

Athena Progress - September 29, 2015 - 10am

Minutes:

- 1) Reviewed design
- 2) Add batch flag to ignore errors per batch in comms to target
- 3) Add parentid and childid (8 bytes) at beginning of parsing buffer and LP
- 4) LP: OUT - to target, IN - from target (install script to configure LP with dir names)
- 5) LP: OUT - DATE_PARENTID_CHILDID_CNTRL IN - DATE_PARENTID_CHILDID
- 6) Builder
 - a. remove name - use parentid instead (4 random characters) (A-Z,0..9)
 - b. create help for each option
 - c. dyn data - replace "none" with "internal"
 - d. tasking - replace "File Processing Path" to "Overt State File Path"
 - e. Max Kilobytes change to Chunk Size
 - f. uninstall - add Kill File ("full filepath on target")
 - g. receipt files -> parentid_receipt.xml or parentid_childid_receipt.xml
- 7) Tasker
 - a. Bring up help on startup
 - b. Change "output" to "generate"

Achievements:

- 1) Completed CDR 9/22 (completed responses from 9/14)
- 2) Completed RSA python/windows
- 3) Completed configuration/package
- 4) Integrated loader / command modules into build process
- 5) Completed DLL loader

Tasks under development:

- 1) Developing state/dyn config storage - XXXXX
- 2) Completing LP to support changes - XXXXX
- 3) Continuing development for command module -XXXXX
- 4) Testing Loader / developing AXE capability - XXXXX
- 5) Integration of builder/tasker/lp/command this week

Issues:

- 1) Change Full Command Demo to 10/13
- 2) Change Working Prototype and Operator Demo to 10/27
- 3) Transition of XXXXX with XXXXX
