

AntiCorruption Society

What does peak oil, carbon dioxide, dollar devaluation and Smart Meters have in common?

Posted on [December 11, 2011](#) | [1 Comment](#)

ALOT – AND MOST PEOPLE WILL HATE THE NEW MONETARY SYSTEM THAT IS CURRENTLY BEING CONSTRUCTED BY THE GLOBALISTS

by AL Whitney (C) copyright 2010

The Goals

The following statement should be taken very seriously. It is neither a pipe dream nor an idle threat and describes the ongoing agenda of the globalists.

Dr. Henry Kissinger (Rockefeller toady):

“Who controls the food supply controls the people; who controls the energy can control whole continents; who controls money can control the world.”

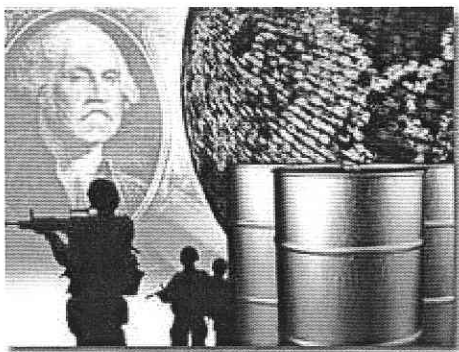

To help them advance their goals (which the public would never support), the Rockefellers and the other globalists have created a dualistic system of changing society: the STATED goals and the REAL goals. The STATED goals always sound reasonable, even benevolent, however the hidden REAL goals are the exact opposite.

“Give me control over a nation’s currency, and I care not who makes its laws.” Mayer Amshel Rothschild (1743-1812)

In an interview, Col Fletcher Prouty discussed the Rockefeller/Kissinger plans to set up global markets for oil [energy] and commodities [food].

Col Fletcher Prouty – The Origin of Oil (8 min video clip) <http://www.youtube.com/watch?v=vdSjyvIHVLw>

Energy and Currency

During the 70's bogus "energy crisis"[1] Nixon removed the dollar from the gold standard by Executive Order. As the dollar was the world's reserve currency, this was not inconsequential. The Rockefeller oil cartel, in collusion with the corrupt Nixon Administration, managed to convince the leaders of the world that 1) oil (like gold) was a finite substance and that 2) all oil should be purchased in dollars ONLY because the dollar was the world's reserve currency! [2] This change allowed the oil and banking cartel the opportunity to control what the world would have to pay for a barrel of oil and allow them to inflate the dollar without restriction. The status of the

petrodollar is maintained by the US military, as both Saddam Hussein and Libya's Ghadafi found out when they attempted to sell their oil in Euros and Dinars.

Consequently, every effort to replace petroleum as the leading source of energy has been suppressed. And there have been many. [3] The *Technical Manual Silent Weapons of Quiet Wars* [4] acknowledged that there were new energies becoming available with the potential to free mankind from the global oligarch's and their oil cartel's tight fist grip. The energy suppression agenda was agreed upon at the very first meeting of these oligarch's at the Bilderberg Hotel in 1954. At that meeting it was also agreed that computers and new technologies were the tools they would use to to achieve their goal of enslaving the population of the planet – to insure their supremacy. They agreed to build a Technocracy.

The Technocracy idea was first proposed in the 30's by another Rockefeller toady, M. K. Hubbert. [5] Hubbert was educated at Rockefeller's University of Chicago and was taught that oil was a finite substance. In 1977 he even received Rockefeller's Public Service award. Hubbert theorized that instead of receiving money or something of value for mankind's labor, each productive human should be allocated a controlled share of available 'energy' via an energy debit card. To accomplish this of course, a system to track individual energy usage had to be constructed. And the public (including the policy makers) had to be convinced that tracking individual energy usage was necessary. Enter stage left . . . global warming.

