INTRODUCTION

The following notes may be helpful:

- (1) Chapter I explains the purpose of the book and how to use it.
- (2) Chapter II is a summarized classification of living animals.
- (3) Chapter III is a classification of living animals, with examples of genera in each class, order, sub-order, etc.
- (4) Appendix I provides references for further reading.
- (5) Appendix II is a list of the authorities consulted on the classifications.
- (6) Some 4,000 examples of 'better known' genera are mentioned in Chapter III and the Index, which also gives the order or sub-order to which each genus belongs.
- (7) The Index contains more examples than the text. The reader who wishes to see whether a particular animal is classified should refer to the Index and not to the order, in Chapter III, to which he believes the animal belongs.
- (8) Only a certain number of English names are recorded and some of these might be questioned by the purist. Innumerable examples could be given of the confusion caused by the use of vernacular as opposed to Latin names. Where I live, the hedgehog, *Erinaceus*, is sometimes called an urchin. Where I often work, an urchin is called *Echinus*. But members of the order Echinoida (sea urchins), to which *Echinus* belongs, are also called sea hedgehogs, egg urchins, sea eggs, egg-fish, buttonfish, sea thistles, needle shells, chestnuts, burrs, spikes, zarts, porcupines and whore's eggs.
- (9) No species are given, only genera. The English names of some better known animals are, therefore, missing, because they refer to a species and not the genus: for example, the herring gull (*Larus argentatus*) and the crested newt (*Triton cristatus*). The reader will not find herring gull or crested newt in the Index, but will find gull, newt, *Larus* and *Triton*.

R.

I. SCOPE

DURING my studies of spermatozoa, I have often been frustrated by having to consult a number of books, instead of one, to find an up-to-date classification of the animal kingdom: and it occurred to me that other scientists might have the same difficulty. Classifications of the animal kingdom are available; but the only comprehensive ones of which I am aware are that of my first biology teacher, D. M. Reid (1925), which is out of print and now out-of-date, and that prepared in 1949 for Section F of the American Association for the Advancement of Science, *Zoological Names, a List of Phyla, Classes and Orders*. Apart from having no table of contents, index or examples, this pamphlet, which is reproduced in Spector's *Handbook of Biological Data* (1956), was clearly written for zoologists and not for physiologists, bio-chemists, biophysicists and those biologists who are not familiar with the classification of animals, for whom this book is intended.

The book and its Index can be used to find out how the animal kingdom, or parts of it, are classified, which are the eutherian mammals, what phasmids and Homoptera are, etc. Neither the book nor its Index can necessarily provide answers to questions about the systematic positions of individual genera, because there are some two hundred thousand genera in the animal kingdom.¹ Nevertheless, the Latin and some English names of a number of better known genera have been included. A genus may be well known to one person and unknown to another; any selection of 'better known genera' is bound, therefore, to be arbitrary. The reader is, therefore, almost certain to find that some genera, which are well known to him, are absent. Similarly, the English names of some better known animals are missing, because no species, only genera, are mentioned.

No extinct groups are mentioned, although from time to time members of such groups turn out not to be extinct at all, as in the case of the coelacanth (Actinistia) and the mollusc *Neopilina* (Tryblidiacea). The omission of extinct orders may give the misleading impression that a system of classification is top-heavy. In classifications of recent birds (Class Aves), for example, one sub-class, Neornithes, is sometimes included; this may seem unnecessary. But if the classification includes extinct birds, Neornithes is seen to be one of two sub-classes, the other, extinct, one being Archaeornithes.

Alternative classifications are given of the Parazoa (=Porifera), Platyhelminthes and Nematoda. The nematode classification of Chitwood & Chitwood (1950) is preferred to that of Hyman, which is well known because her treatise *The Invertebrates* (1940–1959) is so well known. A classification of the Parazoa by Dr. Maurice Burton is preferred to that of Hyman. Professor Jean Baer's classification of the Platyhelminthes, as yet unpublished, is preferred to that of Dr. Ben Dawes, but in this case, the decision was a personal one. The preferred classification is given first in each case. The same genera are cited as examples in the alternative classifications, but in the Index, genera are referred to the preferred classification. Alternative classifications of several other groups could have been given, e.g. the class Echinoidea, because systematics is a dynamic subject about which zoologists often disagree. But only the Parazoa, Platyhelminthes and Nematoda seemed to require this treatment in a book of this size and detail.

If an English name applies to a particular genus, as in the case of 'whelk', it will be found in the singular after the generic name, *Buccinum*. But if the same English name applies to two or more genera, it will be found, in the plural, after the genera to which it applies, for example *Cavolina*, *Limacina* (sea-butterflies). When English names are available for higher groupings, such as sponges (Parazoa), these will be found after the Latin names. No attempt has been made to give a comprehensive list of English or vernacular names, interesting as it may be to know that everyone in the Barbados is familiar with sea eggs, but no one with sea urchins. Such information is outside the scope of this book. Whenever possible, therefore, Latin and not English names should be looked up in the Index. In a few cases where an animal causes a disease which has an English name, it has been put in brackets after the generic name of the animal, for example *Entamoeba* (amoebic dysentery).

¹ If a genus is not in this book, the most likely place to find it is in Neave's *Nomenclator Zoologicus* (1939–1950).

When a synonym exists for a phylum, class, order, etc. and is worth mentioning, it is put in brackets after the preferred name, e.g.

DISCOCEPHALI (= ECHENEIFORMES)

If the group represented by the synonym is approximately equal to the group represented by the preferred name, the sign for 'approximately equal' is used:

PLECTOGNATHI (= TETRAODONTIFORMES)

If there are two synonyms, they are recorded as follows:

OLIGONEOPTERA (= ENDOPTERYGOTA, HOLOMETABOLA)

When the relationship between a preferred name and certain synonyms or near-synonyms is simple, the relationship is recorded as follows, sometimes as a footnote:

MESOGASTROPODA (= MONOTOCARDIA, PECTINIBRANCHIA, – STENOGLOSSA)

This means that the order Mesogastropoda is the same as the order Monotocardia or Pectinibranchia, *minus* Stenoglossa. A plus sign between two synonyms would have the analogous meaning.

Synonyms of genera have only been given where there was good reason to do so. To attempt more would make several entries under orders and sub-orders cumbersome. For example, the palmate newt *Triturus helveticus* (Caudata) is, or has been, known as *Diemictylus palmatus*, *Molge palmata* and *Triton palmatus*, so that the inclusion of these synonyms would be entered as follows:

Triturus (= *Diemictylus*, *Molge*, *Triton*) (newt)

Even if such an entry were desirable in principle, it would be unacceptable in practice, because the synonyms apply to the palmate newt and not necessarily to all newts. This question, of a synonym often applying to one species and not to the whole genus, is another reason for avoiding synonyms except when they serve a special purpose.

Some synonyms, such as *Troglodytes* for *Pan* (the chimpanzee), *Auchenia* for *Lama* (the llama) and a few others, may be thought surprising or unnecessary. They have been included because some physiologists or biochemists used these synonyms instead of the preferred names.

To avoid possible confusion, I have occasionally put a warning footnote when the name of a group, such as Decapoda, is used in more than one part of the animal kingdom. Attention has not been drawn to cases of two different animals having, or having had, the same names. A casual glance at Neave's *Nomenclator Zoologicus* (1939–1950) shows that homonyms are far more common than many biologists realize. *Aricia*, for example, is cited in Neave as a mollusc, a polychaete, a fly and a moth. There seemed no point in trying to record all homonyms, irrespective of their importance for readers of this book.

Apart from 'phylum', 'class', 'order', etc., the Index contains all the words in Chapters II and III. If the reader wishes to look up Mammalia, or Prototheria, or Simiae in the Index, no difficulties arise and the appropriate page numbers will be found after these words, for example, Prototheria, 43. But if the reader wishes to know the systematic position of *Phascolarctos*, a page number would provide insufficient information because there are about seventy-five Latin or English generic names per page. In the Index, therefore, the generic name of an animal, or the English name of a genus, is followed by the order or sub-order (when these exist) to which the animal belongs, and then the page number, as in the following examples:

Phascolarctos, Marsupialia, 44

three-toed sloth (*Bradypus*), Edentata, 44

It is hardly necessary to mention that if two page numbers occur after a word in the Index, as in

Acoela, 13, 22

the Acoela will be found on both pages. This is because Acoela is an order within the class Turbellaria (phylum Platyhelminthes) and within the class Gastropoda (phylum Mollusca).

I referred on page 2 to the inclusion in the Index of animals mentioned in a number of textbooks of physiology and biochemistry. The format of this book prevents all of these being referred to in the text, even if this were desirable, and a number have, therefore, been mentioned only in the Index. In such cases the entry is of the form

**Eriocheir*, Reptantia, 31

The entry shows to which sub-order *Eriocheir* belongs, while reference to p. 31 shows that *Eriocheir* is a crustacean and not a mollusc.¹ If, therefore, a reader wants to look up a particular genus in this book, reference *must*, in the first instance, be made to the Index and not to the text, as more animals are mentioned in the former than the latter. No English names are given of genera which are only mentioned in the Index.

All the classifications have been discussed with specialists on the group or groups in question. To avoid cluttering up this chapter with innumerable acknowledgements to the many scientists who have had the kindness and patience to help me, an Acknowledgement Appendix is included at the end of this book. In fairness to those who have helped me, I should own that I have not always taken their advice. Any errors² are, therefore, my responsibility and due to ignorance of a diverting branch of natural science which is neglected by many 'modern' biologists.

Since my book is, in a sense, a dictionary, I will conclude this chapter with some observations made by a previous lexicographer (Johnson, 1755, A^r).

