

Athena Progress - December 1, 2015 - 11:30am

Minutes:

- 1) Send proxy information back to LP (HOW?)
- 2) Randomize URL
- 3) Beacon & deadman delay/timeout - what if someone turns the machine off for 1 month? (make sure we tried a beacon recently)
- 4) Priority 0-highest, 255-lowest?
- 5) Support foreground/background task (syn/async - get/put/exec)
- 6) Return 301/302 instead of 401 for beacon (no data)
 - Try using cookies instead - base64 encode
 - Add accept language/ accept type / host headers
- 7) Allow date change in off-line configuration - default should be set to original file date/time

Achievements:

- 1) Completed DEMO
- 2) Ported persistence to RemoteAccess Service
- 3) XXXXX is getting up to speed on DART

Issues:

- 1) None

Test Cases:

- 1) Install / reboot - validate installation and check status after reboot (svchost)
- 2) Uninstall - validate cleanup
- 3) Get - retrieve files of different sizes
- 4) Put - write files of different sizes
- 5) Memload - load dlls
- 6) Memunload
- 7) Killfile
- 8) Offline win and lin (can this be automated?)
- 9) SET
- 10) Multiple commands in a batch
- 11) Reinstall on the same box - if it isn't running it should just overwrite (check datafile)
- 12) Re-run the service - check if we can open the datafile
- 13) RamOnly - rundll should work fine for us
- 14) Validate that all files are removed from system (including state files)
- 15) Forensics - secure delete of .dll, data file and state file