Demonizing CO2 and producing global warming

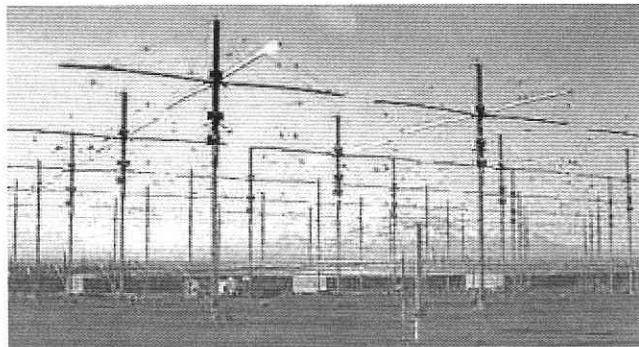

For many years ecologists have been reporting that the Rain Forest, and other old growth forests have been decimated by industrialization and economic growth. We have been taught that these magnificent forests are considered to be the 'lungs of the planet'. They take carbon dioxide out of the atmosphere and give off oxygen. Also, as most now understand, the burning of hydrocarbons for energy production releases carbon dioxide as a byproduct. By permitting the destruction of the Rain Forrest, atmospheric levels of carbon dioxide have risen to unusually high levels. The globalist's scientists began monitoring the carbon dioxide levels of the planet and claimed these increases were primarily a result of the burning of what they call 'fossil fuels' for energy production. Because the oil cartel has managed to convince policymakers that oil is finite (a 'fossil fuel'), they have enjoyed an oil depletion allowance for many many years.

The Rockefellers funded a 'think tank' called the Club of Rome. In 1991 the Club of Rome announced "The First Global Revolution". It concluded that the planet was facing a great ecological threat and that " . . . only through

changed attitudes and behaviour . . .” could pollution be controlled and global warming be averted. Scientists were paid to prove that carbon dioxide was a ‘greenhouse gas’ and that the elevated levels of CO₂ in the atmosphere were causing global heat trapping. An absolutely enormous amount of money was distributed to researchers and non-profit organizations to advance this theory.

Let’s not forget that carbon dioxide is **an essential element** for plants and animals. Not too long ago this fact was taught in grade school and was well accepted by most scientists. Carbon Dioxide is good and plants need it. And few people are aware that an independent non-aligned scientist has essentially proven that carbon dioxide is not a greenhouse gas after all.

Therefore, to convince the public and policy makers that the carbon dioxide released during the burning of hydrocarbons was heating the planet and causing disastrous weather changes (creating a ‘global’ problem) evidence of warming had to be produced and disseminated. In the early 90’s Congress authorized the usage of the HAARP ionospheric heater which is capable of weather manipulation and earthquake creation. [6]

HAARP in Alaska

This weapon of mass destruction, while well recognized by many independent researchers, has been kept classified for the most part. So, melting ice caps and weather modification (to include droughts, and floods) have not been difficult to artificially create. [7] Many of these weather disasters have been falsely attributed to the ‘greenhouse’ effect of increased atmospheric carbon dioxide.

For those who control the printing of the dollar, it is easy to generate the funds necessary to buy faux science and bribe non-profit organizations to promote it. The plan to produce and disseminate false science was revealed by Dr Richard Day at a medical conference in 1969:

“Somewhere in this connection, then, was the statement admitting that some scientific research data could be, and indeed has been, falsified in order to bring about desired results. Here he said, “People don’t ask the right questions. Some people are too trusting.”[8]

And using so-called ‘solutions’ to ensure profits for the globalists and their corporations (carbon taxes, cap and trade and the climate exchange) are extremely valuable tools as well – for advancing both the concept and the (non) ‘solutions’.

When you examine this chart, it is evident that a lot of money has been spent to promote the bogus science of CO₂ global warming.

CHART

Imagine how much pollution reduction and petroleum conservation would have been achieved had this vast amount of money been spent advancing the passenger rail system in the United States instead!