'It is the fate of those who toil at the lower employments of life, to be rather driven by the fear of evil, than attracted by the prospect of good; to be exposed to censure, without hope of praise; to be disgraced by miscarriage, or punished for neglect, where success would have been without applause, and diligence without reward.'

'Among these unhappy mortals is the writer of dictionaries; whom mankind have considered, not as the pupil, but the slave of science, the pionier of literature, doomed only to remove rubbish and clear obstructions from the paths of Learning and Genius, who press forward to conquest and glory, without bestowing a smile on the humble drudge that facilitates their progress. Every other authour may aspire to praise; the lexicographer can only hope to escape reproach, and even this negative recompense has been yet granted to very few.'

¹ Reptantia is a sub-order of Decapoda (Crustacea); but Decapoda is also a sub-order of Dibranchia (Mollusca).

² This book is certain to contain errors and misprints. I should be most grateful if readers would let me know when they detect them.

II. SUMMARIZED CLASSIFICATION

THE approximate number of described species in each group is given in the second column. Numbers followed by an asterisk differ greatly from those given by Mayr, Linsley & Usinger (1953).

Phylum PROTOZOA	30,000	page	6
MESOZOA	50		9
PARAZOA	4,200		9
CNIDARIA	9,600		11

III. CLASSIFICATION OF LIVING ANIMALS

Phylum PROTOZOA

Class MASTIGOPHORA

(=FLAGELLATA)

Sub-class PHYTOMASTIGINA

(=PHYTOFLAGELLATA)

Order PHYTOMONADINA

(=VOLVOCINA)

Carteria; Chlorogonium; Chlamydomonas;
Haematococcus; Eudorina; Pandorina; Volvox;
Polytoma

Order XANTHOMONADINA

Chloramoeba; Myxochloris; Rhizochloris

Order CHLOROMONADINA

Gonyostomum; Vacuolaria

Order EUGLENOIDINA

Euglena; Trachelomonas; Phacus; Peranema

Order CRYPTOMONADINA

Chilomonas; Cryptomonas; Cyathomonas

Order DINOFLAGELLATA

(=PERIDINEAE)

Haplodinium; Blastodinium; Ceratium;
Dinamoebidium; Gymnodinium; Noctiluca;
Peridinium

Order EBRIIDEAE

(=EBRIACEAE)

Ebria; Hermesinum

Order SILICOFLAGELLATA

Dictyocha

Order COCCOLITHOPHORIDA

Calyptrosphaera; Acanthosolenia

Order CHRYSOMONADINA

Chromulina; Mallomonas; Oicomonas; Uroglena;
Chrysamoeba; Dinobryon; Hydrurus;
Dendromonas; Ochromonas

Sub-class ZOOMASTIGINA

(=ZOOFAGELLATA)

Order PROTOMONADINA

Monosiga; Leptomonas; Crithidia; Leishmania
(kala-azar, oriental sore); *Trypanosoma* (sleeping-sickness, nagana, etc.); *Schizotrypanum* (Chagas' disease, etc.); *Bodo*

Order METAMONADINA

(=POLYMASTIGINA + HYPERMASTIGINA)

Enteromonas; Monocercomonas (= *Eutrichomastix*);
Hexamastix; Devescovina; Trichomonas;
Embadomonas; Chilomastix; Lophomonas;
Trimastix; Trichonympha

Class RHIZOPODA
 (= SARCODINA)

Order DISTOMATINA
 (= DIPLOMONADIDA)

Hexamita; Giardia

Order OPALININA

Cepedea; Opalina; Zelleriella

Class ACTINOPODA
 (= SARCODINA)

Order RHIZOMASTIGINA

(= PANTOSTOMATIDA)

Mastigamoeba; Histomonas (blackhead of poultry);
Dientamoeba

Order AMOEWINA

Amoeba; Chaos; Vahlkampfia; Endamoeba;
Entamoeba (amoebic dysentery); *Endolimax;*
Iodamoeba

Order TESTACEA

Arcella; Centropyxis; Cochliopodium; Diffugia;
Nebela; Penardia; Assulina; Chlamydophrys;
Euglypha; Gromia; Arachnula; Biomyxa;
Allogromia; Microgromia

Order FORAMINIFERA

Discorbis; Elphidium (= *Polystomella*); *Globigerina;*
Cornuspira; Peneroplis; Textularia; Nummulites;
Planorbulina; Rotalia

Class SPOROZOA

(= TELOSPORIDIA)

Order RADIODARIA

Acanthometra; Sphaerocapsa; Acanthosphaera;
Collozoum; Sphaerozoum; Thalassicola;
Aulacantha; Coelodendrum

Order HELIOZOOA

Actinophrys; Actinosphaerium; Actinolophus;
Astrodisculus; Acanthocystis; Raphidiophrys;
Actinomonas; Vampyrella; Clathrulina;
Hedriocystis; Monomastigocystis

Sub-class GREGARINOMORPHA

Order ARCHIGREGARINA

Merogregarina; Selenidium; Selenocystis

Order EUGREGARINA

Gonospora; Gregarina; Lecudina; Monocystis;
Porospora; Stylocephalus

Order SCHIZOGREGARINA

Caulleryella; Lipotropha; Machadoella;
Ophryocystis; Schizocystis; Syncystis

Sub-class COCCIDIOMORPHA

Order PROCOCCIDIA

Selenococcidium

Order EUCOCCIDIA

Sub-order ADELEIDEA

Adelina; Klossia; Karyolysus; Hepatozoon;
Haemogregarina

Sub-order EIMERIIDEA

Cyclospora; Isospora; Eimeria (= *Coccidium*);
Globidium; Merocystis

Sub-order HAEMOSPORIDIA

Haemoproteus; Leucocytozoon; Plasmodium (malaria); *Babesia* (= *Piroplasma*) (Texas cattle fever, etc.); *Theileria* (African East Coast cattle fever)

SPOROZOA whose systematic position is uncertain

Toxoplasma (toxoplasmosis); *Sarcocystis* (sarcosporidiosis); *Helicosporidium*

Class CNIDOSPORIDIA

(= NEMATOCYSTIDA, NEOSPORIDIA, AMOEBSPORIDIA)

Order MYXOSPORIDIA

Ceratomyxa; Leptotheca; Chloromyxum;
Sphaerospora; Cocconyxa; Henneguya; Myxidium;
Myxobolus; Myxosoma

Order MICROSPORIDIA

(= CRYPTOCYSTA)

Nosema; Glugea; Thelohania; Plistophora;
Mrazekia; Telomyxa

Order ACTINOMYXIDIA

Guyenotia; Tetractinomyxon

Order HAPLOSPORIDIA

Haplosporidium

Class CILIATA

(= CILIOPHORA)

Sub-class HOLOTRICHA

Order GYMNOSTOMATIDA

Sub-order RABDOPHORINA

Holophrya; Amphileptus; Dileptus

Sub-order CYRTOPHORINA

Chilodonella; Nassula; Prorodon

Order SUCTORIDA

(= ACINETA, TENTACULIFERA)

Podophrya; Acineta

Order CHONOTRICHIDA

(= PERITRICHA)

Spirochona

Order TRICHOSTOMATIDA

Coelosomides; Tillina; Colpoda; Balantidium
(dysentery)

Order HYMENOSTOMATIDA

Sub-order TETRAHYMENINA

Tetrahymena; Glaucoma; Ichthyophthirius

Sub-order PENICULINA

Frontonia; Paramecium (slipper animalcule);
Urocentrum

Sub-order PLEURONEMATINA

Pleuronema; Cyclidium

Order ASTOMATIDA

(= ANOPLOPHRYINEA)

Anoplophrya; Radiophrya; Haptophrya

Order APOSTOMATIDA

Foettingeria; Gymnodinioides; Ophiuraespira;
Spirophrya

Order THIGMOTRICHIDA

*Thigmophrya; Conchophthirus; Ancistrum; Boveria;
Ancistrocoma; Hypocomella; Hypocoma*

Order PERITRICHIDA

(=STOMATODA)

*Vorticella; Epistylis; Zoothamnium; Trichodina;
Urceolaria*

Sub-class SPIROTRICHA

Order HETEROTRICHIDA

Sub-order HETEROTRICHINA

*Climacostomum; Caudylostoma; Spirostomum;
Stentor*

Sub-order LICNOPHORINA

Licnophora

Order OLICOTRICHIDA

Strombidium; Halteria; Strombiliidium

Order TINTINNIDA

Tintinnopsis; Tintinnus

Order ENTODINIOMORPHIDA

*Epidinium; Entodinium; Ophryoscolex;
Cyclopasthium*

Order CTENOSTOMATIDA

(=ODONTOSTOMATIDA)

Epalxis; Saprodinium; Discomorpha

Order HYPOTRICHIDA

Diophys; Euplates; Oxytricha; Uroleptus

Phylum MESOZOA¹

Order DICYEMIDA

(=RHOMBOZOO)

Dicyema; Microcyema

Order ORTHONECTIDA

Rhopalura

Phylum PARAZOA (=PORIFERA, SPONGIIDA) (sponges)²Class NUDA³

Order CALCAREA

(=CALCISPONGIAE)

Sub-order HOMOCOELA (ascon sponges)

Leucosolenia (=Ascute); Clathrina

Sub-order HETEROCOELA

*Leucilla; Scypha (=Sycon); Leuconia
(=Leucandra); Grantia (=Sycandra)*

¹ Members of this phylum are often considered to be degenerate members of phylum Platyhelminthes; pp. 13-14.

² Classification by Burton.

