

OID/Company Name Lookup

	MAC/OID	Company Name
Enter MAC Address or OID:	00-21-a1	SYMMETRICAL TECHNOLOGIES

NOTE: The MAC address must be separated by a dash '-', not a colon ':'. In Microsoft's infinite wisdom, they assumed any time you have 3 numbers separated by a colon you must be working with a time value which causes problems when looking up a three digit OID separated by colons. Use Edit/Replace to quickly replace any ":" values.

Or Enter Up to 25 MAC Addresses:
