Cat. Coins* Corinth, etc. p. 92 pl. 23, 11, Head *Hist. num.*² p. 405). The same idea probably underlies the wide-spread use of the ram as a decoration of tombs in general (Frazer *Pausanias* iii. 187). Its employment for fountain-jets etc. (L. Stephani in the *Compte-rendu St. Pét.* 1862 p. 138, cp. *supra* p. 370) is of like significance: the spring at the monastery of Kaisariani on Mt Hymettos, which has been identified with the *Κυλλοῦ Πήρα* of the ancients (Soud. *s.v.* *Κυλλός*, *Κυλλοῦ Πήραν*, Hesych. *s.v.* *Κίλλεια*, *κύλλου πήρα*; Phot. *lex. s.v.* *Κύλλεια*, *Κύλλου πήραν*, Makar. 5. 41, Append. prov. 3. 52, Ov. *ars am.* 3. 687 ff.), still gushes out through an old ram's head of marble and as of yore is believed to aid conception, pregnancy, and delivery (L. Röss *Archäologische Aufsätze* Leipzig 1855 i. 220—222, Miss M. Hamilton *Greek Saints and Their Festivals* Edinburgh and London 1910 p. 151 f.).

Hence the ram was associated with the deities of generation, Hermes, Aphrodite, Dionysos, Attis, etc. The evidence, literary and monumental, has been collected by E. Gerhard 'Widdergotheiten' in the *Arch. Zeit.* 1850 viii. 149—160 pl. 15, 1—7, L. Stephani in the *Compte-rendu St. Pét.* 1869 pp. 18—139 Atlas pl. 1, 13, 15, S. Eitrem *Beiträge zur griechischen Religionsgeschichte* i. Der vor-dorische Widdergott Christiania 1910 pp. 1—24.

Conclusive is the fact that the *phallós* itself is sometimes made to terminate in a ram's head. So with a bronze pendant representing Hermes found at Herculaneum (*Antichità di Ercolano* Napoli 1771 vi (De' Bronzi di Ercolano ii) p. 389 ff. pl. 96, Roux—Barré *Herc. et Pomp.* viii Musée Secret p. 197 ff. pl. 46) and a bronze statuette of the pantheistic Khnemu at Marseilles (G. Maspero *Catalogue du musée égyptien de Marseille* p. 131 no. 562, W. Drexler in Roscher *Lex. Myth.* iii. 1257).

This combination of ram with snake in the cults of Zeus (*supra* pp. 358 ff., 390 ff.,

associated both with the fertilising sky-god¹ and with the all-generating sun². The ram thus supplied the *tertium comparationis*, which on occasion served to bring together the Hellenic Zeus and the barbaric sun-god.

Nor need we hesitate to admit that the Greeks themselves, quite apart from foreign influence, regarded the ram as a possible manifestation of Zeus. Theriomorphic epiphanies of this god are of frequent occurrence in mythology. And the myths, though manipulated as so much artistic material by the poets of a literary age, indubitably attest the serious beliefs of the past. We are therefore well within our rights in maintaining that the golden lamb of Atreus and the golden ram of Phrixos were but animal forms of Zeus.

(g) The Sun and the Bull.

i. The Bull and the Sun in Egypt.

As Zeus was related to the ram, so or nearly so was he related to the bull. There is indeed a curious parallelism between the two animal-cults, which must have existed side by side from a remote Indo-European past³. Shepherds and neatherds expressed their religious beliefs in closely analogous forms, of which many similar traces have survived in ancient literature and art. It is therefore both desirable and possible in dealing with Zeus and the bull to adhere to the same lines that we followed in dealing with Zeus and the ram. As before, we shall begin by noticing certain Egyptian, and therefore non-Indo-European, cults, which were at an early

428) is likewise appropriate to a fertilising god (*supra* p. 396 n. 1). S. Reinach in the *Rev. Arch.* 1899 ii. 210 ff. and in his *Cultes, Mythes et Religions* Paris 1906 ii. 58 ff. regards Zagreus as a horned serpent and compares him with the horned serpent that occurs repeatedly on monuments of the continental Celts (*id. Bronzes Figurés* p. 195 ff.). The Celtic serpent is regularly ram-headed. Hence a more certain classical parallel is a broken limestone pillar, found at the village of ἐς τὰ Φίχθια near Mykenai, round which twines a raised band, probably meant for a serpent, ending in a ram's head: a mutilated inscription of the fourth century B.C. mentions Ἐκάρη and Φερσεφόνη (*Ath. Myth.* 1883 viii. 141 ff.; Frazer *Pausanias* iii. 187 wrongly speaks of two ram's-heads). F. Baumgarten, who first published the pillar, cp. a bronze *caduceus* with ram's-heads instead of snake's-heads (Müller-Wieseler *Denkm. d. alt. Kunst* ii. 255 pl. 30, 337 c).

date more or less assimilated by the Greeks. As before, we shall end by showing that the Greeks themselves had inherited from their own Indo-European ancestors ideas so similar that they were readily fused with those of surrounding foreigners.

We begin, then, with Egypt. Here from a remote past bulls and cows had been regarded as objects of peculiar veneration. Evidence of their divinity is forthcoming even in the predynastic age¹. The two most famous bulls of Egypt were *Ur-mer* at Heliopolis and *Hâp* at Memphis. The Greeks, who transliterated these names as *Mnevis* and *Âpis* respectively, describe the former as sacred to the Sun, the latter as sacred to the Moon². Mnevis was the biggest of bulls: he was jet-black, for exposure to the sun blackens the body: the hairs of his tail and of his whole body stood erect, unlike those of other bulls, just as the sun runs counter to the sky: his testicles were very large, since desire is aroused by heat, and the sun is said to engender nature³. His cult was established by king Kaiechos of the second dynasty, according to Manethon⁴, and lasted on into Ptolemaic times, as appears from the Rosetta stone⁵. After death he was identified with Osiris as *Osiri-Ur-mer*, the Greek *Osorómnnevis* or *Osórnnevis*⁶. Egyptian monuments represent him as a bull with the solar disk and the *uraeus* between his horns⁷, or as a human figure with a bull's head⁸. Of myths connected with him we know little. Indeed, Ammianus Marcellinus remarks that 'nothing worth mentioning is said of him⁹.' Aelian, however, relates that a certain Bokchoris, king of Lower Egypt, who had a reputation for justice and piety that he did not deserve, being minded to annoy the Egyptians, brought in a wild bull to fight with Mnevis. Both bellowed, and the wild bull charged, but, missing his aim, struck his horn into the trunk of a *persea*-tree, where Mnevis gored him to death. Bokchoris

⁹ *Amm. Marc.* 22. 14. 7.

thereupon did reverence to the victor, but he had earned for himself the hatred of the Egyptians. And—to conclude in the words of Aelian—‘if any one thinks it a scandal to drop from a zoölogical discussion into an occasional folk-tale, he is a fool!’

Apis too (fig. 310)² had to be black beyond other bulls³. He was moreover distinguished by as many as twenty-nine bodily marks⁴, of which a few are reported by classical authors. Thus Herodotos⁵ states that Apis had a white triangle on his forehead, a beetle under his tongue⁷, an eagle on his back, and double hairs in his tail⁸. Various marks brought him into connexion with the sun and moon. Since he was sacred to the moon rather than the sun⁹, this twofold characterisation might have been thought superfluous. But some persons regarded Mnevis as the father of Apis¹⁰. And Porphyrios explains that, as the moon gets her light from the sun, so Apis must needs have the tokens of both luminaries: the sun, he adds, is evidenced by the blackness of the bull’s body and by the beetle under his tongue, the moon by the halved and

Fig. 310.

the gibbous signs¹¹. Others say that the most important mark of all

¹ Ail. *de nat. an.* 11. 11. *Id. ib.* 12. 3 (cp. Maneth. *frag.* 65 (*Frag. hist. Gr.* ii. 592 f. Müller) and G. Maspero *The Passing of the Empires* London 1900 p. 246 n. 5) states that in the reign of this Bokchoris a monstrous lamb with two heads, four horns, eight legs and two tails spoke in human speech and predicted that Upper and Lower Egypt would be disgraced by the rule of a stranger.

² Drawn from a bronze statuette in the possession of Mr F. W. Green. Total height 3 $\frac{1}{4}$ inches.

⁶ For λευκὸν τετράγωνον of the MSS. we should read, with Stein, λευκὸν τι τρίγωνον. The description of the historian is thus brought into agreement with extant figures of Apis: see Stein *ad loc.* Strab. 807 says merely διάλευκος τὸ μέτωπον.

⁷ For ἐπὶ δὲ τῇ γλώσσῃ κάρθαρον of the MSS. we should read, with Jablonski and Stein, ὑπὸ δὲ κ.τ.λ.: cp. Porphyrios *ap. Eus. praep. ev.* 3. 13. 2 ὁ ὑπὸ τὴν γλῶτταν κάρθαρος, Plin. *nat. hist.* 8. 184 nodus sub lingua quem cantharum appellat.

⁸ Mela 1. 9 cauda linguaque dissimilis aliorum, Soud. *s.v.* Ἀπίδες...σημείον ἔχοντες περὶ τὴν οὐρὰν καὶ τὴν γλῶσσαν. Larcher cites from schol. Ptolem. *tetrabibl.* p. 2 the statement that a cow’s tail waxes and wanes with the moon: cp. *supra* p. 429 n. 3 of the ram.

⁹ Macrob. *Sat.* 1. 21. 20 bos Apis in civitate Memphi solis instar excipitur is a partial and misleading assertion. See *supra* p. 431 n. 2. But cp. *infra* p. 435 f. Kyrillos in *Oseam* 5. 8 f. (cp. 10. 5) states that the Egyptians regarded Apis as σελήνης μὲν τέκνον, ἡλίου δὲ ἐκγονον.

¹⁰ Plout. *de Is. et Os.* 33.

¹¹ Porphyrios *ap. Eus. praep. ev.* 3. 13. 2, Kyrillos in *Oseam* 5. 8 f.

was a white crescent on his right side, which denoted the moon¹. Apis was the calf of a cow not suffered again to conceive offspring². It was believed that this cow had been impregnated by a ray of light from heaven³, or, according to some, from the moon⁴. When a new Apis was discovered, the Egyptians put on their best clothes and fell to feasting⁵; for his appearance portended good crops and other blessings⁶. Aelian states that honours were heaped upon the lucky man in whose herd he had been born. Sacred scribes with hereditary knowledge of the requisite signs came to test his credentials. A special house was built for him in accordance with the most ancient prescriptions of Hermes (that is, Thoth), a house facing the sun-rise and large enough to contain stores of milk, on which for four months he was reared. After that time, he was, during the rise of a new moon, taken by the sacred scribes and prophets, in a barge yearly adorned for this purpose, to Memphis⁷. Diodoros gives a somewhat different account of what took place. According to him, the Apis-calf was first brought to Neiloupolis, where he was kept for forty days. During this period, but never afterwards, women came into his presence and exposed their persons before him. Then he was put on board a barge with a gilded cabin and conveyed as a god to the precinct of Hephaistos (that is, Ptah) at Memphis⁸. Once at Memphis, he was maintained in the lap of luxury⁹. His stall had a window in it, through which strangers could see him. But, since they desired a better view, the Egyptians had arranged an adjoining court-yard, into which he was driven on stated occasions. The court-yard contained another stall for his mother. The shrine of Apis stood beside the large and wealthy temple of Hephaistos (Ptah). The latter had a *drómos* or 'approach,' in which stood a colossus made of a single block of stone. Here bulls, bred for the purpose, were pitted against each other, a prize being awarded to the victorious bull¹⁰. Apis had his own well and spring of drinking water, for

attendants and priests declared that Nile-water was too fattening. He had also a seraglio of fine cows¹. Once a year a cow, distinguished by a special set of signs, was exhibited before him: tradition said that she was always found and destroyed on the self-same day². During one week in the year Apis' birthday was celebrated: a gold and a silver bowl were sunk in the Nile at a place in Memphis called from its configuration *Phiata*, 'the Saucer'; and the crocodiles of the river harmed no one till noon on the day following the birthday week³. The *stile* of Palermo records the first celebration of another festival, the 'Running round of Apis,' but gives us no indication as to its character⁴. Omens and oracles were drawn from the bodily movements of Apis⁵. When he licked the *limation* of Eudoxos the Cnidian, the priests averred that the astronomer would be famous but short-lived⁶. When he turned away from Germanicus Caesar, who was offering him food, that meant that Germanicus was a doomed man⁷. Apis had two chapels called bridal-chambers: if he entered the one, it was a good sign; if the other, mischief was brewing⁸. He was attended by choirs of boys, who sang his praises and then, suddenly becoming possessed, would burst out into predictions of the future⁹. Omens were also drawn from the first words heard on quitting his sanctuary¹⁰. Thus Apis lived for the mystic number of five times five years¹¹. After his allotted span, the priests drowned him in their sacred spring, and mourned with shorn heads till they found his successor¹². Large sums of money were spent on his obsequies¹³; his burial place was kept a profound secret¹⁴; and all Egypt lamented his

death¹. So the cult of Apis went on from the days of Menes (*Mênê*)², the first king of the first dynasty, to the downfall of paganism³. Apis was commonly⁴ identified with Osiris⁵. Most of the priests taught that the former must be regarded as a comely image of the soul of the latter⁶. More exactly, on the death of Osiris his soul passed into Apis and was re-incarnated in the succession of bulls that bore that name. Others said that, when Osiris was slain by Typhon, Isis gathered up his remains and deposited them in a wooden cow (*boûs*) wrapped about with fine linen (*býssos*), from which fact the town of *Boûsirîs* was supposed to have drawn its name⁷. Osiris-Apis (*Âsar-Hâpi*) under the name of Sarapis was worshipped far and wide throughout the countries bordering on the Mediterranean during the Hellenistic age⁸, till Tertullian exclaimed indignantly: 'It is not Egypt nowadays, no, nor Greece, but the whole world that swears by this African!'⁹ He was regarded as lord of the underworld, an Egyptian Hades¹⁰. But his powers were not merely chthonian, as appears from the fact that he was frequently identified with Zeus and with Helios¹¹. This last identification squares with the opinion of those who assert that Apis, if we could but recover the Egyptian conception of him and get rid of the comparatively recent classical tradition, would prove to have been a solar before he became a lunar deity. That is the view of O. Gruppe¹², of E. Meyer, and of W. H. Roscher¹³, who all lay stress on the disk

¹³ E. Meyer and W. H. Roscher in *Lex. Myth.* i. 420: 'Daher hat auch Apis (wie übrigens alle Stiergottheiten Ägyptens) eine solare Natur; als Symbol wird ihm der Sonnendiskus zwischen die Hörner gesetzt. [Die Scheibe zwischen zwei Hörnern ist in Ägypten immer die Sonne, nie der Mond.]'

436 The Bull and the Sun in Egypt

that is seen between the horns of Apis in extant Egyptian representations¹ as symbolising the sun, not the moon. The matter is one for Egyptologists to decide.

At Hermonthis, eight miles to the south-west of Thebes, Strabon records a cult of Apollon and of Zeus, adding: 'Here too an ox is kept².' Macrobius, after mentioning Mnevis and Apis as proofs that in Egypt the sun was represented by a bull, continues: 'At the town of Hermunthis they worship a bull, which is consecrated to the sun in the magnificent temple of Apollo. They call it Bacis (*v.l.* Bacchis). It is distinguished by certain miraculous signs which suit its solar character. For it changes its colour every hour, so they declare; and the hairs, they say, with which it is covered, grow the opposite way to those of all other beasts, so that it is regarded as

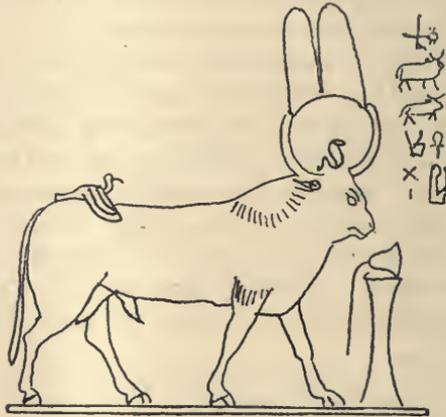

Fig. 311.

an image of the sun opposing the movement of the universe³. E. A. Wallis Budge⁴ comments as follows: 'The Egyptian equivalent of the name Bacis, or Bacchis, is ΒΑΚΗΑ, ...and this bull is

¹ A. Erman *A Handbook of Egyptian Religion* trans. A. S. Griffith London 1907 p. 23 fig. 31, Roscher *Lex. Myth.* i. 420 fig., H. Stein on Hdt. 3. 28 fig.

² Strab. 817.

³ Macrobius *Sat.* 1. 21. 20 f. (*Bacin* most MSS. *bachin* cod. A. *Bacchin* cod. 'Angl.'). The expression (*ib.* 21) *imago solis in adversam mundi partem nitentis* is rightly explained by L. Jan *ad loc.* with the help of Macrobius *comm. in somn. Scip.* 18 as an allusion to the difference between the real and the apparent movement of the heavenly bodies. E. A. Wallis Budge *The Gods of the Egyptians* ii. 352 says: 'an image of the sun *shining* on the other side of the world, i.e., the Underworld.' But *nitentis* is the participle of *niti*, not *nitere*.

⁴ E. A. Wallis Budge *op. cit.* ii. 352 f. W. Spiegelberg, however, in the *Archiv für Papyrusforschung und verwandte Gebiete* 1901 i. 339 ff. infers from the names Περεβοῦχ(ις), Παβοῦχ(ις) (Πεβοῦχ(ις), Πιβόχ(ις)), Πιβόκ(ις), Πετοσορβοῦχ(ις) that there was a god Βοῦχ(ις), and publishes a mummy-ticket (*s.* i or ii A.D.), now at Strassburg, which directs that the body of one Thaeis be sent to Hermonthis and there deposited *eis τὸ Βοῦχ(ις) (= Βουχέϊον) | Ψενουήρι παστοφάρου | τοῦ θεοῦ ζῶου Βοῦχ(ις) (sic)*. Hence in Macrobius *loc. cit.* he cj. *Bucin*.

styled the "living soul of Rā,"...and the "bull of the Mountain of the Sunrise (Bakhau), and the lion of the Mountain of the Sunset." He wears between his horns a disk, from which rise plumes, and a uraeus; on his forequarters is a peculiar growth of hair, and 'over his hindquarters...a vulture with outspread wings (fig. 311)¹.'

The Egyptians worshipped a black bull called *Ónouphis* at a place whose name was too awkward for Aelian² to transliterate. He tells us, however, that this bull was the largest of bulls, that its peculiarity was the unique direction taken by its hairs, and that it was fed on Median grass. E. A. Wallis Budge identifies it with the bull of Hermonthis, and thinks that *Ónouphis* 'is probably a corruption of some Egyptian name of Osiris Un-nefer³.'

At Momemphis, in the Delta, there was a cult of Aphrodite (*Hathor*) and a sacred cow⁴. Aphroditopolis, in the Heptanomis, on the east side of the Nile, was originally called *Depêhet*, that is, the 'Cow's head⁵': its inhabitants kept a sacred white cow⁶. Many other Egyptian towns, both in the Delta and outside it, kept a sacred bull or cow, as the case might be⁷.

ii. Zeus, Io, and Epaphos.

Now the Greeks at an early date came into contact with all this Egyptian zoölatry and were much impressed by the cattle sacred to the sun and moon.

Herodotos, the first student of comparative religion, boldly identifies Dionysos with Osiris⁸ and asserts that the so-called Orphic and Bacchic rites were in reality Egyptian and Pythagorean⁹. Whatever the precise value of such generalisations may be, we can at least infer that there were substantial points of agreement between the Dionysiac religion and its Egyptian counterpart¹⁰. Among these would be (as the whole of the present section attests) the worship of a great fertilising bull, which tended to

acquire solar powers. It is, therefore, allowable to conjecture that the obscure and presumably non-Greek¹ name *Bákchos* was in fact borrowed² from that of the Egyptian bull *Bakha*³. The name thus taken over, say by the Libyo-Greeks, appears to have passed into Crete⁴ and Asia Minor⁵, thence finding its way into European Greece⁶. Hesychios' statement that *bákchos* was a Phoenician word for 'lamentation' is hardly more than an etymological guess⁷.

Less problematic is another and a better-known case—that of Apis. The Greeks named him *Épaphos*⁸ and brought him into connexion with their own mythology⁹, declaring that he was the son of Io by Zeus, who impregnated her by a touch¹⁰ at Kanobos. The story is summarised by Aischylos in the earliest of his extant plays, the *Suppliants*, where the fifty daughters of Danaos fleeing from the fifty sons of Aígyptos seek the protection of Pelasgos, king of Argos, on the ground of kinship. The passage was thus rendered by Prof. L. Campbell :

- Chorus.* 'Tis said that in this Argive land erewhile
Io was doorkeeper of Hera's Fane.
King. Certes she was ; strong Rumour makes us know.
Is't said that Zeus to mortal maid came near?
Cho. Yea, and that Hera knew, and would prevent.
King. How ended such a high-enkindled feud?
Cho. Your goddess turned the woman to a cow.
King. But was the hornèd heifer safe from Zeus?
Cho. He took the likeness of a leaping bull.
King. What then contrived the mighty Queen of Heaven?

¹ L. Meyer *Handb. d. gr. Etym.* iii. 78 'Etymologisch nicht verständlich.' See further Gruppe *Gr. Myth. Rel.* p. 1417 f.

² The loan would be facilitated not only by the bovine form of the god and his fertilising function, but also by his snake and his sacred mountain.

³ My suggestion has, I find, been anticipated by F. Creuzer *Symbolik und Mythologie*³ Leipzig and Darmstadt 1840 ii. 203 ('*Bacis*, worin vielleicht bedeutende Spuren liegen des Einflusses Aegyptischer Vorstellungen auf die Bacchische Religion der Griechen,' *op. ib.* 1842 iii. 641 n. 2).

- Cho.* She set a sleepless watch, with myriad eyes.
King. What all-seeing herdman of one heifer? Say.
Cho. Argus, the child of Earth,—whom Hermes slew.
King. What framed she more for the poor cow's annoy?
Cho. A goading gad-fly, giving her no rest.
King. 'Tis called the "breese" by neighbours of the Nile.
Cho. This drove her, banished, on a distant course.
King. Your tale fits smoothly with the truths I know.
Cho. Canopus and then Memphis saw her come.
 * * * * *
- Cho.* Zeus with a finger-touch begat a child.
King. How then was named the heifer's birth divine?
Cho. Named from the touch that gat him, Epaphus.
 * * * * *
- Cho.* Libya that holds a wide extent of earth.
King. What other child of hers hast thou in mind?
Cho. Bel, with two sons, sire of my father here.
King. Of thrilling moment is this name. Declare it.
Cho. Danaüs, whose brother fifty sons begat.
King. His name, too, let thy liberal words reveal.
Cho. Ægyptus. Now thou knowest my primal race.
 Act therefore as toward Argive visitants.
King. In truth ye seem to me to be of kin
 Ancestrally to Argos¹.

(This version of the myth involves a sort of thrust and parry between Zeus and Hera, which appealed to the dramatic instinct of Aischylos and is well expressed in the rapid exchange of his short, sharp, single lines. Zeus deals the first blow by falling in love with Hera's priestess, Io. Hera thwarts Zeus by changing Io into a cow. Zeus outwits Hera, becoming a bull to prosecute his amour. Hera, not yet vanquished, sets Argos *Panóptes*, the 'All-seeing,' to guard the cow. Hermes, presumably at Zeus' bidding, slays Argos. Hera, as a last resource, drives the cow by means of a gad-fly to the furthest limits of the world. Even at the furthest limits of the world Zeus touches her and gains his end.) Thus the omnipotence of Zeus is vindicated: play-wright, performers, and audience return home well-content.

Not so we. Aischylos' plot is obviously put together out of old, indeed primitive, materials. And we are, for the moment, mainly interested in recovering the original form of the story. This may be, probably is, a task beyond our powers. Nevertheless it will not do to neglect divergent accounts that have reached us from other sources. They may at least help towards the reconstruction of an earlier version.

¹ Aisch. *suppl.* 291—325 trans. L. Campbell, cp. *P.v.* 846 ff., Bakchyl. 18 *Io*, Eur. *Phoen.* 676 ff., Apollod. 2. 1. 3 f., Hyg. *fab.* 145, 149, 155, 275, Ov. *met.* 1. 748 ff., *alib.*

More than one writer, for example, assumes that Io was changed into a cow by Zeus, not by Hera. According to Apollodoros¹, who in his great 'Library' of Greek myths has preserved, so to speak, a *variorum* edition of this tale, Zeus attempted to divert Hera's suspicions from his own intrigue with Io by transforming the latter into a white² cow and swearing that he had never had intercourse with her³. Hera thereupon asked Zeus to make her a present of the cow and stationed Argos Panóptes as its guardian. Argos bound the cow to the olive-tree⁴ that was in the sacred grove of the Mycenaeans⁵. Zeus bade Hermes steal the cow. *Hiera*⁶, the 'Hawk,' revealed the design⁷. And Hermes,

⁷ Two other birds were brought into connexion with the myth. (1) *Iynx* the 'wry-neck,' daughter of Echo or Peitho, sacred to Nike and Aphrodite, by magic means inspired Zeus with love for Io, and was punished by Hera, who transformed her into a stone (*Phot. lex. s.v.* Ἴυνξ) or into a wry-neck (*Kallim. frag.* 100^c. 8 *Schneider ap. schol. Theokr.* 2. 17, cp. *schol. Pind. Nem.* 4. 56). (2) When Argos was slain, Hera transformed him into a peacock (*schol. Aristoph. av.* 102, anon. *miscell.* 6 in *Myth. Graec.* ed. Westermann p. 347, *Nonn. Dion.* 12. 70 f., *Mart.* 14. 85. 1 f., *Myth. Vat.* 1. 18, 2. 5, 2. 89) or decorated the tail of her peacock with his eyes (*Ov. met.* 1. 722 f.), or the peacock sprang from his blood (*Mosch.* 2. 58 ff.) or was sent up by the Earth where he fell (*Opp. de auc.* 1. 24). The peacock appears on the gem mentioned above (n. 4), cp. *Boetticher Baumkultus* fig. 35 and the peacocks kept in the temple of Hera at Samos (*Antiphanes Homopatrii ap. Athen.* 655 B, *Eustath. in Il.* p. 1035, 47 f., *Brit. Mus. Cat. Coins Ionia* pp. 369—372, 386, 390 f. pl. 36, 11, 13, 37, 15, *Head Hist. num.*² p. 606). At the Argive Heraion Hadrian dedicated a peacock of gold and shining stones (*Paus.* 2.

when he could not be hidden, slew Argos with a stone¹. Hera then sent the gad-fly to drive the cow far away. The cow, after traversing the Ionian Gulf, Illyria, Mount Haimos, the Bosporos, Skythia, Kimmeria etc., at length reached Egypt, where it recovered human form and gave birth to Epaphos on the banks of the Nile.

Again, opinions differed as to the colour of the cow. Soudidas identifies Isis with 'Io, whom Zeus carried off from (the town of) Argos and, fearing Hera, changed now into a white, now into a black, and now into a violet cow².' Moschos, a bucolic poet of the third century B.C., adorns the golden basket of his Europe with a device representing Io as a golden cow³. And Virgil arms Turnus, king of the Rutuli, with a shield on which was a golden cow likewise denoting Io⁴.

iii. Priests and Priestesses with Animal Names.

But, whether Io was transformed into a cow by Hera or by Zeus, and whether the colour of the said cow was white or black or violet or golden, are, after all, questions of minor importance. What we want to know is the original relation subsisting between the principal figures of the myth, Zeus, Hera, Argos, Io, and the significance of the bull and the cow in regard to each.

Io, the *kleidoûchos* or 'key-keeper' of Hera, was changed by her goddess into a cow. This, the Aeschylean form of the myth, suggests, if I am not mistaken, that the priestesses of the Argive Hera were known as 'cows.' Examples of priests and priestesses bearing animal titles are fairly frequent. Dionysos often had a bovine character, and Dionysiac mysteries were celebrated by a class of priests called 'cow-herds⁵.' Their name presupposes that

17. 6, *infra* ch. iii § 1 (a) viii (β and γ)) and an antefix of terra-cotta found by Finlay was painted to imitate the tail of a peacock (Frazer *Pausanias* iii. 169). Sir Charles Waldstein *The Argive Heraeum* Boston and New York 1902—1905 i. 24, 64 f., states that General Gordon of Cairness in 1831 found there the tail of a peacock in white marble. *Id. ib.* ii. 205 f. pl. 77, 46—48 publishes some votive bronze cocks (? peacocks) that he discovered on the same site.

¹ So *et. mag.* p. 136, 52. According to the usual version, Hermes approached Argos as a herdsman playing on his pan-pipes, charmed him to sleep with music and his magic wand (*Ov. met.* i. 671 ff., Val. Flacc. 4. 384 ff.), and then slew him by cutting his throat with the *hârpe* (*Ov. met.* i. 717 f., Lucan. 9. 663 f., Val. Flacc. 4. 390), or by putting out his eyes with it (*Myth. Vat.* 3. 9. 3) or with his wand (*Nonn. Dion.* 13. 25 ff.).

² Soudid. *s.v.* 'Ισις'... ποτὲ μὲν εἰς λευκὴν βοῦν, ποτὲ δὲ εἰς μέλαιναν, ποτὲ δὲ ἰάζουσαν (probably to suit the name 'Ιώ).

³ Mosch. 2. 44 f.

⁴ Verg. *Aen.* 7. 789 ff.

⁵ The evidence is cited by Rohde *Psyche*² p. 15 n. 3 and more fully by O. Kern in Pauly—Wissowa *Real-Enc.* iii. 1013—1017. The latter concludes: 'Βουκόλοι are sacred officials in the service of Dionysos. Their name refers to the bovine form under which

442 Priests and Priestesses with Animal Names

the god, or his worshippers¹, or both, were 'cows.' Similarly Poseidon was sometimes a bull-god, and the young men who served as his cup-bearers at an Ephesian feast were 'bulls.'² A sanctuary of Artemis *Poló*, 'the Colt,' constructed c. 200—150 B.C., has recently come to light in Thasos³. A Laconian inscription commemorates an 'Aurelia Epaphro, who was colt of the two most holy deities, Demeter and Kore⁴.' In a rite at some unspecified place, probably in Lakonike or Messene, two girls were called 'the colts of the Leukippides⁵.' And the term 'sacred colt' was applied to a priest or priestess in Ptolemaic Egypt⁶. Among the Iobacchoi of Athens officials appointed by the priests to act as 'chuckers-out' were named 'horses.'⁷ At the Peiraieus one Chryseros, a man of humble estate, was 'horse' for the *orgeónai* or 'worshippers' of Euporia *Beléla, Orata*, Aphrodite, and the Syrian goddess⁸. The girls who, clad in saffron robes, joined in the ritual of Artemis *Brauronia* were 'bears⁹.' Those

their god was originally worshipped. They are found occasionally in other cults too, e.g. in Crete in the cult of the chthonian Zagreus and the Kouretes and in the service of Hekate. An ἀρχιβουκόλος of Apollon *Sminthios* in mythical times is mentioned by Polemon frag. 31 Preller.⁷

¹ *Corp. inscr. Gr.* ii no. 3605, 32 f. Bunarbashi τὰς τε βοῦς καὶ | τοὺς βουκόλους was thus interpreted by R. Schöll *Satura philologa in hon. H. Saupprii* p. 177 and A. Dieterich *De hymnis Orphicis* Marburg 1891 p. 5 (= *Kleine Schriften* Leipzig and Berlin 1911 p. 71 f.). They were probably mistaken: see M. Fränkel *Die Inschriften von Pergamon* Berlin 1895 ii. 485. O. Kern, however, in Pauly—Wissowa *Real-Enc.* iii. 1014 infers the existence of human βόες from that of the priestly βουκόλοι. See also *infra* ch. i § 6 (g) xx (ξ) on children called βόες at Hierapolis Bambyke.

alludes to the Pythian priestess as a 'Delphic bee'.¹ And, lastly, the chief-priestesses of the Great Mother (Kybele) were still being called 'bees' at the commencement of our era². Such titles imply that the deity worshipped was originally believed to appear in animal form, and that the worshipper, from motives that cannot readily be proved and must not hastily be assumed, pretends to be the animal in question.

iv. Hera and the Cow.

Now Hera had much to do with cows. The word *βοῶπις*, which strictly signifies 'cow-eyed, cow-faced, of cowlike aspect,' had already in Homeric days come to be used as a complimentary epithet meaning 'large-eyed, fine-eyed' applicable to nymphs³ and even to mortal women⁴. But it is noticeable that fourteen times in the *Iliad*—for the word is never found in the *Odyssey*—occurs the phrase 'cow-eyed lady Hera⁵.' This stereotyped description always occupies the second half of the hexameter line, and is in fact a tag from a pre-Homeric system of versification, in which it formed a complete dactylic line⁶. It is, therefore, a reasonable conjecture that *βοῶπις* as an epithet of Hera had come down to the epic minstrel from a distant past, when it was used in the sense of 'cow-eyed' or 'cow-faced' and presupposed the primitive conception of Hera as a cow⁷.

Traces of the same conception appear at the principal cult-centres of the goddess. Thus at Samos her image, to judge from coin-types of imperial date (figs. 313⁸, 314⁹), was a dressed up wooden

¹ Pind. *Pyth.* 4. 105 f. χρῆσιμος ἄρθωσεν μελισσας | Δελφίδος αὐτομάτῳ κελάδῳ with schol. *ad loc.* See further *Journ. Hell. Stud.* 1895 xv. 4 f.

⁸ *Brit. Mus. Cat. Coins* Ionia p. 393 no. 375 Gallienus (wrongly described—'serpent? coiled round modius of Hera').

⁹ *Brit. Mus. Cat. Coins* Ionia p. 381 pl. 37, 6 Gordianus Pius (wrongly described—

post with a pair of cow's horns attached near the top of it. Hera, in fact, bore some resemblance to the horned Astarte of the Semites¹. And her originally bovine character doubtless facilitated the later identification of her with Isis²—witness the Ovidian story that, when the gods fled before Typhoeus into Egypt³, Hera became a snow-white cow⁴. Again, the great Argive Heraion was situated at the foot of a mountain (1744 ft in height), which in ancient times was called *Eúboia* and is still known as *Evvia*⁵. Pausanias was told that the neighbouring river Asterion had three daughters *Eúboia*, *Prósymna*, and *Akrata*, that they were the nurses of Hera⁶, and that the ground about the Heraion, the district below it, and the mountain opposite to it were named after them⁷. Dr Farnell, however, points out⁸ that *Prósymna*, 'She to

Fig. 313.

Fig. 314.

whom the hymn is raised⁹, and *Akrata*, 'She who is worshipped on the summit¹⁰, were two cult-titles of Hera in the Argolid, and

'modius, round which serpent twines'). The notion that Hera's head is surmounted by a snake seems to be based on a few examples (e.g. *Brit. Mus. Cat. Coins Ionia* p. 380 pl. 37, 5, *Iulia Mamaea*), which show one horn pointing up and the other down—as on coins of Lappa (J. N. Svoronos *Numismatique de la Crète ancienne* Macon 1890 i. 211 f. pl. 19, 28—36). It must, however, be admitted that the head-gear of the Samian Hera is very variously represented on the coins (Overbeck *Gr. Kunstmyth.* Hera p. 15 Münztaf. 1, a—g).

¹⁰ Paus. 2. 24. 1 states that on the way up to the akropolis of Argos there was a

suggests that *Eúboia*, 'She who is rich in oxen,' was a third. *Neméa*, a few miles away from the Heraion, was said by some to have taken its name from the cattle sacred to Hera, which were there 'herded' by Argos¹. The first systematic exploration of Tiryns and Mykenai yielded an extraordinary number of small terra-cotta cows, as many as 700 being found on the akropolis of the latter town alone². These Schliemann took to be figurines of Hera herself in the form of a cow, Hera *boôpis*³; but more critical investigators regard them as votive substitutes for actual cattle⁴. Sir Charles Waldstein, on the site of the Heraion, discovered some interesting examples of bronze cows, one of which, as Mr D. G. Hogarth observed, shows markings indicative of a sacrificial fillet⁵. In Seneca's *Agamemnon*⁶ the chorus, consisting of Mycenaean women, chant to their goddess Hera:

At thy fane the bull's white wife
Falls, who never in her life
Knew the plough nor on her neck
Bore the yoke that leaves the fleck.

At Argos the festival of Hera was known as the *Héraia* or *Hekatómbaia* or as 'The Shield from Argos'⁷. The first name explains itself. The last refers to the fact that, at the accompanying athletic contest, the prize was a bronze shield⁸. The festival was

sanctuary of Hera *Ἀκράτα*, cp. Hesych. *s.v.* *Ἀκράτα*. On the cult of Hera *Ἀκράτα* at and near Corinth, and also on the Bosporos, see G. Wentzel in Pauly—Wissowa *Real-Enc.* i. 1193. Gruppe *Gr. Myth. Rel.* pp. 128 n. 8, 183 n. 7, thinks that the Corinthian cult was modelled on the Argive.

⁷ Nilsson *Gr. Feste* p. 42 ff.

⁸ Pind. *Ol.* 7. 83 ὁ τ' ἐν Ἀργεὶ χαλκὸς ἔργων υἱν. The schol. vet. *ad loc.* 152 a explains that the prizes were not bronze in the mass, but tripods, cauldrons, shields, and bowls. *Id. ib.* 152 b says simply: 'the bronze that is given at Argos as a prize to the victor.' *Id. ib.* 152 c: 'The prize was a bronze shield, and the wreaths were of myrtle.' *Id. ib.* 152 d: 'Bronze is given as the prize, because Archinos king of Argos, who first established a contest, being appointed to look after the supply of arms, made the award of armour from his store.' Polyain. 3. 8 states that Archinos was put over the armoury at a time when the Argives were arming: he offered a fresh weapon to each citizen, receiving in exchange the old weapons, so as to dedicate them to the gods; but, having collected all the old without supplying the new, he armed a mob of mercenaries, aliens, etc. and so became tyrant of Argos. If this is rightly referred (Pauly—Wissowa *Real-Enc.* ii. 541) to the period of the Chremonidean War (266—263 B.C.), it is clear that the scholiast on

called *Hekatombaia* because it included a great procession headed by a hundred oxen, which were killed, cut up, and distributed to all the citizens¹. Was it as devotees of Hera *Argeta* that the Coan women, when Herakles left Kos, 'wore horns'²?

v. Kleobis and Biton.

Further details concerning the Argive cult may be gathered from Herodotos' tale of Kleobis and Biton³. These were two Argive youths of exceptional strength. When Hera's festival came on, their mother had to be drawn in a car to the temple. But the oxen did not arrive in time from the field. So the young men harnessed themselves to the car and drew their mother five and forty furlongs to the temple. The Argives stood round about and congratulated them of their strength, the women complimenting the mother on her sons. She, over-joyed, stood before the statue of the goddess and prayed her to grant the lads, who had shown her such honour, that which was best for man to obtain. After this prayer, when they had sacrificed and feasted, the young men were put to sleep in the temple itself and never woke again. The Argives had statues of them made and dedicated at Delphoi on account of their valour⁴.

Herodotos' account is supplemented in some points by that of others, for the story was a favourite one with ancient writers. Thus we learn that the mother's name was Kydippe⁵ or Theano⁶; that she was priestess of the Argive Hera⁷; that it was not lawful

Pindar is guilty of an anachronism. for her to go to the temple except on an ox-car¹ drawn by white oxen²; that, if she had not performed the rite to time, she would have been put to death³. Kleobis and Biton, otherwise called Kleops and Bitias⁴, when no oxen could be had because a plague had killed them all⁵, are said to have stripped off their clothes, anointed themselves with oil, and stooped their necks to the yoke⁶. After sacrificing at the temple they drank⁷ and feasted with their mother⁸ before going to sleep. In another version they bring the car and their mother safely home, and then worn out with fatigue succumb to their fatal sleep, while Kydippe, having learnt wisdom from their example, puts herself to death⁹.

A second tale of Biton's prowess was told in verse by Lykeas, an antiquary of Argos¹⁰. It was to the effect that once, when the Argives were driving certain beasts to Nemea in order to sacrifice to Zeus, Biton full of vigour and strength caught up a bull and carried it himself. A statue of him bearing the bull was set up at

Fig. 315.

Fig. 316.

Argos in the sanctuary of Apollon *Lykios*¹¹. Biton's exploit has commonly been regarded as a mere athletic feat; but, as we shall see later¹², it is highly probable that a definite ritual practice lay behind it.

Returning to the joint performance of the two brothers, we note that at Argos opposite the sanctuary of Zeus *Nemeios* there was a stone relief of Kleobis and Biton in the act of drawing their mother to the Heraion¹³. An imperial Argive coin, now in the Berlin collection (fig. 315)¹⁴, shows the scene and may perhaps be

considered a copy of this relief¹. An ancient glass-paste, however, also at Berlin (fig. 316)², differs from it in several points. The eighteenth column of the temple erected at Kyzikos to Apollonis, wife of Attalos I and mother of four sons distinguished for their filial affection³, was adorned with reliefs of Kleobis and Biton⁴; but how the subject was treated we do not know. The only representation of importance that has survived to modern times is carved on a sarcophagus in the library of S. Marco at Venice (fig. 317)⁵. The scene, enclosed by a grove of oak-trees, falls into four divisions. On the left Kydippe, erect in her car, is apparently drawn by two diminutive oxen, while Kleobis and Biton grasp the pole. The moment depicted is that of their arrival at the Heraion, as is clear from the rising rocky ground and the position of the

Fig. 317.

human and animal figures. In the centre stands the temple with four Corinthian columns spirally fluted: the pediment is decorated with a basket of fruit and a couple of snakes. Before the temple Kydippe raises two torches in an attitude of prayer. In front of her, face downwards on the ground, lie the two boys asleep, if not already dead. The third division represents a goddess, probably Selene, whose two-horse chariot is escorted, not as usual by Hesperos or the Dioskouroi, but by Kleobis and Biton. This implies that the Argive Hera was conceived by the artist of the sarcophagus as a moon-goddess, who took with her through the midnight sky the

souls of the two lads. On the right we see them reunited to their mother in heaven¹.

vi. Trophonios and Agamedes.

Another celebrated example of euthanasia, coupled with this by the author of the Platonic *Axiochos*², by Plutarch³, and by Cicero⁴, was that of Trophonios and Agamedes. The Platonist tells us that, after building the precinct of the god at Pytho, they went to sleep and never rose again. Plutarch, or rather Pindar⁵ from whom Plutarch got his information, states that Agamedes and Trophonios, having built the temple at Delphoi, asked Apollon for their reward. He promised to give it to them on the seventh, or, as Cicero has it, on the third day from that time. Meanwhile he bade them feast. They did his bidding, and on the fateful night went to sleep, but woke no more. Philosophers and moralists of course made capital of such stories. But to the dry critic there is something decidedly sinister about the plot. The heroes are first feasted, not to say fattened, in a temple, afterwards put to sleep there, and then—found dead next morning. The Homeric *Hymn to Apollon*, our earliest⁶ source for the tradition, asserts that Phoibos Apollon himself laid the foundations of his Pythian fane both broad and long; that on these Trophonios and Agamedes, the sons of Erginos, loved by the deathless gods, placed a threshold of stone; and that the building was finished by throngs of men with wrought stones to be a minstrels' theme for ever⁷. Taken in connexion with the Platonic and Pindaric story, this narrative has to my ear very much the sound of a foundation-sacrifice, such as are still in a modified form practised by Greek builders⁸. True,

¹ This relief was correctly interpreted by Montfaucon *Antiquity Explained* trans. D. Humphreys London 1721 i. 36 pl. 13 nos. 22—24 (after Beger *Spicilegium ant.* p. 146, 149), though I do not know whether he had any ground for saying: 'Other Authors relate the Story, that the two Brothers finding the Oxen did not draw the Chariot fast enough, placed themselves in the Yoke, and drew their Mother.'

⁶ Unless priority can be claimed for the *Telegonia* of Eugammon (*Epic. Gr. frag.* i. 57 Kinkel), which does not, however, appear to have dealt with the Delphic myth (O. Kern in Pauly—Wissowa *Real-Enc.* i. 720).

⁷ *H. Ap.* 294—299. See further Steph. Byz. *s.v.* Δελφοί, Paus. 9, 37. 5, 10. 5. 13.

⁸ B. Schmidt *Das Volksleben der Neugriechen* Leipzig 1871 i. 195 ff., G. Georgeakis and L. Pineau *Le Folk-Lore de Lesbos* (Littératures populaires de toutes les nations. xxxi) Paris 1894 p. 346 f., Frazer *Golden Bough*³: Taboo p. 89, L. M. J. Garnett—J. S. Stuart-Glennie *Greek Folk Poesy* London 1896 i. 70 ff., 390 f., J. C. Lawson *Modern Greek Folklore and Ancient Greek Religion* Cambridge 1910 p. 264 ff., *supra* p. 66 f.

Agamedes and Trophonios are described by the Homeric poet as 'loved by the deathless gods.' But we do not forget Menander's significant line:

Whom the gods love, dies young¹.

The same euphemistic meaning probably attaches to the peaceful end of Kleobis and Biton. But we need not pursue the subject further, as we are at present concerned to show that Hera was essentially connected with cows. Her Homeric epithet 'cow-eyed²,' her legendary transformation into a snow-white cow³, her image with cow's horns at Samos⁴, her probable cult-title 'She who is rich in oxen⁵,' her sacred herd at Nemea⁶, her numerous votive cattle⁷, the white cow⁸ or the choice heifer offered to her in sacrifice⁹, the Argive festival of the hundred oxen¹⁰, the white steers that drew her priestess to the Heraion¹¹, amount to a conclusive proof that Hera had much to do with cattle, and furnish some support for my conjecture¹² that in Io, the priestess changed by the goddess into a cow, we should recognise an attendant of the animal deity called by her animal name¹³.

vii. The Proitides.

Confirmation of this view may be sought in the myth of the Proitides or daughters of Proitos, king of Tiryns and the surrounding district. A. Rapp in a careful discussion of their myth has shown that the troubles which befell them were, in different versions, ascribed to Dionysos, to Aphrodite, and to Hera¹⁴. Confining our attention to the Argive goddess, we find that Akousilaos, the logographer of Argos in Boiotia, who lived in the second half of the sixth century B.C. and provided a mythological quarry for Pindar¹⁵, associated the Proitides with Hera. They went mad, he

¹ Menand. *dis exapaton frag.* 4 (*Frag. con. Gr.* iv. 105 Meineke).

¹⁰ *Supra* p. 446 ff.

¹¹ *Supra* p. 447 f.

¹² *Supra* p. 441 ff.

¹³ Is this the ultimate significance of Kleobis and Biton acting as oxen to draw the car of the priestess? The schol. Bernens. in Verg. *georg.* 3. 532, who drew from the stores of the fifth-century writers Titus Gallus, Gaudentius, and Junius Philargyrius (M. Schanz *Geschichte der römischen Litteratur*² München 1899 ii. 1. 91), says: Sacerdotes Junonis id est Cleobis et Biton currus sollempnibus sacris deducere solebant, verum deficientibus bobus etiam collo sacra portasse dicuntur. Junonis sacris animalia defecerunt, id est, aut Romanorum expleta sunt funera quos illa persecuta est, aut restituta sunt sacra, quae infesta Junone defecerant. It would perhaps be rash to infer from this muddle-headed notice that Kleobis and Biton were themselves priests or priestly attendants.

¹⁴ A. Rapp in Roscher *Lex. Myth.* iii. 3001 ff.

¹⁵ A. and M. Croiset *Histoire de la littérature grecque* Paris 1890 ii. 539 f.

said, 'because they made light of Hera's wooden statue!'. Pherekydes of Leros, another logographer, who *c.* 450 B.C. wrote a work on mythology resembling that of Akousilaos but ampler in scope², agreed in this matter with his predecessor³:

'Melampous, the son of Amythaon, effected many miracles by means of his seer-craft, but his most famous exploit was this. Lysippe and Iphianassa, the daughters of Proitos, king of Argos, had owing to youthful imprudence⁴ sinned against Hera. They had gone into the temple of the goddess and derided it, saying that their father's house was a wealthier place. For this they were driven mad⁵. But Melampous came and promised to cure them completely, if he received a reward worthy of his cure. For the disease had now lasted ten years and brought pain not only upon the maidens themselves, but also upon their parents. Proitos offered Melampous a share of his kingdom and whichever of the daughters he desired to wed. So Melampous, by means of supplications and sacrifices, appeased the wrath of Hera and healed their disease. He received in marriage Iphianassa, obtaining her as the reward⁶ of his cure.'

We hear no more of the Proitides and Hera till Roman times. Then, fortunately for our understanding of the myth, Virgil had occasion to compare Pasiphae with the Proitides:

Ah, luckless maid, what madness seized thee? Once
 Did Proitos' daughters fill with lowings false
 The fields; yet none pursued so base a love
 For cattle, though she had feared for her neck the plough
 And oft-times sought on her smooth brow the horns⁷.

The Latin commentators explain that the daughters of Proitos had boasted themselves to be more beautiful than Hera⁸, or had entered her temple in a solemn service and preferred themselves to her⁹, or, being her priestesses, had stolen gold from her raiment and used it for their own purposes¹⁰. In consequence of this

offence Hera¹ sent upon them the delusion that they were cows: they dashed off into the woods and even bellowed aloud², till Melampous cured them and married one of them, receiving along with her part of king Proitos' domains³.

Here, then, is a further trace of the attendants or priestesses of the Argive Hera being called 'cows.' In 1894 I ventured on the general statement that within the bounds of Hellenic mythology animal-metamorphosis commonly points to a preceding animal-cult⁴. I am now disposed to add the surmise that in some cases at least, those of Io and the Proitides among them, animal-metamorphosis implies an animal-priesthood, in which the priest or priestess is supposed to be the animal specially connected with his or her divinity⁵.

viii. Hera and Io.

It is usually assumed without any attempt at proof that Io was a hypostasis or by-form of Hera⁶. This somewhat vague and shadowy conception may pass muster, if by it we mean that the priestess of Hera was originally regarded as Hera incarnate. Io *Kallithyessa*, to give her the full title recorded by Hesychios⁷, of which sundry variants are extant elsewhere⁸, is consistently

¹ Lact. Plac. in Stat. Theb. 2. 220 says: furore immisso a Venere.

⁴ Journ. Hell. Stud. 1894 xiv. 160.

⁵ P. Friedländer *Argolica* Berlin 1905 p. 36 has already conjectured that Tirynthian girls were the βῆες of Hera just as Athenian girls were the ἀρκτοί of Artemis.

⁶ So Miss J. E. Harrison in the *Class. Rev.* 1893 vii. 76, Farnell *Cults of Gk. States* i. 182, 200, K. Wernicke in Pauly—Wissowa *Real-Enc.* ii. 797, E. E. Sikes on Aisch. *P.v.* 561, Gruppe *Gr. Myth. Rel.* pp. 183, 460, 466, 469, 505 n. 2, 1127, 1325 n. 4.

⁷ Hesych. s.v. Ἰὼ καλλιθύεσσα· καλλιθύεσσα ἐκαλείτο ἢ πρώτη ἱέρεια τῆς Ἀθηναίας. J. Scaliger's correction of the last word to Ἥρας (ἐν Ἀργεῖ Ἥρας Knaack) has won universal acceptance, cp. Aisch. *suppl.* 291 f., Apollod. 2. 1. 3, anon. *de incredib.* 15 p. 324 Westermann.

⁸ Καλλιθῆ (Phoronis frag. 4 Kinkel ap. Clem. Al. *strom.* 1. 164. 2 p. 102, 23 ff. Stählin Καλλιθῆ κλειδοῦχος Ὀλυμπιάδος βασιλείης, | Ἥρας Ἀργείης, ἢ στέμμασι καὶ θυσάνοισι | πρώτη ἐκόσμησε <ν> περὶ κλονα μακρὸν ἀνάσσης, cp. Hyg. *fab.* 145 *Callirhoe* for which Knaack cj. *Callithoe*, Καλλιθῆα (Plout. *ap.* Eus. *praef. ev.* 3. 8. 1 λέγεται δὲ Πέλαρα ὁ πρῶτος Ἀργολίδος Ἥρας ἱερὸν εἰσάμενος τὴν ἑαυτοῦ θυγατέρα Καλλιθῆαν ἱέρειαν καταστήσας, ἐκ τῶν περὶ Τίρυνθα δένδρων ὄγκηνην τεμὼν εὐκτέανον (so the MSS.: εὐκτέανον cj. Kaibel) Ἥρας ἀγαλμα μορφώσαι κ.τ.λ., with which cp. Paus. 2. 17. 5 παρὰ δὲ αὐτῆν ἔστιν ἐπὶ κλονος ἀγαλμα Ἥρας ἀρχαῖον. τὸ δὲ ἀρχαῖότατον πεποιεῖται μὲν ἐξ ἀχράδος, ἀνετέθη δὲ ἐς Τίρυνθα ὑπὸ Πειράσον τοῦ Ἀργου, Τίρυνθα δὲ ἀνελόντες Ἀργεῖοι κομίζουσιν ἐς τὸ Πραῖον·

described in all our sources as the priestess of Hera, never as a goddess in her own right. Still, that she was in some sense divine, appears from several considerations. Her second name *Kallithjessa* has the ring of a genuine cult-title. The learned Lykophron calls her *βοῶπις*, as though she were Hera¹. And she was in Alexandrine times commonly identified with Isis², the Egyptian cow-goddess³. She was thus at once a priestess and a goddess, human yet divine, a state of affairs best explained on the assumption that the deity was embodied in the ministrant.

The equation of Io with Isis, originally suggested by the cow-form common to them both⁴, and doubtless helped by the jingle of their names, seems to have led to a further identification of Io with the moon. For Isis, as queen of heaven and wife of the Hellenistic divinity Zeus the Sun, Sarapis⁵, was by the later Greeks regarded as the Egyptian counterpart of Hera⁶, Zeus and Isis being sun-god and moon-goddess respectively⁷. Hence Io, once identified with Isis, must be the moon as well. Indeed, Greek and Byzantine writers from the second century of our era onwards assert that *Ιῶ* in the Argive dialect denoted the 'moon'⁸—an assertion of very doubtful validity.

δ δὴ καὶ αὐτὸς εἶδον, καθήμενον ἄγαλμα οὐ μέγα and Plout. *quaest. Gr.* 51 Βαλλαχράδας ἑαυτοῖς Ἀργείων παῖδες ἐν ἑορτῇ τιμὴν παίζοντες ἀποκαλοῦσιν κ.τ.λ. The same form of the name appears also in Synkell. *chron.* 149 D (i. 283 Dindorf), Hieron. *chron. ann. Abr.* 376), Καλλιθῦια (Aristeid. *περὶ ῥητορικῆς* 6 Canter (ii. 3 Dindorf) with schol. Aristeid. p. 361 Dindorf), Καλλιθέα (schol. Arat. *phaen.* 161).

A. Frickenhaus in *Tiryms* i. 19 ff. follows Wilamowitz in restoring Καλλιθύη as the original name. Combining the fragment of Plutarch with that of the *Phoronis*, he argues that Kallithya was priestess of Hera at Tiryns (where he has identified her primitive temple and even the precise site of her 'long column' and 'seated image' on the floor-level of the ancient *mégaron*), but that Io was priestess of Hera *Προσυμαία* at Argos. This distinction is more ingenious than convincing. It assumes that, when Καλλιθῦια (Synkell. *loc. cit.*) or Καλλιθέα (schol. Arat. *loc. cit.*) is described as priestess ἐν Ἀργεῖ, the reference is to Tiryns, and that the epic fragment Ἴὼ καλλιθύεσσα (adj.) rests on a mere confusion.

In modern times various arguments have been adduced to connect both Io and Hera with the moon. L. Ross pointed to a Coptic word *ioh* meaning 'moon,' and thought that Io was a moon-goddess corresponding with Ioh a moon-god¹. W. H. Roscher believes that Hera was essentially a lunar divinity, and rests his belief on three main grounds—the similarity subsisting between Hera and Iuno, whom he views as a moon-goddess; the fact that Hera was a patron of women, marriage, child-birth, etc.; and analogies that can be made out between Hera and other lunar deities such as Artemis, Hekate, Selene². O. Gruppe³ holds that in the seventh century B.C. oriental influence transformed the Argive cow-goddess, whom he calls Hera-Io, into a moon-goddess. The result, he supposes, was twofold. On the one hand, the wanderings of Io were perhaps compared with the apparently erratic course of the lunar goddess⁴, the horns of the cow being identified with the horns of the moon⁵. On the other hand, the moon-goddess came to be described as *βοόπις*⁶, like the Argive Hera, and was sometimes represented as actually bovine⁷, or horned⁸,

statement is made by Io. Antioch. *frag.* 6. 14 (*Frag. hist. Gr.* iv. 544 Müller), Eustath. in Dionys. *per.* 92, *Chron. Paschale* i. 74 Dindorf, Kedren. *hist. comp.* (i. 37 Bekker), Soud. s.v. 'Ιώ, Exc. Salmasii in Cramer *anecd. Paris.* ii. 387, 22 ff., *supra* p. 237 n. 1.

Pal. Append.* 6. 193) as *ταυρώπις*, = Porphyg. *περι τῆς ἐκ λογίων φιλοσοφίας ἀρ.* Euseb. *praep. ev.* 4. 23. 7, *h. mag. in Sel.* 16 Abel *ταυρώπι...ταυροκάραιε*, 17 *ἄμμα δέ τοι ταυρωπὶν ἔχεις*, 32 *ταυρώπις, κερέσσσα*, Synes. *hymn.* 5. 22 *ἄ ταυρώπις μήνη*, Maximus *περὶ καταρχῶν 50 κεραῆς ταυρώπιδος* and 509 *ταυρώπις ἄνασσα* of the moon. Hera is *ταυρώπις* in Nonn. *Dion.* 47. 711 (so Hecker for *γλαυκώπιδος*), *Anth. Pal.* 9. 189. 1; Io in Nonn. *Dion.* 32. 69.

⁷ Porphyg. *de antr. nymph.* 18 *ταῦρος μὲν σελήνη καὶ ψῶμα σελήνης ὁ ταῦρος*, Lact. *Plac. in Stat. Theb.* 1. 720 *Luna vero, quia propius taurum coerct adducitque, ideo vacca [luna] figurata est*, Nonn. *Dion.* 23. 309 *ταυροφῆς κερέσσσα βοῶν ἐλάτεια Σελήνη*. In Loukian. *philops.* 14 the moon brought down by magic appears first in the form of a woman, then in that of a fine cow (*βοῦς ἐγένετο πάγκαλος*), and lastly in that of a puppy.

⁸ Paus. 6. 24. 6 saw in the market-place of Elis stone statues of Helios and Selene, the former with rays on his head, the latter with horns. Selene in the poets is *ἀμφίκερως*, *δίκερως*, *ἐνκέραος*, *ἡύκερως*, *κεραή*, *κερασφόρος*, *κερατώπις*, *κεραώψ*, *κερέσσσα*, *ταυρόκερως*, *ὑψίκερως*, *χρυσόκερως*, as Luna is *dicornis*: see Bruchmann *Epith. deor.* p. 204 ff., Carter *Epith. deor.* p. 62.

or riding on a steer¹, or at least drawn in a chariot by white steers or cows².

Whether Io or Hera had anything to do with the moon before this oriental influence began to operate, is a difficult question. E. Siecke has attempted to bring the story of Io into line with sundry other moon-myths, which he refers to a common Indo-European stock³. But, if we abandon the argument from analogy, and confine ourselves to definite literary tradition relating to Argos and the Argive cult, we cannot satisfactorily prove either that Io or that Hera was originally connected with the moon. At most we can put together the following indications. The Argives in historical times associated the cult of Hera with that of Zeus *Némeios*⁴. Nemea, however, was not, as we should have expected, the daughter of Zeus and Hera, but the daughter of Selene and Zeus⁵. Again, whereas Hesiod spoke of the famous Nemean lion—

Whom Hera reared, the noble wife of Zeus,
And placed on Nemea's knees, a bane to men⁶,—

Hyginus says 'the Nemean lion, whom the Moon had reared'⁷. Epimenides, in a passage quoted by Aelian, wrote :

For I too am a child of the fair-tressed Moon,
Who with dread shudder cast the monstrous lion
At Nemea, bearing him for lady Hera⁸.

¹ Ach. Tat. i. 4 εἶδον ἐγὼ ποτ' ἐπὶ ταύρω γεγραμμένην Σελήνην, Lact. Plac. in Stat. Theb. i. 720 mire autem cornua posuit, ut Lunam manifestius posset exprimere, non animal (sc. taurum), quo illa vehi figuratur. Cp. W. H. Roscher in Roscher *Lex. Myth.* ii. 3137 with figs. 9 and 11.

⁵ Schol. Pind. *Nem.* p. 425 Boeckh. Zeus and Nemea appear together on the Archemoros-vase (Inghirami *Vas. fitt.* iv pl. 371). See further Roscher *Lex. Myth.* ii. 115 f.

⁶ Hes. *theog.* 328 f. γουρούσιω κατένασσε Νεμείης, πῆμ' ἀνθρώποις. The line was perhaps applied to Alkibiades, whom Aristophanes (*ran.* 1431 ff.) calls a lion, after his Nemean victory (Paus. 1. 22. 6 f.); for Aglaophon (Plout. v. *Alcib.* 16 says Aristophon) painted a picture in which Νεμέα ἦν καθημένη καὶ ἐπὶ τῶν γονάτων αὐτῆς Ἀλκιβιάδης (Athen. 534 D).

⁷ Hyg. *fab.* 30 leonem Nemeum, quem Luna nutrierat.

⁸ Epimen. *frag.* 5 Kern *ap.* Ail. *de nat. au.* 12. 7.

Anaxagoras told the same tale¹, and others followed suit², so that the lion came to be called the offspring of the Moon³. These references certainly lead us to suppose that from the time of Epimenides, that is to say from about 625 B.C.⁴, the Argive Hera was closely connected, if not identified, with the Moon. More than that it would be unsafe to maintain.

ix. Zeus and Argos.

It may next be shown that, what Io was to Hera, Argos was to Zeus.

The ancient systematisers of mythology recognized a variety of Dionysoi. One of these is described by Diodoros as having been the son of Zeus by Io, as having reigned over Egypt, and as having discovered the mysteries⁵. Now in the Dionysiac mysteries, as celebrated in Asia Minor, Crete, Thebes, etc., certain priests were termed *boukóloi* or 'cow-herds,' presumably because they tended their god conceived as in bovine form or ministered to the worshippers who adopted his animal name⁶. The important inscription, which has preserved for us the regulations of the *ióbakchoi*, an Athenian sect worshipping the Dionysiac divinity *Ióbakchos*⁷,

¹ Anaxag. *ap. schol. Ap. Rhod.* i. 498.

³ Euphorion *frag.* 47 Meineke *ap. Plout. symp.* 5. 3. 3 Μήνης παῖδα χάριον, interp. Serv. in Verg. *Aen.* 8. 295 Luna filius et invulnerabilis dictus est, cp. Sen. *Herc. fur.* 83 sublimis alias Luna concipiat feras, Lact. Plac. in Stat. *Theb.* 2. 58 leonem de his polis ortum etc. According to Demodokos *ap. Plout. de fluxu.* 18. 4 Mt Apaisanton (in Argolis) used to be called Mt Selenaiion. For Hera, wishing to punish Herakles, got Selene to help her. Selene, using magic spells, filled a basket with foam, out of which a huge lion was born. Iris bound him with her own girdles and brought him down to Mt Ophelion. He tore and slew a shepherd of the district named Apaisantos. Hence Providence ordained that the place should be called Apaisantos after his victim.

⁴ H. Demoulin *Épiménide de Crète Bruxelles* 1901 p. 136.

⁵ Diod. 3. 74. In Cic. *de nat. deor.* 3. 58 (Dionysum) quartum Iove et Luna, cui sacra Orphica putantur confici we should perhaps read *Semela* for *Luna* and, with Moser *ad loc.*, suppose a confusion between Semele and Selene: cp. Lyd. *de mens.* 4. 51 p. 107, 10 f. Wunsch (*Διώνυσος*) τέταρτος ὁ Διὸς καὶ Σεμέλης κ.τ.λ., Ampel. 9. 11 (Liber) quartus ex Saturnio et Semela. In Euseb. *praep. ev.* 3. 13. 18 τίς γὰρ ἡ τοῦτον (sc. Διώνυσον) γεννήσασα, εἶτε Σελήνη τις λέγοιτο εἶτε Περσεφόνη; G. Dindorf prints Σεμέλη, the emendation of Cuperus *Nuimism.* p. 255, but Lobeck *Aglaophantus* ii. 1133 defends Σελήνη, comparing Ulpian. in *Mid.* p. 174 ἐνιοι δὲ παῖδα Σελήνης τὸν Διώνυσον. Plout. *de Is. et Osir.* 37 cites a letter of Alexarchos ἐν ᾗ Διὸς ἱστορεῖται καὶ Ἰσιδος υἱὸς ὦν ὁ Διώνυσος κ.τ.λ.

⁶ *Supra* p. 441 f.

⁷ Hesych. *s.v.* Ἰόβακχος· ὁ Διώνυσος, ἀπὸ τῆς βακχέας, Maximus *περὶ καταρχῶν* 496 σφαλλόμενοι δῦροισι χορομανέος Ἰοβάκχου. That the *ióbakchoi* acted the part of Ἰόβακχος, appears probable from *Anth. Plan.* 4. 289. 1 ff. αὐτὸν ὄραν Ἰόβακχον ἐδόξαμεν, ἦνικα κ.τ.λ....φεῦ θελεις ἀνδρὸς ὑποκριτῆς.

mentions a priestly personage called the *boukolikós*¹. His name is placed next to that of Dionysos, whose connexion with the bull is indicated by the bull's head carved above the Dionysiac symbols at the top of the inscribed column². The derivation of the name *Ióbakchos* is unknown³. But Diodoros' statement that Io was the mother of Dionysos makes it probable that some ancient mythologists, no doubt wrongly, deduced it from Io and Bakchos. However that may be, we are, I think, justified in inferring, from the analogy of the Dionysiac *boukólos* tending the Dionysiac bull, that Argos, who as *boukólos* tended the 'cow' Io, was but the mythical prototype of a priest tending an actual or nominal cow.

But, if Argos was human, he was also divine. We have already seen that his name *Argos* 'the Glittering' is comparable with that of *Zeús* 'the Bright One' and marks him as 'a sort of Zeus'⁴. A mortal Zeus, however; for his grave was shown at Argos⁵, where he had a precinct and a sacred wood impiously burnt by Kleomenes⁶. He resembled Zeus in nature as well as in name. Zeus, says Aischylos, became a bull to consort with Io⁷. Argos too was not only regarded as a fertilising power⁸, but also connected by his exploits with cattle. Being of exceptional strength, he slew a bull that was laying waste Arkadia and himself put on its hide; he withstood and killed a Satyr, who was oppressing the Arcadians and taking away their herds; he managed to destroy Echidna, child of Tartaros and Ge, who seized passers by and carried them off, by waiting till she fell asleep; and, lastly, he avenged the murder of Apis by doing to death those who were guilty of it⁹. If

³ Bentley on *Hor. sat.* 1. 3. 7 *Io Bacche*, cp. *Eur. Bacch.* 576 ff. ΔΙ. *λω*, | *κλύερ'* *έμῆς κλύερ'* *αὐδᾶς*, | *λω Βάκχαι*, *λω Βάκχαι*, derives the name from the initial exclamation. And there is much to be said in favour of this view. But was *λω* merely an exclamation, or rather the broken down form of some old cult-title?

⁴ *Supra* p. 32.

⁵ Paus. 2. 22. 5.

⁶ Hdt. 6. 78 ff., Paus. 2. 20. 7, 3. 4. 1.

⁷ *Supra* p. 438 f.

⁸ Argos introduced agriculture into the Argive land: he sent for wheat from Libye and founded a sanctuary of Demeter *Αἰβωσσα* at a spot called Charadra in Argos (Polemon *frag.* 12 (*Frag. hist. Gr.* iii. 119 Müller) *ap. schol. Aristeid.* p. 321 f. Dindorf). Kekrops, or some one else, sent Argos to Libye and Sicily for the wheat that grew there unrecognised, after which Triptolemos was the first to plough and sow (*Tzet. in Hes. o.d.* 32). Apis removed from Argos to Egypt, sent cattle to the king in Argos, and taught him how to sow: he, having yoked (*τεύξας*) the cows for that purpose, dedicated a sanctuary to Hera (*sc. Ζευξιδία*), and, when the corn shot up and flourished (*ἀνθείν*), called it the flowers (*ἀνθεα*) of Hera (*et. mag.* p. 409, 28 ff.). In the reign of Argos, son of Apis, Greece imported seeds and began to till the fields and raise crops (*Aug. de civ. Dei* 18. 6).

⁹ Apollod. 2. 1. 2.

Argos was not, like Zeus, a bull, at least he wore a bull's hide. And this was no unimportant detail of his myth: Apollonios Rhodios in his account of the Argonauts tells how—

Argos, Arestor's son, from foot to shoulder
Had girt a bull's hide black, with shaggy hair¹.

And Hyginus describes the same hero as 'an Argive clad in a hairy bull's hide².' On the strength of this hide Miss Harrison, following an acute conjecture of H. D. Müller, suggested 'that Argos Panoptes is the real husband of Io, Argos who wore the bull-skin..., who when he joins the Argonautic expedition still trails it behind him..., who is the bull-god³.' But we are never told by any ancient authority that Argos was either a bull or a god⁴. It seems wiser, therefore, to suppose that he wore the bull-skin in order to assimilate himself to the Argive bull-god Zeus⁵. On this showing Argos was to Zeus very much what Io was to Hera.

Again, as Io bore the further title *Kallithýessa*, so Argos was also *Panóptes*. *Kallithýessa*, 'She of the fair sacrifices,' was probably a cult-title of Hera⁶. *Panóptes*, 'He who sees all,' occurs repeatedly in the poets as a title of Zeus⁷, a fact which supports

¹ Ap. Rhod. i. 324 f.

² Hyg. *fab.* 14 p. 48, 4 Schmidt. Cp. Aristoph. *eccl.* 79 f. *νῆ τὸν Δία τὸν σωτήρ' ἐπιτήδεός γ' ἂν ᾖν | τὴν τοῦ Πανόπτου διφθέραν ἐνημμένος*, Dionysios (Skytobrachion) *ap. schol. Eur. Phoen.* 1116 *βύρσαν αὐτὸν ἠμφέσθαι φησί*.

³ Miss J. E. Harrison in the *Class. Rev.* 1893 vii. 76, after H. D. Müller *Mythologie der griechischen Stämme*, Göttingen 1861 ii. 273 ff. Miss Harrison has recently somewhat shifted her view-point and writes to me as follows (June 14, 1912): 'I now absolutely hold your position that Argos was a celebrant—only I go much further in thinking, not that Argos was the god, but that the god Argos arose out of the worshipper.'

⁴ Aug. *de civ. Dei* 18. 6 states that Argos after his death began to be regarded as a god, being honoured with a temple and sacrifices: while he was reigning (as king at Argos), these divine honours were paid to a certain private man named Homogyros, who had first yoked oxen to the plough, and had been struck by lightning.

⁵ Cp. *Journ. Hell. Stud.* 1894 xiv. 120 f. On a *kratér* from Ruvo, belonging to the Jatta collection, Argos is clad in a bull's hide (fig. 318 from *Mon. d. Inst.* ii pl. 59, Lenormant—de Witte *Él. mon. céer.* iii pl. 101, Roscher *Lex. Myth.* ii. 274, Reinach *Rép. Vases* i. 111, 4); but Overbeck *Gr. Kunstmyth.* Zeus p. 593 n. 189 points out that on other vases he wears other hides, the artistic being less conservative than the literary tradition.

The Jatta *kratér* shows a well-marked tendency to duplicate its figures. In the lower register the Satyr on the left is balanced by the Satyr on the right. In the upper register Eros and Aphrodite on the left are mirrored by almost identical forms (Peitho? and Pothos? according to S. Reinach) on the right. Zeus seated on the mountain next to Hera similarly corresponds with Argos seated on the mountain near to Io. The latter couple is the bovine counterpart of the former—witness the bull's hide of Argos, the cow's horns and cow's ear of Io.

⁶ *Supra* p. 453 f.

⁷ Aisch. *Eum.* 1045 *Ζεὺς ὁ πανόπτας* (so Musgrave for MSS. *Ζεὺς παντόπτας*), Orph.

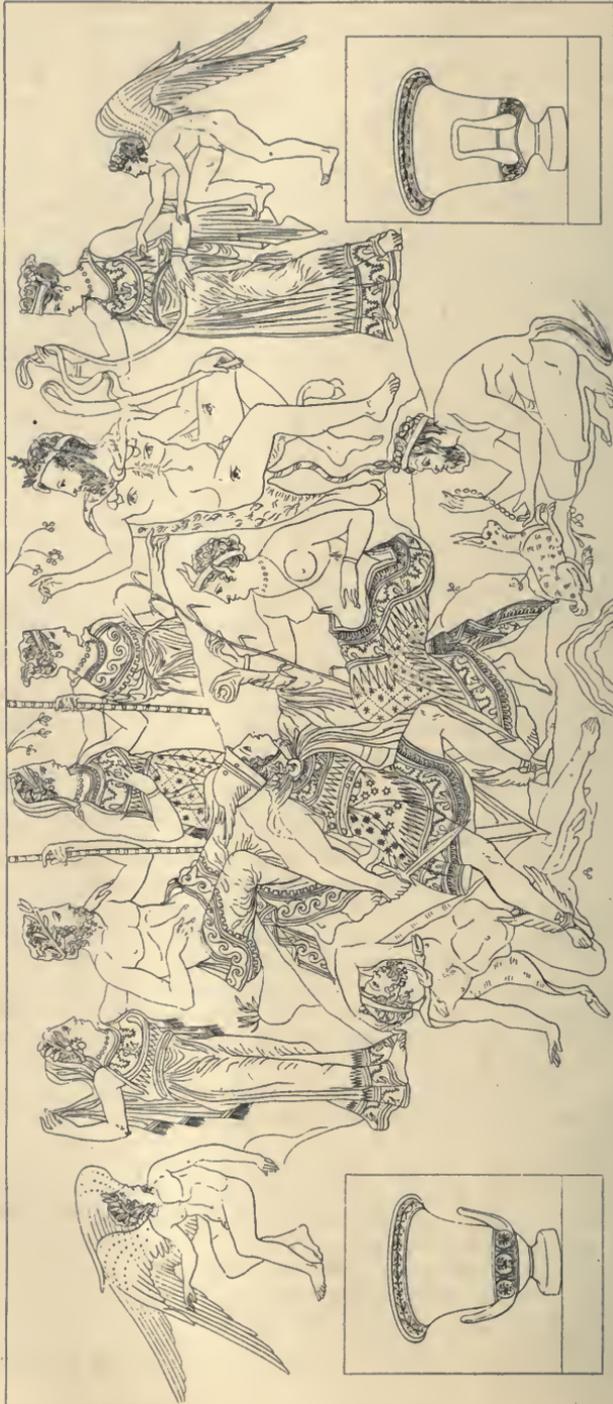

Fig. 318.

my contention that Argos was akin to Zeus. Hesychios, in one of his brief but illuminating glosses, observes: '*Panóptes*, "many-eyed," Zeus, the Achaeans.' This I take to mean that the Achaeans (and the ruling house at Argos in heroic days was Achaean) recognised a Zeus *Panóptes*, whom they identified with the many-eyed Argos. A remarkable confirmation of Hesychios' words has recently come to light. Built into a Byzantine wall below the terrace of Apollon *Pýthios* at Argos, W. Vollgraff has found a small altar of greyish limestone inscribed in lettering of the third century— $\Delta \text{Ι} \text{Φ} \text{Ο} \Sigma \Gamma \text{Α} \text{Ν} \text{Ο} \Pi \text{Τ} \text{Α}$, 'Of Zeus the All-seeing²'

The title *Panóptes* is also used of the sun. Aischylos makes his Prometheus, bound fast to the mountain-peak and left alone, exclaim:

On the all-seeing (*panópten*) circle of the sun
I call³.

And Byzantine writers more than once apply the same epithet to the sun⁴. Hence it might appear that both Argos *Panóptes* and Zeus *Panóptes* had or came to have a solar character. An anonymous commentator on the *Phainomena* of Aratos remarks that the poet wrote—

And all the roads are full of Zeus⁵—

'because even the poets call Zeus all-seeing (*panópten*) everywhere: "O Zeus all-seeing (*panópta*)" and "Sun, who observest all things⁶."' Since the commentator in question has just been discoursing on the view of those who identify Zeus with the sun⁷, it is obvious

that he interprets the title of Zeus *Panóptes* in a solar sense. Again, according to Pherekydes, Hera gave Argos an extra eye in the back of his head¹. And the ancient statue of Zeus on the Argive Larisa was likewise three-eyed, having the third eye on its forehead². Argos *Panóptes* and the Argive Zeus were on this account compared by M. Mayer³ with the three-eyed *Kyklops*, whose abnormal eye not improbably denoted the sun⁴. In this connexion, however, it must be borne in mind that Empedokles speaks of Zeus *argés*, 'the brilliant⁵'; that Hesiod names one of the *Kyklopes* *Árges*⁶; and that the same *Kyklops* is sometimes called, not *Árges*, but *Árgos*⁷. These titles, no doubt, ultimately refer to the brilliant sky-god, but as manifested in the burning *aithér* or the blazing thunderbolt rather than in the shining sun.

The author of the Hesiodic poem *Aigimios* associated the story of Argos and Io with Euboia, and derived the name of the island from the cow into which the latter was transformed⁸. He represented Argos as four-eyed in a line borrowed by an Orphic writer to describe Phanes⁹. Strabon too mentions a cavern called The Cow's Crib on the east shore of Euboia, adding that Io was said to have given birth to Epaphos there and that the island drew its name from the fact¹⁰. The *Etymologicum Magnum* states that Euboia was so called 'because, when Isis was turned into a cow, Earth sent up much grass thitherwards...or because Io became a right beautiful cow and lived there¹¹'. If Zeus changed Io into a white cow¹², it was perhaps because 'in Euboia almost all the cattle are born white, so much so indeed that the poets used to call Euboia *argíboios*¹³, "the land of white cattle." *Árgoura* in Euboia, where Hermes was believed to have killed *Panóptes*¹⁴, was doubtless connected by the populace with *Árgos* the 'watcher' (*oílros*). These witnesses suffice to prove that Euboia had an Io-myth analogous to that of the Argolid¹⁵.

σοφοί λέγουσι γεννητὴν θεῶν | <καί> πατέρα πάντων). καὶ ἔννοιαν τῆς δόξης ταύτης φαῖν ἔχειν τὸν ποιητὴν, ὅταν λέγῃ· Ἠχὴ δ' ἀμφοτέρων ἕκετ' αἰθέρα, καὶ Διὸς αὐγὰς· καὶ τὸ, Ἡελίος θ', ὃς πάντ' ἐφορᾷς, καὶ πάντ' ἐπακούεις.

Coins of Euboia from the earliest times exhibit a variety of bovine types¹, the interpretation of which is doubtful². None of them can be proved to have any connexion with the cult of Zeus or Argos, Hera or Io. Still, the ox-head bound with a fillet, which appears at Eretria (?) (fig. 319)³, Hestiaia⁴, and Karystos⁵, is best explained as a religious type; and it is not unreasonable to conjecture that the allusion is to the cult of Hera⁶, who perhaps, as at Argos⁷, bore the title *Eúboia*⁸. The head of Hera, likewise bound with a fillet and often mounted on the capital of an Ionic column, is found on coppers of Chalkis from c. 369 B.C. onwards⁹, and an inscribed figure of the goddess sitting on a conical stone with *phidie* and filleted sceptre occurs on a copper of the same town struck by Septimius Severus¹⁰. At Hestiaia 'rich in grape-clusters'¹¹

Fig. 319.

Fig. 320.

the bull stands before a vine (fig. 320)¹², and we legitimately suspect a Dionysiac meaning.

From Euboia it is but a step to Thespiæ, where a boundary-

Fig. 321.

ΘΕΟΥ | ΤΑΥΡΟΥ, 'Of the god Bull?' It has been conjectured that this god was the bovine Dionysos³, but definite proof is lacking.

x. The Myth of Pasiphae.

Turning next to Crete, we may find the counterpart of Io and Epaphos in Pasiphae and the Minotaur.

Two principal versions of their story are extant. Apollodoros⁴, after telling how Zeus for love of Europe became a bull and carried her off across the sea to Crete, how there she bore him three sons, Minos, Sarpedon, and Rhadamanthys, how Asterion, ruler of Crete,

reared the lads, how they, when they were full-grown, quarrelled and scattered, Sarpedon to Lykia, Rhadamanthys to Boiotia, while Minos, staying in Crete, married Pasiphae, daughter of Helios by Perseis, continues his narrative as follows :

'Now Asterion died childless, and Minos desired to become king of Crete, but was prevented. However, he asserted that he had received the kingdom from the gods, and by way of proof declared that whatever he prayed for would be vouchsafed to him. So he sacrificed to Poseidon and prayed that a bull might be sent up from the deep, promising that he would offer it in sacrifice when it appeared. Thereupon Poseidon heard him and sent up a magnificent bull ; and Minos received the kingdom. But the bull he dispatched to join his herds and sacrificed another. He was the first to establish maritime sway and became lord of well nigh all the islands. But Poseidon, wroth with him because he had not slain the bull, maddened it and caused Pasiphae to hanker after it. She, being enamoured of the bull, asked help of Daidalos, a master-craftsman who had fled from Athens by reason of a manslaughter. He made a wooden cow on wheels, hollowed it out inside, flayed a cow, sewed the hide round about his handiwork, placed it in the meadow where the bull was wont to pasture, and put Pasiphae within it (fig. 322)⁵. The bull came and consorted

⁵ A wall-painting in a room of the *Casa dei Vettii* at Pompeii (Herrmann *Denkm. d. Malerei* pl. 38 Text p. 47 f. fig. 11), forming part of the same mural decoration with

with it as though it were a real cow. Pasiphae then bore Asterios, who is called *Minótauros* (fig. 323)¹. His face was the face of a bull (*táuros*), but

Fig. 322.

the painting of Ixion already figured (*supra* p. 203). The scene is laid in Daidalos' workshop, where an assistant is busy at the carpenter's bench. Daidalos lifts the lid from his wooden cow and explains its mechanism to Pasiphae, who holds two golden rings—perhaps the price of his handiwork. Behind Pasiphae stand an old nurse and a younger maid. The painting is further discussed by A. Mau in the *Röm. Mitth.* 1896 xi. 49 ff., A. Sogliano in the *Mon. d. Linc.* 1898 viii. 293 ff., and P. Herrmann *loc. cit.*

¹ A late red-figured *kýlix* at Paris (De Ridder *Cat. Vases de la Bibl. Nat.* ii. 623 f. no. 1066) published by F. Lenormant in the *Gaz. Arch.* 1879 v. 33—37 pls. 3—5 as having (a) an inner design of Persephone with Zagreus on her knee, (b) two outer designs of omophagy—a Maenad holding a severed human leg between two Satyrs, and a Maenad with a severed human arm similarly placed. Lenormant's interpretation of (a), though accepted at least in part by De Ridder *loc. cit.*, must rest upon the assumed connexion

the remaining parts were those of a man. Minos in accordance with certain oracles shut him up in the Labyrinth and guarded him there. The Labyrinth

Fig. 323.

between (a) and (b). But Sir Cecil Smith in the *Journ. Hell. Stud.* 1890 xi. 349 justly objects that 'in late r. f. kylikes such a relation of subject between the exterior and interior is rare; the usual practice being to have in the interior a definite subject, and to leave the exterior for meaningless athlete subjects or Bacchic subjects, as here; if these exterior scenes have any mythical significance, it is to the Pentheus rather than to the Zagreus legend. In any case the epithets *ταυρόκερως*, &c., applied to Dionysos are not sufficient to warrant us in identifying a definite Minotaur type with Zagreus; especially as on the one other distinct Zagreus scene (Müller—Wieseler, *Denkm.* ii. No. 413; see Heydemann, *Dionysos-Geburt*, p. 55) [cp. *Brit. Mus. Cat. Vases* iii. 188 no. E 246 the *hydria* under discussion] he is represented as an ordinary human child.' In common, therefore, with Sir Cecil Smith and others (T. Panofka in the *Arch. Zeit.* 1837 Anz. p. 22*, E. Braun in the *Bull. d. Inst.* 1847 p. 121, J. de Witte in the *Arch. Zeit.* 1850 Anz. p. 213*, H. B. Walters *History of Ancient Pottery* London 1905 ii. 148) I take the scene here figured to be Pasiphae with the infant Minotaur. The basket and goose merely indicate the *gynaikonitis*.

was the one made by Daidalos, a building which by means of intricate windings led astray those that would escape from it.'

The other version of the myth connects the bull with Zeus, not Poseidon. The first Vatican mythographer tells it thus¹:

'Minos, the son of Zeus and Europe, once drew near to the altars to sacrifice to his father, and prayed the godhead to furnish him with a victim worthy of his own altars. Then on a sudden appeared a bull of dazzling whiteness (*nimio candore perfusus*). Minos, lost in admiration of it, forgot his vow and chose rather to take it as chief of his herd. The story goes that Pasiphae was fired with actual love for it. Zeus, therefore, being scorned by his son, and indignant at such treatment, drove the bull mad. It proceeded to lay waste, not only the fields, but even the walls of the Cretans. Herakles, sent by Eurystheus, proved to be more than a match for it and brought it vanquished to Argos. There it was dedicated by Eurystheus to Hera. But Hera, loathing the gift because it redounded to the glory of Herakles, drove the bull into Attike, where it was called the bull of Marathon and subsequently slain by Theseus, son of Aigeus (fig. 324)².

Fig. 324.

Both Apollodoros and the Vatican mythographer are evidently concerned to present the reader with a consecutive and consistent story. The myth, as they relate it, is composite. I do not propose to discuss in detail its several parts, but rather to call attention to the fact that, taken as a whole, it bears a strong resemblance to two types of Greek tales, represented respectively by the golden lamb or ram and by the white cow that we have already considered.

xi. The Bull and the Sun in Crete.

The golden lamb found among the flocks of Atreus and the golden ram found among the flocks of Athamas we regarded as a divine beast, the animal form of Zeus, which by a secondary development came to symbolise the sun³. The lamb of Atreus was for Simonides purple, the ram of Athamas purple or white⁴.

¹ Myth. Vat. 1. 47. The same version is found in Myth. Vat. 2. 120, Lact. Plac. in Stat. Theb. 5. 431.

² Brit. Mus. Cat. Coins Attica p. 106, E. Beulé *Les monnaies d'Athènes* Paris 1858 p. 398 f. fig., Imhoof-Blumer and P. Gardner *Num. Comm. Paus.* iii. 145 f. pl. DD, 7 f., Harrison *Myth. Mon. Anc. Ath.* p. 522 fig. 79. The coin has been thought to represent a dedication by the township of Marathon on the *akropolis* at Athens (Paus. 1. 27. 10 with J. G. Frazer *ad loc.*): but this notion is disproved by the extant fragment of the group (O. Benndorf 'Stiertorso der Akropolis' in the *Jahresh. d. oest. arch. Inst.* 1898 i. 191 ff.), which agrees with the scene on a red-figured *kýlix* at Florence (L. A. Milani in the *Museo italiano di antichità classica* iii. 239 pl. 3, Reinach *Rép. Vases* i. 529).

³ *Supra* pp. 405, 409, 419 f.

⁴ *Supra* pp. 406, 419.

I would venture to offer the same explanation of the dazzling white bull that shone conspicuous in the herd of Minos¹. Ovid, thinking perhaps of the marks that characterised the Apis-bull², says of it:

Beneath the shady vales of wooded Ide
Was once a white bull, glory of the herd,
Signed with a line of black between the horns:
That its one fleck; the rest was milk to see³.

As in Egypt⁴, so in Crete, the fertilising bull was in the long run identified with the sun. Apollodoros states that *Tálos* or *Talós*, the man of bronze, about whom we shall have more to say⁵, was by some called *Taúros*⁶. But *Tálos* or *Talós* means 'the sun', and *Taúros* means 'a bull.' It follows that some who wrote on Cretan mythology spoke of the Sun as the 'Bull.' Presumably, therefore, the Cretans, or at least certain Cretans, conceived him to be a bull. But, more than this, another lexicographer expressly asserts that the Cretans called the sun the 'Adiounian bull' on the ground that, when he changed the site of his city, he led the way in the likeness of a bull⁸.

A similar story is told of Ilos, son of Tros, who came to Phrygia, won a wrestling-match arranged by the king, and received as his prize fifty boys and fifty girls. The king, in accordance with an oracle, gave him also a dappled or variegated cow with instructions that wherever it lay down he should found a city. The cow went before him to the hill of the Phrygian Ate and there lay down. So Ilos founded his city and called it Ilion⁹. Or, as another authority told the tale, when Ilos (whose name appeared to mean 'Cow-herd'¹⁰) was feeding his cattle in Mysia, Apollon gave him an oracle to the effect that he should found a city wherever he saw one of his cows fall: one of them leapt away, and

⁶ Apollod. i. 9. 26. The editors print *ὁ Τάλως*, but the name was also accented *Ταλῶς*: see Stephanus *Thes. Gr. Ling.* vii. 1794 D.

⁷ Hesych. s.v. *ταλῶς*. ὁ ἥλιος. So M. Schmidt: J. Alberti prints *Τάλως*.

⁸ *Συναγωγὴ λέξεων χρησίμων κ.τ.λ.* in Bekker *anecd.* i. 344, 10 ff. 'Ἀδιούνιος ταύρος' ὁ ἥλιος ὑπὸ τῶν Κρητῶν οὕτω λέγεται. φασὶ γὰρ τὴν πύλον μετακίζοντα ταύρω προσεικασθέντα προσηγείσθαι. H. van Herwerden *Lexicon Graecum supplementum et dialecticum* Lugduni Batavorum 1902 p. 18 s.v. *ἀδιούνιος ταύρος* says: 'Adiectivum non expedio.' But may it not be a dialect-form from 'Ἄδωνις, whose name often appears on Etruscan mirrors as *Atunis* (e.g. Gerhard *Etr. Spiegel* iii pls. 111, 114—116, v pls. 24—28) or *Atuns* (*ib.* v pl. 23)? On the Cretan Zeus as a sort of Adonis see *supra* p. 157 n. 3.

⁹ Apollod. 3. 12. 3, Tzetz. in Lyk. *Al.* 29.