³ Sometimes considered as a phylum, in which case phylum Parazoa becomes a sub-kingdom. Class Nuda also occurs in phylum Ctenophora, p. 13.

Order HEXACTINELLIDA (glass sponges)

(=TRIAXONIDA, HYALOSPONGIAE)

Sub-order HEXASTEROPHORA

Euplectella (Venus's flower basket); *Farrea*;
Aphrocallistes

Sub-order AMPHIDISCOPHORA

Hyalonema; *Pheronema*; *Monoraphis*

Class GELATINOSA¹

Order TETRAXONIDA

Sub-order HOMOSCLEROPHORA

(= CARNOSA, MICROSCLEROPHORA)

Plakina; *Oscarella*; *Bajulus*; *Hexadella*; *Thrombus*

Sub-order STREPTASTROSCLEROPHORA

Thenea

Sub-order ASTROSCLEROPHORA

Stellella; *Tethya*; *Chondrosia*; *Geodia*; *Tetilla*
(= *Craniella*); *Cliona*; *Spheciospongia* (loggerhead
sponge); *Suberites*

Sub-order SIGMATOSCLEROPHORA

Myxilla; *Halichondria*; *Haliclona* (= *Chalina*,
Halina); *Microciona*; *Esperiopsis*; *Adocia*
(= *Reniera*); *Cladorhiza*; *Spongilla*

Order KERATOSA² (horny sponges)

Spongia (= *Euspongia*) (bath sponge); *Halisarca*;
Hircinia; *Aplysina*; *Aplysilla*

Phylum PORIFERA (= SPONGIIDA, PARAZOA) (sponges)³

Class CALCAREA

(= CALCISPONGIAE)

Order ASCONOSA (ascon sponges)

(= HOMOCOELA)

Leucosolenia (= *Ascute*); *Clathrina*

Order SYCONOSA

(= HETEROCOELA)

Leucilla; *Scypha* (= *Sycon*); *Leuconia*
(= *Leucandra*); *Grantia* (= *Sycandra*)

Class HEXACTINELLIDA (glass sponges)

(= TRIAXONIDA, HYALOSPONGIAE)

Order HEXASTEROPHORA

Euplectella (Venus's flower basket); *Farrea*;
Aphrocallistes

Order AMPHIDISCOPHORA

Hyalonema; *Pheronema*; *Monoraphis*

Class DEMOSPONGIAE

Sub-class TTRACTINELLIDA

Order MYXOSPONGIDA

Halisarca; *Oscarella*; *Bajulus*; *Hexadella*; *Thenea*

¹ Sometimes considered as a phylum, in which case phylum Parazoa becomes a sub-kingdom.

² The systematics of this order requires revision.

³ Alternative classification by Hyman (1940).

Order CARNOSA

(=HOMOSCLEROPHORA, MICROSCLEROPHORA)
Plakina; Thrombus; Chondrosia; Haliclona
 (=Chalina, Halina)

Order CHORISTIDA

Stelletta; Geodia; Tetilla (=Craniella)

Sub-class MONAXONIDA

Order HADROMERINA

(=ASTROMONAXONELLIDA)
Cliona; Spheciopsis (loggerhead sponge);
Suberites

Order HALICHONDРИNA

Halichondria

Order POECILOSCLERINA

Microciona; Myxilla; Esperiopsis; Cladorhiza

Order HAPLOSCLERINA

Adocia (=Reniera); *Spongilla*

Order EPIPOLASIDA

Tethya

Sub-class KERATOSA (horny sponges)

Spongia (=Euspongia) (bath sponge); *Hircinia*;
Aplysina; Aplysilla

Phylum CNIDARIA (=COELENTERATA – CTENOPHORA)

Class HYDROZOA (hydroids, medusae)

(=HYDROMEDUSAE)

Order ATHECATA

(=GYMNOBLASTEA, ANTHOMEDUSAE)
Hydra; Tubularia; Sarsia; Coryne; Velella (by-the-wind-sailor); *Millepora; Hydractinia; Bougainvillia; Stylaster; Spirocodon*

Order THECATA

(=CALYPTOBLASTEA, LEPTOMEDUSAE)
Phialidium; Obelia; Aequorea; Halecium; Sertularia; Plumularia

Order LIMNOMEDUSAE

Gonionemus; Craspedacusta; Olindias; Limnocnida

Order TRACHYMEDUSAE

Geryonia (=Carmarina); *Liriope; Aglantha*

Order NARCOMEDUSAE

Solmissus; Aeginia; Cunina

Order SIPHONOPHORA

Physalia (Portuguese man-of-war); *Halistemuna; Lensia; Muggiaeae; Agalma*

Class SCYPHOZOA (jelly fish)

(=SCYPHOMEDUSAE)

Order STAUROMEDUSAE

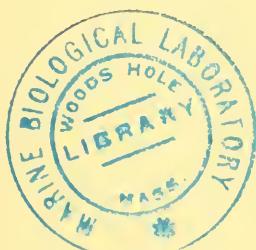

Lucernaria; Haliclystus

Order CUBOMEDUSAE

Carybdea; Chiropodus

Order CORONATAE

Atolla; Linuche; Nausithoe; Periphylla

Order SEMAEOSTOMAE

*Pelagia; Chrysaora; Cyanea; Aurelia (=Aurellia);
Dactylometra*

Order RHIZOSTOMAE

Cassiopea; Rhizostoma; Cotylorhiza

Class ANTHOZOA

Sub-class CERIANTIPATHARIA

Order ANTIPATHARIA (black corals)

Antipathes

Order CERIANTHARIA

Cerianthus

Sub-class OCTOCORALLIA (soft corals)

Order ALCYONACEA

Alcyonium (dead men's fingers)

Order GORGONACEA

Eunicella (sea fan); Gorgia

Order PENNATULACEA

Pennatula (sea pen); Virgularia

Sub-class ZOANTHARIA

Order ZOANTHINIARIA (zoanthids)

Zoanthus; Epizoanthus; Palythoa

Order CORALLIMORPHARIA

Corynactis

Order ACTINIARIA (sea anemones)

*Anemonia (=Anthea); Actinia; Tealia; Metridium
 (=Actinoloba); Calliactis; Adamsia; Peachia*

Order PTYCHODACTIARIA

Ptychodactis

Order SCLERACTINIA (true corals, stony corals)

*Fungia; Porites; Acropora; Caryophyllia;
Meandrina*

Phylum Ctenophora

(=COELENTERATA - CNIDARIA) (comb jellies)

Class TENTACULATA

Order CYDIPPIDA

Pleurobrachia (sea gooseberry); Hormiphora

Order LOBATA

*Leucothea (=Eucharis); Bolinopsis (=Bolina);
Mnemiopsis (comb jelly)*

Order CESTIDA

(=CESTOIDEA)

*Cestum (=Cestus) (Venus's girdle); Velamen
 (=Vexillum, Folia)*

Order PLATYCTENEA

(=CTENOPLANA)

Ctenoplana; Coeloplana; Tjalfiella; Gastrodes

Class NUDA¹

Order BEROIDA

*Beroe*Phylum PLATYHELMINTHES (flatworms)²

Class TURBELLARIA (turbellarians)

Order ACOELA³*Aphanostoma; Convoluta*

Order RHABDOCOELA

*Catenula; Macrostomum; Dalyellia; Gyratrix;
Paravortex*

Order ALLOEOCOELA

*Hofstenia; Plagiostomum; Otomesostoma;
Monocelis*

Order TRICLADIDA

Sub-order MARICOLA

Bdelloura; Uteriporus; Procerodes (= Gunda)

Sub-order PALUDICOLA

Cupes

Sub-order POLYPHAGA

Hydrophilus (= *Hydrous*); *Hister*; *Sphaerius*; *Lucanus* (stag beetle); *Cetonia* (rose chafer); *Stigmodesma*; *Agriotes* (wire worm¹); *Coccinella* (lady bird); *Tenebrio* (mealworm¹); *Tribolium* (flour beetle); *Chrysolina*; *Leptinotarsa* (Colorado beetle); *Dendroctonus*

Order STREPSIPTERA (stylopids)

Stylops

Order MECOPTERA (scorpion flies)

(= PANORPATAE)

Panorpa; *Bittacus*; *Boreus*

Order TRICHOPTERA (caddis flies)

(= PHRYGANOIDEA)

Limnephilus

Order ZEUGLOPTERA

Micropteryx (= *Eriocephala*)

Order LEPIDOPTERA

Sub-order MONOTYSIA

Eriocrania; *Heptialus* (ghost moth); *Stigmella*; *Incurvaria*

Sub-order DITRYSIA

Sitotroga; *Depressaria*; *Cossus* (goat moth); *Psyche* (bag-worm moth); *Castnia*; *Evettia* (pine shoot moth); *Tortrix*; *Galleria* (wax moth); *Ephestia* (flour moths); *Tinea* (clothes moth); *Attacus* (atlas moth); *Papilio* (swallow-tail); *Pieris* (cabbage butterfly); *Acherontia* (death's head hawk moth); *Lymantria* (gipsy moth); *Bombyx* (silk moth)

Order DIPTERA (two-winged flies, true flies)

Sub-order NEMATOCERA

Tipula (daddy-long legs); *Phlebotomus* (sand fly); *Culex*, *Anopheles* (mosquitoes); *Contarinia* (pear midge); *Sciara* (fungus gnat); *Simulium* (black fly); *Chironomus*

Sub-order BRACHYCERA

Rhagio; *Tabanus* (horse fly)

Sub-order CYCLORRHAPHA

Eristalis (drone fly); *Drosophila* (small fruit fly); *Oscinella* (frit fly); *Calliphora* (bluebottle, blowfly); *Musca* (house fly); *Lucilia* (greenbottle); *Glossina* (tse-tse fly); *Melophagus* (sheep tick)

¹ Larva.

