
A STRATFOR BOOK

Whether safeguarding people or places, most security operations look from the inside out, and all too often more attention is paid to the “who” instead of the “how.” But a good security program is conducted from the outside in, based on action rather than reaction. The idea is to focus on the intelligence that will prevent an attack from happening.

We refer to this proactive process as protective intelligence.

STRATFOR is a world leader in private global intelligence: political, economic, military and security. STRATFOR provides our members with insights, analyses and forecasts on important issues and developments worldwide. STRATFOR’s Web site allows our members to receive rapid updates on significant global events.