¹⁰ The real origin of the name is uncertain; but the Greeks probably connected it with *ἑλη*, 'herd' (see Roscher *Lex. Myth.* ii. 121).

he followed it till it bent its legs and fell down on the site of Ilion¹. This cow was probably divine; for in Phrygia², as elsewhere in ancient times³, to kill a plough-ox was a capital offence⁴. A third story of like character tells how Kadmos, in obedience to a Delphic oracle, followed a cow belonging to Pelagon, son of Amphidamas, and on the spot where it lay down founded the city of Thebes; but of this I must speak more in detail in a later section⁵.

xii. The Cow and the Moon in Crete.

If the brilliant bull in the herd of king Minos had thus come to symbolise the sun, we can discover a meaning in another story told of the same monarch. Apollodoros⁶ says of Glaukos, son of Minos:

‘Glaukos, while still an infant, was pursuing a mouse⁷ when he fell into a jar of honey and was drowned. After his disappearance Minos had search made for him everywhere and consulted the oracles about the right way to find him.

⁴ Cp. the βουφόνια at Athens (*infra* ch. ii § 9 (h) ii), the sacrifice of a calf dressed in buskins to Dionysos Ἐνθροπωπαλάστης in Tenedos (Ail. *de nat. an.* 12. 34), and analogous rites (W. Robertson Smith: *Lectures on the Religion of the Semites*² London 1907 p. 304 ff., Frazer *Golden Bough*³: Spirits of Corn and Wild ii. 4 ff., W. Warde Fowler *The Roman Festivals* London 1899 p. 327 ff.). Prometheus was said to have been the first to kill an ox (Plin. *nat. hist.* 7. 209): see Roscher *Lex. Myth.* iii. 3055.

⁵ *Infra* ch. i § 6 (g) xviii.

⁶ Apollod. 3. 3. 1, cp. Tzetz. *in Lyk. Al.* 811, Aristeid. *or.* 46. 307 (ii. 398 Dindorf) with schol. Aristeid. p. 728, 29 ff. Dindorf.

⁷ For μῦν, which is supported by Tzetz. *in Lyk. Al.* 811, A. Westermann, after Commelin, reads μύλαν, ‘a fly,’ cp. *Frag. hist. Gr.* i. 152 Müller μύλαν.

The first part of the story implies the custom of preserving the dead in honey (W. Robert-Tornow *De apium mellisque apud veteres significatione* Berolini 1893 p. 128 ff.) and burying him in a *pithos* (cp. Gruppe *Gr. Myth. Rel.* p. 816 n. 5). Glaukos’ pursuit of the ‘fly’ may be based on the art-type of Hermes evoking the dead from a burial-jar, while a soul in the form of a bee (Gruppe *op. cit.* p. 801 n. 6) hovers above it: the type is best represented by gems (figs. 325, 326 = Müller—Wieseler *Denkm. d. alt. Kunst* ii. 252 f. pl. 30, 333, 332, cp. *ib.* 332^a). See further Harrison *Proleg. Gk. Rel.*² p. 43 f.

Fig. 325.

Fig. 326.

The Kouretes told him that he had in his herds a three-coloured cow¹, and that the man who could offer the best similitude for the colour of this cow would also give him back his son alive. So the seers were called together, and Polyidos, son of Koiranos, likened the colour of the cow to the fruit of a bramble. He was therefore compelled to search for the boy, and by some prophetic art he found him.

With the rest of the story we are not here concerned. It is, however, worth while to compare the opening of the tale as told by Hyginus²:

‘Glaukos, son of Minos and Pasiphae, while playing at ball, fell into a big jar full of honey. His parents sought him and enquired of Apollon about the boy. To them Apollon made answer: “A portent has been born to you, and whoever can explain it will restore to you your boy.” Minos, having listened to the oracle, began to enquire of his people what this portent might be. They said that a calf had been born, which thrice in the day, once every four hours, changed its colour, being first white, then ruddy, and lastly black. Minos, therefore, called his augurs together to explain the portent. When they were at a loss to do so, Polyidos, son of Koiranos, showed³ that it was like a mulberry-tree; for the mulberry is first white, then red, and, when fully ripe, black. Then said Minos to him: “The answer of Apollon requires that you should restore to me my boy.”’

It will be observed that, according to Apollodoros (and Tzetzes bears him out⁴), the task set to test the powers of the seer was, not to explain the significance of the three-coloured cow, but to find a suitable comparison for its colours. The cow did not signify a bramble-bush or a mulberry-tree, but in aspect or colour they might be taken to resemble it. Now a common folk-lore explanation of the moon’s spots is that they are a thorn-bush carried by the man-in-the-moon⁵. It might therefore be maintained that the bramble-bush or mulberry-tree was a possible description of the moon. And, if so, then the three-coloured cow, or calf that changed its colour three times a day, was merely another way of describing the moon. I am the more disposed to advance this view because Io, who was so often identified with the moon⁶, became according to one account now a white cow, now a black, now a violet⁷, and because Bacis or Bacchis the sacred bull at

³ Hesych. s.v. Καρτεμνίδες· οἱ Γορτύνιοι. Κρήτες.

⁴ Hesych. s.v. κάρτην· τὴν βοῦν Κρήτες. καὶ τὸν οἰκέτην οἱ αὐτοί. M. Schmidt *ad loc.* hazards the suggestion that we should read *οἰκιστὴν* and explain it of an eponymous founder *Κάρτην* = *Γόρτην*. I. Voss *Catull.* p. 203 would correct *Κρημνία* in Steph. Byz. s.v. *Γόρτην* to *Καρτεμνία*: he cites Strab. 478 to prove that Gortyna lay 'in a plain' and could not therefore be called 'Precipitous.' J. Alberti on Hesych. *loc. cit.* quotes from Soping a comparison with the first element in *Carthago* and the story of the bull's hide (Roscher *Lex. Myth.* i. 1013, Pauly—Wissowa *Real-Enc.* v. 426): this of course assumes a folk-etymology for *Carthago* as well as for the *Byrsa*.

I would rather suppose a connexion with τὰ καρταίποδα, which occurs in the laws of Gortyna to denote 'oxen' (Michel *Recueil d'Inscr. gr.* no. 1333 iv. 35 f. = Collitz—Bechtel *Gr. Dial.-Inscr.* iii. 2. 265 no. 4991 iv. 35 f. τὰ πρόβατα καὶ καρταί[π]οδα, cp. *ib.* iii. 2. 282 no. 4998 i. 12 ff. αὐ δὲ κα σὺς καρταίπος παρῶσει ἢ κατασκένῃ, τὸν τε σὺν ἐπὶ τῷ πάσση ἤμην ὦ κ' ἢ τὸ καρταίπος κ.τ.λ.) and, in an all but identical form, was used by Pindar of 'a bull' (Pind. *Ol.* 13. 81 καρταίποδ' with schol. *ad loc.* καρταίποδα τὸν ταῦρον. οὕτω Δελφοὶ ἰδίως ἐκάλουν). Dedications to the Kouretes as guardians of kine (Κῶρησι τοῖς πρὸ καρταίπόδων) have been found by Prof. De Sanctis at *Hagia Barbara* (G. De Sanctis in the *Mon. d. Linc.* 1907 xviii. 346 f.) and at Pluti near Gortyna (R. C. Bosanquet in the *Ann. Brit. Sch. Ath.* 1908—1909 xv. 353).

herds of cattle belonging to the sun used to be kept at Gortyna¹; and Virgil represents Pasiphae's bull, whose solar character we have already considered², as lying beneath an evergreen oak or following the Gortynian cows³. Bronze coins of Gortyna show Zeus as a bull galloping across the sea, which is suggested by a couple of dolphins⁴, or carrying Europe on his back (fig. 328)⁵: in both cases a surrounding circle of rays stamps him as a god of light.

Fig. 328.

xiv. The Labyrinth at Knossos.

At Knossos⁶ was the Labyrinth built by Daidalos for the safe-keeping of the Minotaur⁷. Diodoros⁸ and Pliny⁹ state that it was an imitation of the yet more famous Egyptian Labyrinth. Mr H. R. Hall describes the latter building as follows: 'It was a great temple, with magnificent pillared halls, side-chambers, and out-buildings, erected by the greatest pharaoh of the Twelfth Dynasty, Amenemhat III (circa 2200 B.C.), immediately in front of his pyramid at Hawara: there is no doubt that it was the funerary temple of the pyramid, erected by the king for the due performance of the funeral rites after his death¹⁰.' Classical writers had a more or less confused idea of the purpose served by the building.

I figure from my collection a similar coin of Knossos, struck in alliance with Gortyna (cp. J. N. Svoronos *op. cit.* i. 81 pl. 7, 11—14, *Brit. Mus. Cat. Coins* Crete etc. p. 22 pl. 6, 2 f.).

⁶ Some late writers (Claud. *de sext. cons. Hon. Aug.* 634, Kedren. *hist. comp.* 122 C (i. 215 Bekker)) place the Cretan Labyrinth at Gortyna.

⁷ Roscher *Lex. Myth.* ii. 1778 ff.

⁸ Diod. i. 61 and 97.

⁹ Plin. *nat. hist.* 36. 84 ff.

¹⁰ H. R. Hall 'The Two Labyrinths' in the *Journ. Hell. Stud.* 1905 xxv. 328. Prof. Flinders Petrie investigated the site of the Egyptian Labyrinth in 1888 with meagre results (W. M. Flinders Petrie *Hawara, Biahmu, and Arsinoe* London 1889 pp. 4—8 pl. 25 map of neighbourhood with conjectural ground-plan). In 1911 he was more successful, and at a depth of from 20 to 25 feet recovered the upper parts of half a dozen statues of the gods of the twelfth dynasty, especially of Sebek the crocodile-god, who seems to have been the principal deity of the precinct; he also found in the *débris* of the brick core of the pyramid traces of the 21 chapels for the Egyptian nomes, e.g. two large shrines of red granite each containing two life-size figures of Amenemhat iii, besides many fragmentary wall-sculptures, including one which shows the king seated between goddesses holding fish, and another in which he is kneeling in a boat and opening the shrine of a holy tree (W. M. Flinders Petrie in *Records of the Past* 1911 x. 303—315 with figs., *id.*—G. A. Wainwright—E. Mackay *The Labyrinth Gerzeh and Mazghuneh* London 1912 pp. 28—35 with restored plan of western half of Labyrinth and pls. 23—32). Prof. J. L. Myres in *Ann. Arch.* 1910 iii. 134—136 has a restoration of the Labyrinth based on the description of Herodotos.

Herodotos speaks of its twelve courts as a memorial of the dodecarchy¹. Strabon calls it 'a vast palace composed of as many palaces as there were formerly nomes,' and states that the nomes were accustomed to assemble in their respective courts 'with their own priests and priestesses for sacrifice, oblation, and judicial award on matters of importance².' Diodoros thinks it the 'tomb' of the king who built it³, as does Manethon⁴. Pliny says: 'Different

Fig. 329.

interpretations are put upon the construction of this edifice. Demoteles takes it to have been the palace of Moteris; Lykeas, the tomb of Moiris. Most authorities suppose that it was reared as a building sacred to the Sun, and such is the common belief⁵.

With regard to the Cretan Labyrinth too very various opinions have been advanced⁶. Nowadays most scholars hold that Sir

⁶ See Roscher *Lex. Myth.* ii. 1778—1783.

Arthur Evans was justified in identifying it with the complex palace that he excavated at Knossos. And this view can certainly claim the support not only of such writers as Diodoros and Pliny, who suppose a Cretan imitation of an Egyptian building¹, but also of the Attic painters of red-figured vases, who represent Theseus as dragging the Minotaur forth from an edifice with a *façade* of Doric (fig. 329)² or Ionic columns³. Nevertheless, to admit that Attic painters *c.* 450—430 B.C. regarded the Labyrinth as a sort of palace is not necessarily to assert that such was its original character. The red-figured vases in every case show to the right

Fig. 330.

of the colonnade a broad band decorated with *swastika*-patterns checker-work; and it is from behind this band that the body of

¹ Diod. i. 61, i. 97, Plin. *nat. hist.* 36. 84—86. The earliest writer that speaks of it as a building is Apollod. 3. i. 4 (ὄκημα καμπαῖς πολυπλόκοις πλανῶν τὴν ἔξοδον). But Pherekydes *frag.* 106 (*Frag. hist. Gr.* i. 97 Müller) appears to have mentioned the lintel of its door (τὸν ζυγὸν τῆς (τὸν?) ἀνω θύρας).

the Minotaur emerges. E. Braun long ago suggested that the patterned space stands for the Labyrinth¹. And P. Wolters has recently proved that the further back we trace the whole design, the more important becomes this particular feature of it². On a black-figured *lékythos* from Vari (fig. 330)³ the Minotaur, grasping a couple of stones, is haled out from behind a *stéle* or broad column covered with maeanders etc. The Labyrinth is here no palace;

Fig. 331.

it can hardly be termed a building at all. On a black-figured *skyphos* from the akropolis at Athens (fig. 331)⁴ the resemblance

¹ E. Braun in the *Bull. d. Inst.* 1846 p. 106. G. W. Elderkin 'Maeander or Labyrinth' in the *Journ. Am. Arch.* 1910 xiv. 185—190 still thinks that the band is the *anta* of a wall and that its patterns are mere filling, though he admits that 'An exact parallel to the vertical stripe...is not at hand.' His notion that Aison on the Madrid *kylix* was copying the north porch of the Erechtheion with its *βωμὸς τοῦ θνηχοῦ* is surely far-fetched. A better copy of the Erechtheion, olive-tree and all, is Lenormant—de Witte *Él. mon. chr.* i. 223 ff. pl. 67.

⁴ Graef *Ant. Vasen Athen* p. 142 f. no. 1280 pl. 73, A, P. Wolters *loc. cit.* p. 123 pl. 3, a fragmentary *skyphos* from the Persian *débris* showing Theseus beside the Labyrinth, greeted by Athena in the presence of three other figures: the inscription is meaningless.

With this vase cp. Graef *op. cit.* p. 147 no. 1314 pl. 76, P. Wolters *loc. cit.* p. 124,

to a stone structure is still more remote¹, the Labyrinth appearing merely as a patterned oblong side by side with the *dramatis personae*. Wolters concludes that the black-figured vases presuppose a primitive composition, in which the action portrayed was accompanied by a ground-plan of the scene. He finds a parallel in the Etruscan *oinochôe* from Tragliatella (fig. 332)², on which

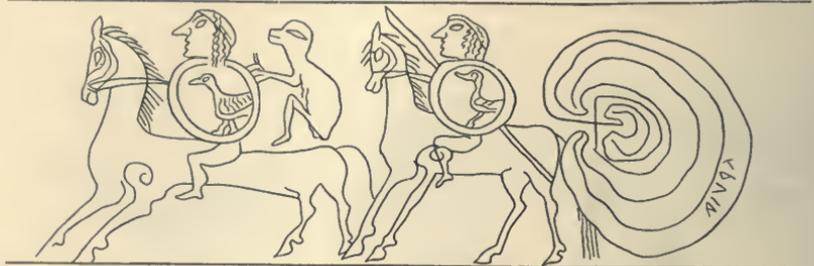

Fig. 332.

O. Benndorf³ recognised soldiers engaged in the game of 'Troy' (*Truia*). It would seem, then, that Attic tradition points backwards to a time when the Labyrinth was depicted, not as a palace, but as a maeander or *swastika*-pattern.

Fig. 333.

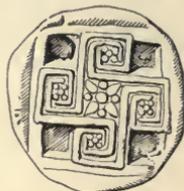

Fig. 334.

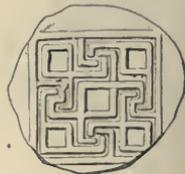

Fig. 335.

The same result is reached on Cretan soil. Coins of Knossos from *c.* 500 B.C. onwards represent the Labyrinth by a *swastika* or by some derivative of the *swastika*⁴. The pattern develops in two directions. On the one hand, the *swastika* together with its four

two fragments of a *skyphos* showing (obverse) Theseus beside the Labyrinth and another figure; (reverse) perhaps the same design. The Labyrinth, to judge from Graef's plate, tapers towards the top like an *omphalôs* (?).

¹ B. Graef *Ant. Vasen Athen* p. 143 contends that the black-figured vases aim at representing 'ein turmartiges Bauwerk' with a labyrinthine ground-plan, and ingeniously compares the *thôlos* at Epidaurus.

The *swastika* as a representation of the Labyrinth can perhaps be traced further afield. At Gaza the god Marnas, otherwise called Zeus *Kretagenés*¹, had a circular temple surrounded by concentric colonnades, which appears to have borne some resemblance to the Cretan Labyrinth². If so, it becomes possible that the Phoenician letter *mem* on autonomous coppers of Gaza (fig. 344)³ was not merely the initial of Marnas⁴, but also a quasi-*swastika* like the Labyrinth-devices on coins of Knossos⁵.

However that may be, it seems certain that both Attic and Cretan art presuppose the *swastika* as the earliest ascertainable form of the Labyrinth. That much-disputed symbol has a voluminous literature of its own⁶, and critics are not yet unanimous as to its ultimate significance. But among recent investigators there

Fig. 344.

is something like a *consensus* in favour of the view that it was a stylised representation of the revolving sun⁷. On this showing,

appears on some of the sealings found by Mr. Hogarth at Zakro [*Journ. Hell. Stud.* 1902 xxii. 88 no. 133 pl. 10]. A still earlier example of the same class occurred in a magazine of the Earlier Palace together with fine "Middle Minoan" pottery on the East slope.⁸

² *Infra* ch. ii § 9 (g). The old ground-plan came near to being retained, when the edifice was rebuilt as a Christian church (*supra* p. 167 n. 3). Mazes still survive in the flooring of continental churches (*infra* p. 485 f.).

F. De Sauley *Numismatique de la terre sainte* Paris 1874 p. 210 pl. 11, 2: cp. *supra* p. 236 figs. 175—177.

⁴ F. De Sauley *op. cit.* p. 210, *Head Hist. num.*² p. 805. Cp. Damaskios *dubit. et solut.* 262 (p. 127 f. Ruelle) ὡς παρὰ μὲν Ἀγυπτιοῖς τὸ τὲρ ὀνομαζόμενον, ὃ ἐστὶν εὐθεία ὀρθὴ μία καὶ τρεῖς πλάγιοι ἐπ' αὐτῆς, ἢ τε κορυφαία καὶ δύο μετ' αὐτήν, καὶ ἔτι παρὰ Ἑλλιοπολίταις ἄλλο τι, καὶ παρὰ Γαζαίοις ἄλλο τοῦ Διὸς—which shows that this symbol was deemed sacred to Zeus.

⁵ This suggestion was first made by Sir Arthur Evans in the *Ann. Brit. Sch. Ath.* 1902—1903 ix. 88 f.

⁶ To the bibliography of the *swastika* given by T. Wilson (*supra* p. 337 n. 1) add Z. Nuttall *The Fundamental Principles of Old and New World Civilizations* Cambridge Mass. 1901 (Archaeological and Ethnological Papers of the Peabody Museum, Harvard University, vol. ii) pp. 1—602.

⁷ So e.g. Count Goblet d'Alviella *The Migration of Symbols* p. 50, A. C. Haddon *Evolution in Art* London 1895 p. 282 ff., A. Bertrand *La Religion des Gaulois* Paris 1897 p. 140 ff. J. Déchelette *Manuel d'archéologie* Paris 1910 ii. 1. 453 ff. Cp. *supra* pp. 301, 336 f.

the original Cnossian Labyrinth was not the great palace unearthed by Sir Arthur Evans, at least was not the whole of that palace, but was a structure which somehow lent itself to an imitation of the sun's movements in the sky.

But how are we to conceive of such a structure? Probably it was an *orchéstra* or 'arena' intended for the performance of a mimetic dance. Perhaps even it was marked out with mazy lines to aid the intricate evolutions of the dancers—a practice undoubtedly known to the later Greeks¹. If, therefore, we are to identify the Labyrinth with any structure so far found, I should suppose that it was the paved rectangular space near the north-west corner of the Cnossian palace. This space, discovered by Sir Arthur Evans² in 1901 and by him dubbed 'the Theatral Area,' is an

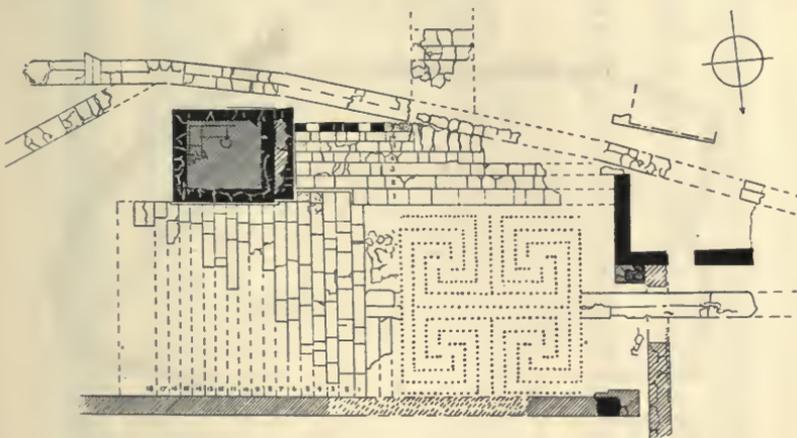

Fig. 345.

east-and-west oblong of 12·94 by 9·89 metres enclosed by two flights of steps or seats (18 on the east, 6 decreasing to 3 on the south side) with a square bastion at their common angle. Its rough paving was probably once covered with coloured cement or hard plaster, on which we may believe the labyrinthine lines to have been set out more or less as in the foregoing ground-plan³.

¹ Hesych. *γραμμαλ' ἐν τῇ ὀρχήστρῃ ἦσαν, ὡς τὸν χορὸν ἐν στοίχῳ ἰσταςθαι*. See A. E. Haigh *The Attic Theatre*² Oxford 1898 p. 137.

² A. J. Evans in the *Ann. Brit. Sch. Ath.* 1902—1903 ix. 99—112 fig. 68 plan and section, fig. 69 view.

³ I have here combined a plan of the 'Theatral Area' (based on that of A. J. Evans *loc. cit.* p. 103 fig. 68) with the labyrinth-pattern of the wall-painting (*supra* p. 477 n. 2 f.). But, of course, other arrangements are equally possible.

A. Mosso *The Palaces of Crete and their Builders* London 1907 p. 313 notes 'a square figure with nine small holes incised on a step of the theatre.' He suggests that it was 'a Mycenaean game' and compares 'similar figures cut by idle people on the pavements of the basilicas in the Roman Forum.'

The Cnossian *orchestra* bears no slight resemblance to the oblong theatre at Thorikos (fig. 346)¹. Since Thorikos was once a flourishing 'Minoan' settlement, it might be suggested that the peculiar form of its theatre was a heritage from early times. Perhaps we may venture even a step further and recognise certain analogies between the Cretan Labyrinth and the ordinary Attic theatre. If the former was occupied by dancers arranged as a *svastika*, the latter had regularly its 'square chorus'². If a 'clew' was needed in the one³, a rope-dance (*kórdax*) was executed in the other⁴. Ariadne, as the mythographers put it, when deserted by Theseus was taken up by Dionysos. Prof. R. C. Bosanquet points out to me that even in Roman times the *orchestra* of the theatre at Athens was laid out as a *svastika*-mosaic (pl. xxix)⁵. There was in

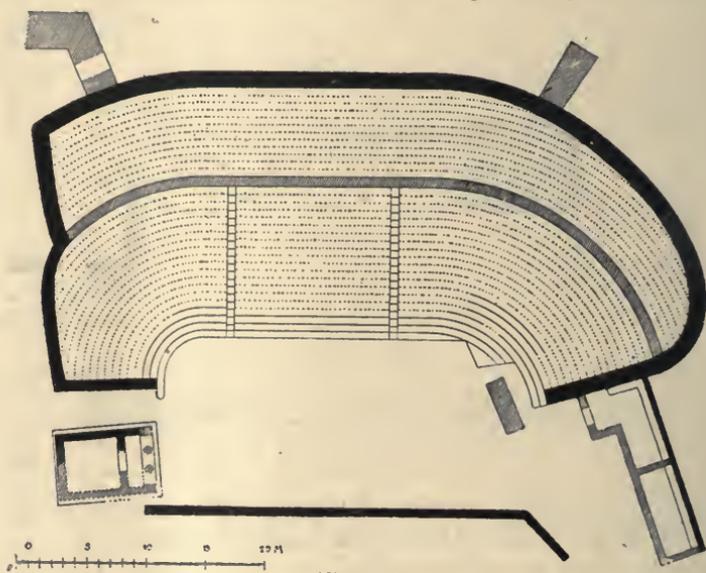

Fig. 346.

fact some excuse for Conrad von Querfurt, who, writing from Sicily in 1194 A.D., tells his old friend the prior of Hildesheim how

² On the *τετραγωνος χορος* of tragic, comic, and satyric plays, and its relation to the *κύκλιος χορος* of dithyramb, see *Class. Rev.* 1895 ix. 376.

³ Diels in Pallat *De fabula Ariadnaea* Berolini 1891 interprets the clew as a rope-dance (Gruppe *Gr. Myth. Rel.* pp. 254, 603 n. 7).

⁴ I have discussed a 'Minoan' precursor of the *kórdax* in *Journ. Hell. Stud.* 1894 xiv. 101 f.

⁵ The plan here given (very slightly restored) is based on Mr A. M. Poynter's careful survey of the existing remains (*Ann. Brit. Sch. Ath.* 1896—1897 iii. 176—179 pl. 15).

480¹

The *swastika*-mosaic in the theatre at Athens.

See page 480.

charmed he had been to find at Taormina the Labyrinth of the Minotaur!¹

The solution of the Labyrinth-problem² here advanced is borne out by a thrice-familiar passage in the *Iliad*. Daidalos, we read,

once wrought in Knosos broad
A dancing-ground for fair-haired Ariadne³.

The scholiast explains that Theseus, having escaped from the Labyrinth by means of Ariadne's clew, with the youths and maidens whom he had rescued 'wove a circling dance for the gods that resembled his own entrance into and exit from the Labyrinth, Daidalos showing them how to dance it⁴. Eustathios⁵ adds that this was the first occasion on which men and women danced together, that Sophokles had alluded to 'the dances of Knossos⁶,' and that old-fashioned folk in his own day, sailors especially, danced a certain dance with many twists and turns in it meant to recall the windings of the Labyrinth. Lucian too specifies as Cretan dance-themes 'Europe, Pasiphae, both the Bulls, the Labyrinth, Ariadne, Phaidra, Androgeos, Daidalos, Ikaros, Glaukos, the seer-craft of Polyeidos, and Talos the bronze sentinel of Crete⁷.'

The Labyrinth-dance was not confined to Crete. Plutarch in his *Life of Theseus*⁸ writes:

'Sailing away from Crete, he put in at Delos. Here he sacrificed to the god, dedicated the image of Aphrodite that he had received from Ariadne, and in company with the young men danced a dance, which, they say, is still kept up by the Delians. It imitates the circuits and exits of the Labyrinth by means of a certain measure that involves turnings and re-turnings. This type of dance, as Dikaiarchos shows, is called the Crane by the Delians⁹. Theseus danced it

¹ D. Comparetti *Vergil in the Middle Ages* trans. E. F. M. Benecke London 1895 p. 257 f.

² Sir Arthur Evans *loc. cit.* p. 111 concludes 'that this first of theatres, the Stepped Area with its dancing ground, supplies a material foundation for the Homeric tradition of the famous "choros" [*Il.* 18. 591 ff.].' But he does not expressly identify the said 'Area' with the Labyrinth of mythology. Indeed, he cannot, because he regards the whole palace as the Labyrinth (*Ann. Brit. Sch. Ath.* 1899—1900 vi. 33). To me it seems more probable that the Labyrinth proper was the dancing-ground made by Daidalos, and that the close relation of this dancing-ground to the palace at Knossos led the Greeks as early as the fifth century B.C., if not much earlier, to view the Labyrinth erroneously as a palace.

⁷ Loukian. *de salt.* 49.

⁸ Plout. *v. Thes.* 21.

⁹ The γέρανος (Loukian. *de salt.* 34) is described by Poll. 4. 101 τὴν δὲ γέρανον κατὰ πλῆθος ὠρχοῦντο, ἕκαστος ὑφ' ἐκάστῳ κατὰ στοῖχον, τὰ ἄκρα ἐκατέρωθεν τῶν ἡγεμόνων ἐχόντων κ.τ.λ. and in more general terms by Kallim. *h. Del.* 312 f. πότνια, σὸν περὶ βῶμων ἐγειρομένον κίθαρισμοῦ | κλέκλον ὠρχήσαντο κ.τ.λ. On the *kratér* of Klitias and

round the *keratôn*¹ altar, so named because it consists of horns (*kérata*) all taken from the left side. They state also that he instituted a contest in Delos and therein was the first to award a palm to the victors.²

Again, the game of 'Troy³,' which the Etruscan potter repre-

Entotimos, Attic work of c. 600—550 B.C., Theseus, lyre in hand, is leading the dance, which consists of seven youths and seven maidens: they have just landed from their ship (Furtwängler—Reichhold *Gr. Vasenmaleri* i. 60 f. pl. 13).

I have elsewhere (*Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 186 f.) pointed out that this curious combination of bull and crane recurs in the Celtic area. On an altar found at Paris in 1710, beneath the apse of Notre-Dame, four sculptured panels show (a) Jupiter (IOVIS) with sceptre and eagle, (b) Vulcanus (VOLCANVS) with tongs, (c) a bearded god (ESVS) felling a willow-tree with uplifted axe, (d) a great bull wearing a long saddle-cloth or *dorsuale*. On his head and back are three cranes visible against the foliage of the willow. The inscription above is TARVOS · TRIGARANVS, 'the Bull with the Three Cranes' (see A. Bertrand *La Religion des Gaulois* Paris 1897 p. 351 f. fig. 50 and especially S. Reinach *Cultes, Mythes et Religions* Paris 1905 i. 233 ff. figs. 1—4). On another altar found near Trèves in 1895 the three sculptured faces show (a) Mercurius with *caduceus*, purse, etc. and his consort (Rosmerta?) standing on either side of an altar. A small animal (goat? ram?) is between the feet of Mercurius. Beneath runs the incomplete inscription NDVS MEDIOM · MERCVRIO V · VS (b) the lower portion of a small draped female figure, (c) a beardless (?) wood-cutter cleaving or splitting a tree, probably meant for a willow. High up on the tree are a bull's head to the left and three large birds with long beaks to the right (Bertrand *op. cit.* p. 352 f. fig. 51, Reinach *op. cit.* i. 234 ff. figs. 5 f.). H. Steuding in Roscher *Lex. Myth.* i. 1603 cp. the stout shepherd Garanus (Verrius Flaccus *ap. Serv. in Verg. Aen.* 8. 203) or Recaranus (Aur. Vict. *orig. gent. Rom.* 8, where Steuding ingeniously cj. *Trigaranus*), who slew Cacus the thief of Geryones' oxen.

It may also be remarked that a Japanese crest has three storks or cranes grouped together on the solar disk (N. Gordon Munro in the *Transactions of the Asiatic Society of Japan* 1911 xxxviii. 3. 64 pl. 20, 22, cp. 21).

¹ The form *κερατών* is found also in a Delian inscription (Dittenberger *Syll. inscr. Gr.*² no. 588, 172). Plout. *terr. an aquat. anim. sint callidiora* 35 regards the *κεράτῳς βοῦβός* of Delos as one of the seven wonders of the world (so anon. *de incred.* 2, Mart. *lib. spec.* 1. 4) and states that it was made of right horns only, without glue or bonding of any sort. Anon. *de incred.* 2 says that it was composed of the right horns of victims offered to the god on a single day. Kallim. *h. Ap.* 61 ff. asserts that the four-year-old Apollon built it with the horns of goats shot by Artemis on Mt Kynthos. It is also mentioned by Ov. *her.* 21. 99. The existing remains are described by T. Homolle 'L'autel des cornes à Délos' in the *Bull. Corr. Hell.* 1884 viii. 417 ff. pls. 17 ff., Durn *Bankunst d. Gr.*² p. 230 figs. 152 f., L. Büchner in Pauly—Wissowa *Real-Enc.* iv. 2468. They include a long narrow temple measuring 67·20 by 8·86 metres. This is divided into three parts. First comes a *πρόναος* with four Doric columns. Then, an elongated *ναός*, the centre of which forms a sunk oblong space. This is separated from the third and innermost portion of the edifice by two pairs of Doric half-columns forming three intercolumniations: the middle opening has on either side of it a pilaster, the capital of which is the forepart of a kneeling bull. Lastly, there is an inner *ναός*, oblong in shape, where once stood the famous horn-altar. It is noteworthy also that a colonnade 125 metres in length, which runs along the northern side of the precinct, has its triglyphs decorated with bulls' heads. Examples of the forepart of a bull used as an architectural member are collected by A. H. Smith in the *Brit. Mus. Cat. Sculpture* ii. 263 f.

² G. E. Marindin in Smith—Wayte—Marindin *Dict. Ant.* ii. 899 f. Cp. also Hesych. *s.v.* Μαλαβόπος...καὶ εἶδος ἱππασίας παρὰ ἱπποδαμίστρας.

sented as a maze¹ and Virgil expressly compares with the Cretan Labyrinth², was said to have been first introduced into Latium by Ascanius and his Trojans³. This tradition, if sound, points to the former existence of a labyrinthine dance in Asia Minor. It may, therefore, be worth while to suggest that the Labyrinth-pattern, which occurs on coins of Priene⁴, Magnesia on the Maiandros⁵, Tripolis⁶, and Apameia⁷, was not originally a graphic sign for the 'meandering' river, but an ancient religious symbol akin to, if not identical with, that which represented the Labyrinth at Knossos. Thus the humped bull within the Labyrinth on coins of the Cretan colony⁸ Magnesia, c. 350—190 B.C. (fig. 347)⁹, would be comparable with the Minotaur¹⁰, while the *swastika* beneath the feet of Apollon on the later tetradrachms (fig. 348)¹¹ suggests a solar interpretation. If we were better acquainted with the history of 'Minoan' migrations, it might be possible to trace the route by which the Labyrinth-dance and the Labyrinth-pattern passed from east to west¹².

Fig. 347.

Miss Harrison in a letter to me dated June 14, 1912 makes the interesting suggestion that the *Τρωικὸν πῆδημα* of Neoptolemos at Delphoi (Eur. *Andr.* 1139) may stand in some relation to the game of 'Troy.' This strikes me as not impossible, since we have already found Neoptolemos grasping the solar wheel in the same sanctuary (*supra* p. 261). Yet I should hardly agree with Miss Harrison that 'the usual aetiology is sheer nonsense': cp. schol. Eur. *Andr.* 1139 τὸ Τρωικὸν πῆδημα· ὁποῖον ἐν τῇ Τροίᾳ ἐπῆδησεν ὁ Ἀχιλλεύς. οἱ γὰρ συννεταχότες τὰ Τρωικὰ φασὶν ὡς τόπος ἐστὶν ἐν Τροίᾳ καλούμενος Ἀχιλλεύς πῆδημα, ὅπερ ἀπὸ τῆς νεὺς ἐπῆδησεν. οὕτως δὲ φασὶ βία ἤλατο ὡς καὶ ὕδωρ ἀναδοθῆναι. Here at least is a *bona fide* piece of folk-lore.

⁹ I figure a copper in my collection.

¹⁰ The Cretan bull, *ab initio* a fertilising agent, would readily become a bovine river-god, his *swastika* being re-interpreted as the sinuous line of the river.

¹¹ *Brit. Mus. Cat. Coins* Ionia p. 162 pl. 18, 9 (=my fig. 348), 10, 11.

Prof. R. C. Bosanquet draws my attention to the fact that in the temple of Apollon at Didyma the marble roof of a stair-case known as the *Λαβύρινθος* (B. Haussoullier in the *Rev. Philol.* N. S. 1905 xxix. 264 ff.) had a carved and painted *swastika*-pattern (T. Wiegand 'Sechster vorläufiger Bericht über Ausgrabungen in Milet und Didyma' in the *Abh. d. berl. Akad.* 1908 Phil.-hist. Classe p. 35, 'Siebenter...Bericht' *ib.* 1911 p. 49 f. fig. 16).

¹² The Labyrinths of the *Kyklopes* in the caves near Nauplia (Strab. 369 *ἐφεξῆς δὲ τῇ Ναυπλίᾳ τὰ σπήλαια καὶ οἱ ἐν αὐτοῖς οἰκοδομητοὶ λαβύρινθοι, Κυκλώπεια δ' ὀνομάζουσιν*), the Labyrinth in Samos made by Theodoros (Plin. *nat. hist.* 34. 83), the Labyrinth in

In Italy they gained a firm footing, as we may infer not only from the literary allusions to the game of 'Troy¹,' but also from the many Roman mosaics that represent Theseus and his foe in a labyrinthine frame².

Fig. 348.

Finally the Labyrinth was taken over from paganism by Christianity. At Orléansville in Algeria the Christian *basilica*, founded in 324 A.D., had among other mosaics a Labyrinth, the centre of which was occupied by the words SANCTA ECCLESIA repeated in a complicated form³.

One of the state robes of the Christian emperors prior to the ninth

Fig. 349.

century was coloured a fiery red and adorned with a Labyrinth of gold and pearls, in which was a Mirtotaur of emerald holding a finger to his lips⁴. A picture by Bartolommeo Veneto (1502—1530),

Lennos (?) with its 150 columns attributed to Smilis Rhoikos and Theodoros (*id. ib.* 36. 90, where Hirt's *ej. Samius* for *codd. Lemnius* certainly suits the clause: *architecti fecere Zmilis et Rhoecus et Theodorus indigenae*), the amazing Labyrinth at Clusium constructed as a tomb for himself by Porsenna (*id. ib.* 36. 91—93 citing Varro, *cp. Isid. orig.* 15. 2. 36: see Durm *Baukunst d. Etrusk.*² p. 140 ff.), were all buildings and merely attest the fact that the name attached itself to any complicated structure.

Laurent. plut. lxxxix infer. no. 41): *De diarodino imperatoris et laberintho aureo facto in eo. Unde diarodino utitur ad imitandum divini ignis effigiem, qui semper ad alta extollitur, et quia per sanguinem*

now in the Fitzwilliam Museum at Cambridge, represents an unknown man wearing a Labyrinth of the sort on his breast¹. A small Labyrinth (19½ inches across) still exists incised upon a porch pier of Lucca cathedral (fig. 349)². The central group of Theseus and the Minotaur has all but vanished under the pressure of countless tracing fingers, but the adjoining inscription attests the designer's meaning. Similar examples are, or were, in the church of S. Michele at Pavia (*s. xi*), at Aix in Provence, on the walls of Poitiers cathedral. Labyrinths of larger size are not very

Fig. 350.

uncommon in continental churches³. A fine specimen, composed of grey and white marble, decorates the middle of the nave in Romani subjugaverunt orbem terrarum. Habeat et in diarodino laberinthum fabrefactum ex auro et margaritis, in quo sit Minotaurus digitum ad os tenens ex smaragdo factus, quia sicut non valet quis laberinthum scrutare, ita non debet consilium dominatoris propalare. I am indebted for this and for several of the following references to a valuable article by the Rev. E. Trollope on 'Notices of Ancient and Medieval Labyrinths' in *The Archaeological Journal* 1858 xv. 216—235.

¹ F. R. Earp *A descriptive Catalogue of the Pictures in the Fitzwilliam Museum* Cambridge 1902 p. 14 f. no. 133 fig. Mr A. S. F. Gow, Fellow of Trinity College, Cambridge, kindly drew my attention to this interesting picture.

² J. Durand in Didron *Annales Archéologiques* Paris 1857 xvii. 124 f. with pl. The inscription runs: hic quem Creticus edit Dedalus est laberinthus, | de quo nullus vadere quivit qui fuit intus, | ni Theseus gratis Adriane (*sic*) stamine intus. The *façade* of the cathedral dates from 1204.

³ W. Meyer 'Ein Labyrinth mit Versen' in the *Sitzungsber. d. kais. bayr. Akad. d. Wiss. Phil.-hist. Classe* 1882 ii. 267—300 enumerates nine examples (*ib.* p. 283 ff. Chartres, Poitiers, St Quentin, Amiens 1288 A.D., Arras, St Omer, Sens, Reims c. 1300 A.D., Bayeux in *s. xiv*) and brings them into connexion with Labyrinths drawn in mediæval manuscripts. E. Krause *Die Trojaburgen Nordeuropas* Glogau 1893 p. 88 ff. ('Kirchen-Labyrinthe') figures four (Sens, St Omer, St Quentin, Bayeux) after E. Bosc *Dictionnaire raisonné d'Architecture* Paris 1879.

Chartres cathedral (fig. 350)¹. It measures 30 feet in diameter, and its winding path is 668 feet long. The centre was formerly adorned with a representation of Theseus and the Minotaur. Such a maze was called in the middle ages *domus Dedali* or *maison Dedalu* or even, as in the inscription at Amiens, *Maison de Dalus*. But new uses were found for the old design. Towards the close of the Crusades men who had broken vows of pilgrimage to the Holy Land did penance by treading these tortuous *chemins de Jerusalem* until they reached the central space, often termed *le ciel*. Later the same Labyrinths were used as a means of penance for sins of omission and commission in general.

In Great Britain mosaic mazes are exceptional and late², but turf-cut mazes fairly common and early³. They are mostly

Fig. 351.

situated close to a church or chapel, so that not impossibly they served a penitential purpose. One at Alkborough in Lincolnshire, 44 feet across, even resembles in design (fig. 351)⁴ the Labyrinth of Lucca cathedral. After the Reformation ecclesiastical mazes were converted into pleasure-grounds. Aubrey states that before

¹ E. Trollope *loc. cit.* p. 221 fig. 3 (from E. Wallet *Description d'une Crypte et d'un Pavé mosaïque de l'ancienne église de St. Bertin à Saint-Omer* Douai 1843 p. 97).

² *E.g.* there is one inside the west door of Ely cathedral; but it is of quite recent date (1870).

³ The best collection of facts is contained in a paper by the Rev. F. G. Walker on 'Comberton Maze and the origin of Mazes' (read before the Cambridge Antiquarian Society, February 8, 1909, but as yet unprinted). Mr Walker *op. cit.* p. 17 ff. notes the proximity of many English mazes to Roman remains and argues that some of them may have been originally cut in Roman times.

⁴ E. Trollope *loc. cit.* p. 224 f. fig. 5.

the civil wars there were many mazes in England, and that the young people used on festivals to dance upon them, or, as the term was, to tread them¹. Stukeley in 1724 writes:

'The lovers of antiquity, especially of the inferior class, always speak of 'em with great pleasure, and as if there were something extraordinary in the thing, tho' they cannot tell what.... what generally appears at present is no more than a circular work made of banks of earth in the fashion of a maze or labyrinth, and the boys to this day divert themselves with running in it one after another, which leads them by many windings quite thro' and back again².'

A century later T. Wright observes:

'At the maze (called there *mazles*) at Comberton, in Cambridgeshire, it has been a custom, from time immemorial, among the villagers, to hold a feast every three years about the time of Easter³.'

This maze, which has recently been restored by the Rev. F.G. Walker, was almost identical in type with one at Wing in Rutlandshire⁴. When transformed into the play-ground of the village school, it

Fig. 352.

was in danger of extinction; but I have repeatedly seen the school-children in single file tread the nearly obliterated windings. Antiquarians, monkish or otherwise, appear to have assumed the

² W. Stukeley *Itinerarium Curiosum* London 1724 p. 91 ff.

³ T. Wright *The History and Topography of the County of Essex* London 1835 ii. 124 n. The Rev. F. G. Walker *op. cit.* p. 20 says of the Comberton Maze: 'It used, in bygone days, to be recut every three years at Easter time, when the men who cut it had a feast.'

⁴ E. Trollope *loc. cit.* p. 232.

Roman lineage of these turf-mazes; for in England they are commonly called 'Troy-town' and in Wales *Caerdroia*, 'Troy-walls'.¹ Another name for them is 'Julian's Bowers,' or in northern dialect 'Jullinbores'.² Stukeley³ even proposed to connect this name with that of Iulus⁴!

Similar mazes are reported from various parts of northern Europe. In Norway and Sweden they are constructed of stones and known as *Trojin*, *Trojeborg*, *Trojenborg*, *Tröborg*.⁵ A maze some 18 metres wide at Wisby on the island of Gothland (fig. 352)⁶ is, as Dr E. Krause points out, curiously like the circular Labyrinth

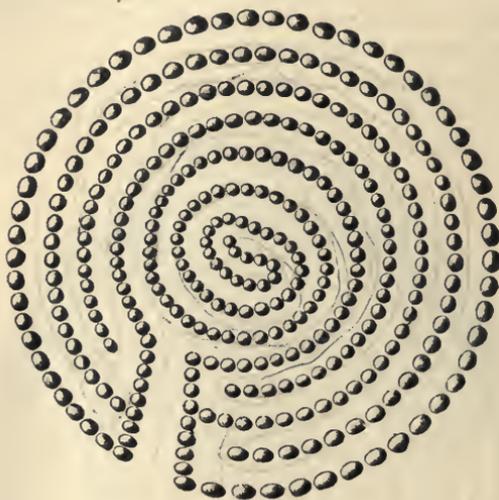

Fig. 353.

on a coin of Knossos (*supra* p. 477 fig. 343)⁷. In Finland and Lapland the same custom obtains, though here the name most in

¹ E. Trollope *loc. cit.* p. 222 ff. Welsh shepherds, in commemoration of their Trojan descent (!), used often to cut a labyrinthine figure called the *Caerdroia* on the turf, as the herdsmen upon the grassy plains of Burgh and Rockliff Marshes near the Solway Sands in Cumberland still cut a labyrinthine figure termed the 'Walls of Troy' (W. H. M. in *Notes and Queries* Second Series v. 211 ff.). In Scotland too the 'Walls of Troy' are popular with children, who trace them on the sea-sand or scribble them on their slates (E. Trollope *loc. cit.* p. 233).

² A. H. Allcroft *Earthwork of England* London 1908 p. 602 n. 2. On the variants 'Gelyan-bower,' 'Gillimber,' 'Jilling-bo'or,' 'Jul-Laber' see J. Wright *The English Dialect Dictionary* London 1902 iii. 389.

³ W. Stukeley *loc. cit.*

⁴ *Supra* p. 483.

⁵ On Hallands Väderö, an island in the Kattegat, a maze of stones is called *Trelleborg* (*i.e.* *Trolleborg*, the 'Giants' Castle').

⁶ E. Krause *Die Trojaburgen Nordeuropas* Glogau 1893 p. 4 fig. 1, p. 184 fig. 23.

⁷ It is, I suppose, possible that a Cnossian tetradrachm might find its way northwards along a trade-route (cp. the map in R. Forrer *Keltische Numismatik der Rhein- und Donaulande* Strassburg 1908 pl. 1) and so furnish the prototype of this design.

use is *Babylon*¹. I append an example about 12 ft across observed and drawn by E. von Baer in 1838, when he was weather-bound at Vier, a small uninhabited island in the Gulf of Finland (fig. 353)². Iceland too has analogous Labyrinths made of stones or earth, the native name for which is *Völundarhús*, 'Weland's House.'

It would seem then that in Great Britain, Scandinavia, the north-east of Russia, and Iceland rough mazes of unknown antiquity exist, which conform to the same general pattern as that of the Cretan Labyrinth. The first to grasp the full significance of this curious fact was Dr E. Krause. In a very noteworthy monograph devoted to the subject and in a subsequent appendix to the same³ he endeavoured to show that the maze of the countryside was no imitation of the classical Labyrinth, but that rather the classical Labyrinth was an imitation of it. Maze and Labyrinth alike were survivals of a remote past and were originally used for the purposes of a mimetic solar rite⁴. Pliny believed that the Cretan Labyrinth was a copy of the Egyptian, and contrasted the intricate handiwork

¹ Dr J. R. Aspelin of Helsingfors (quoted by E. Krause *op. cit.* p. 19) notes other names: 'In den Kirchspielen Kemi und Jio, unweit von Torneo, werden die Steinsetzungen *Jatulintarha* (Riesenhage) genannt, von Jio bis Alt-Karleby *Pietar-inleikki* (St. Peterspiel). Die schwedischen Bauern zwischen Alt-Karleby und Christianstadt nennen sie *Jungfrudans* (Jungferntanz). Zwischen Christianstadt und Abo werden sie *Nunnantarha* (Nonnenhage) genannt, in dem schwedischen Archipel von Abo und am Aland *Trojenborg* und *Rundborg*, in der schwedischen Gegend von Helsingfors wieder *Jungfrudans* und ausserdem Zerstörung Jerusalems, Stadt Ninive, Jericho u. s. w. Mehr östlich bis in die Gegend von Wiborg findet man die Benennungen *Jätinkatu* (Riesenstrasse), *Kivitarha* (Steinhage) und Lissabon.'

² E. Krause *op. cit.* p. 13 ff. fig. 2.

³ E. Krause *Die Trojaburgen Nordeuropas* Glogau 1893 pp. 1—300, *id. Die nordische Herkunft der Trojasage bezeugt durch den Krug von Tragliatella (Nachtrag zu den Trojaburgen Nordeuropas)* Glogau 1893 pp. 1—48.

⁴ Thus far at least we may frankly accept Dr Krause's results, without necessarily endorsing his conclusions as to the precise character of the rite involved. He holds that the original Labyrinth-dance represented the rescue of the sun-goddess from the castle of a wintry demon. Corresponding with this northern spring-rite was a northern spring-myth, in which the solar heroine (Freya, Brunhild, etc.) was freed from the prison of a superhuman builder or smith. Among Indians, Persians, and Southern Slavs the baleful power was a three-headed monster named *Druho*, *Druja* or *Draogha*, *Trojanu*. Dr Krause argues (*Die Trojaburgen Nordeuropas* pp. ix f., 109 ff., 277 ff., *Nachtrag* p. 41 ff.) that the whole story of the Trojan War presupposes this northern myth, with Helene for solar heroine. He thinks (*Die Trojaburgen Nordeuropas* p. 10 ff.) that the names of Troy-town, *Trojaburg*, etc., are not due to a diffused tradition of the Homeric Troy, but to the existence of a Germanic word *Troie*, 'fortress, doublet, dance' (root-meaning: 'Umwallung, Umhüllung, Umkreisung'). And he attempts (*ib.* p. 48 ff., *Nachtrag* p. 46 ff.) to connect the Labyrinth-design with the cup-marks and concentric circles of the neolithic age.

These speculations, which are set forth with much learning and ingenuity, are for the most part well worth weighing; but I confess that, with sundry notable exceptions, they impress me as being more plausible than convincing.

of Daidalos with the paltry representations of it to be seen in mosaic-floors 'or' (he added contemptuously) 'with the games of children in the country, which enclose a walk of several thousand paces within a narrow strip'.¹ How little he realised that the country maze was the original, of which Daidalos' masterpiece was but an artistic elaboration!

Another point to be noticed is this. In Italy and France, where ecclesiastical Labyrinths abound, no rustic mazes are now to be seen. Conversely in Great Britain, Scandinavia, Finland, Lapland, Iceland, where rustic mazes are numerous, no ecclesiastical Labyrinths occur. Hence we infer that in southern Europe the rustic maze was pressed into the service of the church, while in western and north-western Europe it remained as a relic of paganism.

Further, it can hardly be accidental that the distribution of mazes and Labyrinths corresponds so closely with that of the megalithic monuments of Europe². This suggests that the original maze-makers were akin to, or even identical with, the unknown builders of cromlechs, menhirs, and avenues.

In conclusion, it is clear that the Labyrinth, once the *orchestra* of a solar dance, has throughout mediaeval and modern times been subjected to a slow process of degradation. The final stage was reached, when the maze of the village-green was superseded by the 'Labyrinth,' the 'Dædal,' and the 'Wilderness'—topiary puzzles of a purely secular sort.

From Knossos to Hampton Court may be a far cry; but it will be admitted that in the chain connecting them hardly a link is missing.

xv. The Minotaur.

Our enquiries into Cretan religion have hitherto led us towards two conclusions. On the one hand, in Cretan myth the sun was conceived as a bull³. On the other hand, in Cretan ritual the Labyrinth was an *orchestra* of solar pattern presumably made for a mimetic dance⁴.

In view of these results it would seem highly probable that the

¹ Plin. *nat. hist.* 36. 85 hinc (*sc.* from the Egyptian Labyrinth) utique sumpsisse Daedalum exemplar eius labyrinthi, quem fecit in Creta, non est dubium, sed centesimam tantum portionem eius imitatum, quae itinerum ambages occursusque ac recursus inexplicabiles continet, non—ut in pavimentis *puerorumve ludicris campestribus videmus—brevis lacinia milia passuum plura ambulationis continentem*, sed crebris foribus inditis ad fallendos occursus redeundumque in errores eosdem.

² J. Fergusson *Rude Stone Monuments* London 1872 pl. 1 publishes a useful 'Map, designed to illustrate the distribution of Dolmens, and probable lines of the migrations of the Dolmen builders.'

³ *Supra* p. 467 ff.

⁴ *Supra* p. 472 ff.

dancer imitating the sun masqueraded in the Labyrinth as a bull. That, if I mistake not, is the true explanation of Pasiphae's child, the Minotaur. He was the crown-prince of Knossos in ritual attire, and his bull-mask proclaimed his solar character¹. Why the crown-prince rather than the king should have discharged this duty², and why every ninth year he required a tale of human victims³, are points for later consideration. Here I am concerned to note merely his probable relation to the sun and to the dance.

Dr J. G. Frazer⁴, after discussing the dance of the youths and maidens at Knossos in connexion with Labyrinths old and new, pens the following paragraph, with which I find myself largely in agreement⁵:

'A dance or game which has thus spread over Europe and survived in a fashion to modern times must have been very popular, and bearing in mind how often with the decay of old faiths the serious rites and pageants of grown people have degenerated into the sports of children, we may reasonably ask whether Ariadne's Dance or the Game of Troy may not have had its origin in religious ritual. The ancients connected it with Cnossus and the Minotaur. Now we have seen reason to hold, with many other scholars, that Cnossus was the seat of a great worship of the sun, and that the Minotaur was a representation or embodiment of the sun-god. May not, then, Ariadne's dance have been an imitation of the sun's course in the sky? and may not its intention have been, by means of sympathetic magic, to aid the great luminary to run his race on high? We have seen that during an eclipse of the sun the Chilcotin Indians walk in a circle, leaning on staves, apparently to assist the labouring orb. In Egypt also the king, who embodied the sun-god, seems to have solemnly walked round the walls of a temple for the sake of helping the sun on his way. If there is any truth in this conjecture, it would seem to follow that the sinuous lines of the Labyrinth which the dancers followed in their evolutions may have represented the ecliptic, the sun's apparent annual path in the sky. It is some confirmation of this view that on coins of Cnossus the sun or a star appears in

¹ In 1890 Miss J. E. Harrison wrote: 'It seems possible that the man-bull form of the Minotaur may have been suggested by the necessities of a mimetic dance, the part of Minotaur being taken by a man with a bull-head mask' (*Myth. Mon. Anc. Ath.* p. cxxvii). This view I supported and sought to strengthen in the *Journ. Hell. Stud.* 1894 xiv. 124 n. 247. In the *Class. Rev.* 1903 xvii. 410 f. I went further and conjectured that, since the Cretans conceived of the sun as a bull, Minos as sun-king wore a bull-mask, and that this ritual costume gave rise to the legend of the Minotaur. In *Folk-Lore* 1904 xv. 272 I shifted my ground and, for reasons which will subsequently appear, contended that the Minotaur was, not Minos himself, but Minos' son in the ritual disguise of the solar bull. See also G. Murray *The Rise of the Greek Epic*² Oxford 1911 pp. 156—158.

² *Folk-Lore* 1904 xv. 392 f.

³ *Class. Rev.* 1903 xvii. 411, *Folk-Lore* 1904 xv. 394 ff.

⁴ Frazer *Golden Bough*³: The Dying God p. 77, cp. *ib.*⁵ The Magic Art i. 312.

⁵ I had almost completed my own account of the Labyrinth before reading Dr Frazer's important and helpful chapter. We have approached the matter from different angles, he dealing with the octennial tenure of the kingship, I with the solar bull; but at this point our results approximate.

the middle of the Labyrinth, the place which on other coins is occupied by the Minotaur.'

From the concluding sentences of this paragraph I should dissent. The fact that the earliest known form of the Labyrinth is a derivative of the *swastika* leads us to believe that the dance represented the revolving sun rather than the ecliptic. But that the Minotaur, like the Chilcotin Indians walking in a circle and leaning on their staves, was engaged in a piece of mimetic ritual seems to me highly probable. I would interpret in this sense an unpublished *statér* of Knossos in the McClean collection at Cambridge (fig. 354). This interesting coin has for its reverse design a Labyrinth clearly based on the *swastika*-pattern, and for its obverse a Minotaur of unique type. He has a bull's head and tail; but from under his mask—for such it must be—hang two unmistakable tresses of human hair, and as he hastens along he leans upon a staff. A figure better adapted to express the solar dance it would be hard to imagine.

Such a dance doubtless served to promote the year's vegetation; and it has been argued with much probability by E. Neustadt¹ that the crown of Theseus or Ariadne was originally a flowery crown comparable with the May-garland. Bakchylides speaks of the

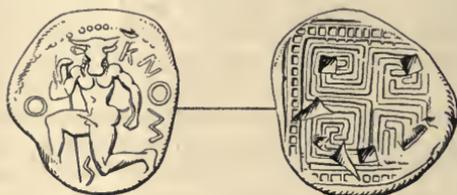

Fig. 354.

former as 'dark with roses²'; Timachidas, of the latter as made from the 'Theseus-flower³.' The wreath in question, whether his or hers, was transformed into a constellation at a later date when magic had yielded to science. Yet even then tradition did not forget that a shining crown of some sort was connected with the Labyrinth. According to Epimenides, Theseus after slaying the Minotaur escaped from the Labyrinth by virtue of a glittering crown, which Dionysos had given to Ariadne. This crown, formed by Hephaistos of fiery gold and Indian gems, made light for the hero in the dark maze: it was afterwards placed by Dionysos among the stars⁴.

Again, the Minotaur was also called *Astérios*¹ or *Asterion*², 'the Starry.' A red-figured *amphora* from Nola, now in the Vatican collection³, shows Theseus slaying him in the presence of Ariadne, who holds a crown, and Minos, who holds a sceptre: the Minotaur's body is bespangled with many stars, and in this some have seen an allusion to his name⁴. But that is improbable; for on other

⁴ *Supra* p. 481.

performances, but it is likely enough that their *motifs* were traditional. A black-figured *hydria* in the British Museum, on which are seen three Minotaurs running towards the right with arms akimbo (pl. xxx)¹, has possibly preserved a reminiscence of such dances. It is also noteworthy that a black-figured *lékythos* at Athens, which represents Theseus slaying the Minotaur in the presence of two females, gives the monster a bull's tail but a human head².

My notion that the Minotaur was a Cnossian prince masquerading as a bull receives no slight support from Diodoros³. After speaking of the Egyptian Labyrinth built by king Mendes or Marros and its Cretan copy made by Daidalos for Minos, the historian goes on to remark that five generations later there came to the throne of Egypt a certain Keten, identified by the Greeks with Proteus⁴, a contemporary of the Trojan War. This Keten was said to have been a shape-shifter, who took the form now of an animal, now of a tree, now again of fire or the like. The priests declared that he was enabled to do so by his knowledge of astrology, and that the practice having become traditional with Egyptian kings gave rise to Greek tales of shape-shifting. 'For,' continues Diodoros, 'it was customary with the rulers of Egypt to put about their heads the foreparts of lions, bulls, and snakes, as tokens of their rule. They had upon their heads now trees, now fire, and sometimes many fragrant odours; by which means they both arrayed themselves in fine style and struck superstitious terror into others.' The researches of Messieurs Maspero and Moret have proved that the Egyptian king and queen did actually figure as god and goddess in certain solemn rites, when masked men and women played the parts of animal-headed deities⁵. I suggest that the Cnossian prince did much the same.

xvi. ‘Minoan’ Bull-fights.

Few features of the ‘Minoan’ civilisation are more striking than its devotion to the bull-ring. Statuettes, reliefs, paintings, and seal-stones make it abundantly clear that toreadors, male and female, played an important part in the life of their people. The evidence, which comes to us from Crete, Mykenai, Tiryns, Vaphio, Orchomenos, Athens, etc., has been recently classified and discussed by A. Reichel¹. This careful investigator thinks that the sport originated in Crete, and distinguishes three stages in its evolution. Its earliest form was the capture of a bull by one or more unarmed men, who clung tenaciously to its horns². Out of this developed the favourite ‘Minoan’ display, an acrobatic performance calling for the utmost nerve and dexterity. It comprised various feats, of which the most popular was the following. The athlete rushed towards the charging bull, grasped it by the horns, turned a somersault over its head, and letting go with his hands was shot over its back into safety³. Many centuries later a less hazardous form of bull-baiting is found in the Thessalian *taurokathápsia*⁴. The toreador on horseback pursued the bull till it was exhausted, and

¹ A. Reichel ‘Die Stierspiele in der kretisch-mykenischen Cultur’ in the *Ath. Mitth.* 1909 xxxiv. 85—99 with figs. and pl.

² Two terra-cotta figures of the ‘Early Minoan’ period found by Xanthoudides at Koumasa near Gortyna (A. Mosso *The Palaces of Crete and Their Builders* London 1907 p. 219 fig. 99, A. Reichel *loc. cit.* p. 93 nos. 18 and 19 = fig. 11).

With these may be compared the capture of the big bull by a posse of men in Lanzone *Dizion. di Mitol. Egiz.* pl. 206.

³ A. Reichel *loc. cit.* pp. 85—88 nos. 1—6.

⁴ The literary and monumental evidence of the *ταυροκαθάψια* is collected by J. Baunack in the *Rhein. Mus.* 1883 xxxviii. 297 ff., M. Mayer in the *Jahrb. d. kais. deutsch. arch. Inst.* 1892 vii. 72—81 (cp. *Journ. Hell. Stud.* 1894 xiv. 127 ff.), M. N. Tod in the *Ath. Mitth.* 1904 xxix. 50—56, and É. Cahen in Daremberg—Saglio *Dict. Ant. v.* 50—52.

Fifth-century coins of Larissa have obv. a Thessalian youth, who grasps a plunging bull by the horns, and rev. a bridled and galloping horse (fig. 360 from a specimen in my collection, cp. Babelon *Monn. gr. rom.* ii. 1. 1013 ff. pl. 43, 8—12, *Brit. Mus. Cat. Coins*

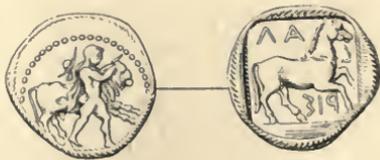

Fig. 360.

Thessaly etc. p. 25 ff. pls. 4, 12 f., 5, 1—4). Since a fourth-century drachm of the same town shows obv. a mounted Thessalian galloping, and rev. a bull in full flight (*Brit. Mus. Cat. Coins* Thessaly etc. p. 29 pl. 5, 13), it seems probable that on all these coins of Larissa we should combine the two types and recognise scenes from the *ταυροκαθάψια* (G. Macdonald *Coin Types* Glasgow 1905 p. 99 pl. 3, 10, *Head Hist. num.*² p. 298 f.). Similar scenes occur on coins of Krannon, the Perrhaiboi, Pharkadon, Pherai, Skoutoussa, and Trikke (see Babelon *op. cit.* ii. 1. 1021 f. pl. 43, 16; 1023 ff. pl. 43, 17—20; 1029 ff. pl. 43, 25; 1031 f. pl. 43, 29; *Brit. Mus. Cat. Coins* Thessaly etc. p. 16 pl. 2, 11 f.; p. 39 pl. 8, 7; p. 42 pl. 9, 1 f.; p. 46 pl. 10, 1—3; p. 51 f. pl. 11, 5—7 and 12).

then leaping upon it twisted its horns and broke its neck. Clearly the Thessalian sport, in which the hunter is mounted and the bull is killed, cannot be identified with the Cretan sport, in which the athlete is on foot and the bull is not killed. If the two are related at all, the one must be viewed as a modification of the other. The *taurokathápsia*, introduced into Italy by Iulius Caesar, appealed to the sensation-loving Romans, and ultimately gave rise to the bull-fights of Spain and France.

Reichel further suggests that in 'Minoan' times this bull-grappling had some religious significance; but he does not venture to determine the cult with which it was connected or the meaning that attached to it.

As to the *taurokathápsia*, it has been commonly—though not universally¹—regarded as a rite in the cult of Poseidon². But so far as Thessaly is concerned there is not a particle of evidence³, and in the case of other districts the attribution is at best conjectural⁴. Even if definite proof were forthcoming that in the Roman period this Thessalian sport was held to be an appanage of Poseidon, we could not with any assurance argue back from Thessaly to Crete across a gap of fifteen hundred years. It is surely safer to assume that the Cretan bull-sports stood in some relation to the Cretan bull-god, who at Knossos was represented by the

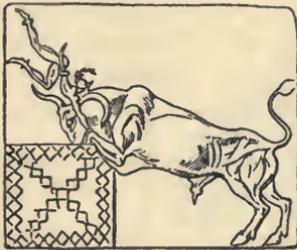

Fig. 361.

Minotaur. On this showing we might look to find the bull-grappling feat associated with the Labyrinth. In point of fact, we do so

¹ F. Bechtel in the *Nachr. d. kön. Gesellsch. d. Wiss. Göttingen Phil.-hist. Classe* 1890 p. 34 ff. views the *taurokathápsia* as a rite properly belonging to the cult of Zeus *Ἰολαίος*. F. Creuzer *Symbolik und Mythologie*³ Leipzig and Darmstadt 1842 iv. 326 referred it 'auf die solarischen und Cerealischen Religionen.'

In an inscription from Larissa (*Inscr. Gr. sept.* ii no. 528) a bull-fight takes place for Zeus *Ἐλευθέριος*; but É. Cahen justly remarks that it is only one item of an extensive programme (Daremberg—*Saglio Dict. Ant.* v. 52).

² Welcker *Gr. Götterl.* ii. 675, Preller—Robert *Gr. Myth.* i. 570 f., Farnell *Cults of Gk. States* iv. 25. Nilsson *Gr. Feste* p. 80: 'Es ist einleuchtend, dass die eventuelle Verbindung mit dem Kult des Stier-Poseidon erst sekundär sein kann; für diesen Gott passten sie aber vor anderen.'

³ Nilsson *Gr. Feste* p. 80 f. Farnell *Cults of Gk. States* iv. 25: 'We have the evidence of Artemidorus that the *ταυροκαθάψια*...was consecrated to the festival of Poseidon at Larissa,...at Eleusis,...and at Ephesos' is inexact, as a reference to the citation (*ib.* iv. 95) of Artemid. *oneir.* i. 8 will show. Artemidoros does not mention Poseidon at all.

Note, however, that on the coins of Krannon mentioned *supra* p. 497 n. 4 the fore-part of the horse or the butting bull is accompanied by a trident.

⁴ Nilsson *loc. cit.*, P. Stengel *Opferbräuche der Griechen* Leipzig and Berlin 1910 p. 108.

find it. A banded agate in Sir Arthur Evans' collection (fig. 361)¹ represents an athlete in the act of turning his somersault over the horns of a mighty bull, which partly conceals and partly is concealed by a patterned square. This square bears to the whole design the same relation as the patterned oblong to the slaughter of the Minotaur on the vases already discussed (figs. 329—331). In short, it depicts the Labyrinth as the scene of the action².

The essential feature of the ‘Minoan’ sport appears to have been the grasping of the bull's horn or horns. Now the same trait is found in the oldest art-types of one Thessalian and three Cretan myths, that of Jason grappling the Colchian bulls³, that of Herakles capturing the Cretan bull⁴, that of Theseus slaying the Minotaur (cp. figs. 329, 330)⁵, and that of Europe borne off by the bovine Zeus (cp. pl. xxxii, fig. 411)⁶. It is perhaps permissible to suggest that behind these art-types lurks a traditional pose of the bull-grasper. Jason and Herakles seizing the bull by the horn or twisting a rope about its hind legs vividly recall the bull-captors of the Vaphio cups. Theseus gripping the Minotaur by the horn or locked with him in a deadly wrestling-bout is a figure curiously reminiscent of the ‘Minoan’ cow-boy. Europe, who on the later monuments slips off the bull's back and hovers or floats beside him still clinging to his horn (cp. fig. 414), in effect reverts to the airy performance of the ‘Minoan’ cow-girl. Such resemblances may of course be fortuitous; but, given the Thessalian and Cretan connexion, they may be vestigial.

In any case it seems probable that the religious value of the original bull-sports lay in the athlete's contact with the horn of a sacred bull. A clue to the meaning of such contact is,

¹ Furtwängler *Ant. Gemmen* i pl. 6, 9, ii. 26 figured to a scale of $\frac{2}{3}$, A. Reichel *loc. cit.* p. 87 f. fig. 4. Reichel points out that Furtwängler erroneously described the man as about to cut the throat of the bull. But Reichel himself apparently shares Furtwängler's view that the bull is drinking out of a big trough!

² It may be objected that the Labyrinth at Knossos was ill-adapted for a bull-ring (*Ann. Brit. Sch. Ath.* 1902—1903 ix. 110). But Sir Arthur Evans' intaglio is said to have come from Priene, where we have already found the Labyrinth-pattern occurring as a coin-type (*supra* p. 483). Possibly the allusion is to some Labyrinth other than that of Knossos.

³ K. Seeliger in Roscher *Lex. Myth.* ii. 79 ff., H. Heydemann *Jason in Kolchis (Winkelmanns-fest-Progr. Halle 1886)*.

⁴ A. Furtwängler in Roscher *Lex. Myth.* i. 2201. Cp. Theseus and the Marathonian bull on a red-figured *kylix* (*Brit. Mus. Cat. Vases* iii. 123 no. E 105), which shows the hero holding a club in his right hand and grasping the bull's horn with his left.

⁵ A. Furtwängler in the *Arch. Zeit.* 1884 xlii. 106 ff. pl. 8, 3 (= *Kleine Schriften* München 1912 i. 463 f. pl. 15, 3), Roscher *Lex. Myth.* ii. 3007 fig. 2.

⁶ J. Escher-Bürkli in Pauly—Wissowa *Real-Enc.* vi. 1296 f. Literary references to Europe as holding the horn are collected by L. Stephani in the *Compte-rendu St. Pétr.* 1866 p. 124 n. 11.

I think, afforded by a lenticular sardonix found at Orvieto (fig. 362)¹, which represents a man grasping by the horn a couple of bulls or bull-like figures.

Fig. 362.

The vessels carried in the hands of these quasi-bulls and the trees (palms?) between which they are standing justify the conjecture that they are engaged in some fertility-rite. The bull—let us suppose—is a beast pre-eminently charged with fertilising force². Its force is gathered up and culminates in its horn³, bovine horns being sometimes a synonym of strength⁴. Any one who grasps the bull's

horn *ipso facto* obtains a share in its peculiar power.

At Laussel near Marquay (Dordogne) Dr Lalanne has recently discovered what we may venture to regard as a prehistoric prototype of such rites⁵. On limestone blocks inside a rock-shelter a man of slender waist and three steatopygous women are carved with all the marvellous realism of palaeolithic art⁶. The man is an archer in the act of drawing his bow. Of the women one places her left hand on the lower portion of her body and holds a bison's horn in her right (fig. 363). This may of course be a graphic hint of the eating and drinking that resulted from a successful chase. But it is highly probable that the use of a drinking-horn presupposes the magical efficacy of the horn as such⁷. And it is at least possible that we have here part of the cave-dwellers' ritual—the right hand raised to grasp the fertilising horn, the left lowered in a gesture familiar to us from representations of the oriental mother-goddess.

This explanation throws light on sundry other obscure points in Cretan mythology and ritual. To begin with, Monsieur R. Dussaud rightly insists that the bull was not the only animal

¹ *Journ. Hell. Stud.* 1894 xiv. 120 fig. 14 after O. Rossbach in the *Ann. d. Inst.* 1885 lvii. 195 ff. pl. G-H, 8.

⁵ G. Lalanne in *L'Anthropologie* 1912 xxiii. 129 ff. figs. 1 ff., *The Illustrated London News* July 13, 1912 cxli. 56 with 3 figs., H. G. Spearing *The Childhood of Art* London 1912 p. 505 f. I am indebted to Miss Harrison for calling my attention to this interesting discovery and for suggesting that it may furnish a prototype of the rites in question.

⁶ The figures are c. 18 inches high, and the relief c. 2 inches deep. That of the woman here shown is polished, except the head, and there are traces of red paint.

⁷ See the facts collected by I. Scheffelowitz in the *Archiv f. Rel.* 1912 xv. 483 ff.

used in these ceremonial games¹. ‘Minoan’ seal-stones show gymnasts treating the *agrimi* or Cretan wild-goat in the self-same manner²; and Sir Arthur Evans has suggested ‘that this animal was sacred to the indigenous “Zeus” at an earlier period than the bull³.’ If goat and bull were thus alternatives, the fertilising force which resided in the horn of the latter should be found in the horn of the former also. And it is. Few symbols of ancient religion have lasted longer or been more widely accepted than the horn of Amaltheia, the *cornu copiae* from which all good things flow. This is usually described in literature as the horn of the goat, which

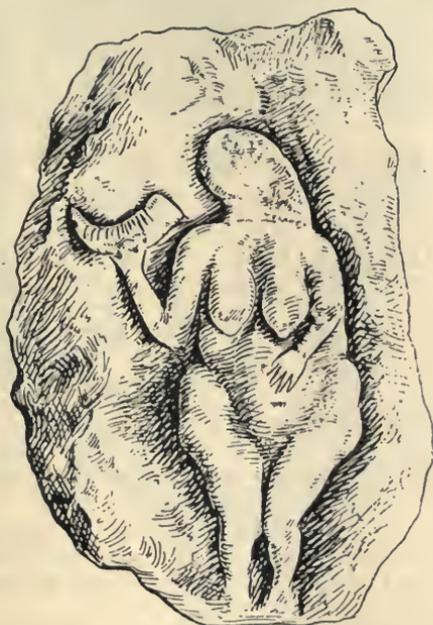

Fig. 363.

nourished Zeus as an infant in Crete, Amaltheia being either the nymph owning the goat or the goat itself⁴. But in art, as Philemon remarks, it is ‘a cow’s horn⁵.’ Of countless illustrations I figure (pl. xxxi) one—an Athenian bell-*kratér* in the Hope collection at Deepdene⁶, which represents Herakles in Olympos feasting on the

⁵ Philem. *pterygium frag.* 1, 1 f. (*Frag. com. Gr.* iv. 20 Meineke) τὸ τῆς Ἀμαλθείας δοκεῖς εἶναι κέρας | ὅλον γράφουσιν οἱ γραφεῖς κέρας βοός;

⁶ The vase will be included in the forthcoming *Catalogue* by my friend Mr E. M. W. Tillyard, to whose kindness I am indebted for the photograph here redrawn. Previous

dainties contained in the *cornu copiae* of Zeus. Pherekydes, the earliest writer to give us an explicit account of this horn, says :

'Amaltheia was a daughter of Haimonios and had a bull's horn. This had the power of providing whatever one liked to eat or drink without stint or effort¹.'

The name Haimonios takes us to Thessaly², where the 'Minoan' bull-sports were modified into the *taurokathapsia*. If my explanation is sound, the said sports from first to last were designed to promote fertility by bringing the youthful gymnasts into direct contact with the horns of the fertilising bull³.

The same religious idea finds expression in the cult of Dionysos. This deity at an early stage of his development was identified with both bull⁴ and goat⁵, and, even when he had become fully anthropomorphic, he was apt to maintain a close connexion with the sacred animal⁶. Thus on coins of Mauretania struck at Siga by Bocchus iii (50 ?—33 B.C.) we see Dionysos with a *thyrsos* in his right hand and a bunch of grapes beside it : he is holding by one horn a diminutive bull (fig. 364)⁷. Here and there his worshippers put themselves

Fig. 364.

publications (Tischbein *Hamilton Vases* iv pl. 25, A. L. Millin *Galerie mythologique* Paris 1811 pl. 125, 467, Reinach *Rép. Vases* ii, 327, 2) are inadequate. Behind the throne of Zeus stands Hera (Reinach *loc. cit.* suggests 'Hébé (?)': Welcker *Alt. Denkm.* iii. 305 f. had thought of Persephone behind a seated Plouton).

With the whole scene cp. a *kálpis* from Ruvo at Naples (Heydemann *Vasensamml. Neapel* p. 280 f. no. 2408, A. Michaelis in the *Ann. d. Inst.* 1869 p. 201 ff. pl. GH, Reinach *op. cit.* i. 323, 1), which shows Herakles holding the *cornu copiae* and seated before a standing Zeus (Michaelis *loc. cit.* suggests Plouton?).

¹ Pherekyd. *frag.* 37 (*Frag. hist. Gr.* i. 82 Müller) *ap. schol. Soph. Trach.* arg. 'Αμάλθεια ἦν Αἰμονίου θυγάτηρ· ἡ κέρασ εἶχε ταύρου. τοῦτο δέ, ὡς Φερεκίδης φησί, δύναμιν εἶχε τοιαύτην ὥστε βρωτὸν ἢ ποτὸν ὅπερ ἂν εἴποιτο τις παρέχειν ἀφθονόν τε καὶ ἅπασαν after Apollod. 2. 7. 5 (see Jebb's ed. of *Soph. Trach.* p. 3).

A later version made the horn of plenty that which Herakles broke off from the tauriform Acheloius (Ov. *met.* 9. 85 ff., Hyg. *fab.* 31, Philostr. *min. imagg.* 4. 3). Various harmonists stated that Acheloius' horn was the horn of Amaltheia (Diod. 4. 35, Strab. 458, Dion. Chrys. *or.* 63 p. 327 Reiske), or that Acheloius had presented Herakles with Amaltheia's horn as ransom for his own (Zenob. 2. 48, schol. *Il.* 21. 194, Tzetz. *in Lyk. Al.* 50).

² O. Kern in Pauly—Wissowa *Real-Enc.* vii. 2220, Gruppe *Gr. Myth. Rel.* p. 341 n. 3.

³ For the transference of quality from the horns to that which touches them cp. the belief that seed-corn, if it fell on the horns of ploughing oxen, would produce hard (*i.e.* horny) grain (Theophr. *de caus. plant.* 4. 12, 13, Plout. *symp.* 7. 2. 1, *Geopon.* 2. 19. 4).

⁴ Gruppe *Gr. Myth. Rel.* p. 1425 n. 4 collects the evidence and adds a brief bibliography. See also Farnell *Cults of Gk. States* v. 126.

⁵ Gruppe *op. cit.* pp. 822 n. 3 ff., 1428 n. 9 ff., Farnell *op. cit.* v. 127, 165 f.

⁶ Mithras in the great Mithraic myth rides the bull, grasping it by the horns, to which he clings even when thrown off the creature's back (F. Cumont *Textes et monuments figurés relatifs aux mystères de Mithra* Bruxelles 1896 i. 169 f., 305, *id.* *Die Mysterien des Mithra*² trans. G. Gehrich Leipzig 1911 p. 120 f. pl. 3, 6).

Bell-*krater* at Deepdene: Herakles in Olympos taking fruit from the *cornu copiae* of Zeus.

See page 501 f.

in contact with the bull by methods resembling those of the ‘Minoan’ athletes. Of Kynaitha in Arkadia Pausanias writes :

‘There is here a sanctuary of Dionysos, and in winter a festival is held, at which men anoint themselves with oil, pick out a bull from a herd of cattle—whichever bull the god puts it into their head to take,—lift it up and carry it to the sanctuary. Such is their mode of sacrifice!’

Again, near Nysa in Lydia was a village called Acharaka, which had a grove and temple of Plouton and Kore. Above the grove was Charon’s Cave, where cures were wrought by incubation etc.² The god is represented on imperial copper coins as Zeus *Ploutodótes* (fig. 365)³, ‘Giver of Wealth’⁴; and it will be observed that this title, of which *Plouton*⁵ is but a shorter

Fig. 365.

fig. 9, Head *Hist. num.*² p. 888. The obverse of this coin has a bearded male head, which, according to Müller, represents a personification of the people. Perhaps we may conclude that Dionysos and his bull were vitally connected with the full-grown manhood of the people as a whole.

Dionysos holds up a spirally twisted horn, probably meant for a *cornu copiae*, on a black-figured *pinax* from Marathon (*Ath. Mith.* 1882 vii. 400 pl. 3f., Farnell *op. cit.* v. 245 pl. 35), with which cp. a black-figured *kylix* by Nikosthenes (*Arch. Zeit.* 1885 xliiii. 251 pl. 16, 1 f., Reinach *Rép. Vases* i. 462, 1 f.: Dionysos seated to right holding horn with dancing Maenad and Silenos on either hand), a black-figured *psyktér* at Deepdene (Dionysos seated to right holding horn between two dancing Maenads), and another black-figured vase formerly in the Hamilton collection (*Tischbein Hamilton Vases* v pl. 22, Reinach *Rép. Vases* ii. 340, 1): see further L. Stephani in the *Compte-rendu St. Pl.* 1867 p. 180 f. Coins of Nysa in Lydia show a *cornu copiae* filled with corn-ears, poppy, and grape-bunches: a child, seated on it, raises one of the bunches and is commonly regarded as Dionysos (F. Imhoof-Blumer *Lydische Stadtmünzen* Geneva and Leipzig 1897 p. 108 f., Head *Hist. num.*¹ p. 552; but in *Brit. Mus. Cat. Coins* Lydia p. 179 pl. 20, 8 Dr B. V. Head identifies the child as Ploutos).

¹ Paus. 8. 19. 2. P. Stengel *Opferbräuche der Griechen* Leipzig and Berlin 1910 p. 108 f. compares this lifting of the live bull *en route* for sacrifice with the exploit of Biton (Paus. 2. 19. 5, *supra* p. 448) and the order of Menelaos (*Eur. Hel.* 1559 ff.), but distinguishes it from the raising of oxen already struck that their blood might flow over the altar etc. (*ἀρροσθαί τοὺς βοῦς*): the former was an exceptional, the latter a normal usage.

² Strab. 649, cp. 579, Eustath. *in Dionys. per.* 1153. A. Bouché-Leclercq *Histoire de la divination dans l'antiquité* Paris 1880 ii. 373 n. 1: ‘Arundell et Pococke ont retrouvé le souvenir vague d’une grotte insondable et quelques vestiges de l’oracle près d’Akkeuy ou Akchay, nom dans lequel on reconnaît encore celui d’Acharaka.’

³ Imhoof-Blumer *Kleinas. Münzen* i. 178 no. 2 pl. 6, 9 (Domitian), *Brit. Mus. Cat. Coins* Lydia pp. lxxxiii, 175 pl. 20, 1 (Nero), Head *Hist. num.*² p. 654: ΠΛΟΥΤΟ-ΔΟΤΗΣ ΝΥΧΑΕΩΝ.

⁴ Other examples of the title are collected by O. Höfer in Roscher *Lex. Myth.* iii. 2567 f. Cp. also Men Πλουτοδότης (*Bull. Corr. Hell.* 1899 xxiii. 389 pl 1) and Apollon πλουτοδοτήρ (*Anth. Pal.* 9. 525. 17).

⁵ Cp. Loukian. *Τίμων* 21 ὁ Πλούτων... ἅτε πλουτοδότης καὶ μεγαλόδωρος καὶ αὐτὸς ὦν· δηλοῖ γούνη καὶ τῷ ὀνόματι, Orph. *h. Plout.* 18. 4 f. Πλούτων... | πλουτοδοτῶν γενεὴν βροτέην καρποῖς ἐνιαυτῶν.

equivalent¹, was common to Zeus² and to Dionysos³. Strabon ends his account of the cult as follows:

'A yearly festival is held at Acharaka...on which occasion about the hour of noon the young men from the gymnasium, stripped and anointed with oil, take up a bull and carry it with speed to the Cave. When they let it go, it advances a little way, falls over, and dies⁴.'

This strange procession is illustrated (fig. 366)⁵ by a copper coin of Nysa struck by Maximus. Six naked youths carry on their shoulders a humped bull of gigantic size. In front of them marches a naked flute-player, who (so far as I can judge from a careful inspection of the original) is linked to the bull's horn by means of a wavy line perhaps representing a fillet. Thus all who took part in the rite were brought into immediate contact with the sacred animal.

Fig. 366.

The festival (*panegyris*) was doubtless shared by other cities in the valley of the Maiandros⁶. I am therefore inclined to surmise that a second illustration of it is to be found on a copper of Magnesia struck under Caracalla (fig. 367)⁷. A young man is seen holding by the halter a humped bull, which goes before him but collapses at the entrance of a cavern. These two remarkable coin-types in fact give the beginning and the end of the procession described by Strabon.

Fig. 367.

Somewhat similar to the Arcadian and Lydian rites is the scene depicted on a red-figured vase formerly in the Hamilton

¹ Gruppe *Gr. Myth. Rel.* p. 1066 n. 15.

In art Plouton often bears the *cornu copiae*: see C. Scherer in Roscher *Lex. Myth.* i. 1787, 1800 ff., Farnell *Cults of Grk. States* iii. 286 pl. 32, a.

² Orph. *h. daem.* 73. 3 f. *Ζῆνα μέγαν...* | *πλουτοδότην*, Loukian. *Cronosol.* 14 *Διῖ Πλουτοδότη κ.τ.λ.* See O. Höfer in the *Jahrb. f. Philol. u. Pädag.* 1894 cxlix. 262 and in Roscher *Lex. Myth.* ii. 1579, iii. 2567, who notes that Nysa was a colony of Sparta (Strab. 650), where there was a temple of Zeus *Πλοῦσιος* (Paus. 3. 19. 7).

³ *Carm. pop.* 4. 2 Hiller *Σεμελί' Ἰαχκε πλουτοδότα.*

⁴ Strab. 650.

⁵ *Brit. Mus. Cat. Coins Lydia* pp. lxxxiii, 181 pl. 20, 10, *Head Hist. num.*² p. 654.

⁶ So Dr B. V. *Head in Brit. Mus. Cat. Coins Lydia* p. lxxxiii.

⁷ *Brit. Mus. Cat. Coins Ionia* p. 166 pl. 19, 10. *Head Hist. num.*² p. 583 describes the type as 'Herdsman (Eurytion?) driving bull into cavern'—a very improbable suggestion.

collection (fig. 368)¹. Three young athletes, having deposited their clothing on a pillar in the gymnasium, are about to hoist the bull

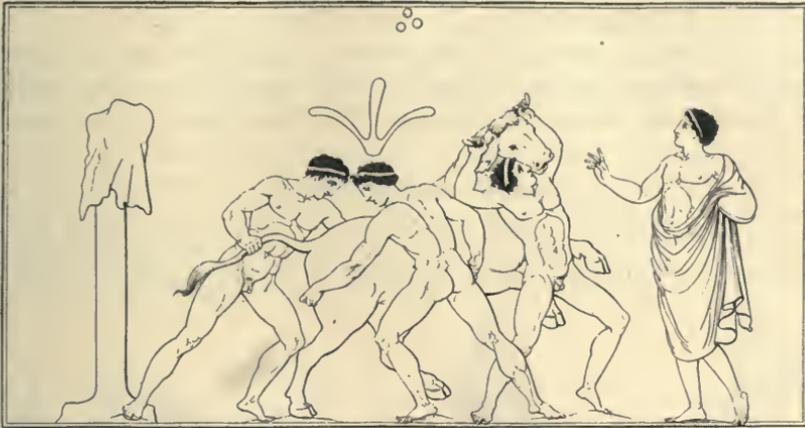

Fig. 368.

on to their backs in the presence of an official. We cannot of course determine either the locality or the cult; but the Greeks

Fig. 369.

¹ Tischbein *Hamilton Vases* ii. 18 ff. pl. 3, Inghirami *Vas. fitt.* i. 49 pl. 24, Lenormant — de Witte *Él. mon. chr.* iii. 187 pl. 69, Reinach *Rép. Vases* ii. 293, 4.

would probably have called the men *keratesséis* or *keraelkéis*¹. They are in any case the successors of the 'Minoan' bull-grapplers.

I end with an amusing, if not instructive, example of type-fusion. A red-figured vase at Saint Petersburg (fig. 369)² shows not only Europe on the bull escorted by two Erotes, but also three *kôuroi*—perhaps we should say *kourêtes*,—who with unmistakable gestures beckon her on towards their home in Crete.

xvii. Ritual Horns.

Sir Arthur Evans in his pioneer-work (1901) on the 'Mycenaean Tree and Pillar Cult'³ was the first to discuss comprehensively

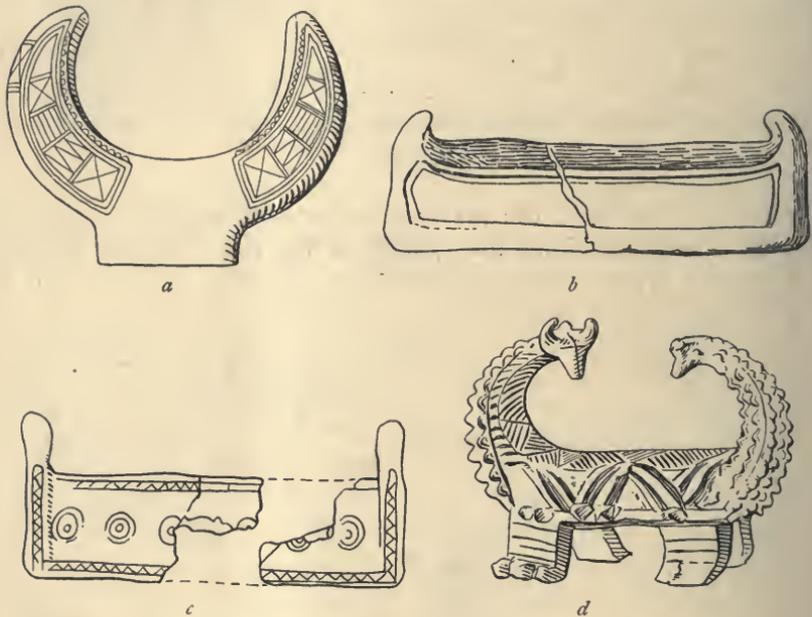

Fig. 370.

the ritual horns, which in 'Minoan' cult-scenes are set in various positions of importance—at the foot of a sacred tree, on the top of an altar, as the socket of a double axe, at the base of a column, along a precinct-wall, etc. He regarded them as 'a more or less

³ A. J. Evans in the *Journ. Hell. Stud.* 1901 xxi. 135 ff.

conventionalised article of ritual furniture derived from the actual horns of the sacrificial oxen' and strictly comparable with the Semitic 'horns of the altar'.

During the last decade other archaeologists have accepted and extended this comparison. R. Paribeni, for instance, has proved (1904) that the 'Minoan' horns present a striking analogy to the terra-cotta or stone crescents (*Mondsichel, Mondbilder, croissants*) of the late bronze age and early iron age found in the pile-dwellings of Switzerland, Savoy, Lower Austria, Hungary, and Italy². These vary in shape according to their antiquity. At first they have a heavy altar-like base; but in process of time they develop four feet and then tend to become theriomorphic, the tips of the horns

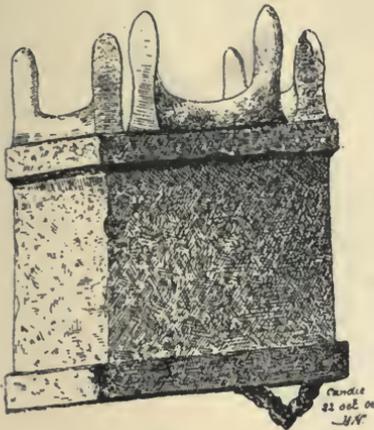

Fig. 371.

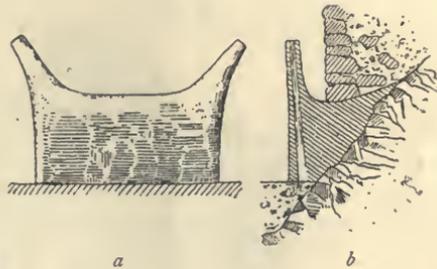

Fig. 372.

being themselves decorated with the heads of horned beasts—bulls, rams, and stags (figs. 370, *a—d*)³.

Recently (1910) Monsieur J. Déchelette has further compared

Mackay *The Labyrinth Gerzeh and Mazghuneh* London 1912 p. 23 pl. 7, 13 publish a black pottery cow's horn tipped with a cow's head from a pre-dynastic grave at *El Gerzeh*.

the Cretan type of horned altar (fig. 371)¹ with one found at Oficio near Almeria in the south of Spain. Here Monsieur L. Siret in a deposit dating from the beginning of the bronze age came upon an altar-shaped structure of earth built against a wall and surmounted by ritual horns (fig. 372, *a*, *b*)².

It appears, then, that ritual horns were used at an early date, not only in Crete, but also in various countries to the east, north, and west of the Mediterranean basin. If, however, we would ascertain the original significance of the custom, we must, I think, turn our attention towards the south; for here only can we hope to

Fig. 373.

find outlying regions that have not been repeatedly swept by the ebb and flow of advanced civilisations.

My brother Dr A. R. Cook, on returning from a visit (1905—1906) to the Dinka tribes of the White Nile, informed me that the boys there make small models of cows out of mud. He brought back a specimen (fig. 373), which though only three inches in length shows well the humped back, large horns, and slit ears characteristic of the native cattle. He also reported that outside the hut of every chief is a big heap of mud roughly shaped like a bull and known

¹ M. J. Lagrange *La Crète ancienne* Paris 1908 p. 83 fig. 62 (about $\frac{1}{3}$) a votive altar in red baked clay with horns painted white and remains of a metal tenon beneath, found at Knossos in the treasury of the serpent-goddess and now preserved in the Museum at Kandia.

² J. Déchelette *op. cit.* ii. 1. 80 f. fig. 25.

as such. These heaps have a pair of bullock's horns stuck into them and a cattle rope attached to them. I figure one that my brother photographed at Sheik Agoit's, not far from Bor, which has bullock's horns at one end, goat's horns at the other, and consequently a pair of ropes (fig. 374).

Fig. 374.

Dr C. G. Seligmann in letters dated March 15 and March 22, 1911, very kindly supplies me with further information about these singular structures and allows me to publish two examples that he photographed in the Tain villages near Bor (figs. 375, 376). The

Fig. 375.

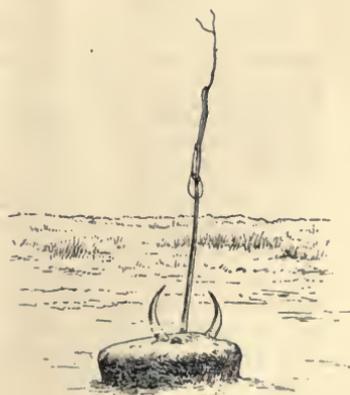

Fig. 376.

erection is, he says, a form of shrine known as *bñor* made for the spirit (*atiep*) of an ancestor to inhabit. I quote from Dr Seligmann's note-book¹:

¹ See now his article in J. Hastings *Encyclopædia of Religion and Ethics* Edinburgh 1911 iv. 710.

'Several generations ago one Nyet founded a village which, as is usual with the Dinka, is called after him; his companions, who were for the most part his relatives and descendants, used his name as their clan name, *i.e.* they call themselves *golonyet*, "(men of the) Clan Nyet." At the present day men of this clan inhabit the villages of Arck and Meden. Der the late head of Arck village moved to this site some forty years ago soon after the death of Anet, who with his followers lived near the Alliab boundary at a place called Unedol.

Directly the houses were built Der erected a shrine for the *atiep* of Anet to live in "just as a house"; for the spirit knows of the wanderings of its people and moves with them. This was done at the instance of a *tiet*, who said that, if this were not done, Der and his children would sicken and perhaps die. The shrine itself consists of a mound of mud at one end of which are fixed the horns of a bullock. In front of this end of the mound there is one of the pickets to which cattle are commonly tethered*. [*In shape the whole thing presents a certain resemblance to a bullock sunk in the earth so that only its back projects; but I could not learn that this resemblance was intentional, though a Dinka whom I met at Omdurman, where he had lived for a long time, told me that in his country mud representations of cattle were erected over the graves of powerful men.] The bullock providing the horns was sacrificed by Der who explained aloud that he was making a place for the *atiep* of his father Anet. The bullock was killed by plunging a spear into its heart.

Concerning this sacrifice Mr Shaw states that the eldest son should give the first thrust and that altogether five thrusts are given by the sons. If there be only one son of the dead man, paternal first cousins would give the additional thrusts. As the bullock lies moribund on the ground, its throat is cut and the blood collected in a pot, cooked over the fire, poured into gourds and eaten by the clansmen among whom the meat is distributed. Small pieces of all the organs and parts of the animal are reserved and scattered on the ground for the spirits of the dead.

At every new moon some *dura*¹, a few drops of new milk, and a little butter are placed upon the shrine at sunset. The shrine is repaired whenever necessary without sacrifice or any ceremony.

Shrines of this kind (*büor*) are found in all the Tain and at least in some of the Bor villages; but usually these do not resemble the back of a bullock, the mud being built into a more or less circular mound flattened above. A stick or young sapling 6 or 8 feet tall is thrust into the ground near the horns and a cattle rope is hung to this. Among the Tain Dinka the sons of a dead man will procure a bullock and build a *büor* whenever possible; the widow makes the mud mound, and into this the sons stick the horns of the bullock. This is done not only to propitiate the spirit of the deceased, but, as Mr Shaw informs me, as a resting-place for his spirit (*atiep*); and in one case he has seen a mat spread over the *büor* during the heat of the day in order to provide shade for the *atiep*.

The evidence here cited points to the following conclusion. Among the Dinka a shrine originally representing a mud bullock and viewed as the abode of a paternal spirit has developed into a horned altar, on which food etc. is placed. I suggest that a similar evolution lies behind the use of horned altars in the Mediterranean

¹ [*Dhurra*, 'millet.' A.R.C.]

area. Of course in classical times, though the term 'horned altar' survived¹, its origin had been long forgotten. The object itself had commonly passed into alien and almost unrecognisable forms.

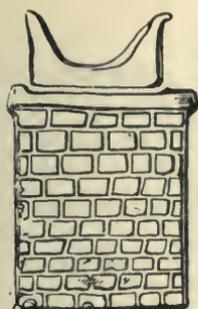

Fig. 377.

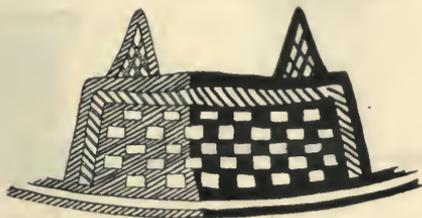

Fig. 378.

Fig. 379.

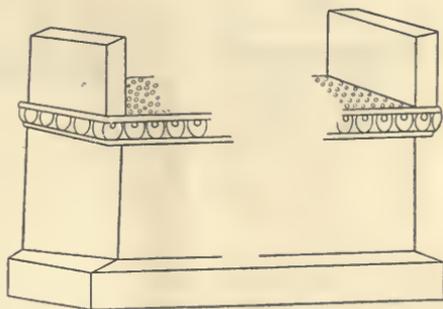

Fig. 380.

Thus the ritual horns of 'Minoan' art (fig. 377)² were stylised into mere cones by the 'Dipylon' painter (fig. 378)³ and finally

¹ *Anth. Pal.* 6. 10. 3 (Antipatros on an altar dedicated to Athena by Seleukos) βωμόν τοι κεραούχον ἐδέματο τόνδε Σέλευκος. There may be a special point in the epithet κεραούχον; for Seleukos himself was horned, cp. Appian. *Syr.* 57 καὶ τὸ σῶμα ὄντι ἐνρώστω τε καὶ μεγάλῳ καὶ ταύρον ἀγριον ἐν Ἀλεξάνδρον θυσία ποτὲ ἐκθορόντα τῶν δεσμῶν ὑποστάντι μόνῳ καὶ ταῖς χερσὶ μόναις κατευργασμένῳ προστιθέασιν ἐς τοὺς ἀνδριάντας ἐπὶ τᾶδε κέρατα. Coins give him the horn of a bull (*Brit. Mus. Cat. Coins Seleucid Kings of Syria* p. 3 pl. 1, 6, *Hunter Cat. Coins* iii. 11 pl. 63, 20), or add the horn and ear of a bull to his helmet (*Brit. Mus. Cat. Coins Seleucid Kings of Syria* p. 4 pl. 1, 11 ff.), or even make his horses and elephants horned (*ib.* p. 3 ff. pl. 1, 6 ff., *Head Hist. num.*² p. 756 ff.). E. Saglio in Daremberg—Saglio *Dict. Ant.* i. 351 n. 65 cites also Nonn. *Dion.* 44. 97 ff. εὐκέρῳ παρὰ βωμῷ | θῆλιν ὄν κερδεντι συνέμπορον ἄρσενι ταύρω, | ἦχι Διὸς πέλεν ἄλσος ὀρειάδος ἐμπλεον ὕλης, | Ζηνὶ καὶ Ἀδρυάδεσσι μιαν ξύνωσε θηλήν | Κάδμος Ἀγηρορίδης. Cp. the *Thes. Ling. Lat.* iv. 971, 7 ff.

² Part of relief on a steatite *pyxis* from Knossos (A. J. Evans in the *Journ. Hell. Stud.* 1901 xxi. 101 ff. fig. 2).

³ Detail of 'Dipylon' vase from the site of the Kynosarges gymnasium at Athens (J. P. Droop in the *Ann. Brit. Sch. Ath.* 1905—1906 xii. 81 ff. fig. 2 b). Mr Droop

transformed into spit-rests (*kratentaí*)¹, andirons, or altar-fenders by successive generations of practical folk (figs. 379², 380³).

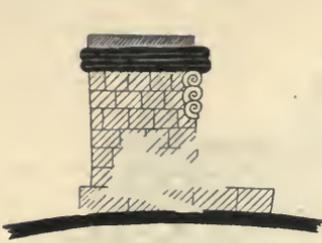

Fig. 381.

Fig. 386.

writes: 'The temptation is strong to see in the table and triangle a horned altar, but the hatched triangle is frequently used to fill vacant spaces, and appears for that purpose on this very vase, while the band of chequers lower down, makes it doubtful if the table had any more significance.' Miss Harrison *Themis* p. 76 ff. fig. 10 b has, however, gone far towards proving that the scene represented two rain-makers working their rattles before a sacred shield placed on an altar. If so, the interpretation of the triangles as horns becomes highly probable.

¹ Terra-cotta spit-rests from Thessaly of neolithic date have been described and figured by Ch. Tsountas *Αἱ προϊστορικὰ ἀκροπόλεις Διμηλίου καὶ Σέσκλου* Athens 1908 p. 222 ff. fig. 120 f. pl. 30, 1, 2; p. 345 f. figs. 276 f., A. J. B. Wace—M. S. Thompson *Prehistoric Thessaly* Cambridge 1912 p. 43 fig. 19; pp. 60 f., 73; p. 85. For bronze examples of the Hallstatt period, decorated with horned ox-heads etc. at either end, see M. Hoernes *Urgeschichte der bildenden Kunst in Europa* Wien 1898 p. 443 fig. 137, p. 501 f. fig. 165.

² Detail of black-figured *pyxis*-lid or *kýlix*-lid found at Cuma in 1908 (E. Gabrici in the *Röm. Mitth.* 1912 xxvii. 124 ff. pl. 5), to which Miss Harrison kindly drew my attention.

³ Detail of an Apulian *amphora* from Ruvo (Heydemann *Vasensamm. Neapel* p. 517 f. no. 3223, *Mon. d. Inst.* ii pl. 43, E. Braun in the *Ann. d. Inst.* 1837 ix. 198 ff., O. Jahn *ib.* 1848 xx. 204 ff., Overbeck *Gall. her. Bildw.* i. 735 f. Atlas pl. 30, 4, J. H. Huddilston *Greek Tragedy in the light of Vase Paintings* London 1898 p. 127 ff. fig. 18). Archaic altars of this type have been found in south Italy and Sicily, e.g. the great ash-altar of Demeter at Selinous (R. Koldewey—O. Puchstein *Die griechischen Tempeln in Unteritalien und Sicilien* Berlin 1899 p. 84, F. Studniczka in the *Jahrb. d. kais. deutsch. arch. Inst.* 1911 xxvi. 94 f. fig. 30).

Similarly ram's horns affixed to an altar (fig. 381)¹ became volutes curving either downwards (figs. 382², 383³, 384⁴) or upwards (fig. 385)⁵; and these volutes in turn were combined with a simple (fig. 385) or more elaborate pediment (fig. 386)⁶ and treated as architectural *akrotéria*. The climax of magnificence is reached in the Ludovisi altar, which has both sculptured fenders and upturned decorative volutes⁷. The fenders, as viewed from the side, still bear some faint resemblance to the 'Minoan' altar-horns.

Here and there religious conservatism retained clearer traces of the old usage. The *keratón* at Delos was, according to Kallimachos, constructed by Apollon from the horns of the goats shot by Artemis on Mount Kynthos⁸; according to Plutarch, from left horns⁹ or from right horns only¹⁰. Again, the Kabeiros of Thessalonike had a horn, which was either planted in the ground beside him¹¹ or fixed on a base resembling an altar¹².

Cp. the single horns of stone found in a neolithic pillar-precinct at Terlizzi in Apulia (A. Mosso and F. Samarelli in the *Not. Scavi* 1910 p. 116 ff.), the single horns of earthenware found in several Sicilian burying-grounds or settlements—Castelluccio, Monteracello, etc.—of the chalcolithic age (Orsi 'Necropoli e Stazioni Sicule di transizione' in the *Bullettino di paleontologia italiana* Third Series 1907 xxxiii. 92 ff.), and the single horns of earthenware found in a bronze-age sanctuary of the early Siculans at Cannatello near Girgenti (A. Mosso in the *Mon. d. Linc.* 1907 xviii. 573 ff., T. E. Peet *The Stone and Bronze Ages in Italy and Sicily* Oxford 1909 p. 451 ff. fig. 250).

The closest parallel to the Dinka bull-shrine is, however, to be sought, not in any artistic modification of the horned altar, but in an artless custom of the country-side. Antigonos of Karystos, c. 250 B.C. writes :

'In Egypt if you bury the ox in certain places, so that only its horns project above the ground, and then saw these off, they say that bees fly out ; for the ox putrefies and is resolved into bees!'

This curious method of obtaining a swarm is often mentioned by classical authors, and lingered on through mediæval times well into the sixteenth century². The fullest account of it is given by Florentinus³, who begins by naming his authorities :

'Tobas king of the Libyans states that bees must be made in a wooden coffer ; Demokritos and Varro in the Roman tongue state that they should be made in a house, which is even better.'

Then follows the *recipe* for making them. A fat bullock, thirty months old, is confined in a narrow chamber measuring ten cubits every way and pierced by a door and four windows. He is then beaten till bones and flesh alike are crushed, though blood must not be drawn. Next, every aperture in his body is stuffed up with pitched rags, and he is laid on a heap of thyme. The door and windows are plastered up with mud so as to exclude light and air. After three weeks the chamber is thrown open, but care must be taken not to admit a strong wind. When aired enough, the relics are fastened up as before and left for ten days longer. On the eleventh day clusters of bees will be found, while of the bullock nothing remains but horns, bones, and hair. 'King' bees come from the spinal marrow, or better still from the brain ; ordinary bees from the flesh. The main idea of this singular superstition is that the life of the bull passed into that of the bees⁴. As Ovid puts it,—

One life thus slain begat a thousand lives⁵.

The buried bull or bull-shrine, if we may so describe it, was in fact the centre of a vital force, which radiated outwards especially through the head and horns. If, as I am contending, some such custom is really presupposed by the horned altar of the Mediterranean peoples, we can understand why the suppliant clung to its horns⁶

⁶ 1 Kings 1. 50, 51, 2. 28.

or offered sacrifice¹ and prayer² holding it as by a handle. He was thereby himself filled with the life of the divine beast. Moreover, the frequent practice of affixing a *bucranium* to the altar or carving *bucrania* upon it³ is seen to be highly appropriate, if not actually reminiscent of its origin.

The foregoing method of procuring bees from a bull was believed by the ancients to have come from Egypt or Libye. We may therefore venture to compare with it a remarkable scene depicted in the Egyptian *Book of the Dead* (fig. 388)⁴. According to Dr Budge, Hathor the cow-goddess of the Underworld looks out through a clump of papyrus-plants from the funeral mountain, at the foot of which is the tomb. Now it is highly probable that such vignettes were originally inspired by actual custom. And Mr F. W. Green kindly informs me that at *Deir el Bahri* the relative positions of Hathor-shrine, mountain, and tombs agree well with those here represented⁵. The divine cow buried in the earth, but yet looking forth upon the world and by her own peculiar virtue causing fresh vegetation to spring up, thus furnishes an exalted parallel to the humbler rite of the buried bull and its resultant swarms.

Fig. 388.

¹ Varr. *ap.* Macrob. *Sat.* 3. 2. 8 inde Varro Divinarum libro quinto dicit aras primum asas dictas, quod esset necessarium a sacrificantibus eas teneri: ansis autem teneri solere vasa quis dubitet? ⁵ Mr H. R. Hall points out to me that Mr Somers Clarke (*Proceedings of the Society of Biblical Archaeology* 1905 xxvii. 179) has explained the pyramidal tomb-chapel in the vignette as copied from a pyramid at *Deir el Bahri*, which was especially connected with Hathor-worship, and the hills as being the cliffs of the same locality.

To the same cycle of ideas belongs the Mithraic sacrifice of a bull (fig. 389, 390)¹. Mithras—whose myth has been largely

Fig. 389.

¹ Figs. 389 and 390 are the front and back of a Mithraic altar-piece found in 1826 in the Heidenfeld near Hedderheim and now preserved in the Museum at Wiesbaden (F. Cumont *Textes et monuments figurés relatifs aux mystères de Mithra* Bruxelles 1896 ii. 362 ff. fig. 248 pls. 7 f., *id.* in Roscher *Lex. Myth.* ii. 3050 ff. figs. 6 f., *id.* in Daremberg—Saglio *Dict. Ant.* iii. 1950 fig. 5088, *id.* *Die Mysterien des Mithra*² trans. G. Gehrich Leipzig 1911 pl. 3, 1).

Fig. 389 = *Front.* (a) In a recess representing the cave Mithras slays the bull, accompanied by dog with collar and crow perched on fluttering mantle. A scorpion nips the testicles of the bull. A snake would drink from a *kratér* placed below the bull's belly and guarded by a lion. To right and left are Cautes and Cautopates with raised and lowered torches—a duplication of Mithras himself (Dionys. Areop. *epist.* 7 τοῦ τριπλασίου Μίθρου). Behind Cautes is a tree with a snake coiled round it. (b) Above the cave are the twelve signs of the zodiac, from Aries to Pisces. (c) In the spandrels Mithras in oriental dress and Phrygian cap shoots an arrow towards another personage

Fig. 390.

wearing Phrygian cap and kneeling in front of rock. (*d*) Higher up an oblong space shows four scenes separated by three cypresses: Mithras appearing out of the foliage of a tree (cypress?); Mithras dragging the bull by its hind legs, while a snake threatens its muzzle; Mithras extending his hand towards the radiate crown on the head of Sol (hands broken); Sol with radiate *nimbus* (traces visible) kneeling before Mithras (body restored). (*e*) The top member of the frame has three cypresses enclosing two scenes: Sol standing in his chariot (horses and rocks restored) extends his hand to Mithras, who is about to mount the chariot; Luna reclining in her chariot is drawn by two horses down a rocky slope. (*f*) The angles of the frame contain medallions of four wind-gods—winged heads, of which three at least are bearded and one, if not more, ejects a cone of wind from his lips. (*g*) Below the upper and above the lower medallions are the four seasons: on the left above, Spring with rose-wreaths in hair and round neck; on the right above, Summer with band round brow; on the right below, Autumn with wreath of corn (?) and flowers and fruit in bosom (?); on the left below, Winter with covered head. (*h*) Between Winter and Spring are two scenes: below, a bearded figure resting on rocks (Oceanus?); above, a bearded figure with *chlamys* on left arm and elongated object (stick? sword? thunderbolt?) in right hand advancing towards rock or shapeless person (Iupiter and Giant?). Between Summer and Autumn are two more scenes:

reconstructed from his monuments¹—was bidden by the raven, messenger of the Sun, to slay the great bull that had escaped from his cave. Reluctantly he went in pursuit and caught the bull just as it re-entered the cave. Closing its nostrils with his left hand, with his right he plunged a knife deep into its flank. Thereupon wonders ensued. Fresh forms of life sprang from the body of the dying beast. Corn arose from its spinal marrow—witness the bunch of corn-ears at the end of its tail. A vine grew from its blood. The one plant furnished the mystics with bread, the other with wine. In vain did the emissaries of darkness, the scorpion, the ant, and the snake, attack the moribund monster, fastening on its genitals or seeking to drain its blood. The seed of the bull, collected and purified by the Moon, begat all manner of serviceable creatures; and its soul, guarded by Mithras' faithful hound, ascended to heaven, where under the name of Silvanus it became the protector of all flocks and herds. In short, the death of the bull meant new life to the world at large².

Before passing from the present section we must face one outstanding difficulty. We have been maintaining that the horned altar of the Mediterranean originated as the shrine of a buried beast. It may be objected that, on this showing, the altar—hardly to be distinguished from the divinity dwelling in it—was at one time the actual object of cult.

That is a conclusion from which in fact we must not shrink.

above, Mithras as a child emerging from rock (hands lost); below, Mithras as a youth advancing to seize the branches of a bush, of which the lower part is seen.

Fig. 390 = *Back*. (a) In the recess representing the cave the bull lies dead. Behind it stand two figures—on the left Mithras in oriental dress and Phrygian cap holding a horn, on the right Sol with long hair, *chlamys*, belt, etc. carrying a whip. Sol holds out a big bunch of grapes to Mithras, who raises his hand in admiration. Between them a Phrygian cap, surrounded by a circlet with seven rays (in part restored), rests on a pole. To right and left of the bull are two children in oriental dress and Phrygian caps bearing baskets of fruit (the child on the left almost entirely modern). (b) Above the cave is a scene now much damaged. In the centre a male figure, probably Silvanus, stands erect (lower half can be traced); and about him are grouped, from left to right, various animals—boar, hound, horse (hoof and part of leg visible), sheep (?), hound, hound, bull.

This relief was originally so mounted as to turn about in its three-sided frame on two iron pivots. Hence the absence of decoration on the back of the frame.

¹ F. Cumont *Textes et monuments* etc. i. 159 ff., in Roscher *Lex. Myth.* ii. 3050 ff., in Daremberg—Saglio *Dict. Ant.* iii. 1953, *Die Mysterien des Mithra*² p. 118 ff.

² Cp. Porph. *de antr. nymph.* 18 *σελήνην τε οὖσαν γενέσεως προστάτιδα μέλισσαν ἐκάλουν ἄλλως τε < καλ > ἐπεὶ ταῦρος μὲν σελήνη καὶ ὕψωμα σελήνης ὁ ταῦρος, βουγενεὶς δ' αἱ μέλισσαι. καὶ ψυχὰς δ' εἰς γένεσιν λούσαι βουγενεὶς, καὶ βουκλόπος θεὸς ὁ τὴν γένεσιν λεληθότως ἀκούων*. The parallelism between the procreation of bees from a bull and the Mithraic myth is here distinctly recognised.

W. Robertson Smith¹ long since pointed out that in the Semitic area 'the sacred stone is altar and idol in one,' citing *inter alia* Porphyrios' strange account of the worship at Dumat:

'The Dumatenes in Arabia used every year to sacrifice a boy and to bury him beneath an altar, which they treat as an image².'

Even more explicit is the divinity of the altar in the cult of certain Syrian gods. A long day's march west of Aleppo rises a bare and almost conical mountain known to the Greeks as Koryphe³ and to the modern inhabitants as *Djebel Shékh Berekât*. On the summit is a levelled precinct *c.* 68 metres square, enclosing the tomb of the Mohammedan saint who has dispossessed the former occupants of the site. The walls of the precinct bear on their outer surface dedicatory inscriptions, nine of which, ranging in date from *c.* 70 to *c.* 120 A.D., were copied by an American archaeological expedition in 1899—1900⁴. The votive formula is:

'To Zeus *Mádbachos* and to Selamanes, gods of the country⁵.'

Already in 1897 Prof. C. Clermont-Ganneau⁶, though hampered by inexact transcripts, had with the utmost acumen divined the true meaning of both names. He compared Selamanes with the Assyrian god Šalmānu and the Phoenician Šlmn, the 'Peaceful or Peace-bringing One.'⁷ And he suggested that *Mádbachos*, if that were the right spelling, might be connected with the Aramaic *mabbah*, 'altar⁸.' He even ventured to add that, if so, Zeus *Mádbachos* would be the Syrian equivalent of a Greek Zeus *Bomós*, a god identified with his own altar. Three years later this hypothetical deity was actually found. A day's journey south of

⁷ So too G. Hoffmann in the *Zeitschrift für Assyriologie* xi. 246, E. Littmann *ap.* W. K. Prentice in *Hermes* 1902 xxxvii. 117 f., O. Höfer in Roscher *Lex. Myth.* iv. 641.

⁸ So too E. Littmann *ap.* W. K. Prentice *loc. cit.* p. 118, M. Lidzbarski in the *Ephemeris für semitische Epigraphik* 1908 ii. 81, Gruppe *Myth. Lit.* 1908 p. 639, L. R. Farnell in *The Year's Work in Class. Stud.* 1909 p. 61; R. Eisler *Weltenmantel und Himmelszelt* München 1910 ii. 723 n. 7.

Djebel Shèkh Berckât is a place called *Bardj Bâkirhâ*, situated at the northern end of *Djebel Barîsha*. Here was once a fine Roman temple, built in the time of the Antonines; and a few paces to the east of it are the foundations of a very ancient altar. Temple and altar were enclosed by a precinct wall, now almost wholly destroyed. On the lintel of the precinct-door Dr E. Littmann deciphered a dedication to Zeus *Bomês*¹, the god whose existence was postulated by Prof. Clermont-Ganneau.

Zeus *Bomês*, no doubt, was the Grecised form of a Syrian god. But the Hellenic Zeus too was here and there believed to inhabit a hewn slab or pillar of stone, e.g. at Sikyon, in Arkadia, at Tarentum². The Frontispiece of this volume will serve to show

¹ Διὶ Βωμᾶ ἡεγάλω ἐπηκόῳ Ἀπολλώνιος καὶ Ἀπολλοφάνης καὶ Χαλβίων οἱ Μαρβῶνος τὸν πῖλωνα ἀεστήσαν ἔτους ἀπὸ ἐπικιόν μύθων ἔτους ἡσ', Γορφαίων (W. K. Prentice in *Hesperia*, 1902 XXXVII, 118).

² In dealing with aniconic representations of Zeus as a stone we must carefully distinguish artificial from natural forms. This distinction is not well observed by Overbeck *Gr. Kunstmyth.* Zeus p. 3 ff. or even by Farnell *Cults of Gr. States* i. 102 ff., though it is rightly emphasised by W. Robertson Smith *Lectures on the Religion of the Semites*² London 1907 p. 206 f.

The statement of Maximus Tyrius that the earliest men dedicated mountain-tops—Olympus, Ide, etc. —as ἀγάλιαστα to Zeus (*supra* p. 102 n. 5) may be an erroneous inference from the fact that Zeus was worshipped on such high-places, or a generalisation from the case of Mt. Argaios (*ib.*). There is, however, good evidence for the identification of natural stones, probably meteorites, with Zeus: e.g. the stone near Gythion called Zeus-Καππώτας (*infra* ch. ii § 10 (f)); the stone at Delphoi said to have been swallowed by Kronos in place of Zeus (*infra* ch. ii § 10 (d)); the stone of Elagabalos, the god of Emesa in Syria, who was regarded as a solar Zeus or Jupiter (*infra* ch. ii § 10 (c)).

Among artificially-shaped stones we may notice several types—the pillar, the pyramid, the pyramid on a pillar, the *omphalos*.

Zeus is represented on Apulian vases by a pillar pure and simple (*supra* p. 36 fig. 9), or by a pillar inscribed ΔΙΟΣ (*supra* p. 36 ff. pl. iii). This presumably had behind it long-standing local tradition; for it is known that Zeus Καταϊβάτης had a pillar-cult at Tarentum in very early times (*infra* ch. ii § 3 (a) ii (δ)). Cp. also an Apulian bell-krater (*Brit. Mus. Cat. Vases* iv. 42 no. F 62) on which is a stepped *stèle* bearing the inscription ΤΕΡΜΩΝ, i.e. Zeus Τέρμων as the equivalent of Jupiter *Terminus* (Plout. z. *Nouv.* 16 with Plat. *Leg.* 842 E f., Dem. *de Halonnes.* 39 f. = *Anth. Pal.* 9. 786).

Zeus Μειλίχιος at Sikyon was a mere pyramid (Paus. 2. 9. 6 ἔστι δὲ τοῦ Ζεὺς Μειλίχιος καὶ Ἀρτέμις ὀνομαζομένη Πατρῶα, σὺν τέχωνη πεποιημένα οὐδεμιᾶ· πυραμίδι δὲ ὁ Μειλίχιος, ἢ δε κίων ἔσταν ἰκασμένη); cp. the conical stone inscribed ΔΙΟΣ | ΜΗΛΩΣΙΟΥ at Korkyra (*supra* p. 164 n. 5) and the bronze pyramids of Jupiter *Dolichenus* (*infra* ch. i § 6 (g) xx (θ)).

Zeus Σορπάος (A. S. Arvanitopoulos in the *Ἐφ. Ἀρχ.* 1906 p. 63 f. figs., K. A. Rhomaios *ib.* 1911 p. 150 fig. 1, *infra* ch. ii § 3 (c) iv (ε)), Zeus Πάσιος (K. A. Rhomaios *loc. cit.* p. 152 fig. 7), and Zeus Πατρώος (*id. ib.* p. 153 fig. 9) were, like other Arcadian deities, represented at Tegea by small pyramids surmounting four-sided pillars of Doliana marble: these pillars are inscribed ΔΙΟΣ ΣΤ | ΟΡΠΑΟΣ, ΔΙΟΣ ΠΑ | ΣΙΟ, and ANTIO | ΧΟΣΚΑ ΔΑΜΟ ΣΤΡΑΤΟΣ | ΔΙΗΠΑ ΤΡΩ ΙΩ

how such beliefs lingered on into our own era. Behind the god as portrayed by latter-day Pompeian art still stands the squared block from which in a sense he has emerged. That block was once his vehicle, his seat, his abode, for all practical purposes his embodiment. As time went on, the sacred stone was differentiated into a variety of distinct forms, to each of which was assigned its separate use. It did duty as the god's altar¹. It was modified into his throne². It survived as a perch for his eagle³, or as a pedestal for his statue⁴. But from first to last it was, strictly interpreted, the place where Zeus was to be found rather than the very Zeus himself. The distinction might indeed be overlooked by the vulgar; but it was vital to the progress of religion.

xviii. The Marriage of the Sun and the Moon in Crète.

If the bull that consorted with Pasiphae stood for the sun, Pasiphae herself, concealed in her wooden cow⁵, stood for the moon. Plutarch⁶ informs us that at Thalamai—a frontier town between Messene and Lakonike—there was a sanctuary and oracle of in lettering of the fifth century B.C., of the third or perhaps late fourth century B.C., and of the end of the second century A.D., respectively. A triple iconic herm at Tegea is inscribed ΖΕΥΣ || ΠΟΣΕΙ | ΔΑΝ || ΔΑΜ[Α] ΤΗΡ in lettering of the first century A.D. (*id. ib.* p. 156 f. fig. 12). The pyramid-on-pillar is obviously tantamount to the iconic herm.

In the east we find omphaloid stones regarded as Zeus: e.g. the *omphalos* of Zeus Κάσιος at Seleukeia Pieria (Append. B Syria); that of Zeus (?) at Chalkis sub Libano (Append. B Syria); that of Zeus Ἄμμων, the Semitic character of which has been already discussed (*supra* p. 355 ff.).

It would seem, then, that the genuinely Greek forms of aniconic Zeus included (a) natural stones such as meteorites, and (b) artificially-shaped stones of certain definite types—the pillar, the pyramid, and a combination of the two.

¹ E. Reisch in Pauly—Wissowa *Real-Enc.* i. 1642. An instructive case is that of Zeus Καραβάρης at Tarentum (*infra* ch. ii § 3 (a) ii (δ)).

² See W. Reichel *Über vorhellenische Götterculte* Wien 1897 pp. 38—50 ('Altäre als Throne'). Cp. Iupiter seated on a pillar (*supra* p. 62 fig. 38) and Zeus Λύκαιος seated on his altar (*supra* p. 93 fig. 65). A comic scene depicted on a bell-krater from Apulia (L. Stephani *Parerga archaeologica* St Petersburg 1851—1876 no. 18, F. Wieseler in the *Ann. d. Inst.* 1859 xxxi. 379 ff. pl. N, Reinach *Rép. Vases* i. 302, 2, W. Reichel *op. cit.* p. 42 fig. 12) shows Zeus sitting on his altar and threatening with uplifted bolt Herakles, who stands before him greedily eating the fruit that he ought to be presenting—a painful contrast to the pious personage, who is pouring a libation on the altar to the right.

522 Marriage of the Sun and Moon in Crete

Pasiphaa, whom some took to be a daughter of Atlas and mother by Zeus of Ammon, while others identified her with Kasandra the daughter of Priam who had died there and been called *Pasipháa*, 'She that gives light to all,' because she gave to all her oracular responses¹. Plutarch adds that, according to Phylarchos², Daphne the daughter of Amyklas when fleeing from the embraces of Apollon was changed into a laurel (*dáphne*) and received the gift of prophecy: it is implied, though not stated, that *Pasipháa* was an epithet of the illuminating Daphne. Pausanias still further complicates the case by speaking of the oracle as that of Ino³. It seems clear that the Laconian Pasiphaa was an ancient oracular goddess, whose nature had been so far forgotten that it had become possible to identify her with a variety of better-known mythological characters. Fortunately for our understanding of the facts Pausanias, an honest eye-witness, goes on to describe the sacred precinct:

'Two bronze statues stand there in the open air, one of them a statue of Pasiphae⁴, the other of Helios: the statue in the temple itself could not be seen clearly owing to its wreaths, but this too is said to be of bronze. There is also a sacred spring of water that is sweet to drink. Pasiphae is not a local deity of Thalamai but an epithet of Selene⁵.'

This is in all probability the truth of the matter. The statues of Pasiphae and Helios were statues of the moon-goddess and the sun-god⁶. When, therefore, in the Cretan myth, the 'bull of dazzling whiteness⁷' approached Pasiphae in her cow, we are justified in supposing a union between the sun and the moon.

Behind the myth, as is so often the case, we may detect a ritual performance, in which the Cnossian queen actually placed within a wooden cow was symbolically married to a bull representing the sun-god⁸. We know, at least, that in the territory of the Cnossians,

¹ By means of incubation (Plout. *v. Cleom.* 7, Cic. *de divin.* 1. 96). See further Tert. *de anim.* 46, Aristox. Tarent. *frag.* 76 (*Frag. hist. Gr.* ii. 288 Müller) *ap.* Apollon. Dysk. *hist. mir.* 49.

⁷ *Supra* p. 467.

⁸ This view, which I put forward in the *Class. Rev.* 1903 xvii. 412, was adopted in 1905 by Dr J. G. Frazer (*Lect. Hist. Kingship* p. 175). In 1911, however, Dr Frazer

near the river Theren, there was in historical times a sanctuary, at which once a year the people of the district assembled to offer a solemn sacrifice and to celebrate with ancient mimetic rites the marriage of two divinities then described as Zeus and Hera¹. I would suggest that the later union of Zeus with Hera² had here taken the place of an earlier ceremony, the ritual pairing of the solar bull with the lunar cow.

That a queen should submit to being enclosed in a wooden cow will not surprise those who are familiar with primitive religious rites. In view of the similarity existing between Cretan and Egyptian bull-worship it is to be noted that the queens of Egypt were sometimes buried in cow-shaped sarcophagi, being thus made one with Hathor the cow-goddess³. Herodotus⁴, for example, describes how Mykerinos (*Men-kau-Rá*), a king of the fourth dynasty, when his daughter, an only child, died, buried her in a hollow wooden cow. This cow stood, or rather knelt, in a decorated chamber of the royal palace at Sais, its head and neck thickly plated with gold, and the rest of its body covered with a scarlet cloak. Between its horns was a golden disk to imitate the sun; and once a year, when the Egyptians made mourning for a certain god, presumably Osiris, the cow was brought out into the light, for the princess on her death-bed had besought her father that once a year she might look upon the sun. Whether the 'Minoans' ever assimilated their dead rulers to bulls and cows we do not know, though it has been conjectured by Mr B. Staes that the splendid silver cow's head with golden horns and a gold-plated rosette between them, found in the fourth shaft-grave at Mykenai, was originally affixed to the exterior surface of a wooden coffin⁵.

In various parts of the world it has been held that the stars are the children of the sun and moon⁶. This view perhaps obtained in

improved upon it by pointing out that Pasiphae was not, as I had described her, the representative of 'a sky-goddess or sun-goddess,' but rather, as others had seen, the representative of the moon (*Golden Bough*³: The Dying God p. 71 n. 2).

Myth.* ii. 3198 cites further parallels from A. Schleicher in the *Sitzungsber. d. kais. Akad. d. Wiss. in Wien Phil.-hist. Classe* 1853 xi. 99, T. Waitz—G. Gerland *Anthropologie der Naturvölker* Leipzig 1872 vi. 266, W. Mannhardt in the *Zeitschrift für Ethnologie* 1875 vii. 303.

524 Marriage of the Sun and Moon in Crete

Crete; for the Minotaur, offspring of the solar bull and the lunar cow, was—as we have said¹—named *Astérios* or *Asterion*, ‘the Starry.’

Dr J. G. Frazer, following K. Hoeck² and W. H. Roscher³, holds that the same custom of sun-and-moon marriage is attested on the one hand by the myth of Zeus and Europe, on the other by that of Minos and Britomartis or Diktyнна :

‘The moon rising from the sea was the fair maiden Europa coming across the heaving billows from the far eastern land of Phoenicia, borne or pursued by her suitor the solar bull. The moon setting in the western waves was the coy Britomartis or Dictynna, who plunged into the sea to escape the warm embrace of her lover Minos, himself the sun. The story how the drowning maiden was drawn up in a fisherman’s net may well be, as some have thought, the explanation given by a simple seafaring folk of the moon’s reappearance from the sea in the east after she had sunk into it in the west⁴.’

But here, as it seems to me, more caution is needed. I do not deny that ultimately both Europe and Diktyнна came to be regarded as moon-goddesses—the former through the influence of Phoenician religion, the latter by assimilation to the lunar aspect of Artemis. But I do deny that originally and essentially either Europe or Diktyнна stood for the moon. The matter is one that in this connexion must be further investigated.

Europe bore to Zeus a son Dodon⁵ or Dodonos⁶, the eponym of Dodona. This implies that there was a recognised similarity between the cults of Crete and Epeiros, Zeus and Europe being the Cretan equivalents of Zeus *Ndios* and his Dodonaean partner⁷. If so, Europe was at first a great earth-mother, who sent up vegetation from her home in the ground⁸. Strong support for this view is to be found in the fact that at Lebadeia in Boiotia those who went down into the oracular cave sacrificed not only to Trophonios and his sons, but also to Apollon, Kronos, Zeus

⁵ Akestodoros (*Frag. hist. Gr.* ii. 463 f. Müller) *ap.* Steph. Byz. *s.v.* Δωδώνη.

⁶ Schol. T. V. II. 16. 233.

⁷ This was seen by J. Escher-Bürkli in Pauly—Wissowa *Real-Enc.* vi. 1287 f.; but this scholar went off on a wrong track, when he detected at Dodona the cult of a divine pair *Eúrōpa* and *Eúrōπη*.

⁸ Paus. 10. 12. 10 (in the chant of the Dodonaean priestesses) *Γὰ καρπὸς ἀντεῖ, διὰ κλήζερε ματέρα Γαῖαν*, *cp. Class. Rev.* 1903 xvii. 179 f.

Dr L. R. Farnell likewise concludes that Europe was ‘the Cretan earth-goddess’ (*Cults of Gk. States* ii. 479), ‘the Eteocretan earth-goddess’ (*ib.* ii. 632), later assimilated to Astarte.

Basileús, Hera *Henióche*, 'and to Demeter, whom they surname *Európe*, declaring that she is the nurse of Trophonios¹.'

Moreover, the little that we know of Europe's own cult fully bears out her chthonian and vegetative character. She had a festival in Crete, the Hellotia, at which a garland of myrtle, twenty cubits in circumference, was carried in procession. It was said to contain the bones of Europe, and like Europe herself was called *Hellotis*². This enormous wreath was clearly some sort of May-garland, probably, as Dr M. P. Nilsson conjectures, with a puppet inside it³. Now we have already seen that in Greece such garlands are burnt on the Midsummer bonfire⁴. It is therefore noteworthy that at Corinth, where the same festival was attached to the cult of Athena, tradition tells of a fire on to which a certain Hellotis flung herself and her little sister Chryse⁵.

¹ Paus. 9. 39. 5 *Δήμητρι ἢν ἐπονομάζοντες Εὐρώπην τοῦ Τροφώνιου φασὶν εἶναι τροφόν.*

² Athen. 678 A—B *Σέλευκος δὲ ἐν ταῖς Γλώσσαις ἐλλωτίδα καλεῖσθαι φησι τὸν ἐκ μυρρίνης πλεκόμενον στέφανον, ὄντα τὴν περίμετρον πηχῶν ἑκοσι, πομπεύειν τε ἐν τῇ τῶν Ἑλλωτίων ἑορτῇ. φασὶ δ' ἐν αὐτῇ τὰ τῆς Εὐρώπης ὅσα κομίζεσθαι, ἢν ἐκάλλον Ἑλλωτίδα. ἀγεσθαι δὲ καὶ ἐν Κορίνθῳ τὰ Ἑλλώτια. Cp. Hesych. s.vv. Ἑλλώτια, ἐλλωτίς.*

³ Nilsson *Gr. Feste* p. 96 remarks that this can hardly be a case of actual bones carried in procession, and suggests that originally a puppet or *xóanon* called Hellotis was concealed in the wreath, which was later regarded as the relic of a dead heroine.

Farnell *Cults of Gr. States* ii. 479 'as the Cretan god dies, so his spouse, the earth-goddess, dies, for we hear of the funeral rites of Europa in the Corinthian festival of Ἑλλώτια.' More exactly, 'in the Cretan festival of Ἑλλώτια, which was celebrated also at Corinth.'

F. Dümmler in Pauly—Wissowa *Real-Enc.* ii. 1971 'In Gortyn feierte man unter dem Namen Hellotia der Europe ein Totenfest.' This unduly emphasises the funereal character of the rite, which in all probability involved not merely the death but also the rebirth of the vegetation-goddess, laughter as well as tears.

The only other references to a definite cult of Europe in Crete are Dictys Cretensis i. 2 ad eos re cognita omnes ex origine Europae, quae in ea insula summa religione colitur, confluent benigneque salutas in templum deducunt. ibi multarum hostiarum more patris immolatione celebrata exhibitisque epulis large magnificeque eos habuere. itemque insecutis diebus reges Graeciae, et si ea quae exhibebantur magnifice cum laetitia suscipiebant tamen multo magis templi eius magnifica pulchritudine pretiosaque extractione operum afficiebantur, insipientibus repetentesque memoria singula quae ex Sidone a Phoenice patre eius atque nobilibus matronis transmissa magno tum decori erant, Solin. 11. 9 Gortynam amnis Leneaue praeterfluit, quo Europam tauri dorso Gortynii ferunt vectitatum. iidem Gortynii et Adymnum colunt Europae fratrem: ita enim memorant. videtur hic et occurrit, sed die iam vesperato augustiore se facie visendum offerens (see K. Tümpel in Pauly—Wissowa *Real-Enc.* ii. 2261).

⁴ *Supra* p. 338 ff.

⁵ The schol. Pind. *Ol.* 13. 56 gives various *αἰτια* for the Hellotia of Athena *Hellotis*. Of these the oldest and most reliable (Nilsson *Gr. Feste* p. 96) is the following: *Τιμάνδρου θυγατέρες τέσσαρες Κορίνθιαι*. Ἑλλωτίς, Εὐρυτιώνη, Χρυσή, Κοτυτώ. ἀλούσης τῆς πόλεως τὴν νέαν τὴν Χρυσὴν ἢ Ἑλλωτίς ἀρπάσσασα εἰσῆλθεν εἰς τὸν ναὸν τῆς Ἀθηνᾶς, ἐνθα περκατάληπτος γενομένη ἐρριψεν ἑαυτὴν εἰς τὸ πῦρ. καθάρσια οὖν ἀγεται τῇ θεῷ, ἅτινα ὁ μετὰ ταῦτα Ἀλήθρου <...?...> Ἑλλώτια καλοῦσιν. Cp. *et. mag.* p. 332, 43 ff.

Nilsson *op. cit.* p. 95 infers that a large puppet called Hellotis was burnt (or two large puppets, Hellotis and Eurytione) together with a small puppet called Chryse, and points

526 Marriage of the Sun and Moon in Crete

Europe, then, was a Cretan earth-goddess responsible for the vegetation of the year. Viewing her as such, we begin to understand better both her monuments and her myth. Artists innumerable represented her (pl. xxxii)¹ as she rode upon the divine bull, clinging with one hand to his fertilising horn and holding in the other a flower, symbol of her own fertility. Theophrastos and later writers averred² that Zeus took her to wife on or under an evergreen plane-tree near Gortyna³; the exceptional foliage of the tree was attributed to the fecundity of the goddess.

For the resemblance of the rite to the Boeotian Daïfala. He also notes the addition of Korymbos, a Thracian Artemis (A. Rapp in Roscher *Lex. Myth.* ii. 1399 f.), in whose cult there is evidence of a May-pole (Nilsson *loc. cit.* n. 2).

The cult of Athena Έλλάωρίς at Marathon, mentioned by the schol. Pind. *Ol.* 13, 26 a. d. and *et. mag.* p. 332, 48 l. is attested by the calendar of the Attic Tetrapolis (J. de Prot *Leges Graecorum sacrae* Lipsiae 1896 *Fasti sacri* p. 49 no. 26 b. 34 ff., 41 f., 100 p. 53).

¹ Of many possible illustrations (listed by L. Stephani in the *Compte-rendu St. Pé.* 1866 p. 79 ff. Atlas pl. 3. 1870—1871 p. 181 ff. Atlas pl. 5, O. Jahn *Die Entführung der Europa auf antiken Kunstwerken* with 10 plates Wien 1870, Overbeck *Gr. Kunstmyth.* Zeus pl. 420—465 Münztaf. 6. 1—11, Gemmentaf. 5. 6—8, Atlas pl. 6. 7—22, pl. 7. 4—26, 22 f., J. Escher-Bärkli in Pauly-Wissowa *Real-Enc.* vi. 1296—1298) I figure but one, the Europe-kylix at Munich (Jahn *Vasensamm.* München p. 63 no. 208). This masterpiece, painted by an Attic artist c. 470 B.C., was found in 1811 A.D. still lying on a stone table in the *opisthodomos* of the temple of Aphaia in Aigina. Here, as A. Furtwängler remarks, it may have been used for pouring a libation when Pindar's ode to the goddess (Paus. 2. 30. 3) was performed. O. Jahn published it in colour (*Die Entführung der Europa* p. 44 f. pl. 7, Overbeck *op. cit.* p. 428 ff. Atlas pl. 6. 19). Since his day the vase has suffered some farther damage: the bracelet on Europe's right arm has disappeared; her golden flower is hardly to be traced; her right foot has gone; so have her golden earring and the golden balls hanging from her hair; the inscription ΞΕΥΣ is reduced to I. What is left has been carefully redrawn by K. Reichhold for A. Furtwängler (*Aigina* München 1906 Text p. 498 f. fig. 406, F. Hauser in *Gr. Vasenmalerei* ii. 283 ff. pl. 114, 1). I have had Jahn's colour-plate copied with the insertion of various details—the inner markings of the bull, etc.—first brought to light by Furtwängler and Reichhold.

The bull is black for aesthetic rather than religious reasons, and I doubt whether any mythological meaning attaches to the golden birds with which Europe's *peplos* is adorned. The sea is simply omitted (contrast *infra* figs. 405, 414).

² H. Prinz in the *Ath. Mitth.* 1910 xxv. 169 n. 2 hints that the key to the myth of Europe is furnished by certain Hittite cylinders, on which we see e.g. (a) a nude goddess holding a festoon as she stands on a recumbent bull with birds, hares, and a lion grouped around and a worshipper kneeling on either side of her (W. H. Ward in the *Am. Journ. Arch.* 1899 iii. 27 fig. 34); (b) a nude goddess holding a festoon as she stands on a recumbent bull, the halter of which is in the hands of a god grasping a club and a crook and treading upon mountain-tops (W. H. Ward *Cylinders and other ancient seals in the library of J. Pierpont Morgan* New York 1909 pl. 31, 237). The latter design suggests that the bull belonged to the god, not to the goddess.

³ Prof. R. C. Bosanquet tells me, on the authority of F. Halbherr, that a single specimen of the evergreen plane is still growing in a village near Gortyna.

⁴ Theophr. *hist. pl.* 1. 9. 5 *ἐν Κρήτῃ δὲ λέγεται πλάτανόν τινα εἶναι ἐν τῇ Γορτυναίᾳ πρὸς πηγῇ τινα, ἣ οὐ φελλοβολαῖ. μυθολογοῦσι δὲ ὡς ἐπὶ (sic codd., ὑπὸ εἰ. Hemsterhuis) ταύτῃ ἐμίγη τῇ Εὐρώπῃ ὁ Ζεὺς· τὰς δὲ πηλοῖον πάσας φελλοβολαῖν...λέγεται δὲ καὶ ἐν*

526

526²

Zeus and Europe
on a white-ground *kylix* at Munich.

See page 526 n. 1.

Coins of Gortyna from c. 430 B.C. onwards show a goddess seated in a tree, one of the most charmingly picturesque figures to be found in the whole field of ancient numismatics. Most scholars have concluded, and concluded rightly, that this can be none other than Europe, the bride of Zeus¹. She is, however, seated not

Κύπρω πλατάνος εἶναι τοιαύτη, Varr. *rer. rust.* 1. 7. 6 itaque Cretae ad Cortyniam dicitur platanus esse, quae folia hieme non amittat, itemque in Cypro, ut Theophrastus ait, una, Plin. *nat. hist.* 12. 11 est Gortynae in insula Creta iuxta fontem platanus una insignis utriusque linguae monumentis, numquam folia dimittens, statimque ei Graeciae fabulositas superfuit Iovem sub ea cum Europa concubuisse, ceu vero non alia eiusdem generis esset in Cypro. This last passage is quite misconceived by J. Escher-Bürkli in Pauly—Wissowa *Real-Enc.* vi. 1290: 'Auf Kypros endlich war die Vermählung des Zeus mit E. lokalisiert (Plin. n. h. XII 11), und führte Zeus den Beinamen Ελληνι (= 'Ελληνίως? Hesych.).' As to Hesych. Ελληνι· Ζεὺς ἐν Κύπρῳ, Favorin. *lex.* p. 574, 48 f. Ελληνίως Ζεὺς, ἐν Κύπρῳ, *quot capita tot sententiae*: see J. Alberti and M. Schmidt on the Hesychian gloss, also O. Hoffmann *Die griechischen Dialekte* Göttingen 1891 i. 112.

Clem. Rom. *hom.* 5. 13 (ii. 184 Migne) Εὐρώπη τῇ Φοίνικος διὰ ταύρου συνήλθεν (*sc.* ὁ Ζεὺς) stands alone. Whether it preserves an older form of the myth, or is due to the analogy of the Pasiphae-story, can hardly be determined.

¹ So e.g. W. Wroth in the *Brit. Mus. Cat. Coins* Crete etc. pp. xxxiv, 37 ff., P. Gardner *Types of Gk. Coins* p. 165, G. Macdonald in the *Hunter Cat. Coins* ii. 184 ff. (Europa?), Head *Hist. num.*² p. 466 f. Mr G. F. Hill *A Handbook of Greek and Roman Coins* London 1899 p. 163 says cautiously 'the Cretan goddess seated in her tree.'

The chief dissentient is Mr J. N. Svoronos, who in the *Rev. Belge de Num.* 1894 p. 113 ff. argues that the coins in question illustrate a myth preserved by Kallim. *h. Artem.* 189 ff. Britomartis, a Gortynian nymph in the train of Artemis, was loved by Minos, and, being pursued by her lover, took refuge *λασίγαιον ὑπὸ δρυσί*. When after a nine months' chase he was about to seize her, she plunged from a height into the sea; and, being caught by the nets of the fishermen, was thenceforward called Diktyna, while the height was named Mt Dikte. The latter part of this tale is aetiological and late. Mr Svoronos thinks that the earlier version of it can be restored from the coin-types: Minos, taking upon him the form of an eagle, wooed and won his oak-nymph in a Cretan oak. This reconstruction is supported by two main considerations. On the one hand, Mr Svoronos regards Minos as a hypostasis of the Cretan Zeus, citing Echemenes *frag.* 1 (*Frag. hist. Gr.* iv. 403 Müller) *ap.* Athen. 601 E 'Εχμενῆς γοῦν ἐν τοῖς Κρητικοῖς οὐ τὸν Δία φησὶν ἀρπάσαι τὸν Γανυμήδην ἀλλὰ Μίνωα. On the other hand, Mr Svoronos believes that the tree on the coins is an oak; and here he is able to adduce the opinion not only of numismatists such as Prof. P. Gardner (*Types of Gk. Coins* p. 166 'serrated leaves as of oak') and Messrs F. Imhoof-Blumer and O. Keller (*Tier- und Pflanzenbilder auf Münzen und Gemmen des klassischen Altertums* Leipzig 1889 p. 63 'Der Baum sieht mehr einer Eiche als einer Platane ähnlich'), but also of Mr Spyridion Miliarakis, Professor of Botany at Athens, who states that 'les feuilles des arbres...qui sont les mieux représentées de toutes, ainsi que tout le reste, laissent reconnaître facilement à toute personne qui connaît les arbres de la Grèce, que ce n'est pas un platane, mais bien un chêne (δρῦς).'

Mr Svoronos' view is attractive. In the *Class. Rev.* 1903 xvii. 404 f. I accepted it and argued further in its support. But I now believe that I was mistaken: (a) It is more likely that the coins of Gortyna would represent the famous union of Zeus with Europe, which took place under a neighbouring plane-tree, than the comparatively obscure pursuit of Britomartis by Minos, which—so far as our literary evidence goes—was connected with places remote from Gortyna and was never consummated in a marriage-union at all. (b) The supposed metamorphosis of Minos into an eagle is a matter of pure conjecture,

528 Marriage of the Sun and Moon in Crete

in a plane-tree, but on the crown of a pollard willow. The long serrated leaves (fig. 393), the small burgeoning catkins (fig. 396), the well-marked hollow in the bole (figs. 391 ff.), above all the

Fig. 391.

Fig. 392.

Fig. 393.

Fig. 394.

Fig. 395.

Fig. 396.

shock-head of slender shoots (fig. 394), which in some cases have obviously been lopped (figs. 397, 398), all go to confirm this identification¹.

being nowhere mentioned by any classical author. (c) Well-preserved specimens of the coin, e.g. *Brit. Mus. Cat. Coins Crete* etc. p. 38 pl. 9, 5 (my fig. 393), certainly show serrated leaves; but serrated leaves need not be oak-leaves.

¹ Since this paragraph was written, Mr E. J. Seltman informs me that he has always regarded the tree as an ancient willow. In such a matter the opinion of an experienced numismatist is worth more than that of a botanist. A botanical friend, whom I consulted, declared that the tree most nearly resembled a tree-fern!

Fig. 397.

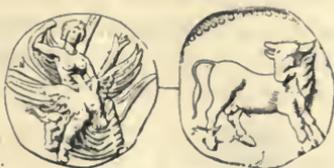

Fig. 398.

Fig. 399.

Fig. 400.

Doubtless the local die-sinker knew what he was about, and gave Europe the willow that belonged to her. Yet we need not tax Theophrastos, who spoke of a plane, with blundering. Both trees grow in damp marshy soil¹ and probably flourished side by side at Gortyna. A similar variation occurs in the case of another Cretan Zeus-cult; for, whereas Theophrastos mentions a fruitful poplar growing in the mouth of the Idaean Cave², Pliny apparently regards it as a willow³. There was in fact special cause to connect Zeus with the willow in the neighbourhood of Gortyna. On Mount Ide he had been nursed by Helike⁴, whose name denoted

¹ Theophr. *hist. pl.* 1. 4. 2, cp. 3. 13. 7.

² Theophr. *hist. pl.* 3. 3. 4, cp. 2. 2. 10, Append. B Crete.

³ Plin. *nat. hist.* 16. 110, Append. B Crete.

⁴ *Supra* p. 112 n. 3. Another account stated that Zeus was reared by the daughters of Olenos, two nymphs called Aiga and Helike; and that these persons respectively gave their names to Olenos in Aulis, Aiga in Haimonia, and Helike in the Peloponnese (Hyg. *poet. astr.* 2. 13: see B. Bunte *ad loc.*). E. Neustadt *De Jove Cretico* Berolini 1906 p. 21 f. holds that this Helike was in Arkadia. But more probably Olenos, Aiga, and Helike were the eponyms of Olenos or Olene, Aiga or Aigai, and Helike in Achaia. An autonomous copper struck at Aigion in the same district shows (fig. 401) Zeus as an infant suckled by the she-goat Amaltheia between two trees with an eagle above him (Overbeck *Gr. Kunst-myth.* Zeus p. 327 f. Münztaf. 5, 1, Imhoof-Blumer and P. Gardner *Num. Comm. Paus.* ii. 85 f. pl. R, 14, Müller—Wieseler—Wernicke *Ant. Denkm.* i. 58 f. pl. 5, 12, Head *Hist. num.*² p. 413): cp. Strab. 387 ἡ δ' Αἰγά (καὶ γὰρ οὕτω λέγουσι τὰς Αἰγάς) νῦν μὲν οὐκ οἰκεῖται, τὴν δὲ πόλιν ἔχουσιν Αἰγαίς. Αἰγιον δὲ ἰκανῶς οἰκεῖται· Ἰστροῦσι δ' ἐνταῦθα τὸν Δία ὑπ' αἰγῶν ἀνατραφῆναι, καθάπερ φησὶ καὶ Ἄρατος· αἰεὶ ἱερῆ, τὴν μὲν τε λόγος Διὸς μαζῶν ἐπισηχεῖν· ἐπιλέγει δὲ καὶ ὄτι

Fig. 401.

'Willow!' And a nurseling of the willow might naturally be mated with a willow-bride. If Europe was indeed a willow-goddess, she probably patronised basket-work; and the flower-basket that she herself bears is a significant attribute². The Greek painter is

Ἐλευθέρη δὲ μὲν αἶγα Διὸς καλεῖσά' ὑποφῆται· δηλῶν τὸν τόπον, διότι πλῆσιον Ἐλευθέρη. abridged by Eustath. *in Il.* p. 292, 10 ff.

According to Hyg. *fab.* 139, Amaltheia as nurse of the infant Zeus in Crete hung his cradle on a tree, in order that he might not be found in heaven or on earth or in the sea, and, to prevent his cries from being heard, bade the young Kouretes clash their small bronze shields and spears round the tree. Unfortunately we are not told whether the tree in question was a willow. In a Czech tale the nymph of a willow-tree married a mortal and bore him children. One day the willow was cut down and the nymph died. But a cradle fashioned out of its wood had the power of lulling her babe to sleep (W. R. S. Ralston in the *Contemporary Review* 1878 i. 525, Mrs. J. H. Philpot *The Sacred Tree* London 1897 p. 62). A Japanese tale likewise tells how Higo, the nymph of a willow-tree, weds Heitaro, a young farmer, and bears him a child Chiyodō, but vanishes when her tree is cut down (R. Gordon Smith *Ancient Tales and Folklore of Japan* London 1908 p. 12 ff., F. Hadland Davis *Myths & Legends of Japan* London 1912 p. 177 ff.).

¹ Theophr. *hist. pl.* 3. 13. 7 καλοῦσι δὲ οἱ περὶ Ἀρκαδίαν οὐκ ἰτέαν ἀλλὰ ελικῆν τὸ δένδρον· οἰοῦνται δὲ, ὡς περ' Ἐλέχθη, καὶ καρπὸν ἔχειν αὐτὴν ῥόμιμον.

² O. Jahn *Die Entführung der Europa auf antiken Kunstwerken* Wien 1870 p. 23

acutely surmised that Europe's basket was not a mere piece of prettiness but 'vielmehr ein Attribut von tieferer Bedeutung.' In addition to the *amphora* at St Petersburg and the passage from Moschos, he was able to cite from the Waldeck collection at Arolsen a copper of Tyre struck by Gallienus, on the reverse of which appears Europe with her basket (fig. 402). He noted also that a copper struck by Valerian with the same type had been sold at Berlin in 1845. An example of this latter coin now in the British Museum is, however, thus described by Mr G. F. Hill: 'Europa, wearing long chiton and himation, standing to front, holding

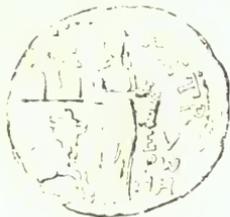

Fig. 402.

in l. a vase, r. hand on breast; on l., approaching her out of the water, forepart of a bull; above it, the Ambrosial Rocks with olive-tree between them; below, murex-shell; in field r., ΕΥΡΩΠΗ; inser. COL TV RO MET' (*Brit. Mus. Cat. Coins Phoenicia* pp. cxlii, 290 pl. 34, 13).

Possibly the flower-basket of Europe was derived from a custom akin to the 'gardens of Adonis.' Mosch. i. 37 (cp. i. 61) speaks of the former as χρύσειον τάλαρον; Theokr. 15. 113 f., of the latter as ἀπαλοὶ κᾶποι πεφιδλαγμένοι ἐν ταλαρίσκοις | ἀργυρούς. The Cretan Zeus was akin to Adonis (*supra* p. 157 n. 3, *infra* ch. i § 6 (g) xxi).

The wicker basket on coins of Kibyra in Phrygia (*Brit. Mus. Cat. Coins Phrygia* pp. xlviii, 135 ff. pls. 16, 9, 17, 5-7, 18, 1 f., 4, 8 f., 51, 3 f.) may have the same significance. I figure two specimens from my collection, a quasi-autonomous copper from the time of M. Aurelius (fig. 403) and a copper struck by Trajan Decius (fig. 404).

Fig. 403.

Fig. 404.

Certain silver coins of Gortyna c. 200-67 B.C. have obv. head of Zeus, rev. Athena holding Nike etc. or Apollon seated on a rock. Both these reverse types are inscribed ΓΟΥΤΤΥΝΙΩΝ ΘΙΒΟΣ. The word ΘΙΒΟΣ has been taken for a dialect form of τόπος (B. V. Head in the *Num. Chron.* New Series 1873 xiii. 117, cp. *Zeitsch. f. Num.* 1874 i. 381), or for a magistrate's name (J. N. Svoronos

careful to put it in her hand even when she is crossing the sea on the bull's back (fig. 405)¹. The Hellenistic poet devotes twenty-six lines to an elaborate description of it². Is it over-rash to

Fig. 405.

conjecture that the very name *Európe* or *Európeia* was a cult-title rightly or wrongly taken to mean the goddess 'of Flourishing Willow-withies'?

Numismatique de la Crète ancienne Macon 1890 i. 177 pl. 16, 14 f., *Head Hist. num.*² p. 467). But the name occurs nowhere else, and no other magistrate ever inscribed his name on coins of Gortyna. Hence it is tempting to regard ΘΙΒΟΣ as a term connected with some religious festival. If so, Europe's basket may give us the clue: cp. Hesych. *s.v.* θίβη· πλεκτὸν τι κιβωτοειδές, ὡς γλωσσοκομείον, θιβωνος· κιβωτός. Κύπριοι. On this group of words see H. van Herwerden *Lexicon Graecum suppletorium et dialecticum* Lugduni Batavorum 1902 p. 370 Append. 1904 p. 102.

¹ A red-figured *amphora* of archaizing style from the Campana collection, now at St Petersburg (Stephani *Vasensamm.* St. Petersburg ii. 241 f. no. 1637 and in the *Compte-rendu St. Pétr.* 1866 pp. 107, 118 f., Atlas pl. 5, 1—3, O. Jahn *op. cit.* p. 22 f.).

² Mosch. 2. 37—62.

³ The name *Εὐρώπη* has been regarded by recent writers (1) as Pelasgian and therefore un-Greek (A. Fick *Vorgriechische Ortsnamen* Göttingen 1905 p. 21): (2) as Phoenician and akin to the Semitic *ereb*, 'western' (H. van Herwerden *Lexicon Graecum suppletorium et dialecticum* Lugduni Batavorum 1902 p. 950), cp. Hesych. *s.v.* Εὐρώπη· χώρα τῆς δύσεως. ἡ σκοτεινὴ and *εὐρωπὸν· σκοτεινόν. πλατύ* and see Gruppe *Gr. Myth. Rel.* pp. 252 Europa, die 'finstere,' 867 von Europa, wahrscheinlich der 'Verfinsterten': (3), as a Greek compound of *εὐρύς* and *οπ*, 'eye,' equivalent in meaning to *Εὐρώπη* (J. Escher-Bürkli in Páuly—Wissowa *Real-Enc.* vi. 1287).

None of these solutions is altogether satisfactory. I assume that *Εὐρώπη*, whatever its real origin, was at one time understood or misunderstood by the Greeks as the feminine of *εὐ-ρωπος*, a compound of *εὐ* and *ῥώπες*, 'willow-withies,' cp. *εὐ-ρωπος* from *εὐ* + *ῥήκη*.

deb. ereth

However that may be, it seems clear that the Gortynian coins represent Europe as a willow goddess. At first she sits pensively in her bare tree, leaning her head on one hand (figs. 391, 392)¹. Then, as the branches begin to leaf, by a subtle change of gesture she raises her head and fingers her fine-spun *chiton* (figs. 393², 394³). Next a strange thing happens. The lines of the tree-trunk shape themselves afresh, and there comes into sight the head of a mighty eagle, betokening the presence of Zeus (fig. 395)⁴. At his advent the tree bursts into bloom. He is on the branch now, an eagle still, but small enough not to scare Europe, who is once more sunk in a reverie heedless of his approach (fig. 396)⁵. A moment later, and the great bird with a glorious spread of wings is in full possession of his lover. With one hand she clasps him to her; with the other she raises her drapery to form a bridal veil (figs. 397⁶, 398⁷). As the consort of Zeus she is henceforward a second Hera. Enthroned on the tree-trunk with the eagle at her side, she borrows the *stephane* and the cuckoo-sceptre of the Argive goddess (fig. 399)⁸. Hera herself did not disdain the title *Europa*⁹.

Sundry details of this remarkable series have yet to be explained. The reverse of every coin shows the divine bull now moving across a grassy plain (fig. 393), now treading on rough ground (fig. 394), now again accompanied by a fly (figs. 392, 397, 399). The fly is hardly to be viewed as a meaningless adjunct. Remembering the gad-fly that pursued the heifer Io¹⁰ and the bees that were believed to issue from the buried bull¹¹, we might even suppose that the fly was an emanation of Zeus himself¹².

⁹ Hesych. *Εὐρωπία*: ἡ Ἥρα.

¹⁰ *Supra* p. 439 ff. If Zeus accompanied Io on her wanderings (Soudi. *s.v.* *Ιως), it may be conjectured that the famous *olorpos* (Roscher *Lex. Myth.* ii. 266) was but Zeus in the shape of a gad-fly. Another possible case of the soul as a fly is noted *supra* p. 469 n. 7.

¹¹ *Supra* p. 514.

¹² Ants, bees, butterflies etc. were often regarded as the soul in insect form (Gruppe

The coins that represent the eagle in Europe's lap often add a bull's head apparently affixed to the trunk of the willow (figs. 397, 398). An interesting parallel is here provided by the Trèves altar, which likewise seems to portray a bull's head high up on a willow-tree¹. Probably the head of the fertilising bull was hung on the trunk to ensure its continued fertility, just as the whole bull was suspended and slain on Athena's olive at Ilion (fig. 406)². An odd custom perhaps susceptible of the same explanation is mentioned by Apollonios of Rhodes, who tells how the Argonauts landed on the Circean Plain :

Fig. 406.

And here there grew
 Many wild oaks and willows in a row
 On whose high tops were corpses hung by ropes
 Fast-bound. For still the Colchians may not burn
 Dead men with fire, nor lay them in the ground
 And pile a mound above them, but must wrap
 In untanned ox-hides and without their town
 Hang them on trees. Howbeit earth obtains
 An equal share with sky, for in the earth
 Their women-folk they bury. Such their rule³.

Gr. Myth. Rel. p. 800 ff.). If Zeus became an ant in Thessaly (Clem. Al. *protr.* 2. 39. 6 p. 30, 1 ff. Stählin *τί δὲ πάλιν Θετταλοί; μύρμηκας ιστοροῦνται σέβειν, ἐπεὶ τὸν Δία μεταθήκασιν ὁμοιωθέντα μύρμηκι τῇ Κλήτορος θυγατρὶ Εὐρυμεδοῦση μὴ γῆραι καὶ Μυρμιδὸνα γενεῆσαι* with schol. *ad loc.*, Clem. Rom. *hom.* 5. 13 (ii. 184 Migne) *Εὐρυμεδοῦση τῇ Ἀχελφού, μύρμηξ γενόμενος, ἐξ ἧς Μυρμιδῶν*, Arnob. *adv. nat.* 4. 26 versus...in formiculam parvulam, ut Clitoris videlicet filiam Myrmidonos redderet apud Thessalos matrem, Isid. *orig.* 9. 2. 75 Eratosthenes autem dicit Myrmidonas a Myrmidone duce Iovis et Eurymedusae filio, Serv. in Verg. *Aen.* 2. 7 Eratosthenes dicit Myrmidonos dictos a rege Myrmidono (*leg.* Myrmidone) Iovis et Eurymedonae (*leg.* Eurymedusae) filio, interp. Serv. *ib.* a rege Myrmidono (*leg.* Myrmidone) Iovis et Eurimedontis (*leg.* Eurymedusae) filio, he may have become a fly in Crete. He would thus have been the Cretan (? cp. Plin. *nat. hist.* 21. 79) equivalent of the Philistine god worshipped at Ekron as *Ba'al Zebub*, a name translated by the LXX *Βάαλ Μυῖα θεός* and best understood of a zoomorphic deity (S. Bochart *Hierozoicon* ed. E. F. C. Rosenmüller Lipsiae 1796 iii. 346 f., W. Drexler in Roscher *Lex. Myth.* ii. 3301 ff.). On Zeus *Ἀπόμυιος* see *infra* ch. ii § 3 (c) iv (β).

¹ *Supra* p. 481 n. 9.

² H. von Fritze in W. Dörpfeld *Troja und Ilion* Athens 1902 ii. 491 pl. 63, 68 f., 514—516, A. Brückner *ib.* ii. 563—566, Nilsson *Gr. Feste* p. 235, P. Stengel *Opferbräuche der Griechen* Leipzig and Berlin 1910 p. 124 f., J. E. Harrison *Themis* Cambridge 1912 p. 164 f. I figure a specimen in my collection.

H. von Fritze *op. cit.* ii. 514 holds that, since inscriptions of Ilion mention *ἡ βοῦς*, the animal hung in the tree must be a cow. But on the coins it is a bull, and it is rightly so described by W. Wroth in the *Brit. Mus. Cat. Coins Troas* etc. pp. 64, 66 ff. pls. 12, 10, 13, 5.

³ Ap. Rhod. 3. 200—209 *ἔνθα δὲ πολλὰ | ἐξέτης πρόμαλοι τε καὶ λῆαι ἐκπεφύασιν, | τῶν καὶ ἐπ' ἀκροτάτων νέκυες σειρήσι κρέμανται | δάσμοι. εἰσέτι νῦν γὰρ ἄγος Κόλχοισιν ὄρωρε | ἀνέρας οἰχομένους πυρὶ καίμεν· οὐ δ' ἐνὶ γαίῃ | ἔστι θέμις στείλαντας ὑπερθ' ἐπὶ*

Was the intention here to communicate the life of the dead to the tree, or the life of the tree to the dead?

The oldest specimens of the Gortynian coins (figs. 391, 392) bear the enigmatic legend *Tityroi* (ΖΟΨΜΣΤ) partly on, partly off the tree. The word appears to be a dialect form of *Tityroi*; and it has been suggested that Tityros was the name of a Cretan township¹. But our evidence for such a town is of the flimsiest². Besides, in Greek numismatics the name of the issuing state is regularly expressed in the genitive, not the nominative, case³. I would therefore submit that *Tityroi* here, as elsewhere, denotes 'Satyrs⁴.' The earliest mention of these woodland spirits makes them akin to the Kouretes⁵—a point insisted on by Strabon⁶; and it is on record that the Kouretes clashed their weapons round the tree in which the cradle of Zeus was hung⁷. Not improbably, then, the *Tityroi* or 'Satyrs' danced round the tree in which Zeus met Europe. Indeed, I would venture to explain the coin-legend by assuming that at Gortyna a yearly festival known as the *Tityroi* was held⁸, at which a Satyric

σῆμα χέσθαι· | ἀλλ' ἐν ἀδειψήτοισι κατελύσαντε βοείαις | δενδρέων ἐξάπτειν ἐκὰς ἀσπεος.
 ἡέρι δ' ἴσσην | καὶ χθῶν ἐμμορον αἰσαν, ἐπεὶ χθονὶ ταρχύουσιν | θηλυτέρας· ἢ γὰρ τε δίκη
 θεσμοῖο τέτυκται. On this see Nymphodoros *frag.* 17 (*Frag. hist. Gr.* ii. 380 Müller)

 σέβονται δὲ μάλιστα οὐρανὸν καὶ γῆν.

¹ Head *Hist. num.*² p. 466.

² Schol. Theokr. 3. 2 ὄνομα κύριον ὁ Τίτυρος, τινὲς [δὲ] φασίν, ὡς τὸ Σιληνὸς ὁ Σικελιώτης. ἄλλοι δὲ τοὺς τράγους· ἕτεροι τοὺς Σατύρους· ἐνιοὶ ὄνομα πόλεως Κρήτης· ἄλλοι δὲ τοὺς προσπόλους τῶν θεῶν· τινὲς δὲ καὶ κάλαμον. οὐκ ἔστι δὲ ἄλλο ἢ ὄνομα αἰπόλου τινός. There was a Mt. Tityros near Kydonia (Strab. 479 τῆς μέντοι Κυθωνίας ὄρος ἐστὶ Τίτυρος, ἐν ᾧ ἱερὸν ἐστίν, οὐ Δικταῖον, ἀλλὰ Δικτύνωνιον, Phrantzes *chron.* i. 34 p. 102 Bekker τὰ δὲ ὄρη τὰ ἐγγύς αὐτῆς (*sc.* Κυθωνίας) τὰ ὑψηλὰ Τίτυρος καλοῦνται).

³ Mr G. F. Hill *A Handbook of Greek and Roman Coins* London 1899 p. 181 puts the matter thus: 'In addition to the use of the genitive and the adjective, there is a rare use of the nominative case. Most of the names in the nominative found on pre-imperial coins seem to be descriptive of types; but such an inscription as ΑΘΕ Ο ΔΕΜΟΣ ('Αθηναίων ὁ δῆμος) is an undoubted instance of the use of the nominative in place of the ordinary genitive.' He does not cite any example strictly parallel to Τίτυροι.

⁴ Prellwitz *Etym. Wörterb. d. Gr. Spr.*² p. 462 f., cp. I. Meyer *Handb. d. gr. Etym.* ii. 746 f.

According to F. Solmsen in the *Indogermanische Forschungen* 1912 xxx. 31 ff., Σά-τυροι and Τί-τυροι are genuine Greek words from the root τῦ, 'to swell,' seen in τίλος, τύμβος, τυρός, ταῦρος, etc. The first element in Σάτυρος reappears in σάθη, σάβυρος, σάραβος, etc. and may be an old word for *phallós*. Τίτυρος shows intensive reduplication (cp. Τίτυός) with poetic lengthening.

⁵ Hes. *frag.* 129 Flach *ap.* Strab. 471. See also Prokl. in Hes. *o. d.* 89.

⁷ *Supra* p. 529 n. 4.

⁸ Mr W. Wroth, with whom I once had the advantage of discussing these coins, approved of my suggestion. For the form of the festival-name cp. the Κισσορῆοι at Phlius (Nilsson *Gr. Feste* p. 39 f.) or such expressions as τραγωδοῖς καινοῖς (Dem. *de cor.*

drama set forth the union of the sky-god Zeus with the earth-goddess Europe. The part of Zeus would be played by one of the Satyrs—if, at least, we may argue from the analogous myth of Antiope, who was wooed by Zeus in the form of a Satyr¹.

The purpose of this mimetic rite would presumably be to promote fertility. The marriage of the earth-goddess in her willow would entail a prosperous year for the whole neighbourhood. Somewhat analogous in its conception is a marble relief of the first century A.D. found at Loukou near Astros in Thyreatis and now at Athens (fig. 407)². A matronly figure sits on a throne, which is adorned with a Sphinx and bears the inscription *Eptktesis*, 'Increase.' Before her on a base is a statue of *Euthentia*, 'Fertility³,' holding a basket of fruit. Behind this goddess rises a smooth Doric pillar, on the top of which stands another goddess in the guise of Artemis *Agrotéra*⁴, who uplifts her hand⁵ close to the branch of a leafy tree. The tree is insufficiently characterised: E. Gerhard took it to be a plane⁶, J. N. Svoronos an olive⁷; most critics are content to call it a tree. Its stem is hidden by the pillar. A fillet hangs from one of its boughs. A snake too, now barely discernible, winds from behind the base of *Euthentia* over the tree-trunk down towards the *phidle* resting on the lap of *Eptktesis*. In the field beside the tree, and in all probability referring to the goddess on the pillar, is the inscription *Teleté*, 'Initiation.' It is,

116), gladiatoribus (Cic. *Phil.* 1. 36). Numismatic parallels are ΔΙΟC ΓΟΝΑΙ (*supra* p. 151 fig. 119) and ΕΙΟΥC ΓΑΜΟΙ (*Brit. Mus. Cat. Coins* Lydia pp. cxlvi, 348 pl. 36, 8) at Tralleis attached to 'scenes in certain religious mysteries connected with the Io legend' (B. V. Head *ib.* p. cxlvi), perhaps also ΟΡΤΥΓΟΘΗΡΑ at Tarsos (*Brit. Mus. Cat. Coins* Lycaonia, etc. pp. lxxxvi f., 182 f. pl. 33, 7) as the name of a 'quail-hunt' in the cult of Sandas or Herakles (see Frazer *Golden Bough*³: Adonis Attis Osiris² pp. 85, 99 n. 2).

¹ *Infra* ch. i § 7 (d). Another version made Zeus consort with Antiope in the form of a bull (*ib.*).

² E. Gerhard in the *Ann. d. Inst.* 1829 i. 132—134 pl. C, Boetticher *Baumkultus* pp. 98, 542 fig. 48, Friederichs—Wolters *Gipsabgüsse* p. 725 no. 1847, H. von Protz in the *Ath. ³ *Id. ib.*

Willows¹(?), Pausanias saw a statue of Orpheus with Telete at his side². And in Polygnotos' great fresco of the Underworld at Delphoi Orpheus was painted leaning against a willow and touching its branches with his hand³, just as Telete in this relief stands beside the tree close up against its foliage. Both he and she derived fertility from contact with the sacred tree. The relief from Loukou was probably set up over the grave of an Orphic votary. The Sphinx spells Chios; and J. N. Svoronos cites an example of the rare name Epiktesis from a Chian inscription⁴. We may therefore unreservedly accept the view propounded by this acute scholar, that the dead woman, thanks to her well-omened name, was conceived henceforward as a new heroine of 'Increase' to be revered along with the older goddess of 'Fertility'⁵.

Details apart, it is abundantly clear that Europe was at first an earth-goddess worshipped at Gortyna in a sacred tree. For all that, there is good reason to think that she ultimately came to be regarded as the moon. Her mother was *Teléphassa*⁶, the 'Far-shining,' or, according to another and probably older account, *Argiôpe*⁷, the 'Bright-eyed,' both names being possible appellations of a moon-goddess. *Eurôpe* herself bore an equivocal title, which to ancient⁸, as to modern⁹, speculation would readily suggest the 'Broad-eyed' moon. W. H. Roscher compares it with that of *Eurypháessa*, the 'Broad-shining' mother of Selene¹⁰. He also points out that Europe riding a white bull¹¹ resembles Selene riding

538 Marriage of the Sun and Moon in Crete

on a bull or drawn in a chariot by white bulls or cows¹, and that Europe², like Selene³, was regarded as a huntress. His argument will appeal to the eye, if we compare the common Greek type of Europe with certain Roman types of Selene (fig. 408)⁴, of Artemis *Tauropólos* (fig. 409)⁵, and of Nike riding on the lunar Apis (fig. 410)⁶.

Fig. 408.

Fig. 409.

Fig. 410.

Europe, however, does not become demonstrably lunar till she reaches Phoinike⁷ and is identified with Astarte. The most important piece of evidence is a passage in the treatise *On the Syrian Goddess*:

There is another large temple in Phoinike, at Sidon. The Sidonians call it the temple of Astarte, and Astarte I take to be Selenaiā. But, as one of the priests informed me, it is the temple of Europe the sister of Kadmos. She was the daughter of king Agenor, and after her disappearance the Phoenicians honoured her with the temple and told a pious tale about her to the effect that Zeus, desirous of her beauty, took the form of a bull and carried her off, bearing

her to Crete. The rest of the Phoenicians gave me the same story—and indeed the coinage in use at Sidon shows Europe seated on the bull Zeus,—but they do not allow that the temple is that of Europe¹.

Coppers of Sidon from c. 174 B.C. onwards exhibit the type in question (fig. 411)², but in no way confirm the identification of Europe with the moon³. A later rationalising account in Ioannes Malalas states that at Tyre the rape of Europe was commemorated in the evening, which would at least suit a lunar connexion:

‘Tauros king of Crete attacked the city of Tyre and, after winning a sea-fight, captured it in the evening. He spoiled the place and took many prisoners, among them Europe, daughter of the king Agenor. Agenor and his sons were away on the frontier fighting; wherefore Tauros king of Crete made a sudden attack by sea. To this day the Tyrians commemorate that evening calling it *Kakè Opsinè*, “Evil Gloaming.” Tauros carried off Europe to his own country, and, since she was a virgin and comely withal, took her to wife. Moreover, he called those parts Europe after her⁴.’

Fig. 411.

Again, Phoenician and lunar elements are discernible in the myth that associates Europe with the founding of Thebes⁵. The scholiast on the *Iliad*⁶, who cites as his sources the *Boiotiaka* of Hellanikos⁷ and the *Bibliothèque* of Apollodoros⁸, tells the tale as follows:

‘Boiotia used to be called Aonia from the Aones, who dwelt there. Its name was changed to Boiotia, according to some, by reason of Boiotos the son of Poseidon and Arne, according to others, by reason of the cow driven by Kadmos at the bidding of the Pythian oracle. For, when Europe, the daughter of Phoinix, was carried off from Sidon by Zeus, Kadmos her brother was sent by her father in quest of her. Having failed to find her, he repaired to Delphoi to consult the god. The god bade him trouble no more about Europe but take as

¹ Loukian. *de dea Syr.* 4.

² *Brit. Mus. Cat. Coins Phoenicia* p. cvii f. and p. 316 Index. I figure the reverse of a copper, struck by Elagabalos, in my collection: A P | SI DON | COLMET = *Aurelia Pia* | Sidon | Colonia Metropolis. This coin ingeniously suggests that the bull is about to cross the sea by putting a short ground-line beneath his hind-legs.

³ K. Hoeck *Kreta* Göttingen 1823 i. 93, 96 interprets the crescent-shaped veil of Europe as a lunar trait. But see L. Stephani in the *Compte-rendu St. Pt.* 1866 p. 125 f. *Id. ib.* p. 105 notes also that the comparison of the bull’s horns with the horns of the moon, though emphasised in literature (Mosch. 2. 87 f., Ach. Tat. 2. 15), is never brought out in art.

⁸ Apollod. 3. 4. 1 f.

his guide a cow and found a city wherever this cow, tired with the way, lay on its right side. On receipt of this oracle he pursued his course through Phokis. He next fell in with a cow among the herds of Pelagon and followed after her as she went. She, passing throughout Boiotia, tired and lay down on the spot where Thebes is now. Kadmos, wishing to sacrifice the cow to Athena, sent some of his men to fetch lustral water from the spring of Ares. But the snake that guarded the spring and was said to be the child of Ares slew most of those whom he sent. Kadmos in anger killed the snake and, at Athena's suggestion, sowed its teeth. From them sprang the earth-born ones. Ares was enraged at this and about to destroy Kadmos, when Zeus prevented him. Zeus gave him to wife Harmonia, the daughter of Ares and Aphrodite, but first bade him in return for having destroyed the snake serve for a year¹; the Muses were to sing at his wedding, and each of the gods to bestow a gift upon Harmonia.²

The whole story gains immensely in coherence and significance, if we assume that the guiding cow was none other than Europe in animal form. The lost sister is thus recovered at the last, and the Pythian oracle is vindicated from the charge of irrelevance. Besides, it was, to say the least of it, appropriate that Zeus as a bull should mate with Europe as a cow. If that be so, some further details of the story are of interest. Pausanias, reporting the local Theban tradition, states 'that this cow was purchased from the cowherds of Pelagon, and that on each of the cow's flanks was a white mark like the circle of the moon, when it is full².' Pausanias adds that the place, where the cow sank down exhausted, was still shown, that there was an open-air altar on the spot and an image of Athena dedicated by Kadmos, and that this Athena bore the Phoenician title *Ónga*³. A scholiast on Euripides⁴ gives what purports to be the actual oracle delivered to Kadmos⁵:

Kadmos, Agenor's son, mark well my word.
At daybreak rise, quit Pytho the divine,
And clad as thou art wont, with oaken spear
In hand, fare forth through Phlegyai and Phokis
Until thou reach the cowherd and the cows
Of Pelagon Fate's nurseling. Then draw nigh,
And take the lowing cow whose either flank

¹ Cp. Apollod. 3. 4. 2 *Κάδμος δὲ ἀνθ' ὧν ἔκτεινεν ἄλδιον* ("Apeos υἱὸν Hercher, ἀνδρῶν Sevinus) *ἐνιαυτὸν ἐθήτευσεν* "Apei" ἦν δὲ ὁ ἐνιαυτὸς τότε ὀκτῶ ἔτη.

² Paus. 9. 12. 1. Two Egyptising altars of Roman date, formerly in the Towneley collection and now in the British Museum (*Brit. Mus. Marbles* x pls. 51, 52, *Brit. Mus. Cat. Sculpture* iii. 390 ff. nos. 2494, 2495, Reinach *Rég. Reliefs* ii. 482 nos. 1—4, 5—8), represent a bull with a six-rayed star and another with a crescent moon on his flank. A relief in a tomb of the Roman period at *Kom el Chougafa* shows the Pharaoh offering incense (?) to a statue of Apis, who has a crescent on his side (F. W. von Bissing *Les Bas-reliefs de Kom el Chougafa* Munich 1901 pl. 9 Text p. 7).

³ Paus. 9. 12. 2. On the site and significance of this cult see Frazer *Pausanias* v. 48 f.

⁴ Schol. Eur. *Phoen.* 638.

⁵ Nonn. *Dion.* 4. 293 ff. is another attempt to hitch the supposed oracle into verse.

Hath a white mark round as the rounded moon :
 Follow her guidance on thy trodden track.
 Yea, and a token plain will I declare
 Such as thou canst not miss. When first the horn
 Of the ranging cow is lowered and her knee
 Sinks on the grassy plain, then do thou straightway
 Offer her with pure hand and heart to Earth
 The dark-leaved and, thine offering complete,
 Upon the hill-top build a broad-wayed town,
 Sending the War-god's guardian fierce to Hades.
 And famous among men shall be thy name,
 Blest Kadmos, who hast won a deathless bride.

This cow, which was believed to have given its name to Boiotia¹ and to the Boeotian mountain Thourion², is connected by Prof. von Baudissin with the Phoenician moon-goddess on account of its moon-like marks³. The connexion is probable enough, and, if (as I have suggested) the cow was Europe, my original contention that Europe became a moon-goddess owing to Phoenician influence is established.

Dr Frazer's other example of sun-and-moon marriage was that of Minos with Britomartis or Diktyнна⁴. But again I must insist that neither Diktyнна nor Britomartis was originally lunar. Diktyнна was a Cretan form of the mountain-mother⁵, whose name probably hangs together with that of Mount Dikte or Dikton⁶. Coins of the province struck by Trajan represent her seated on her rocks between a couple of Kouretes as nurse of the infant Zeus (fig. 412)⁷. Here, as

Fig. 412.

¹ *Supra* p. 539, schol. Eur. *Phoen.* 638.

² Plout. *v. Sull.* 17 ὅρ γάρ οἱ Φοίνικες τὴν βοῦν καλοῦσι. This is much nearer the mark than the statement of schol. Eur. *Phoen.* 638 ἠκοδόμησε τὰς Θήβας· θήβα γὰρ Συριστὶ λέγεται ἡ βοῦς, cp. *et. mag.* p. 450, 41 f. A 'cow' is in Syriac *tôrêthâ*, Aramaic *îôr*, Hebrew *îor*, which point to an original Semitic form *šauru*: the word appears to have been borrowed by the Semites from the Indo-European area, rather than *vice versa* (Walde *Lat. etym. Wörterb.* p. 616 f.: but see H. Möller *Vergleichendes indogermanisch-semitisches Wörterbuch* Göttingen 1911 p. 255 f.).

⁶ See K. Wernicke in Pauly—Wissowa *Real-Enc.* ii. 1371, O. Jessen *ib.* v. 587. H. Usener *Götternamen* Bonn 1896 p. 41 f. observes that Δικτυнна is the feminine form of Δικτυς, as Δικτυη of *Δικτυς. In Serv. *in Verg. Aen.* 3. 171 the eponymous nymph of Mt Dikte is named *Dicte*; but the interp. Serv. *ib.* tells of her. the tale that is elsewhere told of Britomartis.

⁷ J. N. Svoronos *Numismatique de la Crète ancienne* Macon 1890 i pl. 33, 23 (iny

542 Marriage of the Sun and Moon in Crete

elsewhere¹, she is assimilated to the huntress Artemis—an assimilation which in literature can be traced back to the time of Euripides². Britomartis too, a goddess closely related to Diktynna³, was readily equated with Artemis⁴. A silver coin of Chersonesos to the north of the Dikte range has for its obverse a noble head of Zeus wearing a bay-wreath and for its reverse a goddess sitting on a decorated throne with a hind erect upon her outstretched palm (fig. 413)⁵. There can be little doubt that the die-sinker has

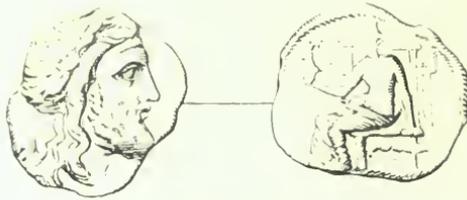

Fig. 413.

copied the actual cult-statue of Britomartis, who is known to have had a temple at Chersonesos⁶. Nor is the combination of Zeus with Britomartis meaningless: the two were linked

(fig. 412) and 24, *Brit. Mus. Cat. Coins Crete etc.* p. 3 pl. 1, 9, *Head Hist. num.*¹ p. 384, F. Imhoof-Blumer in the *Journ. Intern. d'Arch. Num.* 1908 xi. 142 ff. pl. 9, 8.

¹ A copper of Domitian shows ΔΙΚΤΥΝΝΑ | ΣΕΒΑΣΤΗ as Artemis the huntress with bow and bound (Svoronos *op. cit.* i. 343 pl. 33, 17, *Head Hist. num.*² p. 479).

² Eur. *I. T.* 126 ὦ παῖ τὰς Λατοῦς, Δίκτυνν' οὐρέϊα, Aristoph. *ran.* 1359 f. ἀμα δὲ Δίκτυννα παῖς Ἄρτεμις καλὰ | τὰς κινύσκας ἔχουσα ἐλθέτω κ.τ.λ.

If we may trust Solin. 11. 8 Cretes Dianam religiosissime venerantur, Britomartem gentiliter nominantes, quod sermone nostro sonat virginem dulcem (cp. Hesych. βριτύ· γλυκύ· Κρήτες repeated in Favorin. *lex.* p. 391, 11; Steph. Byz. s.v. Γάζα...τὰς παρθένους γὰρ οὕτω Κρήτες προσαγορεύονσι μαρβάνς, *infra* p. 149 n. 1), Βριτόμαρτις was probably a cult-epithet of Diktynna.

⁴ Schol. Kallim. *h. Artem.* 190 Βριτόμαρτις ὄνομα κύριον τῆς νύμφης, ἀφ' ἧς καὶ ἡ Ἄρτεμις ἐν Κρήτῃ Βριτόμαρτις τιμᾶται, ὡς Διογενιανός, Hesych. Βριτόμαρτις· ἐν Κρήτῃ ἡ Ἄρτεμις. In Delos the festival of Britomartis followed immediately upon that of Artemis (Nilsson *Gr. Feste* p. 209 citing *Bull. Corr. Hell.* 1882 vi. 23 line 186 Ἄρτεμισίους Βριταμαρτίους).

⁵ Drawn from a specimen in my collection. The only other specimen of this fine coin known to me is that in the British Museum, which owing to its poor state of preservation was wrongly described by W. Wroth in the *Num. Chron.* Third Series 1895 xv. 96 f. pl. 5, 11. Mr E. J. Seltman, from whom I procured my coin, points out that 'The seated Artemis with the deer on her hand forms an interesting pendant to the standing Apollo with the deer by Canachus' (Plin. *nat. hist.* 34. 75, *alib.*; *Brit. Mus. Cat. Coins Ionia* p. 197 ff. pl. 22, 9 f.).

⁶ Strab. 479 Λύττον δέ...ἐπίκεινόν ἐστιν ἡ λεγομένη Χερρόνησος, ἐν ᾗ τὸ τῆς Βριτομάρτιος ἱερόν. According to Solin. 11, 8 aedem numinis (sc. Britomartis) praeterquam nudus vestigia nullus licito ingreditur. ea aedes ostentat manus Daedali.

together at least in one remarkable tradition¹. When Artemis came to be regarded as a moon-goddess², the way was open for Diktyнна on the one hand³, Britomartis on the other⁴, to be identified with the moon⁵. But it must be observed that this identification was not made till Roman times; and even then no hint is dropped that the consort of Diktyнна or Britomartis was solar. It is, therefore, highly precarious to quote the myth of Minos and Britomartis or Diktyнна as a case of sun-and-moon marriage.

xix. Zeus and the Bovine Figures of Cretan Mythology.

In the last section we considered the myth of Pasiphae at Knossos and the myth of Europe at Gortyna. Both were found to involve the agency of a great fertilising bull. But here their resemblance ended; for, whereas the story of the bull and Pasiphae pointed to the annual celebration of a sun-and-moon marriage at Knossos, the story of the bull and Europe pointed rather to the annual celebration of a sky-and-earth marriage at Gortyna. It remains to ask what was the relation of Zeus to the bovine figures of both myths.

The Cnossian myth dealt with a solar bull, a lunar cow, and their offspring the semi-bovine Minotaur, whose astral character was indicated by his name *Astérios* or *Asterion*. We have here evidence of a religious complex, forming an independent whole and apparently of great antiquity. Aegean place-names suggest that this cult of sun, moon, and stars was not confined to Crete, but extended to other islands⁶. Its connexion with Zeus, however, is

¹ Neanthes of Kyzikos *frag.* 23 (*Frag. hist. Gr.* iii. 8 Müller) *ap.* Favorin. *lex.* p. 391, 7 ff. and *et. mag.* p. 214, 26 ff. Νεάνθης ἐν τῷ πρώτῳ Περὶ τελετῶν φησι χρησμὸν Διὸς δοθῆναι, ὅτι ὁ ἐκ τῆς μήτρας τῆς Ἑκάτης γενησόμενος μεταστήσει τῆς βασιλείας αὐτὸν· γεννώσης δὲ τῆς Ἑκάτης, τὰς συμπαρούσας κόρας τῇ λεχοῖ ἀναβοῆσαι βριττον, τοῦτ' ἔστιν ἀγαθόν· παρὰ τοῦτο δὲ ἐπίφθεγμα ὠνομάσθαι τὴν θεόν. Zeus is here apparently the father of Britomartis by Hekate.

⁶ (1) Hesych. Ἄστερη· ἡ Κρήτη καὶ ἡ Δήλος οὕτως ἐκαλοῦντο. (2) Asteria as a former name of Delos (Pauly—Wissowa *Real-Enc.* ii. 1780 f.: add schol. Ap. Rhod. 1.

late and superficial. Pasiphae's bull according to certain Roman mythographers was sent by Zeus¹, according to Christian writers of the fourth and subsequent centuries was Zeus himself². But no ancient authority, either classical or post-classical, can be cited in support of the view that the Minotaur was Zeus incarnate³.

On the other hand, from Hesiodic⁴ and even Homeric⁵ times onward Zeus figured as the partner of Europe. The bull that bore her from Phoinike to Crete, though sometimes said to have been sent by Zeus⁶, is usually described as the god himself in animal shape⁷. In short, Zeus as a bull is an integral part of the Europe-myth. But here the moon was a much later accretion⁸, and the sun a mere afterthought, perhaps not even that⁹.

307, Verg. *culex* 15, Solin. 11. 19) was derived from the Titaness Asteria or Asterie, whose tale was variously told. To escape wedlock with Zeus, she flung herself into the sea like a star (Kallim. *h. Del.* 36 ff.) or a quail (Apollod. 1. 4. 1). She scorned the advances of Zeus, and he, to punish her, changed her into a quail and cast her into the sea, where she became *Ortygia*, the 'Quail'-island, later called Delos (Hyg. *fab.* 53, Lact. *Plac. in Stat. Theb.* 4. 796, cp. schol. Lyk. *Al.* 401, Serv. *in Verg. Aen.* 3. 73, Myth. Vat. 1. 37, 2. 17, 3. 8. 3). She was ravished by Zeus, who took the form of an eagle (Ov. *met.* 6. 108). She was wooed by Poseidon, not Zeus (Nonn. *Dion.* 2. 124 f., 33. 336 ff., 42. 410). Zeus became a quail to consort with her sister Leto (schol. Pind. *Pyth. arg.* p. 297 Boeckh) or changed Leto into a quail (Serv. *in Verg. Aen.* 3. 72). Asteria bore to Zeus Hekate (Mousaios *ap. schol. Ap. Rhod.* 3. 467, Cic. *de nat. deor.* 3. 46) and the Phoenician Herakles (Eudoxos of Knidos *ap. Athen.* 392 D, Cic. *de nat. deor.* 3. 42). Others connected the name Asteria with the cult of Apollon (Solin. 11. 19). (3) Asteria was an old name of Rhodes (Plin. *nat. hist.* 5. 132). (4) The *Ἀστέρειον νῆσος* off Lade contained a tomb of Asterios, son of Anax son of Ge, with a corpse ten cubits long (Paus. 1. 35. 6). (5) Hesych. *Ἀστέρειον*: οἱ πρῶτοι τὴν Τένεδον κατοικήσαντες. (6) *Ἀστέρεις*, the island near Ithake, was later known as *Ἀστέρεια* (Pauly—Wissowa *Real-Enc.* ii. 1787).

⁸ *Supra* p. 537 ff.

⁹ The circle of rays surrounding the bull (*supra* p. 472 fig. 328) and Europe (*supra* p. 529 fig. 400) on coppers of Gortyna is possibly solar (cp. J. N. Svoronos in the *Bull. Corr. Hell.* 1894 xviii. 118); but, since it occurs also on other coins of the same town with types of an eagle grasping a snake (J. N. Svoronos *Numismatique de la Crète ancienne* Macon 1890 i. 174 pl. 16, 3, *Brit. Mus. Cat. Coins* Crete etc. p. 44 pl. 11, 10) or a naked male figure with shield and spear (Svoronos *op. cit.* i. 175 f. pl. 16, 8, 9, 10,

The conclusion to which these facts point is tolerably clear. At Knossos, where sun, moon and stars were essential, Zeus was not. At Gortyna, where Zeus was essential, sun, moon and stars were not. It follows that at Knossos and Gortyna Zeus had originally nothing to do with sun, moon and stars. Those writers that distinguish a Cretan solar Zeus from the ordinary Hellenic sky-god¹ must look elsewhere for arguments. The Gortynian Zeus was indeed, like Apollon at Athens, called *Hekatómbaios*; but he shared that title with the Arcadian Zeus². And the oxen slain on his altar need not imply that he was solar. They would be equally appropriate to any fertilising god³.

It remains, of course, both possible and probable that sooner or later the Zeus of Gortyna took on a solar complexion. If Europe under Phoenician influence became the moon⁴, there was every inducement for Zeus to become the sun. Now Byzantine scholars actually mention a Gortynian cult of Zeus *Astérios*⁵. There is therefore much to be said for Dr Farnell's conjecture that Zeus

12, *Brit. Mus. Cat. Coins Crete* etc. p. 44 pl. 11, 9), I should prefer to regard it as a glory suitable to any divine personage. It is hardly to be classed as a 'purely decorative border' (G. F. Hill *A Handbook of Greek and Roman Coins* London 1899 p. 158).

¹ E.g. Gilbert *Gr. Götterl.* p. 459: 'die Zeusmythologie von zwei völlig verschiedenen Ausgangspunkten sich entwickelt hat, indem der kretische Zeus, Zeus Kronion, ein durchaus anderer ist als der Zeus Pelasgikos der Achaeer: ist jener ein Sonnengott, so ist dieser ein Himmelsgott,' cp. *ib.* 293 'Die Geburt des Zeus auf Kreta ist ein feststehendes Dogma des hellenischen Glaubens und der hier geborene Sonnen-Zeus ist ein völlig anderer als der hellenische Himmelszeus,' *alib.*

546 Zeus and the Bull in Cretan Myth

Astérios was a sun-god of Phoenician character¹. Only, we must suppose that this solarisation of the Gortynian Zeus took place at a comparatively early date. The relevant facts are these. The Cnossian Minotaur, who in some sense represented the sun-god², was called *Astérios* or *Asterion*³. At Gortyna too the sun-god must have been worshipped; for here he had herds of cattle⁴.

Fig. 414.

Hesiod, Bakchylides and others state that Zeus, having consorted with Europe, bestowed her upon the Cretan king *Asterion*⁵ or

¹ Farnell *Cults of Gk. States* i. 44, citing the opinion of W. Robertson Smith (*Lectures on the Religion of the Semites*² London 1907 p. 292) that Zeus' *Ἀστῆριος* was the male counterpart of Astarte.

² *Supra* p. 490 ff.

³ *Supra* pp. 492, 495.

⁴ *Supra* pp. 410 n. 9, 471 n. 4.

⁵ Hes. *frag.* 209 Flach and Bakchyl. *frag.* 47 Jebb *ap. schol. Il.* 12. 292, Apollod. 3. 1. 2 (*supra* p. 464), Nonn. *Dion.* 1. 353 ff., 2. 693 ff., *et. mag.* p. 588, 24 ff.

*Astérios*¹ or *Asteros*², who married her and, being childless himself, reared the children that she bore to Zeus. Finally, Tzetzes asserts that Sarpedon, Minos, and Rhadamanthys, these very fosterlings, were the sons of Zeus *Astérios*³. It looks as though the contamination of the Gortynian Zeus with the solar cycle had begun as early as c. 700 B.C. At what date king *Asterion* or *Astérios* developed into Zeus *Astérios*, it is hard to say. A red-figured *amphora* and red-figured fish-plates at Saint Petersburg show Europe on the bull approaching Crete, where she is met by a Zeus-like king, presumably *Asterion* or *Astérios*. He advances to greet her sceptre in hand (fig. 405)⁴, or awaits on his throne the arrival of her *cortège*, the coming marriage being indicated by the presence of two Erotes (fig. 414)⁵. Perhaps the shift from king *Astérios* to Zeus *Astérios* was the work of the Hellenistic age—an age notoriously marked by recrudescence of the early belief in the essential divinity of kings⁶.

But by Hellenistic times *Astérios* had ceased to connote 'Solar.' To the average understanding the word now meant 'Starry' and nothing else. Hence Zeus was brought into more definite relation to the starry sky. Silver coins of Crete struck by Nero show Zeus with a thunderbolt in one hand, a sceptre in the other, surrounded by seven stars (fig. 415)⁷. A copper struck by Titus represents Zeus *Kretagenés* amid the same group of stars in the act of hurling his bolt (fig. 115)⁸. On another copper struck by Trajan the infant Zeus is seated on a globe with a goat beside him and the stars above (fig. 28)⁹. Nor was the connexion between the god and the king forgotten. We have already compared the last-named coin-type with that on which Domitian's infant son appears sitting on a globe and flanked by the stars (fig. 27)¹⁰. Similarly silver coins of

548 Zeus and the Bull in Cretan Myth

Crete struck under Caligula and Claudius have a head of Augustus with radiate crown (fig. 416)¹, or Augustus radiate with sceptre and *phidie* sitting on a curule chair (fig. 417)² or on a car drawn by four elephants (fig. 418)³, in each case encircled by the same seven stars. The emperor poses as the Cretan Zeus⁴.

Fig. 415.

Fig. 416.

What was this group of seven stars? Dr B. V. Head, who formerly⁵ left them nameless, now⁶ follows J. N. Svoronos⁷ in identifying them with the *septem triones*⁸, the 'seven stars' *par excellence*, best known to us as the Great Bear. They are in fact sometimes (fig. 418) grouped about the divinised emperor in ap-

Fig. 417.

resemblance to a 'Willow' or a 'Willow'-leaf¹. If so, the sacred tree of Europe attained a scientific euthanasia in the text-books of Hellenistic astronomy, as did the bull of Zeus, which was likewise placed among the stars to be the constellation Taurus².

xx. The Bull and the Sun in Syria.

(a) Zeus *Ádados* and Iupiter *Heliopolitanus*.

The bull appears as a sacred animal in connexion with the sky-gods of Syria also. And here again the cults in question took on a solar character and were ultimately fused with that of Zeus or Iupiter.

This was the case with Adad or Hadad, 'king of the gods' and consort of Atargatis. Since a common designation of Adad describes him as a deity of the west or Amurru⁴, it has been conjectured that he was originally a god of the Amorites, imported into the Euphrates-valley by an Amoritish wave of migration. However that may be, his worship, widely spread in Palestine and Syria⁵, had reached Greece before the close of the second century B.C.—witness a series of inscriptions found by the French in Delos⁶. From these it appears that a certain Achaïos son of Apollonios, a native of Hieropolis resident among the Delians, dedicated a temple etc. 'to Adatos and Atargatis the gods of his fatherland' and was elected, presumably by his fellow-countrymen, to serve as priest thereof for the year 137–136 B.C.⁷. Repairs of the sanctuary

¹ The Chinese regard as a Willow-leaf the stars $\delta, \epsilon, \xi, \omega, \theta, \rho, \eta, \varsigma$ of the constellation Hydra (G. Schlegel *Uranographie chinoise* The Hague 1875 cited by A. de Gubernatis *La Mythologie des Plantes* Paris 1882 ii. 337–340).

Others took the constellation to be Pasiphae's bull or the Marathonian bull (schol. *Arat. phaen.* 167), or Io the cow (Hyg. *poet. astr.* 2. 21). It is probable too, though not certain, that the same constellation was sometimes regarded as the bull-form of Dionysos (A. W. Curtius *Das Stiersymbol des Dionysos* Köln 1892 p. 6 ff., Gruppe *Gr. Myth. Rel.* p. 825 n. 3 and p. 943 n. 2).

were carried out in the priesthood of Seleukos son of Zenodoros, another Hieropolitan¹. A third priest, the son of one Apollonides, hailed from the same town². But after a time the little Syrian community had perforce to content itself with Athenian priests³, and was so far Hellenised as to acquiesce in a dedication 'to Zeus *Adados*'. The cult was now strengthened by the addition of the ever-popular Asklepios⁴ and the identification of Atargatis with Aphrodite *Hagne*⁵, who however seems gradually to have ousted Adad from his place of honour⁷.

The worship of Adad continued to spread westward, but from a second centre of diffusion and with a slightly different complexion. At *Baalbek*, an old town⁸ between the ranges of Libanos and Antilibanos, the Syrian god was so far solar that, when in the age of the Diadochoi Greek settlers occupied the site, they identified him with their own Helios and named the town Heliopolis. This name, which survived an influx of Roman colonists probably in the time of Augustus⁹, enabled the priests of the Egyptian Heliopolis to claim that the Syrian cult was a mere off-shoot of their own¹⁰. But there is no doubt that they were wrong: the Heliopolitan god was essentially a Grecised form of the Syrian Adad. If colonists

⁷ A. Hauvette-Besnault in the *Bull. Corr. Hell.* 1882 vi. 487.

⁸ The name *Baalbek* means 'Lord of the Beka,' i.e. of the fertile valley between Libanos and Antilibanos. My friend Prof. F. C. Burkitt kindly informs me that the word *Beka* itself is of unknown significance. He adds that the name *Baalbek* occurs c. 400 A.D. in the 'Exploits of Mar Rabbūla' p. 196, last line (*infra* p. 555), and even before 340 A.D. in Eusebios *Theophania* 2. 14—a work extant only in the ancient Syriac translation (Brit. Mus. Add. 12150: the MS. is dated 411 A.D.). The passage in question, containing the earliest mention of *Baalbek*, is thus translated by S. Lee (*Eusebius Bishop of Caesarea on the Theophania* Cambridge 1843 p. 74): 'And, that such were the things which they did, when assimilating themselves to their Deities, we can readily shew from this, that the Phenicians our neighbours, as we ourselves have seen, are busied with these things, even now, in Baalbeck: the ancient injurious excesses and corrupting paths of vice, being persevered in there, even to this time; so, that the women there enter not into the bands of lawful marriage, until they have been first corrupted in a way contrary to law, and have been made to partake in the lawless services of the mysteries of Venus.' Cp. *infra* p. 554 n. 4.

⁹ O. Puchstein *Führer durch die Ruinen von Ba'albek* Berlin 1905 p. 4, cp. Kornemann in Pauly—Wissowa *Real-Enc.* iv. 552.

¹⁰ *Infra* pp. 552, 572 ff.

came from Rome to *Ba'albek*, Adad found his way from *Ba'albek* to Rome. In the grove of Furrina on the east side of the Ianiculum several foreign deities were worshipped. Here an altar has recently come to light bearing the three-fold inscription 'to the god *Adados*,' 'to the god *Adados* of Libanos,' and 'to the god *Adados* of the Mountain-top'.¹ These titles perhaps indicate the growing tendency to equate Adad with Zeus the mountain-god rather than with Helios. Indeed, the Romans in general spoke of him as Iupiter *Heliopolitanus*. Antoninus Pius (138-161 A.D.) began² and his successors down to Caracalla (211-217 A.D.) helped to complete on the akropolis of *Ba'albek* a sumptuous complex of buildings, which included temples of Iupiter and Bacchus. Of these we shall have more to say. For the moment we are concerned to note that, starting from this great cult-centre, the worship of Iupiter *Heliopolitanus* travelled far afield. He is mentioned, for example, in inscriptions from Athens³, from Aquincum⁴ Carnuntum⁵ and Siscia⁷ in Pannonia, from the Latovici on the borders of Venetia⁸, from Puteoli⁹, the Portus Romanus¹⁰ and Rome itself¹¹, from

¹ A Phoenician dedication 'to the Baal of Libanon, his Lord' has been found in Kypros (*Corp. inscr. Sem.* no. 5, W. W. Baudissin *Adonis und Esmun* Leipzig 1911 pp. 37, 66).

As to the character and ritual of the cult thus propagated an interesting account is given by Macrobius⁴ (*c.* 400 A.D.):

'The Assyrians too worship the sun under the name of Jupiter, Zeus *Helioupolltes* as they call him, with important rites in the city of Heliopolis. The image of the god was taken from a town in Egypt⁵, which is likewise named Heliopolis, in the days of Senemuris or Senepos king of the Egyptians, and was conveyed to its destination first by Opias, legate of Deleboris king of the Assyrians, and by Egyptian priests, the chief of whom was Partemetis. After being kept for long by the Assyrians, it subsequently reached Heliopolis. Why this was done, and how, starting from Egypt, it came to be where it now is, an object worshipped with Assyrian rather than Egyptian rites, I refrain from saying, since it has nothing to do with the matter in hand. But that this divinity is at once Jupiter and the sun is manifest both from the nature of its ritual and from its outward appearance. It is in fact a golden statue of beardless aspect, standing like a charioteer with a whip in its raised right hand, a thunderbolt and corn-ears in its left—attributes which all indicate the combined power of Jupiter and the sun.

'In the cult attaching to this temple divination is a strong point; and divination is regarded as the prerogative of Apollon, who is to be identified with the sun. The image of the god of Heliopolis is carried on a litter resembling those used for the images of the gods at the procession of the Circus Games. It is usually borne by the chief men of the district. They shave their heads, purify themselves by a prolonged period of chastity, and are moved by the divine spirit, carrying the litter not according to their own inclination but where the god impels them to go⁶; just as at Antium we see the images of the *Fortunae* move forwards to deliver their responses. Persons at a distance also consult this god, sending documents folded and sealed: he replies in order to the contents about which they express a wish to consult him. Thus, when the emperor Trajan was going to lead an army from that district into Parthia, certain friends of his, devout men whose faith in this deity was based on convincing proofs, advised him to consult the oracle about the issue of his enterprise. Acting with Roman prudence, he first tested its trustworthiness, to make sure that human guile had no hand in the matter. He began by sending a sealed letter, to which he desired a written reply. The god bade paper be brought,

⁶ Cp. *supra* p. 357.

sealed, and sent off, with nothing written on it. The priests, ignorant of the real circumstances of the correspondence, were fairly amazed at this action. Trajan, on receiving his answer, was deeply impressed; for he himself had sent a blank sheet to the god. He then wrote and sealed another letter, in which he asked whether he would return to Rome when the war was over. The god thereupon ordered that a centurion's vine-staff, one of the offerings dedicated in his temple, should be brought, broken into bits, wrapped in a handkerchief, and taken to him forthwith. The issue of the thing became clear when Trajan died and his bones were brought back to Rome. For the appearance of his remains was indicated by the broken pieces, and the time of his approaching death by the fact that it was a vine¹.

'To prevent my argument from ranging through a whole list of divinities, I will explain what the Assyrians believe concerning the power of the sun. They have given the name *Adad* to the god² whom they venerate as highest and greatest. The name is interpreted to mean "One One³." Him therefore they adore as a god mighty above all others. But with him they associate a goddess called *Adargatis*⁴. To these two they ascribe all power over the universe, understanding them to be the sun and the earth. They do not mark the subdivision of their power into this, that, and the other sphere by means of numerous names, but prefer to show forth the manifold glory of the double deity by the attributes with which they are adorned. These attributes of themselves proclaim a solar character. The image of *Adad* is seen conspicuous with rays slanting downwards, which shows that the force of the sky consists in the sunbeams sent down to the earth. The image of *Adargatis* is conspicuous with rays turned upwards, to show that whatever the earth produces springs from the force of the beams sent up on high⁵. Beneath this same image are the forms of lions, showing that it stands for the earth; just as the Phrygians represent the Mother of the gods, that is the earth, carried by lions.'

It might be inferred from Macrobius' account that the deities worshipped at *Baalbek* were *Adad* and *Atargatis*. It is, however,

¹ That is, the centurion's vine showed that Trajan would die in the course of the campaign (117 A.D.), it being a mark of military authority.

² Clearly Zeus *Heliopolites* is meant: see W. Drexler in Roscher *Lex. Myth.* i. 1987, 41 ff.

³ Opinions are divided as to the value of this interpretation (W. Drexler *ib.* i. 1987 f., E. Meyer *ib.* i. 2900 f.). My friend, the Rev. Dr C. H. W. Johns, Master of St Catharine's College, Cambridge, informs me that Macrobius, who is taking *Adad* to be a reduplicated form of *edu*, the Assyrian, Syriac, and Hebrew word for 'one,' is certainly wrong. The name must be connected with the verb *adadu*, which had two distinct meanings, *viz.* (1) 'to be sharp, keen, pointed,' and (2) 'to love.' If we associate *Adad* with the first *adadu*, the reference may be to his piercing weapon, the thunderbolt; if with the second *adadu*, we may compare the forms *addu*, *daddu*, and such names as David and Dido, which properly denote 'the Beloved One.' R. Dussaud in Pauly—Wissowa *Real-Enc.* vii. 2157 says: 'Der Charakter des Gottes berechtigt die Annäherung mit dem arabischen *hadda*, "zerbrechen, krachen."' See further A. Jeremias in Roscher *Lex. Myth.* iv. 23.

⁴ On *Atargatis* see F. Cumont in Pauly—Wissowa *Real-Enc.* ii. 1896, E. Meyer in Roscher *Lex. Myth.* i. 650 ff.

⁵ Bundles of rays resembling wings start from the shoulders of various Assyrian deities, e.g. Šamaš the sun-god (Ohnefalsch-Richter *Kypros* p. 181 f. pl. 84, 3—7, G. Maspero *The Dawn of Civilization*⁴ London 1901 p. 656, M. Jastrow *Bildermappe zur Religion Babyloniens und Assyriens* Giessen 1912 p. 100 pl. 48 ff. nos. 170 ff.).

probable that another Syrian god, Seimios by name, received joint honours with them; for inscriptions attest a Heliopolitan triad Latinised as Iupiter, Venus, and Mercurius¹.

Ba'albek, the seat of this remarkable cult, has seen many changes. Of its Syrian, Greek, and Roman phases we have already spoken. It remains to sketch its subsequent history and to indicate the present condition of its ruins.

Heliopolis was for long a battle-ground of paganism and Christianity. Of this great struggle we get but intermittent glimpses. In 297 A.D. Gelasinos the mime² was suddenly converted while in the very act of parodying the Christian rite of baptism: he at once made a profession of his faith, and was thereupon dragged out of the theatre by the enraged audience and stoned to death³. Later, Constantine the Great (306–337 A.D.) destroyed the temple of Aphrodite, instituted a Christian church in its stead, and abolished by law the ancient local custom of prostitution before and even after wedlock⁴. The pagans were furious and retaliated by prostituting the Christian virgins and heaping upon them the most infamous tortures⁵. About the same time the people seized the deacon Kyrillos, who had defaced many of their idols, did him to death and—if we may believe Theodoret—ripped him up and got their teeth into his liver⁶.

⁶ Theodoret. *eccl. hist.* 3. 7.

Heathenism was for a while triumphant¹. But in 379 A.D. Theodosios finally demolished² the great temple of Zeus and built a Christian church upon its site³. Even so religious rioting was not ended. About 400 A.D. Rabbûla, the future bishop of Edessa, went with his friend Eusebios to *Ba'albek* 'in order to obtain the crown of martyrdom by raising a disturbance in the great Temple—somewhat after the fashion of the late Mr Kensit. But the crown of martyrdom was not destined for Rabbûla, and the two enthusiasts only succeeded in getting themselves thrown down the temple steps⁴.' According to Michael the Syrian, the 'great and famous idol' of *Ba'albek* was still to be seen in the time of Justin ii (565–578 A.D.)⁵.

Ba'albek passed into Mohammedan hands in 634 A.D., and was subject to Arab rule till 1517, when the Turks gained possession of Syria. The akropolis with its ruined temples was early transformed into a strong citadel, the *Kala'a*, which still stands much as it stood at the close of the thirteenth century with walls and towers, ports and loop-holes, in a wonderful state of preservation⁶.

'No ruins of antiquity,' says Mr W. B. Donne, 'have attracted more attention than those of Heliopolis, or been more frequently or accurately measured and described. They were visited by

¹ *Id. ib.* 4. 22.

² It had been already overthrown by earthquakes (O. Puchstein in the *Jahrb. d. kais. deutsch. arch. Inst.* 1901 xvi. 138, *id. Führer durch die Ruinen von Ba'albek* Berlin 1905 p. 5).

³ Io. Malal. *chron.* 13 p. 344 Dindorf τὸν δὲ ναὸν τῶν Ἑλλήνων πάντας κατέστρεψεν ἕως ἐδάφους ὁ αὐτὸς Θεοδόσιος βασιλεὺς. κατέλυσε δὲ καὶ τὸ ἱερὸν Ἡλιοπέδωτος τὸ μέγα καὶ περιβόητον τὸ λεγόμενον τριλιθον, καὶ ἐποίησεν αὐτὸ ἐκκλησίαν Χριστιανῶν, *Chron. Pasch.* p. 561 Dindorf Κωνσταντῖνος ὁ δολιδμος βασιλεύσας τὰ ἱερὰ μόνον ἔκλεισεν καὶ τοὺς ναοὺς τῶν Ἑλλήνων· οὗτος Θεοδόσιος καὶ κατέλυσεν, καὶ τὸ ἱερὸν Ἡλιοπέδωτος τὸ τοῦ Βαλανίου τὸ μέγα καὶ περιβόητον [καὶ] τὸ τριλιθον (*infra* p. 562 f.), καὶ ἐποίησεν αὐτὸ ἐκκλησίαν Χριστιανῶν.

Various attempts have been made to connect the word Βαλανίου with the name *Ba'al* (see the note by J. Markland in Dindorf's ed. of the *Chronicon Paschale* ii. 394 ff., M. A. Levy *Phönizische Studien* Breslau 1856 i. 32 n. 1, and F. X. Kortleitner *De polytheismo universo* Oeniponte 1908 p. 203). But Prof. F. C. Burkitt and Mr N. McLean both assure me that they are highly improbable, and independently suggest that we have here the Greek βαλανείον, which appears in Syriac as *balānā* (cp. S. A. Cook *A Glossary of the Aramaic Inscriptions* Cambridge 1898 p. 30). This is the more likely because in Christian times one of the lustration-basins in the precinct at *Ba'albek* was actually transformed into a swimming-bath (*infra* p. 559 n. 3).

⁴ F. C. Burkitt *Early Eastern Christianity* London 1904 p. 50, citing J. J. Overbeck *S. Ephraemi Syri, Rabulae Episcopi Edesseni, Balaci aliorumque opera selecta* Oxford 1865 p. 196 'Exploits of Mar Rabbûla.'

⁵ Michael the Syrian trans. J. B. Chabot ii. 262 f., cited by R. Dussaud *Notes de mythologie syrienne* Paris 1903 Add. and in Pauly—Wissowa *Real-Enc.* viii. 51.

⁶ For further details of successive changes made in mediaeval times see O. Puchstein in the *Jahrb. d. kais. deutsch. arch. Inst.* 1902 xvii. 99–101, *id. Führer durch die Ruinen von Ba'albek* Berlin 1905 p. 5 f.

Thevet. in. 1550; by Pococke in 1739-40; by Maundrell in 1745; by Wood and Dawkins in 1751; by Volney in 1785; and by many subsequent travellers, including the Duke of Ragusa, in 1834¹. Nevertheless, despite the good work done by these explorers², several problems still awaited solution. Fortunately a visit of the German emperor and empress on Nov. 1, 1898, led to a further and in many respects final exploration of the site (1900-1904) by O. Puchstein and a band of able associates. The results obtained by them³ may be here summarised.

The *Propylæion*⁴ in accordance with an ancient oriental scheme consisted of two towers united by a colonnade, and was approached by a broad flight of steps. The steps have disappeared; but much of the two-storeyed towers and at least the bases of the twelve columns remain, three of these bearing Latin inscriptions, which tell how Longinus, a life-guard of the first Parthian legion, and Septimius, an imperial freedman, in gratitude for the safety of Caracalla adorned their capitals with a sheathing of gilded bronze⁵.

Immediately behind the *Propylæion* lies a hexagonal court, once surrounded by columns, of which scanty traces are left⁶. The

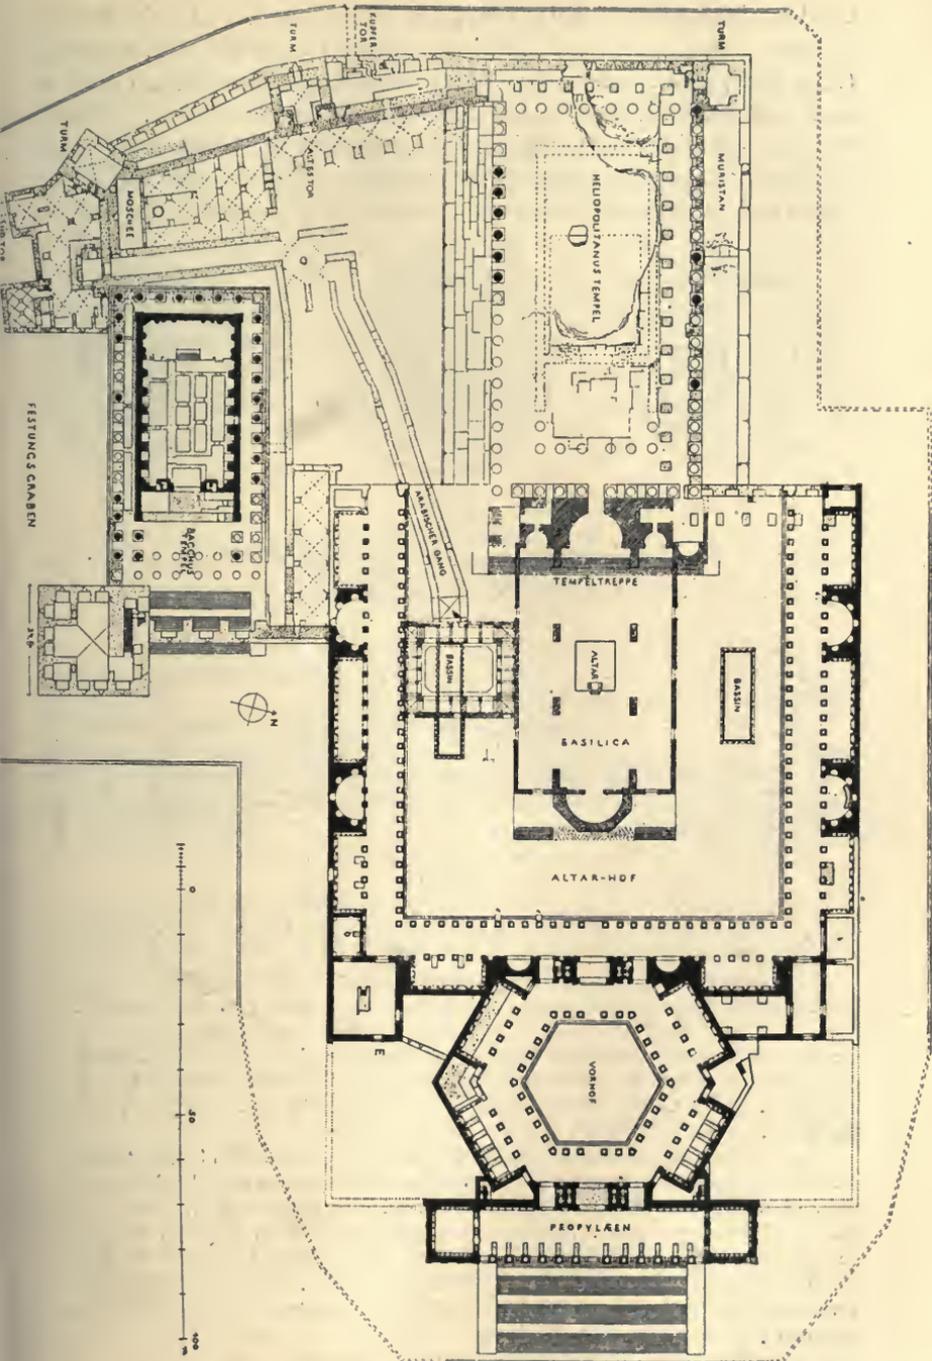

Fig. 419.

original intention of this court¹ is not known. Certain Heliopolitan coins struck by Philippus Senior and his wife Otacilia (figs. 420², 421³, 422⁴) have been thought to represent a cypress-tree seen through the central gate-way of the *Propylaion*⁵. If that were so, we might reasonably conjecture that the hexagonal court enclosed a sacred cypress-tree or cypress-grove. But the best-preserved specimens of these coins fully confirm the view⁶

Fig. 420.

Fig. 421.

Fig. 422.

advocated by Monsieur R. Dussaud⁷ that we have here a corn-ear (cp. *infra* fig. 427) rather than a cypress-tree. The god within held

¹ It was, perhaps in the fourth century A.D., transformed into a Christian church and roofed over for the purpose, its walls being then first pierced with windows (O. Puchstein *Führer durch die Ruinen von Ba'albek* Berlin 1905 p. 12).

² *Brit. Mus. Cat. Coins Galatia*, etc. pp. lxxvii, 292 pl. 36, 6 Philippus Senior, with legend COLIVLAUGFE | IO MH | COL HEL, *Coloniae Iuliae Augustae Felicis (Iovi Optimo Maximo Heliopolitano) Coloniae Heliopoleos*. *Ib.* p. 293 Otacilia, with the same legend. Cp. F. De Saulcy *Numismatique de la terre sainte* Paris 1874 pp. 12 f., 403 Philippus Senior, 14 Otacilia.

³ F. De Saulcy *op. cit.* p. 12 f. pl. 1, 5 Philippus Senior, with legend COLHEL | IO MH. *Ib.* p. 14 Otacilia, with the same legend.

⁴ F. Lajard *Recherches sur le culte du cyprès pyramidal* Paris 1854 pp. 97 ff., 360 pl. 6, 5 Philippus Senior (Paris), with legend COLHEL | IO MH. Cp. *Hunter Cat. Coins* iii. 221 no. 6 Philippus Senior.

⁵ The tree is described as a cypress by Rasche *Lex. Num.* iv. 93, Suppl. ii. 1344 f., Eckhel *Doctr. num. vet.*² iii. 335, F. Lajard *op. cit.* p. 97 ff., F. De Saulcy *op. cit.* pp. 12 ff., 403. Mionnet *Descr. de méd. ant.* v. 302 no. 123 wrongly took it to be a cedar. A cypress is the central object on other coppers of Heliopolis, which show two naked athletes seated on rocks and supporting an agonistic urn above it (F. Lajard *op. cit.* p. 100 Valerian, *Brit. Mus. Cat. Coins Galatia*, etc. p. 295 pl. 36, 12 Gallienus).

Cypress-trees are not often associated with Zeus. But the temple of Zeus *Némeios* at Nemea stood in a cypress-grove (Paus. 2. 15. 2) and the shrines used by the mystics of Zeus *Idaios* in Crete were roofed with cypress-wood (Eur. *Crete frag.* 472 Nauck²): cp. the coin of Ephesos (*supra* p. 134 fig. 100) and Hermippos *frag.* 24 (*Frag. hist. Gr.* iii. 42 Müller) *ap. Diog. Laert.* 8. 10 ἀπέχοντο δὲ (sc. οἱ Πυθαγόρειοι) καὶ σοροῦ κυπαρισσῶν διὰ τὸ τοῦ Διὸς σκήπτρον ἐνεῦθεν πεποιήσθαι, Iambl. v. *Pyth.* 155 κυπαρισσῶν δὲ μὴ δεῖν κατασκευάζεσθαι σωρὸν (leg. σορὸν) ὑπαγορεύει διὰ τὸ κυπαρισσῶν γεγενῆαι τοῦ Διὸς σκήπτρον ἢ δι' ἄλλον τινὰ μυστικὸν λόγον.

⁶ T. L. Donaldson *Architectura numismatica* London 1859 p. 123 fig. 34.

⁷ R. Dussaud *Notes de mythologie syrienne* Paris 1905 p. 92 ff.

corn-ears in his hand. Is it possible that his fore-court contained a patch of sacred corn¹?

Beyond the hexagon was a large square court² with Corinthian porticoes on three sides of it, but never finished on the fourth. The bases and capitals of the columns were of limestone; their shafts of red Egyptian granite—monoliths 7·08 metres in height and finely polished. Numerous fragments of the richly decorated entablature still strew the ground. This court was flanked by apsidal niches and rectangular recesses; and beneath the floor was a vaulted *southern*. In the middle of the court was the great altar of burnt offering, now sunk in the floor of the later Christian *basilica*³. To right and left of the altar was an oblong reservoir for lustration-water, adorned with a mosaic floor, above which rose a circular baldachin presumably covering a fountain-statue. The whole court,

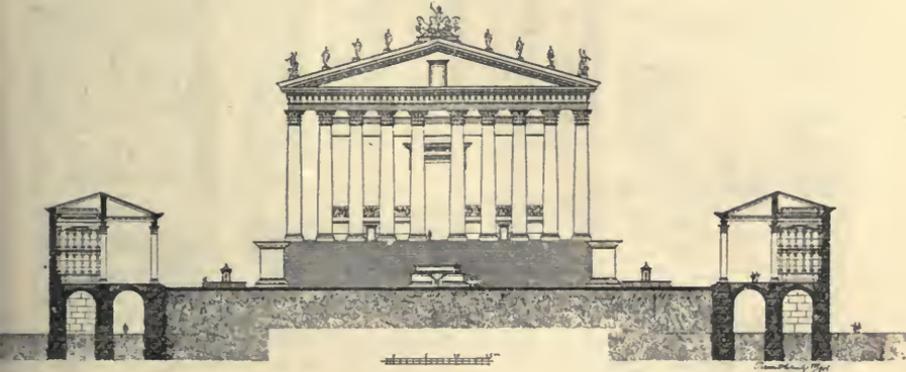

Fig. 423.

as inscriptions attest, was set out with bronze portraits of the imperial family (Sabina the daughter of Marcus Aurelius, Septimius Severus, Gordian, etc.) and of other prominent persons (such as the officer Velius Rufus), all dedicated by colonists in Heliopolis.

¹ Cp. the rites of Adonis as described by the schol. Theokr. 15. 112 *εὐώθασι γὰρ ἐν τοῖς Ἀδωνίους πυροῦς καὶ κριθᾶς σπείρειν ἐν τισὶ προαστείοις* (προαστρίοις G. Hermann, γαστρίοις Bast) *καὶ τοὺς φυτευθέντας κήπους Ἀδωνέλου προσαγορεύειν*. The Ἀγροῦχος ἢ Ἀγρότης of Philon Bybl. *frag.* 2 (*Frag. hist. Gr.* iii. 567 Müller) appears to be Adad viewed as an agricultural god (R. Dussaud in Pauly—Wissowa *Real-Enc.* viii. 56).

² O. Puchstein in the *Jahrb. d. kais. deutsch. arch. Inst.* 1901 xvi. 135 ff., 140 ff., *id. Führer durch die Ruinen von Ba'albek* Berlin 1905 p. 14 ff., O. Puchstein & T. von Lüpke *Ba'albek* Berlin 1910 pls. 8—13, 14a, 15.

³ The *basilica* was in all probability the church built by Theodosios (*supra* p. 555). It was originally entered at the eastern end, therein resembling the temple of Zeus, which it was designed to supersede. At some later date its entrance was shifted to the western end, that it might conform to the usual arrangement of a Christian church, while the southern lustration-reservoir was modified into a *piscina* or swimming-bath connected with it (*supra* p. 555 n. 3).

At the western end of the altar-court rose the temple of Zeus¹ (fig. 423). An imposing stylobate, some 7 metres higher than the level of the court, was mounted by means of a broad flight of steps. The temple-platform, exclusive of the steps, measured 47·70 metres

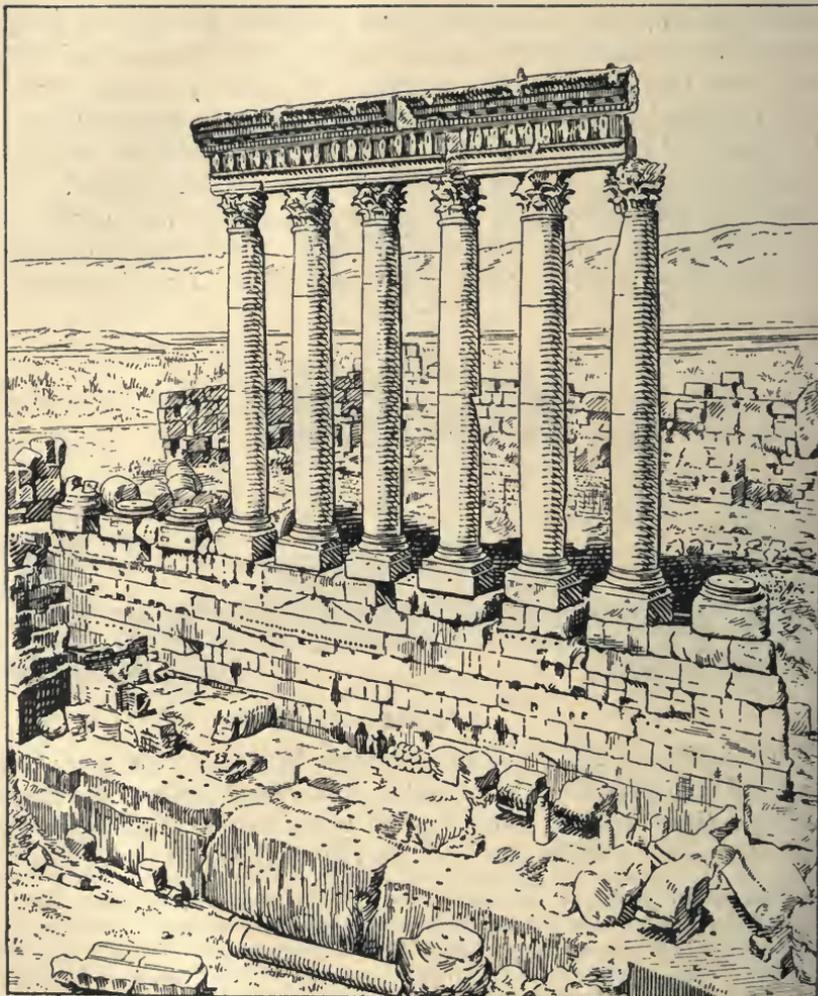

Fig. 424.

in width by 87·75 metres in length. Round it stood a single row of unfluted Corinthian columns. Ten of these were visible at either end and nineteen down each of the long sides. Six of them on the

¹ O. Puchstein in the *Jahrb. d. kais. deutsch. arch. Inst.* 1902 xvii. 91 ff., *id. Führer durch die Ruinen von Ba'albek* Berlin 1905 p. 21 f., O. Puchstein & T. von Lüpke *Ba'albek* Berlin 1910 pls. 14b, 16, 17.

south still carry their entablature (fig. 424)¹. The *naós* itself, except for sundry patches of a cement-paving, has entirely disappeared. And its foundation-walls are so imperfectly preserved that at present

Fig. 425.

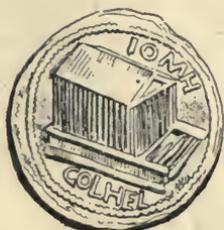

Fig. 426.

Fig. 427.

it has not been found possible to reconstruct the complete ground-plan with certainty. It is, however, clear that the temple was pseudodipteral, *i.e.* that in lieu of an inner row of columns it had

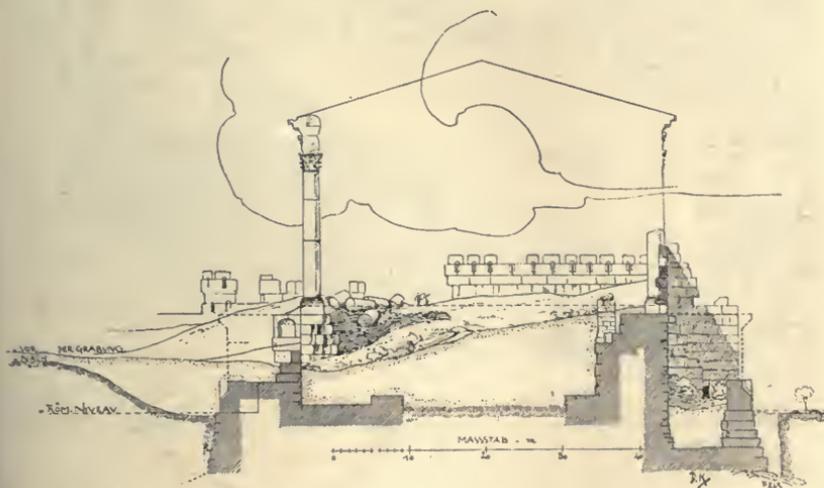

Fig. 428.

a very broad *pterón* or ambulatory. The whole building is shown in perspective on coins of Septimius Severus, his wife Iulia Domna, Caracalla, Philippus Senior, and Otacilia (figs. 425², 426³, 427⁴). It

¹ O. Puchstein & T. von Lüpke *op. cit.* pl. 17. In the background appears the snow-capped range of Libanos; in the foreground, the lowest course of the temple-terrace—gigantic blocks 4·12^m high, 3·12^m thick, and 9·50^m long.

³ F. De Saulcy *Numismatique de la terre sainte* Paris 1874 p. 8 f. pl. 1, 3 Septimius Severus, p. 9 Iulia Domna, p. 10 Caracalla, p. 14 Otacilia, all with the same legend.

⁴ R. Dussaud *Notes de mythologie syrienne* Paris 1905 p. 94 f. fig. 23.

was supported on three sides—north, west, and south—by a terrace¹ consisting of a huge outer wall and a filling of massive stones. The construction of this outer wall was no light task, even for the all-daring engineers of Rome. A strong foundation of headers and stretchers was topped by a *podium* of colossal blocks. The lowest visible course was designed to exhibit a moulded base, though the

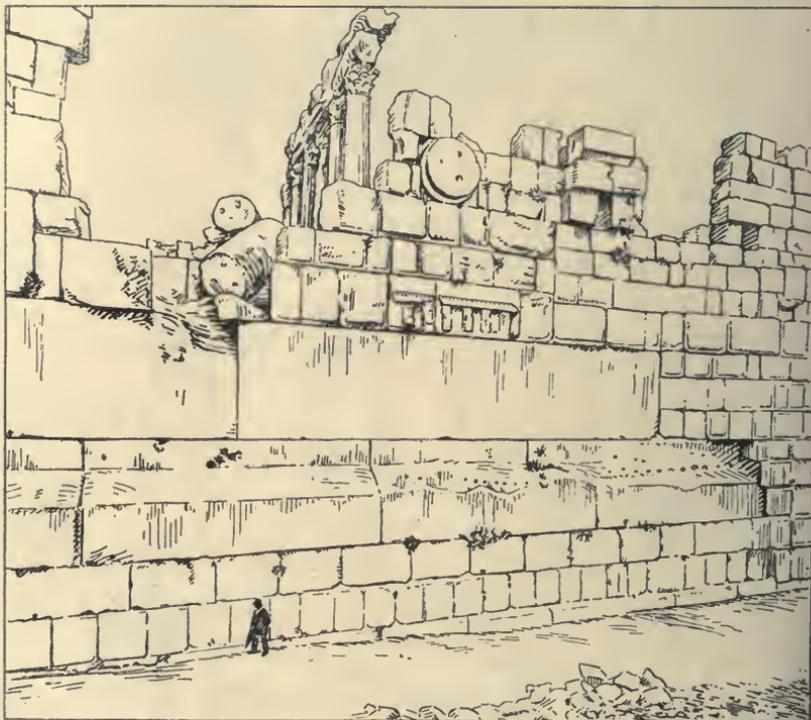

Fig. 429.

moulding was never completed. On this rested the main face of the *podium* (fig. 428)². At the western end it was formed by three gigantic monoliths, each 4.34 metres high by 3.65 metres deep, and respectively 19.10, 19.20, and 19.56 metres long³. These enormous

¹ O. Puchstein in the *Jahrb. d. kais. deutsch. arch. Inst.* 1902 xvii. 91 ff., *id. Führer durch die Ruinen von Ba'albek* Berlin 1905 pp. 23 f., 34 f., O. Puchstein & T. von Lüpke *Ba'albek* Berlin 1910 pls. 17, 27, 28.

² Fig. 428 is reproduced from a drawing by D. Krencker in the *Jahrb. d. kais. deutsch. arch. Inst.* 1902 xvii. 93. It shows a section through the temple of Zeus from north to south. The extant portions of the terrace-wall to right (N.) and left (S.) of the temple are hatched; the original profile of the terrace is indicated by a dotted line.

³ The dimensions are given by Durm *Baukunst d. Röm.*² p. 9 as 4^m high and 19.45^m, 19.21^m, 19.52^m long.

blocks were fitted together with astonishing precision (fig. 429)¹, and, as R. Wood pointed out², earned for the temple that towered above them the popular name of the *Trilithon*³. The unknown architect dreamed of employing an even vaster block; for in the neighbouring quarry lies half-finished a stone, which measures at one end some 4'30, at the other some 5'30, metres square and

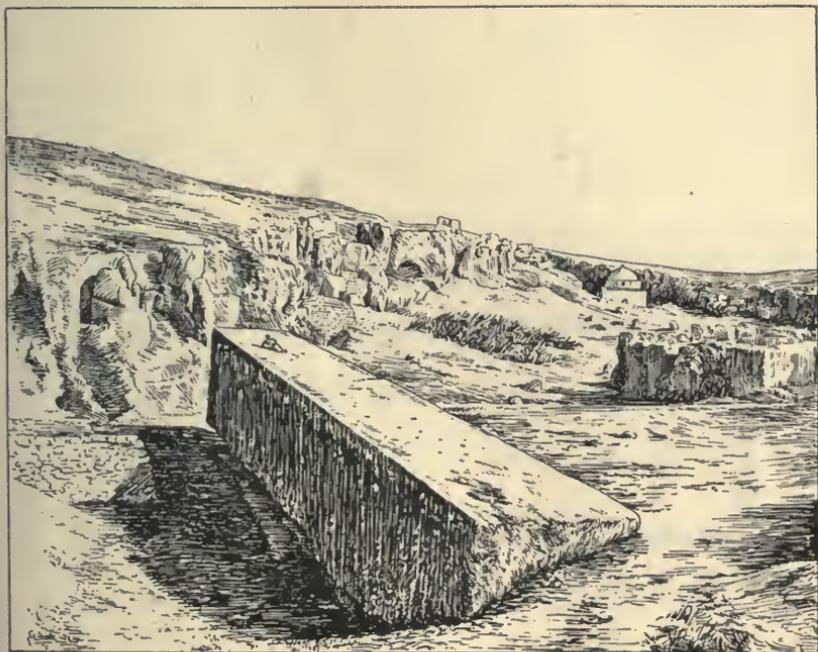

Fig. 430.

attains a length of 21'72 metres (fig. 430)⁴. Greeks and Romans alike seem to have argued that, the greater the god, the more grandiose must be his dwelling place⁵. And Zeus as lord of all

¹ O. Puchstein in the *Jahrb. d. kais. deutsch. arch. Inst.* 1902 xvii pl. 6.

² R. Wood *The ruins of Balbec, otherwise Heliopolis in Coelosyria* London 1757 p. 12.

³ *Supra* p. 555 n. 3. A parallel is furnished by the fourth temple of Apollon at Delphoi, that built by Trophonios and Agamedes (Paus. 10. 5. 13), which was called τὸ ἄδυστον ἐκ πέντε λίθων (Steph. Byz. s.v. Δελφοί). It was the temple of epic times, the *λάϊνος οὐδὸς* (*Il.* 9. 404 f., *Od.* 8. 79 ff.), and its foundations are expressly said to have been 'broad and very long' (*h. Ap.* 294 ff.).

⁴ O. Puchstein & T. von Lüpke *Ba'albek* Berlin 1910 pl. 28. Durm *Baukunst d. Röm.*² p. 9 f. figs. 4 f. states that it measures 21'35^m in length, 4'33^m and 4'40^m in height and breadth, and gives details as to the method of quarrying. The big stone, which would have weighed over 1200 tons, is locally known as the *Ḥadšar el ḥibla* (O. Puchstein *Führer durch die Ruinen von Ba'albek* Berlin 1905 p. 6 f.).

⁵ On colossal statues etc. as a means of literally 'magnifying' the god see *Folk-Lore* 1903 xiv. 270 f.

demanded a supreme effort. But here, as in the case of the abandoned temple at Agrigentum¹, men were attempting

‘The high that proved too high, the heroic for earth too hard.’

Adjoining the great temple of Zeus was a second sacred edifice (fig. 431)², smaller indeed but throughout more richly decorated and now standing in a far better state of preservation. Approached by a fine flight of 33 steps and raised on a stylobate 4.75 metres high, it is a peripteral temple with eight Corinthian columns on the short and fifteen on the long sides. These columns are unfluted, but those of the *prónaos* and the engaged columns of the interior are fluted. The roof of the *pterón*, the door-way of the *nabs*, the inner surface of the walls, are all exquisite examples of Roman architecture. But perhaps the most interesting feature is an *adyton*

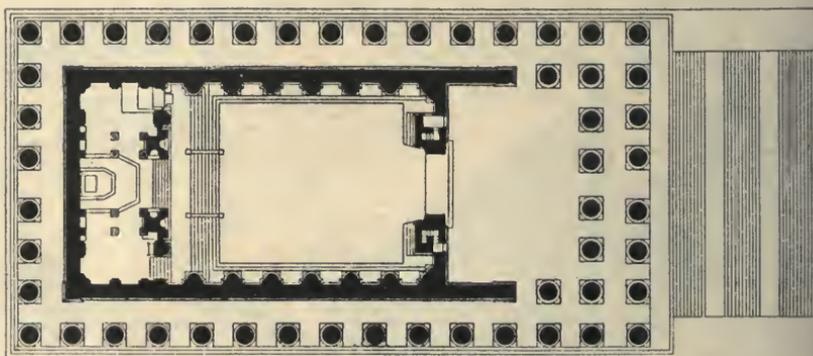

Fig. 431.

at the west end of the building. Nine steps led up to the chancel, which was divided by half-columns into a central sanctuary and two wings. On the right a door gave access to a crypt, consisting of two vaulted chambers, below the *adyton*-floor. On the left seven stairs led up to a side-chamber, in which stood a table for offerings. In the middle, between the half-columns, a broader flight of seven steps formed the approach to an elaborate baldachin, beneath which, protected by screens, stood the actual cult-image. But of what deity? Since the door-way has on the under surface of its lintel an eagle grasping a winged *caduceus* between garland-bearing Erotes (fig. 432)³, it used to be assumed that this was the temple of Zeus,

¹ Durm *Baukunst d. Gr.*³ p. 401 ff. figs. 369—372.

² O. Puchstein in the *Jahrb. d. kais. deutsch. arch. Inst.* 1902 xvii. 94 ff., *id. Führer durch die Ruinen von Ba'albek* Berlin 1905 p. 29 ff., O. Puchstein & T. von Lüpke *Ba'albek* Berlin 1910 pls. 18—26.

³ R. Wood *The ruins of Balbek, otherwise Heliopolis in Coelosyria* London 1757 pl. 34, E, H. Frauberger *Die Akropolis von Baalbek* Frankfurt a. M. 1892 pl. 16.

the larger building being then regarded as that of Helios. But the coins figured above¹ make it certain that the larger building was the temple of Zeus; and the relief of the eagle carrying a *caduceus*, which occurs on other Syrian lintels, *viz.* on two of the precinct-gates of Baitokaike (*Hösn. Suleimán*)², is in all probability an apotropaic sign combining the solar eagle³ with the *caduceus* of Hermes the gate-keeper. Better evidence is to be found in other parts of the temple-sculpture. The door-frame is embellished with bunches of corn and poppies and a string of vine-leaves and ivy. Low down on the left may be seen the infant Dionysos suckled by a nymph, with Pan, Satyrs, and Bacchantes arranged above him; on the right, Erotes hard at work vintaging. The *pronaos* has also

Fig. 432.

an unfinished frieze, which represents a procession of twelve persons, headed by Nike, leading an ox and a fat-tailed sheep to sacrifice at an altar: of these persons one carries a roll of carpet, another a basket, a third a *ktste*. More convincing still is the adornment of the *adyton*. One of the landings leading up to it is decorated with three dancing Bacchantes. The baldachin on either side of the steps had reliefs, which can still be in part at least made out. On

¹ *Supra* p. 561 figs. 425—427.

² R. Dussaud in the *Rev. Arch.* 1897 i. 328, P. Perdrizet in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1901 p. 132 = *Revue des études anciennes* (Annales de la Faculté des lettres de Bordeaux) 1901 iii. 258 ff.,—cited by O. Puchstein in the *Jahrb. d. kais. deutsch. arch. Inst.* 1902 xvii. 98 n. 4.

Zeus Βαιτοκαϊκης (*Corp. inscr. Gr.* iii no. 4474, 20 Διὸς Βαιτοκαϊκης) or Βαιτοκαϊκεὺς (*ib.* no. 4475, 1 θεῶ Βαιτοχειχει) was the Grecised form of the Baal worshipped at Baitokaike near Apameia on the Orontes. The property and privileges granted to his temple by one of the kings named Antiochos were increased by Augustus and confirmed (between 253 and 259 A.D.) by Valerian, his son Gallienus, and his grandson Saloninus (*Corp. inscr. Gr.* iii no. 4474 = *Corp. inscr. Lat.* iii no. 184 and p. 972, Dittenberger *Orient. Gr. inscr. sel.* no. 262). The inhabitants of Baitokaike described themselves as οἱ κάτοχοι ('tenants?') ἀγίου Οὐρανίου Διὸς (*ib.*). See further F. Cumont in Pauly—Wissowa *Real-Enc.* ii. 2779.

³ Cp. for a Phoenician example *supra* p. 206 fig. 150.

the left Dionysos leans against a vine with Ariadne beside him and his *thiasos* grouped around. On the right the same deity as a child is seated on a pantheress, danced about by Bacchantes and Maenads. It can hardly be doubted that the temple as a whole was that of Dionysos, who at Heliopolis as elsewhere was worshipped side by side with Zeus.

We have yet to notice a remarkable and much-canvassed coin-type of Philippus Senior (figs. 433¹, 434²). On a rocky eminence covered with shrubs rises a large temple with a flight of many steps leading up to it, and what looks like a terrace-wall beside it. Between the steps and the temple is an altar, and near by stands a vase. The precinct-wall encloses a considerable space to the left of the temple; and in the field beyond this space is a *caduceus*. Now the Germans have shown that the temple of Dionysos was later than the temple of Zeus and belonged to the same period

Fig. 433.

Fig. 434.

as the *Propylaion*, which they hold to have been constructed c. 200 A.D.³ Since, however, the capitals of the *Propylaion* were still being decorated in the reign of Caracalla (211–217 A.D.)⁴, it is very possible that the new buildings were not finished till the time of Philippus Senior (244–249 A.D.). If so, it is open to us to suppose that certain coins issued by this emperor—himself an Arab of Trachonitis⁵—represented the akropolis as it looked before the recent building-operations⁶, whilst others struck in the names of the emperor and his wife displayed the new *Propylaion* in all its

¹ F. De Saulcy *Numismatique de la terre sainte* Paris 1874 p. 13 pl. 1, 4, with legend COLIVLAVG | FELHEL (cp. *supra* p. 558 n. 2).

³ O. Puchstein *Führer durch die Ruinen von Ba'albek* Berlin 1905 p. 33.

⁴ *Supra* p. 556.

⁵ *Aur. Vict. de Caes.* 28. 1 Arabs Thraconites, cp. Zonar. *epit. hist.* 12. 19 ὠμῆτο δ' ἐκ Βόστρον.

⁶ Another possible explanation of the type would be to say that the die-sinker, in order to simplify his design, bodily omitted the *Propylaion* and the temple of Dionysos.

Iupiter *Heliopolitanus* and the Bull 567

glory¹. On this showing the temple here figured is that of Zeus². To him belong the altar and the vase of purification, which were perpetuated on a grander scale by the altar of burnt offering and the lustration-basins of the later court³. The *caduceus* is the symbol of Hermes, who watched over the portals of the precinct⁴ and was closely associated in worship with Zeus himself⁵.

(β) Iupiter *Heliopolitanus* and the Bull.

Thus far we have not found the Heliopolitan god associated with bulls. But copies of his cult-image, recognised in recent years, make it certain that he stood with a bull on either hand⁶. Of these copies the more important may be passed in review⁷.

A *stèle* of local limestone, discovered in 1900 at *Deir el-Qala'a* by Prof. S. Ronzevalle of Beirut University, has a countersunk relief representing a god erect between two bulls (fig. 435)⁸. The dedication [I] O M H fixes the type as that of Iupiter *Heliopolitanus*⁹. Moreover, the figure, though defaced, bears out in the main the description cited from Macrobius¹⁰. It is, in fact, a beardless

¹ *Supra* p. 558 figs. 420—422.

² Rasche *Lex. Num.* iv. 93 (cp. Suppl. ii. 1345) assumes that it is a temple of Hermes. T. L. Donaldson *Architectura numismatica* London 1859 p. 126 ff. fig. 35 contends that it is the smaller temple, *i.e.* that which we now know to have been the temple of Dionysos. O. Puchstein *Führer durch die Ruinen von Ba'albek* Berlin 1905 p. 3 describes it as an unknown temple, possibly situated on the neighbouring height of Sheik Abdallah.

W. Wroth in the *Brit. Mus. Cat. Coins Galatia, etc.* p. 293 is content to regard it as the temple of Zeus. To this identification it might be objected that the akropolis is not really so high as the coin suggests. But the patriotic artist would tend to exaggerate its height, just as the patriotic poet calls the 'waterless' Anapos *μέγαν ῥόον* (Theokr. 1. 68 with schol. *ad loc.* "Ἄναπος δὲ εἰρηται ὁ ἄνευ πόσεως ὦν καὶ βληχρὸν ἔχων ὕδωρ!"). Besides, Adad was a mountain-god (*supra* p. 551).

³ *Supra* p. 559.

⁴ Cp. *supra* p. 565.

⁵ *Supra* p. 554. This association perhaps has some bearing on the remarkable title *Angelus* given to Iupiter *Heliopolitanus* (*supra* p. 551 n. 10). The remarks of G. Henzen in the *Ann. d. Inst.* 1866 xxxviii. 134 ff., of G. Wolff in the *Arch. Zeit.* 1867 xxv. 55, and of E. Aust in Pauly—Wissowa *Real-Enc.* i. 2189, are hardly adequate.

⁶ Cp. the great altar of Zeus at Pergamon (*supra* p. 119 f. fig. 88).

⁷ For a full list see R. Dussaud in the *Rev. Arch.* 1903 i. 347 ff., ii. 91 ff., 1905 i. 161 ff. = *id.* *Notes de mythologie syrienne* Paris 1903—1905 pp. 29 ff., 67 ff., 117 ff.

⁸ Height 0'93^m. S. Ronzevalle 'Notice sur un bas-relief représentant le simulacre du Jupiter Heliopolitanus' in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1901 pp. 437—482, R. Dussaud in the *Rev. Arch.* 1903 i. 348, 355 f. fig. 14 (an independent sketch marking the disk on the god's chest, etc.) = *id.* *Notes de mythologie syrienne* Paris 1903 pp. 30, 38 f. fig. 14. The inscription in letters of the third century runs: [I.]o.m. H. | M. Pultius Felicianus | et? | M. Pultius Ti[be]rinus | fili[us]. The *Corp. inscr. Lat.* iii no. 14392a reads *Pullius* for *Pultius*.

⁹ Cp. *supra* p. 561 figs. 425—427.

¹⁰ *Supra* p. 552.

568 The Bull and the Sun in Syria

charioteer with a whip in his raised right hand. He wears, however, a *kálathos* or 'basket' on his head, adorned with two tiers of ovate-lanceolate leaves. Two long tresses of hair fall over his shoulders.

Fig. 435.

Iupiter *Heliopolitanus* and the Bull . 569

A disk is suspended round his neck. The upper part of his body appears to be covered with scales. The lower part is encased in a sheath, which is carved with panels containing flowers of three or four petals apiece¹.

Another limestone *stèle*, found in 1752 in the basin of the famous fountain at Nîmes and now preserved in the *Maison-Carrée*, bears in front a joint-dedication to Iupiter *Heliopolitanus* and Nemausus². The latter god is symbolised on the right side of the stone by an oval shield and a *carnix* or Gallic trumpet. The former is represented on the left by his cult-image (fig. 436)³. On his head, which is beardless and faces the spectator, rests the *kálathos*, decorated with leaves and a string of jewels (?)⁴. His right hand clasps a whip, his left a bunch of corn. A collar of some sort hangs about his neck, and there are traces of two busts below it. The compartments of the sheath are filled with flowers of four and six petals each: one of these flowers is seen in profile

Fig. 436.

¹ Another limestone *stèle* from the same district repeats this design (S. Ronzevalle *loc. cit.* p. 454, R. Dussaud in the *Rev. Arch.* 1903 i. 348, 356, 359 = *id.* *Notes de mythologie syrienne* Paris 1903 pp. 30, 39, 42). It is badly preserved, but retains in the left hand a fragment of the bunch of corn, and perhaps of the thunderbolt too, mentioned by Macrobius (so Dussaud *loc. cit.*: Ronzevalle saw in it a fir-cone partially sunk in an oval support).

² *Corp. inscr. Lat.* xii no. 3072 = Dessau *Inscr. Lat. sel.* no. 4288 I. o. m. Héliopolitán. | et Nemauso | C. Iulius Tib. fil. Fab. | Tiberinus p. p., domo | Beryto, vótum solvit (*supra* p. 552 n. 2) in letters belonging to the end of the second century. Cp. the inscription on the *stèle* from Beirut (*supra* p. 567 n. 8). The dedicators of the two monuments were obviously related to one another.

³ Height of *stèle* 0.90^m. F. Lenormant in the *Gaz. Arch.* 1876 ii. 78 ff. pl. 21 published the left-hand relief, but made serious mistakes about it, supposing that the god was bearded, that his head was in profile to the right, that he was accompanied by one lion instead of two bulls, etc. These blunders were suspected by Ronzevalle *loc. cit.* p. 444 f. and F. Studniczka in the *Arch.-ep. Mitth.* 1884 viii. 61. But for the first really accurate description of the *stèle* we are indebted to R. Dussaud in the *Rev. Arch.* 1903 i. 347, 353—355 fig. 13 = *id.* *Notes de mythologie syrienne* Paris 1903 pp. 30, 36—38 fig. 13.

⁴ Pliny in his list of precious stones includes 'Adad's kidney,' 'Adad's eye,' and

on its stalk. On the sides of the case are two thunderbolts. And to right and left of the god are the remains of his bulls.

A third *stèle*, found at 'Ain-Djouch, a well-pool to the east of Ba'albek and published by O. Puchstein in 1902 (fig. 437)¹, again shows the god standing with uplifted lash between two bulls, Immediately in front of him is a herm, attesting his intimate connexion with Hermes². To right and left of the monument is a bull with a winged thunderbolt above it. Adad³, Zeus, and Iupiter could alike claim to be storm-gods.

Fig. 437.

Somewhat more elaborate is a *stèle* of white marble, which came to light at Marseille in 1838 and is now in the Musée Calvet at Avignon (pl. xxxiii)⁴. Round the neck of the god is a pendant

'Adad's finger' (*nat. hist.* 37. 186 Adadu nephros sive renes, eiusdem oculus, digitus; deus et hic colitur a Syris).

¹ O. Puchstein in the *Jahrb. d. kais. deutsch. arch. Inst.* 1902 xvii. 102 f. fig., *id.* *Führer durch die Ruinen von Ba'albek* Berlin 1905 p. 12 f. fig. 4.

² Several little lead figures found by the peasants in this locality likewise represent the Heliopolitan Zeus with Hermes, also Dionysos, and Helios or his Syrian counterpart (O. Puchstein in the *Jahrb. d. kais. deutsch. arch. Inst.* 1902 xvii. 102).

³ *Supra* p. 553 n. 3, *infra* p. 576 ff.

⁴ Height 0'55^m. H. Bazin in the *Rev. Arch.* 1886 ii. 257 ff. pl. 26 published this relief as a Roman copy of Artemis *Diktynna*. P. Wolters in the *Ann. Journ. Arch.* 1890 vi. 65 ff. fig. 14 was the first to detect in it Zeus *Ἡλιουπόλιτης*. But R. Dussaud in the *Rev. Arch.* 1903 i. 347, 350—353 fig. 11 = *id.* *Notes de mythologie syrienne* Paris 1903 pp. 30, 33—36 has contributed most to our understanding of its details. He points out that the neck-ornament is not composed of two dolphins (so Bondurand in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1901 p. 863), but of the solar disk with its *uraeus*-snakes; that the herm does not rest on the lion's head and cannot therefore be the female consort of the god (so W. Gurlitt in the *Arch.-ep. Mitth.* 1891 xiv. 123), but is rather to be identified with some such god as *Ba'al-Marqod*, 'Lord of the Dance'

1
570

Jupiter *Heliopolitanus* on a marble *stèle* from Marseille.

See page 570 ff.

composed of the solar disk with two *uraeus*-snakes. In the centre of his body-sheath appears a beardless herm wearing a *kálathos*; and below, a lion's head representing the *djinn*¹, who bore the Grecised name *Gennaíos*². Of the six busts visible on either side of the herm, the upper two are Helios with a *nimbus* and Selene with a crescent, then a deity with a *kálathos* and a nude Hermes (?),

(*Corp. inscr. Gr.* iii no. 4536 = Kaibel *Epigr. Gr.* no. 835 Βαλμαρκῶθ, κοίρανε κῶμων, cp. Cougny *Anth. Pal. Append.* i. 317a), Latinised as Jupiter *Balmarcodes* (Dessau *Inscr. Lat. sel.* nos. 4327 Iovi Balmarcodi, 4328 I. o. m. Balmarcodi), who is known to have been called Κύριος Γενναίος, *Gennaeus Dominus* (F. Cumont in Pauly—Wissowa *Real-Enc.* ii. 2834 f., vii. 1174, *infra* n. 2); and that the lower part of the relief closely resembles the base of a marble statuette from Byblos, now in the American College at Beirut, which shows the two bulls, the lion's head, and three busts above it (Herakles?; a goddess? with veil; a goddess?).

¹ On *djinn* > Γενναίος see R. Dussaud in the *Rev. Arch.* 1903 i. 374 n. 4, 381 n. 2 = *id. Notes de mythologie syrienne* Paris 1903 p. 57 n. 4, p. 64 n. 2, cp. *ib.* 1905 p. 85 f.

² There was a lion-shaped image of Γενναίος in the temple of Zeus at Heliopolis (Damaskios v. *Isidor. ap. Phot. bibl.* p. 348 b 4 f. Bekker τὸν δὲ Γενναίον Ἡλιοπολίται τιμῶσιν ἐν Δίδι ἰδρυσάμενοι μορφήν τινα λέοντος. *Infra* ch. ii § 10 (a)). *Ba'al-Marqod* at *Deir el-Qala'a* was entitled Κύριος Γενναίος (Dittenberger *Oriental. Gr. inscr. sel.* no. 589 [Κυ]ρίω [Γ]εν[ν]αίω Βαλ[μα]ρκῶδι | τῷ καὶ Μη[γ]ρίν, κα[τ]ὰ | κελουσι[ν] | θεοῦ Ἀ[ρε]μθη[νοῦ] Μάξιμος | εὐχαριστῶν ἀνέθηκα) or *Gennaeus Dominus* (*Corp. inscr. Lat.* iii no. 6673 Gen(naeo) Dom[ino] | Balmarc[odi] | C. Vinni[.]). A Palmyrene god, presumably Malakbel (R. Dussaud in the *Rev. Arch.* 1903 i. 374 = *id. Notes de mythologie syrienne* Paris 1903 p. 57), is called Θεὸς Γεννέας (Dittenberger *Oriental. Gr. inscr. sel.* no. 637 Θεω Γεννέα Πατρῶψ Μαζαββάνας | καὶ Μάρκος υἱὸς αὐτοῦ ἀνέθηκαν | ἔτους ζψ', μηνὸς Δύστρον i.e. in March 196 A.D.). At *K'efr-Nebo*, twelve or thirteen hours' ride from Aleppo, is a dedication of an oil-mill etc. to a triad of gods including one simply described as Λέων (V. Chapot in the *Bull. Corr. Hell.* 1902 xxvi. 181 ff. no. 26 Σεμῶψ καὶ Συμβετόλψ καὶ Λέοντι θεοῖς πατρίοις τὸ | ἐλαιο[τ]ρόπιον σὺν κατασκευῇ πάσῃ κ.τ.λ.—dated in the year 223 A.D.) and an inscription at Ny-Carlsberg of uncertain provenance (Leontopolis? cp. Strab. 812, *Ail. de nat. an.* 12. 7; or Heliopolis??) mentions the sanctuary of a god bearing the same name (Dittenberger *Oriental. Gr. inscr. sel.* no. 732 Βασιλεῖ Πτολεμαίω | θεῷ Ἐπιφανεῖ καὶ Εὐχαρίστω καὶ βασιλίσση Κλεοπάτραι Ἀπολλωνίως Ἀντιπάτρου, γραμματεῦς | Ὁρνημένους, ὁ καὶ τὸ ἕρπον τοῦ Λέοντος καὶ | τᾶλλα τὰ προσκύροντα | τῷ ἱερῷ ἰδρυμένος ὑπὲρ αὐτῶν—to be dated after 193/2 B.C. but before 187/6 B.C.).

These leonine gods were solar (R. Dussaud *Notes de mythologie syrienne* Paris 1905 pp. 85 f., 91 f.), and G. F. Hill in the *Journ. Hell. Stud.* 1911 xxxi. 59 pl. 3, 8 has recognised as Γενναίος the lion that appears on coins of Berytos with a radiate head under Valerian (Rasche *Lex. Num.* i. 1514, iv. 1570, cp. 1580) and with a globe on his head under Gallienus (*Brit. Mus. Cat. Coins Phoenicia* pp. xlvi f., lix, 92 pl. 11, 6 = my fig. 438). A similar significance probably attached to the lion's head with a ball, often radiate, emerging from its brow on early electrum coins struck in the time of Alyattes?, 610—561 B.C. (D. G. Hogarth *Excavations at Ephesus* London 1908 pp. 82 ff., 90 ff. pls. 1, 32—51, 2, 52—73, *Brit. Mus. Cat. Coins Lydia* pp. xix, 1—4 pl. 1, 1—10, *Babelon Monn. gr. rom.* ii. 1. 35 ff., 50 f. pl. 2, 4—16, *Head Hist. num.*² p. 644 f.): fig. 439 is from a specimen in my collection.

Fig. 438.

Fig. 439.

lastly a helmeted figure (Ares?) and a bearded god (Herakles?). The sides of the sheath are adorned with disks.

Minor works of art repeat the type with variations¹. The bronze statuettes in particular add Egyptising details, which recall the belief that the cult-image at Heliopolis came from Egypt².

Fig. 440.

A bronze in the Joanneum at Graz (fig. 440)³ has the *kálathos* ornamented with a globe and corn-ears. The wig and the small false beard beneath the chin⁴ are decidedly Egyptian in character.

Fig. 441.

¹ For the coins (Neapolis in Samaria, Eleutheropolis and Nikopolis in Iudaea, Dion in Dekapolis) and gems see R. Dussaud in the *Rev. Arch.* 1903 i. 349, ii. 91 n. 4 = *id. Notes de mythologie syrienne* Paris 1903—1905 pp. 32, 67 n. 4. Of the coins listed by him the most interesting is that of Dion figured *infra* p. 590. Among the gems note a red jasper from the Montlezun collection at Paris, published by F. Lajard *Recherches sur le culte, les symboles, les attributs, et les monuments figurés de Vénus* Paris 1849 pl. 14 G, 5 (fig. 441: enlarged $\frac{1}{2}$), which surrounds the god's head with a radiate nimbus.

² *Supra* p. 550 n. 10 P. Perdrizet in the *Rev. Arch.* 1903 ii. 399—401 'Sur l'origine égyptienne de Jupiter Héliopolitain' argues in favour of accepting Macrobius' assertion. S. Reinach *Cultes, Mythes et Religions* Paris 1912 iv. 402—420 discusses the statue of an empress (?) as Isis or Isis Tyche found at Ba'albek.

³ W. Gurlitt in the *Arch.-ep. Mitth.* 1891 xiv. 120 ff., from whose article I have taken the cuts representing the front, side, and back of the statuette; Reinach *Rép. Stat.* iii. 8 nos. 4, 5.

⁴ R. Dussaud in the *Rev. Arch.* 1903 i. 356 ff. fig. 15 = *id. Notes de mythologie*

Jupiter *Heliopolitanus* and the Bull 573

The sheath is figured in front with three busts, Kronos¹ above, Helios and Selene beneath; at the back with an eagle holding a wreath in its beak. Below the busts and the eagle are rosettes

Fig. 442 a.

Fig. 442 b.

of six or seven petals apiece. And on either side of the sheath is a thunderbolt.

syrienne Paris 1903 p. 39 ff. fig. 15 raises needless doubts (P. Perdrizet in the *Rev. Arch.* 1903 ii. 401).

¹ So R. Dussaud in the *Rev. Arch.* 1903 i. 358 = *id.* *Notes de mythologie syrienne* Paris 1903 p. 41. W. Gurlitt *loc. cit.* p. 124 had suggested *Caelus*.

A bronze from the Hamilton collection, now in the British Museum (fig. 442 *a, b*)¹, has again an Egyptian-looking wig, and a lotos-flower on the *kálathos*. Besides the usual busts etc. there is an eagle with spread wings on the back and a thunderbolt below each arm.

The finest examples of this type are two bronzes in the de Clercq collection at Paris, both obtained at Tortosa in 1868. One (fig. 443 *a, b*)² shows the god wearing not only an Egyptian wig but

Fig. 443 *a.*Fig. 443 *b.*

also a rudimentary *pschent* like that often worn by Horos. Beneath his chin is a short tenon for the attachment of a false beard. The

¹ Published as 'The Ephesian Artemis' in the *Brit. Mus. Cat. Bronzes* p. 183 no. 1010 pl. 27, but correctly labelled in the show-case. Cp. P. Perdrizet in the *Rev. Arch.* 1903 ii. 399—401 fig. 1.

² De Ridder *Cat. Bronzes de la coll. de Clercq* p. 143 ff. no. 218 pls. 35, 1, 36, 2 f. R. Dussaud *Notes de mythologie syrienne* Paris 1905 p. 127 fig. 32.

Very similar is a bronze statuette from *Kefr Djezzin* near Byblos, which formerly belonged to J. Loeytved of Beirut and is now in the Berlin collection (C. Clermont-Ganneau *Recueil d'archéologie orientale* Paris 1905 vi. 78—81, 118 f. pl. 1, R. Dussaud *op. cit.* p. 125 ff. fig. 31 = my fig. 444). This too has Egyptising hair, a *pschent*, a small false beard, and numerous busts. J. Rouvier detected traces of gilding upon it.

whole *coiffure* is, in fact, Egyptian. The busts etc. on the sheath are exceptionally well preserved. In front at the top are Helios (?) and Selene, the former without rays round his head, the latter with a crescent between her breasts. Next come Kronos with his bill-hook and Zeus with his sceptre (?), Ares with helmet and lance, Aphrodite with sceptre and four-rayed star. Then follows a central panel showing Hermes in his winged *pétasos*. To right and left of him is a star with eight rays; and below him are two lion-heads. The sides of the figure are occupied by a couple of large winged thunderbolts. At the back between the shoulders is an eagle with spread wings grasping another bolt. Below this, two winged snakes knotted together and supporting or surrounding the solar disk. Finally, a series of five more busts—Poseidon with a trident; Demeter veiled and

Fig. 444.

Fig. 445 a.

Fig. 445 b.

sceptred; Athena with *aigis*, helmet, and lance; Artemis with quiver; Herakles with lion-skin and club.

The second statuette is simpler (fig. 445 *a, b*)¹. The beardless head wears a bay-wreath and is surmounted by a *kálathos*, on which are leaves or possibly rays in low relief. The breast has a single bust, that of a rayed Helios; the back, an eagle with spread wings holding a bolt. Beneath the arms are two wingless bolts. The rest of the sheathing is covered with disks that have a central boss. The bronze is broken off below.

It is noticeable that no bulls are figured on any of these statuettes. But it has been conjectured that bulls were originally associated with them²; and the conjecture is confirmed by the fact that together with each of the Tortosa figures was found a bronze bull³.

(γ) Adad or Ramman and the Bull.

Adad was connected with the bull long before he became known throughout the Greek and Roman world as the Zeus or Jupiter of Heliopolis. In the Babylonian and Assyrian religion Adad was also called *Ramman*⁴, an epithet which, being the participial of the verb *ramanu*, 'to bellow or roar,' denotes properly 'the Bellowing or Roaring One.' Now Ramman is commonly represented on the cylinders as standing on the back of a bull (fig. 446)⁵ or as planting one foot on a bull. It may,

¹ De Ridder *Cat. Bronzes de la coll. de Clercq* p. 145 f. no. 219 pls. 35, 2, 36, 4, R. Dussaud *op. cit.* p. 128 fig. 33.

² This was the view of W. Gurlitt *loc. cit.* p. 125 n. 9 and of F. Studniczka in the *Arch.-ep. Mitth.* 1884 viii. 61.

³ De Ridder *Cat. Bronzes de la coll. de Clercq* p. 252 f. no. 363 (found with statuette no. 218: head turned slightly to right), *id. ib.* p. 252 no. 362 (found with statuette no. 219: head turned slightly to left, and tufts of hair between the horns forming a sort of rosette).

⁴ On the admitted identity of Adad and Ramman see e.g. A. Jeremias in Roscher *Lex. Myth.* iv. 19 ff., R. Dussaud in Pauly—Wissowa *Real-Enc.* vii. 2157 ff., M. Jastrow *The Religion of Babylonia and Assyria* Boston etc. 1898 p. 156 f., *id.* *Die Religion Babyloniens und Assyriens* Giessen 1905 i. 146 ff., *id.* *Aspects of Religious Belief and Practice in Babylonia and Assyria* New York and London 1911 p. 117 ff., G. Maspero *The Dawn of Civilization*⁴ London 1901 p. 658 n. 5.

It remains, however, possible that Adad and Ramman were at first locally distinct forms of the sky-god, Adad hailing from the west-country *Anurri* (*supra* p. 549 n. 4) and Ramman perhaps from Arabia (A. Jeremias *loc. cit.* p. 25). But?

⁵ The bull is sometimes winged, as in the rock-cut relief at Maltai (Roscher *Lex. Myth.* iv. 48 fig. 5), sometimes unwinged, as on the *stèle* of Esarhaddon (680-669 B.C.) from Sinjerli in north-west Syria now at Berlin (von Luschan *Ausgrabungen in Sendschirli* Berlin 1893 i. 11-43 pl. 1).

I figure a cylinder of sapphire chalcedony from the ruins of Babylon, now in the

therefore¹, fairly be inferred that Adad, otherwise styled Ramman, —the Rimmon² or Hadadrimmon³ of the Old Testament,—was essentially related to the bull⁴. And, since a Susian deity obviously akin to Ramman is represented with bovine horns projecting from his head (fig. 447)⁵, it is probable that Adad or Ramman himself was sometimes at least conceived as a bull⁶.

But why was Adad regarded as a bull? The answer to this question depends of course upon the functions ascribed to the god. That he was a sky-god of some sort is certain. He was often associated with the great astrological triad Sin, Šamaš, and Ištar.

Fig. 446.

Sin was undeniably a moon-god and Šamaš a sun-god, while Ištar had come to be identified with the planet Venus. Adad—to judge from his names *Ramman*, ‘the Bellowing,’ *Birku*, ‘the Lightning,’ and from his attribute the thunderbolt—was most unmistakably a storm-god. He is, however, constantly coupled with

Bibliothèque Nationale at Paris (F. Lajard *Recherches sur le culte, les symboles, les attributs, et les monuments figurés de Vénus* Paris 1849 pl. 4, 11, W. H. Ward in the *Am. Journ. Arch.* 1899 iii. 8 fig. 6), on which Ramman has a horned head-dress and stands upon a reclining bull with Ištar before him and a worshipper between them.

578 The Bull and the Sun in Syria

Šamaš¹, and Macrobius unhesitatingly identifies him with the sun². Probably, then, Adad or Ramman was a storm-god, who in process of time was associated with Šamaš and ultimately viewed as himself also a sun-god. This aspect of his nature came more and more into prominence, till in the Graeco-Roman period he was worshipped throughout the Mediterranean fringe as the solar Zeus or Iupiter of Heliopolis. These two conceptions of storm-god and sun-god, which to our way of thinking seem so diametrically opposed, are

Fig. 447.

in point of fact by no means incompatible³. 'In many mythologies,' says Dr Jastrow, 'the sun and lightning are regarded as correlated forces. At all events, the frequent association of Shamash and

¹ M. Jastrow *The Religion of Babylonia and Assyria* Boston etc. 1898 p. 157 f., *id.* *Die Religion Babyloniens und Assyriens* Giessen 1905 i. 137, 148, *id.* *Aspects of Religion. Belief and Practice in Babylonia and Assyria* New York and London 1911 p. 83.

² *Supra* p. 552 f. It is noticeable that Delian inscriptions associate Helios (*Bull. Corr. Hell.* 1882 vi. 501 no. 24, 3) as well as Zeus "Αδαδος (*supra* p. 549 f.) with Atargatis.

³ *Supra* pp. 196 n. 6, 313 n. 8. Empedokles held that lightning consisted of solar rays caught in the clouds (Aristot. *meteor.* 2. 9. 369 b 12 f.): see E. Zeller *A History of Greek Philosophy* trans. S. F. Alleyne London 1881 ii. 158 n. 4, O. Gilbert *Die meteorologischen Theorien des griechischen Altertums* Leipzig 1907 p. 621 f.

Ramman cannot have been accidental. This double nature of Ramman—as a solar deity representing some particular phase of the sun that escapes us and as a storm-god—still peers through the inscription...from the Cassite period where Ramman is called “the lord of justice,”—an attribute peculiar to the sun-god; but in Assyria his rôle as the thunder- and storm-god overshadows any other attributes that he may have had¹. Such being the character of Adad or Ramman, it may be conjectured that the bull was considered a fitting vehicle for him, partly perhaps because its bellowing resembled the sound of thunder, but mainly because its generative powers recalled the fertilising effects of rain and sun.

Nor is this conjecture wholly unsupported by evidence. ‘Ramman,’ according to G. Maspero, ‘embraced within him the elements of many very ancient genii, all of whom had been set over the atmosphere, and the phenomena which are daily displayed in it—wind, rain, and thunder. These genii...are usually represented as enormous birds flocking on their swift wings from below the horizon, and breathing flame or torrents of water upon the countries over which they hovered. The most terrible of them was Zu, who presided over tempests: he gathered the clouds together, causing them to burst in torrents of rain or hail; he let loose the winds and lightnings, and nothing remained standing where he had passed...Zu had as son a vigorous bull, which, pasturing in the meadows, scattered abundance and fertility around him².’ Monsieur Maspero is here paraphrasing a Babylonian litany, which prescribes certain rites to be performed with an actual bull taken to represent a divine bull ‘child of the god Zû³.’ This divine bull is described in the text as follows: ‘The great bull, the noble bull that wanders over shining pasture-ground has come to the fields bringing abundance. O planter of the corn, who dost bless the land with richest plenty, my pure hands have made their offering before thee⁴.’ Prof. Jensen connects this bull with the constellation Taurus⁵. But in any case it is invoked as a bringer of fertility.

The same group of ideas—storm-god, sun-god, fertilising bull—

gathers about another Mesopotamian deity. En-lil¹ or Ellil, the Sumerian god of Nippur, bore a name which meant 'Lord of the Storm.' He was also addressed as the 'Great Mountain.' His temple at Nippur was known as E-Kur, the 'Mountain-House'—a term which became the general name for a sanctuary. And his consort Nin-lil, 'Lady of the Storm,' was described as Nin-khar-sag, 'Lady of the High Mountain.' Hence it has been inferred that he came into the Euphrates valley from the mountainous region lying to the east or north-east (Elam). On entering the fertile plain, where agriculture owed so much to the sweeping rain-storm, he readily acquired the character of a god who fostered vegetation :

O Enlil, Councillor, who can grasp thy power?
 Endowed with strength, lord of the harvest lands!
 Created in the mountains, lord of the grain fields!
 Ruler of great strength, father Enlil!
 The powerful chief of the gods art thou,
 The great creator and sustainer of life²!

Ninib, the ancient sun-god of Nippur, was affiliated to En-lil, and the two exercised a reciprocal influence over each other. Thus Ninib took on the traits of the storm-god, and En-lil became solar. In this double capacity En-lil was conceived as a mighty ox or bull with glittering horns. 'An entire series of hymns and lamentations,' writes Dr Jastrow³, 'is recognised as addressed to Enlil from the opening words "the Bull to his sanctuary," where the bull designates Enlil⁴. In a fragment of a hymn, Enlil is described as

Crouching in the lands like a sturdy mountain bull,
 Whose horns shine like the brilliance of the sun,
 Full of splendour like Venus of the heavens⁵.

In another composition the refrain reads, "A sturdy bull art thou." When we see votive offerings with the figure of a bull, or representations of a crouching bull with a human face⁶, we are tempted to assert that they are symbols of Enlil; and if this be so, further

¹ On En-lil see M. Jastrow *The Religion of Babylonia and Assyria* Boston etc. 1898 p. 52 ff., *id.* *Die Religion Babylonien und Assyriens* Giessen 1905 i. 52 ff., and especially *id.* *Aspects of Religious Belief and Practice in Babylonia and Assyria* New York and London 1911 pp. 18 ff., 67 ff. (after A. T. Clay 'Ellil, the god of Nippur' in *The American Journal of Semitic Languages and Literatures* xxiii. 269—279).

traces of the association between the god and the animal may be seen both in the colossal bulls which form a feature of Assyrian art and were placed at the entrance to temples and palaces, and in the bull as the decoration of columns in the architecture of the Persian period¹.

With the bulls of En-lil Dr Jastrow further compares the golden calf made by Aaron at the foot of Mount Sinai² and the golden calves set up at Bethel and at Dan by Jeroboam³. The use of gold for these images was perhaps symbolic of the fiery deity whom they represented⁴. A magnificent thunderbolt of wood thickly overlaid with pure gold, and manifestly broken off from a cult-statue of Adad, has been found near his temple at Ashur⁵. And on the Berlin bronze of the Heliopolitan god⁶ J. Rouvier detected traces of gilding⁷.

The foregoing facts may serve to throw light on a dark passage in the magical papyrus at Paris:

'Zeus went up into the mountain with a golden calf and a silver knife. To all he gave a share. To Amara alone he gave none, but said: "Let go that which thou hast, and then thou shalt receive—*psinother nopsither thernopsi* 8."⁸

A. Dieterich⁹ supposed that this ascent of the mountain was a ceremony in the cult of Zeus *Panámaros*¹⁰, whose consort might have borne the uncompounded name *Amára*. E. Riess¹¹ suggests that Amara was an otherwise unknown Egyptian deity¹². I would rather infer from the mention of the golden calf and the mountain

that we have here to do with a Grecised form of Adad, god of the Amorites. It may even be that the mysterious Amara was their mountain-goddess¹.

(δ) Zeus (Adad) and Hera (Atargatis) at Hierapolis.

From Heliopolis in Koile Syria we pass northwards to Hierapolis in Kyrrestike. This was an ancient Syrian town, originally called Mabog², but better known as Bambyke. Its name was changed to Hierapolis by Seleukos Nikator, the founder of the Syrian dynasty³. The town was celebrated for its cult of the Syrian goddess Atargatis⁴ or Derketo⁵, whom the Greeks identified with Rhea⁶ or Aphrodite⁷ or the Assyrian Hera⁸.

A valuable account of her temple and cult is given by the pseudo-Lucian in an Ionic treatise *On the Syrian goddess*. The temple stood on a hill in the middle of the town, surrounded by two walls, one old, one recent. The *Propylaia*, or gateways of the precinct, faced the north and were some two hundred yards in length⁹. The temple itself was an Ionic building raised twelve feet above the ground and so turned as to look towards the sunrise. The golden doors of its *pronaos* gave access to a *naos* gilded throughout and fragrant with the perfumes of Arabia. Within this nave a short flight of steps led up to a *thalamos* or inner chamber, which was not closed by doors but visible to all, though only certain priests might enter it¹⁰. Our author describes its contents in detail¹¹:

‘Here are seated the cult-statues, to wit Hera and Zeus, whom they call by a different name. Both are of gold, and both are seated; but Hera is carried

¹ Mr S. A. Cook, Fellow of Gonville and Caius College, Cambridge, and Lecturer in Hebrew and Syriac, in a letter to me dated Nov. 21, 1911, hit upon the same solution, but only to reject it: ‘Then the idea of the mountain-god suggested the Amurru, lord of the mountain, who is a storm- and thunder-god of the Ramman type. But his wife would be Ashirta, an Astarte figure, and it is a wild guess that a feminine of Amurru has been artificially formed here!’

³ Ail. *de nat. an.* 12. 2.

⁴ Strab. 748.

⁵ Loukian. *de dea Syr.* 14, Plin. *nat. hist.* 5. 81. *Derketo* is the Syrian *Tar'atā*, an abbreviation of *Atargatis*, the Syrian *'Atar'ata* (F. Cumont in Pauly—Wissowa *Real-Enc.* v. 240).

⁶ Loukian. *op. cit.* 15, cp. 32, Cornut. *theol.* 6 p. 6, 11 ff. Lang.

⁷ Plout. *v. Crass.* 17, *supra* p. 550.

⁸ Loukian. *op. cit.* 1. The author of the *de dea Syria* throughout speaks of the goddess as Hera. Cp. Plout. *v. Crass.* 17.

⁹ Loukian. *ib.* 28 *μέγας ὄσον τε ἑκατὸν ὀργυίων*. Presumably *μέγας* here means *μῆκος*, though the editors of Lucian take it to mean *ὑψος*, and certainly *ib.* 30 it bears the latter sense.

¹⁰ Cp. the internal arrangement of the temple of Dionysos at *Ba'albek* (*supra* p. 564).

¹¹ Loukian. *ib.* 31 ff.

by lions, while her partner is sitting upon bulls. Indeed, the statue of Zeus looks like Zeus in every respect, head, clothing, and throne: you could not, even perversely, compare him to another. But Hera, when you come to look at her, will be found to exhibit a variety of forms. The general effect is certainly that of Hera; but she has borrowed particular traits from a variety of goddesses—Athena, Aphrodite, Selene, Rhea, Artemis, Nemesis, and the Moirai. In one hand she holds a sceptre, in the other a spindle; on her head she wears rays and a tower; and < she has too >¹ a decorated band (*kestós*), with which they adorn none save the goddess of Heaven. Without she is covered with more gold and precious stones of very great value, some of which are white, others watery, many the colour of wine, many the colour of fire. Besides, there are many sardonyxes, jacinths, and emeralds², brought by men of Egypt, India, Aithiopia, Media, Armenia, and Babylonia. But a point more worthy of attention is this: on her head she wears a stone called *lychnis*, which derives its name (the "lamp"-stone) from its nature³. By night there shines from it a broad beam of light, and beneath it the whole nave is lit up as it were with lamps. By day its radiance is feeble, but it has a very fiery appearance. There is another remarkable thing about this image (*xóanon*): if you stand opposite and look at it, it looks at you; as you shift your ground, its look follows you; and, if another looks at it from a different position, it has the same effect upon him as well. Between these two figures stands another golden image (*xóanon*) in no way resembling the rest. It has no shape of its own, but bears the forms of the other deities. The Assyrians themselves call it a sign: they have given it no special name, indeed they do not even speak of its origin and form. Some ascribe it to Dionysos, others to Deukalion, others again to Semiramis; for on the top of it there is perched a golden dove, upon account of which they say that it is the sign of Semiramis⁴.

¹ Loukian. *ib.* 32 καὶ ἐπὶ τῇ κεφαλῇ ἀκτίνας τε φορεῖ καὶ πύργον, καὶ <ἐχει καὶ> κεστόν τῷ μόνῃ τῆν Οὐρανίην κοσμέουσι. So I would restore the passage, which, as printed by Dindorf and others, would imply that she wore the *kestós* on her head.

² Not, of course, the true emerald, which is found only in America, but the green quartz known as the peridot or false emerald (E. Babelon in Daremberg—Saglio *Dict. Ant.* ii. 1467 f., *supra* p. 357 n. 2).

³ On this stone see further E. Babelon *loc. cit.* p. 1465. It was found in the Indian river Hydaspes to the sound of flutes while the moon was waxing (Plout. *de fluv.* 1. 2). The chalcedony, which resembled it, came from the land of the Libyan Nasamones, where it was said to spring from a divine shower and was found by the reflected light of the full moon (Plin. *nat. hist.* 37. 104, Isid. *orig.* 16. 14. 5, cp. Strab. 830, 835).

⁴ The story of the mythical, as distinct from the historical, Semiramis is first found in Ktesias:—Near Askalon was a large lake full of fish, by the side of which Derketo had a precinct. She was represented with the face of a woman and the body of a fish. The tale told to explain her double form was as follows. She had fallen in love with a handsome Syrian youth who sacrificed to her. She bore him a daughter, and then, out of shame, made away with her lover, exposed the child in a rocky desert, and flung herself into the lake. The babe, nurtured by doves on milk and cheese, was discovered by the herdsmen and brought up by Simmas, a man set over the royal herds, who called her *Semiramis* after the Syrian word for 'doves' (Ktesias *ap.* Diod. 2. 4, Tzetz. *chil.* 9. 502 ff., Athenag. *supplicatio pro Christianis* 30 p. 40 Schwartz, Loukian. *de dea Syr.* 14, Hesych. *s.v.* Σεμίραμις). At the close of her life Semiramis changed herself into a dove and flew off with a number of other birds (Ktesias *ap.* Diod. 2. 20, Loukian. *loc. cit.*, Ov. *met.* 4. 47 f., *supra* p. 367). Both accounts add that the Syrians or Assyrians pay divine honours to doves (cp. Xen. *an.* 1. 4. 9, Clem. Al. *protr.* 2. 39. 9 p. 30, 11 ff. Stählin,

Twice every year it journeys to the sea to get the water that I mentioned!'

It appears, then, that the *thálamos* at Hierapolis contained a statue of Atargatis carried by lions², a statue of her partner (resembling Zeus) seated on bulls³, and between them an aniconic 'sign' surmounted by a dove⁴. It can hardly be doubted that here, as at Heliopolis⁵, the partner of Atargatis was Adad identified with Zeus. The similarity of the two cult-centres, which may well presuppose—as J. Garstang holds—a common Hittite nucleus⁶, comes out clearly in connexion with their oracular practices. The

Comut. *Geol.* 6 p. 6, 11 ff. Lang, *Plülon ap. Euseb. praep. ev.* 8, 14, 64 with *Head Hist. num.*² p. 804, Tib. 1, 7, 17 f.).

A related myth is the following. Certain fish found a great egg in the river Euphrates. They rolled it ashore. A dove, or doves, sat on it and hatched out Venus the Syrian goddess. She besought Jupiter to put the fish among the signs of the zodiac. And the Syrians still abstain from eating these fish, and regard doves as divine (Nigidius *ap. schol. Caes. Germ. Aratua* p. 402, 12 ff. Eysenhardt, *Hyg. fab.* 197, Ampel. 2, 12). The fish in question were really Venus and Cupido, who, scared by the sudden appearance of Typho, had flung themselves into the Euphrates and taken the form of fish (Diognetos of Erythrai *ap. Hyg. poet. astr.* 2, 30, ep. *Myth. Vat.* 1, 86).

According to R. Azarias *Moor Enajim* 21 and R. David Ganz *Chronologia* ann. 1958, Semiramis and all the kings of Assyria had the dove as their military standard—a doubtful assertion (S. Bochart *Hierozoïcon* rec. E. F. C. Rosenmüller Lipsiae 1794 ii. 528—533).

C. F. Lehmann-Haupt in Roscher *Lex. Myth.* iv. 694 conjectures that doves were associated with Semiramis for two reasons. On the one hand, Semiramis was assimilated to Istar, and the dove was sacred to that goddess. On the other hand, the Assyrian word for dove (*šammatu*) was not very unlike the Assyrian name of Semiramis (*šammuramat*).

¹ This refers to a myth and a rite described by the pseudo-Lucian *ib.* 12 f. Beneath the temple at Hierapolis was a small hole, through which the flood had run off. Hence Deukalion built altars and a temple of Hera over it, and introduced a custom kept up in memory of the event. Twice a year water was brought from the sea by the priests and a multitude of people from Syria, Arabia, and the region beyond the Euphrates. The water was poured out in the temple and ran off through the small hole beneath it. See further *intro* p. 591 n. 3.

² Imperial bronze coins of Hierapolis show Atargatis in three attitudes: (1) wearing a turreted head-dress, *chiton*, and *peplos*; holding two ears of corn in her left hand, a *tympanon* in her right; and seated on a throne with a lion couching at either side of it (*Brit. Mus. Cat. Coin* Galatia, etc. p. 144 pl. 17, 14); (2) in the same pose, but holding a *tympanon* in her left hand and resting her right elbow on the throne (*Brit. Mus. Cat. Coin* Galatia, etc. p. 145 pl. 17, 17, *Hunter Cat. Coins* iii. 138 f. pl. 71, 22, ep. *ib.* iii. 139 pl. 71, 24); (3) with turreted head-dress, *chiton*, and *peplos*, holding a sceptre in her right hand, a *tympanon* in her left, and seated on the back of a lion (*Brit. Mus. Cat. Coin* Galatia, etc. p. 144 pl. 17, 15, *Hunter Cat. Coins* iii. 139 pl. 71, 25, ep. *ib.* iii. 140). Cf. J. Garstang *The Syrian Goddess* London 1913 p. 20 ff. with Frontisp. figs. 1—8.

³ S. Reinach in the *Rev. Arch.* 1902 i. 31 argues that we must not press the text of Eusebian, *de deo Syr.* 31 ἀμφω ἕζονται· ἀλλὰ τὴν μὲν Ἥρην λέοντες φορέουσι, ὁ δὲ παύροις ἐπέθεται to mean that Zeus and Hera were literally seated on their sacred beasts: rather they were flanked by them. So also R. Dussaud *ib.* 1904 ii. 242 n. 1 = *id. Notes de voyage en Syrie* (Paris 1905 p. 98 n. 1.

⁴ Cf. *intro* p. 586 f.

⁵ *Supra* p. 553.

⁶ This is the thesis of J. Garstang *op. cit.* pp. viii, 11 f., 17 n. 49, 27, 70 n. 43.

pseudo-Lucian, having described the statues of the inner shrine, goes on to say that in the main body of the temple, on the left hand side, there was set a vacant throne of the Sun and next to it a clothed and bearded image (*xōanon*) of Apollon. *À propos* of this last divinity he continues¹:

'When he is minded to deliver an oracle, he first stirs in his seat, and the priests at once lift him up. If they do not, he sweats and stirs again more decidedly. When they stoop and carry him, he drives them on, whirling them round in every direction and leaping from one to another. At last the chief-priest meets him and asks him questions concerning all things. He, if he refuses to do aught, retreats backwards, if he approves of aught, drives his bearers forwards like a charioteer. So they gather their oracles and do nothing either of religious or of private import without him.'

This image of Apollon in the nave must be carefully distinguished from the image of Zeus seated on bulls in the inner place. Macrobius² describes the former in terms that preclude identification with the latter:

'The natives of Hieropolis, Assyrians by race, comprise all the powers and virtues of the sun under the form of a single bearded image, which they call Apollo. His face is represented as having a pointed beard; and a basket (*calathus*) projects above his head. His image is adorned with a breast-plate. The right hand holds erect a spear, and on it stands a small statuette of Victory. The left stretches out a flower. A Gorgon-headed *aegis* fringed with snakes passes over his shoulders and clothes his shoulder-blades. The eagles beside him look as if they were flying. Before his feet is a female form, to right and left of which are statues of women: these are surrounded by the twisted coil of a snake. The beard below his chin signifies that rays are shot downwards on to the earth. The golden basket rising aloft indicates the apex of the upper air, from which the sun is supposed to derive its substance. The representation of a spear and a breast-plate adds a resemblance to Mars, whom I shall subsequently prove to be one with the sun. The Victory testifies that all things are subject to the power of this luminary. The flower bears witness to the bloom of those things that are sown, generated, cherished, nurtured, and matured by the said deity. The female form stands for the earth, on which the sun is shining from above: the other two statues of women enclosed in their circle signify matter and nature regarded as fellow-servants. The snake shows the sinuous course of the luminary. The eagles, whose swift flight is high over all else, point to the altitude of the sun. A Gorgon-vest is added because Minerva, whom tradition takes to be the rightful owner of this garb, is the virtue of the sun. Porphyrius too asserts that Minerva is the sun's virtue, which furnishes the minds of men with wisdom. Indeed that is why this goddess is said to have sprung from the head of Jupiter, in other words, to have arisen in the topmost portion of the upper air, where the sun originated.'

But, though we cannot equate the male statue of the inner sanctum with that of the nave, it is possible that after all they were effigies of the same god. When the pseudo-Lucian, who identified the inner statue with Zeus, says that 'you could not, even

¹ Loukian. *de dea Syr.* 36, cp. *ib.* 10.

² Macrobi. *Sat.* 1. 17. 66 ff.

perversely, compare him to another¹, he is perhaps combating the opinion of some one who identified him as a solar power with Apollon². And, when Macrobius describes the statue that he terms Apollon, it must be admitted that the details (the *kálathos*, the Victory, the *aigís*, the eagles) are suggestive rather of Zeus. Besides, the mode of divination attributed by the pseudo-Lucian to this Apollon appears to be identical with that attributed by Macrobius to the Zeus of Heliopolis³.

Fig. 448.

Fig. 449.

But, whatever may be thought of the statue that both the pseudo-Lucian and Macrobius call Apollon, it seems clear enough that the principal deities at Hierapolis were Atargatis (Hera) and Adad (Zeus) with the 'sign' surmounted by a dove between them. This arrangement is confirmed by the coin-types of Hierapolis. A silver coin of Caracalla shows a god with *kálathos* and sceptre seated on or between two bulls and a goddess with the same attributes and a spindle (?) seated on or between two lions. The two deities are grouped on either side of a small gabled structure, in which is an object resembling a military standard and on which rests a dove (?). Beneath all is an eagle (fig. 448)⁴. The same design occurs on a bronze coin of Severus Alexander with the legend 'gods of Syria' and a lion in place of the eagle (fig. 449)⁵, a variation repeated on a bronze coin of Iulia Mamaea⁶. These remarkable coins represent, unless I am mistaken, the cult-objects of the inner sanctuary at Hierapolis. We see before us not only Atargatis with her lions and her partner with his bulls, but also between them the mysterious 'sign' described by the

¹ *Supra* p. 583.

² On coins of Tarsos from Hadrian to Gallienus appears a cult-image of Apollon holding two wolves by the fore-legs and standing on an *omphalós*, which is sometimes flanked by two recumbent bulls (F. Imhoof-Blumer in the *Journ. Hell. Stud.* 1898 xviii. 171—174 pl. 13, 4—7, *Brit. Mus. Cat. Coins* Lycaonia, etc. p. 202, p. 203 pl. 36, 4, p. 208, p. 224, *Hunter Cat. Coins* ii. 551 pl. 60, 15, *Head Hist. num.*² p. 733)—a trait that he has in common with the Zeus of Heliopolis and the Zeus of Hierapolis.

⁶ Imhoof-Blumer *op. cit.* p. 759 f. no. 775.

pseudo-Lucian. We can now for the first time realise how accurate and trustworthy his description is. 'It has no shape of its own, but bears the forms of the other deities¹.' This sceptre or standard is neither anthropomorphic nor theriomorphic, but the four medallions, if such they are, that are hung upon it may well have borne the effigies of the temple-deities. Again, 'on the top of it there is perched a golden dove².' The word used here for the 'top' (*koryphé*) is the word applied in late Greek to the apex of a triangle³. Hence the coin, which shows a bird sitting on the pediment of the *aedicula*, aptly illustrates the text. On the whole it seems probable that a royal sceptre or standard, enclosed in a shrine of its own, was the central object of worship⁴. In which connexion it must be observed that a series of silver coins, bearing in Aramaic letters the name *Abd-Hadad* and representations of Atargatis, has been ascribed to a sacerdotal dynasty at Hierapolis c. 332 B.C.⁵. This attribution squares with my contention that Atargatis at Hierapolis was associated with Adad, and that the sceptre or standard of a divine king figured prominently in the same cult. A further allusion to the cult may be detected in two small bronze coins of the town, which exhibit respectively a humped bull with a crescent above it⁶ and a lion in a laurel-wreath inscribed 'of the Syrian goddess⁷.'

In Roman times her temple was plundered by Crassus, who spent many days making an inventory of its treasures 'with scales and balances⁸.' But with regard to the decline and fall of the cult no details are on record.

The old name of the town, Mabog or Mambog⁹, which had

⁷ *ib.* pp. liv, 142 pl. 17, 11, *Hunter Cat. Coins* iii. 138, cp. *Brit. Mus. Cat. Coins* Galatia, etc. p. 138 pl. 17, 7 (a silver coin of Hierapolis c. 331 B.C. inscribed in Aramaic letters with the name of Alexander: the reverse type is a lion walking towards a bird perched on a flower).

⁸ Plout. v. *Crass.* 17. ⁹ V. W. Yorke in the *Journ. Hell. Stud.* 1898 xviii. 316 no. 22 publishes an inscription found by him at Perre (*Perrin*), which speaks of a certain Μαμ|βογέω. He suggests that Mabog or Mambog became in Greek Βαμβόκη. D. G. Hogarth in the *Ann. Brit. Sch. Ath.* 1907—1908 xiv. 196 likewise posits Mambog as the original form.

doubtless always been current among the native Syrians, reasserted itself in post-classical days¹, and the place is still called Mumbij². Its ruins were discovered in 1699 by the Rev. H. Maundrell, who writes as follows of 'Bambych'³:

'This place has no remnants of its ancient greatness but its walls, which may be traced all round, and cannot be less than three miles in compass. Several fragments of them remain on the east side, especially at the east gate; and another piece of eighty yards long, with towers of large square stone extremely well built. On the north side I found a stone with the busts of a man and woman, large as the life; and, under, two eagles carved on it. Not far from it, on the side of a large well, was fixed a stone with three figures carved on it, in basso relievo. They were two syrens, which, twining their fishy tails together, made a seat, on which was placed, sitting, a naked woman, her arms, and the syrens' on each side mutually entwined. On the west side is a deep pit of about one hundred yards diameter. It was low, and had no water in it, and seemed to have had great buildings all round it, with the pillars and ruins of which it is now in part filled up, but not so much but that there was still water in it. Here are a multitude of subterraneous aqueducts brought to this city, the people attested no fewer than fifty. You can ride nowhere about the city without seeing them.'

R. Pococke in 1745 gives a more detailed account of his visit to 'Bambouch⁴'. After describing the walls, gates, water-channel, etc. he continues:

'At the west part of the town there is a dry bason, which seemed to have been triangular; it is close to the town wall: At one corner of it there is a ruined building, which seems to have extended into the bason, and probably was designed in order to behold with greater conveniency some religious ceremonies or public sports. This may be the lake where they had sacred fishes that were tame. About two hundred paces within the east gate there is a raised ground, on which probably stood the temple of the Syrian goddess Atargatis.... I conjectured it to be about two hundred feet in front. It is probable that this is the high ground from which they threw people headlong in their religious ceremonies, and sometimes even their own children, though they must inevitably perish. I observed a low wall running from it to the gate, so that probably it had such a grand avenue as the temple at Gerrhæ; and the enclosure of the city is irregular in this part, as if some ground had been taken in after the building of the walls to make that grand entrance; it is probable that all the space north of the temple belonged to it. A court is mentioned to the north of the temple, and a tower likewise before the temple, which was built on a terrace twelve feet high. If this tower was on the high ground I mentioned, the temple must have been west of it, of which I could see no remains; it possibly might

¹ The mediaeval variants are collected by E. B. James in Smith *Dict. Geogr.* i. 1064.

⁴ R. Pococke *A Description of the East, and Some other Countries* London 1745 ii. 1. 166 f. He notes 'that Hierapolis in Asia minor has much the same name, being called Pambouk Calasi [The cotton castle].' See further D. G. Hogarth *loc. cit.* p. 196.

have been where there are now some ruins of a large building, which seems to have been a church with a tower; to the west of which there are some ruinous arches, which might be part of a portico.¹

In 1850 Lieut.-Col. Chesney¹ included 'Munbedj or Bambuche' in the report of his great expedition: within the city he noticed—

'four large cisterns, a fine sarcophagus, and, among other ancient remains, the scattered ruins of an acropolis, and those of two temples. Of the smaller, the enclosure and portions of seven columns remain; but it seems to possess little interest, compared with the larger, which may have been that of...the Syrian Atargatis....Amongst the remains of the latter are some fragments of massive architecture, not unlike the Egyptian, and 11 arches form one side of a square paved court, over which are scattered the shafts of columns and capitals displaying the lotus.'

Nowadays even these scanty relics of the great temple have disappeared. Dr D. G. Hogarth and Mr R. Norton in 1908 were unable to locate it. Dr Hogarth says²:

'As a result of the Circassian occupation almost all the standing remains of antiquity, noticed by travellers from Maundrell to Chesney, have disappeared. I failed to find any traces of the Theatre, the Stadium, or the two Temples. Indeed the only obvious pre-Islamic structures *in situ* are firstly, the walls of the outer *enceinte*, evidently of late construction, to judge by tombstones used therein and lately extracted by the Circassians...: these walls are banked up with silt and overgrown with grass. Secondly, scanty remains of a stepped quay-wall or revetment, with water-stairs at intervals, which surrounds a large pool, some three acres in area, in the centre of the western half of the site³.... These remains extend all along the western bank and are visible also on the southern, but are obliterated elsewhere. The pool is said to be perennial and of some depth in the centre, and it can hardly be other than the [sacred lake mentioned by the pseudo-Lucian]. I cannot say if its depth be really above 200 cubits, as the treatise alleges; but the altar in the middle, to which the votaries used to swim, has disappeared....Just before the [modern town] is reached, the ground rises abruptly to a plateau, and probably here was an inner wall, making a smaller and earlier *enceinte* round the great Temple and its immediate precinct. The position of the Temple may have been more or less where the large mosque, built about thirty years ago, now stands; but no confirmatory indications are visible. The whole eastern half of the site right up to the eastern wall, which has been greatly quarried of late, is occupied by the houses, courtyards, and gardens of modern Mumbij. In the east centre the ground rises to a low hill on which some of the better Circassian houses are built. If this were not the site of the Temple, it was probably an Acropolis. It is 'not quite so near the Sacred Lake as the mosque site'⁴.

² D. G. Hogarth *loc. cit.* pp. 187, 189.

³ *Id. ib.* p. 188 fig. 1.

⁴ Dr Hogarth notes further a much defaced limestone lion near the south-east angle of the wall (*ib.* p. 188 fig. 2); four terra-cotta heads of a goddess who, to judge from the most complete specimen, was represented as clasping her breasts (*ib.* p. 190 fig. 3); sixteen inscriptions; etc.

(ε) Zeus (Adad) at Dion, Rhosos, etc.

Heliopolis and Hierapolis were not the only towns in which the Syrian Zeus was worshipped as a bull-god¹. To Dion, near Pella in Koile Syria, belongs a copper coin of Geta, showing a god who stands erect with a couple of humped bulls recumbent at his feet. He wears a *chiton* and a *himation*. On his head, which is horned, is a *kálathos*. His right hand grasps a sceptre tipped by an eagle: on his left rests a Victory holding a wreath (fig. 450)². A copper of Rhosos on the Gulf of Issos likewise represents a horned deity, who stands on a base between two reclining bulls: from his head rises a *crux ansata*; his right hand grasps a thunderbolt, his left an ear of corn (?); and on either side of him are the caps of the *Dióskouroi* (fig. 451)³. Gabala, a Syrian coast-town between Laodikeia and Paltos, worshipped a similar deity⁴. And a unique

Fig. 450.

Fig. 451.

Fig. 452.

silver tetradrachm of Antiochos xii, now in the Dresden cabinet, attests the same cult. It has for a reverse type a bearded god standing on a base of two steps between a couple of recumbent bulls. He wears a pointed head-dress, a long *chiton* with a broad knotted belt, and a *himation* buckled round his neck. Both hands are extended, and the left holds a two-leaved ear of corn (fig. 452)⁵.

¹ The deity represented on coins of Neapolis in Samaria (F. de Saulcy *Numismatique de la terre sainte* Paris 1874 p. 250 f. nos. 5—7 and perhaps p. 255 f. nos. 1—3, F. Lajard *Recherches sur le culte, les symboles, les attributs, et les monuments figurés de Vénus* Paris 1837 pl. 3 B, 3 and 4), Eleutheropolis (*id. ib.* p. 243 no. 2) and Nikopolis in Iudaea (F. Imhoof-Blumer in the *Num. Zeitschr.* 1901 p. 13 f.) is the Zeus of Heliopolis (*supra* p. 572 n. 1).

(5) Characteristics of the Syrian Zeus (Adad).

As at Heliopolis¹, so at Hierapolis and elsewhere the bulls associated with Adad (Zeus) marked him as a god of thunder and fertility. The Rhosian coin, which represents him with a thunderbolt and a *crux ansata*, indicates both aspects of his being. At Hierapolis the latter was the more prominent, to judge from the local myth² and ritual³. He was here a fitting partner of Atargatis (Hera), a

¹ *Supra* p. 576 ff.

² According to Loukian. *de dea Syr.* 17 ff., the temple at Hierapolis was rebuilt by Stratonike [the second wife of Seleukos i Nikator], who was afterwards married to her step-son [Antiochos i Soter]. Stratonike was bidden by Hera in a dream to raise to her the temple at Hierapolis. The king [Seleukos] sent her thither under the charge of his friend Kombabos, a very handsome youth. Kombabos, fearing the result of this commission, mutilated himself, put his *αἰδοῖα* in a small jar along with myrrh, honey, and other perfumes, sealed it and gave it to the king as a priceless treasure to be kept against his return. The king set another seal upon it and entrusted it to his stewards. When Stratonike had been three years building the temple, Hera, angry at the delay, struck her with a passion for Kombabos. At first she concealed her feelings; but at last she made herself drunk and confessed her love. Kombabos rejected her overtures. She then threatened to lay violent hands upon herself. Whereupon he told her of his mutilation and so cured her madness. But she still loved him and enjoyed his company. Meantime the king sent for Kombabos. (Some say falsely that Stratonike accused Kombabos to him of attempting her honour: cp. the tales of Sthenoboa and Phaidra.) Kombabos was imprisoned, arraigned, and condemned to death. He then called for his treasure, broke the seal, and proved his innocence by exhibiting the contents. The king, convinced, promised to put his accusers to death, to bestow upon him much gold and silver, Assyrian raiment, and royal horses, and to grant him the right to approach himself unannounced 'even'—said he—'ἤν γυναικὶ ἅμα εὐνάξωμαι.' Kombabos finished the temple and in future dwelt there. A bronze statue of him by Hermokles of Rhodes, which stands in the temple, shows a feminine form in masculine attire; for such was his aspect. But a stranger woman, who once came to a festival, fell in love with him and, on discovering his condition, slew herself; so he, discouraged at it, changed his practice and put on a woman's dress. His friends showed their sympathy with him by mutilating themselves and sharing his mode of life. (Others tell a sacred tale to the effect that Hera loved Kombabos and, to prevent him from being lonely, sent upon his friends this desire for self-mutilation.)

In this myth Kombabos is obviously a Syrian parallel to Attis, who, according to one version (Prudent. *peristeph.* 10. 196 ff.), unmanned himself to escape the embraces of Kybebe: cp. Gruppe *Gr. Myth. Rel.* p. 1542 n. 3. Hera, *i.e.* Atargatis, here corresponds with Kybebe. The transference of the tale from the goddess Hera to the mortal Stratonike perhaps implies that the Syrian queen played the part of the goddess. Those who identified Atargatis with Rhea ascribed the foundation of her temple and cult to Attis (Loukian. *de dea Syr.* 15).

³ The statements of the pseudo-Lucian with regard to the ritual at Hierapolis may here be summarised:

In this *Propylaia* stand two *φαλλοί*, dedicated by Dionysos to his step-mother Hera, and reaching to a height of thirty fathoms. Twice a year a man climbs up one of them and spends seven days on the top. Most persons say that he associates up there with the gods, invoking their blessing upon the whole of Syria, and that the gods, since he is near them, hear his prayers. Others connect the custom with Deukalion's flood, when men, to escape the water, climbed mountains and high trees [cp. *supra* p. 584 n. 1]. Lucian compares rather the *νευρόσπαστα* of the Greeks, small wooden men with large *αἰδοῖα*

goddess whom the Greeks described as 'Nature or the Cause that made out of moisture the first principles and seeds of

seated on the *φαλλοί* raised for Dionysos, and notes that on the right of the temple at Hierapolis is seated a small bronze figure of a man with a large *αἰδοῖον*. However that may be, the Syrian climbs his *φαλλός*, as an Arab or an Egyptian climbs a date-palm. On the top he erects a hut and receives offerings. A man standing below shouts up the name of each donor. He, up aloft, invokes a blessing upon the latter and, during his prayer, beats a vessel of bronze, which makes a great clanging reverberation. He keeps a sleepless vigil; for, should he sleep, a scorpion would climb up and attack him (*ib.* 16 and 28 f.). [In the *Jahrb. d. kais. deutsch. arch. Inst.* 1912 xxvii Arch. Anz. pp. 13—16 R. Hartmann attempts to show that a bronze statuette at Stuttgart represents this *φαλλοβάτης*—an improbable view. The *νευρόσπαστα* in question may, I think, be illustrated from a black-figured *kýlix* at Florence published by H. Heydemann *Mitteilungen aus den Antikensammlungen in Ober- und Mittelitalien* Halle 1879 p. 95 no. 50 (Preuss in the *Archiv für Anthropologie* N.F. 1903 i. 129 ff. figs., A. Dieterich *Mutter Erde* Leipzig and Berlin 1905 p. 107 ff. figs.) and Milani *Stud. e mat. di arch. e num.* 1902 ii. 78 ff. figs. 262 a, 262 b: cp. *Hdt.* 2. 48, *Plout. de Is. et Os.* 12, 36. F. Cumont —E. Cumont *Voyage d'exploration archéologique dans le Pont et la petite Arménie* ii. 337 figure cylinders of enamelled terra cotta, c. 50^m high, found at Erzincgân and thought by the Turks to be *φαλλοί* used in the cult of the Syrian goddess. On the beaten gong see the *Journ. Hell. Stud.* 1902 xxii. 5—28.]

Outside the temple is a large bronze altar and countless bronze statues of kings and priests, including Semiramis, who claimed divine honours, Helene, Hekabe, Andromache, Paris, Hektor, Achilles, Nireus son of Aglaïa, Philomele and Prokne as women, Tereus as a bird, Semiramis again, Kombabos, Stratonike, Alexander, Sardanapallos. In the courtyard great bulls, horses, eagles, bears, and lions roam about: they are all sacred and harm no man (*ib.* 39—41).

Numerous priests slay victims, or bear libations, or are 'fire-bearers,' or wait beside the altar: more than 300 of them come to the sacrifice. All wear white garments and a felt cap, except the chief priest, who alone wears a purple robe and a golden tiara. Besides, there are other sacred persons—flute-players, pipers, eunuchs and frenzied women (who dote upon them: *ib.* 22). All come to the sacrifice, which takes place twice a day. During the sacrifice to Zeus they keep silence; during that to Hera they sing, play the flute, and shake rattles (*ib.* 42—44).

Near the temple is a lake containing sacred fish of various kinds. The large ones have separate names and come when called. One of them is decked with gold, having a golden object attached to his fin. The lake is said to be over 200 fathoms in depth. In the midst of it is a stone altar, thought by many to be floating on the water. It is always wreathed and perfumed: many persons under a vow swim to it daily and bring the wreaths. Important festivals are held here, known as 'Descents to the Lake,' because all the deities come down to the lake. Hera arrives first to save the fish; for, if Zeus saw them before her, they would all perish. He too comes to look at them; but she blocks the way and implores him to depart. On the occasion of their greatest festivals [cp. *supra* p. 584 n. 1] they go down to the sea. Each man returns bearing a vessel of water sealed with wax. A sacred 'cock,' living on the lake, receives the vessels, inspects their seals, and earns many *mnai* for himself by unfastening them. The men then take the vessels to the temple, pour their libations, offer sacrifices, and so return home (*ib.* 45—48).

The greatest festival known to the writer is, however, celebrated at the beginning of spring and named the 'Pyre' or the 'Torch.' They cut down great trees and erect them in the courtyard. On these they hang live goats, sheep, etc. together with birds, garments, and objects in gold or silver. When all is ready, they bear the deities round the trees, which they fire and consume on the spot. This festival is attended by a multitude from Syria and the surrounding districts: all who come bring with them their own deities and images of the same. On certain specified days the crowd assembles in the

all things' and again as 'her who gave mankind their earliest knowledge of all that is good for them'.

(7) *Ba'al-tars and Zeus Térésios.*

Akin to the Syrian Adad, though not identical with him, was a god worshipped since Hittite times in Kilikia and the

precinct, but outside the temple: here many eunuchs and sacred men perform their orgies, cutting their fore-arms and striking each other on the back. Many, standing by, play the flute; many beat drums; others sing inspired and holy songs. On these days too, while the eunuchs are raising their din, madness falls on many a young man, who flings aside his garments and with a great cry rushes into the midst of them. He seizes a sword; for there are swords in plenty placed there on purpose. With this he mutilates himself and runs through the town holding in his hands the parts that he has cut off. When he has flung them away into a house, he receives from that house feminine attire and a woman's ornaments (*ib.* 49—51).

A dead eunuch is buried in a peculiar fashion. His comrades carry him out to the suburbs, set him down on the bier, cast stones over him, and return. They may not enter the temple-precinct for the next seven days. If any of them sees a corpse, he does not enter the precinct that day, but purifies himself on the morrow and enters it. If one of their own household has died, they wait thirty days, shave their heads, and then enter. The beasts that they sacrifice are oxen both male and female, goats, and sheep. Swine only they deem unclean and neither sacrifice nor eat: others, however, deem them not unclean but sacred. They regard the dove as an object of the greatest sanctity: they will not even touch it; or, if they do so by accident, they are unclean throughout that day. Hence doves dwell with them, enter their houses, and feed for the most part on the ground (*ib.* 52—54).

When a man goes to Hierapolis to attend a festival, on first entering the town he shaves his head and eyebrows and then sacrifices a sheep. Most of it he cuts up and eats, but the fleece he lays on the ground. Kneeling upon it, he draws the feet and head of the beast over his own head; and at the same time offering prayer he asks the deity to accept his present sacrifice and promises a greater one in future. After that he wreathes his own head and the heads of all those that have come on the same errand with him. From the moment when he quits his own country for the journey he must use cold water both for bathing and for drinking and must always sleep on the ground, it being forbidden to mount upon a bed till he has reached his home again. In Hierapolis he is received by a host whom he does not know. Certain hosts are there assigned to each town, the office being hereditary. Those that discharge it are called by the Assyrians 'teachers,' since they explain the rites to their guests. They do not offer sacrifice in the sanctuary itself; but, having brought the victim to the altar and poured a libation over it, they lead it home alive, and, on reaching every man his own dwelling, sacrifice it and pray. Another sacrifice is performed thus: they wreath the victims and cast them alive from the *Propylæa*, the victims being killed by the fall. Some even cast their own children down hence, but not as they do the beasts: they put them in a sack and lower them by hand, jeering at them the while and declaring that they are not children, but oxen [cp. *supra* p. 442 nn. 1, 2]. They are all tattooed, some on the wrist, others on the neck. Just as at Troizen lads and lasses must not wed till they have shorn their hair for Hippolytos, so at Hierapolis young men offer the first hairs of their beards, while girls leave a sacred tress uncut from their birth onwards. On reaching the sanctuary they cut the hair and, placing it in vessels of silver or often of gold, nail it to the temple-wall and inscribe it with their names [cp. *supra* p. 23 ff.] (*ib.* 55—60).

seen at Ivriž, where a singularly fertile glen runs far into the northern flank of Mount Tauros. Prof. J. Garstang describes the scene in graphic language:

'At the foot of the rock a stream of water, clear and cool, bursts out in tremendous volume, and, supplemented by other similar sources, becomes in a hundred yards a raging and impassable torrent, roaring with a wonderful noise as it foams and leaps over the rocks in its course. Before joining the main stream of the valley it washes at a bend the foot of a bare rock, upon which from the opposite side there may be seen the famous sculptures, the most striking of all known Hittite works, and one of the most imposing monuments of the ancient East.

The treatment of these sculptures is all in relief. In composition there are two persons represented: the Peasant-god, a gigantic figure fourteen feet in height, distinguished by the bunches of grapes and bearded wheat which he holds, and the King-priest, an heroic figure eight feet in height, facing towards the god, with clasped hands raised in adoration or thanksgiving for his bounty.

The god is clad in the short tunic, short-sleeved vest, pointed cap, and shoes with turned-up toes, characteristic of the godlike figures on all Hittite sculptures. But here the sculptor has elaborated his theme, and has worked into it ideas or conceptions which we may reasonably suspect were derived ultimately from the East through the intermediary of Cilicia. The figure is squat and stolid, and the face almost Semitic....Perhaps the most peculiar and Oriental detail is to be found in the horns which decorate the helmet, of which four pairs are visible. In front of the right foot is the suggestion of a bolted implement, possibly a plough....

There are three short inscriptions accompanying these figures. In that which is carved before the face of the god, Professors Sayce and Jensen both find the name of Sandes in the first line (the W-like sign below the divided oval that signifies divinity). In the next line, as in the overlap of the first and second lines of inscription behind the king, we find the same name (read Ayminyas) as ...in the inscriptions of Bor and of Bulghar-Madên. This point is of importance in considering the history of the Hittite peoples when, as it seems, the central authority was no longer at Boghaz-Keui. For the date of these sculptures, if only from their close analogy in treatment to those of Sakje-Geuzi, may be put down to the tenth or ninth century B.C. It would seem indeed that we are here drawn into relation with the kingdom of (Greater) Cilicia, which, with Tyana probably as capital, took the place of the Hatti-state within the Halys, as the dominant Hittite state at the beginning of the first millennium B.C.'

Sandas was clearly a god of fertility¹. The bovine horns on his tiara, the grape-bunches and corn-ears in his hands, the plough(?) at his feet, all point in that direction. At Tarsos in the fourth century B.C., while retaining his old attributes the grapes and the corn, he acquired the characteristics of Zeus. On silver coins

97, O. Höfer in Roscher *Lex. Myth.* iv. 330 f. fig. 2, J. Garstang *The Land of the Hittites* London 1910 pp. 191—195 pl. 57 (from a cast at Berlin).

struck in Kilikia by the satrap Datamés, 378—374 B.C. (figs. 454, 455)¹, he appears under the name *Ba'al-tars* enthroned with an eagle-sceptre in his right hand, a corn-ear and a bunch of grapes in his left: beside him is an incense-burner, and beneath his throne a variable symbol—a pomegranate-flower, a bull's head, the fore-

Fig. 454.

Fig. 455.

part of a humped bull, the entire bull crouching, a knuckle-bone, a lion, a bird. The whole design is surrounded by a circle with projections like battlements, probably meant for the town-wall. Silver coins issued by Mazaios² as satrap of Kilikia, 361—334 B.C.³, and Trans-Euphratesia, 351—334 B.C. (figs. 456, 457)⁴, together with

Fig. 456.

Fig. 457.

others issued by Arsames as satrap of Kilikia, 334—331 B.C.⁵, show the same deity enthroned with a lotos-sceptre and grouped in various ways with one or more of his attributes—an ear of corn, a bunch of grapes, and an eagle. On coins struck by Mazaios as general of Dareios in Syria and at Babylon, 334—331 B.C.⁶, and as governor

¹ *Babelon Monn. gr. rom.* ii. 2. 409 ff. pl. 109, 4—10, 12—15, *Brit. Mus. Cat. Coins* Lycaonia, etc. p. 167 f. pl. 29, 11—15, *Hunter Cat. Coins* ii. 547, *Head Hist. num.*² p. 730 f. fig. 322. Fig. 454 is from a specimen in my collection; fig. 455 = *Babelon op. cit.* ii. 2. 413 f. pl. 109, 14.

² For the coinage of Mazaios etc. I follow the classification recently proposed by *Babelon op. cit.* ii. 2. 443 ff.

³ *Id. ib.* ii. 2. 445 ff. pl. 111, 14—20, pl. 112, 1—8.

⁴ *Id. ib.* ii. 2. 451 ff. pl. 112, 12—20, 22, pl. 113, 1 f., 5—11. I figure two specimens in my collection.

⁵ *Id. ib.* ii. 2. 461 ff. pl. 113, 13—18, pl. 114, 1—3.

⁶ *Id. ib.* ii. 2. 471 ff. pl. 114, 15—20.

of Babylon under Alexander the Great, 331—328 B.C.¹, *Ba'al-tars* loses his distinctive attributes altogether. And on later pieces struck by the generals of Alexander, *e.g.* by Seleukos in 321—316 and 312—306 B.C. (fig. 458)², he drops not only his attributes but

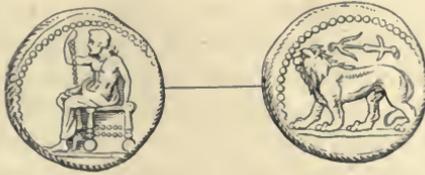

Fig. 458.

also his title *Ba'al-tars* and appears as a purely Hellenic Zeus. In the third century B.C. he was known at Tarsos as Zeus *Térsios*³.

The identification of Sandas with Zeus was due partly to the fact that Sandas was the chief god of the district⁴ and partly to the

¹ *Id. ib.* ii. 2. 475 ff. pl. 114, 21 f.

² *Id. ib.* ii. 2. 481 ff. pl. 115, 3—5, 7 f., 10 f., 14—17, 21—25. I figure a specimen in my collection.

³ Eustath. *in* Dionys. *per.* 867 Ἐρατοσθένης δὲ φησι τὴν κλήσιν τῇ πόλει εἶναι ἀπὸ Διὸς Τερσίον τοῖς ἐκεῖ καλουμένοι. οἱ δὲ φασὶ Τερσὸν ταπρῶτα διὰ τοῦ εἰ στοιχείου ὀνομασθῆναι τὴν πόλιν, διὰ τὸ τοὺς ἐκεῖ πρῶτους συναγαγόντας καρπὸν χλωρὸν τερσῆναι, ὃ ἔστι ξηρᾶναι, καὶ εἰς χειμῶνος ἀποθέσθαι τροφήν. Cp. Steph. Byz. *s.v.* Ταρσός.

Among the commonest types of the later copper coins of Tarsos is that of Zeus enthroned (*Brit. Mus. Cat. Coins* Lycaonia, etc. pp. 177, 181 ff., 190, 192 pls. 32, 12, 33, 4—9, *Hunter Cat. Coins* ii. 548 f. pl. 60, 12, *Head Hist. num.*² p. 732 f.).

⁴ Another Cilician god, Olymbros, who passed as being the brother of Sandas (Steph. Byz. *s.v.* Ἄδανα... ἔστι δὲ ὁ Ἄδανος Γῆς καὶ Οὐρανοῦ παῖς, καὶ Ὅστασος καὶ Σάνδης καὶ Κρόνος καὶ Ῥέα καὶ Ἰαπετός καὶ Ὀλυμβρος), was worshipped by natives of Anazarbos as Zeus Ὀλύβριος or Ὀλύβρις (*Inscr. Gr. Sic. It.* no. 991 a small marble *stèle* found on the Esquiline Διὶ Ὀλυβρί(ω) or Ὀλύβρι τοῦ Κιλικῶν | ἔθνους τῆς | λαμπροτάτης | μητροπόλεως Ἄναζαρ|βέων Ἀυρ(ήλιος) | Μάρκος σάτωρ | εὐχῆς χάριν). High up in an almost inaccessible cave on the mountain behind Anazarbos (*Anazarza*) is another dedication to Zeus (E. L. Hicks in the *Jour. Hell. Stud.* 1890 xi. 238 no. 4 Διὶ καὶ Ἡρᾷ Γαμηλίᾳ καὶ Ἄρει θεοῖς πολιούχοις | Ῥηγείνα Ἀσκληπιάδου | σκηπητροφοροῦσα ἱερὰ ὑπὲρ | τῆς πόλεως [τε] καὶ τῆς | βουλῆς, ἐπὶ

Fig. 459.

ἱερέως θεῶν | Ἀγρέων Σείτου Ταυρίσκου· | ἔτους βορ = 153 A.D. or possibly 192 A.D.). And the θεὸς Καταιβάτης is coupled with Persephone in an inscription on the 'tomb of the eunuch' (R. Heberdey and A. Wilhelm *Reisen in Kilikien* Wien 1896 p. 38 no. 94 D). An imperial copper of Anazarbos struck by Claudius (?) has a bust of Zeus, laureate, placed in front of a rock crowned with a fortress (fig. 459 = Imhoof-Blumer *Monn. gr.* p. 349 no. 10 pl. F, 20: on this fortress see V. Langlois 'Anazarbe et ses environs' in the *Rev. Arch.* 1856 xiii. 361—370 pl. 290 f.). Other Zeus-types occur on the coinage of the town (*Brit. Mus. Cat. Coins* Lycaonia, etc. pp. cvī, 31, 34 pls. 5, 10, 6, 4, *Hunter Cat. Coins* ii. 527, *Head Hist. num.*² p. 716 f. I figure an unpublished specimen

fact that Zeus too was a giver of fertility¹. But this identification² though favoured by the satraps and generals, did not adequately express the popular conception of Sandas, whose prototype in the Hittite religion appears to have been the son-god rather than the father-god³. Hence side by side with Zeus, the supreme dispenser of all things good, the Tarsians worshipped Herakles, the more human and approachable averter of all things evil. The coins struck by Datames, which represented *Ba'al-tars* as a Zeus-like deity seated on a throne, supplement this obverse type by a reverse of exceptional interest (figs. 454, 455). Within a square frame surmounted by antefixes etc. and probably intended for a sacred edifice are two male figures with an incense-burner between them.

in my collection (fig. 460): obv. [ΚΑΙΣΑΡΕΩΝ Ϝ?] | ΑΝΑΖΑΡΒΩ head of Zeus, laureate, to right; rev. ΕΤΟΥΣ | ΒΑΡ (=132=113/114 A.D.) head of Tyche, veiled and turreted); and it would seem reasonable to conclude that on the akropolis

Fig. 460.

of Anazarbos there was an important cult of Zeus, who had here dispossessed Olymbros. See further A. von Domaszewski 'Zeus Ὀλύβριος' in the *Num. Zeitschr.* 1911 pp. 10—12.

¹ A coin of Titiopolis in Kilikia, struck by Hadrian, shows Zeus with sceptre and *cornu copiae* (fig. 461 = W. Wroth in the *Num. Chron.* Third Series 1900 xx. 293 no. 29

Fig. 461.

pl. 14, 10, Imhoof-Blumer *Kleinas. Münzen* ii. 494, Head *Hist. num.*² p. 734)—an attribute which he there shares with the local Tyche (*Brit. Mus. Cat. Coins* Lycaonia, etc. p. 231 pl. 38, 7): cp. *supra* p. 501 f. pl. xxxi, Zeus on a copper of the Italian Lokroi enthroned with a sceptre in his left hand and a *cornu copiae* behind him (*Brit. Mus. Cat. Coins* Italy p. 369, Garrucci *Mon. It. ant.* p. 161 pl. 113, 13), an archaistic Jupiter bearing a *patera* in his right hand, a *cornu copiae* in his left, on a base at Berlin which probably dates from the reign of Commodus and is inscribed I. o. m. | summo | exsuper[an]tissim[o] (R. Kekulé von Stradonitz 'Über das Relief mit der Inschrift C. I. L. vi. 426' in the *Sitzungsber. d. Akad. d. Wiss. Berlin* 1901 p. 387 ff., F. Cumont in the *Archiv f. Rel.* 1906 ix. 323 ff., A. v. Domaszewski *ib.* 1911 xiv. 313, Reinach *Rép. Reliefs* ii. 32 no. 2), another archaising Jupiter, with *kálathos* on head, *patera* in left hand, over which hovers a butterfly, and *cornu copiae* in right, on an engraved gem at St Petersburg (L. Stephani in the *Compte-rendu St. Pé.* 1873 p. 150, *ib.* 1877, p. 100, Reinach *Pierres Gravées* p. 134 no. 3 pl. 123, cp. *ib.* p. 124 no. 3 pl. 120); and a stone statuette from Frangissa in Kypros showing *Ba'al-hammân* between two rams with a *cornu copiae* in his left hand (Ohnefalsch-Richter *Kypros* p. 474 pl. 191, 4, cp. *supra* p. 354 pl. xxvi, 1).

² If Sandas at Ivrtz had corn-ears, grapes and a plough (*supra* p. 594 f.), Zeus had corn-ears at Heliopolis (*supra* pp. 552, 558 f., 569, 572), grapes and a plough in Phrygia (*supra* pp. 4 n. 2, 399 f.).

³ J. Garstang *The Land of the Hittites* London 1910 pp. 195, 238, 240, 378 f.

On the right stands Datames himself in *chiton* and *himation* raising his hand with a gesture of adoration. On the left is the nude form of Herakles with arm outstretched towards the satrap. Before Datames is his name in Aramaic lettering—*Tddmw*¹. Behind Herakles on certain specimens (fig. 455) room is found for a second Aramaic word—*ana*². Now it has been universally supposed that *Ana* must be the name of the naked god, and attempts have been made to connect him with the Assyrian *Anu*³. But I am informed by my friends Prof. R. H. Kennett, Prof. F. C. Burkitt, and Mr N. McLean, that *ana* is ordinary Aramaic for 'I (am),' and that 'I am Datames' would have been the normal commencement of a royal or quasi-royal proclamation. I would therefore suggest that this much-disputed⁴ type simply represents Datames announcing himself as a worshipper of Herakles (Sandas).

Sandas as figured on coins of Tarsos from about 164 B.C.

Fig. 462.

Fig. 463.

Fig. 464.

onwards (figs. 462—468)⁵ bears a much closer resemblance to the ancient Hittite son-god⁶. He stands on the back of a lion, which

¹ I have to thank my friend Mr N. McLean, Lecturer in Aramaic to the University of Cambridge, for examining a number of these coins and deciphering their legend. Mr McLean tells me that it might possibly be read as *Tdnmu*, but that there is in Aramaic no such use of a sonant *n* as would justify the transcription *Tadymu* (Head *Hist. num.*² p. 731).

² This word is placed either in the narrow space at the back of Herakles' knee (Babelon *Monn. gr. rom.* ii. 2. 413 f. pl. 109, 13 and 15) or outside the frame behind Herakles (*id. ib.* pl. 109, 14=my fig. 455).

³ E. Babelon *Les Perses Achéménides* Paris 1893 pp. clvi—clix, *id. Monn. gr. rom.* ii. 2. 413 ff., G. F. Hill in the *Brit. Mus. Cat. Coins* Lycaonia, etc. p. lxxx, Head *Hist. num.*² p. 731.

⁴ P. Gardner *Types of Gk. Coins* p. 171 pl. 10, 29 regards as plausible an interpretation put forward by Honoré d'Albert, duc de Luynes *Numismatique des satrapies et de la Phénicie* Paris 1846 p. 20, *viz.* that Sardanapalos represented by the Greek artist as an effeminate Zeus or Dionysos is here snapping his fingers (Athen. 530 A ff.) at Herakles, who exhorts him to better things! But such moralising is, as Prof. Gardner admits, 'a rare or unprecedented occurrence among Greek coins.' Frankly, it is unthinkable.

⁵ *Brit. Mus. Cat. Coins* Lycaonia, etc. pp. 178 f., 186, 206 pls. 32, 13—16, 33, 1, 34, 2, 36, 9, *Hunter Cat. Coins* ii. 548 pl. 60, 11, Head *Hist. num.*² p. 732 f., P. Gardner *Types of Gk. Coins* p. 206 pl. 13, 20.

⁶ In the rock-carvings of Iasily Kaya near Boghaz-Keui the Hittite son-god stands on the back of a lioness (or panther—if the animal is really turned as in Perrot—Chipiez *Hist. de l'Art* iv. 637 fig. 313; for the panther, as opposed to the lion, in early art is

is both winged and horned. He is draped and wears a tall head-dress. He carries bow-case and sword, and grasps a double-axe in his left hand. Occasionally also, as befits a god of fertility, he holds a branch¹ or flower (fig. 463)² or wreath (fig. 464)³. He thus differs widely from the Grecised representation of him as Herakles. Indeed, we should not know him for the same deity, were it not that he is sometimes nude (fig. 463)⁴ and always stretches forth his right hand in what is clearly a characteristic gesture⁵.

Certain coins struck at Tarsos by the Seleucid kings of Syria from Alexandros i Balas (150—146 B.C.) to Antiochos ix Kyzikenos (113—95 B.C.) show Sandas between two small cones or altars on

Fig. 465.

Fig. 466.

a pyramidal structure topped by an eagle with spread wings (figs. 465, 466)⁶. This erection has been thought to represent the 'Pyre' made for Herakles (Sandas) at the Tarsian festival of *Pyrdi*.

normally represented with his head full-face, not in profile: see E. Pottier 'Histoire d'une bête' in the *Revue de l'art ancien et moderne* 1910 p. 419, H. G. Spearing *The Childhood of Art* London 1912 p. 138 ff.). He wears a short tunic, shoes with upturned toes, and a conical fluted hat. He grasps a staff in his outstretched right hand and a double-axe in his left, while a short dagger hangs by his belt (J. Garstang *The Land of the Hittites* London 1910 p. 222 f. pl. 65, cp. p. 228 f. pl. 71; bibliography *ib.* p. 396).

¹ *Brit. Mus. Cat. Coins* Lycaonia, etc. p. 179 pl. 32, 16.

² *Ib.* p. 179 pl. 33, 1 (flower with three petals), Imhoof-Blumer and O. Keller *Tier- und Pflanzenbilder auf Münzen und Gemmen des klassischen Altertums* Leipzig 1889 p. 70 pl. 12, 7 (= my fig. 463).

³ *Brit. Mus. Cat. Coins* Lycaonia, etc. p. 178 pl. 32, 14, p. 186 pl. 34, 2, p. 206 pl. 36, 9, *Hunter Cat. Coins* ii. 548 pl. 60, 11, Imhoof-Blumer and O. Keller *op. cit.* p. 70 f. pl. 12, 8, 9.

⁴ *Brit. Mus. Cat. Coins* Lycaonia, etc. p. 179 pl. 33, 1, Imhoof-Blumer and O. Keller *op. cit.* p. 70 pl. 12, 7.

⁵ I take this gesture to be expressive of power. In the Old Testament a 'stretched out arm' is constantly found with that connotation (Ex. 6. 6, Deut. 4. 34, 5. 15, 7. 19, 9. 29, 11. 2, 1 Kings 8. 42, 2 Kings 17. 36, *alib.*).

⁶ *Brit. Mus. Cat. Coins* Lycaonia, etc. p. 180 f. pl. 33, 2, 3, *Hunter Cat. Coins* ii. 548, *Brit. Mus. Cat. Coins* Seleucid Kings of Syria p. 72 pl. 28, 8, p. 78 pl. 21, 6, p. 89 pl. 24, 3, p. 112, *Head Hist. num.*² p. 732 f., P. Gardner *Types of Gk. Coins* p. 206 pl. 14, 17, Anson *Num. Gr.* v pl. 2, 50 f., 53—55.

⁷ So e.g. P. Gardner *Types of Gk. Coins* p. 206, *Head Hist. num.*² p. 733 ('probably the pyre' etc.). Mr G. F. Hill in the *Brit. Mus. Cat. Coins* Lycaonia, etc.

Dion Chrysostomos, the only author who mentions this pyre, does so in an address to the inhabitants of Tarsos¹:

'What think you? If, as we may well suppose and as men declare, founders—be they heroes or gods—often visit the states that they have founded, though none can see them, at sacrifices and certain public festivals; if, then, your own first founder Herakles were to come here, say during the Pyre, which you make for him so handsomely,—think you he would be best pleased at hearing that the city has got this reputation?'

Dr Frazer has conjectured that 'at this festival, as at the festival of Melcarth, the god was burned in effigy on his own pyre².' That may have been so: but no ancient writer actually states that a god was burnt in effigy at Melqart's festival³, and as to Tarsos—

Fig. 467.

Fig. 468.

Dion's words rather imply that the deity was not visible at all. In any case the erection of the Tarsian coins can hardly be identified with the pyre of Herakles. To begin with, specimens struck by Marcus Aurelius (fig. 467)⁴, Tranquillina (fig. 468)⁵, etc.⁶ show the supposed pyre covered by an elaborate baldachin as if it were a permanent structure.

p. lxxxvi speaks with more reserve ('either a permanent monument, or the pyre' etc.). Mr G. Macdonald in the *Hunter Cat. Coins* ii. 548 apparently rejects the identification with Herakles' pyre ('Monument...surmounted by pyramidal structure,' etc.).

¹ Dion. Chrys. *or.* 33 p. 23 f. Reiske *τί ἂν οἴεσθε, εἰ καθάπερ εἰκὸς ἐστί καὶ φασὶ τοὺς οἰκιστὰς ἤρωας ἢ θεοὺς πολλάκις ἐπιστρέφουσθαι τὰς αὐτῶν πόλεις τοῖς ἄλλοις ὄντας ἀφανεῖς ἐν τε θυσίαις καὶ τισιν ἑορταῖς δημοτελέειν, ἐπεὶ ὁ ἀρχηγὸς ὑμῶν Ἡρακλῆς παραγένειτο ἦτοι Πυρᾶς οὐραίας ἢ πάντων καλῆν αὐτῷ ποιεῖτε <ἤ.....>, σφόδρα γε ἂν αὐτὸν ἠσθῆναι τοιαύτης ἀκούσαντα φωνῆς; Reiske prefers to eject ἦτοι as an intrusion from some *scholion*.*

² Frazer *Golden Bough*³: Adonis Attis Osiris² p. 99.

³ *Id. ib.* pp. 84—90 'raises a strong presumption, though it cannot be said to amount to a proof, that a practice of burning a deity, and especially Melcarth, in effigy or in the person of a human representative, was observed at an annual festival in Tyre and its colonies.'

⁴ *Brit. Mus. Cat. Coins* Lycaonia, etc. p. 190 pl. 34, 10.

⁵ *Id. ib.* p. 221 pl. 37, 9, *Hunter Cat. Coins* ii. 555 pl. 60, 18. I figure a specimen in the McClean collection.

⁶ *Brit. Mus. Cat. Coins* Lycaonia, etc. p. 224 no. 305 Trajan Decius, p. 225 no. 310 Herennius Etruscus.

Again, the eagle on its apex resembles the eagle on the pyramidal roof above the stone of Zeus *Kásios* at Seleukeia Pieria¹. Finally, the whole Tarsian structure is quite unlike any other pyres figured on Greek or Roman money², but both in form and in decoration so strikingly similar to the pyramids of Jupiter *Dolichenus*³ that we are fully justified in explaining it by the help of their analogy.

If Sandas at Tarsos had among his attributes both grape-bunches and a pyramid topped by an eagle, we may perhaps venture to connect his name with another Cilician coin-type (figs. 469—474)⁴, in which appears a pyramid flanked by two birds or

Fig. 469.

Fig. 470.

Fig. 471.

Fig. 472.

Fig. 473.

Fig. 474.

by two grape-bunches⁵. Certain examples of this coinage (fig. 472) exhibit on the pyramid a symbol resembling the three-petalled flower sometimes held by Sandas⁶.

¹ Append. B Syria.

² For the pyre of Zeus *Strátios* as shown on coins of Amaseia see the *Class. Rev.* 1904 xviii. 79 f., *Folk-Lore* 1904 xv. 296, 306 f. (add now Waddington—Babelon—Reinach *Monn. gr. d'As. Min.* pp. 27, 32, 35 f., 38 ff. pls. 4, 22, 5, 12—14, 26, 6, 1—4, 7—10, 12 f.): the only hint of a pyramidal top is on a specimen struck by Caracalla (*ib.* p. 39 pl. 6, 3, *Brit. Mus. Cat. Coins Pontus*, etc. p. 11 pl. 2, 4). Roman CONSECRATIO-pyres (listed by Rasche *Lex. Num.* ii. 806—809, vii. 1067 f., Suppl. ii. 17 f.) are regularly staged towers, not pyramids.

³ *Infra* p. 615 ff.

⁴ Babelon *Monn. gr. rom.* ii. 2. 869 f. pl. 137, 12—14, *Brit. Mus. Cat. Coins Lycaonia*, etc. pp. cxvii ff., 96 pl. 16, 1—4, *Anson Num. Gr.* v pl. 4, 120—123, *Head Hist. num.*² p. 717. The attribution of these anepigraphic coins is doubtful. Most numismatists now assign them to Mallos, but on inadequate grounds—see Imhoof-Blumer *Kleinas. Münzen* ii. 435 f., who proposes Aphrodisias and is followed by *Head loc. cit.*

⁵ On the evolution of these birds and grape-bunches from mere granulated patches see the careful note of Mr G. F. Hill in the *Brit. Mus. Cat. Coins Lycaonia*, etc. p. cxix.

⁶ Babelon *Monn. gr. rom.* ii. 2. 869 f. pl. 137, 14, *Brit. Mus. Cat. Coins Lycaonia*, etc. p. 96 pl. 16, 3, *Anson Num. Gr.* v pl. 4, 122, *Head Hist. num.*² p. 717. Cp. the plant-sign discussed by Sir Arthur Evans *Scripta Minoa* Oxford 1909 i. 215 f. ('Catalogue of Hieroglyphic Signs' no. 92).

The significance of the pyramid as a cult-object is uncertain. I am disposed to think that, like the Babylonian *zikkurat* or 'high'-place¹, it was the conventionalised form of a mountain², originally viewed as the dwelling-place of the deity. Sandas' prototype, the son-god of Boghaz-keui, stands on the back of a lioness, which itself is standing on a mountain-range³. Sandas' own effigy is carved on the rock-walls of Ivriz at the foot of Mount Tauros⁴. Such a god might be suitably represented in relief on a stone pyramid at Tarsos.

Fig. 475.

It is possible, though not certain, that Sandas was sometimes called Di-Sandas⁵, the prefix serving to emphasise his relation to Zeus. If so, a parallel might be sought among such compound names of deities as Dio-Pan⁶, Zeno-Poseidon⁷, etc.⁸

¹ M. Jastrow *Aspects of Religious Belief and Practice in Babylonia and Assyria*, New York and London 1911 p. 282 ff.

² A coin of Kaisareia in Kappadokia, struck in 113 A.D., shows a pyramid (*Hunter Cat. Coins* ii. 581 no. 3), which is perhaps equivalent to the type of Mount Argaios on other coins of the same town (*ib.* ii. 581 ff. pl. 62, *Brit. Mus. Cat. Coins Galatia*, etc. pp. xxxvii ff., 45 ff. pl. 8 ff.).

⁸ H. Euser in the *Strena Helbigiana Lipsiae* 1900 p. 315 ff., Gruppe *Gr. Myth. Rel.* p. 1093.

In conclusion it may be pointed out that Sandas, though essentially a god of fertility, was also in Hellenistic times connected with the sun¹. The eagle on his pyramid was presumably solar, for, as Monsieur R. Dussaud has proved, the king of birds had constantly this significance in Levantine art of the Graeco-Roman age². To cite but one example: a bronze brought from Nizib by Monsieur L. de Contenson (fig. 475)³ shows a splendid eagle on a discoid base, which bears the name *Hélios* and probably represents a sacred stone, perhaps that of Emesa⁴. Again, the eight-rayed star that appears on the coins besides the flower-holding Sandas⁵ may also fairly be reckoned as a solar symbol.

(θ) Zeus *Dolichaîos* and Iupiter *Dolichenus*.

Zeus *Dolichaîos*⁶ or *Dolochenós*⁷, better known as Iupiter *Dolichenus*⁸, furnishes another example of a Hittite god surviving into the Graeco-Roman age. He seems to have been originally akin to, or even one with, the Hittite father-god⁹, though—as we shall see—he bears some resemblance to the Hittite son-god also. In the central scene of the rock-carvings near Boghaz-keui (fig. 476)¹⁰

¹ Various scholars from F. Creuzer (*Symbolik und Mythologie*³ Leipzig and Darmstadt 1840 ii. 490, 634) to W. Wright (*The Empire of the Hittites*² London 1886 pp. 181, 186 n. 1) have held that Sandas was from the first a sun-god (see O. Höfer in Roscher *Lex. Myth.* iv. 330).

⁸ The most complete monograph on Iupiter *Dolichenus* is A. H. Kan *De Iovis Dolicheni cultu* Groningae 1901 pp. 1—109. See also Custos Seidl 'Über den Dolichenus-Cult' in the *Sitzungsber. d. kais. Akad. d. Wiss. in Wien* Phil.-hist. Classe 1854 xii. 4—90 pls. 1—6, *id. ib.* xiii. 233—260 pls. 1 f., suppl. pl. 1 f., E. Meyer in Roscher *Lex. Myth.* i. 1191 ff., Overbeck *Gr. Kunstmyth.* Zeus p. 271 f., S. Reinach in Daremberg—Saglio *Dict. Ant.* ii. 329—332, F. Cumont in Pauly—Wissowa *Real-Enc.* v. 1276—1281, and Gruppe *Gr. Myth. Rel.* p. 1583 n. 3.

⁹ Kan *op. cit.* p. 2 ff. 'Iupiter autem Dolichenus idem est ac deus summus Hittitarum.' Etc.

¹⁰ L. Messerschmidt *Corpus inscriptionum Hettiticarum* Berlin 1900 p. 21 ff. pl. 27, B, pl. 29, 9—11, J. Garstang *The Land of the Hittites* London 1910 p. 214 pl. 65 f. with bibliography *ib.* p. 396. The central scene appears to represent the union of the Hittite father-god at the head of the left-hand procession with the Hittite mother-god and her son at the head of the right-hand procession. The father-god, who stands on the bowed heads of two attendants, wears a high head-dress, a short tunic, and shoes with upturned toes. He carries a mace in his right hand and an emblem of uncertain significance

the father-deity has at his side a bull¹, which as his *alter ego* wears

Fig. 476.

the same high head-dress as he does. On a Hittite cylinder at Berlin² the same god wears a horned cap and holds his bull by

(supposed to be a combination of the split oval or sign of divinity with the trident-fork that symbolises lightning) in his left. The handle of a short sword is seen at his waist; and beside him appears the fore-part of a bull wearing a high head-dress like his own.

¹ J. Garstang *op. cit.* p. 215 and in *The Syrian Goddess* London 1913 p. 10 n. 30 takes this animal to be a goat. But??

Winckler in the *Mitteilungen der Vorderasiatischen Gesellschaft* 1896 iv. 18 f. (who reads the Babylonian inscription on this Hittite seal as 'Ach-li-ib-sar, servant of the god Tishub'), W. H. Ward in the *Am. Journ. Arch.* 1899 iii. 18 f. fig. 20, A. Jeremias in Roscher *Lex. Myth.* iv. 53 f. fig. 15. The king

a leash. On another cylinder in the collection of J. Pierpont Morgan (fig. 503)¹ he again holds the crouched bull by a leash, and on it stands a nude festoon-bearing goddess, the prototype of Europe². Finally, on another Hittite cylinder in the British Museum (fig. 477)³ the god is seen standing, like Ramman⁴, on the bull's back.

In classical times this long-lived deity drew his cult-epithet from Doliche, a little town⁵ in the Syrian district of Kommagene, on the road from Germanikeia to Zeugma. The rocky hill, on which his temple once stood, is still called Tell Dülük and is now crowned by the small chapel of a Mohammedan saint, the successor of *Dolichenus* himself⁶. Strangely enough the monuments illus-

Fig. 477.

trative of the ancient cult have, with a single exception, been found outside the limits of Asia. The said exception (fig. 478)⁷ is a limestone *stèle* discovered in or near Mar'ash, hardly a day's journey from Doliche, and probably dating from the first century B.C. It represents in an architectural frame-work the god standing upright on a small bull, which appears to be moving from left to right. He is a bearded figure, whose raised right hand held some attribute now broken off, in all probability a double axe, and whose left hand grasps a thunderbolt. He is clad in Persian costume,

accompanied by the divine attendant (*sukallu*) stands before the god, who carries a bundle of weapons. In the field is a star (or sun) and the Egyptian *crux ansata*.

wearing boots, hose, a short *chiton* with a broad belt, and a *kandys* or cloak, which is fastened round his neck and is blown back by the wind.

Syrian troops—and, to a less extent, Syrian merchants, slaves and freedmen—carried the cult of this obscure divinity far and wide through the Roman world¹. It is attested by a numerous series of inscriptions² dating from *c.* 130 to *c.* 265 A.D., that is, from the time of Hadrian to the time of Gallienus³. They are most in evidence during the reigns of Commodus (180—192 A.D.), Septimius

Fig. 478.

Severus (193—211 A.D.), Caracalla (211—217 A.D.), and Alexander Severus (222—235 A.D.)⁴. Commodus was an enthusiastic votary of such deities as Isis and Mithras⁵. Septimius Severus was much under the influence of Iulia Domna, his Syrian wife. Caracalla, their son, himself visited Syria in 215 A.D. Alexander Severus had spent his childhood in Syria as priest of the sun-god Elagabalos⁶, and was, owing to the designs of Artaxerxes king of Persia,

forced to watch the province with anxious interest¹. No wonder that under these emperors with their Syrian connexion the cult of Jupiter *Dolichenus* became popular.

At Rome he had two sanctuaries, one on the Esquiline, the other on the Aventine. A couple of marble tablets, found in 1734 on the Esquiline near the Tropaea Marii, record that in the reign of Commodus the chapel of Jupiter *Dolichenus* was, at the bidding of the god, enlarged by a certain D. Iunius Pacatus and his son Alexander, and further that on August 1, 191 A.D. soldiers belonging to the second cohort of the Guards presented the god with a tetrastyle dining-room (*tetrastylum*), a fountain (*nymphaeum*), a bowl with a small column, an altar with a small marble column, another small column, a little wheel (*orbiculus*) with a small column, and decorated the whole chapel². On the Aventine too there was a *Dolocenum*, which was still standing in the fourth century³, though no dedications to the god of so late a date are recorded. It adjoined the sites of S. Alessio and S. Sabina, as is clear from several inscriptions found there⁴. One of these throws some light on the nature of the cult. It runs as follows⁵:

*Good Luck*⁶.

In accordance with a behest of Iupiter Dolichenus, Best and Greatest, the Eternal, to him who is the Preserver of the Whole Sky, a Godhead Pre-eminent, a Provider Invincible⁷, L. Tettius Hermes, a Roman knight, a candidate⁸ and patron of this place, to secure the safety of himself, of Aurelia Restituta his wife,

¹ Dion Cass. 80. 4. 1 f.

² *Corp. inscr. Lat.* vi no. 414a, 414b = Kan *op. cit.* p. 65 f. no. 64a, 64b = Dessau *Inscr. Lat. sel.* no. 4315^a, 4315^b, H. Jordan—C. Huelsen *Topographie der Stadt Rom im Alterthum* Berlin 1907 i. 3. 356 f. Other inscriptions which may be referred to this cult-centre are listed by Kan *op. cit.* p. 66 ff. nos. 65—74.

³ The *Notitia regionum urbis xiv* (written between 334 and 357 A.D.) and the *Curiosum urbis regionum xiv* (written between 357 and 403? A.D.) both say: Regio xiii Aventinus continet...Dolocenum (H. Jordan *op. cit.* Berlin 1871 ii. 561 f.). Their archetype was written between 312 and 315 A.D. (*id. ib.* ii. 540).

⁴ Kan *op. cit.* p. 70 ff. nos. 75—81, H. Jordan—C. Huelsen *op. cit.* i. 3. 167 f. n. 43.

⁵ *Corp. inscr. Lat.* vi nos. 406, 30758 = Kan *op. cit.* p. 70 f. no. 75 = Wilmanns *Ex. inscr. Lat.* no. 92, 3 = Dessau *Inscr. Lat. sel.* no. 4316.

⁶ Cp. W. Larfeld *Handbuch der griechischen Epigraphik* Leipzig 1907 i. 436 ff. The Latin B·F (*bona fortuna*) corresponds with the Greek ἀγαθὴ τύχη as a preliminary formula for the sake of an auspicious beginning: see Dessau *Inscr. Lat. sel.* no. 467, 4316.

⁷ b. f. | ex praecepto I. o. m. D. aeterni, conservatori totius poli et numini praestantissimo (*sic*) exhibitori invicto, etc. On the epithet *aeterni* see F. Cumont in the *Rev. Philol.* N.S. 1902 xxvi. 8.

⁸ The term *kandidatus* here and in similar inscriptions (Pauly—Wissowa *Real-Enc.* iii. 1466 f.) implies, not merely the ritual use of white clothing (T. Mommsen on *Corp. inscr. Lat.* vi nos. 406—413 and in the *Ephem. epigr.* iv. 532), but also that a complete analogy existed between the election of public priests and that of magistrates (F. Cumont *loc. cit.* p. 10 f.).

of *Tettia Pannuchia* his daughter, of his household, of *Aurelius Lampadius* his well-loved brother, and the safety of the priests, the candidates, and the worshippers of this place, presented and dedicated the marble tablet with the *proscænium*¹ and columns.

Those, whom Iupiter *Dolichenus*, Best and Greatest, has chosen to serve him: *M. Aurelius Ocnopio Onesimus* (by the sign of *Acacius*) notary, and *Septimius Antonius* (by the sign of *Olympius*) father², candidates, patrons, well-loved brothers and most honoured colleagues; *Aurelius Magnesius*, *Aurelius Serapiacus*, *Antonius Marianus*, *M. Iulius Florentinus*, chief persons³ of this place; and *Aurelius Severus* the veteran, curator of the temple; and *Aurelius Antiochus*, priest; *Geminus Felix* and *Vibius Eutychianus*, litter-bearers of the god⁴; Co centianus

From this it appears that at Rome Iupiter *Dolichenus* was regarded as a sky-god ('Preserver of the Whole Sky'), whose principal priests—like the high officials of the Eleusinian mysteries⁵—exchanged their old names for new and sacred titles. The title 'Provider Invincible' suggests that he was, on the one hand, a god who fertilised the earth for the benefit of men, on the other hand, a being comparable with various semi-barbaric deities described by the Greeks as 'Zeus the Unconquered Sun⁶.' It was probably as a solar power that he ordered the erection of a statue of Apollo in his precinct⁷; for two inscriptions found at Rome link his name in close and yet closer connexion with that of the sun-god. One⁸ is a dedication—

To Iupiter *Dolichenus*, Best and Greatest, the Eternal, and to the Sun, the Worthy, the Pre-eminent—

the other⁹ a similar dedication—

To Iupiter *Dolichenus*, the Best, the Sun Pre-eminent, and to Iuno the Holy Mistress, the Castors and Apóllo, the Preservers.

¹ The word *proscænium* is used of a façade or porch in front of the temple (De Vit Lat. Lex. s.v. 'proscænium' § 3).

² An inscription on a statue of Apollo, now at Charlottenhof near Potsdam but doubtless derived from the precinct of Iupiter *Dolichenus* on the Aventine, mentions the same two persons by their ritual names only: ex præcepto | I. o. m. D. | per | Acacijum | notarij | et | Olympijum | patrem, | Antonii Mariani pater et filius | simulacrum Apollinis | statuerunt (*Corp. inscr. Lat.* vi nos. 408, 30759 = Kan *op. cit.* p. 72 no. 78 = Wilmanns *Ex. inscr. Lat.* no. 92, 1 = Dessau *Inscr. Lat. sel.* no. 4318). The title *pater* in both inscriptions means *pater sacerdotum*.

³ princeps(s) | huius loci. Cp. the *principes sacerdotum* of the Jews (De Vit Lat. Lex. s.v. 'princeps' § 22).

⁴ lecticari dei. This implies that the image of the god was sometimes paraded in a litter or *ferculum* (Smith—Wayte—Marindin *Dict. Ant.* ii. 824).

⁵ Frazer *Golden Bough*³: Taboo p. 382 f.

⁶ *Supra* pp. 190, 193.

⁷ *Supra* n. 2.

⁸ *Corp. inscr. Lat.* vi no. 412 = Kan *op. cit.* p. 69 no. 72 = Dessau *Inscr. Lat. sel.* no. 4319: I. o. m. a. D. et | Soli digno pres., | etc. This should be read *Iovi optimo maximo aeterno* (rather than *Augusto Dolicheno et Soli digno prestantissimo*, etc. Cp. Kan *op. cit.* p. 76 no. 88 I. o. m. D. | et Soli | sacrum.

⁹ *Corp. inscr. Lat.* vi no. 413 = Kan *op. cit.* p. 68 f. no. 71 = Dessau *Inscr. Lat. sel.*

The first inscription couples, the second to all appearance identifies, Iupiter *Dolichenus* with the Sun. If he, like other Syrian gods¹, was regarded by the Romans as a solar power², we can understand a curious third-century relief found at Rome near the *Scala santa* in 1885 (fig. 479)³. It was dedicated by M. Ulpius Chresimus, priest of Iupiter *Dolichenus*, not, as we should have expected, to *Dolichenus* himself, but 'to the Invincible Sun' etc.⁴; and it represents the old priest beside the young sun-god with the moon and two stars in the background.

Fig. 479.

One of the inscriptions cited above associates Iupiter *Dolichenus* with a partner-goddess called 'Iuno the Holy Mistress,' and another, probably from the same Esquiline precinct, entitles her 'Iuno the Holy⁵.' A pair of dedications from the Aventine speaks of 'Iupiter no. 4320 (dated 244 A.D.): I. o. S. p. D. | et Iunoni sanctae | herae, Castorib. | et Apollini conservato|ribus, etc. This should be read *Iovi optimo Soli* (rather than *sancto*) *praestantissimo Dolicheno* (rather than *digno*) *et Iunoni sanctae hērae* (rather than *Hērae*), etc. Probably Dessau no. 4320, like Dessau no. 4319, came from the *Dolocenum* on the Aventine; for the former mentions the same priest, C. Fabius Germanus, as the latter and likewise refers to the *candidatis huius loci* (cp. *supra* p. 608 n. 8).

¹ F. Cumont in the *Rev. Philol.* N.S. 1902 xxvi. 8 n. 5 remarks: 'Le syncrétisme impérial a considéré tous les Baals syriens comme des dieux solaires.'

² This is needlessly doubted by Kan *op. cit.* p. 4 f.

³ O. Marucchi in the *Bull. Comm. Arch. Comun. di Roma* 1886 p. 136 ff. pl. 5, A. von Domaszewski *Die Religion des römischen Heeres* Trier 1895 p. 64 no. 134 pl. 3, 5, Reinach *Rép. Reliefs* iii. 230 no. 1.

⁴ *Corp. inscr. Lat.* vi no. 31181 = Kan *op. cit.* p. 74 no. 82: *Soli invicto | pro salute imp[er]atorum | et genio n[um]eri | eq[ui]t[um] sing[ular]ium eorum M. Ulp[ius] | Chresimus sace[r]d[os] | Iovis Dolich[eni] | v. s. l. l. [m.]*. The inscription was found in the *Castra equitum singularium* (H. Kiepert et C. Huelsen *Formae urbis Romae antiquae*² Berolini 1912 p. 66).

⁵ *Corp. inscr. Lat.* vi no. 367 = Kan *op. cit.* p. 69 f. no. 74 (dated 218 A.D.) *Iunoni sanctae | iusso Iovis | Dolychen(i) | etc.*

Dolichenus, Best and Greatest,' and of 'Iuno the Queen' respectively¹. Two more, from Caerleon-on-Usk in Monmouthshire² and from Netherby in Cumberland³, again link this Iupiter with his Iuno.

The solar aspect of Iupiter *Dolichenus* and his association with a female partner are alike supported by the extant monuments of his cult. These are fairly numerous and for the most part represent the god as a Roman soldier in full armour. He commonly, however, wears a Phrygian cap instead of a helmet. His raised right hand holds a double axe, his left hand grasps a thunderbolt. By a device already familiar to us⁴ he is shown standing on the back of his sacred animal, the bull, which always appears to move from left to right.

This type occurs sometimes in the round⁵. For example, about the year 1648 A.D. a marble statuette, now preserved at Stuttgart, was found in the harbour of Marseille, where it had sunk in some Roman shipwreck. It portrays the god as a beardless warrior erect on the bull's back. His usual attributes are missing; but an eagle is perched on the ground beneath the bull, and a conical pillar rises from the ground behind the warrior's back. The base is inscribed *To the Dolichenian god* (fig. 480)⁶. Again, a marble statuette found at Szalan-kemen, probably the site of Acumincum a Roman station in Lower Pannonia, and purchased for the Vienna collection in 1851, repeats the theme with some variations. The god is here bearded and wears a Phrygian cap. His breast-plate is decorated with an eagle. Another eagle is perched between the

¹ *Corp. inscr. Lat.* vi no. 366=Kan *op. cit.* p. 73 f. no. 81=Dessau *Inscr. Lat. sel.* no. 4321: Iovi optimo | maximo Dolichen. | Paezon Aquiliaes | Bassillaes actor | cum Paezusa filia sua | d. d.

Corp. inscr. Lat. vi no. 365=Kan *op. cit.* p. 73 f. no. 81=Dessau *Inscr. Lat. sel.* no. 4321^a: Iunoni | reginae | Paezon | Aquiliaes | Bassillaes | actor cum Paezusa | filia sua d. d. Since Iuno *Regina* had a temple of her own on the Aventine (H. Jordan—C. Huelsen *Topographie der Stadt Rom im Alterthum* Berlin 1907 i. 3. 165 ff., H. Kiepert et C. Huelsen *Formae urbis Romae antiquae*² Berolini 1912 p. 18), it seems probable that the new-comer Iupiter *Dolichenus* here claimed to be the consort of this ancient goddess, whose temple had been dedicated by the dictator Camillus.

horns of the bull. A third is indicated in relief on a short column, which serves as a support to the bull's body. The right fore-foot of the beast is raised and rests upon a ram's head¹. The base, as before, bears an inscription *To Iupiter Dolichenus, Best and Greatest* (fig. 481)².

Fig. 480.

Fig. 481.

How such statuettes were erected and what was the general aspect of a *Dolichenus*-shrine, may be inferred from the finds made in 1891 by J. Dell at Petronell, the ancient Carnuntum in Upper Pannonia³. The shrine was a small but strongly-walled chamber approximately square in plan and entered through a doorway on the east (fig. 482)⁴. In the middle rose a rectangular pillar, built, like the walls, of rag-stone with inserted tiles. This pillar had

identified with Lussonium in Lower Pannonia. The reliefs on these plates appear to have been partially gilded and silvered. The first plate (fig. 487)¹ represents a bearded Iupiter *Dolichenus* in his accustomed attitude. Close to his head is a star (possibly the planet Iupiter). A Victory with wreath and palm approaches him. Before him burns a small altar. His bull stands on a base inscribed *To Iupiter Dulchenus*² and flanked by busts of Hercules with his club and Minerva with her helmet and lance. Above the main design are two panels of diminishing size: the lower one contains busts of the Sun and Moon; the upper one, a lily-plant. The

Fig. 487.

Fig. 488.

second plate (fig. 488)³ is divided into five registers. Highest up is the same lily. Then comes an eagle with spread wings. Next

¹ Kan *op. cit.* p. 43 f. no. 28, *a*. The best publication of this plate is that of Desjardins and F. Rómer *A. N. Muzeum római feliratos emlékei. Monuments épigr. du Mus. to it, in a separate panel as before, are busts of the Sun with a whip (?) and the Moon with a torch. The compartment below shows in the centre an altar burning, above which a large but indistinct object (possibly a bunch of grapes with two fluttering *lemnisci*) appears in the air. To the left of the altar stands Iupiter *Dolichenus* on his bull: his right hand is raised and holds an uncertain attribute (? double-axe badly rendered); his left grasps a thunderbolt. To the right of the altar stands a goddess, presumably Iuno, on an *ibex*. The lowest and largest division represents Iupiter uplifting his right hand and holding a thunderbolt in his left over a lighted altar. He stands in a small distyle temple, to either side of which is a legionary standard surmounted by its eagle. These standards in turn are flanked by two deities, probably intended for forms of Iupiter *Heliopolitanus*¹. Each of them has corn-ears or perhaps a spiky thunderbolt in his left hand: one uplifts his right hand; the other holds in it a flower-shaped (? solar) disk. Both are standing behind the foreparts of two bulls conjoined by means of similar flower-shaped disks. The two bronze plates are bounded along their common sides by a leaf-pattern. It has been stated that their apex was formerly adorned with a small winged Victory standing on a globe and holding a palm-branch in her left hand. But the statement appears to be a mere conjecture: in any case the little figure has vanished.

In the Archaeological Institute at Vienna is a pair of similar, but fragmentary, plates, found at Traizmauer, the ancient Trigrisamum in Noricum. The front (fig. 489)², which still shows traces of silvering, presents in high relief a bearded Iupiter *Dolichenus* with axe and bolt. Above him is an eagle with folded wings. At his right side, on a smaller scale, is a god, like himself bearded and wearing a Phrygian cap, who holds a spear in his right hand, a quartered globe or disk in his left. This god stood originally behind the foreparts of two bulls, the horn of one being visible under his arm³. Other fragments belonging to the same plate show parts of the bulls behind which a corresponding god stood on the left of Iupiter, and in a lower register beneath this figure a goddess more

Loeschke 'Bemerkungen zu den Weihgeschenken an Juppiter Dolichenus' in the *Bonner Jahrbücher* 1901 cvii. 69, R. Münsterberg 'Bronzereliefs vom Limes' in the *Jahresh. d. oest. arch. Inst.* 1908 xi. 229 ff. figs. 99, 100, 101.

³ R. Münsterberg *loc. cit.* p. 230 f. fig. 102 well compares a small bronze statuette of unknown origin now at Vienna, which shows a bearded god wearing a *kálathos* and uplifting a double-axe and a three-petalled flower between two bulls emergent from either side of him.

like Venus than Juno. Lowest of all came a handled label, probably bearing an inscription. The back-plate (fig. 490)¹, which, when found, was fitted into a groove formed by bending round the

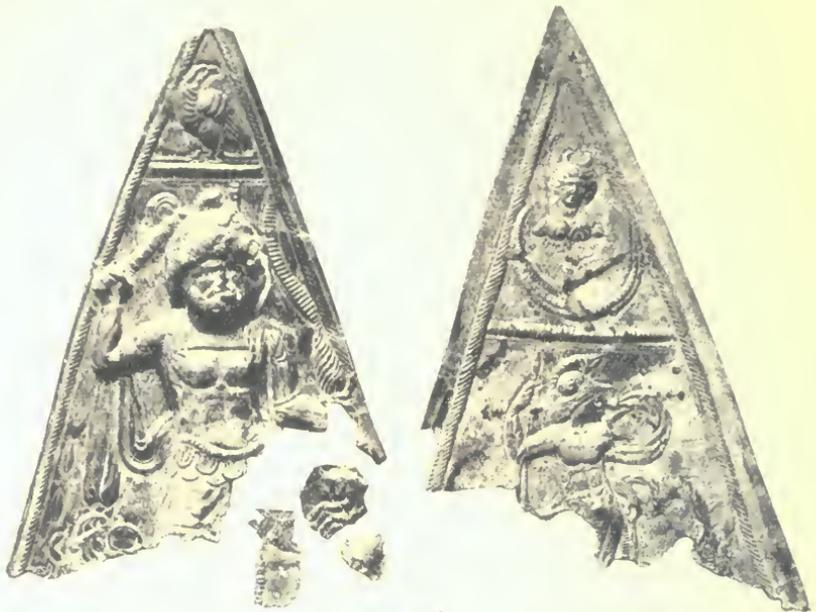

Fig. 490.

Fig. 489.

edges of the front-plate², exhibits a crescent, containing a horned bust of the Moon. Below it stands Mars with helmet, spear, and

¹ Kan *op. cit.* p. 55 ff. no. 58, *b.* A. von Domaszewski *loc. cit.* p. 60 pl. 4, 2^b, R. Münsterberg *loc. cit.* p. 231 f. pl. 7 (the best publication).

² G. Loeschke *loc. cit.* p. 69, R. Münsterberg *loc. cit.* p. 229.

shield, and beside him his northern attribute—a goose with outstretched neck.

A fragment of another bronze plate, similar in character to the foregoing, was found in 1895 on the Roman frontier at Aalen in Württemberg (perhaps to be identified with Aquileia in Upper Germania) and is now at Stuttgart¹. It was originally triangular in shape, gilded, and adorned with analogous designs. In the middle is a tree with leaves and fruit. To the left of it stands *Dolichenus* on his bull; to the right, his consort on her cow. Below him was a helmeted god, probably Mars; below her, Minerva, beside whom appears part of the god flanked by two bulls.

At Hedderheim in Hesse-Nassau two triangular plates of cast bronze were found in 1841 and 1826, respectively, during the excavation of a Roman settlement on the Heidenfeld: they are preserved in the Museum for Nassau Antiquities at Wiesbaden². One of these plates is fortunately complete. Its front (pl. xxxiv)³ contains four rows of figures. Uppermost is a rayed bust of the Sun. Below that, a Victory with palm-branch and wreath hovers over the head of Iupiter *Dolichenus*. He is represented as a bearded god with a Phrygian cap and a Roman breast-plate. At his side hangs his sword in its scabbard. His right hand brandishes a double-axe; his left grasps a thunderbolt consisting of six spirally-twisted tines, each of which is tipped with an arrow-head. The bull that supports the god has a rosette on its forehead between the eyes⁴. The lowest register is filled with a motley assemblage of

¹ Kan *op. cit.* p. 58 f. no. 63, F. Haug and G. Sixt *Die römischen Inschriften und Bildwerke Württembergs* Stuttgart 1900 i. 43 ff. no. 57 fig. 23.

² A. von Cohausen *Führer durch das Altertumsmuseum zu Wiesbaden* p. 236.

³ Kan *op. cit.* p. 103 f. no. 145, b, Custos Seidl *loc. cit.* xii. 39 pl. 3, 3, Overbeck *Gr. Kunstmyth.* Zeus p. 271 f., Müller—Wieseler—Wernicke *op. cit.* ii. 1. 54 f. pl. 5, 6. Seidl's illustration being inexact (Wernicke *loc. cit.* p. 54 n.), I have reproduced the excellent plate given by G. Loeschcke in the *Bonner Jahrbücher* 1901 cvii pl. 8. The bronze triangle is 0.47^m high and 0.195^m broad at the base. It was found in the *débris* of an ancient building along with ashes, charcoal, broken pottery and bricks.

⁴ A slate palette from a pre-dynastic grave at *El Gerzeh* shows a cow's head with five-pointed stars on the tips of its horns and ears and a six-pointed star above its forehead between the horns (W. M. Flinders Petrie—G. A. Wainwright—E. Mackay *The Labyrinth Gerzeh and Mazghuneh* London 1912 p. 22 pl. 6, 7). On a relief from the neighbourhood of Tyre the bulls of the sun-god and the moon-goddess enclose with their tails a rosette and a disk with curved rays respectively (R. Dussaud in the *Rev. Arch.* 1904 ii. 233 fig. 21 = *id.* *Notes de mythologie syrienne* Paris 1905 p. 89 fig. 21, E. Pottier in the *Bull. Corr. Hell.* 1907 xxxi. 241 n. 7). A copper of Lappa in Crete shows a bull's head facing with a rosette on the forehead (J. N. Svoronos *Numismatique de la Crète ancienne* Macon 1890 i. 212 pl. 19, 36 and in the *Bull. Corr.* Hell. 1894 xviii. 118). The magnificent silver cow's head found in the fourth shaft-grave at Mykenai has its horns made of gold and a large rosette between them plated with gold (Perrot—Chipiez *Hist. de l'Art* vi. 820 ff. fig. 398). A 'Minoan' *kratér* from Arpera in Kypros belonging

eastern and southern deities. In the midst is Isis on a hind (?). She bears a sceptre in one hand, a *sistrum* in the other; and on her head is an Isiac head-dress, composed apparently of a solar disk between two feathers¹. To right and left of Isis is a couple of half-figures rising from two heaps of stones. They, like Jupiter *Dolichenus*, are armed with breast-plates; but they seem to have helmets, not Phrygian caps, on their heads. Their upraised hands grasp four flowers with a central spike, probably lilies. And on their helmets rest busts of the Moon and the Sun: the former wears a crescent; the latter, a rayed *nimbus*. The upper portion of the plate was originally intended to have been shaped like an arrow-head, as may be seen from the incised lines still traceable on it. The resemblance to a weapon² is strengthened by a raised rib, triangular in section, which bisects the back of the plate³. With this monument also, as with that from Lussonium, a small statuette of Victory is said to have been recovered⁴. But that such a figure once stood on the apex is again only an improbable conjecture.

The other plate found at Heddernheim is fragmentary. Its front (fig. 491)⁵ has preserved the reliefs from the top two registers of a like monument. The upper division contains a bust of Sarapis; the lower, busts of the Sun and the Moon. The Sun has the horns of a bull; the Moon, a rayed *nimbus*: both bear whips. Over their heads are two stars: beneath them is a third, which may have stood in relation to a figure of Jupiter *Dolichenus*, now lost⁶. The back of this plate too is decorated with a raised rib⁷.

Prof. G. Loeschke has put forward the reasonable conjecture that these triangular plates of bronze were intended to represent, by their very shape, the thunderbolt of Jupiter *Dolichenus*⁸. It is

to the Louvre, shows a bull, whose flank is adorned with a large rayed rosette: this, however, may be merely decorative (*Bull. Corr. Hell.* 1907 xxxi. 229 fig. 5, 241, Morin-Jean *Le dessin des Animaux en Grèce* Paris 1911 p. 23 fig. 12). Bronze coins of Neapolis in Campania have for their reverse type the forepart of a man-headed bull, on the shoulder of which is a star of four or eight rays (Garrucci *Mon. It. ant.* p. 86 pl. 86, 1, cp. *ib.* p. 72 f. pl. 82, 14, *Brit. Mus. Cat. Coins Italy* p. 108 f., *Hunter Cat. Coins* i. 39, J. N. Svoronos in *Bull. Corr. Hell.* 1894 xviii. 113 figs. 33—35).

Jupiter *Dolichenus* on a bronze plate from Heddernheim.

See page 619 f.

indeed possible that they were sometimes regarded as his weapon: the half-worked barbs of the first Heddernheim plate, the raised rib on the back of it and of its fellow, the spear-like aspect of a third plate from the same locality¹, all support that view. Nevertheless, since Iupiter *Dolichenus* never brandishes a weapon of this form but always² a double-axe and a thunderbolt of normal shape, it is safer to conclude that the bronze triangular plates were originally substitutes for bronze pyramids or stone pyramids

Fig. 491.

sheathed with bronze. And we have already surmised that the pyramid as a ritual object points to the cult of a mountain-deity³. The god of thunder and lightning naturally dwells on a mountain-top.

The lily-plants of the Kömlöd dedication⁴ and the lily-flowers

¹ *Infra* p. 627 f. fig. 493.

² Occasionally the god is so far Romanised that he stands, like an ordinary Iupiter, in his temple with a thunderbolt in one hand, a sceptre or lance in the other (*infra* p. 627 f.).

³ *Supra* p. 603.

⁴ *Supra* p. 616.

of the Heddernheim plate¹ raise a further question. What have lilies to do with a god who stands on a bull grasping a double-axe and a thunderbolt? To modern ears this sounds a strange combination of frailty with force. We note, however, that the lilies—‘mountain-ranging lilies²,’ as Meleagros termed them—are somehow related to the mountain³. On the Kömlöd dedication they spring from the apex of a plate, which, if we are on the right track, originally symbolised a mountain. On the Heddernheim plate they were held up by deities emergent from heaps of stones. On other plates, to be considered later⁴, the whole pyramid is surrounded and topped by a growth of lilies. We are reminded of the Egyptian vignette in which the divine cow looks out from the mountain-side and thereby causes vegetation to flourish⁵. Now the storm-god on his bull was essentially a fertilising power. It may therefore be supposed that the lilies appear on his mountain as a sign and symbol of fertility⁶.

This belief, probably indigenous in the Mediterranean area, underlay the decorative use of the flower from ‘Minoan’⁷ to mediaeval times⁸. Lilies were wrought by Pheidias on the golden robe of his great chryselephantine Zeus⁹. Another statue of Zeus at Olympia, turned towards the rising sun, held an eagle in one hand, a thunderbolt in the other, and on its head wore a wreath of lilies: it was an offering of the Metapontines and the work of Aristonous, an Aeginetan sculptor¹⁰. Yet another Zeus at Olympia, made by Askaros the Theban, a pupil of Kanachos (?), and dedicated by the Thessalians, represented the god bearing a thunderbolt in his right hand and ‘crowned as it were with flowers’¹¹. On an Etruscan mirror figuring the birth of Dionysos

And Palmer's *cj. κρίνα* is accepted by Schubart and Walz (1838—1839, 1847), L. Dindorf (1845), J. G. Frazer (1898), and H. Hitzig—H. Blümner (1901).

¹¹ *Paus.* 5. 24. 1 f. ἔστεφανωμένον δὲ οἷα δὴ ἀνθεσι, κ. τ. λ.

The Duc de Laines in the *Nouv. Ann.* 1836 i. 391 compared the Talleyrand Zeus of

Zeus (*Timia*) has an eagle-sceptre in his right hand, a winged thunderbolt in his left, and a wreath of lilies on his head¹. The storm-god as fertilising agent was appropriately decked with the most fertile of flowers.

In Hellenistic times the same conception made its way into mythology both poetic and popular. Nikandros tells how Aphrodite, jealous of the lily's spotless purity, placed in its centre the *phallós* of an ass². And a lily-flower growing in north Africa was known to all and sundry as the 'seed of *Ammon*'³.

The lily as a symbol of fertility probably belonged to an earth-goddess before it was associated with a sky-god. On a gold ring found by Messrs Drosinos and Stamatakis in a complex of buildings to the south of the grave-precinct at Mykenai a goddess seated on a pile of stones beneath a tree wears a lily in her hair and her attendant handmaidens are similarly adorned⁴. Coins of Biannos in Crete have as reverse type a lily, as obverse a female head⁵—presumably that of Bianna, who appears to have been an earth-power of some sort⁶. Hera too, who by many enquirers from

the Louvre (*Arch. Zeit.* 1875 xxxii pl. 9), whose diadem is composed of palmettes alternating with half-open lotus-buds. In view of the fact that the lily was the Greek equivalent of the lotus his comparison was just.

⁶ Steph. Byz. *s.v.* Βιέννος· πόλις Κρήτης. οἱ μὲν ἀπὸ Βιέννου τοῦ τῶν Κουρήτων ἐνός· οἱ δὲ ἀπὸ τῆς περὶ τὸν Ἀρη γενομένης βλας, ἣν ἐνταυθα φασὶν ἀπὸ τ' Ἰουου καὶ Ἐφιάλτου τῶν παίδων Πυσειδῶνος, καὶ μέχρι καὶ νῦν τὰ καλούμενα ἑκατομόφνια θύεται τῷ Ἄρει. ὁ πολίτης Βιέννιος. οἱ δὲ τιμὰς ἀποπέμπει τῷ Τεμλίῳ Διὶ καὶ Βιεννίῳ. ἔστι καὶ ἑτέρα πόλις ἐν Γαλλίᾳ. αὐχμοῦ γάρ ποτε σύμπασαν Κρήτην κατασχόντος, εἰς ἑτέρους τόπους ἀπικίζοντο, οἰκῆσαι δὲ τινας Ἰθρόοντα τῆς Ἰταλίας, οὕτω πεπολισμένον. χρῆσμοῦ δ' αὐτοῖς δοθέντος, ὅπου ἐλωδέσσαντο τόπον θεάσονται, κατοικήσαι· ἐλθόντες οὖν ἐπὶ τὸν Ῥόδανον ποταμὸν τῆς Γαλλίας, ἐλώδη ὄντα, οἰκῆσαι, καὶ τὴν πόλιν οὕτως ὀνομάσαι, ἐπειδὴ μὴ τῶν σὺν αὐτοῖς παρθένων Βιάννα καλουμένη, χορεύουσα, ὑπὸ τινος χάσματος ἐλήφθη.

Another Cretan virgin that suddenly vanished was Britomartis, who escaped the pursuit of Minos by disappearing in a grove at Aigina and was thenceforth worshipped as the goddess Aphaia (*Ant. Lib.* 40). The story of Persephone, carried off by Plouton while she watched the Nymphs dancing and plucked the lilies of Enna (*Colum. de re rust.*

Empedokles downwards has been regarded as an earth-goddess¹, was said to delight in the lily². Her head on silver coins of Elis (c. 421—365 B.C.) wears a *stepháne*, which is decorated at first with lilies³, later with a variety of floral patterns⁴. A story told of this goddess in the *Geoponika*⁵ is here in point. Zeus, desiring to make Herakles, his son by Alkmene, immortal, put the babe to the breast of Hera as she lay asleep. When the babe was sated, the milk of the goddess still flowing caused the Milky Way to cross the sky and, dropping to earth, made the milk-white lily to spring up⁶.

The belief that the lily was somehow connected with Zeus lingered on into post-classical times. Byzantine writers regarded

10. 269 ff.; but see Gruppe *Gr. Myth. Rel.* p. 1185 n. 3 for variants), suggests that both Bianna and Aphaia were borne off to become queen of an underground king.

¹ For a critical review of the evidence see e.g. Farnell *Cults of Gk. States* i. 181 ff., Gruppe *op. cit.* p. 1125 n. 3, S. Eitrem in Pauly—Wissowa *Real-Enc.* viii. 398 ff.

² Clem. Al. *paed.* 2. 8. 72. 4 p. 201, 24 Stählin κλίωθ δὲ ἠδρασθαι τῆν Ἡραν φασίν.

³ *Brit. Mus. Cat. Coins Peloponnesus* p. 64 f. pl. 12, 11, 12, 14, 16, *Hunter Cat. Coins* ii. 135 no. 4, P. Gardner *Types of Gk. Coins* p. 137 f. pl. 8, 15, *Bunbury Sale Catalogue* 1896 i. 133 no. 1090 pl. 7, *O'Hagan Sale Catalogue* 1908 p. 48 no. 459 pl. 8, *Benson Sale Catalogue* 1909 p. 79 no. 569 pl. 18, *Head Hist. num.*² p. 422 fig. 231, G. F. Hill *Historical Greek Coins* London 1906 p. 52 ff. pl. 3, 28.

⁴ *Brit. Mus. Cat. Coins Peloponnesus* pp. 65 f., 68 ff. pl. 12, 13, 15, pl. 13, 13, pl. 14, 1—3, 13, P. Gardner *Types of Gk. Coins* p. 159 pl. 8, 39, *Head Hist. num.*² p. 423.

The coins of Elis mentioned in notes ³ and ⁴ must be studied in connexion with the simultaneous issues of Argos, on which the head of Hera was probably inspired by the famous master-piece of Polykleitos (see Overbeck *Gr. Kunstmyth.* Hera pp. 41 ff., 101 ff. Münztaf. 2, 6 ff. and 14 ff., *id. Gr. Plastik*⁴ i. 509 ff., P. Gardner in the *Num. Chron.* 1879 xix. 238 ff., *id. Types of Gk. Coins* pp. 137 f., 159 pl. 8, 13—15, 39 f., Farnell *Cults of Gk. States* i. 213 ff., 232 ff. coin-pl. A, 17 and 18, A. Lambropoulos in the *Zeitschr. f. Num.* 1895 xix. 224 ff., Sir C. Waldstein in the *Journ. Hell. Stud.* 1901 xxi. 30—44 with figs. 1—3 and pls. 2 f.). In the *Class. Rev.* 1903 xvii. 409 f. I conjectured that the plant *ἀστρέπλων*, which grew on the banks of the river Asterion near the Argive Heraion and was offered to Hera, its leaves being twined into wreaths for her (Paus. 2. 17. 2), was a species of lily. This, however, is very doubtful. A. Frickenhaus in *Tiryns* i. 121—125 argues well in support of the view that the *ἀστρέπλων* was, like the *ἀστέριον* of Kratenas, 'eine violette Nelke': he might have strengthened his case yet further, had he noticed that hemiobols of Argos struck before 421 B.C. exhibit as their obverse type a star-shaped flower (*Brit. Mus. Cat. Coins Peloponnesus* p. 138 pl. 27, 8, Anson *Num. Gr.* ii. 71 no. 766 pl. 14, iii. 134 no. 1405).

⁵ *Geopon.* 11. 19. Cp. pseudo-Eratosth. *catast.* 44, Lyk. *Al.* 1327 f. with Tzet. *ad loc.*, Paus. 9. 25. 2, Diod. 4. 9. See also the painting by Jacopo Robusti il Tintoretto (1518—1594 A.D.) now in the National Gallery (no. 1313: S. Reinach *Rép. Peintures* ii. 730, 2), and that by Peter Paul Rubens designed in 1637 for the Torre de la Parada at Madrid (E. Dillon *Rubens* London 1909 pp. 178, 198 pl. 432) and now in the Prado. On the folk-lore of the Milky Way see further *Mélysine* 1884—85 ii. 151 ff. 'La Voie Lactée,' P. Sébillot *Le Folk-lore de France* Paris 1904 i. 34 f.

⁶ The Corinthians called the lily ἀμβροσία (Nik. *linguae ap.* Athen. 681 B, cp. Nik. *georg. frag.* 2, 28 *ap.* Athen. 683 D); and this flower grew from the head of a statue of Alexander the Great in Kos (Nik. *ap.* Athen. 684 E)—doubtless an allusion to his apotheosis (Farnell *Cults of Gk. States* i. 128 n. ^b, Gruppe *Gr. Myth. Rel.* p. 1123 n. 3, *Class. Rev.* 1906 xx. 377).

it as the flower of the planet Zeus. For example, Konstantinos Manasses, who in the middle of the twelfth century composed a universal history in 'political' verse, thus describes the creation of the stars :

Then first the sky beheld the mighty stars,
 Fair spheres that vied one with another and decked
 Its surface, as do flowers in the fields¹.
 Kronos was somewhat dark and leaden of hue;
 Zeus shone like silver²; Ares glowed like fire;
 Helios beamed bright as thrice-refined gold;
 The globe of Aphrodite had the glint
 Of tin; like bronze the red-rayed Hermes flared;
 Clear as a crystal was Selene's light.
 Thus many-coloured was the sky's robe seen.
 Kronos was blue as is the hyacinth;
 Zeus like a lily shone; a violet, Ares;
 The golden Helios was a crimson rose³;
 The morning star, a white-flowered pimpernel;
 Hermes shot rays, a blossom steeped in red;
 Selene, a narcissus with fair petals.
 Such was the flower-bed that adorned the sky;
 Yea, such a pleasance, diverse, gracious, gleaming,
 Was planted there upon the face of heaven,
 And made a star-set garden of the sky
 With God for gardener, and for plants and herbs
 And flowers pied the flashing of the stars⁴.

Another Byzantine scholar drew up in prose a list of the seven planets, to each of which he assigned its appropriate metal and plant: a later hand added a series of corresponding animals⁵.

¹ I do not remember to have met with this conceit in classical literature. It occurs, of course, in modern poetry, e.g. H. W. Longfellow *Evangeline* l. 3 'Silently one by one, in the infinite meadows of heaven, | Blossomed the lovely stars, the forget-me-nots of the angels.'

² For Zeus 'Αργύρου see *supra* p. 25 n. 2.

³ J. Millingen *Ancient Unedited Monuments* Series ii London 1826 p. 36 pl. 19, 2 figured a terra-cotta disk, which represents the head of Helios emerging from the petals of a rose—a type probably based on coins of Rhodes (e.g. *Brit. Mus. Cat. Coins* Caria, etc. p. 250 pl. 39, 16 the sun rising out of a rose, *Hunter Cat. Coins* ii. 441 no. 38).

⁴ Konst. Manass. *comp. chron.* 113—134 Bekker.

⁵ Piccolomini in the *Rivista di Filologia* ii. 159 published the following among other Planudean excerpts: τῶν ἐπτά πλανήτων τὰ χρώματα τῶν τε μετάλλων καὶ τινῶν ἀνθέων
 ἀναλογουσι τοῖς χρώμασι· Κρόνος μὲν μολύβδῳ καὶ ὑακίνθῳ, Ζεὺς δὲ ἀργύρῳ καὶ κρίνῳ,
 Λύκος ἄνωγος
 Ἄρης σιδήρῳ καὶ ἴψ, Ἡλῖος χρυσίῳ καὶ πορφυρῷ ῥόδῳ, Ἀφροδίτῃ κασσιτέρῳ καὶ ἀναγαλλίδι,
 δράκων ἠ ἀνεμώνῃ βοῦς
 Ἑρμῆς χάλκῳ καὶ ἐρυθροδάνῳ, Σελήνῃ δὲ ὑάλῳ καὶ ναρκίσσῳ. The interlinear glosses are by the hand of a corrector. J. Bernays in the *Arch. Zeit.* 1875 xxxii. 99 cites Lobeck *Aglaophamus* p. 936 and Brandis in *Hermes* 1867 ii. 266, where passages are collected bearing on the attribution of different metals to different planets. Lists varied. Thus

Thus the completed list embraces the mineral, vegetable, and animal kingdoms:—

<i>Kronos</i>	LeadHyacinthAss
<i>Zeus</i>	SilverLilyEagle
<i>Ares</i>	IronVioletWolf
<i>Helios</i>	GoldRoseLion
<i>Aphrodite</i>	TinPimpernelDove
<i>Hermes</i>	Bronze	...Madder, or Anemone	...Snake
<i>Selene</i>	Crystal	...NarcissusCow

These Byzantine attributions were not mere fancy-flights of late and irresponsible authors, but a systematised selection from the customs and cults of the Roman Empire. In particular, there is reason to think that silver as well as the lily was associated with Jupiter *Dolichenus*. The bronze statuette of the god at Carnuntum was silvered, the points of its thunderbolt being wound round with silver-foil (*supra* fig. 486). The triangular bronze plates from Kömlöd were partially gilded and silvered¹; those from Traizmauer were silvered²; that from Aalen was gilded³. Five silver plates dedicated to Iupiter *Dolichenus*, and probably all derived from his temple at Heddernheim, have been published by

Cramer *anecd. Paris.* iii. 113, 4 ff. (cited by Gruppe *Gr. Myth. Rel.* p. 1491 n. 4) *τούτων τῶν ἑπτὰ ἀστέρων ἐν ἑκάστῳ ἐκεῖνο καὶ ὕλαι. τῷ Κρόνῳ ὁ χαλκός, τῷ Διὶ ὁ χρυσοῦς, τῷ Ἀρεῖ ὁ σίδηρος, τῷ Ἥλιῳ ὁ ἤλεκτρος, τῇ Ἀφροδίτῃ κασσίτερος, τῷ Ἑρμῇ ὁ μόλιβδος, τῇ Σελήνῃ ὁ ἄργυρος* (cp. Pind. *frag.* 222 Schroeder Διὸς παῖς ὁ χρυσοῦς κ.τ.λ.). *ὁμοίως καὶ οἱ οἰωνοί. ἡ κορώνη τῷ Κρόνῳ, ὁ ἀέτωδ τῷ Διὶ ὡς βασιλεῖ, τὸ τῶν ζῶων βασιλικώτερον, ὁ κολοῖδ τῷ Ἀρει διὰ τὸ παραχῶδες, τῷ Ἥλιῳ ἦγον τῷ Ἀπόλλωνι ὁ κίρκος, ὃ ἐστὶ γένος ἱεράκων ταχύτατον, τῷ Ἑρμῇ ὁ κύκνος, ὡς μουσικός, τῇ Ἀφροδίτῃ ἡ περιστερά, ὡς ποικτικῆ, but schol. Pind. *Isthm.* 4 (5). 2 ἑκάστῳ δὲ τῶν ἀστέρων ὕλη τις ἀνάγεται· καὶ Ἥλιῳ μὲν ὁ χρυσοῦς, Σελήνῃ δὲ ὁ ἄργυρος, Ἀρεῖ σίδηρος, Κρόνῳ μόλιβδος, Διὶ ἤλεκτρος, Ἑρμῇ κασσίτερος, Ἀφροδίτῃ χαλκός* (cp. Prokl. *in Plat. Tim.* i. 43, 5 ff. Diehl with schol. *ad loc.* i. 460, 22 ff. Diehl, Olympiod. *in Aristot. meteor.* 3 p. 59 f.) and Orig. *c. Cels.* 6. 22 ἡ πρώτη τῶν πλῶν μόλιβδος, ἡ δευτέρα κασσίτερον, ἡ τρίτη χαλκοῦ, ἡ τετάρτη σιδήρου, ἡ πέμπτη κεραστοῦ νομισματος, ἡ ἕκτη ἀργύρου, χρυσοῦ δ' ἡ ἑβδόμη. τὴν πρώτην τίθενται Κρόνον, τῷ μόλιβδῳ τεκμηριούμενοι τὴν βραδύτητα τοῦ ἀστέρος· τὴν δευτέραν Ἀφροδίτης, παραβάλλοντες αὐτῇ τὸ φαῖδρον τε καὶ μαλακὸν τοῦ κασσίτερου· τὴν τρίτην τοῦ Διὸς τὴν χαλκοβάτην καὶ στερρὰν· τὴν τετάρτην Ἑρμοῦ, πλήμονα γὰρ ἔργων ἀπάντων καὶ χρηματιστὴν καὶ πολύκμητον εἶναι τὸν τε σίδηρον καὶ τὸν Ἑρμῆν· τὴν πέμπτην Ἀρεὸς τὴν ἐκ τοῦ κράματος ἀνώμαλόν τε καὶ ποικίλην· ἕκτην Σελήνης τὴν ἀργυρὰν· ἑβδόμην Ἥλιον τὴν χρυσοῦν, μιμούμενοι τὰς χροῶς αὐτῶν (cp. Eustath. *in Il.* p. 25, 2 ff., p. 1154, 48 ff.). A. Ludwich as an appendix to his edition (Lipsiae 1877) of Maximus and Ammon prints certain *anecdota astrologica*, of which section 6 τί σημαίνει ἕκαστον τῶν ζῴων καὶ τῶν ἀστέρων καὶ τῶν πλῶν ἀεσπόζουσαν includes the vegetables, minerals, and animals appropriate to the seven planets. Of Zeus we read: p. 120, 19 f. Διὸς σῖτος, κριθή, ὄρυζα, ὄλυρα καὶ τὰ σπόφοντα τῆς ὀπίρας, p. 121, 8 f. Διὸς κασσίτερος, βήρυλλος καὶ πᾶς λίθος λευκός, σανδαράχη, θεῖον καὶ τὰ τοιαῦτα, p. 122, 1 Ζεὺς ἀνθρώπους καὶ λέοντας καὶ τὰ καθαρά ὄρνεα.

K. Zangemeister and E. Gerhard. Of these, three are in the Gold Room at the British Museum. One (fig. 492)¹ represents the god as standing in a distyle building, the gable of which contains a wreath. He holds a thunderbolt in his right hand, a sceptre or lance in his left. On the ground at his feet is an eagle. Beneath the building is the votive inscription²; above it, a big lily, each petal of which terminates in a similar but smaller lily, the central one supporting at its apex a floral crescent. All three petals are marked with a medial pattern closely resembling that on certain

Fig. 492.

plates already described³. The same design comes out yet more clearly on the second specimen (fig. 493)⁴, which above and below its inscription⁵ has a spear-head enclosed in a frame of lily-work.

¹ K. Zangemeister in the *Bonner Jahrbücher* 1901 cvii. 61 f. pl. 6, 1.

³ *Supra* p. 620 f.

⁴ K. Zangemeister *loc. cit.* 1901 cvii. 63 pl. 6, 2 and 3.

⁵ I. o. m. Dollicheno | Domitius | Germanus | v(otum) s(olvit) l(ibens) l(aetus) m(erito).

The third silver plate (fig. 494)¹ shows a distyle temple, in the gable of which are a crescent moon and two stars. The architrave is arched in the centre so as to leave room for the inscription². Below is an altar. To the left of it stands Iupiter *Dolichenus* on his bull with double-axe, thunderbolt, and coat of mail. It is noticeable that the arrow-shaped points of the thunderbolt have

Fig. 493.

raised central ribs. To the right of the altar stands a female(?) figure, probably on an animal now broken away, holding a *patera* in one hand, a sceptre in the other. A Victory, hovering in the air, presents a wreath to Iupiter. The whole design was enclosed in lily-work, which is much crumpled and mutilated. The remaining two silver plates are in the Berlin Museum. One of them so nearly resembles the first of the London plates that a separate description of it is unnecessary³. The other⁴ represents the god standing in a distyle temple, the capitals and *akrotéria* of which are of the lily-pattern. He holds a six-pronged thunderbolt in his right hand, a sceptre or lance in his left, and wears a simple cloke hanging from his left shoulder. At his feet is an eagle perched on a globe and supporting a wreath in his beak. The field of the design is embellished with four

medallions depicting Cupid with a round shield and a lance: of these medallions the upper two are connected with the temple.

¹ K. Zangemeister *op. cit.* cvii. 63 pl. 7, 1. Fig. 494 is from a photograph taken for me by Mr W. H. Hayles.

² I · O · M | DOLI · | NVTI · · · · · | T · · · · · So A. S. Murray. But, on examining the plate with the help of Mr F. H. Marshall, I made out a few more letters, *viz.* (a) on the left of the break I · O · [M] | DO(LI)[CHE]N (O?) · (T)IB · [... | T · DAM[. and (b) on the right of the break (A?) > (O?).

³ E. Gerhard 'Juppiter Dolichenus' in the *Jahrb. d. Vereins v. Alterthumsfreund. im Rheinl.* 1863 xxxv. 31 ff. pl. 1, 1, A. H. Kan *De Iovis Dolicheni cultu Groningae* 1901 p. 105 f. no. 150, K. Zangemeister *loc. cit.* 1901 cvii. 64 pl. 7, 2. It is inscribed: I. o. m. Dolicheno An[tonius Pro]clus > (=centuria) Ger[mani v]otum s[olvit] | l[ibens] l[aetus] m[erito].

⁴ E. Gerhard *loc. cit.* 1863 xxxv. 31 ff. pl. 1, 2, Kan *op. cit.* p. 106 no. 151.

Iupiter *Dolichenus* was in some sense, then, a god of precious metals—a fact which leads us to remark on the frequency of the

Fig. 494.

name Aurelius in his votive inscriptions¹. Doubtless the imperial Aurelii with their numerous freedmen spread the name far and

¹ Kan *op. cit.* p. 17.

wide through Romanised lands. Still, something more than this seems needed to account for the constant association of an Aurelius or an Aurelia with Iupiter *Dolichenus*. Thus H. Dessau prints thirty-two Latin inscriptions bearing on this divinity¹. They include two emperors (M. Aurelius Antoninus and L. Aurelius Commodus)² and no less than sixteen other persons of the same gentile name: three out of the sixteen are expressly described as priests of the god³, one as the curator of his temple⁴, and three others as holding various offices connected with his cult⁵. It seems probable therefore that the Aurelii, whose name pointed at once to the sun-god⁶ and to gold⁷, considered themselves bound by special ties of connexion with Iupiter *Dolichenus*.

Several dedications append to the name of this deity the curious title 'where iron is born'⁸; one inscription speaks of him as himself 'born where iron arises'⁹. These expressions have been usually interpreted of iron-mines in the neighbourhood of Doliche. But A. H. Kan justly objects that there is not a particle of evidence to show that such mines were ever to be found in that locality¹⁰. His own notion, however, that 'iron' means 'iron-water'

¹⁰ Kan *op. cit.* p. 26.

and implies chalybeate springs is insufficiently supported by the analogy of the word *Staal* for *Staalwater*¹ and the discovery of an effigy of the god in the baths at Carnuntum². F. Cumont is content to surmise that the phrases in question correspond with some Semitic epithet and imply a Commagenian myth now lost³.

But this after all is only to explain *ignotum per ignotius*. A clue to the meaning of the words is, I venture to think, furnished by the fact that the same description is elsewhere given of the Chalybes. Greek lexicographers describe them as 'a Scythian tribe, where iron is born'⁴. These iron-working Chalybes are located by different authorities at various points along the southern shore of the Black Sea⁵. Strabon, who places them near Pharnakia, states that in his time they were called Chaldaioi and that in former days they worked silver as well as iron⁶. Whether he was justified in thus identifying the Chalybes with the Chaldaioi, whom others termed Chaldoi⁷, may well be doubted. But his assertion that they formerly worked silver is of interest, since the Homeric *Catalogue* describes the Halizones (after the Paphlagonians and before the Mysians) as coming—

From far-off Alybe, where silver's born⁸.

Timotheos too at the court of Archelaos sang of 'earth-born silver'⁹. On the whole it seems clear that in Pontos, where, as Strabon says, the great mountain-ranges are 'full of mines'¹⁰, iron and silver were regarded as the offspring of Mother Earth. This belief, natural enough in itself, had very possibly come down from the days of the Hittites, who worshipped a great mountain-mother. But Iupiter *Dolichenus* was near akin to this same mother. For, if his bull is that of the Hittite father-god¹¹, his double-axe is that

¹¹ *Supra* p. 604 ff.

of the Hittite son-god¹. Hence I conclude that the title 'where iron is born' properly belongs to *Dolichenus* as successor of the Hittite son-god. It may even be that this strange appellation points backwards to a time when the god was identified with his own double-axe² and the making of the latter implied the birth of the former: he was 'born where iron arises³'.

In any case the same geographical clue will enable us to trace the connexion of Jupiter *Dolichenus* with the precious metals. The Chalybes, according to Strabon, were originally workers in silver⁴. They also collected gold in a small island lying off their coast⁵. The *Dolichenus*-plates were of silver gilt.

Finally, to return to our point of departure, we have seen that Jupiter *Dolichenus*, like the Jupiter *Heliopolitanus* with whom he is

² For 'Minoan' parallels see *infra* ch. ii § 3 (c) i.

³ Terrestrial iron perhaps stood in some relation to celestial iron. H. R. Hall *The Oldest Civilization of Greece* London 1901 p. 200 n. 1, à propos of the Sumerian name for iron, which was expressed ideographically by means of the signs *An-Bar*, observes: 'The Sumerians may have first used meteoric iron at a very early period, like the Egyptians, since *AN. BAR* means practically the same thing as the Egyptian *Ba-n-pet*, "Heavenly Metal."' My friend the Rev. Dr C. H. W. Johns, however, kindly informs me that the meaning of *An-Bar*, which is taken to denote 'Divine Weight,' cannot be considered certain. And L. de Launay in Daremberg—Saglio *Dict. Ant.* ii. 1076 gives good reasons for doubting the supposed use of meteoric iron. It is ignored by Sir W. M. Flinders Petrie *The Arts & Crafts of Ancient Egypt* Edinburgh & London 1909 p. 104 ff. and J. H. Breasted *A History of Egypt* New York 1911 p. 136 when mentioning the rare examples of iron in early Egypt and the possible sources of supply.

On the other hand, the Egyptians believed that the tops of some mountains touched the floor of heaven, which was formed by a vast rectangular plate of iron (E. A. Wallis Budge *The Gods of the Egyptians* London 1904 i. 167, 491, ii. 241). It is interesting to observe that the *Iliad* always speaks of the sky as made of bronze, whereas the *Odyssey* usually describes it as made of iron: cp. *Il.* 17. 425 χάλκεον οὐρανόν (so Pind. *Pyth.* 10. 27, *Nem.* 6. 3 f.), Pind. *Isthm.* 7 (6). 44 χαλκόπεδον θεῶν ἔδραν, *Il.* 1. 426 Διὸς ποτὶ χαλκοβατὲς δῶ (*Il.* 21. 438, 505; *Il.* 14. 173, *Od.* 8. 321), *Il.* 5. 504 οὐρανὸν ἐς πολύχαλκον, Eur. *Ion* 1 Ἄτλας ὁ χαλκίοισι νότοις οὐρανὸν κ.τ.λ.; but *Od.* 15. 329 and 17. 565 σιδήρεον οὐρανὸν with Eustath. in *Il.* p. 576, 33 ff., in *Od.* p. 1783, 18 ff.

⁴ *Supra* p. 631.

⁵ Aristot. *mir. ausc.* 26. The Chalybes seem to be connected with gold as well as with iron by the story of the metal-eating mice. Aristotle stated that in the island of Gyaros mice ate iron ore; Amyntas, that at Teredon in Babylonia they had the same peculiarity (*Ail. de nat. an.* 5. 14). Theophrastus 'goes one better': in Gyaros, he says, mice drove out the inhabitants and were then reduced to eating iron; they do the same by nature in the iron-workings of the Chalybes; and in gold mines they are so fond of making away with the precious metal that they are regularly ripped up to recover it (*Theophr. ap. Plin. nat. hist.* 8. 222, cp. 104, and *ap. Phot. bibl.* p. 528a 33 ff. Bekker). See further Aristot. *mir. ausc.* 25 f., Antig. *hist. mir.* 18 and *ap. Steph. Byz. s.v. Γάρος*, Herond. 3. 75 f., Sen. *apocol.* 7. 1. Since there is no iron ore in Gyaros (Pauly—Wissowa *Real-Enc.* vii. 1954), it is possible that we should assume another island of the same name off the coast of the Chalybes.

sometimes coupled¹ or identified², was essentially a thunder-god with solar powers—‘the Preserver of the Whole Sky,...a Provider Invincible³.’ The bull, therefore, on which he stands is comparable with the bulls of other Anatolian deities already considered and marks him as a god of fertilising sunshine and storm.

xxi. The Significance of the Bull in the cults of Zeus.

(a) The Bull as a Fertilising Power.

Those who have had the patience to accompany me through the last twenty sections of our subject will be glad to rest awhile

And let the accumulated gain
Assort itself upon the brain.

We have gone the round of the Levant together, visiting successively Egypt, Crete, Syria, and Asia Minor. Everywhere we have found traces of the same religious history—a local worship of the bull, which drew its sanctity from immemorial usage and was associated in a variety of ways first with the principal god of the district and then with the Greek Zeus or the Roman Iupiter. In Egypt, for example, the bull Apis came to be viewed as the *avatar* of Osiris⁴ or the ‘second life of Ptah⁵’, but under the name *Épaphos* was affiliated to Zeus⁶. In Crete the bull was identified with the sun-god⁷ and worshipped with mimetic rites⁸; but the sun-god was later ousted by⁹, or fused with¹⁰, the Hellenic Zeus. In Assyria

¹ *Corp. inscr. Lat.* iii no. 3908=Dessau *Inscr. Lat. sel.* no. 4296=Kan *op. cit.* p. 46 no. 33 (Laibach) I. o. m. D. | et I. o. m. H(eliopolitano), cp. *Corp. inscr. ⁸ *Supra* p. 490 ff.

⁹ *Supra* p. 522 f.

¹⁰ *Talās*, ‘the Sun’ (*supra* p. 468 n. 7), becomes Zeus *Talaiós* or *Tallatos* (*infra* ch. i § 6 (h) v).

the bull was attached to the storm-god Adad or Ramman¹; but it was as Zeus *Ádados* or Jupiter *Heliopolitanus* that he reached his apogee². At Boghaz-Keui³ and Malatia⁴ the bull appears as a supporter of the Hittite father-god; but this deity, still mounted on a bull, made his triumphal progress through Europe under the title of Jupiter *Dolichenus*⁵. Thus from start to finish, through two or more millenniums and across three continents, the bull retained its hold upon popular reverence.

What gave the creature this claim to universal respect? What is his significance in ancient religion? Prof. Gilbert Murray in a recent lecture has told us⁶: 'we modern town-dwellers,' he says, 'have almost forgotten what a real bull is like. For so many centuries we have tamed him and penned him in, and utterly deposed him from his place as lord of the forest. The bull was the chief of magic or sacred animals in Greece, chief because of his enormous strength, his rage, in fine his *mana*, as anthropologists call it.' Perhaps we may venture to narrow down this answer without loss of probability. Beyond other beasts the bull was charged with *Zeugungskraft*, gendering power and fertilising force⁷. That, I take it, is the ultimate reason of his prestige among the cattle-breeding peoples of the Mediterranean area.

¹ *Supra* p. 576 ff.

² *Supra* p. 549 ff.

³ *Supra* p. 604 f.

⁴ *Infra* p. 640 fig. 500.

⁵ *Supra* p. 604 ff.

⁶ G. Murray *Four Stages of Greek Religion* New York 1912 p. 33. Cp. Harrison *Themis* p. 156 f. and p. 548 Index *s.v.* 'Bull.' Prof. Murray's statement strikes me as more just and true to nature than, say, the eloquent sermon preached by Dion Chrysostom (*or.* 2 p. 69 ff. Reiske) on the Homeric text *Il.* 2. 480—483.

⁷ See e.g. Aristot. *hist. an.* 5. 2. 540a 6 f. (bulls), 6. 21. 575a 13 ff. (bulls), 6. 18. 572a 8 ff. and 31 ff. (cows), Ail. *de nat. an.* 10. 27 (cows), Horapoll. *hierogl.* 1. 46 (bulls). Very significant is the use of ταῦρος = τὸ αἰδοῖον τοῦ ἀνδρός (Soud. *s.v.* ταῦρος, schol. Aristoph. *Lys.* 217) or τὸ γυναικεῖον αἰδοῖον (Phot. *lex. s.v.* σάραβον, ταῦρον, Soud. *s.v.* σάραβον, Hesych. *s.v.* ταῦρος) or ὄρος etc. (Poll. 2. 173, Galen. *introductio seu medicus* 10 (xiv. 706 Kühn), Eustath. *in Il.* pp. 259, 3 f., 527, 43 ff., 906, 60, *id. in Od.* p. 1871, 43 f., *et. mag.* p. 747, 40 ff.) or παιδεραιότης (Hesych. *s.v.* ταῦρος), and the word ἀταύρωτος (Aisch. *Ag.* 244, Aristoph. *Lys.* 217 f., *alib.*), if not also λάστανρος (on which, however, see L. Meyer *Handb. d. gr. Etym.* iv. 580, Boisacq *Dict. étym. de la Langue Gr.* p. 581 f., Walde *Lat. etym. Wörterb.* p. 326 *s.v.* 'lascivus').

Amulets combine the bull's head with the *phallós* in several ways (O. Jahn in the *Ber. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1855 p. 58 n. 116 pl. 5, 4 and 5, E. Labatut in Daremberg—Saglio *Dict. Ant.* i. 257 figs. 308, 309, I. Scheffelowitz in the *Archiv f. Rel.* 1912 xv. 469 n. 3).

W. Schmitz *Das Stiersymbol des Dionysos* Köln 1892 p. 1 f.: 'Der Stier scheint bei den Griechen ursprünglich das Symbol der Fruchtbarkeit gewesen zu sein. Die Fruchtbarkeit in der Natur wird nun aber nach griechischer Anschauung hervorgebracht entweder durch den Erdboden, oder durch die Feuchtigkeit des Wassers, oder durch die hauptsächlich von der Sonne ausgehende Wärme. Wenn also die Griechen in ihrer Mythologie und Kunst einzelnen Gottheiten das Symbol des Stieres beilegen, so bedeutet dieses Bild bald die Fruchtbarkeit des Erdbodens, bald die des gedeihenspendenden

The bull as an embodiment of procreative power was naturally brought into connexion with the great fertilising agencies of sunshine and storm¹. In Egypt it is of course the solar aspect of the beast that is emphasised: Mnevis² and Apis³ and Bouchis⁴ all have a disk between their horns. In Crete too the solar character of the bull was well-marked and of early date—witness Talos otherwise called *Talros*⁵, Helios transformed into the ‘Adiounian bull’⁶, the Minotaur in his Labyrinth at Knossos⁷, the cattle of the Sun at Gortyna⁸. Yet the ‘Minoan’ combination of bovine horns with the double-axe⁹ shows that the bull had been related to the storm-god also. Among the Hittites the god that bears the lightning stands either upon¹⁰ or beside¹¹ the bull. Nevertheless this deity was likewise regarded as a sun-god; for c. 1271 B.C. Hattusil ii, king of the Hatti, made a treaty with Osymandyas, i.e. User-Maât-Râ (Rameses ii)¹², in which the Hittite deities were enumerated with ‘the Sun-god, Lord of Heaven’ at their head¹³. In Babylonia and Assyria the bull is *in primis* an attribute of the storm-god En-lil¹⁴ or Ramman or Adad¹⁵, though the names Heliopolis, Zeus *Helioupolites*, Iupiter *Heliopolitanus* imply that in the Graeco-Roman age Adad at least was equated with Helios¹⁶.

(β) The Influence of Apis.

Given this essential similarity of cult to cult, it was only to be expected that religious influences, affecting both thought and expression, would radiate far and wide from the chief centres of civilisation. We shall glance at three such cases of diffusion through contiguous areas.

Wassers, bald das Feuer, das Licht und die Wärme, ohne die in der ganzen Natur kein Leben sein kann.’ Cp. Preller—Robert *Gr. Myth.* i. 713 f.

¹³ Then follow ‘the Sun-god of the city Arinna; the Thunder-god, Lord of Heaven; the Thunder-god of the Hatti; the Thunder-god of the city Arinna’; etc.—these thunder-gods being presumably Sandas and various localised forms of him.

¹⁴ *Supra* p. 579 ff.

¹⁵ *Supra* p. 576 ff.

¹⁶ *Supra* p. 550 ff.

The Apis-worship of the Egyptians impressed the early Greeks¹. Probably it impressed other nations also who came much into contact with Egypt—for instance, the Hittites. At Eyuk, some twenty miles north of Boghaz-Keui, the gateway of a Hittite

Fig. 495.

palace built *c.* 1360 B.C. was flanked by an outer and an inner pair of bull-sphinxes, which may fairly be regarded as a blend of the Assyrian bull with the Egyptian sphinx². The frontage-walls exhibit two series of reliefs. On the left is shown the cult of a sacred bull; on the right, that of an enthroned goddess. The cornerstones on either side are occupied by the bull and the goddess respectively. It is therefore clear that the bull (fig. 495)³ here stands for the Hittite father-god, who elsewhere appears with this animal beneath⁴ or beside⁵ him. But it is also clear that Egyptian influence has again been at work. For, Apis-like⁶, this bull has a variety of body-marks, a crooked stick—probably meant for a kingly sceptre⁷—and two disks on his side, the remains of a trilobed or trifoliate design on his haunch⁸. In Roman times Apis travelled yet further afield.

Maspero *The Struggle of the Nations* London 1896 p. 647 ff. figs., J. Garstang *The Land of the Hittites* London 1910 pp. 242 ff., 397 (bibliography), with plan on p. 247 and pl. 72, H. R. Hall *The Ancient History of the Near East* London 1913 p. 329 n. 5 pl. 22, 1 (who notes that the Hittite sculptor has given his sphinxes Hathor-heads such as sphinxes in Egypt never have).

³ G. Perrot—E. Guillaume—J. Delbet *op. cit.* i. 360 pl. 56, 3, Perrot—Chipiez *op. cit.* iv. 668 f. fig. 329, J. Garstang *op. cit.* p. 255 ff., *id.* *The Syrian Goddess* London 1913 p. 9 ff. fig. 3.

⁴ *Infra* p. 640 fig. 500.

⁵ *Supra* p. 605 fig. 476.

⁶ *Supra* pp. 432 f., 468, 540 n. 2.

⁷ *Supra* p. 87.

⁸ Cp. two blocks from the right-hand series of reliefs: (1) a bull about to toss, with a trace of the curved stick on his shoulder and one disk on his side (G. Perrot—E. Guillaume—J. Delbet *op. cit.* i. 361 pl. 57, 3, Perrot—Chipiez *op. cit.* iv. 678 f. fig. 639, J. Garstang *The Land of the Hittites* London 1910 p. 263); (2) a lion holding down a ram, the ram showing the same curved stick and disk on his side and the same trifoliate design on his haunch (G. Perrot—E. Guillaume—J. Delbet *op. cit.* i. 361 pl. 57, 1 f., Perrot—Chipiez *op. cit.* iv. 680 f. figs. 340 f., J. Garstang *op. cit.* p. 263 f.).

His effigy is found *e.g.* on coins of Amastris¹ and Germanikopolis² in Paphlagonia, of Nikaia³ and Nikomedeia⁴ in Bithynia, of Hadriano-thera⁵ in Mysia, of Mytilene⁶ in Lesbos, and was adopted by Julian the Apostate as the very sign and symbol of paganism (fig. 496)⁷. The far-reaching influence of the Egyptian bull seems even to have touched the remotest confines of the ancient world. Certain square silver pieces struck by Apollodotos I show Nandi, Çiva's bull, with a simplified form of the *Nandi-pada* or 'footprint of Nandi' on his hump (fig. 497)⁸. Copper coins of Spain often denote the

Fig. 496.

Fig. 497.

Fig. 498.

sanctity of a bull by placing between his horns a triangular erection like a pediment, sometimes with a pellet or disk in it (fig. 498)⁹. Such devices may or may not imply assimilation to

⁸ *Brit. Mus. Cat. Coins Greek and Scythic Kings* p. 34 nos. 10 f. I figure a specimen in my collection. My friend Prof. E. J. Rapson kindly refers me to his *Catalogue of the Coins of the Andhra Dynasty* etc. London 1908 p. clxxv for an account of the *Nandi-pada*. He adds (Feb. 11, 1913): 'My impression is that the sign is fairly early in India. I think the great time for foreign influence of the kind suggested was the first century A.D. Sarapis, for instance, occurs on coins then. But there can be no doubt that the Persian Empire was a means of communication between Europe and Egypt on the one hand and India on the other.'

⁹ A. Heiss *Description générale des monnaies antiques de l'Espagne* Paris 1870 p. 169

the type of Apis. More certainly affected by it is a bronze bull of the Hallstatt period from the famous Býčískála Cave in Moravia (fig. 499 *a*, *b*)¹. This remarkable little image was discovered in 1869 at the entry of the cave by a couple of students—Dr Felkel and his cousin—then on a holiday ramble. It lay in a terra-cotta bowl surrounded by millet, which had apparently been baked along with it; and it was attached to a plate of white metal, subsequently lost. It is a statuette of cast bronze about 100 millimeters in height. The eye-holes show traces of having been filled with an iridescent glass-paste. The three lines round the muzzle represent

Fig. 499.

a bridle, as in the case of Egyptian bulls. Small triangular plates of iron² are inlaid on its forehead and shoulders, and a narrow

pl. 17, 6, 8 Cascantum, p. 175 pl. 18, 1 Graccurris, p. 201 ff. pl. 24, 19, 21, pl. 25, 37, 39, 40, pl. 26, 43 (= my fig. 498) Caesar Augusta, p. 341 pl. 50, 3 Bailo.

¹ H. Wankel *Der Bronze-Stier aus der Býčískála-Höhle* Wien 1877 pp. 1—32 with col. Frontisp. (= *id.* in the *Mittheilungen der Anthropol. Gesellschaft in Wien* 1877 p. 125 ff.), Reinach *Rép. Stat.* ii. 732, 5, Forrer *Reallex.* pp. 33, 130.

² So Wankel *op. cit.* p. 5 'die künstlich und mühevoll eingesetzten Eisenplättchen': Forrer *op. cit.* p. 33 says 'mit eingelegtem kupfernem Dreieck auf der Stirn, die schon von Woldrich mit Apis in Zusammenhang gebracht worden ist,' *ib.* p. 130, 'welche auf der Stirne mit rotem Kupfer ausgelegt war und derart an den roten Stirnleck des Apisstieres erinnert.'

Reinach *Bronzes Figurés* p. 278 n. 4 scouts the idea that the iron triangular plates are due to any imitation of Apis. He cites a bronze cow found at Hallstatt, which served as the handle of a bowl: its eyes are iron nails, and its forehead is inlaid with a

strip along its backbone from head to tail, while there are signs of another triangular patch having concealed the casting-hole on its belly. We cannot of course suppose any direct contact between Moravia in the early iron age and Egypt. But it is possible that Egyptian *objets d'art* might find their way northwards from tribe to tribe and be copied by barbaric craftsmen. If so, we may have here the Egyptising form of a local bull-god comparable with the bronze bull by which the Cimbri swore¹ or the three-horned bulls of bronze and stone found mostly in eastern Gaul².

(γ) Spread of the Hittite Bull-cult.

A second case of diffusion is furnished by the Hittite bull-cult. The marked bull of Eyuk (fig. 495) was the animal form of the lightning-god and sun-god, who in one or more of the Hittite states was named *Tišub*, *Tišub*, or *Tesub*³. It has been plausibly suggested by A. Fick⁴ that we should recognise the same name in *Sisyphos* or *Sésyphos*⁵, the faded sun-god of Corinth⁶. If so, it will hardly be accidental that Sisyphos is by tradition the owner of marked oxen. Autolykos stole his cattle and tried to conceal the theft; but Sisyphos recognised them by means of the monograms or marks upon their hoofs⁷ and became by Antikleia, daughter of

triangular plate of bone (E. von Sacken *Das Grabfeld von Hallstatt* Wien 1868 p. 155 pl. 23, 6 and 6^a).

¹ Plout. *v. Mar.* 23 ὁμόσαντες τὸν χαλκοῦν ταύρον, δὴ ὑπερον ἀλόντα μετὰ τὴν μάχην εἰς τὴν Κάρλου φασὶν οἰκίαν ὥσπερ ἀκροθίνιον τῆς νίκης κομισθῆναι.

² Reinach *Bronzes Figurés* p. 278 n. 1 draws up a list of twenty-four examples. See further Reinach *op. cit.* p. 275 ff. nos. 285, 288, 292, 293, 294, *id. Al.* 344 = Eudok. *vioi.* 863 Σίσυφος δὲ μονογράμμω τυπώματι τὸ τοῦτου ὄνομα ἐγχαράττων ταῖς τῶν ἑαυτοῦ (αὐτοῦ) Tzetz. ed. Scheer) ζῴων ὀπλαῖς καὶ χηλαῖς ἐπεγίνωσκεν, Polyain. 6. 52 Σίσυφος, Αὐτολόκου

Autolykos, the father of Odysseus. Odysseus too, or rather his companions, stole the cattle of the sun-god¹. Indeed, the lifting of them is a commonplace in Greek mythology². For instance, Alkyoneus driving off the oxen of Helios from the Akrokorinthos³ appears to be a doublet of Autolykos driving off the oxen of Sisyphos from the same mountain-fastness. But whether *Tešub*

Fig. 500.

is to be identified with *Sisyphos* or not, it is certain that he was a sky-god who had the bull as his sacred beast (fig. 500)⁴. A small

τὰς βόας αὐτοῦ κλέπτοντος πολλάκις, ταῖς χηλαῖς τῶν βοῶν ἐνέτηξε μύλιβον, ᾧ χαρακτῆρα ἐνήρμοσε γράμματα ἐκτυπῶντα 'Αὐτόλυκος ἐκλεψεν.' ὁ μὲν δὴ Αὐτόλυκος νύκτωρ ἀπήλασε τὰς βόας, ὁ δὲ Σίσυφος μεθ' ἡμέραν τοῖς γείτοσι γεωργοῖς εἶδει τὰ ἰχνη τῶν βοῶν κατηγοροῦντα τὴν Αὐτολύκων κλοπήν.

A relief-vase by the potter Dionysios, found at Anthedon and now at Berlin, illustrates this tale (C. Robert in the *Winkelmannsfest-Progr. Berlin* l. 90 ff. with figs.). Cp. also a red-figured Attic *amphora* from Ruvo now at Munich (Jahn *Vasensamml. München* p. 254 ff. no. 805, T. Panofka in the *Ann. d. Inst.* 1848 xx. 162 ff. pl. G, Reinach *Rép. Vases* i. 277, H. B. Walters *History of Ancient Pottery* London 1905 ii. 137, 264), which according to the most probable interpretation (L. D. Barnett in *Hermes* 1898 xxxiii. 640 ff.) represents the subsequent marriage of Antikleia with Laertes.

³ K. Wernicke in Pauly—Wissowa *Real-Enc.* i. 1581, Gruppe *Gr. Myth. Rel.* p. 134. The original version of the myth was reconstructed by C. Robert in *Hermes* 1884 xix. 473 ff. from schol. Pind. *Nem.* 4. 43, schol. Pind. *Isthm.* 6 (5). 47, Apollod. i. 6. 1.

⁴ Relief on building-stone at Malatia, near the confluence of the Tochma Su with the Euphrates (J. Garstang in the *Ann. Arch. Anthr.* 1908 i. 3 f. pl. 4 f., *id.* *The Land of the Hittites* London 1910 pp. 138 f., 399 pl. 44, *id.* *The Syrian Goddess* London 1913 p. 5 f. fig. 1, with the original aspect of the bull's horns and the libation-vase restored by means of dotted lines, D. G. Hogarth in the *Ann. Arch. Anthr.* 1909 ii. 180 f. pl. 41, 4). Prof. Garstang *The Land of the Hittites* p. 138 writes: 'a deity, wearing a conical head-dress decorated with rings, stands upon the back of a horned bull. His left leg is forward..., and on his feet are tip-tilted shoes. In his right hand, which is drawn

bronze bull, acquired by Monsieur Sorlin-Dorigny somewhere in the interior of Asia Minor and by him presented to the Louvre, is regarded by Monsieur Perrot as of Hittite manufacture¹. It has markings on its haunch which recall those of Tešub's bull at Eyuk. Probably we should be right in assuming at various Hittite centres the cult of a life-sized bronze bull, of which copies on a smaller scale were multiplied. This assumption would at least square with some further facts. W. Leonhard² compares with the Louvre statuette a small bronze bull of crude style seen by Prof. Cumont near Neokaisareia (*Niksar*) in Pontos. The find-spot was one of considerable interest³:

'You reach a mountain-top, which commands a view southwards over a vast stretch of country—*Niksar* itself, the Lykos-valley fading away into the distant haze, the wooded ranges of Lithros and Ophlimos forming the boundary of Phanaroia, and beyond with its white peaks the high mountain-chain of Asia Minor. Pines are growing on this height that no man would venture to cut, and all around are to be seen traces of a circular precinct-wall. This summit, like many others, is under the protection of Elias, and every year on the twentieth of June, the day consecrated to this prophet by the orthodox church, the villagers celebrate a 'liturgy' here. They slaughter sheep and poultry, roast them, and then fall to eating, drinking, and dancing merrily. The nature of the spot and the details of the feast are so similar to those that we have already noted near *Ebimi* at the sanctuary of Zeus *Stratios* and elsewhere too⁴ that we can safely infer the existence of a pagan cult on this mountain-top. The 'liturgy' of Elias has taken the place of a festival held at the summer solstice. More than that, we were assured that ancient idols are unearthed on the mountain, and by way of proof we were shown a small bronze bull of very rude make and a bull's head that we were able to acquire⁵.... The neck is a hollow socket, and two holes pierced in the metal show that this head must have been fixed on a wooden stem. The eye-holes are empty and were doubtless inlaid with enamel. The tongue, which hung out of the half-opened mouth, is now broken. A ring under the jaw probably served for the attachment of a

back, there is a triangular bow, and in his outstretched left hand he seems to hold up a forked emblem, like the lightning trident, and to grasp at the same time a cord which is attached to the nose of the bull. His dress is a short bordered tunic. Facing him is a long-robed personage, in whom we recognise the king-priest, distinguished by his close-fitting cap and the characteristic large curl of hair behind the neck. In his left hand he holds a reversed lituus; his right is partly extended and seems to be pouring out some fluid which falls in a wavy stream. He is followed by a small person who leads up...a goat clearly intended for an offering. Some hieroglyphs complete the picture.'

¹ Perrot—Chipiez *Hist. de l'Art* iv. 763 fig. 369: 'Ce taureau peut avoir été une idole, celle même que nous voyons dressée sur l'autel dans un des bas-reliefs d'Euiuk' [*supra* p. 636 fig. 495].

small bell. When we remember that the bull was the sacred animal of the god Men, who is often represented with his foot set on a mere bull's head and a pine-cone in his hand¹, we may conclude with some assurance that this great Anatolian deity was once worshipped on the height where these bronzes were found. Further, it is à propos of Kabeira that Strabon² mentions the small town of Ameria, where there was the temple of Men *Pharnákou*, lord of an extensive domain and a numerous retinue of *hieródouloi*. He adds that the kings of Pontos had so profound a veneration for this god that they used to swear by the king's Tyche and by Men *Pharnákou*³.

Prof. Cumont's conclusion that the bulls found on this Pontic mountain imply a cult of Men is not necessarily inconsistent with the view that the Hittite bull-god was there first. Men in turn was at Maionia (*Menneh*) in Lydia brought into connexion with Zeus⁴, the two deities being sometimes at least paired off as moon-god with sun-god (*supra* p. 193 fig. 142). Elsewhere Zeus appears to have inherited the bronze bulls of the Hittite god with no intermediary. Prof. Fick in his study of pre-Greek place-names⁵

¹ P. Perdrizet in the *Bull. Corr. Hell.* 1896 xx. 102 f. fig. 7, W. Drexler in Roscher *Lex. Myth.* ii. 2759 ff., Gruppe *Gr. Myth. Rel.* p. 1533 n. 1. Men appears standing with a bull beside him on a coin of Sagalassos in Pisidia (*Brit. Mus. Cat. Coins Lycia*, etc. p. 242 no. 12 Hadrian, W. H. Roscher in the *Ber. sächs. Gesellsch. d. Wiss. Phil.-hist. Classe* 1891 p. 143 pl. 1^a, 16 Hadrian), with a bull's head beside him over which he pours a libation on coins of Nysa in Lydia (*Brit. Mus. Cat. Coins Lydia* p. 181 no. 58 Gordianus Pius, p. 184 no. 67 Valerian, W. H. Roscher *loc. cit.* p. 143 pl. 1^a, 14 Gordianus Pius), and drawn in a car by two bulls on coins of Temenothyrai in Phrygia (*Brit. Mus. Cat. argues that Mount *Atabyron* or *Atabyris* in Rhodes and Mount *Tabbôr* in Galilee, which Iosephos calls *Itabyrion*¹ and Polybios *Atabyrion*², bore the same Hittite name³. We are therefore free to surmise that the bronze cattle on Mount Atabyron, which bellowed ominously when any evil was about to befall Rhodes⁴, the Sun-god's island, were of Hittite origin⁵. The small bronze bulls found now-a-days on the mountain (fig. 502)⁶ are of later

Fig. 502.

style and must be regarded as votive offerings to the Hellenic Zeus *Atabyrios*⁷. The cult of this deity spread from Rhodes to the Rhodian colony Agrigentum; and we may reasonably conjecture that the notorious bull of bronze made by Perillos for Phalaris the Agrigentine tyrant⁸ was a late but lineal descendant

³ G. Beloch in the *Rhein. Mus.* 1894 xlix. 130 had taken Ἀταβύριον to be a Carian name derived from τᾶβα, 'rock' (Steph. Byz. *s.v.* Τάβα).

⁴ Append. B Rhodes.

⁵ Yet the myth of Katrens, Althaimenes, and Apemosyne, in which ox-hides and ox-herds play their part (Append. B Rhodes), points rather to a connexion with Crete. The story of Apemosyne slipping on the freshly-flayed hides strewn by Hermes in the road reads like a piece of aetiology. Sir Arthur Evans *Scripta Minoa* Oxford 1909 i. 281 guesses that the ox-hide symbols on the disk found at Phaistos 'have an ideographic meaning and represent the skins of sacrificed beeves': he argues (*ib.* p. 285 ff.) that the disk came from the south-west coastlands of Asia Minor—'This would not exclude an insular area, such as the once Carian Rhodes, in close mainland contact.'

of the Hittite breed. Finally, H. Prinz holds that the myth of Zeus and Europe is to be explained from Hittite sources¹. The Hittite goddess Chipa standing on the bull held by Tešub, while she supports in either hand a flowery kirtle (fig. 503)², certainly

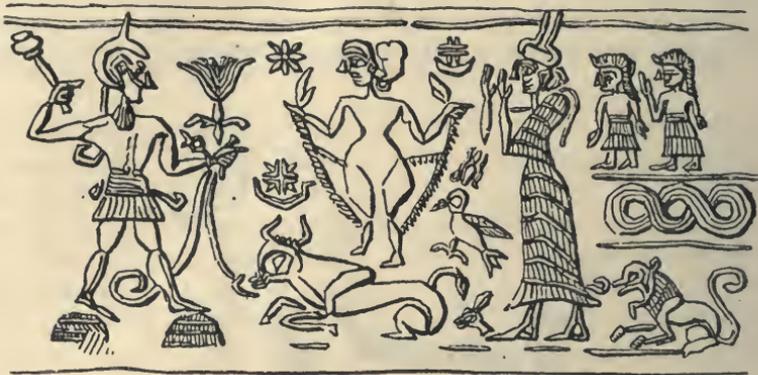

Fig. 503.

suggests that the art-type of Europe on the bull owed something to Hittite influence. And Chipa beneath her winged arch (fig. 504)³ may be compared with *Hellotis* in her big wreath⁴.

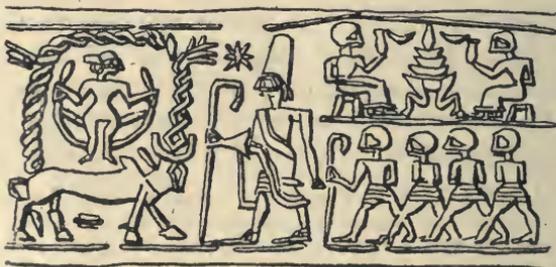

Fig. 504.

(δ) The Cretan Zeus and Zagreus.

Our third example of a transmitted religious *motif* is at once more certain and more interesting. The art of Mesopotamia carried westward by the Phoenicians has left its impress upon

Zeus and the Kouretes on a bronze 'shield' found
in the Idaean Cavé.

See page 645 ff.

[That this 'shield' is in reality a Curetic *týmpanon* has recently been recognised by H. Thiersch in the *Jahrb. d. kais. deutsch. arch. Inst.* 1913 xxviii Arch. Anz. pp. 47—53.]

early cult-objects in Crete¹. Conspicuous among these is a bronze shield of the ninth², or possibly of the eighth³, century B.C. found in the Idaean Cave (pl. xxxv)⁴. Round its rim are lotos-buds and a debased 'tree-of-life.' In the centre stands an athletic god who, like Rammân⁵, rests one foot upon a bull and, like Gilgameš⁶, lifts a lion high above his head. To either side is a winged attendant. All this is frankly Assyrian; and the youthful god with his curled hair and false beard might well be mistaken for Gilgameš portrayed as triumphing over the divine bull Alû⁷ and the lion⁸. But the fact that his attendants are each beating a pair of drums undeceives us. This is none other than the youthful Zeus of Mount Ide flanked by the Kouretes. And we observe two things: first, that we have here the earliest certain representation of Zeus; and second, that despite his Kouretes he is conceived not as an infant but as a young man in the prime of life, the 'greatest Lad of Kronos' line⁹.

Now the Cretans, as Dr Rendel Harris discovered¹⁰, held that Zeus was a prince ripped up by a wild boar and buried in their midst. The manner of his death gives us good reason to suspect that he was related to the great mother-goddess of Crete as was Adonis to Aphrodite or Tammuz to Ištar. The manner of his burial confirms our suspicion; for his tomb on Mount Juktas was in the *témenos* of a primitive sanctuary¹¹, apparently a sanctuary of the mountain-mother¹², where in 'Middle Minoan' times votive

¹² Sir Arthur Evans in the *Journ. Hell. Stud.* 1912 xxxii. 279 f.: 'Some of the most characteristic religious scenes on-Minoan signets are most intelligible in the light supplied by cults that survived to historic times in the lands East of the Aegean. Throughout these regions we are confronted by a perpetually recurrent figure of a Goddess and her

limbs were dedicated for health restored¹. If this was the character of the Cretan Zeus, it becomes highly probable that his death and resurrection were annually celebrated as a magical means of reviving the life of all that lives². Of such rites sundry traces are extant in Greek literature. We must consider their bearing on the monument before us.

Porphyrios in his *Life of Pythagoras* says of the philosopher that,

'when he landed in Crete, he betook himself to the mystics of Morges, one of the Idaean Daktyloi, by whom he was purified with the thunder-stone, at daybreak lying prone beside the sea and at night beside a river, his head wrapped in the fleece of a black ram. Moreover he went down into the Idaean Cave, as it is called, wearing black wool, passed thrice nine days there in accordance with custom, offered a funeral sacrifice to Zeus, beheld the throne that is strown for him every year, and engraved on the tomb an epigram entitled "Pythagoras to Zeus," which begins—

"Here lieth dead Zan, whom men name as Zeus³."

The essential points are that Pythagoras sacrificed as to a dead Zeus, and saw the throne that was annually spread for him. For whom? Presumably for the dead Zeus come to life again. It will be remembered that various coins of Asia Minor showed the

youthful satellite—son or paramour, martial or effeminate by turns, but always mortal, and mourned in various forms. Attis, Adonis or Thammuz, we may add the Ilian Anchises..., all had tombs within her temple walls. Not least, the Cretan Zeus himself knew death, and the fabled site of his monument on Mount Juktas proves to coincide with a votive shrine over which the Goddess rather than the God originally presided. So too, on the Minoan and Mycenaean signets we see the warrior youth before the seated Goddess, and in one case actually seem to have a glimpse of the "tomb" within its temenos. Beside it is hung up the little body-shield, a mourning votary is bowed towards it, the sacred tree and pillar shrine of the Goddess are hard by [*id. ib.* 1901 xxi. 177 fig. 53]. In another parallel scene the female mourner lies prone above the shield itself, the divine connexion of which is shown by the sacred emblems seen above, which combine the double axe and life symbol [*id. ib.* 1901 xxi. 176 fig. 52].'

¹ G. Karo in the *Archiv f. Rel.* 1913 xvi. 260: 'Auf dem Gipfel des Juktas, südlich von Knossos, wo man später das Grab des Zeus zeigte, hat Evans Reste eines mittelminoischen Heiligtums aufgedeckt, darunter auch ein paar geweihte menschliche Gliedmassen aus Ton, wie die aus dem Heiligtum einer Heilgöttheit von Petsofa im Osten der Insel (Brit. School Annual IX Taf. 12). Man darf daraus schliessen, dass der Himmelsgott im minoischen Kreta zugleich Heilgott, also der Ahnherr des Zeus Hypsistos und des Asklepios war.'

² See in *primis* Frazer *Golden Bough*³: Adonis Attis Osiris² p. 3 ff.

³ Porph. *v. Pyth.* 17 Κρήτης δ' ἐπιβάς τοῖς Μόργου μύσταις προσήει, ἐνὸς τῶν Ἰδαίων Δακτύλων, ὑφ' ᾧν καὶ ἐκαθάρθη τῇ κεραυνία λίθῳ, ἔωθεν μὲν παρὰ θαλάττῃ πρηγῆς ἐκταθείς, νύκτωρ δὲ παρὰ ποταμῷ, ἀρνειοῦ μέλανος μαλλοῖς ἐστεφανωμένος. εἰς δὲ τὸ Ἰδαῖον καλούμενον ἄντρον καταβάς, ἔρια ἔχων μέλανα τὰς νενομισμένας τριττὰς ἐννέα ἡμέρας ἐκεῖ διέτριψε καὶ καθήγησε τῷ Δίῳ, τὸν τε στορνύμενον αὐτῷ κατ' ἔτος θρόνον ἐθεάσατο, ἐπίγραμμα τ' ἐνεχάραξεν ἐπὶ τῷ τάφῳ, ἐπιγράψας ΠΥΘΑΓΟΡΑΣ ΤΩΙ ΔΙΙ, οὗ ἡ ἀρχή,—ὧδε θανὼν κείται Ζᾶν, ὃν Δία κκλησκουσιν.

infant Zeus or Dionysos seated on a throne with Kouretes grouped about him¹. Moreover, we have learnt from Orphic sources² that the chthonian Dionysos or Zagreus mounted the throne of Zeus³ and sat there grasping the thunderbolt, that in his efforts to escape the attacking Titans he ran through a whole series of changes, and that finally he was cut to pieces in the form of a bull. We concluded in fact that Dionysos or Zagreus was in some sense Zeus reborn⁴. That is why the earliest mention of Zagreus (*s. vi* B.C.) links his name with a phrase specially appropriate to Zeus⁵, and Nonnos (*s. v* A.D.) speaks of him explicitly as 'a second Zeus⁶.' The series of changes that he runs through perhaps reflects the rapidity of his growth. Kallimachos lays stress on the phenomenal adolescence of the infant Zeus⁷. And Aratos states that his nurses—

hid the babe

On fragrant Dikton, near the Idaean Mount,

Within a cave, and reared him for a year⁸.

A god who has to grow to maturity in a single year must be quick about it. Of his death in the form of a bull we shall have more to say.

But if the Cretan Zeus came to life again as Zagreus, that

looks as though the Anatolian cult of mother and son had developed along Orphic lines. Was this actually the case? Have we a right to use the term Zagreus of Zeus *redivivus* in Crete? And, if so, what exactly do we mean by it?

In the fifth century B.C., and perhaps much earlier, Zagreus with his thunders played an essential part in the rites of Zeus *Idaios*. So much at least we learn from an all-important fragment of Euripides' *Cretans*¹. The Chorus of 'prophets' address Minos as follows:

King of Crete with its towns five-score,
Whom Phoinix' seed Europe bore
To Zeus omnipotent evermore.

Lo, I am here in thy behoof
Quitting the holy fanes, whose roof
Of cypress-wood is weather-proof

Thanks to the home-grown timber hacked
By Chalyb axe and then compact
With bull-bound glue in its joints exact.

Pure is my life and of spotless fame
Since that moment when I became
A mystic in Zeus of Ide's name,—

Darkling Zagreus' thunders made,
The raw-fed feasters' feast essayed,
And the mountain-mother's torches swayed.

Thus amid the Curetic band,
Hallowed alike in heart and hand,
A very Bacchos at length I stand.

White is the raiment that now I wear,
In birth and burial have no share,
Nor eat of food, if the life be there.

The mystics of Zeus *Idaios* here tell us how their temple was made, and how they themselves were initiated into the rites of their god. The temple was roofed with beams of cypress, a tree

¹ Porph. *de abst.* 4. 19 μικροῦ με παρῆλθε καὶ τὸ Εὐριπίδειον παραθέσθαι, ὃς τοὺς ἐν Κρήτῃ τοῦ Διὸς προφήτας ἀπέχεσθαι φησὶ διὰ τούτων· λέγουσι δ' οἱ κατὰ τὸν χορὸν πρὸς τὸν Μίνω [Eur. *Cretes frag.* 472 Nauck²]. Φοινικογενοῦς [παῖ τῆς Τυρίας οἰμ. Bothe] τέκνον Εὐρώπας | καὶ τοῦ μεγάλου Ζανός, ἀνάσσω | Κρήτης ἑκατομπολιέθρου· ἦκω ζαθέου ναοῦς προλιπῶν, | οὗς αὐθιγενῆς τμηθεῖσα δοκὸς | στεγανοῦς παρέχει Χαλύβω πελέκει | καὶ ταυροδέτῳ κόλλῃ κραθεῖσ' | ἀτρεκεῖς ἄρμους κυπαρίσσου. || ἄγγον δὲ βίον τελων ἐξ οὗ | Διὸς Ἰδαίου μύστης γενόμεν, | καὶ νυκτιπόλου Ζαγρέως βροντὰς | τὰς τ' ὠμοφάγους δαΐτας τελέσας | μητρὶ τ' ὀρεῖν δῶδας ἀνασχῶν | καὶ Κουρήτων | Βάκχος ἐκλήθην ὀσιωθείς. | πάλλευκα δ' ἔχων εἴματα φεύγω | γένεσίν τε βροτῶν καὶ νεκροθήκης | οὐ χριμπτόμενος τήν τ' ἐμψύχων | βρῶσιν ἐδεστῶν πεφύλαγμα. I follow the text as given by Nauck, except that in line 1 I print Εὐρώπας (so most MSS., Εὐρώπης Nauck with cod. Mon. 461), in line 2 Ζανός (ζανός codd., Ζηνός Nauck after Bentley), and in line 12 τὰς τ' (so codd., τοὺς Nauck after Bergk) and δαΐτας (so Hesych. s.v. ὠμοφάγους δαΐτας, δαΐτας Nauck with codd., cp. Hesych. s.v. δαΐτας).

sacred to Rhea¹ rather than to Zeus². The requisite timber was grown on the spot. Probably it formed part of a grove belonging to the goddess³ and was felled with the double-axe, to which even in the iron age a certain sanctity still attached. The planks so hewn were fitted together with no iron nails or clamps (that would have been an impious innovation)⁴, but with glue made of bull's hide⁵ (for the bull was an animal form of the deity himself⁶). The initiates evidently sought to become one with the re-born god, the youthful partner of their goddess. Beginning as Kouretes, they ended as Bacchoi. Three rites are touched upon⁷, the making

¹ See F. Lajard *Recherches sur le culte du cyprès pyramidal* Paris 1854 p. 216 and *passim*, Boetticher *Baumkultus* pp. 486—494, Ohnefalsch-Richter *Kypros* p. 456 pls. 153, 154, and Index *s.v.* 'Cypress,' and F. Olck in Pauly—Wissowa *Real-Enc.* iv. 1915—1938.

² *Supra* p. 558 n. 5.

³ At Knossos were shown the foundations of Rhea's house and a cypress-grove of ancient sanctity (Diod. 5. 66 *μυθολογοῦσι γὰρ οἱ Κρήτες γενέσθαι κατὰ τὴν τῶν Κουρήτων ἡλικίαν τοῦς καλουμένους Τιτᾶνας. τοῦτους δὲ τῆς Κνωσίας χώρας ἔχειν τὴν ὄκησον, ὄπου περ ἐτι καὶ νῦν δέκνυνται θεμέλια ῥέας οἰκόπεδα καὶ κυπαρίττων ἄλσος ἐκ παλαιοῦ χρόνου ἀνεμμένον*).

At Ortygia near Ephesos was a grove mainly composed of cypress-trees: here Leto had brought forth her twins, while the Kouretes, standing close by on Mt Solmissos, had scared away Hera with the clash of their weapons (Strab. 639 f.).

On a lenticular gem of rock crystal actually found in the Idaean Cave 'a female votary is seen blowing a conch-shell or triton before an altar of the usual Mycenaean shape. Above the altar is seen a group of three trees apparently cypresses, and immediately in front of them the "horns of consecration." To the right of the altar is a rayed symbol, to the left is apparently another altar base, with a conical excrescence, and behind the votary another tree' (Sir Arthur Evans in the *Journ. Hell. Stud.* 1901 xxi. 141 f. fig. 25).

⁴ The best collection of relevant facts is in Frazer *Golden Bough*³: Taboo pp. 225—236 ('Iron tabooed'), especially *ib.* p. 230 ('Iron not used in building sacred edifices'). Dr Frazer cites *inter alia* Plin. *nat. hist.* 36. 100 Cyzici et buleuterium vocant aedificium amplum, sine ferreo clavo ita disposita contignatione, ut eximantur trabes sine fulturis ac reponantur.

⁵ Miss Harrison *Proleg. Gk. Rel.*² p. 481 writes: 'The shrine of Idaean Zeus... was cemented with bulls' blood. Possibly this may mean that at its foundation a sacred bull was slain and his blood mixed with the mortar; anyhow it indicates connection with bull-worship.' The suggestion of bull's blood is over-fanciful. Stephanus *Thes. Gr. Ling.* vii. 1876 B translated *ταυρόδετος* correctly enough by 'Glutine taurino compacta'; for *ταυροκόλλα*, as my colleague Mr D. S. Robertson points out to me, was simply glue, best made from the hides (Dioscor. 3. 91 (101) p. 441 Sprengel, cp. Aristot. *hist. an.* 3. 11. 517 b 28 ff., *alib.*) or from the ears and genitals of bulls (Plin. *nat. hist.* 28. 235 f.). Nevertheless such a substance may well have had a religious value in a shrine where the bull was of primary importance.

⁶ *Infra* p. 650 and ch. i § 6 (g) xxi (ξ, κ).

⁷ Miss Harrison has discussed the Zagreus-rites with much insight and with a most helpful accumulation of anthropological parallels in her *Proleg. Gk. Rel.*² p. 478 ff., *Themis* pp. 14 ff., 51 ff., 56 ff., 156 f., cp. Mr F. M. Cornford in *Themis* p. 247 f. and Prof. G. Murray *ib.* p. 345. These scholars have not, however, seen or at least expressed what I believe to have been an essential element, perhaps originally the

of thunder, the banquet of raw flesh, and the roaming with torches over the mountain-side. It seems probable that the purpose of all these ritual actions was to identify the worshippers as far as possible with Zagreus, and so to bring them into the most intimate relation to the goddess. If Zagreus sat on the throne of Zeus grasping the thunderbolt, the mystics could at least produce mock thunder¹ by beating drums made from the hide of the sacred bull²: on the shield from the Idaean Cave we see them doing it. If he was slain in the form of a bull, they could devour a bull's flesh raw and thereby assimilate the very life-blood of the god. If he consorted by night with his mother, the mountain-goddess, they too full-charged with his sanctity might go in quest of her their mother³ and fructify her by their torches⁴. Thenceforward as

essential element, of the performance, *viz.* that the initiate by identifying himself with the god re-born became the male consort of the goddess. The great mother-goddess, let us say, was responsible for the fertility of all living things. To keep up her powers, she must needs be impregnated by an unending succession of youthful lovers. Hence the young men of the community, in whom Miss Harrison has rightly recognised the true Kouretes (*supra* p. 23 n. 6), on entering upon manhood pose as the divine consorts of the mother-goddess. The mystics of Zeus *Idaios* in Crete thus fall into line with the mystics of Zeus *Sabázios* in Phrygia (*supra* p. 395 f.). And this may be ultimately the meaning of the phrase *θαλάμειμα Κουρήτων* used by Euripides (*infra* n. 2), of the formula *ὑπὸ τὸν παστὸν ὑπέδυν* in the mysteries of Deo (Clem. Al. *protr.* 2. 15. 3 p. 13, 13 Stählin = Euseb. *praep. ev.* 2. 3. 18 cited *supra* p. 392 n. 5, cp. schol. Plat. *Gorg.* 497 C) and of the verse *Δεσποίνης δὲ ὑπὸ κλάπων ἔδυν χθονίας βασιλείας* on an Orphic gold tablet found near Naples (*Inscr. Gr. Sic. It.* no. 641 i, 7, G. Murray in Miss Harrison's *Proleg. Gk. Rel.*² p. 667 ff.).

¹ Gruppe *Gr. Myth. Rel.* p. 820 n. 5, cp. *ib.* p. 819 n. 4, conjectured that the Kouretes clashing their weapons were the mythical counterpart of earthly priests imitating a storm by way of rain-magic. Miss Harrison *Themis* p. 61 f. thinks that the mimic thunder was produced by means of a *ρόμβος* or 'bull-roarer,' which we know to have been among the toys of Zagreus (Orph. *frag.* 196 Abel = Clem. Al. *protr.* 2. 17. 2 p. 14, 12 Stählin with schol. *ad loc.* p. 302, 28 ff. Stählin, Arnob. *adv. nat.* 5. 19). But the 'bull-roarer' is to my ear—and I have heard Mr Cornford swing it in the darkness with great effect—suggestive of a rising storm-wind rather than of rumbling thunder; cp. Frazer *Golden Bough*³: The Magic Art i. 324 'In some islands of Torres Straits the wizard made wind by whirling a bull-roarer.' A passage quoted by Miss Harrison herself from Aisch. *Edoni frag.* 57, 8 ff. Nauck² (rites of Kotys or Kotyto) *ταυρόφθογοι δ' ὑπομυκῶνται | ποθεν ἐξ ἀφανοῦς φοβεροὶ μῖμοι, | τυπάνου δ' εἰκὼν ὥσθ' ὑπογαίου | βροντῆς φέρεται βαρυταρβῆς* strongly supports the view advanced in the text—that the sound of thunder was made by beating drums of bull's hide.

² Cp. the preceding note and Eur. *Bacch.* 120 ff. *ᾧ θαλάμειμα Κουρή|των ζάθεοι τε Κρήτας | Διογενέτορες ἔναυλοι, | ἐνθα τρικύρυνες ἀντροῖς | βυρόστονον κύκλωμα | τόδε μοι Κορύβαντες ἤηρον · | κ.τ.λ.,* Eustath. *in Il.* p. 771, 54 ff., Hesych. and Zonar. *lex. s.v.* *βυρόστονος*.

³ On the Kouretes as sons of Rhea see O. Immisch in Roscher *Lex. Myth.* ii. 1597 f., where variants are cited.

⁴ Frazer *Golden Bough*² iii. 240 ff., 313 f., *Golden Bough*³: Spirits of Corn and Wild i. 57 n. 2, shows that torches were carried about the fields with the intention of fertilising them, and *Golden Bough*³: The Magic Art ii. 195 ff., 230 ff. collects examples of the

veritable embodiments of the god they must lead a life of ceremonial purity, being so far as men might be husbands of the goddess.

It remains to ask, Whence came the name *Zagrēus*? and What was its significance? The word appears to be an ethnic properly denoting the god (Gilgameš?) of Mount *Zágrōs* or *Zágron*, the great mountain-range that parts Assyria from Media¹. This name, we may suppose, travelled from Mesopotamia *viâ* Phoinike to Crete at about the same time and along much the same route as the Assyrian influences manifest in our shield. From Crete it would readily pass to Argos², and so northwards to the rest of Greece. On reaching Greek soil it was naturally misinterpreted as the 'Mighty Hunter³', a title applicable enough to a prince ripped up by a wild boar⁴. The Cretan god, in fact, so closely resembled his oriental counterpart that he borrowed both his name and his art-type. On the Idaean shield we see Zeus *redivivus*, already perhaps known as Zagreus, in the guise of Gilgameš, the Biblical Nimrod, 'a mighty hunter before the LORD⁵'.

(e) The Cretan Zeus and Human Omophagy.

Dr Frazer after examining the traces of Adonis-worship in Syria, Kypros, etc. reaches the conclusion⁶

'that among Semitic peoples in early times, Adonis, the divine lord of the city, was often personated by priestly kings or other members of the royal family, and that these his human representatives were of old put to death, whether periodically or occasionally, in their divine character....As time went on, the cruel custom was apparently mitigated in various ways, for example, by substituting an effigy or an animal for the man, or by allowing the destined victim to escape with a merely make-believe sacrifice.'

belief in impregnation by means of fire. The use of torches in bridal processions may have been magical as well as utilitarian.

¹ This rather obvious derivation was first, I think, noted by Miss G. Davis in *The Classical Association of Ireland: Proceedings for 1911—1912* p. 23 f. ('Is it too much to see in Zagreus a cult-name of Dionysos or Soma as "the God of Zagros"?').

² At Argos there was a temple of Dionysos *Κρήσιος*, containing a *κεραμέα σορός* of Ariadne (Paus. 2. 23. 7 f.); and it was to the cycle of Argive myth that the *Alkmaionis* belonged.

³ *Et. mag.* p. 406, 46 ff. *Ζαγρεύς...παρὰ τὸ ζα, ἔν' ἧ ὁ πᾶν ἀγρεύων, et. Gud.* p. 227, 37 and Cramer *anecd. Oxon.* ii. 443, 8 *Ζάγρευς· ὁ μεγάλως ἀγρεύων.*

⁴ Farnell *Cults of Gk. States* v. 129 n. ^b says: 'The explanation of the word as "the mighty hunter"—which Euripides may have had in mind in his phrase in the *Bakchai* [1192], ὁ γὰρ ἀναξ ἀγρεύς—is not plausible on religious grounds.' But Dr Farnell has apparently not noticed Dr Rendel Harris' discovery of an Adonis-like Zeus in Crete.

⁵ Gen. 10. 9.

⁶ Frazer *Golden Bough*³: Adonis Attis Osiris² p. 182.

Was there anything analogous to this in the cult of the Cretan Zeus? If I have not misconstrued the evidence, both the human victim and his animal substitute can be detected even in our fragmentary records.

Zeus the princely hunter was slain by a wild boar. The myth was probably localised at Lyttos near Mount Dikte. For not only had Dikte, an older cult-centre than Ide¹, the statue of a beardless Zeus², but silver coins of Lyttos from c. 450 B.C. onwards have on their obverse side an eagle flying, or more rarely standing, on their reverse the head and sometimes the forefoot of a wild boar (fig. 505)³.

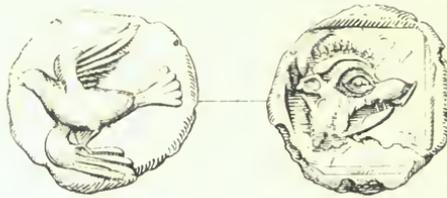

Fig. 505.

The former type obviously alludes to Zeus, the latter to his enemy, the terror and pride of the district. Now Antikleides, a historian of the third century B.C.⁴, stated that the Lyttians sacrificed men to Zeus⁵. The statement was made in his *Nostoi* and, I should conjecture, had reference to the return of Idomeneus king of Lyttos⁶ from the Trojan War. In that war he had played the hero's part, 'equal to a boar in bravery'⁷; and the *Odyssey* brought him home in safety to Crete⁸. But Servius knew of an ugly incident

⁸ *Od.* 3, 191 f. Cp. Diod. 5, 79 (Idomeneus and Meriones) διασωθέντας εἰς τὴν πατρίδα τελευτῆσαι καὶ ταφῆς ἐπιφανοῦς ἀξιοθῆναι καὶ τιμῶν ἀπανάτων. καὶ τὸν τάφον αἰτῶν ἐν τῇ Κνωσῷ δευκύνουσιν, ἐπιγραφὴν ἔχοντα τοιάνδε.—Κνωσίου 'Ἰδομεύης ὄρα τάφον. αἶταρ ἐγὼ τοι | πλησίον ἴδρμαι Μηριόνης ὁ Μόλον. τοῦτους μὲν οἶν ὡς ἥρωας ἐπιφανεῖς τιμῶσιν οἱ Κρήτες διαφερόντως. θύοντες καὶ κατὰ τοὺς ἐν τοῖς πολέμοις κυδίνους ἐπικαλούμενοι Δοητοῖς.

connected with his home-coming. Idomeneus, caught in a storm, had vowed that he would offer to the gods whatever met him first on his return. The first to meet him was his own son, whom according to some he sacrificed as a victim to Zeus, according to others he threatened to sacrifice. On account of this cruelty, or because a pestilence broke out, he was driven from his kingdom by the citizens¹. This tale was very possibly derived from Antikleides' *Nostoi*. In any case it chimes with the statement already quoted from that work, *viz.* that at Lyttos men were sacrificed to Zeus. A further allusion to the same grim custom may lie behind some guarded words of Agathokles, a fifth-century historian², whom Athenaios cites to the following effect³:

'Concerning the sanctity of swine among the Cretans Agathokles the Babylonian in his first book *On Kyzikos* remarks—"It is fabled that the birth of Zeus happened in Crete on Mount Dikte, where also a sacrifice that must not be mentioned takes place. The story goes that a sow suckled Zeus and, grunting as it trotted round the babe, made his whimpers inaudible to those who passed by. Hence all regard this animal as very-holy, and" (says he) "would not eat of its flesh. The Praisians actually make offerings to a pig, and this is their regular sacrifice before marriage." Neanthes of Kyzikos in his second book *On Ritual* gives much the same account.'

¹ Serv. in Verg. *Aen.* 3. 121 Idomeneus [de semine Deucalionis natus,] Cretensium rex, cum post eversam Troiam reverteretur, in tempestate devovit diis sacrificaturum se de re, quae ei primum occurrisset. contigit, ut filius eius primus occurreret: quem cum, ut alii dicunt, immolasset: ut alii [vero], immolare voluisset: [et post orta esset pestilentia,] a civibus pulsus [est] regno, etc., *id. in Verg. Aen.* 11. 264 Idomeneus rex Cretensium fuit: qui cum tempestate laboraret, vovit, se sacrificaturum [Neptuno] de re quae ei primum occurrisset (si reversus fuisset; sed) cum casu ei primum filius occurrisset, quem (mox Iovi) cum, ut alii dicunt, immolasset: ut alii, immolare voluisset, ob crudelitatem regno a civibus expulsus est, Myth. Vat. 2. 210 Idomeneus, Cretensium rex, quum post eversam Troiam reverteretur, devovit propter sedandam tempestatem, sacrificium se dare de hac re, quae ei reverso primum occurreret. contigit igitur, ut filius ei occurreret. quem quum immolasset vel, ut alii dicunt, immolare vellet, a civibus pulsus regno, etc., cp. Myth. Vat. 1. 195 Idomeneus, rex Cretensium, quum post eversam Troiam reverteretur, in tempestate devovit, se sacrificaturum de re, quae ei primum occurrisset. contigit igitur, ut prima filia ei occurreret. quam quum, ut alii dicunt, immolasset; ut alii, immolare voluisset; a civibus pulsus regno, etc. The last of the writers here cited was obviously thinking of Jephthah's vow (Judges 11. 30 ff.).

² E. Schwartz in Pauly—Wissowa *Real-Enc.* i. 758 f. ('Aus diesem Grunde ist er ins 5., spätestens in den Anfang des 4. Jhdts. zu setzen').

³ Athen. 375 F—376 A περί δὲ ὕων, ὅτι ἱερὸν ἐστὶ τὸ ζῶον παρὰ Κρησίην, Ἀγαθοκλῆς ὁ Βαβυλωνίος ἐν πρώτῳ περὶ Κυζίκου [*Agathokles frag.* 2 (*Frag. hist. Gr.* iv. 289 Müller)] φησὶν οὕτως· "μυθεοῦσιν ἐν Κρήτῃ γενέσθαι τὴν Διὸς τέκνωσιν ἐπὶ τῆς Δίκτης, ἐν ἣ καὶ ἀπόρρητος γίνεταί θυσία. λέγεται γὰρ ὡς ἄρα Διὶ θηλὴν ὑπέσχεον ὄν, καὶ τῷ σφετέρῳ γρυσμῶ ἀποριχρῆσθα τὸν κνυσηθμόν τοῦ βρέφους ἀνεπάσιον τοῖς παριοῦσιν ἐλίθει. διὸ πάντες τὸ ζῶον τοῦτο περισεπτον ἡγοῦνται, καὶ οὐ (φησὶ) τῶν κρεῶν <ἀν> δαίσαυντο. Πραῖσιοι δὲ καὶ ἱερὰ βέβουσιν ὑί, καὶ αὕτη προτελής αὐτοῖς ἡ θυσία νεύμισται." τὰ παραπλήσια ἱστορεῖ καὶ Νεάνθης ὁ Κυζικηρὸς ἐν δευτέρῳ περὶ τελετῆς [*Neanthes frag.* 25 (*Frag. hist. Gr.* iii. 8 Müller)], Eustath. *in Il.* p. 773, 14 ff. ἡ δὲ τοῦ Διὸς ὕς ἄλλοίως ἔχει... τερατεύεται γὰρ εἰς ὁμοίον τι πρὸς τὴν αἰγα τὴν θρεψαμένην τὸν Δία, ὡς δηλοῖ ὁ γραφάας ὅτι Διὸς ἐν Κρήτῃ

Agathokles uses of the sacrifice on Mount Dikte practically the same expression as Pausanias uses of the human sacrifice on Mount Lykaion¹.

On Mount Lykaion the human victim was not only killed, but in part eaten at a common feast². Are we to suppose that in Crete the same ghastly rule obtained? And, if it did, what was its purpose? Direct evidence is wanting. But, since the cult of Zeus *Idaios* as early as the fifth century B.C. exhibited Orphic traits³, we may venture to press the analogy of Orphism in Thrace⁴. A red-figured *hydria* from Kameiros, now in the British Museum (pl. xxxvi)⁵, shows Zagreus devoured by the Titans in the presence of Dionysos. The vase is of Athenian fabric and dates probably from the early part of the fourth century B.C. The grotesque style (found also in the slightly earlier vases from the Theban Kabeirion⁶) suggests that the artist has drawn his subject from Dionysiac drama. Sir Cecil Smith describes the scene as follows⁷:

'We see a group of three principal figures. The central one is a bearded man who faces the spectator, dressed in a short chiton girt at the waist; over this is a long cloak decorated with horizontal patterns, including a double band of ivy or vine leaves, and fastened by two flaps knotted on the chest; on his head is a cap which hangs down the back and has a separate flap on each shoulder. With his right hand he raises to his mouth—obviously with the intention of eating—the limb of a dead boy which he has torn from the body that he holds on his left arm. The dead child is quite naked, and its long hair hangs down from the head which falls loosely backward; the lifeless character of the figure is well brought out, in spite of the general sketchiness of the drawing.

τεκνουμένου θηλὴν αὐτῷ ὑπέσχεον ὄς, καὶ τῷ σφετέρῳ γρυσμῷ περιοιχνεύσα τὸν κρυσηθμόν τοῦ βρέφους ἀνεπάϊστον, ἦγον ἀγνωστον, τοῖς παριοῦσιν ἐτίθει. κ.τ.λ.

¹ Cp. Paus. 8. 38. 7 (*supra* p. 70 ff.) ἐπὶ τούτου τοῦ βωμοῦ τῷ Λυκαίῳ Διὶ θύουσιν ἐν ἀπορρήτῳ with Agathokles *loc. cit.* (*supra* p. 653 n. 3) ἐπὶ τῆς Δικτης, ἐν ἣ καὶ ἀπόρρητος γίνεται θυσία.

² *Supra* p. 70 ff.

³ *Supra* p. 647 f.

⁴ The same significance should perhaps be attached to the Cypriote cult of Zeus *Eilapinastés*, the 'Feaster,' and *Splanchnotómos*, the 'Entrail-cutter' (Hegesandros of Delphoi *frag.* 30 (*Frag. hist. Gr.* iv. 419 Müller) *ap.* Athen. 174 A κὰν Κύπρῳ δὲ φησι τιμᾶσθαι Ἡγήσανδρος ὁ Δελφὸς Δία Εἰλαπιναστὴν τε καὶ Σπλαγχνοτόμον, Eustath. *in Od.* p. 1413, 24 καὶ ἐν Κύπρῳ, Δία Εἰλαπιναστὴν καὶ Σπλαγχνοτόμον). A. Bouché-Leclercq *Histoire de la divination dans l'antiquité* Paris 1879 i. 170 explained the title Σπλαγχνοτόμος of the diviner's art; but W. R. Halliday *Greek Divination* London 1913 p. 188 n. 1 rightly points out that Athenaios says nothing here about divination.

⁵ *Brit. Mus. Cat. Vases* iii. 188 no. E 246, Sir Cecil Smith in the *Journ. Hell. Stud.* 1890 xi. 343—351 with two figs.

652¹

Zagreus devoured by the Titans

652²

figured hydria from Kameiros.

See page 654 ff.

On the left advances a figure who is also bearded, and who expresses his surprise at the sight of the central scene by the gesture of his left hand; his long wavy hair, wreathed with vine or ivy, and the thyrsos in his right hand mark him at once as Dionysos. He wears a succinct talaric chiton decorated with vertical stripes.

On the right a bearded personage, attired in the same way as the central figure, runs away to the right, looking back, and extending his left arm as if in surprise. In his right hand he carries a long staff. Part of this figure has been broken away in the only damage which the vase has undergone, but fortunately no important part seems to be wanting.

The dress which distinguishes the two right-hand figures is that which in Greek art is invariably used to characterise the inhabitants of Thrace¹.

But how comes it that the Titans are represented as natives of Thrace? These are not the great divine figures of the Greek Titanomachy, but ordinary human beings—Thracian chieftains or the like. The fact is that the word *Títán*, as F. Solmsen in one of his latest papers points out², meant 'King' and nothing more. It

¹ K. Dilthey in the *Ann. d. Inst.* 1867 xxxix. 179 n. 1 cited Hdt. 7. 75 Θρήϊκες δὲ ἐπὶ μὲν τῆσι κεφαλῆσι ἀλωπεκέας ἔχοντες ἐστρατεύοντο, περὶ δὲ τὸ σῶμα κιθῶνας, ἐπὶ δὲ ζειρὰς περιβεβλημένοι ποικίλας, Xen. an. 7. 4. 4 καὶ τότε δῆλον ἐγένετο οὐ ἕνεκα οἱ Θρήϊκες τὰς ἀλωπεκάς ἐπὶ ταῖς κεφαλαῖς φοροῦσι καὶ τοῖς ὤσι, καὶ χιτῶνας οὐ μόνον περὶ τοῖς στέρνοις ἀλλὰ καὶ περὶ τοῖς μηροῖς, καὶ ζειρὰς μέχρι τῶν ποδῶν ἐπὶ τῶν ἵππων ἔχουσιν, ἀλλ' οὐ χλαμύδας.

² F. Solmsen in the *Indogermanische Forschungen* 1912 xxx. 35 n. 1 *med.*: 'Títán ion. Títḥn...schliesst sich zusammen mit dem Namen des attischen Demos Τίτακίδαι, für den Länge der ersten Silbe durch die Schreibung Τίτακίδαι I G. III 1121 iii 9 (neben Τίττακίδης 2039. 2040) erwiesen wird und den wir trotz des Widerspruchs der antiken Etymologen von dem des attischen Autochthonen Τίτακός Hdt. 9, 73 ableiten dürfen (Töpffer Att. Gen. 289 ff.). Eine Nebenform des letzteren, τίταξ, besser τίταξ, erklärt Hesyeh. durch ἐντίμος ἢ δυνάστης: οἱ δὲ βασιλεῖς; zu ihr steht Τίτων, wie ein 459/8 gefallener Athener Ἐρεχθίδος I G. I 433 iii 53 heisst, in demselben Verhältnis wie Σίλλων zu Σίλλαξ o. S. 8 Anm. 3. Mit der Glossierung von τίταξ vergleicht sich aufs nächste die von τιτῆναι: βασιλίδες, das von dem Lexikographen aus des Aischylos "Ἐκτορος Λύτρα (Fgm. 272 Nck.²) angeführt wird. Aus all dem zusammengenommen ergibt sich für Τίτάν als die richtige Deutung die schon von Preller (Myth.⁴ I, 44 f. Anm. 3) befürwortete: es ist samt den anderen Nomina Weiterbildung von τίτος (πολύ-τίτος Epigramm bei Hdt. 5, 92) 'geehrt, gescheut,' dem Partizip zu τίω τίσω ἐτίσω τετίμενος τίμη (zu ai. cāyati 'scheut, ehrt' cāyáts 'Ehrfurcht bezeugend' W. Schulze Quaest. ep. 355). Der Name hat grade so allgemeinen, farblosen Sinn wie zahlreiche andere Götterbezeichnungen der 'mykenischen' Zeit (Beitr. z. griech. Wortf. I. Teil S. 81 f.).'

I was formerly (*Class. Rev.* 1903 xvii. 177) inclined to accept the conjecture of M. Mayer *Die Giganten und Titanen* Berlin 1887 p. 81 ff. that Τίτάν is a reduplicated form of *Tán, 'Zeus' (Cretan Tāna, Tāvós, etc.). But the reduplication Τί- is insufficiently supported by the alleged parallels (Σίσυφος, κύκνος, πῖψαβσκω).

A. Dieterich in the *Rhein. Mus.* 1893 xlviii. 280 and Miss Harrison *Proleg. Gk. Rel.*² p. 493 f., *Themis* p. 15 have independently suggested that Orphic worshippers, about to tear the sacred bull, daubed themselves with white clay (τίτᾶνος) and were therefore known as *Títānoi, 'White-clay-men,' the name Títāves, 'Titans,' being due to mere confusion on the part of Onomakritos (Paus. 8. 37. 5). It is indeed probable enough that Orphic worshippers smeared themselves with gypsum. But—apart from the fact

was therefore an appropriate appellation of the deities belonging to a bygone age. But it could also be used, as by Aischylos¹, of royalty in general. It would seem, then, that the Titans who devoured Zagreus were simply Thracian dynasts or kings. And we may fairly conjecture that behind the myth as it meets us in literature and art lies a cannibal custom, in accordance with which the chieftains of Thrace actually devoured, in part or in whole, a dismembered child and thereby assimilated the virtue of the newborn god².

If the rite thus evidenced for Thrace once existed in Crete also, we might look to find traces of it at various intermediate points in the Greek archipelago. Nor should we look in vain. Stepping-stones between Thrace and Crete are the islands Tenedos, Lesbos, and Chios. All three had their tradition of men slain, if not actually eaten, in the service of Dionysos. Porphyrios, who draws up a long list of human sacrifices, writes: 'In Chios too they used to rend a man in pieces, sacrificing him to Dionysos *Omádios* ("the god of Raw Flesh"), as they did also in Tenedos, according to Eueipis the Carystian.³ Clement of Alexandria, after recording the Lyttian custom of slaying men for Zeus, continues immediately: 'And Dosidas states that the Lesbians bring the like sacrifice to Dionysos⁴. Euphrantides the seer, who before the battle of Salamis

that the Orphic Titans are never called **Τῑτᾶνοι* or the like—the word used of this action is regularly *γύψος*, not *τίτανος* (see the passages cited by Lobeck *Aglaophamus* i. 653 ff., L. Weniger in the *Archiv f. Rel.* 1906 ix. 241 ff.). No ancient author connects *Τῑτᾶνες* with *τίτᾶνος* till we come to Eustath. *in Il.* p. 332, 23 ff., who states—not that the Titans got their name from *τίτᾶνος*—but that *τίτᾶνος* got its name from the Titans reduced to dust and ashes by the thunderbolts of Zeus. In any case there can be no etymological connexion between the two words.

¹ Hesych. *s.v.* *τιτῆναι* βασιλίδες. < *Δισχύλος Φρυξίν* ins. Soping > ἢ "Ἐκτορος Λύτροις. So also Hesych. *s.vv.* *τιτῆνη* (*τιτῆνη* corr. M. Schmidt) ἢ βασιλισσα and *τίταξ*· ἔντιμος. ἢ *δυνάστης*. οἱ δὲ βασιλεῖς.

² Cp. *Folk-Lore* 1905 xvi. 324 f.: 'Livy [i. 16. 4], after giving the usual tradition that Romulus disappeared in a thunderstorm, mentions the "very obscure tale" that he was torn to pieces by the hands of the fathers. Plutarch [*v. Rom.* 27] too, though persuaded that Romulus was caught up to heaven, records the belief that the senators had fallen upon him in the temple of Vulcan and divided his body between them, every man carrying away a portion of it in his robe. Dionysius [*ant. Rom.* 2. 56] says much the same, though he makes the senate-house the scene of the murder, and adds that those who carried away the king's flesh in their garments buried every man his fragment in the earth.'

³ Porph. *de abst.* 2. 55 = Euseb. *praep. ev.* 4. 16. 5 *ἔθνον δὲ καὶ ἐν Χίῳ τῷ Ὀμαδίῳ Διονύσῳ ἀνθρώπων διασπῶντες, καὶ ἐν Τενέδῳ, ὡς φησὶν Εὐελπίς ὁ Καρύστιος* (Eueipis *frag.* 1 (*Frag. hist. ⁴ Clem. Al. *protr.* 3. 42. 5 p. 32, 5 f. Stählin = Euseb. *praep. ev.* 4. 16. 12 *καὶ Λεσβίου*

bade Themistokles sacrifice three noble Persians to Dionysos *Omestés* ("the Eater of Raw Flesh")¹, had these and perhaps other such cases in mind.

On the whole it seems likely enough that in Crete the part of Zagreus was originally played by a human victim, who was not only killed but eaten by the local king or kings. A remarkable passage in the *Odyssey* describes Minos as a sort of ogre². Commentators usually explain that he acquired this evil name on account of the cruel tribute exacted by him from the Athenians.

τὴν ὁμοίαν προσάγειν θυσίαν Δωσίδας λέγει (Dosiades frag. 5 (*Frag. hist. Gr.* iv. 400 Müller)).

¹ Plout. *v. Them.* 13 Θεμιστοκλεῖ δὲ παρὰ τὴν ναυαρχίδα τριήρη σφαγιαζομένην τρεῖς προσήθησαν αἰχμάλωτοι, κάλλιστοι μὲν ιδέσθαι τὴν ὄψιν, ἐσθῆσι δὲ καὶ χρυσῷ κεκοσμημένοι διαπρεπῶς. ἐλέγοντο δὲ Σανδαύκης παῖδες εἶναι τῆς βασιλέως ἀδελφῆς καὶ Ἀρταύκτου. τούτους ἰδὼν Εὐφραντίδης ὁ μάντις, ὡς ἅμα μὲν ἀνέλαμψεν ἐκ τῶν ἱερῶν μέγα καὶ περιφανὲς πῦρ, ἅμα δὲ πταρμὸς ἐκ δεξιῶν ἐσήμνηε, τὸν Θεμιστοκλέα δεξιωσάμενος ἐκέλευσε τῶν νεανίσκων κατάρξασθαι καὶ καθιερεῖσθαι πάντας Ὀμηστῆ Διονύσῳ προσευξάμενον· οὕτω γὰρ ἅμα σωτηρίαν τε καὶ νίκην ἔσεσθαι τοῖς Ἑλλήσιν. ἐκπλαγέντος δὲ τοῦ Θεμιστοκλέους ὡς μέγα τὸ μάντευμα καὶ δευρὸν, ὅσον εἴθην ἐν μεγάλοις ἀγῶσι καὶ πράγμασι χαλεποῖς, μᾶλλον ἐκ τῶν παραλόγων ἢ τῶν εὐλόγων τὴν σωτηρίαν ἐλπίζοντες οἱ πολλοὶ τὸν θεὸν ἅμα κοινῇ κατακαλοῦντο φωνῇ καὶ τοὺς αἰχμαλώτους τῷ βωμῷ προσαγαγόντες ἠνάγκασαν, ὡς ὁ μάντις ἐκέλευσε, τὴν θυσίαν συντελεσθῆναι. ταῦτα μὲν οὖν ἀνὴρ φιλόσοφος καὶ γραμμάτων οὐκ ἄπειρος ἱστορικῶν Φανίας ὁ Λέσβιος εἶρηκε (*Phanias frag.* 8 (*Frag. hist. Gr.* ii. 295 Müller)), Plout. *v. Pelop.* 21 ἔτι δὲ τοὺς ὑπὸ Θεμιστοκλέους σφαγιασθέντας Ὀμηστῆ Διονύσῳ πρὸ τῆς ἐν Σαλαμίῳ ναυμαχίας, Plout. *v. II.* p. 109, 1 ff. Hermann (printed at the end of Draco Stratonicensis *liber de metris poeticis* ed. G. Hermann Lipsiae 1812) τοιαύτας ἦν θυσίας ἐπιτελῶν ὁ ἐπὶ τοῦ Ξέρξου Εὐφραντίδης μάντις τῶν Ἀθηναίων, καὶ Μεγιστίας ὁ Ἀκαρνάν· καὶ Πλούταρχος μὲννηται ποῦ τοιαύτην θυσίαν ποιῆσαι Τίτον καὶ Οὐαλλέριον, τοὺς Βρούτου υἱοὺς καὶ τοὺς Κολλατίου ἀνεψιούς, ἀνθρώπων ἀποσφάζαντας καὶ τῶν ἐγκάτων αὐτοῦ γευσαμένους· καὶ αὕτη μὲν ἦν ἡ παλαιὰ ἱερατικῆ. Phanias of Eresos was a pupil of Aristotle and a painstaking historian (*W. Christ Geschichte der griechischen Litteratur*⁵ München 1911 ii. 1. 59 f.), and such sacrifices in time of war were not unknown (see the context in Plout. *v. Pelop.* 21). It is only too probable that the Persian youths met their fate as described by Plutarch.

Cp. also Plout. *v. Ant.* 24 εἰς γούν Ἐφεσον εἰσόντος αὐτοῦ γυναῖκες μὲν εἰς Βάκχας, ἄνδρες δὲ καὶ παῖδες εἰς Σατύρους καὶ Πάνας ἠγούντο διεσκευασμένοι, κητῶ δὲ καὶ θύρῳν καὶ ψαλτηρίων καὶ συρίγγων καὶ αὐλῶν ἢ πόλεις ἦν πλέα, Διόνυσον αὐτὸν ἀνακαλουμένων Χαριδότην καὶ Μειλίχιον. ἦν γὰρ ἀμέλει τοιοῦτος ἐνίοις, τοῖς δὲ πολλοῖς Ὀμηστῆς καὶ Ἀργιῶνιος. ἀφηρέϊτο γὰρ εὐγενεῖς ἀνθρώπους τὰ ὄντα μαστιγίαις καὶ κόλαξι χαριζόμενος. κ.τ.λ., Plout. *de coh. id.* ita 13 ὁ γὰρ τοῦ θεοῦ νάρθηξ ἱκανὸς κολαστῆς τοῦ μεθύοντος, ἀν μὴ προσγενόμενος ὁ θυμὸς Ὀμηστῆν καὶ Μαινόλην ἀντὶ Λυαίων καὶ Χορείου ποίσησιν τὸν ἄκρατον, Apostol. 18. 59 Ὀμηστῆς (Ὀμηστῆς Pantinus, Walz) Διόνυσος· ἐπὶ τῶν ὠμύτατα καὶ ἀπανθρωπώτατα πραττόντων· τούτῳ γὰρ ζῶντας ἀνθρώπους ἔθουσι οἱ πάλα, *Anth. Pal.* 9. 524. 25 ὄριον, ὠμηστῆν, κ.τ.λ. (*anon. h. Dion.*), Schöll—Studemund *anecd.* i. 268 ἐπίθετα Διονύσου...43 Ὀμηστῶ.

² *Od.* 11. 322 Μίνως ὀλοόφρωνος. The scholiasts *ad loc.* are puzzled: schol. Q. καὶ πῶς "Μίνωα εἶδον Διὸς ἀγλαῶν υἱόν"; schol. T. πῶς οὖν θεμιστεύει ἐν τοῖς νεκροῖς ὀλοόφρων ὢν;

But in the Berlin fragment of Euripides' *Cretans* Pasiphae says to him :

Wherefore if in the deep
Thou art fain to fling me, fling : full well thou knowest
The shambles and the murdering of men.
Or if thou longest to eat this flesh of mine
Raw, thou mayest eat : feast on and take thy fill¹.

These words can hardly refer to the Minotaur and his victims. Or, if they do, what after all is implied by the tradition that the

Fig. 506.

Minotaur devoured youths and maidens? We have taken him to be the Cnossian crown-prince masquerading in a solar dance². He too, like the Thracian chieftains, may have renewed his magic powers by tasting of human flesh³.

The memory of such enormities is slow to fade. A sarco-

its rise in a grim reality and then, as civilisation increased, passed through the successive
stages of tragic grandiloquence and comic bombast.

phagus(?)-relief in the Villa Albani (fig. 506)¹ shows portions of two scenes from Cretan legend. On the right is one of the Kourétes guarding the infant god. On the left three Titans make their murderous attack on Zagreus².

(ζ) The Cretan Zeus and Bovine Omophagy.

But to the Greek or Roman of classical times human sacrifice in general and cannibalistic omophagy in particular was a half-forgotten piece of barbarism³. A possible substitute for the victim was an ox⁴. A case in point is the curious sacrifice of a bull-calf at Tenedos, concerning which Aelian⁵ writes:

'The Tenedians keep a pregnant cow for Dionysos *Anthroporhatstes*, "Smiter of Men," and, when it has brought forth, they tend it like a woman in child-bed. But the new-born young they sacrifice, after binding buskins upon its feet. The man who strikes it with the axe, however, is pelted with stones by the populace and runs away till he reaches the sea.'

In this singular rite the calf dressed in buskins was obviously the surrogate for a human victim in Dionysiac attire. We must suppose that originally a child, not a calf, was struck by the axe. And this raises the question whether the axe that struck him was not the very embodiment of the god, Dionysos 'Smiter of men⁶.'

¹ G. Zoega *Li bassirilievi antichi di Roma* Roma 1808, ii. 170 ff. pl. 81, F. Lenormant in the *Gaz. Arch.* 1879 v. 28 f. fig., Reinach *Rép. Reliefs* iii. 136 no. 3.

² Helbig *Guide Class. Ant. Rome* ii. 90 no. 854 takes them to be 'rustics with beards, whipping a naked boy'! But why three of them (of the third the left foot only is seen)? And why such a frantic attitude on his part? Very different is the young Satyr lashed by Silenos on a sarcophagus representing the education of Dionysos (Stuart Jones *Cat. Sculpt. Mus. Capit. Rome* p. 117 ff. no. 46 a pl. 24). Even if it could be proved that we have in the Albani relief merely a *genre-scene*, it would still remain probable that the type was based on a mythological *Vorbild*.

³ See e.g. Gruppe *Gr. Myth. Rel.* p. 922 ff. and Index s.v. 'Menschenopfer' for the Greek evidence, Prof. J. S. Reid 'Human Sacrifices at Rome and other notes on Roman Religion' in the *Journ. Rom. Stud.* 1912 i. 34 ff. for the Roman.

⁴ Porph. *de abst.* 2. 54 f. = Euseb. *praep. ev.* 4. 16. 2 f. (of the man sacrificed at Salamis in Kypros to Agraulos 'or Diomedes) τούτων δὲ τὸν θεομὸν Δίφιλος ὁ τῆς Κύπρου βασιλεὺς κατέλυσε, κατὰ τοὺς Σελεύκου χρόνους τοῦ θεολόγου γενόμενος, τὸ ἔθος εἰς βουθησίαν μεταστήσας. προσήκατο δ' ὁ δαίμων ἀντὶ ἀνθρώπου τὸν βοῦν· οὕτως ἰσάζειν ἔστιν τὸ δρῶμενον, *supra* p. 417 n. 5.

⁵ Ail. *de nat. an.* 12. 34 Τενέδιοι δὲ τῷ Ἀνθρωπορραστῆ Διονύσῳ τρέφουσι κύουσαν βοῦν, τεκοῖσαν δὲ ἄρα αὐτὴν οἷα δήπου λεχῶ θεραπεύουσι. τὸ δὲ ἀριγενὲς βρέφος καταθύουσι ὑποδήσαντες κοθρόνους. ὃ γὰρ μὴν πατάξας αὐτὸ τῷ πελέκει λίθους βάλλεται δημοσίᾳ, καὶ ἔσπε ἐπὶ τὴν θάλατταν φέυγει.

Strattis the comedian wrote a play entitled Ἀνθρωπορραστῆς, of which two fragments are extant (*Frag. com. Gr.* i. 224, ii. 763 f. Meineke).

⁶ Farnell *Cults of Gk. States* v. 164 f. says: 'the cult-term ἀνθρωπορραστῆς... must be interpreted as the "render of men."' But this is a somewhat inexact translation apparently based on the ritual of Dionysos Ὠμάδιος in the same island (*supra* p. 656). The verb

Later¹ we shall find reason to conclude that such was indeed the case, and that in Tenedos Dionysos was worshipped in the form of a double-axe. Moreover we shall have occasion to note the close resemblance of the Tenedian axe-cult to the axe-cults of 'Minoan' Crete.

Comparing, now, these ritual facts with the Orphic myth of Dionysos or Zagreus done to death in bovine shape, we can hardly doubt that in Crete too anthropophagy was early commuted into some less horrible rite, say the rending and eating of a bull. There was indeed much to connect the Cretan Zeus with this beast. At Praisos, an Eteo-Cretan town with a temple of Zeus *Diktaios*², silver coins were struck *c.* 450—400 B.C. with the obverse type of a cow suckling an infant, who has been commonly and rightly identified as Zeus³ (figs. 507⁴, 508⁵). At Phaistos a *statér* of

Fig. 507.

Fig. 508.

highly picturesque style, which may be dated *c.* 430 B.C., shows Europe sitting on a rock and greeting the bull-Zeus with uplifted

βαλ is 'to strike' rather than 'to rend,' cp. *βαιστήρ*, 'a hammer,' and the compounds *θυμοραϊστής*, *Ἰλιορραστής*, *κυνοραϊστής* or *κυνορραστής*, *μητρορραστής*, etc. quoted by Meineke *op. cit.* i. 224.

³ Zeus enthroned with sceptre and eagle appears on the obverse of silver coins of Praisos from *c.* 400 B.C. onwards: he is often accompanied by a bull on the reverse, and is described by Mr W. Wroth and Dr B. V. Head as Zeus *Diktaios* (J. N. Svoronos *Numismatique de la Crète ancienne* Macon 1890 i. 288 f. pl. 27, 21—28, 28, 1, *Brit. Mus. Cat. Coins* Crete etc. p. 70 f. pl. 17, 8 f., *Hunter Cat. Coins* ii. 196 pl. 42, 19, *Head Hist. num.*² p. 476).

⁴ E. Babelon in the *Rev. Num.* iii Série 1885 iii. 161 pl. 8, 8 (Paris), J. N. Svoronos *op. cit.* i. 286 pl. 27, 2, *Head Hist. num.*² p. 475.

⁵ H. Weber in the *Num. Chron.* Third Series 1896 xvi. 18 f. pl. 2, 10, *Head Hist. num.*² p. 475.

hand (fig. 509)¹. At Gortyna coins of about the same period and of even greater artistic merit represent their union as consummated in the sacred tree². Not unnaturally, therefore, when in the service of Zeus a substitute was required for the human Zagreus, the animal chosen was a bull. The resultant rites are described by Firmicus Maternus in a passage of great and even painful interest,

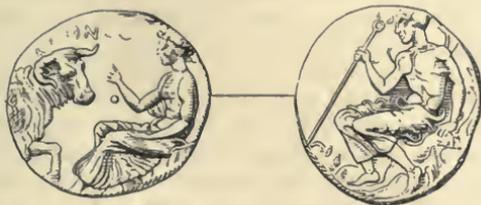

Fig. 509.

though written of course from the view-point of a Christian Euhemerist. Firmicus, dilating *On the Error of Profane Religions* for the benefit of the emperors Constantius and Constans (between 343 and 350 A.D.), expresses himself as follows³:

'There are yet other superstitions, the secrets of which must be set forth—to wit, those of Liber and Libera. And here I must convey to your sacred senses a systematic account with full details, that you may realise how in these profane religions too sanctity attaches to the death of men. Liber, then, was the son of Jupiter a Cretan king. Though born of an adulterous mother, he was reared by his father with more care than he deserved. The wife of Jupiter, Iuno by name, fired with the feelings of a step-mother, tried all manner of tricks to kill the child. The father on going abroad, well aware of his wife's smouldering rage and anxious to avoid guile on the part of the angry woman, entrusted his son to suitable guardians, as he supposed. Iuno, judging this a fitting opportunity for her designs and being more than ever incensed because the father on setting out had left both throne and sceptre to the boy, first bribed his guardians with royal rewards and gifts, and next stationed her minions called Titans in the heart of the palace and, by dint of rattles and a cleverly made mirror, so beguiled the fancy of the child that he left his kingly seat and, thanks to his childish desire, was led on to their place of ambush. Here he was caught and butchered; and, that no vestige of the murder should be found, the band of minions cut up his limbs joint by joint and divided them among themselves.

¹ J. N. Svoronos *op. cit.* i. 254 f. pl. 22, 35—37, *Brit. Mus. Cat. Coins Crete etc.* p. 61 pl. 14, 16, *Head Hist. num.*² p. 473. The reverse represents Hermes seated on a tree-stump (?) with a *caduceus* in his right hand and a *pétasos* hanging from his shoulders. I figure a specimen in the McClean collection.

Other silver coins of the same town show obv. forepart of bull, rev. head of Europe (J. N. Svoronos *op. cit.* i. 255 pl. 23, 1, *Brit. Mus. Cat. Coins Crete etc.* p. 41 pl. 10, 9 attributed wrongly to Gortyna), or obv. head of Europe, rev. forepart of bull kneeling (J. N. Svoronos *op. cit.* i. 255 pl. 23, 4, *Hunter Cat. Coins* ii. 192 pl. 42, 12, *Head Hist. num.*² p. 473).

² *Supra* p. 527 ff. figs. 391 ff.

³ Firm. Mat. 6. 1—5.

Then, to add crime to crime, since they were much afraid of the tyrant's cruelty, they boiled the boy's limbs with various ingredients and devoured them. Thus they actually fed upon a human corpse—a repast never heard of till that day. His sister, Minerva by name, who had herself been party to the deed, kept his heart as her share, that she might have clear proof of her story and something to mollify her father's wrath. So, when Jupiter came back, his daughter told him the tale of crime from beginning to end. Thereupon her father, exasperated by the disastrous murder of the boy and by his own bitter grief, slew the Titans after torturing them in various ways. Indeed, to avenge his son, he had recourse to every form of torment or punishment. He ran riot in exacting all kinds of penalty by way of vengeance for the death of a son, who was none too good. The father's affection and the tyrant's power were here combined. Then, because he could no longer bear the tortures of grief and because the pain of his bereavement could not be assuaged or comforted, he made an image of his son moulded in gypsum, and placed the boy's heart, by means of which on the sister's information the crime had been detected, in that part of the figure where the contour of the chest was to be seen. After this he built a temple in front of the tomb and appointed as priest the boy's tutor: Silenus was his name. The Cretans, to soothe the fierce mood of the angry tyrant, instituted certain days as a funeral feast and coupled a yearly rite with a celebration on alternate years, performing in order due all that the boy had done or suffered at his death. They tore a live bull with their teeth, recalling the savage banquet by a yearly commemoration of it. They penetrated the solitudes of the forest uttering discordant cries and so feigning madness, that the crime might be set down to lunacy, not to guile. Before them was carried the basket in which the sister had concealed and hidden the heart. With the music of pipes and the clash of cymbals they got up a make-belief of the rattles by which the boy had been deluded. And so a servile people paying court to a tyrant made his son a god, though a god could never have had a tomb.⁷

The Euhemerism of this passage will be readily discounted. We are indeed likely to underestimate rather than to overestimate its importance. After all Euhemerus, to judge from the extant fragments of his famous work, seems to have based his theory of apotheosised kings in no small measure upon Cretan tradition¹. The priests of his island utopia claim descent from Crete and appeal for proof to their Cretan dialect². His Zeus *Triphýlios* has a couch, on which is set no effigy of the god, but a great golden pillar covered with records in a script resembling Egyptian hieroglyphs³. One may well suppose that Euhemerus had at least an inkling of the old-time glories of 'Minoan' Crete—its pillar-thrones, its aniconic cults, its linear pictographs. And, if he said that Zeus was a Cretan king when he ought to have said that Cretan kings played the part of Zeus, we can easily make allowance for the error.

¹ In the *Class. Rev.* 1903 xvii. 406 and in *Folk-Lore* 1904 xv. 304 I suggested that the Euhemeristic belief in Zeus as a former king of Crete was based on the divine kingship of Minos.

² Diod. 5. 46.

³ Diod. 5. 46, 6. 1.

Euhemerism apart, we note three points in Firmicus' account of the Cretan ritual¹. It was dramatic; it was sacramental; and it was, to his thinking at least, self-contradictory. It was dramatic; for every year one might see the Cretans 'performing in order due all that the boy had done or suffered at his death.' It was sacramental; for they tore the live bull with their teeth in memory of the Titans feasting upon his flesh. And it was self-contradictory; for the boy, though dead and buried, was yet living and a god to boot. The closing sentence of Firmicus recalls the panegyric of Zeus attributed to Minos:

'A grave have fashioned for thee, O holy and high One, the lying Kretans, who are all the time liars, evil beasts, idle bellies; but thou diest not, for to eternity thou livest, and standest; for in thee we live and move, and have our being².'

¹ Firm. Mat. 6. 5 Cretenses, ut furentis tyranni saevitiam mitigarent, festos funeris dies statuunt et annum sacrum trieterica consecratione componunt, omnia per ordinem facientes quae puer moriens aut fecit aut passus est. vivum laniant dentibus taurum, crudeles epulas annuis commemorationibus excitantes, et per secreta silvarum clamoribus dissonis eiulantes fingunt animi furentis insaniam, ut illud facinus non per fraudem factum sed per insaniam crederetur: praefertur cista, in qua cor soror latenter absconderat, tiliarum cantu et cymbalorum tinnitu crepundia quibus puer deceptus fuerat mentiuntur. sic in honorem tyranni a serviente plebe deus factus est qui habere non potuit sepulturam.

² *Supra* p. 157 n. 3. In the *Expositor* 1912 pp. 348—353 Dr J. Rendel Harris publishes a fuller version of the Theodorean matter, which he had previously cited from the *Gannat Busamé*. The new extract is found in the commentary of Isho'dad, the Nestorian church-father, upon the *Acts of the Apostles* and is rendered: "The Interpreter [*i.e.* Theodore of Mopsuestia] says that the Athenians were once upon a time at war with their enemies, and the Athenians retreated from them in defeat; then a certain Daimon appeared and said unto them, I have never been honoured by you as I ought; and because I am angry with you, therefore you have a defeat from your enemies. Then the Athenians were afraid, and raised up to him the well-known altar; and because they dreaded lest this very thing should have happened to them, that they had secretly neglected one who was unknown to them, they erected this altar and also wrote upon it, *Of the Unknown and Hidden God*: wishing, in fact, to say this, that though there is a God in whom we do not believe, we raise this altar to His honour that He may be reconciled to us, although He is not honoured as a known deity: therefore Paul did well to take a reason from this and to say before them, *This hidden God, to whom ye have raised an altar without knowing Him, I have come to declare unto you*. There is no God whom ye know not, except the true God, who hath appointed the times by His command, and hath put bounds, etc." [*He hath determined the times*, that is to say, the variations of summer and winter, spring and autumn.]

"*In Him we live and move and have our being*: and, as certain also of your own sages have said, *We are his offspring*." Paul takes both of these quotations from certain heathen poets.

Now about this passage, "*In Him we live and move and have our being*": the Cretans said about Zeus, as if it were true, that he was a prince, and was lacerated by a wild boar, and was buried; and behold! his grave is known amongst us; so Minos, the son of Zeus, made a panegyric over his father, and in it he said:

The Cretans have fashioned a tomb for thee, O Holy and High!
Liars, evil beasts, idle bellies;
For thou diest not; for ever thou livest and standest;
For in thee we live and move and have our being.

These lines, quoted from a lost hexameter poem by Epimenides (?), seem at first sight to be a flat negation of the Cretan faith, opposing to it a later and nobler conception of the deity. But, as spoken by Minos, they more probably preserve to us the view taken by the genuine mystic of Idaean Zeus. If so, we may be very sure that they contain no vague transcendental philosophy, but the main point and purpose of the Cretan cult. In early days the child that represented the god re-born, in later times the bull that served as his surrogate, was essentially a focus of divine force. Those who tasted of the sacred flesh and blood thereby renewed their life, their movement, their very being; for they became one with the god whom they worshipped. Such a belief, though primitive in its inception, was obviously capable of further development. Paul, when preaching at Athens, quoted the words of Minos and attached to them in perpetuity a significance at once deeper and higher. He must have been aware that the fine concluding phrase referred originally to the Cretan Zeus; for elsewhere² he cites Minos' description of the Cretans as given in the same context. Nay more, with the next breath³ he adduces from Aratos a line in which

So the blessed Paul took this sentence from Minos; and he took the quotation,

"We are the offspring of God."

from Aratus, a poet who wrote about God, and about the seven [planets] and the twelve [signs]: saying, "From God we begin, from the Lord of heaven, that is Zeus: for all markets, and seas, and havens are filled with His name: and also in every place, all men are in want of Him, because we are His offspring; and He out of His goodness giveth good signs to us and to all men. He moves us to come forward to work; and He ordains all that is visible and invisible: and because of this we all worship Him, and say, 'Hail to thee, our Father, wonderful and great!'"

"Plato also and others say that souls are by nature from God."⁴

¹ Dr Rendel Harris refers them to the poem of 4000 lines written by Epimenides *πρὸς Μῖνον καὶ Ραδαμάνθου* (Diog. Laert. 1. 112). H. Diels *Die Fragmente der Vorsokratiker*² Berlin 1912 ii. 188 f. conjectures that the line *Κρήτες αἰὶ ψεύσται, κακὰ θηρία, γαστέρες ἀργαί*, cited by Paul in Tit. 1. 12, came from the *proimion* of Epimenides' *Τὴν οὐρανὸν* (Diog. Laert. 1. 111 *ἐποίησε δὲ Κορήτων καὶ Κορυβάντων γένησιν καὶ θεογονίαν, ἐπιη πεντακισχίλια*): and O. Kern in Pauly *Real-Enc.* vi. 176 agrees with him. But Dr Rendel Harris in the *Expositor* 1907 p. 336 f. acutely conjectures that the early Cretans ate their deity sacramentally under the form of a pig: and...that, as in so many similar cults, they ate the animal raw. This would at once explain why Epimenides called them not only liars, but also beasts and gluttons.

Putting together Callim. *h. Zeus* 8 f., Acts 17. 28, and Tit. 1. 12, we may venture to restore the original text in some such form as the following: *σοὶ μὲν ἐτεκτήναντο τάφον, πανίπερτατε δόσιμον. | Κρήτες αἰὶ ψεύσται, κακὰ θηρία, γαστέρες ἀργαί: | ἀλλὰ γὰρ οὐ σὺ θῆρες. ζῶεις δὲ καὶ ἴστασαι αἰεὶ. | ἐν σοὶ γὰρ ζῶμεν καὶ κινούμεσθα καὶ εἰμέν. Dr Rendel Harris in the *Expositor* 1907 p. 337 f. (cp. *ib.* 1912 p. 350) restores: *τύμβιον ἐτεκτήναντο πῶλον, κίδιστε, μέγιστε. | Κρήτες, αἰὶ ψευδεῖς, κακὰ θηρία, γαστέρες ἀργαί. | ἀλλὰ σὺ γ' οὐ θηρικός. ἴστηκας γὰρ ζῶς αἰεὶ. | ἐν γὰρ σοὶ ζῶμεν καὶ κινούμεθ' ἤδη καὶ ἐσμέν.**

² Tit. 1. 12.

³ Acts 17. 28 *ἐν αὐτῷ γὰρ ζῶμεν καὶ κινούμεθα καὶ ἐσμέν, ὡς καὶ τινες τῶν καθ' ὑμᾶς*

that Tarsian poet, speaking on behalf of the whole human race, claims kinship with Zeus—Zeus that made the stars, Zeus that was born as a babe in Crete.

(η) The Origin of Tragedy.

The cult of Zeus annually reborn as Dionysos spread, with some variety of circumstance, throughout a large area of ancient Greece. Side by side with the bull it utilised other animals, especially the goat¹. The Praesian tradition that the infant Zeus was suckled by a cow² was overshadowed by the common belief that his nurse had been a goat³. The Bacchantes are said to have torn asunder oxen and devoured their flesh raw⁴, but sometimes also to have treated goats in like manner⁵. And such was the type of Maenad idealised

ποιητῶν εἰρήκασιν τοῦ γὰρ καὶ γένος ἐσμέν. There may be a side glance at Kleantes. *h. Zeus* (*frag.* 48 Pearson) 4 ἐκ σοῦ γὰρ γένος ἐσμέν. But it is clear that the main reference is to the apostle's fellow-citizen Arat. *phaen.* 4 f. πάντη δὲ Διὸς κεχρημέθα πάντες· τοῦ γὰρ καὶ γένος εἰμέν. Note also, that Aratos introduces Zeus as Lord of the Stars, thereby recalling the Cretan Zeus *Astérios* (*supra* p. 545 ff.), and that he actually goes on to describe the birth and rearing of Zeus in Crete.

⁵ Aisch. *Edoni frag.* 64 Nauck² *ap.* Hesych. *s.v.* αἰγίξεν· διασπᾶν. ἐκ μεταφορᾶς παρ' ὃ καὶ τὸ αἰγίξασθαι, ἀπὸ τῶν καταιγίδων. Αἰσχύλος. ὃ δ' αὐτὸς ἐν Ἡδωνοῖς καὶ τὰς νεβρίδας οὕτω λέγει, cp. Soud. *s.v.* αἰγίξεν, Ἡδωνῆς, Zonar. *lex. s.v.* αἰγίξεν. The same custom is probably implied by Hesych. *s.v.* τραγήφοροι· αἱ κόραι Διονύσου ὀργιάζουσαι τραγῆν περιήπτοντο and perhaps also by the cult-legend of Paus. 2. 23. 1. But the most definite statement is that of Arnob. *adv. nat.* 5. 19 Bacchanalia etiam praeter-

by Skopas¹. The variation, which implies that the worshippers lived among neat-herds and goat-herds respectively, is of importance, because it enables us to gain some insight into that vexed question, the origin of Greek tragedy.

The two Athenian festivals prominently connected with tragedy were the Lenaia in Gamelion (January to February) and the City Dionysia in Elaphebolion (March to April). The one, being held in winter when the sea was dangerous for voyagers, was a domestic celebration, confined to the Athenians themselves. The other, being held in spring when visitors from all parts of Greece came crowding into Athens, was a much more splendid affair². It is, however, to the Lenaia rather than to the City Dionysia that we must look for the first beginnings of tragedy. For the former was throughout of a more primitive character than the latter. Dr Farnell³ justly lays stress on the fact that, whereas the City Dionysia was under the control of the *Archon*, the Lenaia was managed by the *Basileus*. He also points out that the winter-month corresponding with Gamelion in the calendar of all the other Ionic states was Lenaion, and infers that the Lenaia was already a conspicuous festival in the period preceding the Ionic migration. Finally he observes that the Lenaia was virtually the Rural Dionysia of Athens⁴; for the Lenaia is not known to have been held in the demes or country-districts and *en revanche* the Rural Dionysia was not held under that name at Athens.

The exact site of the *Lenaion* is still uncertain, and will be settled only by future excavation⁵. But this we know, that the

mittemus immania (*inania* codd.) quibus nomen Omophagiis Graecum est, in quibus furore mentito et sequestrata pectoris sanitate circumplicatis vos anguibus, atque ut vos plenos dei numine ac maiestate doceatis, caprorum reclamantium viscera cruentatis oribus dissipatis. ² A. E. Haigh *The Attic Theatre*² Oxford 1898 p. 38.

³ Farnell *Cults of Gk. States* v. 212 ff.

⁴ This is the fact which (*pace* Prof. U. von Wilamowitz-Moellendorff in *Hermes* 1886 xxi. 615 n. 1) underlies the statements of Steph. Byz. *s.v.* Λήναιος ἀγών Διονύσου ἐν ἀγροῖς ἀπὸ τῆς ληνού· Ἀπολλόδωρος ἐν τρίτῳ Χρονικῶν (Apollod. *frag.* 58 (*Frag. hist. Gr.* i. 437 Müller)), schol. Aristoph. *Ach.* 202 ἀξω <τὰ> κατ' ἀγροῦς· τὰ Λήναια λεγόμενα. εὐθεν τὰ Λήναια καὶ ὁ ἐπιλήναιος ἀγὼν τελεῖται τῷ Διονύσῳ. Λήναιον γὰρ ἐστὶν ἐν ἀγροῖς ἱερὸν τοῦ Διονύσου, κ.τ.λ., 503 τὸ δὲ δεύτερον ἐν ἀγροῖς, ὁ ἐπὶ Ληναίῳ λεγόμενος, κ.τ.λ.: see A. Frickenhaus in the *Jahrb. d. kais. deutsch. arch. Inst.* 1912 xxvii. 82 f.

⁵ On this complicated problem read by all means the lucid accounts of W. Judeich *Topographie von Athen* München 1905 p. 263 n. 10 (who inclines to place the *Lenaion*

Lénaion itself was a large precinct containing a sanctuary of Dionysos *Lénaios*, where contests were held before the Athenian theatre was built¹. The said contests doubtless took place in the 'Lenaean theatre'² and were transferred at a later date, which however cannot be precisely determined, to the theatre on the southern slope of the Akropolis.

Recent discussion has made it clear that the names *Lénaion*, *Lénaia*, *Lénaios* are derived—as Ribbeck suggested³—from *lénai*, the 'wild women' or Maenads of Dionysos⁴. The supposed con-

somewhere in the valley between the Areios Pagos and the Pnyx, near to the spot where in Roman times stood the hall of the Iobakchoi) and of A. W. Pickard-Cambridge in A. E. Haigh *The Attic Theatre*³ Oxford 1907 pp. 368—378 (who concludes (a) 'that the old Lenaia performances took place in a temporary wooden theatre in (or by) the market-place—wherever this was,' and (b) that 'it is still possible that the Lenaean was once outside the walls, and afterwards came to be included in their circuit'). A. Frickenhaus, however, in the *Jahrb. d. kais. deutsch. arch. Inst.* 1912 xxvii. 80 ff. and in his *Winckelmanns-fest- Progr. Berlin* lxxii. 29 ff. has lately advanced cogent arguments for locating the *Lénaion* outside the Themistoclean wall close to the Dipylon Gate.

Ἄθηνα is found twice as a woman's name on early funeral *stelai* in the Corinthian colony Ambrakia (U. Köhler in *Hermes* 1891 xxvi. 148 f. nos. 4 Ἄθηνα | Ἀπολλοδώρου, 5 Ἄθηνα | Δαμοφίλου, Collitz—Bechtel *Gr. Dial.-Inscr.* iii. 1. 82 no. 3183 n.). Other related names are Ἀθηναῖς (*Inscr. Gr. sept.* ii no. 1253 a, 1 on a marble *stèle* from Phalanna, *Corp. inscr. Att.* iii. 1 no. 1091, 38, no. 1138, 39, iii. 2 no. 2175, 1, *Inscr. Gr. Sic. II.* no. 2414, 39 on a *lessera* in the British Museum, no. 2447 on a marble *stèle* from Marseille), Ἀθηναῖος or Ἀθηναῖς (E. Sittig *De Graecorum nominibus theophroris* Halis Saxonum 1911 p. 90 f. cites numerous examples from many parts of the Greek world),

nexion with *lenós*, a 'wine-press,' defies both philology and common sense¹. At most we can admit that the jingle between *lénai* and *lenós* led the populace in ancient times, as it has led the learned in modern times, to confuse two words which in their origin and usage were entirely distinct².

An examination of the evidence for *lénai* and its derivatives proves that the word was used by Arcadians, Ionians, and Dorians alike. It is obviously a very old term for the female devotees of Dionysos. With their ritual we are imperfectly acquainted. The festival-calendar from Mykonos says³:

‘ON THE TENTH OF LENAION a hymn must be sung on behalf of the crops while a pregnant sow that has not previously had a litter is sacrificed to Demeter, an ungelded boar to Kore, a young pig to Zeus *Bouleús*. The *hieropoiói* are to provide these victims from the sacred fund, and with them wood and barley-meal. The magistrates and priests shall see to it that the victims are satisfactory. If there is any need of a second and satisfactory sacrifice, the *hieropoiói* are to provide it. Any woman of Mykonos that wishes it shall come to the festival and any women dwelling in Mykonos that have been initiated into the rites of Demeter. ON THE ELEVENTH a yearling is brought to Totaplethos(?) for Semele. This is divided into nine portions (of which one is burnt for Semele and the other eight are eaten by the worshippers). ON THE TWELFTH a yearling is sacrificed to Dionysos *Leneús*. On behalf of the crops black yearlings stripped of their skins are sacrificed to Zeus *Chthónios* and Ge *Chthonía*. No stranger may perform the sacrifice. The participants are to eat it on the spot.’

Ἐπιλήναιος (W. Judeich in the *Altertümer von Hierapolis* (Jahrb. d. kais. deutsch. arch. Inst. Ergänzungsheft iv) Berlin 1898 p. 89 no. 46, 1), and Ἀθηαγόρας (*Anth. Pal.* 6. 56. 2 (Makedonios)).

Cp. Hesych. s.v. ληνέουσι· βακχεύουσιν, Soud. s.v. ληνίς, ληνίδος· ἡ βάκχη, et. mag. p. 564, 4 and et. Gud. p. 368, 12 ληνίς, σημαίνει τὴν βάκχην· κ.τ.λ., Eustath. in *Il.* p. 629, 31 αἱ δὲ ῥηθείσαι (sc. Βάκχαι) καὶ Ληνίδες λέγονται κ.τ.λ. (but Zonar. lex. s.v. ληνίς· ἡ μέθη).

¹ Dr Farnell in the *Class. Rev.* 1900 xiv. 375 rightly insisted that Ἀήναιος must be derived from a stem in *a* (λῆναι), not in *o* (ληνός). And all the writers cited *supra* p. 667 n. 3 have been struck by the absurdity of a 'wine-press' festival in mid-winter!

² M. P. Nilsson *Gr. Feste* p. 275 (after H. von Prott in the *Ath. Mitth.* 1898 xxiii. 226) shows that λῆναι, which occurs outside the Ionic area without change of vowel, had an original *ē*, but that ληνός, which occurs in Doric as λανός, had an original *ā*.

³ J. de Prott *Leges Graecorum sacrae* Lipsiae 1896 *Fasti sacri* p. 13 ff. no. 4, 15 ff., Michel *Recueil d'Inscr. gr.* no. 714, 15 ff., Dittenberger *Syll. inscr. Gr.*² no. 615, 15 ff. Ἀθηαίῳ δεκάτη | ἐπὶ αἰδέῃ ὑπὲρ καρποῦ Δήμητρι ὕν ἐνκύμονα πρωτοτόκον, | Κόρη κάπρον τέλεον, Διὶ Βουλεῖ χοῖρον. ταῦτα δίδόντων ἱεροποιοὶ ἀπὸ τοῦ ἱεροῦ ἀργυρίου, καὶ ξύλα δίδόντων καὶ ὄλας. | ἐπιμελέσθων δὲ τῶν ἱερῶν ὅπως καλὰ ἦ ἀρχοντες καὶ ἱερεῖς. ἐὰν δέ τι δέη καλλιερῆν, ἱεροποιοὶ δίδόν[τ]ων· εἰς δὲ | τὴν ἑορτὴν [πελ](αῖ)έτω Μυκονιάδων ἡ βουλο[μ]έ[ν]η κ]αὶ τῶν οἰκουσῶν ἐμ Μυκό[ν]ω ὄσαι ἐπὶ Δήμητρι τετέλ[η]νται.—ἐν δε[κ]α(ά)τη ἐπὶ Τοταπλήθος (so de Prott and Michel, after Kumanudis ἐπι ΤΟΤΑΓΛΗ?θος: Dittenberger reads ἐπὶ τὸ τα..ληθος, after Latyschew ΕΠΙΤΟΤ . . ΛΗΘΟΣ) Σεμέλη ἐτήσιον· τοῦτο ἑνα τεύεται.—[δ]ιωδεκάτει Διονύσωι Ληνεῖ ἐτήσιον· ὑπ(ἐ)[ρ] | κα(ρ)πῶν Δι Χθονίωι, Γῆι Χθονίηι δερτὰ μέλανα ἐτήσι(α)· | ξένωι οὐ θέμις· δαινύσθων αὐτοῦ.

At Mykonos, then, in the first century B.C. the full Lenaeon festival included the worship of the following deities:

Lenaion 10—Demeter, Kore, Zeus *Bouleüs*.

Lenaion 11—Semele.

Lenaion 12—Dionysos *Leneüs*, Zeus *Chthónios*, Ge *Chthonía*.

J. von Protz¹ points out that the deities of Lenaion 10 are the Ionian triad Demeter, Kore, and Zeus *Eubouleüs*², who correspond with the Peloponnesian triad Demeter, Kore (Persephone), and Plouton (Klymenos, Hades). He adds that at Athens the Lenaia was preceded by a sacrifice to the same triad Demeter, Kore, and Plouton³. It follows that the ritual of Lenaion 10 was a prelude of the Lenaia, not the Lenaia itself. This occupied the last two days, on which Semele, Dionysos *Leneüs*, Zeus *Chthónios*, and Ge *Chthonía* are the deities recognised—a group of chthonian and agricultural import. Yet here again we must distinguish the Lenaia itself from its concomitants. Since Zeus *Chthónios* is named after Dionysos *Leneüs*, while Ge *Chthonía* duplicates the earth-goddess Semele, we may conclude that Zeus and Ge were due to a later amplification. The preliminary hymn for the crops was balanced by a concluding sacrifice for the crops. Subtracting both prelude and sequel, we have left as the original recipients of the cult Semele and Dionysos *Leneüs*. Provokingly little is told us about their actual rites. The yearling eaten by the worshippers recalls the omophagy of the Cretan cult⁴. And the black fleeces were perhaps worn by them as by Pythagoras in the Idaean Cave⁵. But beyond this we are reduced to conjecture⁶.

It is by no accident that the same Thracio-Phrygian pair, Semele and Dionysos, figure in the Athenian Lenaia. The old scholiast on Aristophanes states that

'at the Lenaeon contests of Dionysos the *daidoúchos* holding a torch says

"Call ye the god," and his hearers shout "Iakchos, Semele's child, Giver of Wealth¹."

What happened in answer to this evocation, we are not told. But it is permissible to suppose that a figure representing Semele with the infant Dionysos in her arms issued from a cave or artificial grotto. The *cornu copiae* carried by the babe would mark him as the 'Giver of Wealth.' Kephisodotos' statue of Eirene holding the infant Ploutos was very possibly inspired by the Lenaeon representation of Semele²: on late coppers of Athens that show the group the child has a *cornu copiae* in his left hand³. How the cave or grotto would be managed, we can infer from the well-known vases illustrating the ascent of the earth-goddess. Miss Harrison in her study of these at first conjectured 'some reminiscence of Semele⁴,' and later wrote: 'We have before us unquestionably the "Bringing up of Semele⁵."' I understand her to suggest in the same context that the type as seen in the Attic vase-paintings was definitely based on the initial rite of the Lenaea. With that I should agree⁶. Hermes too was, not improbably, present at the ritual evocation⁷, and to him Semele may have handed the new-born babe. If Kephisodotos' statue of Eirene with Ploutos was inspired by the ritual figure of Semele with Dionysos, the same sculptor's statue of Hermes nursing the infant Dionysos⁸ may have been based yet more closely on the succeeding scene at the Lenaea. And to the Hermes of Kephisodotos the Hermes of Praxiteles was near akin.

¹ Schol. Rav. Aristoph. *ran.* 479 κἀλει θεόν: ...ἐν τοῖς Ληναϊκοῖς ἀγῶσιν τοῦ Διονύσου ὁ δαδούχος κατέχων λαμπάδα λέγει "καλεῖτε θεόν," καὶ οἱ ὑπακούοντες βοῶσιν "Σεμελήμη Ἴακχε πλουτοδότρα" (*carmina popularia* 5 Bergk⁴, *versus et cantilenae populares* 4 Hiller—Crusius).

² Cp. O. Jessen in Roscher *Lex. Myth.* iv. 668: 'näher liegt die Annahme, die *βοτρυδῶρος* [Aristoph. *rax* 520], *πλουτοδότειρα* [*frag. mel. adesp.* 39 Hiller—Crusius] Eirene habe einst in Athen als Mutter des Dionysos gegolten; denn sie erscheint wie andere frühere Mütter (Dione, Thyone) später auf Vasenbildern als Bakchantin im Gefolge des Gottes [L. von Sybel in Roscher *Lex. Myth.* i. 1222].'

³ Imhoof-Blumer and P. Gardner *Num. Comm. Paus.* iii. 147 pl. DD, 9 f., *Brit. Mus. Cat. Coins Attica* etc. p. 109 pl. 19, 5, Overbeck *Gr. Plastik*⁴ ii. 8 ff. fig. 134 a.

⁴ Harrison *Proleg. Gk. Rel.*² p. 278 f. fig. 68.

⁵ Harrison *Themis* p. 418 ff. fig. 124.

⁶ But I completely disagree with Miss Harrison's description of the grotto on the Berlin *kratér* (Furtwängler *Vasensamml. Berlin* ii. 756 no. 2646, *Mon. d. Inst.* xii pl. 4). She says (*Themis* p. 418 f.): 'We have a great mound of earth artificially covered in with a thick coat of white. On it are painted a tree, leaf-sprays and a tortoise. From the top of the mound rises a tree....It is a grave-mound, an omphalos-sanctuary,' etc. I see no tortoise or grave-mound or *omphalos*, nothing in fact but a would-be cavern.

⁷ He awaits the *anodos* of Pherophatta on a *kratér* at Dresden (P. Herrmann in the *Jahrb. d. kais. deutsch. arch. Inst.* 1892 vii Arch. Anz. p. 166 f., Harrison *Proleg. Gk. Rel.*² p. 277 fig. 67).

⁸ Plin. *nat. hist.* 34. 87.

It would seem, in fact, that the Lenaeon festival made important contributions, not only to Greek literature, but also to Greek art.

A. Frickenhaus has recently attempted to prove that a whole series of Athenian vases extending throughout the fifth century B.C. represents scenes from the Lenaia¹. Late black-figured vases, mostly *lékythoi*, show a wooden pillar decked with a bearded Dionysiac mask and sprigs of ivy: sometimes the mask is duplicated, and drapery added beneath it, or a flat-cake above it. As a rule, four Maenads are grouped about the *ágalma*². Red-figured vases, usually *stámnoi*, complicate the scene. The god is more elaborately dressed, though he never acquires arms. Before him is a table, on which offerings of wine etc. are placed. The *entourage* still consists of Maenads³. In one case the pillar is not decked at all, but a Maenad on the left is carrying the infant god⁴. Various scholars from G. Minervini (1850)⁵ onwards have interpreted the masked pillar as the Theban Dionysos *Perikiónios*. M. Mayer (1892)⁶ suggested Dionysos *Orthós*, whom C. Robert (1899)⁷ identified with Dionýsos *Lenaíos*. Combining these hints, Frickenhaus argues that at some date later than the ninth and earlier than the sixth century B.C. the cult of the Theban Dionysos came to the Lenaion, which he locates outside the Dipylon gate. Here year by year the birth of Semele's son was celebrated, his pillar decked, and his table spread⁸. In the absence of a definite inscription certainty is unattainable. But it will probably be conceded that the vases in question do illustrate the ritual of an Attic festival of Dionysos, and that this festival may well be the Lenaia⁹. If so, these vases strengthen our contention that the

⁹ The rites of the Rural Dionysia are so imperfectly known that we cannot rule them out as confidently as does Frickenhaus *op. cit.* p. 26: 'Auch die ländlichen Dionysien, wie sie Aristophanes in den Acharnern schildert, können nichts mit unseren Vasen zu tun haben.' It must not be forgotten that precisely at Acharnai there was a cult of Dionysos *Kíssós* (Paus. i. 31. 6 with J. G. Frazer *ad loc.*), who was near akin to Dionysos *Perikiónios* (O. Kern in Pauly—Wissowa *Real-Enc.* v. 1016). Moreover, the Rural Dionysia was but the country counterpart of the Athenian Lenaia (*supra* p. 666, *infra* pp. 673, 688).

Within the last few months E. Petersen 'Lenäen oder Anthesterien' in the *Rhein. Mus.* 1913 lxxviii. 239—250 has attempted to prove that the vases discussed by Frickenhaus

infant god was exhibited at the Athenian Lenaia¹. And I have long since maintained that in the table, which on the same vases is set before the dressed up post, we should recognise the prototype of the dramatic stage².

Beside the ritual directions of Mykonos and Athens we have a rhetorical passage in which Clement of Alexandria³ contrasts the frenzy of Lenaean fiction with the calm of Christian truth :

‘So Kithairon and Helikon and the mountains of the Odrysians and Thracians, where men are initiated into error, have by reason of their mysteries been divinised and hitched into hymns. For my part, fiction though they be, I can ill brook all these disasters turned into tragedy; but you have made the very recital of your woes into plays, and you deem those that act them a delightful sight. Nay, nay, let us take these dramas and Lenaean poets,—for the cup of their folly is full,—let us wreath them of course with ivy⁴, while they babble beyond measure in their Bacchic rite, and along with their Satyrs, their mad followers, and the whole chorus of demons to boot, let us relegate them to a superannuated Helikon and Kithairon. But for ourselves, let us summon from the heavens above Truth with luminous wisdom⁵ and the holy chorus of prophets to come to the holy mountain of God.’

The scholiast, commenting on Clement’s ‘Lenaean poets,’ lets fall a brief but valuable hint :

‘A rustic ode, sung over the wine-press, which ode itself included the rending of Dionysos⁶.’

refer, not to the Lenaia at all, but to the secret rites of Anthesterion 12, when—as he supposes—the *Basílinna* attended by her *Gerairai* was married to Dionysos, *i.e.* to a dressed-up pillar in the old Dionysion *én Álμvais*. But the arguments adduced in support of his view by this learned and ingenious scholar strike me as being far from cogent. It is, *e.g.*, the merest assumption that the ritual marriage of the *Basílinna* took place on Anthesterion 12 (*infra* p. 686). And to argue that the vases cannot represent the Lenaia, because the Lenaia had no room for ‘eine exklusive Frauenfeier,’ is to forget that *Lenaia* means ‘the festival of the *lénai*’ (*supra* p. 667 f.).

⁴ *Cp. Corp. inscr. Att.* iii. 1 no. 77, 21 (Athens, s. i. A.D.), J. de Prottr *op. cit.* p. 7 ff. no. 3, 21, Michel *Recueil d’Inscr. gr.* no. 692, 21 Γαμηλιῶνος κιττώσεις Διονύσου θι, on which see Mommsen *Feste d. Stadt Athen* p. 374 n. 7.

⁵ Clement is, I think, pointedly contrasting the Lenaean rite as described by the scholiast on Aristophanes (*supra* p. 669) with Christian procedure. The former called up Iakchos from below: the latter calls down Truth from above. The former relied for its illumination on the torch of the *daidoúchos*: the latter has all the brilliance of celestial wisdom. The former involved a revel-rout ranging an earthly mountain: the latter witnesses inspired prophets pressing on towards Mt Zion.

⁶ Schol. *Clem. Al. protr.* p. 297, 4 ff. Stählin ληναϊζοντας· ἀγροικὴ ᾠδὴ ἐπὶ τῷ ληνῷ ᾄδομένη, ἣ καὶ αὐτὴ περιεῖχεν τὸν Διονύσου σπαραγμὸν. πάντῃ δὲ εὐφῶς καὶ χάριτος ἐμπλέως τὸ “κιττῷ ἀναδήσαντες” τέθεικεν, ὁμοῦ μὲν τὸ ὅτι Διονύσῳ τὰ Λήναια ἀνάκειται ἐνδειξάμενος, ὁμοῦ δὲ καὶ ὡς παροινία ταῦτα καὶ παροινούσων ἀνθρώποις καὶ μεθύουσιν συγκεκρότηται.

A. Mommsen thinks that this note alludes to the Rural Dionysia¹. Dr Farnell is more disposed to interpret it of the Lenaia². And that is certainly right; for, not only was Clement throughout describing the Lenaeon celebrations, but the scholiast is actually annotating the verb *lenáizontas* and in his very next sentence mentions the Lenaia by name. Yet after all it matters little whether the scholiast is speaking of the Rural Dionysia or of the Lenaia; for we have already observed that the latter was only the Athenian variety of the former³. What does matter is that here, and here only, we learn the contents of the Lenaeon chant. It dealt, as we might have surmised, with the rending of Dionysos. And the whole context in Clement leads us to conclude that this was the proper theme of Lenaeon tragedy.

We are now in a position to review the facts and to estimate probabilities. In Crete⁴ the ritual of Dionysos, the re-born Zeus, included a yearly drama, at which the worshippers performed all that the boy had done or suffered at his death. The Titans' cannibal feast was represented by a bovine omophagy; and those who took part in this sacrament thereby renewed their own vitality. For *ipso facto* they became one with their god, and he with them. The true mystic was *éntheos* in a twofold sense: he was in the god, and the god was in him⁵. On the one hand, the celebrant was not only a worshipper of Bacchos but also the Bacchos whom he worshipped⁶. On the other hand, Dionysos was at once the god of the mysteries and the 'Mystic' (*Mýstes*)⁷, the bull eaten and the 'Bull-eater' (*Taurophágos*)⁸. I submit that in early days the Lenaia essentially resembled the Cretan rite, the only notable difference being that here the god was embodied in a goat, not a bull.

The connexion of Dionysos with the goat has recently been questioned by Prof. Ridgeway¹. But he ignores the express statement of Hesychios that in Lakonike Dionysos was worshipped as *Ériphos*, the 'Kid²,' and the definite mention by Apollodoros of a cult of Dionysos *Eriphios*, the 'Kid-god,' at Metapontum³. It is the existence of these cults that gives significance to certain myths recorded by Apollodoros and by Ovid. Apollodoros relates that Zeus gave the new-born Dionysos to Hermes, who carried the babe to Ino and Athamas, that they might rear it as a girl. Hera in anger sent madness upon them. Athamas hunted his elder son Learchos like a stag and slew him. Ino cast the younger son Melikertes into a caldron that was on the fire, and then taking the dead boy sprang into the sea. She is now worshipped by sea-farers as Leukothea, and he as Palaimon. Finally, Zeus transformed Dionysos into a kid (*ériphos*) and so saved him from the wrath of Hera⁴. Prof. Ridgeway makes light of the tale as coming from a late writer. But it is never safe to pooh-pooh the evidence of Apollodoros. And this tale in particular, though not written down till the second century B.C., obviously contains ritual elements of extreme antiquity. We have already noted that in the service of Dionysos a man was literally disguised as a stag, slain and eaten⁵. We have also remarked that in the cult of Dionysos' nurse⁶, this

¹ W. Ridgeway *The Origin of Tragedy* Cambridge 1910 p. 79 ff.

³ Steph. Byz. s.v. Ἀκρωρεία, ἄκρον ὄρους. ἐν ᾧ οἱ οἰκοῦντες Ἀκρωρείται. οὕτω δὲ παρὰ Σικυωνίους ἐπιμάτο <ὁ Διόνυσος>. ἐκαλεῖτο δὲ παρὰ μὲν Σικυωνίους Ἀκρωρείτης, παρὰ δὲ Μεταποντινίους Ἐρίφιος. Ἀπολλόδωρός φησιν. The insertion of ὁ Διόνυσος is rendered practically certain by Paus. 2. 7. 5: J. G. Frazer *ad loc.* points out that the temple of Dionysos at Sikyon stood on the plateau, which was the akropolis of the old, and the site of the new, city. Not improbably kids were killed in the cult of the Sicyonian Dionysos; for a copper coin of the town, struck by Iulia Domna, shows a raving Bacchant with a knife in her right hand and a kid (?) in her left (*Brit. Mus. Cat. Coins Peloponnesus* p. 55 pl. 9, 19, Imhoof-Blumer and P. Gardner *Num. Comm. Paus.* i. 29 pl. H, 6 and 7).

⁵ *Supra* p. 67 n. 3.

⁶ At Brasiai in the territory of the Eleutherolakones Ino nursed Dionysos in a cave (Paus. 3. 24. 4, cp. Douris *frag.* 3 (*Frag. hist. Gr.* ii. 470 Müller) *ap.* Tzetz. in Lyk. *Al.* 104). In a pentameter of Kallimachos (?) cited by the *et. mag.* p. 372, 4 f. the nurse of Dionysos is Ἐρίφη (cp. Nonn. *Dion.* 21. 81 and Arkad. *de accent.* p. 115, 18 Barker); on the authorship of the line see O. Schneider *Kallimachea Lipsiae* 1873 ii. 722. Lastly, Nonn. *Dion.* 10. 1 ff. makes Athamas in his madness bind and flog a she-goat, which he takes to be Ino.

same Leukothea, a caldron was used to effect a ritual divinisation¹. It might also be observed that at Tenedos infants were sacrificed to her son Palaimon². Supported by the evidence of actual cult and embedded in this context of archaic rites, the statement of Apollodoros that Dionysos himself became a kid is not to be laughed out of court. Again, Ovid says that, when the gods fled into Egypt to escape Typhoeus, the son of Semele was turned into a goat³. And even Ovid, facile though he was and frivolous though he may have been, did not invent his *Metamorphoses* wholesale. Recent research is in fact tending towards the conclusion that he did not invent them at all⁴. And we have twice had occasion to accept as based on definite cult-practice transformations presupposed by this very Ovidian narrative⁵.

In the tale told by Apollodoros we detected certain remnants of Dionysiac ritual—the caldron of apotheosis and the young god transformed into a kid. I should conjecture that there was a version of the Dionysos-myth, in which the god boiled in a caldron and subsequently devoured was done to death not as a bull, but as a kid. I am further inclined to think that his worshippers, by way of identifying themselves with him, took the name of ‘kids’ and actually pretended to be seethed like him in a caldron. This may seem a rash guess. But it is not entirely unsupported by evidence. Hesychios informs us that a man who performed the rites of Adonis was known as a ‘kid⁶.’ And we have seen that the Cretan Zeus, whose death and resurrection were annually enacted, was at the first hard to distinguish from Adonis⁷. Possibly, therefore, Kuster was not mistaken when he interpreted this strange gloss of some Dionysiac rite⁸. Again, if Dionysos was worshipped as *Eriphios*, the ‘Kid-god,’ at Metapontum, we might look to find some trace of the fact in Orphic formularies. Now A. Dieterich⁹ with his habitual acumen pointed out that the lines engraved on

⁹ A. Dieterich *de hymnis Orphicis* Marburgi Cattorum 1891 p. 30 ff. (= *Kleine Schriften* Leipzig and Berlin 1911 p. 91 ff.), *id.* *Eine Mithrasliturgie*² Leipzig and Berlin 1910 p. 214.

the gold tablets from Corigliano constitute a hymn of eleven hexameters, in which the Orphic votary claims a happy entrance into the future life and receives the assurance:

‘Happy and blessed one, thou shalt be a god instead of a mortal.’

Dieterich further remarked that immediately after this hymn comes a twelfth line containing the prose *formula*:

‘I have fallen as a kid into milk!’

This enigmatic phrase he referred to the cult of Dionysos *Ériphos* or *Eriphios* and explained as a solemn pass-word, in which the mystic asserted that he too as an *eriphos* had now returned to his mother’s breast and, thus raised to the rank of a god, had entered upon the land flowing with milk and honey. Dieterich’s elucidation of the final *formula* is, however, incomplete; for it does not really justify the expression ‘I have fallen’ or adequately account for the ritual bath of milk. We must, I think, start from the fact, first noted by Dr Frazer², that semi-civilised folk relish meat boiled in milk, but often abstain from the luxury because they fancy that the boiling would injure the cow from which the milk has been drawn. Among the Baganda, for example, ‘it is recognized that flesh boiled in milk is a great dainty, and naughty boys and other unprincipled persons, who think more of their own pleasure than of the welfare of the herds, will gratify their sinful lusts by eating meat boiled in milk, whenever they can do so on the sly³.’ Moreover, tribes that commonly refuse to boil milk will not hesitate to do so on certain solemn and specified occasions: the Bahima cowmen are a case in point⁴. It is therefore possible that the original Thracio-Phrygian ceremony involved a ritual boiling of milk. At the Athenian festival of the Galaxia a mess of barley was actually boiled in milk for the Phrygian mother-goddess⁵. And Sallustius,

In or. Gr. Sic. It. no. 641, 1. 14 ff. ὄλβιε καὶ μακαρίστε, θεὸς δ’ ἔσμι ἀντὶ βροτοῖα.
Κρατος ἐς γὰρ Ἐπιτονον, no. 642, 4 ff. θεὸς ἐ(γ) ἔνου ἐξ ἀνθρώπου, ἔριφος ἐς γάλα | ἔπετες.

² J. G. Frazer in *Anthropological Essays presented to Edward Burnett Tylor* Oxford 1907 p. 171 ff., discussing the ancient ritual law ‘Thou shalt not seethe a kid in its mother’s milk’ (Ex. 23, 19, 34, 26, Deut. 14, 21), argues (a) that among pastoral tribes in Africa there is a widely spread and deeply rooted aversion to boil the milk of their cattle, the aversion being based on an idea that a cow whose milk has been boiled will yield no more milk; (b) that, notwithstanding this belief, the Baganda boys do boil their meat in milk whenever they can; and (c) that the scriptural precept may have been directed against miscreants of this sort, whose surreptitious joys were condemned by public opinion as striking a fatal blow at the staple food of the community.

³ J. G. Frazer *loc. cit.* p. 176.

⁴ See the interesting account given by my friend the Rev. J. Roscoe *The Baganda* London 1911 p. 418.

⁵ Bekker *anecd.* i. 229, 25 ff. Γαλαξία (Γαλάξια A. Mommsen)· ἐορτὴ Ἀθήνησι μητρὶ

who allegorises her rites¹, speaks of 'the feeding on milk, as though we were being born again; after which come rejoicings and garlands and, as it were, a return up to the Gods².' Let us suppose, then, that the early Thraco-Phrygian 'kings,' the *Titánes* of the myth³, after killing Dionysos as a kid, pitched him into their caldron and boiled him in milk with a view to his being born again. The mystic who aspired to be one with his god underwent, or at least claimed to have undergone, a like ordeal. He had fallen as a slain kid into the milky caldron: henceforward he was 'a god instead of a mortal⁴.'

³ *Supra* p. 655 f.

⁴ A somewhat similar belief may lie at the back of the Roman Lupercalia; for here too human 'goats' underwent rites, which are best explained (W. Mannhardt *Mythologische Forschungen* Strassburg 1884 p. 99 f.) as a mimic death and resurrection by means of milk. The relevant facts are the following. On Feb. 15 the celebrants met at the Lupercal, a cave in the Palatine Hill, and sacrificed goats (Plout. *v. Rom.* 21, *Ov. fast.* 2. 445 cp. 441, Val. Max. 2. 2. 9, Quint. *inst. or.* 1. 5. 66, Serv. *in Verg. Aen.* 8. 343 and interp. *ad loc.*) and a dog (Plout. *v. Rom.* 21, *quaest. Rom.* 68, 111). In the Lupercal was an image of the god whom Justin calls Lupercus, nude but girt with a goat-skin (Iust. 43. 1. 7). The *luperci* too were nude and wore about their loins the pelts of the newly-sacrificed animals (Q. Aelius Tubero (*Hist. Rom. frag.* p. 200 f. Peter) *ap. Dion. Hal. ant. Rom.* 1. 80). They ran round the base of the Palatine striking those whom they met with strips or thongs cut from the goat-skins (Plout. *v. Rom.* 21, *Ov. fast.* 2. 445 f., Val. Max. 2. 2. 9, interp. Serv. *in Verg. Aen.* 8. 343, Nikol. Damask. *frag.* 101, 21 (*Frag. hist. Gr.* iii. 441 Müller)). These *luperci* are described not merely as 'human flocks' (Varr. *de ling. Lat.* 6. 34 *lupercis nudis lustratur oppidum Palatinum gregibus humanis cinctum*), but actually as *erepi* (Paul. ex Fest. p. 57 Müller, p. 49 Lindsay), *i.e.* 'goats' (Paul. ex Fest. p. 48 Müller, p. 42 Lindsay, *Isid. orig.* 12. 1. 15: see S. Bugge in the *Jahrb. f. Philol. u. Pädag.* 1872 cv. 92 f., Preller—Jordan *Röm. Myth.*³ i. 389, W. M. Lindsay *The Latin Language* Oxford 1894 p. 98). Wissowa *Rel. Kult. Röm.*² p. 209 n. 8 says: 'man kann die *τράγοι-σάτυροι* des griechischen Dionysos-dienstes zum Vergleiche heranziehen'—an analogy noted by W. Mannhardt *Wald- und Feldkult.*² Berlin 1905 ii. 200. The ritual of the *luperci* is given with most detail by Plout. *v. Rom.* 21: 'They sacrifice goats. Then two young men of high rank are brought to them; whereupon some touch the forehead of the young men with a bloody knife, and others promptly wipe off the blood, applying wool steeped in milk. After this wiping the young men are obliged to laugh. Next they cut up the skins of the goats and run round naked except for their girdles, striking with the whips any one who encounters them. Young women do not avoid this whipping, because they deem it a help towards easy labour and conception. It is a peculiarity of the festival that the *luperci* sacrifice a dog likewise.' See

To modern ears this rite may sound not only disgusting but incredible. Yet a partial parallel can be found for it, and nearer home than we might have imagined. Giraldus Cambrensis¹ tells us how kings used to be inaugurated in Tirconnell, now the county of Donegal:

'There are some things which shame would prevent my relating, unless the course of my subject required it. For a filthy story seems to reflect a stain on the author, although it may display his skill. But the severity of history does not allow us either to sacrifice truth or affect modesty; and what is shameful in itself may be related by pure lips in decent words. There is, then, in the northern and most remote part of Ulster, namely, at Kenel Cunil, a nation which practises a most barbarous and abominable rite in creating their king. The whole people of that country being gathered in one place, a white mare is led into the midst of them, and he who is to be inaugurated, not as a prince but as a brute, not as a king but as an outlaw, comes before the people on all fours, confessing himself a beast with no less impudence than imprudence. The mare being immediately killed, and cut in pieces and boiled, a bath is prepared for him from the broth. Sitting in this, he eats of the flesh which is brought to him, the people standing round and partaking of it also. He is also required to drink of the broth in which he is bathed, not drawing it in any vessel, nor even in his hand, but lapping it with his mouth. These unrighteous rites being duly accomplished, his royal authority and dominion are ratified.'

It remains to ask—what is the bearing of all this on the origin of Greek tragedy? To put the matter briefly, it seems probable that at the winter festival of the Lenaia as originally celebrated by the Athenians a song was sung commemorating the passion of Dionysos², and that this song was accompanied by a mimetic performance, a passion-play³, which ultimately developed into Attic tragedy. It is, I think, significant that Thespis came from the deme Ikaria, where it was an ancient custom to dance round a he-goat (*trágos*)⁴, that for the purpose of his tragedies he first smeared the faces of the performers with white lead⁵, as if they

Bunte *ad loc.* suggests that the line was preceded by ἔνθα ἑταίροι or the like), and justly infers 'that there was there some primitive mimetic service of the goat-god.'