Order SIPHONAPTERA (fleas)

(= APHANIPTERA, SUCTORIA)

Xenopsylla; Tunga (jigger); *Pulex*;*Ctenocephalides; Echidnophaga* (sticktight)

Order HYMENOPTERA

Sub-order SYMPHYTA

(= Chalastogastra)

Cephus (stem sawfly); *Nematus* (sawfly); *Sirex*
(giant wood wasp)

Sub-order APOCRITA

(= Clistogastra)

Ichneumon, Nemeritis (ichneumon flies); *Chalcis*
(chalcid fly); *Blastophaga* (fig-insect);
Trichogramma; Formica (ant); *Vespa* (hornet);
Vespula (wasp); *Bombus* (bumble bee); *Apis* (honey
bee)

Class CRUSTACEA

Sub-class BRANCHIOPODA

Order ANOSTRACA

Chirocephalus; Branchipus; Artemia

Order NOTOSTRACA

Triops (= *Apus*); *Lepidurus*

Order CONCHOSTRACA

Cycticus (= *Estheria*); *Limnadia*

Order CLADOCERA (water fleas)

Sida; Daphnia; Simocephalus; Moina; Leptodora;
Podon; Evadne

Order CEPHALOCARIDA

Hutchinsoniella

Sub-class OSTRACODA

Order MYODOCOPA

Cypridina; Pyrocypris

Order CLADOCOPA

Polycope

Order PODOCOPA

Cypris; Cythere; Candona

Order PLATYCOPA

Cytherella

Sub-class COPEPODA

Order CALANOIDA

Calanus; Diaptomus

Order MONSTRILLOIDA

Monstrilla

Order CYCLOPOOIDA

Cyclops; Lernaea (= *Lernaeocera*)¹

Order HARPACTICOIDA

Tigriopus; Harpacticus

Order NOTODELPHYOIDA

Ascidicola

Order CALIGOIDA

Caligus; Lernaeocera (= *Lernaea*)¹

¹ *Lernaeocera* is the *Lernaea* of textbooks and classrooms. The fresh-water genus *Lernaea* used to be called *Lernaeocera* (Gurney, 1933, p. 336).

Sub-class MYSTACOCARIDA

Order LERNAEOPODOIDA

Chondracanthus; Sphaeronella

Sub-class BRANCHIURA

Order DEROCHEILOCARIDA

Derocheilocaris

Sub-class CIRRIPEDIA

Argulus; Dolops

Order THORACICA (barnacles)

Lepas (goose barnacle); *Balanus; Chthamalus;*
Elminius

Order ACROTHORACICA

Alcippe

Order RHIZOCEPHALA

Sacculina

Order ASCOTHORACICA

Laura

Sub-class MALACOSTRACA

Super-order LEPTOSTRACA

(=PHYLLOCARIDA)

Order NEBALIACEA

Nebalia

Super-order SYNCARIDA

Order ANASPIDACEA

Anaspides

Order BATHYNELLACEA

Bathynella

Super-order PERACARIDA

Order MYSIDACEA (opossum-shrimps)

Lophogaster; Gnathophausia; Mysis; Hemimysis;
Siriella; Gastrosaccus

Order CUMACEA

Diastylis; Iphinoe; Pseudocuma

Order TANAIDACEA

Apseudes; Tanais; Leptochelia; Syraphus

Order GNATHIIDEA

Gnathia

Order ISOPODA

Ligia, Armadillidium (woodlice); *Asellus; Idotea;*
Linnoria (gribble); *Bopyrus; Ione; Cymothoa;*
Portunion; Entomisces

Order SPELAEOGRIPHACEA

Spelaeogriphus

Order AMPHIPODA

Gammarus (fresh-water shrimp); *Talitrus* (shore
hopper); *Caprella* (ghost shrimp); *Hyperia; Cyamus*
(whale louse); *Corophium; Jassa*

Super-order HOPLOCARIDA

Order STOMATOPODA (mantis shrimps)

Squilla; Gonodactylus

Super-order PANCARIDA

Order THERMOSBAENACEA

Thermosbaena; Monodella

Super-order EUCARIDA

Order EUPHAUSIACEA (krill, whale feed)

Euphausia; hanes

Order DECAPODA¹

Sub-order NATANTIA

Penaeus, Pandanus, Palaemon (=Leander) (prawns);
Crangon (=Crago), *Hippolyte* (shrimps);
Macrobrachium (=Palaemon) (river prawn)

Sub-order REPTANTIA

Cambarus, Astacus (=Potamobius) (fresh-water crayfish); *Homarus* (lobster); *Nephrops* (Norway lobster); *Jasus* (kreef); *Palinurus* (langouste, crawfish); *Panulirus* (rock lobster); *Cancer* (edible crab); *Pagurus* (=Eupagurus), *Dardanus* (=Pagurus) (hermit crabs); *Lithodes* (stone crab); *Carcinus* (shore crab); *Maia* (spider crab); *Callinectes* (blue crab); *Potamon* (=Telphusa) (river crab); *Uca* (fiddler crab)

Class MEROSTOMATA²

Order XIPHOSURA (king crabs)

(=LIMULIDA)

Limulus, Tachypleus

Class ARACHNIDA²

Order SCORPIONES (scorpions)

Scorpio; Apistobuthus; Buthus; Tityus; Pandinus

Order PSEUDOSCORPIONES (false scorpions)

(=CHELONETHI, CHERNETES)

Microbisium; Chelifer; Garypus; Chthonius

(=Pedipalpi) Order UROPYGI (whip scorpions)
 (=THELYPHONIDA, SCHIZOMIDA, TARTARIDAE)
 Mastigoproctus; Schizomus

Order AMBLYPYGI

(=PHRYNICIDA)

Damon; Phrynidichus; Charinus

Order PALPIGRADI (micro-whip scorpions)

(=MICROTHELYPHONIDA)

Koenenia

Order RICINULEI

(=PODOGONATA)

Ricinoides

Order SOLIFUGAE (false spiders, sun spiders, wind scorpions)

(=SOLPUGIDA)

Galeodes

Order OPILIONES (phalangids, harvest spiders, harvestmen)

(=PHALANGIDA)

Phalangium; Oligolophus

Order ARANAEAE (spiders)

Araneus; (=Epeira); Atrax; Latrodectus; Pholcus

Order ACARI

Acarus, Dermanyssus, Pyemotes, Trombicula
 (mites); *Ixodes, Argas, Ornithodoros* (ticks)

Class PYCNOGONIDA² (sea spiders)

(=PANTOPODA)

Order COLOSSENDEOMORPHA

Dodecolopoda; Colossendeis

¹ See also Dibranchia, p. 23.

² These three classes may be considered as members of sub-phylum Chelicerata.

Order NYMPHONOMORPHA*Nymphon***Order ASCORHYNCHOMORPHA***Ascorhynchus***Order PYCNOGONOMORPHA***Pycnogonum***Class PENTASTOMIDA****Order CEPHALOBAENIDA***Cephalobaena; Reighardia***Order POREPHALIDA***Sebekia; Linguatula***Class TARDIGRADA (water-bears)****Order HETEROTARDIGRADA***Echiniscus; Tetrakentron***Order EUTARDIGRADA***Macrobiotus; Hypsibius; Milnesium*

Phylum CHAETOGNATHA (arrow worms)

*Sagitta; Spadella; Eukrohnia; Pterosagitta;
Heterokrohnia*

Phylum POGONOPHORA (=BRACHIATA) (beard worms)

Order ATHECANEPHRIA*Oligobrachia; Siboglinum***Order THECANEPHRIA***Heptabrachia; Zenkevitchiana; Lamellisabella;
Spirobrachia*

Phylum ECHINODERMATA

Sub-phylum PELMATOZOA**Class CRINOIDEA****Order ARTICULATA¹***Antedon, Tropiometra (feather stars); Rhizocrinus,
Metacrinus (sea lilies)***Sub-phylum ELEUTHEROZOA****Class HOLOTHUROIDEA (sea cucumbers)****Order ASPIDOCHIROTA***Holothuria; Stichopus; Mesothuria***Order ELASIPODA***Deima; Kolga; Elpidia; Pelagothuria*

¹ See Brachiopoda, p. 21.

Order DENDROCHIROTA

Cucumaria; Thyone; Echinocucumis; Psolus;
Phyllophorus

Order MOLPADONIA

Molpadia

Order APODA¹

Synapta; Leptosynapta; Labidoplax

Class ECHINOIDEA

Sub-class PERISCHOECHINOIDEA

Order CIDAROIDA (sea urchins)
Cidaris

Sub-class EUCHINOIDEA

Super-order DIADEMATAcea (sea urchins)

Order DIADEMATOIDA

Diadema; Centrostephanus

Order ECHINOTHURIOIDA

Phormosoma; Areosoma

Super-order ECHINACEA (sea urchins)

Order HEMICIDAROIDA

Salenia

Order PHYMOSOMATOIDA

Stomopneustes

Order ARBACIOIDA

Arbacia

Order TEMNOPLEUROIDA

Tennopterus; Tripneustes (=Hipponoe);
Toxopneustes; Mesilia; Sphaerechinus; Lytechinus;
Pseudocentrotus

Order ECHINOIDA

Echinus; Echinometra; Strongylocentrotus;
Psammechinus; Paracentrotus; Hemicentrotus;
Anthocidaris; Heliocidaris

Super-order GNATHOSTOMATA

Order HOLECTYPOIDA

Sub-order ECHINONEINA

Echinoneus

Order CLYPEASTEROIDA (sand-dollars, cake urchins)

Sub-order CLYPEASTERINA

Clypeaster

Sub-order LAGANINA

Laganum; Echinocyamus

Sub-order SCUTELLINA

Mellita; Echinorachnius; Dendraster

Sub-order ROTULINA

Rotula

Super-order ATELOSTOMATA

Order NUCLEOLITOIDA

Neolampas

Order CASSIDULOIDA

Cassidulus

¹ See *Gymnophiona*, p. 41.