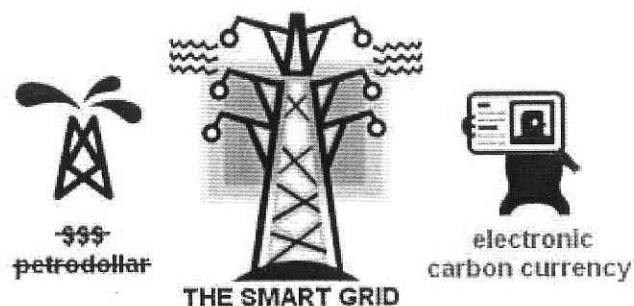

Advancing peak oil and the threat of Petro-collapse

As petroleum had been falsely 'declared' a fossil fuel and therefore a 'finite substance', it wasn't too difficult to convince policymakers and populations of the need to ration this 'black gold'. Since no other clean energy discoveries were allowed to replace hydrocarbons (by being aggressively suppressed) [9], most modern activities on the planet (including the war machine) were intentionally made dependent on them. In fact the corrupt Executive Branch of the US Government established its own 'agency' to do exactly that. It has come to be known as the Department of Energy, which was launched during the energy non crisis of the 70s.

So, after the establishment of the Kyoto Protocol on global warming in 1997, a former oil geologist, Colin Campbell, resurrected Hubbert's research and reintroduced the concept of peak oil. His premise was that there had been no new significant discoveries reported as their simply was no more oil to find. Campbell founded the first non-profit organization to promote the peak oil theory – the Association for the Study of Peak Oil (ASPO). ASPO organizations have been spreading the word that the world is running out of oil **and they all site Rockefeller toady M K Hubbert's research** to support their claim. They say little about the petrodollar and never mention Hubbert's proposed technocracy. ASPO USA has even set up a lobbying office in Washington DC to insure that Congress remains indoctrinated in the peak oil myth.

Author William Engdahl brilliantly explained Rockefeller's endless pursuit to control global energy via the myths of: *Peak Oil and Global Warming- Plan A and Plan B*

Creating the electronic cashless carbon-currency system

For many years the population has been pushed into an ever increasing cashless system of 'commerce'. Credit and debit cards were widely promoted, many employers started insisting on direct deposit, utility companies relentlessly promoted "e-bills" and "e-payments", some companies started refusing to send paper bills, banks stopped returning

cancelled checks, and electronic money transfers became commonplace. In fact, people are being asked by more and more companies to permit “direct withdrawals” from their bank accounts.

Globalist insider Dr Richard Day explained to a group of pediatricians in 1969 [**BEFORE** the 70s energy crisis and the Club of Rome 1972 declaration regarding Limits to Growth and their 1991 warning about global warming] much of the globalist’s agenda. He said that money would become predominately credit. . . . exchange of money would be not cash or palpable things but electronic credit signal. Any purchase of any significant amount would be done electronically. Earnings would be electronically entered into your account. [10]

The ‘federal government’ via the Executive Branch has endlessly promoted electronic national ID’s (and medical records) and we are seeing the concept of microchip ID implants rapidly moving foreword. In fact Nicolas Rockefeller told film producer Aaron Russo that ‘elites’ plan to microchip the entire population. [11] Independent researcher Katherine Albrecht has been tracking their progress for many years. She authored a book, *Spychips*, and maintains a web site: <http://www.spychips.com/>

For obvious reasons a carbon currency and a cashless society can only be implemented via electronic bookkeeping. Environmental organizations were bribed (see chart) to replace the concept of the “Ecofootprint” with the “Carbonfootprint”. The population was encouraged to use new carbon calculators to track their own carbonfootprints based on their energy usage. Energy usage was coupled with the production of the newly proclaimed ‘pollutant’ carbon dioxide so creating and selling energy saving appliances popped up as a whole new market. In fact some of the new appliances contain microchips so that individual unit’s energy-draw can be determined electronically – appliance by appliance. This unnecessary new form of surveillance is being sold as the Smart House.

Smart Meters and the Smart Grid

To monitor and control individual energy consumption (as M K Hubbert had proposed with his Technocracy plan back in the 30’s) Smart Meters were designed and promoted. They are being sold to the public as yet one more way to mitigate the pending disaster called “Global Warming”. Smart Meters are designed to provide information (and control) to a Smart Grid. The Global Smart Grid Federation was founded to help grids from each region get interconnected and as Dr. Henry Kissinger (Rockefeller toady) proclaimed back in the 70’s ” . . . who controls the energy can control whole continents”. In fact during the reign of the ENRON corporation, unscrupulous traders figured out how to create rolling blackouts from a central location and wage economic warfare on an entire region. ENRON traders used this attack in 2000-2001 against one of the world’s biggest economies; the state of California. [12] The impact on Californian’s was devastating.

Replacing the petrodollar

Meanwhile the private Federal Reserve has been implementing policies that are intended to weaken or crash the US dollar. The foundation is being laid to replace it as the world’s reserve currency. And there is more and more discussion about the implementation of a global carbon tax.

“But, whether or not you accept the idea that the financial crisis was created for the purpose of replacing the United States and the U.S. dollar as the stable point in international finance with a global financial dictator and a new world currency, this scenario—set forth in my book—is now in full swing.” John Wolfe, author of *Crisis by Design*.

The electronic control of currency AND the electronic control of electricity (energy) is exactly what the globalists need to replace the petrodollar with their new carbon currency debit cards. Using these new technologies and strategies, Rockefeller’s goal for the elite to create a Technocracy for the control all of humanity can – in theory – be full filled.

Here is a quote from the Rockefeller funded infamous Club of Rome’s 1991 report; *The First Global Revolution*. “In searching for a common enemy against whom we can unite, we came up with the idea that pollution, the threat of global warming, water shortages, famine and the like, would fit the bill. . . . All these dangers are caused by human intervention in natural processes, and it is only through changed attitudes and behaviour that they can be overcome. **The real enemy then is humanity itself.**” [13] Humanity was blamed by the global ‘elite’ for the destruction and devastation created by their own global corporations and their refusal to permit the emergence of new non-hydrocarbon based clean energies. [14] Therefore, controlling all human activity has been ‘sold’ to the public and to policy makers as necessary to ‘save the planet’ from ecodevastation and the population from petro-collapse.

The building blocks of the new Technocracy

To create their ‘technocracy’ and ‘sell’ their new monetary system, the global cartels (Rockefellers=oil/energy and Rothschilds=central banking/currency) had to get the following accomplished:

- Construction of a massive interconnected electric grid
- Insure that most of the world remains dependent on petroleum products for energy (suppress new forms of non-hydrocarbon clean energy)
- Control petroleum production and global pricing (oil wars, the petrodollar, and stock market manipulation)
- Convince policymakers that petroleum is a ‘fossil fuel’ or a finite resource (The Association for the Study of Peak Oil USA just opened an office in Washington, D.C. so they can relentlessly lobby Congress.)
- ‘Sell’ both peak oil (resource depletion) and global warming (environmental devastation) to policymakers and the public by lavishly funding non-profit environmental organizations and allocating vast amounts of taxpayer funding to government agencies
- Marginalize or obstruct real efforts at conservation, i.e. Reduce, Reuse, Recycle, Relocalize and Rail
- Create the cashless society via the non-optional implementation of electronic currency and electronic currency transfers
- Crash the (petro) dollar – which currently still holds the status as the global reserve currency
- Construct the Smart Grid (Smart Meters for electricity, gas and water) making it possible to turn off essential utilities (either regionally or individually) from a central location
- Establish a mandatory individual electronic ID and an advanced surveillance/monitoring system
- Disallow the use of other currencies – like gold/silver and barter – so that only ‘electronic money’ can be used for paychecks, purchases and/or to pay utility bills

Transition by stealth and deception

As most folks are completely unaware of the concept of a “Technocracy”, the idea of a “carbon currency”, or the harmful effects of “the Smart Grid”, it is possible these might be implemented before any significant number of people can figure out what is really going on. It is also possible the environmental orgs will be duped into helping to promote it. These organizations seem to be doing exactly what their foundation grants pay them to do – like promoting carbon dioxide as a pollutant while completely ignoring other devastating environmental threats like the Corexit poisoning of the entire Gulf coast region and the aerosol dumping of aluminum and barium into our atmosphere contaminating our air, soil and water.

The Technocracy, should it be allowed to move forward, will be much like 1984. Big Brother will then be able to control all of humanity. Individuals, regions or even continents will be vulnerable to whims of a small group of psychopathic international bankers who currently control most global currencies. They are known by many as the central bankers or TheMoneyMasters. [14] Their technocracy has the potential to lock the people of the planet into a technological control grid and the concept of ‘freedom’ could become a thing of the past. The globalist’s technocratic era or *Age of Transition*, [15] has been aggressively promoted by NASA [16] using global warming as a justification.

Strategies

If we are to prevent this tragedy, we need to help spread the word to the unsuspecting naive child-like public. To be in denial at this late stage of the game only puts you and your family in harms way. We are not going to change Washington that is now hopelessly banker controlled and corrupt. The best we can do is try to find and support local

solutions. Moving away from the centralization of power and control i.e. globalization is de-centralization or RELOCALIZATION. Start by exposing both the peak oil and the global warming myths. Here's a brochure to pass out: http://anticorruptionsociety.files.wordpress.com/2011/09/energymyths_po-gw_brochure.pdf

Other actions:

- Say NO to cashless currency or electronic money – cut up your credit cards and stop doing online banking
- Say NO to NY banks and the Wall Street casino game
- Say NO to electric, gas and water Smart Meters
- Say NO to the centralization of power – including global carbon taxes

- Say YES to voluntary conservation: Reduce-Reuse-Recycle-Rail
- Say YES to Going Local: local organic food production, locally owned businesses, local energy production, local entertainment, local currencies, local barter, locally owned banks or credit unions, and local stock markets
- Say YES to a state Public Bank

Recommended Reading: Silent Weapons for Quiet Wars

To help those interested fill in the blanks, I recommend reading the *Technical Manual, Silent Weapons for Quiet Wars*. [4] It clarifies how long this socio-economic assault on the American people – by Rockefeller, the banksters and the global elite – has been under way. They started constructing their Technocracy (and controlling energy sources) as soon as they got their hands on sophisticated computers! Rockefeller Foundation money funded the research. The globalists came together on this agenda at the very first Bilderberg meeting in 1954 – two years before Hubbert first presented his bogus scientific theory known as peak oil.

Direct quotes from the globalist's *Technical Manual, Silent Weapons for Quiet Wars*

1. "The solution of today's problems requires an approach which is ruthlessly candid, with no agonizing over religious, moral or cultural values."
2. "All science is merely a means to an end. The means is knowledge. The end is control. Beyond this remains only one issue: Who will be the beneficiary?"
3. "Consequently, in the interest of future world order, peace, and tranquility, it was decided to privately wage a quiet war against the American public . . ."
4. "In conclusion, the objective of economic research, as conducted by the magnates of capital (banking) and the industries of commodities (goods) and services, is the establishment of an economy which is totally predictable and manipulatable."
5. "The quality of education given to the lower class must be of the poorest sort, so that the moat of ignorance isolating the inferior class from the superior class is and remains incomprehensible to the inferior class. With such an initial handicap, even bright lower class individuals have little if any hope of extricating themselves

from their assigned lot in life. **This form of slavery is essential to maintain some measure of social order, peace, and tranquility for the ruling upper class.**

6. "Eventually every individual element of the structure comes under computer control . . . with identified consumers (identified via association with the use of a credit card and later a permanent "tattooed" body number invisible under normal ambient illumination)."
7. "Politicians hold many quasi-military jobs, the lowest being the police which are soldiers, the attorneys and C.P.A.s next who are spies and saboteurs (licensed), and the judges who shout orders and run the closed union military shop for whatever the market will bear. The generals are industrialists. The "presidential" level of commander-in-chief is shared by **the international bankers.**"

ONE RESPONSE TO WHAT DOES PEAK OIL, CARBON DIOXIDE, DOLLAR DEVALUATION AND SMART METERS HAVE IN COMMON?

[Andrew](#) | December 11, 2011 at 7:54 p12 | [Reply](#)

What an impressive article... I agree with most of what you have said except that we should have public banks. Take a look at how the cayman island banks work. Because they have no central banks, very little government legislative impositions and anyone can set up their own banks, competition is very high and so is risk. Because of this they all survived the GFC and operate in a more natural way.

Anyway, great work.