⁵ Soud. *s.v.* Θέσπις: ...καὶ πρῶτων μὲν χρίσας τὸ πρόσωπον ψιμυθίῳ ἐτραγῶδησεν, εἶτα ἀνδράχην ἐσκέπασεν ἐν τῷ ἐπιδείκνυσθαι, καὶ μετὰ ταῦτα εἰσήνεγκε καὶ τὴν τῶν προσώπων χρῆσιν ἐν μόνῃ ὀθῶνῃ κατασκευάσας = Eudok. *viol.* 471.

were so many Titans¹ smeared with gypsum, and finally that the titles of the plays rightly or wrongly ascribed to him by Soudas are the *Prizes of Pelias* or the *Phorbas*, the *Priests*, the *Young Men*, and the *Pentheus*². The last-named tragedy certainly had reference to the rending of Dionysos; for Pentheus, a Theban embodiment of the god³, was torn asunder, if not also devoured⁴, by the *lênai* themselves. Aischylos too wrote a *Pentheus*⁵ and dealt with the same theme in his *Xantriai*⁶, as did Euripides in his *Bakchai*, Iophon in his *Bakchai* or *Pentheus*⁷, Chairemon in his *Dionysos*⁸, Lykophron in his *Pentheus*⁹. The extant Euripidean play was neither the first nor the last dramatic presentation of the subject. Further, we can well understand how the incidents of the passion would be told of others beside Pentheus, who in this or that part of Greece had died the Dionysiac death. Pelias was cut to pieces by his daughters and boiled in a caldron in order that he might recover his youth¹⁰. Apart from the play attributed to Thespis, Sophokles composed a *Pelias*¹¹ and Euripides a *Peliades*¹². The myth of Pelias and that of Pelops¹³ have been shrewdly and, I believe, rightly interpreted by Mr F. M. Cornford as presupposing a ritual of regeneration or new birth¹⁴. It is therefore noteworthy that the boiling and eating of Pelops were for centuries regarded as among the most popular of all tragic themes¹⁵. Moreover, Palaimon, once boiled in a caldron by Leukothea and later worshipped as a god¹⁶, was a stock character in the dramatic rites of the Iobakchoi¹⁷. From such personages the transition would be

easy to suffering heroes in general—Hippolytos dragged to death by his horses but brought to life again by Asklepios, Orestes reported as dead but returning to wreak vengeance on his foes, Apsyrtos murdered and dismembered by Medeia, Neoptolemos mangled beside the altar at Pytho, and many another who, as old-fashioned folk were apt to complain, had ‘nothing to do with Dionysos’¹.

(θ) The Attic Festivals of Dionysos.

Prof. G. Murray pursuing a different route has arrived at a similar, or at least analogous, conclusion. In a lucid and closely-reasoned note² he shows that Greek tragedies, so far as they are extant and so far as they can be reconstructed from extant fragments, normally contain a sequence of six parts—an *agón* or ‘contest’; a *páthos*, generally a ritual or sacrificial death; an *angelía* or ‘messenger’s speech’ announcing the death; a *thrénos* or ‘lamentation,’ often involving a clash of contrary emotions; an *anagnórisis* or ‘recognition’ of the slain and mutilated body; a *theopháneia* or ‘epiphany in glory.’ Following a clue put into his hands by Dieterich³, Prof. Murray makes the really important discovery that Greek tragedy fills out the ritual forms of an old *sacer ludus*. This is what he is chiefly concerned to prove; and this, I think, he has succeeded in proving.

When, however, Prof. Murray assumes that the *sacer ludus* in question was the dithyramb or spring *drómenon* of Dionysos regarded as an ‘Eniautos-Daimon’ or ‘Year Spirit,’ I demur to his nomenclature⁴ and I disagree with his presuppositions. Had he

⁴ Prof. Murray writes to me (July 6, 1913): ‘I want to put in a word of explanation about the Daimon, where I am not sure that you have taken my point. I could, of course, call him simply Dionysus, as the ancient authorities do. Only then there would have to be explanations for each separate play. Hippolytus is not Dionysus; it is a strain even to call him a Dionysiac hero. The same with Orestes, Oedipus, Actaeon, Pentheus even. It seemed to me simpler, as a matter of nomenclature, to say: “Dionysus, though of course a complex figure, belongs so far as tragedy is concerned to a special class of beings called Vegetation Spirits or Year-Daemons. Tragedy, while in official cult specially belonging to Dionysus, readily accepts as its heroes all sorts of other people who are, in their various degrees, Daemons of the same class, and have the same set of Pathea.” Thus in each case I can speak simply of “the Daimon.”’

been content to speak, as the Greeks spoke, of Dionysos with no new-fangled appellation, and had he cited the Lenaia rather than the dithyramb as providing the germ or ritual outline of tragedy, I should have found myself in complete accordance with his view.

This expression of partial dissent from the opinion of so high an authority as Prof. Murray makes it necessary for me to add a word as to the relation that I conceive to have subsisted between the dithyramb and the Lenaean rite. The dithyrambic contest was essentially the opening ceremony of the City Dionysia¹, which began on Elaphebolion 9 and in the fifth century was over by Elaphebolion 14². Now the Lenaia began on Gamelion 12³. The interval between the City Dionysia and the Lenaia was therefore just ten lunar months. My suggestion is that Dionysos was conceived at the City Dionysia and born at the Lenaia. The former festival was the Lady Day, the latter was the Christmas, of the Attic year. I take it that the dithyramb was properly the song commemorating the union of Zeus⁴ with Semele and the begetting

¹ J. Girard in Daremberg—Saglio *Dict. Ant.* ii. 243, O. Kern in Pauly—Wissowa *Real-Enc.* v. 1024 and O. Crusius *ib.* v. 1207.

² Mommsen *Feste d. Stadt Athen* p. 430 ff.

³ *Id. ib.* p. 375.

⁴ *Διθύραμβος* has a suffix found in other words denoting dance and song—*ταμβος*, *θρηταμβος*, cp. *ιθυμβος*. Boisacq *Dict. étym. de la Langue Gr.* p. 363 f. regards *ταμβος* as probably a Thracio-Phrygian word. I would support his contention by pointing out that *Iambe* was a Thracian (Nik. *alex.* 132 *Θρητίσσης*...*Ίάμβης* with scholl. *ad loc.* *Θρᾷσσα δὲ τὸ γένος* and *τῆς Θρακικῆς Ίάμβης*, cp. Proklos in R. Westphal *Metrici scriptores Graeci Lipsiae* 1866 i. 242) and that *διθύραμβος*, *θρηταμβος*, *ιθυμβος* are all Dionysiac terms, the first two being cult-titles of Dionysos himself (Athen. 30 B, 465 A, Diod. 4, 5, *et. mag.* p. 274, 45 ff., schol. Ap. Rhod. 4. 1131, *alib.*), the last the name of a dance used in his service (Poll. 4. 104).

The first element in the compound is *Δι-* for *Δι-* as in *Διφίλος* > *Δίφίλος*, *Διπολεια* > *Διπολεια*, *Διπόλεια* > *Διπόλεια*, *Διπόλεια* > *Διπόλεια*, *Διωστήρια* > *Διωστήρια*.

The second element in the compound and the *crux* for its interpreters is the syllable *-θυρ-*, which cannot be satisfactorily connected with *θύρα*. I have suggested (in Miss Harrison's *Themis* Cambridge 1912 p. 204) that *-θυρ-* is a northern form of *-θορ-* (on *o* becoming *u* see O. Hoffmann *Die Makedonen, ihre Sprache und ihr Volkstum* Göttingen 1906 p. 242, K. Brugmann *Griechische Grammatik*⁴ München 1913 p. 36), and have compared Hesych. *Δειπάτυρος*· *θεὸς παρὰ Στυμφαλοῖς*—a name which not only illustrates both the phonetic changes postulated by my explanation of *διθύραμβος*, but also provides a parallel for the meaning that I would attach to it. If on the confines of Makedonia, Epeiros, and Thessaly *Δειπάτυρος* denoted 'Zeus the Father,' it is allowable to suppose that in the same region **Δείθυρος* denoted 'Zeus the Begetter' (*θορός*, *θορή*, *θόρνημαι*, *θρόσκω*, etc.). Thus *διθύραμβος* could mean what in substance I believe it to have been 'the song of Zeus the Begetter.' In favour of this etymology is the fact that Apollon, who often has the same cult-titles as Zeus, was worshipped in Boiotia (?) as *Θοραῖος* (Lyk. *Al.* 352 with Tzetz. *ad loc.* *Θοραῖον τὸν σπερμογόνον καὶ γεννητικόν*) and in Lakonia as *Θοράτης* (Hesych. *Θοράτης*· *Ἀπόλλων παρὰ Λάκωνας*). Again, Aisch. *surrl.* 301 does not hesitate to describe Zeus as consorting with *Ἰο πρέποντα βουθόρυψ ταύρω δέμας*. And in the Dictaeon hymn six times over comes the impressive cry of the Chorus

of their child Dionysos¹. His life-history, in which I would recognise the prototype of tragedy, was the theme of the Lenaean performance.

On this showing tragedy belonged by rights to the Lenaia and was only later attached to the City Dionysia². Conversely it might be maintained that comedy belonged by rights to the City Dionysia and was only later attached to the Lenaia. For the great god of the City Dionysia was Dionysos *Eleuthereús*, whose cult was introduced by Pegasus from Eleutheraí³. It is said that the Athenians at first thought scorn of the god, and that thereupon they were visited by a phallic disorder, which could not be cured till, both privately and publicly, they made *phalloí* in his honour⁴. Certainly such *phalloí* played their part in the City festival⁵; and Aristotle believed that comedy took its rise from

addressed to Zeus himself *θόρε...θόρε...θόρε...θόρε...θόρε...θόρε...* (*Ann. Brit. Sch. Ath.* 1908—1909 xv. 358 line 27 ff.).

Finally, I should surmise that in *θρίαμβος* we have the weakest grade of the same root (cp. *θρώσκω*). Hence the association of *θρίαμβος* with *διθύραμβος* (*Pratinas frag.* 1, 16 Hiller—Crusius *ap.* Athen. 617 F *θριαμβοδοιθύραμβε*).

¹ The exquisite dithyramb written by Pindar for the Athenians deals expressly with Zeus, Semele, and Dionysos: Pind. *frag.* 75 Christ (75 Schroeder) *ap.* Dion. Hal. *de comp. verb.* 22 Δίδθεν τέ με σὺν ἀγλαΐᾳ | ἴδετε πορευθέντ' αἰοιδᾶν δεύτερον | ἐπὶ κισσοδαῆ θεόν, | Βρόμιον ὄν τ' Ἐριβόαν τε βροτοὶ καλέομεν, | γόνον ὑπάτων μὲν πατέρων μελπόμεν | γυναικῶν τε Καδμεΐαν [Σμελ(η)ν]. κ.τ.λ. Cp. Plat. *legg.* 700 B καὶ ἄλλο (*sc.* εἶδος φῶδης) Διονύσου γένεσις, οἶμαι, διθύραμβος λεγόμενος, where *γένεσις* includes *γέννησις*.

Further evidence tending to show that the City Dionysia culminated in the union of Zeus with Semele and the conception of Dionysos will be adduced, when we come to consider the festival of the Pandia (*infra* p. 733).

² Mommsen *Feste d. Stadt Athen* p. 379 says 'Zur Zeit des Thespis und der älteren Dramatiker, im VI. Jahrh. und wohl noch im Anfang des V., hatten die Städter keine anderen Schauspieltage als die der Lenäen, denen mithin sämtliche in Athen zur Aufführung kommende Stücke zuzuweisen waren. Das wurde anders, als man, verm. im V. Jahrh., die städtischen Dionysien stiftete.' This agrees with the results obtained by W. Vollgraff 'Dionysos Eleuthereus' in the *Ath. Mitth.* 1907 xxxii. 567 ff., viz. that Eleutheraí was not incorporated with Athens till shortly before the peace of Nikias (421 B.C.) and that a temple was built for the *xánon* of Dionysos *Eleuthereús* in the theatre-precinct probably by Nikias himself (c. 420 B.C.). But, in reply to Vollgraff, Farnell *Cults of Gk. States* v. 227 ff. has made it probable that the introduction of Dionysos *Eleuthereús* and the constitution (? re-constitution: *infra* p. 692 n. 4) of the City Dionysia as his festival took place in the sixth century and were the work of Peisistratos.

³ Paus. 1. 2. 5.

⁴ Schol. Aristoph. *Ach.* 243, who describes the *φαλλός* as ξύλον ἐπίμηκες, ἔχον ἐν τῷ ἄκρῳ σκῦτων αἰδοῖον ἐξηρηγμένον.

⁵ Schol. Aristoph. *loc. cit.* πεισθέντες οὖν τοῖς ἠγγελέμοις οἱ Ἀθηναῖοι φαλλοὺς ἴδια τε καὶ δημοσίᾳ κατεσκεύασαν, καὶ τούτοις ἐγέραιον τὸν θεόν, κ.τ.λ., cp. *Corp. inscr. Att.* i no. 31 A 11 ff. = Dittenberger *Syll. inscr. Gr.*² no. 19 a 11 ff. = Michel *Recueil d'Inscr. gr.* no. 72 A 11 ff. (in a decree concerning the colony of Brea, not much earlier than 443/2 B.C.) βούν δὲ καὶ [πρόβατα] | [δόσ] ἀπά]γεν ἐς Παναθέναια τὰ μεγάλ[α καὶ ἐς Δ] | [ιονύσι]α φαλλόν,

this form of worship¹, which was obviously appropriate to the season when Dionysos was begotten. Confirmation of the view that tragedy originated at the Lenaia, comedy at the City Dionysia, may be found in a curious but little-noticed fact². At the Lenaia tragedy took precedence of comedy: at the City Dionysia comedy took precedence of tragedy³.

There are, however, traces of a different and probably older arrangement of the Dionysiac year. It can hardly be accidental that of the two remaining Attic festivals of the god one was held just a month before the City Dionysia and the other a month before the Lenaia. The Anthesteria took place on Anthesterion 11—13⁴; the Rural Dionysia, shortly before Poseideon 19⁵. Here, then, we have again the same interval of ten lunar months. And we may legitimately suspect the same cause—a conception at the

Corp. inscr. Att. ii. 1 no. 321 b, 7 (in a decree of 278/7 B.C., which apparently refers to the inscription passing through the Dipylon Gate) -- *ς τῆς φαλλαγ[ωγίας]*.

¹ Aristot. *poet.* 4. 1449 a 9 ff.

² Mommsen *Feste d. Stadt Athen* p. 441 n. 2 remarks that at the City Dionysia first came lyrics, then comedy, then tragedy, and justly infers 'dass der Agon ursprünglich nur aus erster Lyrik und heiterer Dramatik bestand, und keine Tragödien vorkamen.'

³ See the law of Euegoros cited by Dem. in *Mid.* 10 *Εὐήγορος εἶπεν*: ὅταν ἡ πομπὴ ἢ τῷ Διονύσῳ ἐν Πειραιεὶ καὶ οἱ κωμῳδοὶ καὶ οἱ τραγῳδοὶ, καὶ ἡ ἐπὶ Ἀθηναίῳ πομπὴ καὶ οἱ τραγῳδοὶ καὶ οἱ κωμῳδοὶ, καὶ τοῖς ἐν ἄστει Διονυσίοις ἡ πομπὴ καὶ οἱ παῖδες καὶ ὁ κῶμος καὶ οἱ κωμῳδοὶ καὶ οἱ τραγῳδοὶ, κ.τ.λ. Comedies precede tragedies also in the official lists of the contests at the City Dionysia (*Corp. inscr. Att.* ii. 2 no. 971, iv. 2 no. 971).

A. E. Haigh *The Attic Theatre*³ rev. by A. W. Pickard-Cambridge Oxford 1907 p. 23 n. 2 makes light of this evidence 'as there is nothing to show that the contests are being spoken of in order of performance, rather than in order of relative importance.' But since Euegoros arranges the same items in a different order, according as they occur at the Lenaia or at the City Dionysia, it is probable that he is giving the official programme. This probability is raised to a certainty by the fact that his order agrees with that of the inscribed records, in which e.g. the name of Magnes precedes the name of Aischylos on a list of victors at the City Dionysia c. 469 B.C.

A. E. Haigh *op. cit.*² Oxford 1898 p. 35, *op. cit.*³ Oxford 1907 p. 23 f. quotes Aristoph. *av.* 785 ff. οὐδὲν ἐστ' ἀμεινὸν οὐδ' ἡδίων ἢ φύσαι πτερά. | ἀντίχ' ἰμῶν τῶν θεατῶν εἰ τις ἦν ὑπόπτερος, | εἶτα πεινῶν τοῖς χοροῖσι τῶν τραγῳδῶν ἤχθετο, | ἐκπτόμενος ἂν οὗτος ἠρίστησεν ἐλθὼν οἴκαδε, | κᾶτ' ἂν ἐμπλησθεὶς ἐφ' ἡμᾶς αὐθὺς αὐ κατέπτετο and infers 'that the comedies were performed after the tragedies.' But, noting that this passage stands near the end of a chorus of 125 lines, I would rather interpret as follows. Aristophanes, joking at his own expense, imagines a bored and hungry spectator suddenly equipped with wings and therefore able to fly off home, get his bit of dinner, and be back in time for the next scene on the stage. That is surely the point of ἐφ' ἡμᾶς αὐθὺς αὐ κατέπτετο. If so, there is no allusion to tragedies at all, and we ought to accept the old emendation *τραγῳδῶν*, which was certain to be corrupted into *τραγῳδῶν*. The passage thus emended squares with the very weighty evidence of Euegoros' law and the official inscriptions.

⁴ Mommsen *op. cit.* p. 384 ff.

⁵ Mommsen *op. cit.* p. 351, on the strength of *Corp. inscr. Att.* ii. 1 no. 578, 36 f. (a decree of Myrrhinous c. 340 B.C.) τῇ δὲ ἐνάτει ἐπὶ δέκα τοῦ Ποσειδεῶν[ος] μ(η)ν[ος] (ἡ)ν[ος] (ἡ)ρηματί[ς] [ε]μ[μ] π[ε]ρ[ὶ] Διωνυσίων, cp. *Corp. inscr. Att.* iv. 2 nos. 623 d and 623 e (records of the Dionysiaiata, who met Ποσειδεῶνος ἀγορᾶ κυρία).

Anthesteria, a birth at the Rural Dionysia. Thoukydides speaks of the Anthesteria as 'the older Dionysia¹,' presumably in comparison with 'the Dionysia²,' i.e. the City Dionysia, in the following month. The ritual of the Anthesteria with its *Pithoigia*, its *Chôes*, and its *Chytroi* is fairly well known. It culminated on Anthesterion 12³, the one day in the year on which 'the oldest and holiest sanctuary of Dionysos in the Marshes' was thrown open⁴. For what purpose this temple was opened, while all others were religiously kept shut⁵, we are not told. But we have at least materials for forming a reasonable guess. Beside the altar in the sanctuary stood a marble *stèle*, on which was inscribed a law relating to the *status* and chastity of the *Baslinna*⁶, i.e. the wife of the *Basileús* who had presided over the drinking-competition of the *Chôes*⁷. Now it was the duty of the *Baslinna* to administer an oath of ritual purity to fourteen sacred women chosen by the *Basileús* and named *Gerairat*⁸, who took it standing at the above-mentioned altar and laying their hands upon certain baskets before they ventured to touch 'the holy things⁹.' In view of the ascertained character of Dionysos *Eleuthereús*¹⁰ I should conjecture with some confidence that these baskets contained *phalloi* covered with seed or the like, and that the temple was opened once a year for the performance of a phallic rite¹¹. This conjecture is in general agreement with the wording of the oath taken by the *Gerairat*:

¹ Thouk. 2. 15.

² Thouk. 5. 23, cp. 5. 20.

³ This is the day mentioned by Thouk. 2. 15 as a Dionysiac festival common to the Athenians and their Ionian descendants.

⁴ Dem. c. *Neaer*. 76. The temple in question was probably identical with the small pre-Persic building beside the theatre; for this is expressly described by Paus. 1. 20. 3 as 'the oldest sanctuary of Dionysos,' and its situation immediately south of the Akropolis accords well with the account given by Thouk. 2. 15 of the temple in the Marshes. It seems to have contained the ancient wooden image of the god, brought to Athens from Eleutherai (Paus. 1. 38. 8) by Pegasus (Paus. 1. 2. 5).

⁵ So Mommsen *Feste d. Stadt Athen* p. 391 and Farnell *Cults of Gk. States* v. 216 f. relying on Phanodemos *frag.* 13 (*Frag. hist. Gr.* i. 368 Müller) *ap.* Athen. 437 B—D.

Fig. 510.

signing to the figure in (a).’ Sir Cecil Smith suggests that the scene may have reference to one of the mystic ceremonies of Athenian women, such as the Thesmophoria. If so, it might convey to us some hint of the *πολλὰ καὶ ἅγια καὶ ἀπόρρητα* performed by the *Bastlinna* (Dem. c. *Neaer.* 73).

'I am holy, pure, and clean from all impurities, especially from intercourse with man; and I perform in Dionysos' honour the *Theōgnia* and the *Iobākheia* according to ancestral custom and at the times appointed!'

The *Theōgnia* were presumably rites connected with the birth of the god, very possibly the ceremonial of his conception². The *Iobākheia* may have been some service associated with the *Theōgnia* in Anthesterion, since at Astypalaia this month was called Iobakchios³, or else an equivalent of the *Theōgnia* in Elaphebolion, since the Athenian Iobakchoi are known to have been active at the time of the City Dionysia⁴. Here, however, a difficulty arises. Modern scholars commonly assure us that on Anthesterion 12 the wife of the *Basilēus* was married to Dionysos⁵. If so, my notion that the god was conceived on this day falls to the ground. But inspection shows that, although the ritual marriage is a well-attested fact, no ancient author early or late connects it with the Anthesteria at all. When it took place, we do not know. Perhaps it synchronised with the Lenaia⁶. In any case we are left with the curious problem that the Anthesteria was a Dionysiac festival at which Dionysos himself played no obvious part. The problem is solved, if I am

¹ Dem. c. *Naxer.* 78 Ἄγιστέω καὶ εἰμὶ καθαρά καὶ ἀγνή ἀπὸ τε τῶν ἄλλων τῶν οὐ καθαρευόντων καὶ ἀπ' ἀνδρῶν συνοσίας, καὶ τὰ Θεόγνια (so coll. S. F. Q. θεοῖνια vulg.) καὶ τὰ Ἰοβάκχεια γερμαίρω (Dobree cj. γερμαῶ) τῷ Διονύσῳ κατὰ τὰ πάτρια καὶ ἐν τοῖς καθήκονσι χρόνοις.

² F. Blass (ed. 1891) prints the inferior reading *θεοῖνια*, which has rightly been rejected by A. Mommsen *Heortologie* Leipzig 1864 p. 359 n. 2 and by E. Petersen in the *Rhein. Mus.* 1913 lxxvii. 248. The *θεοῖνια* was a name given to the demotic Dionysia as a festival of Dionysos *Θείνου* (Harpokr. s.v. *Θεοῖνου*). If that reading were sound, we should have an additional reason for linking the Anthesteria with the Rural Dionysia.

⁴ S. Wide in the *Ath. Mitth.* 1894 six. 248 ff., especially p. 280.

⁵ E. g. F. A. Voigt in Roscher *Lex. Myth.* i. 1073, L. C. Purser in Smith—Wayte—Marindin *Dict. Ant.* i. 639, J. Girard in Daremberg—Saglio *Dict. Ant.* ii. 238, F. Hiller von Gaertringen in Pauly—Wissowa *Real-Enc.* i. 2373 f., Mommsen *Feste d. Stadt Athen* p. 392 ff., Farnell *Cults of Grk. States* v. 217 f., A. Frickenhaus in the *Jahrb. d. kais. deut. Ak. Arch. Inst.* 1912 xxvii. 69, G. Murray *Four Stages of Greek Religion* New York 1912 p. 31 f.

⁶ A. Frickenhaus *loc. cit.* p. 80 ff. has adduced strong reasons for thinking that the *phoboi eōphorontes...των Διονύσου ἀπὸ τῆς ἐσχάρας εἰς τὸ θέατρον μετὰ φωτός* (*Corp. inscr. Att.* ii. 1 no. 471, 12 f., cp. *ib.* nos. 469, 14 f., 470, 11 f.) at the festival of the Lenaia. It is possible that this torch-light procession stood in some relation to the marriage of Dionysos.

Mr D. S. Robertson, Fellow of Trinity College, Cambridge, kindly draws my attention to the fact that Frazer *Golden Bough*³: The Magic Art ii. 137 has called in question the date usually assigned to the marriage, and has even (*ib.* n. 1) been tempted to conjecture that it took place in Gamelion. If so, it may well have happened at the Lenaia. In any case Mommsen's attempt (*Heortologie* p. 357 ff., *Feste d. Stadt Athen* p. 392 ff.) to connect it with Anthesterion 12 remains conjectural and unconvincing.

right in my contention that Dionysos as yet was not. Let us suppose that the *Anthestéria* was originally a day or days set apart for magic rites intended 'to make things bloom', and that, when Dionysos first came to be worshipped at Athens, this season was chosen as the fittest time for his conception. The view here advanced is not inconsistent with the Athenian belief that at the Anthesteria souls came up from the Underworld². It is likely enough that the yearly renewal of vegetation was attributed to the agency, perhaps even to the actual re-embodiment³, of the nameless and numberless dead. If Dionysos too was to be re-born, this surely was the moment for the procreative rite. The *panspermia* boiled in a pot (*chýtros*), which gave its name to the last day of the festival⁴, was a piece of primitive magic applicable at once to vegetation and the vegetative god. But, if the Anthesteria resembled the City Dionysia in celebrating the conception of Dionysos, did it also resemble the City Dionysia in providing the germ of comedy? Aristophanes in a familiar chorus tells how at the precinct in the Marshes on the day of the *Chýtroi* a scarcely-sobered *kómos* sang of Dionysos son of Zeus⁵. From such a *kómos*-song comedy, the *kómos*-song *par excellence*⁶, might well have arisen; and the more so, since we hear of definite contests as held on that concluding day⁷. The contests in question were

¹ See the simple and satisfactory remarks of Farnell *Cults of Gk. States* v. 222.

² Mommsen *Feste d. Stadt Athen* p. 390 n. 3, Farnell *op. cit.* v. 215 ff., and especially Harrison *Proleg. Gk. Rel.*² p. 32 ff.

³ Boetticher *Baumkultus* p. 254 ff. ('Bezug der Bäume auf Grab, Tod und Apotheose des Menschen') gives a good collection of relevant facts. Note also Emped. *frag.* 117 Diels *ap. Diog. Laert.* 8. 77 καὶ τὴν ψυχὴν παντοῖα εἶδη ζῳῶν καὶ φυτῶν ἐνδύεσθαι· φησὶ γοῦν· "Ἦδη γάρ ποτ' ἐγὼ γενέμην κοῦρός τε κόρη τε | θάμνος τ' οἰωνός τε καὶ ἐξ ἄλλος ἔμπυρος ἰχθύς, Emped. *frag.* 127 Diels *ap. Ail. de nat. an.* 12. 7 λέγει δὲ καὶ Ἐμπεδοκλῆς τὴν ἀρίστην εἶναι μετοίκησεν τὴν τοῦ ἀνθρώπου, εἰ μὲν ἐς ζῳῶν ἢ λήξῃς αὐτὸν μεταγάγοι, λέοντα γίνεσθαι· εἰ δὲ ἐς φυτὸν, δάφνην. ἃ δὲ Ἐμπεδοκλῆς λέγει, ταῦτά ἐστιν· Ἐν θήρεσσι λέοντες ὀρειλεχέες χαμαιεῖναι | γίνονται, δάφναι δ' ἐνὶ δένδρεσιν ἠγκόμοισιν. It seems probable that trees were planted on or around graves, not, originally at least, as a mere plesance (Rohde *Psyche*² i. 230), but rather as a vehicle for the soul of the deceased. See further A. Dieterich *Mutter Erde*² Leipzig and Berlin 1913 p. 49.

⁴ Mommsen *Feste d. Stadt Athen* p. 397 ff.

⁵ Aristoph. *ran.* 211 ff. λιμναῖα κρηνῶν τέκνα, | ξύναυλον ὕμνων βοᾶν, | φθεγζώμεθ', εὐγερην ἐμὰν ἀοιδάν, | κοᾶς κοᾶς, | ἂν ἀμφὶ Νυσηῖον | Διὸς Διώνυσσον ἐν | Λίμναισι ἀχῆσαμεν | ἀνίχ' ὁ κραιπαλόκωμος | τοῖς ἱεροῖσι Χύτροισι | χωρεῖ κατ' ἑμὸν τέμενος λαῶν ὄχλος.

⁶ The word κωμῳδία means properly 'the performance of the κωμῳδοί'; and the κωμῳδοί are 'those who sing in the κῶμος' (L. Meyer *Handb. d. gr. Etym.* ii. 345, Boisacq *Dict. étym. de la Langue Gr.* p. 544). The connexion with κῶμη, 'village,' is quite fallacious.

⁷ Philochoros *frag.* 137 (*Frag. hist. Gr.* i. 407 Müller) *ap. schol. Aristoph. ran.* 218 ἤγοντο δὲ ἀγῶνες αὐτόθι οἱ Χύτροι καλούμενοι, καθὰ φησι Φιλόχορος ἐν τῇ ἕκτῃ τῶν Ἀθίδων, cp. Favorin. *lex.* p. 1880, 44 f.

an obsolete custom revived by the orator Lykourgos (c. 396—323 B.C.), who passed a law to the effect that comedians should compete in the theatre on the day of the *Chytroi* and that the successful competitor should enter for the more important contest of the City Dionysia¹. This points to a comic contest as a time-honoured institution at the *Chytroi*, later superseded by the more brilliant shows of the City Dionysia, but restored in the fourth century B.C. as a first heat or preliminary competition. Theatrical displays of a quasi-comic character were certainly given at the Anthesteria during the first or second century of our era²; for Philostratos³ says of Apollonios:

‘The story goes that he rebuked the Athenians for the way in which they kept the Dionysiac festival in the month of Anthesterion. He supposed that they were flocking to the theatre in order to hear solos and songs, choruses and music, such as you get in comedy and tragedy. But, when he heard that, as soon as the flute gave the signal, they danced with all sorts of contortions and performed the epic and theological poems of Orpheus, playing the parts of Horai or Nymphs or Bacchants, he broke out into open censure of their conduct.’

Ten months later came the Rural Dionysia, a festival which we have already taken to be the equivalent of the Lenaia⁴. As such it would involve that ‘rustic ode’ which set forth the rending of Dionysos and so furnished the original core of tragedy. In short, the Anthesteria was an early festival of reproduction, at which the begetting of Dionysos was celebrated with rites that led on towards comedy; the Rural Dionysia was another early festival, at which the life-history of Dionysos was represented with rites that developed into tragedy. It will doubtless be objected⁵ that Dikaiopolis, who in Aristophanes’ *Acharnians* conducts a private celebration of the Rural Dionysia⁶, equips his daughter with a basket, his slave Xanthias with a *phallós*, and himself sings a phallic song⁷,—a performance more comic than tragic. To

¹ A. Westermann *Biographi minores* Brunswick 1845 p. 272, 39 ff.

² Hence perhaps the curious and misleading statement of Diog. Laert. 3. 56 *ὡς ἔκεινοι* (the Attic tragedians) *τέτρασι δράμασιν ἠγωνίζοντο, Διονυσίοις, Ληναίοις, Παναθηναίοις, Χύτροις, ὧν τὸ τέταρτον ἦν Σατυρικόν. τὰ δὲ τέτταρα δράματα ἐκαλεῖτο τετραλογία.*

³ Philostr. *v. Apoll.* 4. 21 p. 140 Kayser.

⁴ *Supra* pp. 666, 673.

⁵ The objection was at once pointed out to me by Mr F. M. Cornford.

⁶ Aristoph. *Ach.* 195 ff.

⁷ Cp. Plout. *de cupid. divit.* 8 ἡ πάτριος τῶν Διονυσίων ἑορτὴ τὸ παλαιὸν ἐπέμπετο δημοτικῶς καὶ ἰλαρῶς, ἀμφορεύς οἴνου καὶ κληματίς, εἶτα τράγον τις εἰλκεν, ἄλλος ἰσχάδων ἄρριχον ἠκολούθει κομίζων, ἐπὶ πᾶσι δὲ ὁ φαλλός. ἀλλὰ νῦν ταῦτα παρορῶται καὶ ἠφάνισται, χρυσιμάτων περιφερομένων καὶ ἱματίων πολυτελῶν καὶ ζευγῶν ἐλαυνομένων καὶ προσωπείων. There is here, however, no definite indication of season, place, or date.

this objection I would reply, first, that when Aristophanes penned his play in 425 B.C. comedy had already invaded not only the Lenaia (at which the *Acharnians* was produced) but also its provincial counterpart the Rural Dionysia¹. Authors and inscriptions alike attest both comedies and, more often, tragedies as held at this festival². Secondly, I would point out that in Aristophanes' play the procession marshalled by Dikaiopolis leads up to a climax in which he is murderously assaulted by the Chorus. They spring upon him from an ambush, crying 'Pelt him! Pelt him!'³ and declaring that they hate him more than Kleon, whom they mean to cut into pieces⁴. Now we lose half the fun of the situation, if we fail to realise that this is a travesty of the *sparagmós* or 'rending' of Dionysos by the Titans. It is, of course, always difficult to know when one has got to the bottom of an Aristophanic jest. It may even be that in *Xanthias* attacked by the Acharnians, the 'Fair'-man by the charcoal-burners, we should recognise a tragedy-turned-comedy resembling our own rough-and-tumble between the miller and the sweep⁵.

¹ The 'Ἀσκολιασμός, in which the competitors balanced themselves on an inflated goat-skin, standing the while upon one leg (Sir W. Smith in Smith—Wayte—Marindin *Dict. Ant.* i. 209 f., E. Saglio in Daremberg—Saglio *Dict. Ant.* i. 472 f., E. Reisch in Pauly—Wissowa *Real-Enc.* ii. 1698 ff.), recalls the use of the Διὸς κώδιον, upon which persons stood to be purified supporting themselves on their left foot alone (*supra* p. 422 ff.). Perhaps the 'Ἀσκολιασμός too originated as a serious rite, designed to bring the celebrants one by one into contact with the skin of the sacred beast. According to Hyg. *poet. astr.* 2. 4, Icarus (*sic*) slew the he-goat that had cropped his vine-leaves, inflated its skin, and made his comrades dance round it—whence the line of Eratosthenes Ἰκαρίου ποσὶ πρώτῳ περὶ τράγον ὠρχήσαντο (*supra* p. 678 n. 4).

² Mommsen *Feste d. Stadt Athen* p. 355.

³ Possibly the pelting received by Aischines as an actor (Dem. *de cor.* 262) is to be connected with his performance at the Rural Dionysia (*ib.* 180, 242).

⁴ Aristoph. *Ach.* 280 ff.

⁵ Dr L. R. Farnell in the *Journ. Hell. Stud.* 1909 xxix p. xlvii and in his *Cults of Gk. States* v. 130 f., 234 ff., continuing Usener's fruitful investigation of the Macedonian festival τὰ Ξανθικά, i.e. Ξανθικά (*Archiv f. Rel.* 1904 vii. 301 ff. = H. Usener *Kleine Schriften* Leipzig and Berlin 1913 iv. 438 ff.), has argued that the tale of the Boeotian Xanthos slain by the Neleid Melanthos with the aid of Dionysos Μελάναγρις (schol. Aristoph. *Ach.* 146; cp. schol. Plat. *Symp.* 208 D, who calls the Boeotian Xanthios and does not mention Dionysos) presupposes 'an old Thrako-Greek mummers' play in which a divine figure in a black goat-skin kills another divine figure who is the fair or bright god.' Dr Farnell holds that this play was properly a vegetation-masque performed in the winter, which, attached to the goat-god *qua* vegetation-god in his own northern home, was carried through Greece by the Minyans (Melanthos as a Neleid was a Minyan, as were the Φολβείαι and Ὀλεΐαι of Orchomenos in Boiotia (Plout. *quaest.* Gr. 38)), acquired variety of *motif* as it spread from village to village, reached Athens *via* Eleutherai, and ultimately became the parent of Greek tragedy. This important contention cannot be discussed in a foot-note. It certainly contains large elements of truth, and has not, in my opinion, been materially shaken by Prof. Ridgeway's criticism (W. Ridgeway *The Origin of Tragedy* Cambridge 1910 p. 73 ff.). But here it is in point only to quote

The relation of the four Dionysiac festivals as here determined may be conveniently set forth in tabular form. It appears that the Anthesteria and the Rural Dionysia were duplicated after a month's interval by the City Dionysia and the Lenaia respectively¹. How is this duplication to be explained? According to the Greek and Roman chronologists, the earliest attempt to correct the lunar by the solar year was the adoption of a *trieteris* or two-year cycle, wherein the years consisted alternately of twelve and thirteen months². We are expressly told that this cycle was used for the mysteries of Dionysos³, who in many places had trieteric rites⁴. Further, we have learnt that in Crete at least these rites were performed side by side with an annual celebration⁵ and represented

Dr Farnell's words: 'The black man could easily degenerate into comedy; the soot-covered figure in the phallophoria [Athen. 622 D] appears to have been comic, and this is the case now with our May-day sweep.'

¹ On the attempt of O. Gilbert *Die Festzeit der Attischen Dionysien* Göttingen 1872 to prove that 'die Lenaeen und Anthesterien sind identisch und gehören zu den ländlichen Dionysien' see O. Kern in Pauly-Wissowa *Real-Enc.* v. 1021 f.

² Gemin. *elem. astr.* 8. 26, Censorin. *de die nat.* 18. 2. So T. Mommsen *Die römische Chronologie bis auf Caesar* Berlin 1859 p. 224 ff. and A. S. Wilkins in Smith—Wayte—Marindin *Dict. Ant.* i. 337: see, however, F. K. Ginzel *Handbuch der mathematischen und technischen Chronologie* Das Zeitrechnungswesen der Völker Leipzig 1911 ii. 366 ff.

³ Censorin. *de die nat.* 18. 2.

⁴ Gruppe *Gr. Myth. Rel.* p. 956, W. Quandt *De Baccho ab Alexandri aetate in Asia Minore culto* Halis Saxonum 1913 p. 279 Index s.v. Τριητηρίδες.

Dr Farnell in the *Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 139 f. and in his *Cults of Gk. States* v. 177 ff. rejects the calendrical explanation of the Dionysiac τριητηρίδες on grounds that to me seem unsatisfactory: (a) 'we know that the Greeks corrected their calendar every eight years' (Macr. *Sat.* 1, 13). But there is nothing to suggest that they ever did this every other year.' This ignores the definite statements of Gemin. *elem. astr.* 8. 26 and Censorin. *de die nat.* 18. 2, who both assert that the most ancient form of the luni-solar year was the *trieteris* of 12 + 13 months. (b) 'And it is not with Greeks but with uncultured Thracians that we are here concerned.... But the barbarous tribes of Thrace were scarcely capable of such accurate solar observations as would compel them to correct their lunar calendar every other year.' If it comes to *à priori* argumentation, surely the very rough approximation of the *trieteris* is much more suitable to a barbaric tribe than the comparatively exact eight-year cycle.

But Dr Farnell is constructive as well as destructive: 'I venture to suggest, as a new hypothesis, that the "trieterica" are to be associated with the original shifting of land-cultivation which is frequent in early society owing to the backwardness of the agricultural processes^d (Vide Hansen, *Agrarhistorische Abhandlungen*, i, pp. 125—126.); and which would certainly be consecrated by a special ritual attached to the god of the soil.' The weak point in this ingenious view is that it does not account for the trieteric rites in other cults, of which Gruppe *Gr. Myth. Rel.* p. 956 n. 4 gives a formidable list. Dr Farnell attributes these to 'casual local convenience or exigencies of finance.' It is, I think, safer to postulate the two-year cycle as a *vera causa* of all trieteric rites.

⁵ I cannot share the odd view advanced by A. Fick *Hattiden und Danubier in Griechenland* Göttingen 1909 p. 47: 'Das ξρος der Trieteris bestand aus 12 Halbmonaten, wie auch die 13 Monate des Mythos von Ares' Fesselung durch die Aloaden *E* 385 ff.

THE ATTIC FESTIVALS
OF DIONYSOS

Fig. 511.

als Halbmonate zu verstehen sind: in jedem Monate ($\mu\eta\upsilon\sigma$) durchläuft der Mond ja zweimal alle Lichtphasen, wenn auch in verschiedener Richtung. In Wahrheit wurde die Trieteris in jedem Mittwinter gefeiert, beim Beginne eines dritten Halbjahres.'

the passion of the god¹. Presumably, then, in Attike, where the intercalary month was always a second Poseideon, the *trieteris* involved a ritual representation of Dionysos' death in the month following the first Poseideon. But the *trieteris* was at a very early date, probably in 'Minoan' times², found to be inadequate. For, given alternate years of 354 and 384 days, every two years the error would amount to about $7\frac{1}{2}$ days, and every eight years to about 30 days, in fact to a whole month. Hence, says Geminos, the first attempt to rectify the error took the form of an *oktaeteris*, in which three (not four) months were intercalated in the third, fifth, and eighth years of the cycle³. This arrangement brought the lunar year into approximate accordance with the solar year. But it laboured under a serious disadvantage. Once in every period of eight years the intercalary month was dropped, and with it would go the trieteric rites of Dionysos. Perhaps it was to guard against this disaster, perhaps also to avoid the confusion arising from the performance of trieteric rites every third, fifth, and eighth years, that the Athenians made the rites annual and assigned them to Gamelion, the month following Poseideon. We can thus account for the celebration of the Rural Dionysia (*i.e.* the old annual festival) and the Lenaia (*i.e.* the old trieteric rites) in successive months. The date of the City Dionysia would be fixed by that of the Lenaia, the significant interval of ten lunar months being carefully observed⁴.

In sundry other festivals of the Attic year, all of them mystic in character and all belonging by rights to Demeter and Kore, Dionysos as a god of kindred function played a subordinate part. He appears to have gained some footing at Agra or Agrai, for the Lesser Mysteries there are described by a late author as 'a representation of Dionysos' story⁵. He certainly intruded, under the name of Iakchos, into the Greater Mysteries at Eleusis⁶. And

¹ *Supra* p. 662 f.

² See Gruppe *Gr. Myth. Rel.* p. 957 n. 1. The evidence is discussed more fully by Dr Frazer in his *Golden Bough*³: The Dying God pp. 58—92 and by me in the *Class. Rev.* 1903 xvii. 411 and in *Folk-Lore* 1904 xv. 394—412.

³ Gemin. *elem. astr.* 8. 27 ff.

⁴ Dr Farnell's contention (*supra* p. 682 n. 2), that it was Peisistratos who introduced the cult of Dionysos *Eleutheréis* and organised the City Dionysia as his festival, allows us to suppose that Peisistratos only re-organised a previously existing Dionysiac celebration. I incline to think that this was the case and that the essential feature of the pre-Peisistratic *fête* was the performance of the dithyramb (*supra* p. 681 f.).

⁵ Steph. Byz. *s.vv.* "Αγρα καὶ Ἀγραί, χωρίον... ἐν ᾧ τὰ μικρὰ μυστήρια ἐπιτελεῖται, μίμημα τῶν περὶ τὸν Διόνυσον.

⁶ Gruppe *Gr. Myth. Rel.* p. 54 n. 11 ff., p. 1167 f., p. 1435 n. 2, E. Pottier in Daremberg—Saglio *Dict. Ant.* iii. 369 ff., and especially Farnell *Cults of Gk. States* iii. 146—153.

he was recognised at least as an adventitious deity in the mystic rites of the Haloia¹. These festivals fell in Anthesterion, Boedromion, and Poseideon. It is therefore tempting to see in them some traces of a Dionysiac cycle. Accordingly A. Mommsen has surmised that at the Lesser Mysteries on or about Anthesterion 20 Zeus begat Iakchos by Semele; that Semele bore Iakchos as a seven-months' child, who at the Greater Mysteries on Boedromion 20 was taken to Eleusis and there incorporated with Zeus; and finally that at the Haloia in Poseideon Zeus himself gave birth to Dionysos². But this reconstruction is a mere fancy-flight, which goes far beyond ascertained facts and may be safely relegated to the limbo of improbable conjectures³.

The arrangement of the Dionysiac year that I have been advocating might be supported by a consideration of analogous festivals in Italy⁴. But it will be more in point to observe that

¹ Schol. Loukian. *dial. mer.* 7. 4 p. 279, 24 ff. Rabe, Bekker *anecd.* i. 384, 31 ff.

² Mommsen *Feste d. Stadt Athen* p. 23 f.

³ Mommsen *loc. cit.* even attempts to combine all the Attic festivals of Dionysos, with the solitary exception of the City Dionysia (which he believes to have been originally Apolline!), in a consistent Dionysiac *Jahreskreis*. It is a pity that a scholar who has done such good service in the collection of materials should waste his time by building them into a fantastic whole.

⁴ We must not here be drawn into a discussion of the Roman calendar. But in passing we may note that the Liberalia of March 17 and the Saturnalia of December 17, separated by the same interval of nine solar or ten lunar months, appear to be the old Italian equivalents of the Greek festivals examined above.

Of the Liberalia little is known (W. Warde Fowler *The Roman Festivals* London 1899 p. 54 ff.). The aged priestesses of Liber crowned with ivy, who sat about the streets with cakes and a brazier sacrificing on behalf of their customers (Varr. *de ling. Lat.* 6. 14, Ov. *fast.* 3. 725 ff.), recall the *Geraiat* of the Anthesteria (*supra* p. 684); and in many parts of Italy, including Rome, Liber was served with phallic rites *pro eventibus seminum* (Aug. *de civ. Dei* 7. 21, cp. 4. 11, 6. 9, 7. 2, 7. 3, 7. 16: see further G. Wissowa in Roscher *Lex. Myth.* ii. 2021 ff. and in his *Rel. Kult. Röm.*² pp. 120, 298 f., who regards Liber as a creative or procreative god developed out of Iupiter Liber and later identified with the Greek Dionysos). T. Mommsen *Römische Geschichte*⁷ Berlin 1881 i. 162 took the Liberalia to be 'das Fest des Kindersegens.'

The Saturnalia too stood in obvious relation to *semina*. In view of the fact that our own Christmas has been to a large extent grafted upon this festival (see e.g. C. A. Miles *Christmas in Ritual and Tradition Christian and Pagan* London 1912 pp. 20 ff., 113, 165 ff., 180, 359), we may reasonably conjecture that it once involved a ritual birth. Dr Frazer (*Golden Bough*³: The Magic Art ii. 311) has also detected in it traces of a ritual marriage and (*ib.* p. 310 ff.) of a ritual death. The human victim originally slain at the Saturnalia (to Dr Frazer's evidence we may perhaps add Plaut. *Amph.* 4. 2. 15 ff. *AM. Tun' me mactes, carnufex? nisi formam dii hodie meam perduint, | Faxo, ut bubulis coriis onustus sis Saturni hostia. | Ita ego te certè cruce et cruciatu mactabo. exi foras | Mastigia*). The passage is, owing to the loss of a quaternion, absent from our MSS. It is usually supposed that the gap was filled up by Hermolaus Barbarus in the fifteenth century: see J. L. Ussing *ad loc.* But the sentences quoted, which describe the victim of Saturn as scourged and crucified, involve a very curious anticipation of modern discoveries, and even if written by Hermolaus Barbarus may well have been drawn from

the suggested origin of tragedy in the Lenaeon rite¹ is borne out by the modern carnival-plays of northern Greece. These plays, which have been carefully described of late by Messrs G. F. Abbott², R. M. Dawkins³, J. C. Lawson⁴, and A. J. B. Wace⁵, mostly occur in the winter at Epiphany or the New Year or both, though in the Pelion district they are performed on May-day. Mr Wace⁶ summarises what is known of them :

'It seems clear on comparing the accounts of the different festivals that though they are celebrated over a wide area, and at different seasons of the year, the same idea is present in all. In every instance there is a death and resurrection. In nearly all cases one of the two principal characters is disguised in skins, or at least a skin mask. In the songs sung at Epiphany in Thessaly, and those sung on Mayday there are several common elements. Also the mere fact that licensed chicken stealing is a feature of the festival in Thrace and Thessaly seems to point to a similar tradition. Is it then possible out of the different versions to reconstruct the main plot of the drama?.....we may imagine the full original of the drama to have been somewhat as follows. The old woman first appears nursing her baby in her arms (*Viza* and *Léchovo*), and this child is, in some way or other, peculiar (*Viza*). He grows up quickly and demands a bride (*Viza*, and on Pelion the old man is sometimes called the old woman's son). A bride is found for him, and the wedding is celebrated (at *Lechovo* a priest is one of the characters), but during the wedding festivities he quarrels with one of his companions who attempts to molest the bride, and is killed. He is then lamented by his bride, and miraculously restored to life. The interrupted festivities are resumed, and the marriage is consummated. It is worth noting for those who seek for the origins of Greek tragedy that this simple drama recounting, like an ancient trilogy, the life history of its hero ends with a satyric display that could be paralleled by the satyric drama that followed a trilogy. Also, in view of the survivals of Dionysos worship seen in these festivals, it should be noted that they seem to occur only in North Greece (Thessaly, Epirus, Macedonia, and Thrace), which was, after all, the reputed home of Dionysos worship.'

some source inaccessible to us) was on this showing the Italian counterpart of the child dismembered and eaten by the Thracian chiefs (*supra* p. 654 ff.). A Roman parallel to that gruesome rite has been already cited (*supra* p. 656 n. 2), viz. the *sparagmós* of Romulus whose fragments were buried by the senators (to fertilise the soil?); and Frazer *op. cit.* ii. 313 remarks that July 7, the day on which Romulus disappeared, was a festival, the *Nonae Caprotinae*, somewhat resembling the *Saturnalia*.

⁶ A. J. B. Wace in the *Ann. Brit. Sch. Ath.* 1909—1910 xvi. 250 f.

A divine babe who grows up with phenomenal speed and seeks a divine consort, a murderous attack made upon him by others who would occupy his place and win his bride, a miraculous restoration of the dead to a new life—these are precisely the elements that we detected in the Zagreus-cult of the Cretans¹, in the Orphic mystery of the Thracians², and in the Lenaeian rite of the Athenians³. We cannot doubt that in Crete and Thrace and Athens alike we have to do with variations on a common theme, the annual birth, death, and resurrection of Dionysos, the son of the sky-father by the earth-mother.

The name of the mother and the treatment of the child varies from place to place. In Crete, where this religion appears as a development of the old Anatolian worship, the parent remains Rhea and the babe acquires the name Zagreus⁴. In Thracophrygian belief, as represented by Sabazian and Orphic myths, the earth-goddess was dualised into Demeter and Kore, by whom Zeus begat the horned infant Dionysos⁵. At Athens the mother keeps her northern name of Semele, and her child is Iakchos or Dionysos⁶. Again, among the Thracians, the originators and rightful owners of this cult, the part of Dionysos was played by a child actually dismembered and eaten⁷. In Crete the human victim was replaced by a bull, the cannibal feast by a bovine omophagy⁸. At Athens civilisation would not permit even this attenuated orgy: the slaughter became dramatic make-belief, and the omophagy a banquet for the successful poet and his *troupe*⁹. The Athenians of the fourth century, sitting on cushions in their theatre to witness a triumph of the tragedian's art, had travelled far indeed from the primitive simplicity of that *mimesis*, in which the celebrants had identified themselves with the god to become the consorts of the goddess and so share in her all-pervading life.

(ι) The Satyric Drama.

Yet even in the fourth century one touch of primitive life remained in piquant contrast with surrounding refinement. I refer to the Satyric drama. Here Prof. G. Murray has made a very interesting suggestion, which it concerns us either to accept or

⁸ At the trieteric rites of Dionysos Semele had εὐλερόν τε τράπεζαν ἰδὲ μυστήριά θ' ἀγνά (Orph. *h. Sem.* 44. 9). In Hesych. Σεμέλη· τράπεζα. παρὰ δὲ Φρυγίων ἑορτή O. Jessen would read Σεμέλης τράπεζα· παρὰ Φρυγίων ἑορτή (Roscher *Lex. Myth.* iv. 668).

to reject. 'The Satyr-play,' he says¹, 'coming at the end of the tetralogy, represented the joyous arrival of the Reliving Dionysus and his rout of attendant daimones at the end of the Sacer Ludus.'

The question of the Satyr-play is so bound up with that of the Satyrs themselves that one is practically forced to begin by asking—Who were the Satyrs? Were they the horse-like or the goat-like creatures of the Attic vase-painters? After a full and, I hope, impartial survey of the facts² I am of opinion that by rights the horse-creatures were *Silenoí* and the goat-creatures *Sátyroi*, but that as early as the middle of the fifth century, and perhaps earlier, the goat-type proper to the *Sátyroi* had been, at least for dramatic purposes, more or less contaminated with the horse-type proper to the *Silenoí*³.

On the *kratér* of Klitias and Ergotimos (c. 600—550 B.C.) three ithyphallic creatures with equine legs, tails, and ears are inscribed *Silenoí*⁴. On a *kylix* signed by the same Ergotimos, now at Berlin, an ithyphallic being with human legs and feet, but equine tail and ear, is again inscribed *Silénos*⁵. On a fragmentary black-figured *kylix* from the Persic *débris* at Athens are the remains of a shaggy personage inscribed *Silénos*, but whether he is equine or otherwise does not appear⁶. Red-figured vases tell the same story. A *kylix* at Munich shows an ithyphallic figure with equine tail named *Silénos*⁷. A gilded *aryballos* at Berlin calls another

¹ G. Murray in Harrison *Themis* p. 343.

² For a fair summary of the evidence, both literary and monumental, see E. Kuhnert's article in Roscher *Lex. Myth.* iv. 444—531. The learned author reaches, as I hold, the wrong conclusion, but he is scrupulously just to his opponents.

³ S. Reinach in an able essay on 'Marsyas' in his *Cultes, Mythes et Religions* Paris 1912 iv. 29—44 argues that the *Silenoí* were originally asses, and that their type became equine in Greece through confusion with that of the Centaurs. Miss Harrison, who first drew my attention to Reinach's view, adds (May 22, 1913): 'I suspect that the mules and asses turned into horses in horse-bearing Thessaly.'

Reinach may well be right in supposing that the *Silenoí* were asinine before they became equine. But on the Attic vases, with which we are here concerned, the transformation was already complete: the *Silenoí* are regularly depicted with the traits, not of asses, nor even of mules, but of horses pure and simple.

Satyric mask of terra cotta from Anthedon.

See page 697 n. 5.

nude figure with equine tail and pointed ear *Silenós*¹. A *stamnos* in the British Museum (c. 440—400 B.C.) gives the name *Silenós* to a nude figure with pointed ear: in this case the horse-tail is absent, because Silenos has his hands bound behind him and the hanging cords produce the effect of a tail; other exactly similar figures on the same vase are tailed like a horse². An *amphora* with volutes in the Jatta collection has again a figure with equine tail and ear inscribed *Silenós*³. In view of these vases we may safely conclude that the type of *Silenoi* known to Attic painters in the sixth and fifth centuries B.C. was equine, not hircine⁴.

But beside these horse-creatures Attic vases of the fifth century represent goat-creatures, who are in no case inscribed. The most obvious name to give them is *Sátýroi*, because the Satyrs of the Hellenistic and Roman age had undoubtedly the horns, ears, tail, and tufted hair of goats⁵. In the absence, however, of a definite inscription, an argument can be drawn from the nature of the scenes in which these goatish beings appear. P. Hartwig⁶ and K. Wernicke⁷ have between them made out a list of fifteen

¹ Furtwängler *Vasensamml. Berlin* ii. 690 ff. no. 2471, *id. Samml. Saboureff Vasen* p. 4 ff. pl. 55, Kretschmer *op. cit.* p. 132, C. Fränkel *op. cit.* pp. 72, 98 f., A. Legrand in Daremberg—Saglio *Dict. Ant.* iii. 1489 fig. 4772.

² *Brit. Mus. Cat. Vases* iii. 274 f. no. E 447 (ΣΙΛΕΝΟΣ), Reinach *Rép. Vases* i. 122, E. Braun in the *Ann. d. Inst.* 1844 xvi. 200 ff., *Mon. d. Inst.* iv pl. 10, Kretschmer *op. cit.* p. 132 (ΣΙΛΕΝΟΣ).

³ H. Heydemann *Satyr- und Bakchennamen (Winckelmannsfest-Progr. Halle 1880)* p. 3 ff. with pl., L. Deubner in Roscher *Lex. Myth.* iii. 2117 f. fig. 8, F. Hauser in Furtwängler—Reichhold *Gr. Vasenmalerei* ii. 328 f. fig. 107, C. Fränkel *op. cit.* pp. 72, 98 f. (ΣΙΛΗΝΟΣ).

⁴ Miss Harrison has pointed out to me an interesting possibility. O. Lagercrantz 'Zur Herkunft des Wortes Silen' in the *Sertum Philologicum Carolo Ferdinando Johansson oblatum* Göteborg 1910 pp. 117—121 refers *σιλανός*, *σιληνός* to a root *σῖλ-* (Indo-Europæan **h₂l-*), whence Thraco-Phrygian **σίλα*, 'Brunst, Geile, Mutwille der Hengste,' and **σίλανος*. He finds a nearly related word in *κῆλων*, 'a stallion' (used of horses, of asses, and of Pan: see Stephanus *Thes. Gr. Ling.* iv. 1516 B—C), and further *επικρύβος* (for **κηλυβος*: Boisacq *Dict. Étym. de la Langue Gr.* p. 451 'ingénieux, mais douteux'), *κίλας* (better *κηλας*), *σιλαπορῶσαι*, *σιληπορῶειν*, modern Greek *τσιλιπορῶ*, *τσιλιπούρδισμα*. But P. Kretschmer in *Glotta* 1910 ii. 398, *ib.* 1913 iv. 351 ff. prefers to derive *Σιληνός* from the Thracian *ζῖλα*, 'wine.' *Viderint philologi.*

⁵ E. Kuhnert in Roscher *Lex. Myth.* iv. 488 ff., 516 ff.

I take this opportunity of publishing (pl. xxxvii) a fine votive mask of terra cotta, said to have been found near a spring at Anhedon and now in my possession. It measures 8½ inches in height, and has three holes for suspension. The eyes and nostrils are pierced; but the mouth is not. The face has the snub nose, the ears, the horns, and even the *noncolae* of a goat. It is wearing both a head-band and an ivy-wreath. In short, it has all the characteristics of a Satyric *choreutês*. Mr H. B. Walters, on grounds of style, refers it to the Hellenistic period.

⁶ P. Hartwig in the *Röm. Mitth.* 1897 xii. 89 ff.

⁷ K. Wernicke in *Hermes* 1897 xxxii. 290 ff. and in Roscher *Lex. Myth.* iii. 1410 f.

fifth-century vases on which goat-figures occur¹. They are seen

¹ (1) Red-figured *guttus* from Nola (J. de Witte *Description des antiquités et objets d'art qui composent le cabinet de feu M. le chevalier E. Durand* Paris 1836 no. 142) =goat-headed figure skipping on all fours.

(2) Red-figured *guttus* from Nola (J. J. Dubois *Description des antiqués faisant partie des collections de M. le comte de Pourtalès-Gorgier* Paris 1841 no. 384, *Catalogue des objets d'art...qui composent la collection de feu M. le comte de Pourtalès-Gorgier* Paris 1865 no. 399)=goat-headed figure skipping on all fours.

(3) Late black-figured *oinochôe* with white ground at Munich (Jahn *Vasensamml. München* p. 214 no. 682 wrongly described)=goat with bearded human head skipping on all fours: with him dances a bearded Silenos.

(4) Red-figured *skyphos* of c. 440 B.C. from Certosa at Bologna (Pellegrini *Cat. vas. gr. dipint. Bologna* p. 216 no. 491, E. Brizio in the *Bull. d. Inst.* 1872 p. 112 no. 86, H. Heydemann *Winckelmannsfest- Progr. Halle* 1879 p. 63 no. 150, P. Hartwig in the *Röm. Mitth.* 1897 xii. 92 f. fig. 2)=obv. human figure with goat's head, tail, and legs dancing with a goat that stands on its hind legs; rev. goat with human arms and hands skipping on all fours to compete with an actual goat. The design has been much restored.

(5) Fragment of a red-figured *skyphos* of c. 450 B.C. now in the possession of F. Hauser at Stuttgart (P. Hartwig in the *Röm. Mitth.* 1897 xii. 91 fig. 1)=human figure with goat's head and tail dancing.

(6) Red-figured *askôs* of c. 450 B.C. in the British Museum (*Brit. Mus. Cat. Vases* iii. 358 no. E 735)=obv. human figure with goat's horns and tail misusing a dog; rev. Silenos reclining.

(7) Red-figured jug of c. 450 B.C. now in the possession of Commendatore Galeozzo at Santa Maria di Capua (P. Hartwig in the *Röm. Mitth.* 1897 xii. 92)=human figure with goat's feet and beast's ears striding forwards, his hands crossed at his back; round his head is twisted a curious skin, and behind him is a basket.

(8) Red-figured *kratêr* of c. 440 B.C. in the Albertinum at Dresden (P. Herrmann in the *Jahrb. d. kais. deutsch. arch. Inst.* 1892 vii Arch. Anz. p. 166 f., P. Hartwig in the *Röm. Mitth.* 1897 xii. 92, Müller—Wieseler—Wernicke *Ant. Denkm.* ii. 2. 226 f. pl. 19, 1, Harrison *Proleg. Gk. Rel. 2 p. 277 f. fig. 67)=obv. three human figures ($\zeta\iota\text{M}\text{O}\zeta$, $\Pi\text{AN}\Delta\text{R}\text{?}$, and $\dots\text{O}\zeta$) with goat's horns, tail, and feet capering round Hermes ($\epsilon\rho\mu\epsilon\zeta$), who holds a forked stick, and Pherephatta ($\phi\epsilon\rho\epsilon\phi\alpha\tau\tau\alpha$), who rises from a grotto; rev. three draped figures.*

(9) Red-figured *skyphos* of c. 440 B.C. in the Albertinum at Dresden (P. Hartwig in the *Röm. Mitth.* 1897 xii. 93 n. 1, K. Wernicke in *Hermes* 1897 xxxii. 298)=similar goat-figure on either side of the vase, one with equine tail.

(10) Red-figured *skyphos* of c. 450 B.C. from Vico Equense in the Bourguignon collection at Naples (W. Fröhner in the *Ann. d. Inst.* 1884 lvi. 205 ff. pl. M, Reinach *Rép. Vases* i. 348, 1 f., C. Robert *Archaeologische Maerchen aus alter und neuer Zeit* Berlin 1886 p. 194 f. fig., P. Hartwig in the *Röm. Mitth.* 1897 xii. 91 f.)=obv. two human figures with goat's head and tail capering, while between them a goddess rises from the ground; rev. two Silenoi with horse's ears and tail dancing on either side of a Maenad.

(11) Red-figured *kratêr* of c. 450 B.C. from Falerii, now at Berlin (L. Bloch in Roscher *Lex. Myth.* ii. 1378, P. Hartwig in the *Ath. Mitth.* 1896 xxi. 384 n. 2 and in the *Röm. Mitth.* 1897 xii. 89 ff. pl. 4—5)=obv. (a) a goddess with diadem and *himétion* rising from the ground, surrounded by four dancing figures with the horns, ears, and tails of goats, (b) a lion and a bull; rev. (a) Hermes erect, *caduceus* in hand surrounded by four dancing goat-figures of the same sort.

(12) Red-figured *kratêr* of c. 450 B.C. from Altemura in the British Museum (pl. xxxviii, *Brit. Mus. Cat. Vases* iii. 285 f. no. E 467, A. H. Smith in the *Journ. Hell. Stud.* 1890 xi. 278 ff. pls. 11 f., P. Hartwig in the *Röm. Mitth.* 1897 xii. 92)=obv.

capering or dancing, for the most part alone¹, but sometimes paired with a goat² or with a horse-tailed *Silenós*³. Twice they dance round *Hermes*⁴; once, round a goddess rising from the ground⁵. Twice they cut their capers about a pair of deities—*Hermes*, who holds a forked stick or a *caduceus*, and *Pherephatta*, who emerges from a grotto or more simply from the ground⁶. Now these situations recall certain scenes in the carnival-plays of modern Greece, which we have already compared with the Lenaeon performance⁷. In fact, it is possible to interpret the vases with reference to that performance. We might, for example, suppose some such sequence as the following:—

Scene i: *Hermes*, lyre in hand, sits on a rock awaiting the *ánodos* of the earth-goddess.

Scene ii: the earth-goddess rises from an artificial cavern.

Scene iii: she hands over her child to *Hermes*, who acts as its foster-father.

Further, if the Lenaeon drama was, as we have contended, the true parent of Attic tragedy, it was presumably followed by a Satyric display⁸. And it may therefore fairly be argued that

(a) the decking of Pandora, (b) four human figures dancing round a flute-player; each dancer wears a snub-nosed mask (?) with goat's horns and ears, a black waist-band to which is attached an erect *phallós* and a goat's tail, and shoes (?) in the form of goat's feet; rev. (a) girls dancing round a flute-player in the presence of a *choregós*, (b) a group of four horse-tailed *Silenoi*, *Maenad*, etc. playing at ball. Height of vase 1 ft 7 $\frac{3}{8}$ ins.

(13) Red-figured *kratér* of late Attic style, c. end of fifth century B.C., now at Gotha (*Mon. d. Inst.* iv pl. 34, E. Braun in the *Ann. d. Inst.* 1846 xviii. 238 ff., Lenormant—de Witte *Él. mon. cér.* ii. 156, iii. 255 f. pl. 90, Reinach *Rép. Vases* i. 129, 2, P. Hartwig in the *Röm. Mitth.* 1897 xii. 93)=obv. *Hermes* (ΕΡΜΗΣ) seated on a rock with an ivy-wreath on his head and a lyre in his hand: round him dance three human figures wearing head-bands and ivy-wreaths; they have the horns, ears, tails, shaggy thighs, and feet of goats; rev. three draped figures.

(14) Red-figured *kratér* found at Chiusi in 1854 (*Arch. Zeit.* 1855 xiii. Anz. p. 6*) = *Hermes* surrounded by goat-footed figures with inscriptions.

(15) Black-figured *kýlix* from Tanagra, not earlier than c. 450 B.C., now in the collection of Kyros Simos at Thebes (G. Körte in E. Bethe *Prolegomena zur Geschichte des Theaters im Alterthum* Leipzig 1896 p. 339, P. Hartwig in the *Röm. Mitth.* 1897 xii. 91)=ithyphallic dancer with the horns and face of a goat, but the tail of a horse, holding an *amphora*.

Nos. (1), (2), and (14) of this list are known only from the records here cited.

¹ *Supra* p. 698 n. 1 nos. (1), (2), (5), (7), (9), (15).

² *Supra* p. 698 n. 1 no. (4).

³ *Supra* p. 698 n. 1 no. (3): cp. the reverse of nos. (10) and (12).

⁴ *Supra* p. 698 n. 1 nos. (13) and (14).

⁵ *Supra* p. 698 n. 1 no. (10).

⁶ *Supra* p. 698 n. 1 nos. (8) and (11).

⁷ *Supra* p. 694 f.

⁸ This is not definitely recorded (A. E. Haigh *The Attic Theatre*³ rev. by A. W. Pickard-Cambridge Oxford 1907 p. 25); but our records are very incomplete.

in the goatish figures of the vases we should recognise the Satyrs of the primitive Satyr-play.

This conclusion is not at variance with fifth-century representations of more advanced Satyric plays. Of such the earliest specimen (c. 450 B.C.) is perhaps the *kratér* from Altemura, now in the British Museum (pl. xxxviii)¹, which shows a goat-chorus dancing round a flute-player². It is by no accident that in juxtaposition with the goat-dancers the vase-painter has placed the decking of Pandora, herself but another form of the earth-goddess, 'Giver of All³.' Of the same date, or but little later, is a group of vases including a *kratér* at Deepdene (pl. xxxix, 1)⁴, a *dinos* at Athens⁵, and sundry fragments at Bonn⁶, which presuppose a larger and better original, possibly a fresco by Polygnotos,

¹ *Supra* p. 698 n. 1 no. (12).

² Pratinas of Phlious, who *πρῶτος ἔγραψε Σατύρους* (Soud. s.v. Πρατίνας), in a scathing lyrical fragment (1 Bergk⁴, 1 Hiller) *ap.* Athen. 617 B—F derides the introduction of flute-music into the rites of Dionysos.

³ See e.g. P. Weizsäcker in Roscher *Lex. Myth.* iii. 1520 ff.

⁴ I am indebted to my friend Mr E. M. W. Tillyard, Fellow of Jesus College, Cambridge, for the photograph of this vase, hitherto unpublished, and for the following description of it:

⁵ *Attic Bell-Krater*. Height 27^m. The preservation is perfect except for two small chips in the rim. The shape is early, the body being broad and heavy, the base tapering little and the foot being a plain disc. Above, on a higher plane than the body of the vase, is a myrtle-wreath pattern; below, is a band of double maeanders in threes, divided by saltire-squares. At the handle-bases are egg-and-dot patterns.

On the obverse is a dramatic scene with three figures. On the right is a small stool-like platform on which stands a silen in the attitude known as the *oklasma*. He seems to wear a black loin-cloth, of which only part is visible and above it a band with a mock erect *phallos* and a large horse's tail. This, of course, shows that he is represented as an actor, but the face, beard, pointed ears and hair seem to be natural and not, as one would expect, to form a mask. This confusion of mimic and real silen is probably a mere slip on the artist's part. On the left stands Dionysus [or, more probably, a *choregós* A. B. C.] dressed in a long, sleeved chiton and himation above. He is bearded, wears a fillet in his hair and holds a small-headed thyrsus in his right hand. In the middle stands a bearded man fronting us and with his head turned towards Dionysus. He wears a short, girded chiton. In his right hand he holds a small,

-shaped object [perhaps a double flute with *phorbeid* attached. A. B. C.].

The reverse shows three *Manteljünglinge*, one of whom holds a strigil.

The vase, now in the Hope Collection and hitherto unpublished, would date from about the middle of the fifth century. The composition is very harmonious and the style, though not strong, is skilful and easy.'

⁵ Nicole *Cat. Vases d'Athènes Suppl.* p. 226 f. no. 1055 pl. 17 ('Répétition d'un drame satyrique?'), M. Bieber in the *Ath. Mitth.* 1911 xxxvi. 269 ff. pls. 13, 1 f., 14, 4 f.

⁶ M. Bieber in the *Ath. Mitth.* 1911 xxxvi. 272 ff. pls. 13, 3, 14, 1—3.

representing preparations for a Satyr-play¹. In this group the Satyrs, both on and off the stage, have equine tails like the *Silenois*², but hairy loin-cloths which may be meant for stylised goat-skins³. Later again, but descended from the same original, are a famous *kratér* at Naples painted c. 400 B.C.⁴ and a contemporary *kratér* at Deepdene (pl. xxxix, 2)⁵. Here too the

¹ M. Bieber *loc. cit.* was the first to detect that the vase at Athens and its replicas at Bonn are but 'ein ziemlich gedankenloses Excerpt aus einer grösseren und besseren Vorlage.' We may venture, on the strength of the Naples *kratér* (*infra* n. 4), to conjecture that this original was a fresco by Polygnotos, whose fondness for figures arranged at different levels is notorious (see e.g. H. B. Walters *History of Ancient Pottery* London 1905 i. 441 ff.).

² *Supra* p. 696 f. A. Furtwängler *Winckelmannsfest- Progr. Berlin* xl. 25 (= *Kleine Schriften* München 1912 i. 207) cites Ktesias *frag.* 57 (p. 86 f. Müller) *ap. Phot. bibl.* p. 45 a 20 ff. cod. Mon. 287 ἐν δὲ τῇ αὐτῇ Ἰνδικῇ εἰς τὸν μυχὸν τῆς πελαίας (πελαγίας Hoeschel) νῆσον φασὶ τοὺς ἐνοικοῦντας κακεῖ οὐρὰς ἔχειν μεγίστας, ὅποιας διαγράφουσι τῶν Σατύρων, cp. *Ptol.* 8. 3 ταύτας οἱ κατέχοντες οὐρὰς ἔχειν λέγονται, ὅποιας διαγράφουσι τὰς τῶν Σατύρων.

³ The 'Radornament' (Bieber) on the loin-cloth is perhaps a conventional rendering of a patchy skin.

⁴ Heydemann *Vasensamml. Neapel* p. 546 ff. no. 3240, J. de Witté in the *Ann. d. Inst.* 1841 xiii. 303 ff., *Mon. d. Inst.* iii pl. 31, B. Arnold in Baumeister *Denkm.* i. 385, 388 ff. pl. 5 fig. 422, Reinach *Rép. Vases* i. 114, E. Kuhnert in Roscher *Lex. Myth.* iv. 496 ff. fig. 13.

⁵ Tischbein *Hamilton Vases* i. 122 f. pl. 39, Reinach *Rép. Vases* ii. 288, 5. I have again to thank Mr E. M. W. Tillyard for the accompanying photograph and notes:

'*Lucanian Bell-Krater.* Height 325^m. Well-preserved except that the varnish is beginning slightly to flake off. The clay is of a rich, salmon-pink colour and the varnish deep black and rather metallic in appearance. The shape shows the middle development of the bell-krater, being neither broad nor elongated. Above is a laurel-wreath pattern of the usual type with small and carefully drawn leaves. Below is a band of double meanders in pairs divided by saltire-squares. At each handle-base is a reserved band with black tongues painted on it.

The obverse shows three young comic actors. They all wear close-fitting leathern loin-cloths, into which are fixed large *phalloi*. The actor on the right being in profile, it is possible to see that he also wears a small tail, whether of a horse or a goat it is a little difficult to say. On the side of each loin-cloth is a little ornament like a four-spoked wheel. All three actors have masks. The one on the right wears his, and, with his hands clapped to the small of his back and his right leg kicked back, strikes a comic attitude. The other two stand in easy attitudes, holding their masks in their hand. On the right, on the ground, is a tympanum, seen obliquely. On the reverse are three *Manteljünglinge*.

The vase is of Lucanian fabric and dates from about the end of the fifth century. In style it is considerably under Attic influence and is descended directly from the class of early South Italian vases which Furtwängler thought might have come from the Attic colonies in Italy and which Hauser later proved to be connected with Heraclea¹. The drawing is very easy and careful.

The vase belonged to the second Hamilton Collection and has been already published by Tischbein². The present reproduction is from a new photograph. The vase is now in the Hope Collection.

¹ FRH II. p. 264.

² I. pl. 39. Reproduced on a small scale in Wieseler *Theatergebäude* pl. VI. 3.

Satyrs have shortish horse-tails. But those on the Naples vase are in most cases wearing a shaggy skin, presumably a goat-skin, round their loins; and those on the Deepdene vase have their waist-bands patterned in such a way as to suggest a fringed or shaggy edge.

In short, the evidence of the vases—agreeing, as it does, with one or two literary allusions¹—leads me to follow in the steps of Furtwängler², Körte³, Hartwig⁴, Wernicke⁵, and to conclude that the *Satýroi* before contamination with the *Silenoí* were conceived at Athens as goat-like dancers⁶, who greeted the uprising of the chthonian goddess, mother of Dionysos.

¹ Aisch. *Prometheus Pyrkaeus frag.* 207 Nauck² *ap.* Plout. *de utilit. ex inimic. ferrip.* 2 τοῦ δὲ Σατύρου τὸ πῦρ, ὡς πρῶτον ὤφθη, βουλομένου φιλήσαι καὶ περιβαλεῖν, ὁ Προμηθεύς "τράγος γένειον ἄρα πευθήσεις σύ γε," Eustath. *in Il.* p. 415, 6 ff. καὶ τὸ "τράγος γένειον ἄρα (*λεγ.* ἄρα) πευθήσεις σύ γε" ἀντί τοῦ· ὦ τράγε, πᾶν στερήσῃ γενείου, εἰ τὴν φλόγα φιλήσεις, Eriphian. *ancor.* 106 (i. 208, 29 ff. Dindorf) ἄλλος δὲ (*sc.* Ζεὺς) ὁ τραγῳδός, ὁ καὶ τὴν χεῖρα αὐτοῦ καίσας· τάχα δὲ θεὸς ὦν ἐπελάθετο ὅτι δάκνει τὸ πῦρ καὶ οὐκ εἶχε τὴν πρόρρωσιν τοῦ λέγοντος τράγω τῷ Σατύρω, εἰρόντι πρότερον (ὀρῶντι πρῶτον Meineke) τὸ πῦρ καὶ προσελθόντι φιλήσαι, "μὴ ἄψῃ, τράγε" ἀψάμενος γάρ μου ἐμπρήσεις τὰ γένεια."

Soph. *Ichnetai* col. xiv, 15 f. (*The Oxyrhynchus Papyri* London 1912 ix. 59 no. 1174) νέος γὰρ ὦν ἀνὴρ, π[ώγ]ωνι θάλλων ὡς τράγος κν<ή>κω χλιδῶς.

Eur. *Cycl.* 76 ff. XO. (of Satyrs)...ἐγὼ δ' ὁ σὸς πρόπολος θητεύω | ... | δοῦλος ἀλαίνων ξῖν τᾷδε τράγον | χλαῖνα μελέα.

None of these passages affords conclusive proof that the Satyrs were hircine, since the first might be explained as a case of abbreviated comparison (see P. Shorey in *Class. Philol.* 1909 iv. 433 ff.), the second is a simile, and the third implies that the goat-skin was a cheap country garb (see W. Ridgeway *The Origin of Tragedy* Cambridge 1910 p. 87). But all alike gain considerably in point, if we may assume that the Satyrs were essentially goat-like.

³ G. Körte in E. Bethe *Prolegomena zur Geschichte des Theaters im Alterthum* Leipzig 1896 p. 339 ff.

⁴ P. Hartwig in the *Röm. Mitth.* 1897 xii. 89 ff.

⁵ K. Wernicke in *Hermes* 1897 xxxii. 290 ff. and in Roscher *Lex. Myth.* iii. 1409 ff.

⁶ E. Reisch 'Zur Vorgeschichte der attischen Tragödie' in the *Festschrift Theodor Gomperz* Wien 1902 p. 451 ff. and E. Kuhnert in Roscher *Lex. Myth.* iv. 524 ff. have attempted to show that these goat-creatures were *Pānes*, not *Satýroi*. In answer to their arguments I would reply: (a) We have no reason to think that the Athenians of the fifth century believed in a plurality of *Pānes* and personated them in public religious dances. Aisch. *Glaucus frag.* 35 Nauck² *ap.* schol. Eur. *Rhes.* 36 Αἰσχύλος δὲ δύο Πᾶνας τὸν μὲν Διὸς ὄν καὶ (Διὸς Ἀρκάδος Vater, οὐ εἶναι Ἀρκάδα Nauck) δίδυμον, τὸν δὲ Κρόνου and schol. Theokr. 4. 62 τοὺς Σατύρους πλείους φησίν, ὡς καὶ τοὺς Σιληνοὺς καὶ Πᾶνας, ὡς Αἰσχύλος μὲν ἐν Γλαύκῳ, Σοφοκλῆς δὲ ἐν Ἀνδρομέδῃ proves that Aischylos recognised two *Pānes*. Soph. *Andromeda frag.* 132 Nauck² *ap.* schol. Theokr. *loc. cit.* merely proves that Sophokles mentioned two or more *Silenoí*. Other passages, e.g. Aristoph. *ecl.* 1069, Plat. *legg.* 815 c, are of later date than the fifth century. (b) If the goat-figures on the vases listed *supra* p. 698 n. 1 were *Pānes*, they would rather have been associated with Nymphs (Plat. *legg.* 815 c, Paus. 8. 37. 2) and equipped with the *syrix* (e.g. *Brit. Mus. Cat. Vases* iii. 180f. no. E 228 pl. 9, Heydemann *Vasensamm.* Neapel p. 19 ff. no. 690. p. 495 ff. no. 3218, cp. H. Schrader in the *Ath. Mitth.* 1896 xxi. 275 ff.).

2. Lucanian bell-krater at Deepdene: preparations for a Satyr-play. See page 701 f.

At the same time it remains possible, indeed probable, that these goat-dances were not *ab origine* connected with Dionysos, but had existed from time immemorial as a popular custom in south Europe. On August 12, 1908, Monsieur P. Bourrinet found in the Abri Mège, a Magdalenian rock-shelter at Teyjat (Dordogne)¹, a well-preserved 'bâton de commandement' of stag's-horn, on which were engraved various animal forms—the head of a hind, three snakes, a large horse followed by the forepart of a little horse, three swans, and lastly three 'diablotins' (fig. 512)². These remarkable figures represent men disguised

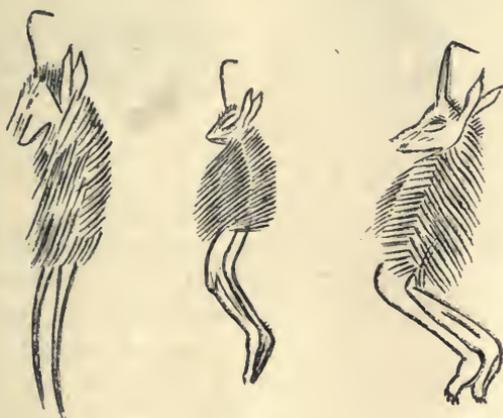

Fig. 512.

as goats—chamois, to judge from their horns,—and engaged in jumping or dancing, probably with the intention of multiplying the supply of actual goats by means of magic mimicry³.

Nineteen years ago I figured two 'island stones' from Crete and one from Athens, on which human beings are seen dressed in the skins of goats (figs. 513, 515, 516)⁴. I pointed out then

¹ L. Capitan, H. Breuil, P. Bourrinet, and D. Peyrony 'L'abri Mège' in the *Revue de l'École d'Anthropologie de Paris* 1906 xvi. 196—212 with 9 figs.

that, according to Hesychios¹, the Bacchantes wore goat-skins, and I suggested that the ritual thus found in the cult of Dionysos was very possibly a relic of a more wide-spread practice. Today I can add another (fig. 514)² to the series of seal-stones portraying human goats and venture on a closer determination of their meaning. I suppose them to show 'Minoan' dances, the object of which was to promote fertility—originally the fertility of the local fauna—by means of imitative magic and so to safeguard the food-supply of the population.

Fig. 513.

Fig. 514.

Fig. 515.

Fig. 516.

Given the existence of such old-world dances within the Greek area, it is reasonable to surmise that they might attach themselves to the cult of any fertility-power—Hermes, Demeter, Dionysos, or the like³. Further, if in a certain district the said power was

Gemmen i pl. 2, 40, ii. 12f.)=a man wearing the *protomé* of a wild goat with three pellets in the field, one of which is rayed like a star.

Fig. 515 is a lenticular seal of cornelian, found at Athens in 1884 and now in the collection of Sir Arthur Evans (*Journ. Hell. Stud.* 1894 xiv. 116 fig. 11)=two human figures, one wearing the forepart of a goat, the other that of a lion.

Ψ on the left, Σ on the right, and Δ beneath.

³ Winter *Ant. Terrakotten* iii. 1. 220 figs. 1 (=my fig. 517), 2, 3, 4, 7 (=my fig. 519), 9 (=my fig. 518) has classified under six types a number of archaic terra-cotta statuettes, mostly found in central Greece (the Theban Kabeirion, Tanagra, Halai, etc.), which represent an ithyphallic goat-man with hircine or human legs and a *cornu copiae* in his hand. P. Baur, who in the *Am. Journ. Arch.* 1905 ix. 157—165 pl. 5 (=my fig. 520) adds yet another type to the series, proposes the name of Tityros for them all. But O. Kern in *Hermes* 1913 xlviii. 318 f. distinguishes Τίτυροι as 'Schafbocksdämonen' from Σάρυροι as 'Ziegenbocksdämonen,' citing Serv. in Verg. *ecl.* 1 prooem. (*supra* p. 401 n. 7), schol. Bernens. *ecl.* 1. 1 p. 749 Hagen tityrus lingua Laconica villosus aries appellatur, Prob. in Verg. *ecl.* p. 349 Lion hircus Libyca (*leg.* Laconica) lingua tityrus appellatur, and a small bronze group of ram-headed male dancers from Methydrion now in the National

believed to take shape as a goat, his cult would almost inevitably be amalgamated with the aboriginal goat-dances. Now we have in point of fact found the Satyrs or goatish dancers of the fifth-century vases sometimes cutting capers by themselves, but sometimes also associated with Hermes, Pherephatta, and the equine followers of Dionysos¹, in short with a whole posse of fertility-powers. Moreover, we have seen Dionysos himself worshipped as *Ériphos* in Lakonike², as *Eriphios* at Metapontum³; and we have had reason to conjecture that his Thraco-Phrygian devotees identified themselves with him and hence took the name of *eriphoi*⁴. Finally, we have observed that Thespis the reputed founder of Greek 'tragedy' came from Ikaria, where men danced round a *trágos*⁵. These facts suggest that the tragic chorus in pre-literary days consisted of men dressed as *trágoi* in order to personate a goat-Dionysos. They must have sung then, as in northern Greece they still sing⁶, of an annual birth, death, and resurrection. It is not therefore to be wondered at, if such a performance attracted to itself and absorbed into itself those primitive goat-dances that had subsisted in south Europe from palaeolithic times. The tragic chorus thereby acquired a Satyric supplement. Tragedy led up to the Satyr-play. And the revelrout may well have served, as Prof. Murray acutely divined⁷, to represent the joyous arrival of the re-born god.

Museum at Athens (F. Hiller von Gaertringen and H. Lattermann in the *Abh. d. berl. Akad.* 1911 Phil.-hist. Classe p. 41 pl. 13, 3 a, b). Probably in Boiotia the goat-dances were absorbed into the cult of the Kabeiros just as at Athens they were absorbed into that of Dionysos.

(κ) Zeus, Dionysos, and the Goat.

The Attic festivals with their amazing output of tragedy and comedy tended to obscure the early Thraco-Phrygian relations of Zeus, Dionysos, and the goat. But it would be a mistake to suppose that those relations were wholly forgotten. For example, at the Phrygian Laodikeia, a town once called Diospolis¹,

Fig. 521.

Fig. 522.

quasi-autonomous coppers were issued with a bust of Zeus *Asets*² on the obverse and sometimes a goat on the reverse side (fig. 521)³, or again with a youthful head of Demos on the obverse and Zeus *Asets* carrying the infant Dionysos with a goat beside him on the reverse (fig. 522)⁴.

A fragmentary *kýlix* of red-figured technique, painted in the style of Hieron and found on the Akropolis at Athens (fig. 523)⁵,

¹ Plin. *nat. hist.* 5. 105.

² This cult-title has been usually identified with the name of the Syrian and Arabian god Azizos (O. Jessen in Pauly—Wissowa *Real-Enc.* ii. 1531, Sir W. M. Ramsay *The Cities and Bishoprics of Phrygia* Oxford 1895 i. 33), who along with Monimos was worshipped at Edessa as a supporter of Helios (Ioul. *or.* 4. 150 C, 154 A), the pair being probably conceived as morning- and evening-star (F. Cumont in Pauly—Wissowa *Real-Enc.* ii. 2644, H. Steuding in Roscher *Lex. Myth.* i. 743, W. Drexler *ib.* ii. 3202, R. Dussaud in the *Rev. Arch.* 1903 i. 128—133, 1904 i. 208 n. 3 = *id.* *Notes de mythologie syrienne* Paris 1903 pp. 9—14, 1905 p. 75 n. 3). If so, the epithet is Semitic ('*aziz*, 'the Strong'). But P. Carolidis *Bemerkungen zu den alten kleinasiatischen Sprachen und Mythen* Strassburg 1913 p. 32 f. proposes to refer it to an Armenian *as*, 'Luft, dann Geist, Dämon und Gott.' Both explanations are highly precarious.

The same reverse is found on a coin struck by Iulia Domna (*id. ib.* p. 407 no. 131), and, with the head of Zeus turned to the left, on a coin of Otacilia (*Brit. Mus. Cat. Coins Phrygia* p. 323 no. 258, Imhoof-Blumer *Monn. gr.* p. 407 no. 132 pl. G, 31). Cp. also a coin of L. Aelius Caesar with reverse showing Zeus *Asets*, who stands to the left and extends his right hand over the head of a goat (*Brit. Mus. Cat. Coins Phrygia* p. 311 no. 201 ACΕIC ΛΑΟΔΙΚΕΩΝ, Imhoof-Blumer *Monn. gr.* p. 407 no. 130).

⁵ First published in the *Jahrb. d. kais. deutsch. arch. Inst.* 1891 vi. 43 pl. 1 by

represents a procession of deities conducted by Hermes towards an altar, beside which stand two women, one with an *oinochôe* and a flower, the other with a basket. Beyond the altar are trees, denoting a sacred grove. Foremost in the procession marches

Fig. 523.

Zeus carrying the child Dionysos; and we notice that the pediment of the altar is occupied by figures of a goat and two kids. A. Frickenhaus argues that this vase must be brought into connexion with others, which, as he endeavours to prove, illustrate the ritual of the *Lenaia*¹. Be that as it may², we have here clearly the old association of Zeus, Dionysos, and the goat³.

But it is to the theatre itself that we naturally turn for the last traces of this lingering connexion. Nor are we disappointed.

B. Graef, who after adding further fragments allowed A. Frickenhaus *Lenäenvasen* (*Winckelmannsfest-Progr. Berlin lxxii*) Berlin 1912 p. 21 f. with fig. (=my fig. 523) to publish the principal group in its reconstituted form and so to anticipate the final publication in Graef *Ant. Vasen Athen*.

² A *hydria* of severe style at Paris (*De Ridder Cat. Vases de la Bibl. Nat.* ii. 331 f. no. 440, Inghirami *Vas. fitt.* iv. 115 pl. 384, Luynes *Descr. de vases peints* p. 16 f. pl. 28 = my fig. 524, F. Creuzer *Symbolik und Mythologie*³ Leipzig and Darmstadt 1842 iv. 218 pl. 2, B. Graef in the *Jahrb. d. kais. deutsch. arch. Inst.* 1891 vi. 46 f. with fig., F. Lenormant in Daremberg—Saglio *Dict. Ant.* i. 603 fig. 680, Overbeck *Gr. Kunst-myth.* Zeus Atlas pl. 1, 19, Reinach *Rép. Vases* ii. 260, 1) again shows Zeus (ΖΕΥΣ ?) bearing the child Dionysos (ΔΙΟΝ[Υ]ΣΟΣ) towards two women. The first sits on a folding-stool beside a pillar, with a spray of ivy in her left hand, a *stephane* on her head, and above her perhaps the word *καλός* (certainly not *Tades*). The second stands with a sceptre in her right hand and an ivy-wreath on her head. It is open to us to see in these two women the Maenads of Frickenhaus' 'Lenaean' vases, and to suppose that the cult-pillar and its table-altar have been modified into the pillar and stool of a *gynaikonitis*.

³ It was Miss Harrison who, with her customary kindness, pointed out to me the importance of this vase as a link in my argument.

The stage of Phaidros (*s.* iii or iv A.D.) is still decorated with four marble reliefs, which came from an earlier stage (probably of Neronian date) and illustrated appropriately enough the life-history of Dionysos. Existing publications of them¹ are so inadequate that I have had fresh drawings made from photographs, and have ventured to add on a transparent overleaf a restoration of the missing parts in accordance with what I hold to have been the sculptor's design (see pocket at end of vol. i).

Fig. 524.

The first slab (pl. xl, 1) shows Zeus seated on a rock, as befits a sky-god² the consort of an earth-goddess³. He has a *himátion* wrapped about his knees, and his right hand doubtless held a sceptre⁴. Before him stands Hermes carrying the new-born