Class ASTEROIDEA (starfishes)**Order HOLASTEROIDA***Pourtalesia***Order SPATANGOIDA (heart urchins)***Spatangus; Echinocardium; Brissopsis***Class OPHIUROIDEA (brittle stars)****Order PHANEROZONA***Astropecten; Porcellanaster; Luidia***Order SPINULOSA***Asterina; Patiria; Anseropoda (=Palmipes);**Henricia; Solaster***Order FORCIPULATA***Marthasterias; Asterias; Leptasterias;**Stichastrella; Pisaster; Brisina***Class OPHIUROIDEA (brittle stars)****Order OPHIURAE (serpent stars)***Ophiura; Ophiothrix; Ophiocoma; Ophiopsila;**Ophiactis; Ophiopholis; Acrocnida; Amphiura;**Amphipholis***Order EURYALAE***Asteronyx; Gorgonocephalus***Phylum CHORDATA****Sub-phylum HEMICHORDATA****(= STOMOCHORDATA, BRANCHIOTREMATA)****Class ENTEROPNEUSTA (acorn worms)***Protoglossus (=Protobalanus); Saccoglossus**(=Dolichoglossus); Harrimania; Glossobalanus;**Balanoglossus; Ptychoderia; Schizocardium;**Glandiceps***Class PTEROBRANCHIA****Order RHABDOPLEURIDA***Rhabdopleura***Order CEPHALODISCIDA***Cephalodiscus; Atubaria***Class PLANCTOSPHAEROIDEA¹***Planctosphaera***Sub-phylum UROCHORDATA (=TUNICATA)****Class ASCIDIACEA (sea squirts)****Order ENTEROGONA****Sub-order APLOUSOBANCHIATA***Clavelina; Polyclinum; Aplidium (=Amaroucium);**Didemnum***Sub-order PHLEBOBANCHIATA***Ciona; Ascidia; Phallusia; Ascidiella; Perophora*¹ This class only contains a few larvae of unknown parentage.

Class THALIACEA**Order PLEUROGONA****Sub-order STOLIDOBANCHIATA**

*Styela; Polycarpa; Botryllus; Boltenia; Pyura;
Molgula*

Sub-order ASPIRICULATA

Hexacroblylus

Class LARVACEA**Order PYROSOMIDA**

Pyrosoma

Order DOLIOLIDA

(= CYCLOMYRIA)

Doliolum

Order SALPIDA

(= DESMOMYRIA)

Salpa

Class LARVACEA**Order COPELATA**

Oikopleura; Appendicularia; Fritillaria

Sub-phylum CEPHALOCHORDATA (= ACRANIA, LEPTOCARDII)

*Branchiostoma (= Amphioxus) (lancelet);
Asymmetron*

Sub-phylum VERTEBRATA**Class MARSPOBRANCHII**

(= AGNATHA)

Sub-class CYCLOSTOMATA¹**Order HYPEROARTII (lampreys)**

(= PETROMYZONES)

Petromyzon; Lampetra; Ichthyomyzon

Order HYPEROTRETI (hagfishes)

(= MYXINI)

Heptatretus (= Bdellostoma); Myxine

Class SELACHII

(= CHONDROPTERYGII, CHONDRICHTHYES, ELASMOBRANCHII)

Sub-class EUSELACHII**Order PLEUROTREMATA (sharks, dogfishes,
angel-fishes)**

(= SELACHOIDEI)

Sub-order NOTIDANOIDEA

(= Hexanchiformes)

Heptranchias; Notidanus

¹ See Gymnolaemata, p. 20.

Sub-order GALEOIDEA

(=*Lamniformes*)*Orectolobus; Odontaspis (=Carcharias);**Scyliorhinus (=Scyllium) (dogfish); Mustelus;**Galeorhinus (=Galeus, Eugaleus) (tope); Sphyrna**(hammerhead); Carcharhinus*

Sub-order SQUALOIDEA

(=*Tectospondyli*)*Squalus (=Acanthias); Echinorhinus; Heterodontus*(=*Cestracion*); *Pristiophorus; Squatina* (angel-fish)

Order HYPOTREMATA (rays)

Sub-order NARCOBATOIDEA

(=*Torpediniformes*)*Torpedo (=Narcobatus, Narcacion)*

Sub-order BATOIDEA

Raja (ray); *Pristis* (saw-fish); *Dasyatis* (=*Trygon*)

(sting ray)

Class BRADYODONTI

Sub-class HOLOCEPHALI (rabbit-fishes)

Rhinochimaera; Callorhinchus; Chimaera; Harriotta

Class PISCES (bony fishes)

(=*OSTEICHTHYES*)

Sub-class PALAEOPTERYGII

Order CHONDROSTEI

(=*ACIPENSERIFORMES*)*Acipenser* (sturgeon); *Polyodon* (paddle-fish)

Order CLADISTIA

(=*POLYPTERIFORMES*)*Polypterus* (bichir); *Calamoichthys*(=*Erpetoichthys*) (reed-fish)

Sub-class NEOPTERYGII

(≠*TELEOSTEI* + *HOLOSTEI*)¹

(=*Holostei*) { Order PROTOSPONDYLI (bow-fins)
Amia

Order GINGLYMODY (gar-pikes)

(=*LEPISOSTEIFORMES*)*Lepisosteus* (=*Lepidosteus*)

Order ISOSPONDYLI

(=*MALACOPTERYGII, CLUPEIFORMES*)

Sub-order CLUPEOIDEA

Clupea (herring); *Sardina* (sardine, pilchard);*Megalops* (tarpon); *Alepocephalus*

Sub-order STOMIATOIDEA

Stomias

Sub-order SALMONOIDEA

Salmo (=*Trutta*) (salmon, trout); *Salvelinus* (char);*Osmerus* (smelt)

Sub-order OSTEOGLOSSOIDEA

Arapaima

¹ i.e., Teleostei ≠ Neopterygii – Holostei.

- Sub-order NOTOPTEROIDEA
Notopterus
- Sub-order MORMYROIDEA
Gymnarchus
- Sub-order GONORHYNCHOIDEA
Gonorhynchus
- Order HAPLOMI
(=ESOCOIDEI)
Esox (pike); *Dallia* (black-fish); *Umbra* (mud-minnow)
- Order INIOMI
(=SCOPELIFORMES)
Sub-order MYCTOPHOIDEA
(=Scopelidae)
Myctophum, *Lampanyctus* (lantern-fishes); *Synodus* (lizard-fish)
- Sub-order ALEPISAUROIDEA
Alepisaurus; *Paralepis*
- Order CHONDROBRACHII
Ateleopus
- Order CETUNCULI
Cetomimus (=Pelecinomimus)
- Order MIRIPINNATI
Eutaeniophorus
- Order GIGANTUROIDEA
Gigantura
- Order LYOMERI (gulper eels)
(=SACCOPHARYNGIFORMES)
Saccopharynx; *Eurypharynx*
- Order OSTARIOPHYSI
Sub-order CYPRINOIDEA
(=Eventognathi)
Copeina; *Electrophorus* (electric eel); *Rutilus* (roach); *Phoxinus* (=Phonixus) (minnow); *Cyprinus* (carp)
- Sub-order SILUROIDEA (catfishes)
(=Nematognathi)
Silurus; *Diplomystes*; *Malapterurus* (electric catfish)
- Order HETEROMI
(=NOTACANTHIFORMES)
Halosaurus; *Notacanthus*
- Order APODES (eels)
(=ANGUILLIFORMES)
Anguilla; *Conger*; *Muraena* (moray)
- Order SYNETOGNATHI
(=SCOMBRESOCES, BELONIFORMES)
Sub-order SCOMBRESOCOIDEA
Scombrasox (skipper); *Belone* (garfish)
- Sub-order EXOCETOIDEA
Exocoetus (flying fish)
- Order SALMOPERCAE
(=PERCOPSIFORMES)
Aphredoderus (pirate-perch); *Percopsis* (sand-roller)

Order MICROCYPRINI

(=CYPRINODONTES, CYPRINODONTIFORMES)
Fundulus (killifish); *Oryzias* (medaka, killifish);
Lebistes (guppy); *Platypoecilus* (platyfish, sword-tail); *Anableps* (four-eyed fish)

Order SOLENICHTHYES

(=SYNGNATHIFORMES + AULOSTOMIFORMES)
Macrorhamphosus (snipe-fish); *Hippocampus* (seahorse)

Order ANACANTHINI

(=GADIFORMES + MACRURIFORMES)
Gadus (cod, whiting); *Merluccius* (hake);
Macrourus

Order ALLOTRIOGNATHI

(=LAMPRIDIFORMES)
Lampris (moon-fish); *Trachypterus* (ribbon-fish)

Order BERYCOMORPHI

Beryx; Monocentris

Order ZEOMORPHI

Zeus (John Dory); *Capros* (boar-fish)

Order PERCOMORPHI¹

Sub-order PERCOIDEA

Perca (perch); *Morone* (bass)

Sub-order TEUTHIDOIDEA

(=Siganoidei)

Teuthis

Sub-order ACANTHUROIDEA

Acanthurus (surgeon-fish)

Sub-order KURTOIDEA

Kurtus

Sub-order TRICHIUROIDEA

Lepidopus (frost fish); *Aphanopus* (scabbard fish)

Sub-order SCOMBROIDEA

Scomber (mackerel); *Thunnus* (tunny)

Sub-order GOBIOIDEA

Gobius (goby); *Periophthalmus* (mud-skipper)

Sub-order CALLIONYMOIDEA (dragonets)

Callionymus

Sub-order BLENNIOIDEA

Bleennius (blenny); *Anarhichas* (sea catfish, wolf-fish)

Sub-order OPHIDIOIDEA (cusk eels)

Genypterus

Sub-order STROMATEOIDEA

Lirus (rudder-fish); *Nomeus*

Sub-order CHANNOIDEA

(=Ophicephaloidea)

Channa (=Ophicephalus)

Sub-order ANABANTOIDEA

Anabas (climbing perch)

Sub-order MUGILOIDEA (grey mullets)

(=Percesoces)

Mugil; Atherina; Sphyraena (barracuda)

¹ Acanthopterygii which, *inter alia*, includes the Percomorphi, is obsolete.

- Sub-order POLYNEMOIDEA
 (=Rhegnopteri)
- Polynemus*
- Order SCLEROPAREI (mail-cheeked fishes)
 (=CATAPRACTI, LORICATI)
- Sub-order SCORPAENOIDEA
Sebastes; Trigla (gurnard); *Cottus* (bullhead,
 miller's thumb)
- Sub-order CEPHALACANTHOIDEA (flying gurnards)
 (=Dactylopteroidea)
Cephalacanthus (= *Dactylopterus*)
- Order THORACOSTEI (sticklebacks)
 (=GASTEROSTOIDEA)
Gasterosteus; Spinachia
- Order HYPOSTOMIDES (dragon-fishes)
 (=PEGASIFORMES)
Pegasus
- Order HETEROSOMATA (flat-fishes)
 (=PLEURONECTIFORMES)
Bothus; Pleuronectes; Psettodes; Limanda
 (flounder); *Solea*
- Order DISCOCEPHALI (sucker-fishes)
 (=ECHENEIFORMES)
Echeneis; Remora
- Order PLECTOGNATHI (trigger-fishes, globe-fishes)
 (÷ TETRAODONTIFORMES)
- Sub-order BALISTOIDEA
 (=Sclerodermi)
Balistes
- Sub-order TETRAODONTOIDEA
 (=Gymnodontes)
Tetraodon (puffer); *Mola* (= *Orthagoriscus*) (sun-
 fish)
- Order MALACICHTHYES (rag-fishes)
 (=ICOSTEIFORMES)
Icosteus; Acrotus
- Order XENOPTERYGII (Cornish suckers, cling-fishes)
 (=GOBIESOCIFORMES)
- Lepadogaster*
- Order HAPLODOCINI (toad-fishes)
 (=BATRACHOIDIFORMES)
Opsanus; Thalassophryne
- Order PEDICULATI
 (=LOPHIIFORMES)
- Sub-order LOPHIOIDEA
Lophius (angler)
- Sub-order ANTENNARIOIDEA (sea toads, frog fishes)
Pterophryne; Antennarius
- Sub-order CERATIOIDEA (deep-sea anglerfishes)
Melanocetus
- Order OPISTHOMI (spiny eels)
 (=MASTACEMBELIFORMES)
Mastacembelus; Macrognathus (= *Rhynchobdella*)

Sub-class Crossopterygii

Order SYNBRANCHII

Sub-order ALABETOIDEA

Alabes (shore eel)

Sub-order SYNBRANCHOIDEA

Synbranchus; Amphiophis

Class AMPHIBIA

Order ACTINISTIA

(=*COELACANTHINI*)*Latimeria* (coelacanth)

Order DIPNOI (lung-fishes)

(=*DIPNEUSTI, CERATODIFORMES*)*Protopterus; Lepidosiren; Neoceratodus*(=*Ceratodus*)

Order CAUDATA

(=*URODELA*)

Sub-order CRYPTOBRANCHOIDEA

Hynobius; Pachypalaminus; Megalobatrachus (giant salamander); *Cryptobranchus* (hellbender)

Sub-order AMBYSTOMOIDEA

Ambystoma (= *Amblystoma*) (mole salamander, 'axolotl'¹); *Siredon* (axolotl); *Dicamptodon* (Pacific giant salamander); *Rhyacotriton* (olympic salamander)

Sub-order SALAMANDROIDEA

Salamandra (fire salamander, etc.); *Triturus* (= *Triton*) (newt); *Diemictylus* (eastern newt); *Desmognathus* (dusky salamander); *Plethodon* (woodland salamander); *Pleurodeles* (pleurodele newt); *Amphiuma* (Congo eel)

Sub-order PROTEIDA

Proteus (olm); *Necturus* (mud-puppy, waterdog)

Sub-order MEANTES

Siren (siren, mud-eel); *Pseudobranchus* (dwarf siren)

Order SALIENTIA

(=*ANURA*)

Sub-order AMPHICOELA

Leiopelma (= *Liopelma*) (New Zealand frog);*Ascaphus* (tailed frog)

Sub-order OPISTHOCEOLA

Discoglossus (painted frog); *Alytes* (midwife toad); *Bombina* (= *Bombinator*) (fire bellied toad); *Xenopus* (clawed toad); *Pipa* (Surinam toad)

Sub-order ANOMOCOELA

Megophrys (bull toad); *Pelobates* (European spade foot)

Sub-order PROCOELA

Bufo (toad, true toad); *Hyla* (tree frog); *Gastrotheca* (= *Nototrema*) (marsupial frog); *Eleutherodactylus* (= *Hylodes*) (robber frog); *Rhinophryne* (Mexican digger toad); *Dendrobates* (poison frog)

¹ Some three years ago the late Dr. Karl P. Schmidt proposed to the Commission on Zoological Nomenclature that the name *Siredon* should be suppressed. He saw no reason to believe that the axolotl, *Siredon mexicanum*, belonged to a different genus from *Ambystoma*. Until the Commission reaches a decision, the axolotl is *Siredon mexicanum*, while mole salamanders are species of *Ambystoma*.

Sub-order DIPLOSIOCOELA

Rana (frog, true frog); *Astylosternus* (hairy frog);
Rhacophorus (= *Polypedates*) (tree frog); *Microhyla*,
Callulina

Order GYMNOPHIONA (caecilians)

(= APODA¹)

Caecilia; *Scolecomorphus*; *Hypogeophis*;
Ichthyophis; *Gymnopis*

Class REPTILIA (reptiles)

Order RHYNCHOCEPHALIA

Sphenodon (= *Hatteria*) (tuatara)

Order TESTUDINES

(= CHELONIA)

Sub-order CRYPTODIRA

Testudo (Greek tortoise, etc.); *Chelone* (green turtle); *Dermochelys* (leathery turtle); *Chrysemys* (terrapin); *Trionyx* (soft-shelled turtle)

Sub-order PLEURODIRA

Chelus (matamata); *Chelodina* (long necked turtle)

Order CROCODYLIA

(= LORICATA)

*Crocodylus*² (crocodile); *Gavialis* (Indian 'gharial'); *Tomistoma* (Malayan gavial); *Caiman* (South American caiman); *Alligator* (alligator)

Order SQUAMATA

Sub-order SAURIA (lizards)

(= Lacertilia)

Hemidactylus (gecko); *Iguana* (iguana); *Anguis* (slow-worm); *Heloderma* (Gila monster); *Lacerta* (green lizard, wall lizard, etc.); *Chamaeleo* (chameleon)

Sub-order SERPENTES (snakes)

(= Ophidia)

Constrictor (boa); *Python* (python); *Natrix* (= *Tropidonotus*) (grass snake, water snake, etc.); *Naja* (cobra); *Vipera* (= *Pelias*) (viper, adder); *Crotalus* (rattle snake)

Class AVES (birds)

Order STRUTHIONIFORMES (ostriches)

Struthio

Order RHEIFORMES (rheas)

Rhea

Order CASUARIIFORMES

Dromiceius (emu); *Casuarius* (cassowary)

Order APTERYGIFORMES (kiwis)

Apteryx

Order TINAMIFORMES (tinamous)

(= CRYPTURI)

Rhynchosciurus; *Crypturellus*; *Nothura*; *Nothoprocta*

¹ See Holothuroidea, p. 33.

² This is the original and, therefore, correct spelling, by Laurenti in 1768.

- Order GAVIIFORMES (divers)

Phoenicopterus
- Order ANSERIFORMES
Anhima (screamer); *Anas* (duck); *Anser* (goose);
Cygnus (swan)
- Order FALCONIFORMES
 (= ACCIPITRES)
Cathartes (turkey vulture); *Sagittarius* (secretary bird);
Aegypius (black vulture); *Accipiter* (= *Astur*)
 (goshawk, sparrow hawk); *Falco* (= *Cerchneis*)
 (kestrel, falcon, etc.); *Pandion* (osprey)
- Order GALLIFORMES
Crax (curassow); *Megapodius* (megapode);
Phasianus (pheasant); *Gallus* (fowl); *Numida*
 (guinea fowl); *Meleagris* (turkey); *Opisthocomus*
 (hoatzin)
- Order GRUIFORMES
Mesoearas (roatelo); *Turnix* (button-quail); *Grus*
 (crane); *Aramus* (limpkin); *Psophia* (trumpeter);
Rallus (rail); *Heliornis* (sun-grebe); *Rhynochetos*
 (kagu); *Eurypyga* (sun-bittern); *Cariama* (cariama);
Otis (bustard)
- Order CHARADRIIFORMES
 (= LARO-LIMICOLAE)
Jacana (lily trotter); *Charadrius* (ringed plover,
 sand plover, etc.); *Stercorarius* (= *Lestrinus*) (skua);
Larus (gull); *Sterna* (tern); *Alca* (razorbill);
Fratercula (puffin)

¹ The correct Latin name of the Manx shearwater (formerly *Puffinus puffinus*) is *Procellaria puffinus*.

