

IV&V Readiness Review Checklist

Tool Name	Thelmp	Branch	EDG/AED/RDB
Tool Version	1	Release Candidate #	RC4
IMIS #	2015-0074	Due Date	12/12/14
Tool POC	XXXXX YYYYY (AED/RDB)	Today's Date	12/16/14

Y	N	N/A	Delivery to IV&V
			Peer Reviewer(s) for tool completion and verification of code classification: XXXXX Y. (AED/RDB)
X			Tool is unclassified If no, indicate the reason: Builder is classified as _____ Other: _____
X			All documentation is included in this delivery
X			Any hardware being delivered has been reset to factory condition
		X	If the tool has a pre-configured beacon capability please provide the following: Beacon IP: _____ URL: _____

Y	N	Requirements
X		Tool is a QRC
	X	Tool is strategic
	X	Requirement is finalized and accepted by EDG *NOTE*: Requirement is going to ERB, but due to time constraints, I'm delivering this to IV&V now

Y	N	Unit/Developer Testing
X		All requirements have been unit/developer tested If no, please state which requirements have not been tested by the developer _____
	X	All platforms (OS, PSP, languages) have been tested by the developer If no, please state what OS/PSP/languages have not been tested by the developer Rising on Win 2003
X		Unit/Developer testing has been completed on virtual machines

Information on RC
This RC contains updates due to (circle one): a) Issues identified by the tester b) Issues identified by the developer c) Change in the requirement d) Other: _____

Briefly describe the fix/change: Bug in Windows API caused failure to receive notifications when Thelmp was run as SYSTEM. Changed code to use another Windows API that does not contain the bug.