Order COLUMBIFORMES

Treron (green pigeon); *Columba* (pigeon); *Goura* (crowned pigeon); *Pterocles* (sand-grouse)

Order PSITTACIFORMES (parrots)

Psittacus; *Nestor*; *Eos*; *Poicephalus*; *Agapornis*; *Melopsittacus* (budgerigar)

Order CUCULIFORMES

Cuculus (cuckoo); *Crotophaga* (ani); *Geococcyx* (road-runner); *Centropus* (coucal); *Musophaga* (plantain-eater)

Order STRIGIFORMES (owls)

Tyto; *Bubo*

Order CAPRIMULGIFORMES

Steatornis (oil bird); *Podargus* (frogmouth); *Caprimulgus* (nightjar)

Order APODIFORMES

(= MICROPODIFORMES, MACROCHIRES)

Apus (= *Micropus*) (swift); *Trochilus* (hummingbird)

Order COLIIFORMES (mouse birds)

Colius

Order TROGONIFORMES (trogons)

Pharomachrus (quetzal); *Apaloderma*

Order CORACIIFORMES

Alcedo (kingfisher); *Todus* (tody); *Momotus* (mot-mot); *Merops* (bee-eater); *Coracias* (roller); *Upupa* (hoopoe); *Buceros* (horn-bill)

Order PICIFORMES

Bucco (puffbird); *Galbula* (jacamar); *Capito* (barbet); *Indicator* (honey guide); *Ramphastos* (toucan); *Picus* (woodpecker)

Order PASSERIFORMES

Sub-order EURYLAIMI (broadbills)

Smithornis

Sub-order TYRANNI

Formicarius (antbird); *Furnarius* (ovenbird); *Cotinga* (cotinga)

Sub-order MENURAE

Menura (lyre-bird)

Sub-order PASSERES (songbirds)

(= *Oscines*)

Alauda (lark); *Hirundo* (swallow); *Turdus* (thrush, blackbird); *Fringilla* (chaffinch, etc.); *Sturnus* (starling); *Corvus* (raven, crow, etc.)

Class MAMMALIA

Sub-class PROTOTHERIA

Order MONOTREMATA

Tachyglossus (= *Echidna*) (spiny anteater); *Ornithorhynchus* (= *Platypus*) (duck-bill)

Sub-class THERIA

Infra-class METATHERIA

Order MARSUPIALIA

Didelphis (American opossum); *Antechinomys* (jerboa pouched mouse); *Dasyurus* ('native cat'); *Perameles* (bandicoot); *Trichosurus* (common phalanger); *Vombatus* (= *Phascolomis*) (wombat); *Phascolarctos* (koala); *Macropus*, *Bettongia* (kangaroos); *Setonyx* (quokka); *Potorous* (rat-kangaroo)

Infra-class EUTHERIA

Order INSECTIVORA

Tenrec (= *Centetes*) (tenrec); *Erinaceus* (hedgehog); *Echinosorex* (= *Gymnura*) (moon rat); *Sorex* (shrew); *Crocidura* (white-toothed shrew); *Scalopus* (eastern mole); *Talpa* (common old world mole); *Chrysochloris* (golden mole); *Macroscelides* (elephant shrew)

Order DERMOPTERA

Cynocephalus (= *Galeopithecus*, *Galeopterus*) (flying lemur, cobego, colugo)

Order CHIROPTERA

Sub-order MEGACHIROPTERA

Pteropus (flying fox); *Cynopterus*, *Epomophorus* (fruit bats)

Sub-order MICROCHIROPTERA

Rhinolophus (horseshoe bat); *Pipistrellus* (pipistrelle); *Myotis* (brown bat, etc.); *Desmodus* (vampire)

Order PRIMATES

Sub-order PROSIMII

(= *Lemuroidea*)

Tupaia (tree shrew); *Loris* (loris); *Perodicticus* (potto); *Galago* (bush baby); *Lemur* (common lemur)

Sub-order TARSII

Tarsius (tarsier)

Sub-order SIMIAE

(= *Anthropoidea*)

Hapale (= *Callithrix*) (marmoset); *Cebus* (capuchin); *Saimiri* (squirrel monkey); *Ateles* (spider monkey); *Macaca* (macaque); *Cercocebus* (mangabey); *Papio* (baboon); *Cercopithecus* (African tree monkeys); *Presbytis* (langur); *Hylobates* (gibbon); *Pongo* (= *Simia*) (orang); *Pan* (= *Anthropopithecus*, *Troglodytes*) (chimpanzee); *Gorilla* (gorilla); *Homo* (man)

Order EDENTATA

Bradyus (three-toed sloth); *Dasypus* (armadillo); *Priodontes* (giant armadillo); *Myrmecophaga* (giant anteater); *Tamandua* (lesser anteater)

Order PHOLIDOTA

Manis (pangolin, scaly anteater)

Order LAGOMORPHA

Ochotona (pika); *Lepus* (hare); *Oryctolagus* (= *Lepus*) (rabbit); *Sylvilagus* (cottontail)

Order RODENTIA

Sub-order SCIUROMORPHA

Sciurus (squirrel); *Marmota* (= *Arctomys*) (marmot, woodchuck); *Tamias* (chipmunk); *Castor* (beaver); *Aplodontia* (sewellel, mountain beaver); *Xerus* (African ground squirrel); *Citellus* (= *Spermophilus*) (American ground squirrel, gopher); *Glaucomys* (American flying squirrel); *Geomys* (pocket gopher); *Anomalurus* (scale-tailed flying squirrel)

Sub-order MYOMORPHA

Peromyscus (deer mouse); *Sigmodon* (cotton rat); *Cricetus* (hamster); *Mesocricetus* (golden hamster); *Mystromys* (mole mouse); *Lophiomys* (maned rat); *Lemmus* (lemming); *Microtus* (vole); *Clethrionomys* (= *Evotomys*) (bank vole); *Arvicola* (water vole); *Ondatra* (muskrat); *Rattus* (= *Epimys*) (rat); *Mastomys* (multimammate rat, coucha rat); *Apodemus* (wood mouse); *Mus* (house mouse); *Gerbillus* (gerbil); *Meriones* (jird); *Spalax* (mole rat); *Glis* (= *Myoxus*), *Muscardinus* (dormice); *Zapus* (jumping mouse); *Dipus* (jerboa); *Pedetes* (jumping hare)

Sub-order HYSTRICOMORPHA

Cavia (guinea pig); *Hydrochoerus* (capybara); *Chinchilla* (chinchilla); *Myocastor* (coypu); *Hystrix* (porcupine)

Order CETACEA

Sub-order ODONTOCETI

Mesoplodon (beaked whale); *Physeter* (sperm whale); *Delphinus* (dolphin); *Tursiops* (= *Tursio*) (bottle-nosed dolphin); *Orcinus* (killer whale); *Phocaena* (porpoise)

Sub-order MYSTICETI

Rhachianectes (grey whale); *Balaenoptera* (rorqual); *Sibbaldus* (blue whale)

Order CARNIVORA

Sub-order FISSIPEDA

Canis (wolf, dog, jackal); *Vulpes* (fox); *Ursus* (bear); *Thalarctos* (polar bear); *Procyon* (raccoon); *Potos* (kinkajou); *Ailurus* (panda); *Ailuropoda* (giant panda); *Mustela* (= *Putorius*) (ferret, weasel, mink, ermine, polecat, stoat); *Martes* (marten, sable); *Meles* (badger); *Taxidea* (American badger); *Spilogale* (spotted skunk); *Lutra* (otter); *Herpestes* (mongoose); *Hyaena* (striped hyaena); *Viverra* (civet); *Felis* (cat); *Felis* (= *Puma*) (mountain lion, cougar); *Panthera* (= *Leo*) (lion); *Panthera* (= *Tigris*) (tiger); *Panthera* (= *Jaguarius*) (jaguar); *Panthera* (panther, leopard); *Acinonyx* (cheetah)

Order PINNIPEDIA

Otaria (sea lion); *Zalophus* (Californian sea lion);
Odobenus (walrus); *Phoca* (seal); *Halichoerus* (grey
 seal, Atlantic seal); *Mirounga* (elephant seal)

Order TUBULIDENTATA

Orycteropus (aardvark)

Order PROBOSCIDEA

Loxodonta (African elephant); *Elephas* (Asiatic
 elephant)

Order HYRACOIDEA

Dendrohyrax (tree hyrax); *Procavia* (coney)

Order SIRENIA

Dugong (dugong); *Trichechus* (manatee)

Order PERISSODACTYLA

Sub-order HIPPOMORPHA

Equus (horse, donkey, zebra)

Sub-order CERATOMORPHA

Tapirus (tapir); *Rhinoceros*, *Diceros*, *Ceratotherium*
 (rhinoceroses)

Order ARTIODACTYLA

Sub-order SUIFORMES

Sus (pig); *Tayassu* (peccary); *Phacochoerus* (wart
 hog); *Hippopotamus* (hippopotamus)

Sub-order TYLOPODA

Lama (= *Auchenia*) (llama, alpaca, vicuna,
 guanaco); *Camelus* (camel, dromedary)

Sub-order RUMINANTIA

Tragulus (chevrotain); *Moschus* (musk deer); *Dama*
 (fallow deer); *Cervus* (red deer, wapiti, American
 'elk'); *Alces* (European elk, moose); *Rangifer*
 (reindeer, caribou); *Okapia* (okapi); *Giraffa*
 (giraffe); *Taurotragus* (eland); *Bubalus* (buffalo);
Bos (cattle); *Bison* (bison, American 'buffalo');
Hippotragus (roan antelope); *Antilope* (Indian
 antelope); *Gazella* (gazelle); *Rupicapra* (chamois);
Ovibos (musk ox); *Capra* (goat); *Ovis* (sheep)

APPENDIX I. FURTHER READING

THE classifications in Chapter III are based on the references given below, except in two cases, the Parazoa (by Burton) and the Platyhelminthes (by Baer and Dawes). The references, which also contain detailed information about the systematics of the various groups, were compiled in consultation with the specialists mentioned in Appendix II. They differed in their approach, which explains why the list is, in some respects, heterogeneous. Another, but unimportant, cause of heterogeneity is the method of referring to articles in general text-books such as Grassé's *Traité de Zoologie*. In the first two volumes (actually fascicules) of this work, there are articles on the Protozoa by nine authors. These are referred to as Grassé (1952, 1953), and the same policy has been adopted in analogous cases. When one or only a few authors were concerned with a group, as in the case of the Onychophora, the reference is given as Cuénot (1949a) and not Grassé (1949).

Further references will be found in the books and papers listed below. The Zoological Record and Smart & Taylor (1953) are additional and invaluable sources of information.

PROTOZOA

General

Grassé (1952, 1953); Kudo (1954); Smart & Taylor (1953, pp. 4–16)

Ciliata

Corliss (1956, 1957, 1959)

MESOZOA

Hyman (1940); Stunkard (1954)

PARAZOA

Hyman (1940, 1959); Jewell (1959)

CNIDARIA

General

Hyman (1940, 1959); Moore (1956)

Hydrozoa

Fraser (1937, 1944); Russell (1953); Totton (1954)

Scyphozoa

Mayer (1910)

Anthozoa

Carlgren (1949); Stephenson (1928, 1935); Vaughan & Wells (1943)

CTENOPHORA

Hyman (1940, 1959); Mayer (1912)

PLATYHELMINTHES

General

Baer (1951); Hyman (1951a, 1959)

Turbellaria

Ferguson (1954); Luther (1955)

Cestoda

Wardle & McLeod (1952); Yamaguti (1960)

Trematoda

Dawes (1946); Sproston (1946); Yamaguti (1958)

NEMERTINA

Coe (1943); Hyman (1951a)

ASCHELMINTHES

Rotifera

Edmondson (1959); Harring (1913); Hudson & Gosse (1886); Hyman (1951b, 1959); Voigt (1957)

Gastrotricha

Brunson (1950, 1959); Hyman (1951b, 1959)

Echinoderida

Hyman (1951b, 1959); Lang (1949); Zelinka (1928)

Priapulida

Cuénot (1922a); Dawydoff (1959c); Hyman (1951b, 1959)

Nematomorpha

Chitwood (1959); Hyman (1951b, 1959)

Nematoda

Chitwood & Allen (1959); Chitwood & Chitwood (1950); Goffart (1951); Goodey (1951); Thorne (1949)

ACANTHOCEPHALA

Hyman (1951b, 1959)

ENTOPROCTA

Brien (1959); Hyman (1951b, 1959)

POLYZOA

Bassler (1953); Brien (1960); Hyman (1959); Rogick (1959)

PHORONIDA

Dawydoff & Grassé (1959); Forneris (1957); Hyman (1959)

BRACHIOPODA

de Beauchamp (1960a); Hyman (1959); Muir-Wood (1955); Roger (1952); Williams (1956)

MOLLUSCA

General

Grassé (1960); Morton (1958); Thiele (1931, 1935)

Polyplacophora

Fischer-Piette & Franc (1960b); Hoffmann (1929–1930); Tryon & Pilsbry (1892–1893)

Aplacophora	Fischer-Piette & Franc (1960a); Hoffmann (1929)
Monoplacophora	Lemche & Wingstrand (1960)
Gastropoda	Hoffmann (1932–1940); Lemche (1948); Tesch (1946–1949)
Bivalvia	Franc (1960)
Cephalopoda	Adam (1952); Chun (1908, 1910); Robson (1929–1932); Sasaki (1929)
SIPUNCULOIDEA	Hyman (1959); Tetry (1959)
ECHIUROIDEA	Cuénot (1922b); Dawyodoff (1959b)
ANNELIDA	
<i>General</i>	Grassé (1959)
Polychaeta	Dawyodoff (1959a); Fauvel (1923, 1927, 1959)
Myzostomaria	Prenant (1959); von Stummer-Traufels (1926)
Oligochaeta	Avel (1959); Cernosvitov & Evans (1947); Dawyodoff (1959a); Goodnight (1959); Stephenson (1930)
Hirudinea	Dawyodoff (1959a); Harant & Grassé (1959); Harding (1910); Harding & Moore (1927); Mann & Watson (1954); Moore (1959)
Archiannelida	de Beauchamp (1959)
ARTHROPODA	
Onychophora	Bouvier (1905); Cuénot (1949a)
Pauropoda	Attems (1926b); Verhoeff (1934)
Diplopoda	Attems (1926c, 1937–1940)
Chilopoda	Attems (1926d–1930)
Symphyla	Attems (1926a); Edwards (1959); Verhoeff (1933)
Insecta	Imms (1957); Smart & Taylor (1953, pp. 42–73)
Crustacea	
<i>General</i>	Calman (1909); Küenthal & Krumbach (1927)
Cephalocarida	Sanders (1957)
Copepoda	Wilson (1932)
Mystacocarida	Delamare Deboutteville (1953)
Cirripedia	Krüger (1940)
Malacostraca	Bronn's (1940–1959)
Merostomata	Fage (1949a)
Arachnida	Baker & Wharton (1952); Grassé (1949); Hughes (1959); Kaston & Kaston (1953); Locket & Millidge (1951, 1953); Nuttall <i>et al.</i> (1908–1926); Petrunkevitch (1928, 1949); Vachon (1952)
Pycnogonida	Fage (1949b); Hedgpeth (1947); Helfer & Schlottke (1935)
Pentastomida	Cuénot (1949c); Heymons (1935)
Tardigrada	Cuénot (1949b); Marcus (1936, 1959)
CHAETOGNATHA	de Beauchamp (1960b); Fraser (1957); Hyman (1959)
POGONOPHORA	Hartman (1954); Hyman (1959); Ivanov (1960)
ECHINODERMATA	
<i>General</i>	Cuénot (1948); Hyman (1955)
Echinoidea	Durham & Melville (1957); Mortensen (1928–1951)
CHORDATA	
Hemichordata	Burdon-Jones (1956); Dawyodoff (1948); Hyman (1959)
Urochordata	Berrill (1950); Harant (1948)
Cephalochordata	Drach (1948); Franz (1922)
Vertebrata	
Marsipobranchii	Berg (1947); Fontaine (1958); Regan (1936)
Selachii	Arambourg & Bertin (1958a); Berg (1947); Regan (1929b, 1936)
Bradyodonti	Arambourg & Bertin (1958b); Berg (1947)

Pisces	Berg (1947); Grassé (1958); Regan (1929a, 1936)
Amphibia	
<i>General</i>	Boulenger (1882); Noble (1931)
Salientia	Griffiths (1959)
Gymnophiona	Nieden (1913)
Reptilia	
<i>General</i>	Bellairs (1957); Schmidt & Inger (1957)
Rhynchocephalia	von Wettstein (1931–1937)
Testudines	Carr (1952); Loveridge & Williams (1957); Pope (1935)
Crocodylia	Mertens & Wermuth (1955)
Squamata	Bellairs & Underwood (1951); Bogert & del Campo (1956); Boulenger (1920–1921); McDowell & Bogert (1954)
Aves	Mayr & Amadon (1951); Peters (1931–1951); Stresemann (1959); Wetmore (1951)
Mammalia	Grassé (1955); Simpson (1945)

APPENDIX II. ACKNOWLEDGMENTS

I AM most grateful to those scientists, mentioned below, who have been good enough to help me. R. B. Freeman gave invaluable help with Chapter III, as did Dr. J. Smart with the Insecta. In addition, I am indebted to George Rylands for advice about Chapter I and to Mrs. J. N. Thomson, who typed this book with exemplary patience and efficiency. I wish also to thank the Agricultural Research Council for support.

Ch. I	Prof. C. F. A. Pantin, F.R.S.; Dr. K. A. Joysey.
Ch. III	
PROTOZOA	Dr. C. A. Hoare, F.R.S.
PARAZOA	Dr. Maurice Burton, D.Sc.

ANIMAL AND GROUP INDEX

ALTHOUGH this Section should be used as an Index, it also provides an abbreviated classification of all genera mentioned. When there are sub-orders in Chapter III, sub-orders and not orders are given after genera in the Index, to help the reader find the genus in which he is interested. Normally, for example in papers, the order and not the sub-order is mentioned when referring to an animal which is not well known.

Starred genera occur in the Index and *not* in Chapter III. When such entries have synonyms worth mentioning, they follow the preferred name, e.g.

**Caretta* (= *Thallassocochelys*), Cryptodira, 41

because there is no other way of finding out that the synonym exists. This does not apply to unstarred entries, as these will also be found in Chapter III, in which some synonyms are mentioned.
