The Basic Text for Learning and Communicating with English Idioms

Idioms for Everyday Use introduces learners to more than 230 common idioms. The hands-on worktext format helps individuals both to understand the idioms and to use them with confidence in their own communication. Learners encounter the high-frequency idioms in context, analyze their meanings, and practice using them in a variety of activities.

The book is designed to be used profitably by learners who are just developing language proficiency, as well as by those who are working to achieve the goal of producing natural-sounding, colloquial English. The material has been designed for use in a variety of class environments and as the basis of individual, small-group, and cooperative learning.

Idioms for Everyday Use is organized into 20 units, each with a general theme such as colors, food, geography, and time. A unit covers idioms with words related to its theme; for example, the idioms in the color unit include *in the red*, *to feel blue*, *red tape*, and *a white lie*.

Each unit consists of the following sections:

- ▶ **Reading**—presents the idioms in the context of an amusing story, giving learners their first exposure to the idioms.
- ▶ **Meanings**—offers examples of the idioms in context and asks learners to actively determine their meanings.
- ▶ **Practice**—provides ample opportunity to master the idioms. Learners may be asked to judge whether an idiom fits a context or whether the form of an idiom is correct.
- ▶ **Conversation**—presents the idioms in natural conversations for role-plays and encourages learners to create conversations of their own.
- ▶ **Discussion**—invites learners to make cultural comparisons and provides real-life stories or examples that illustrate usage.

The worktext also features a glossary of idioms, with their definitions, for convenient reference.

Learners will eagerly follow the light-hearted stories—illustrated with cartoons that provide entertaining and instructive visual interest—and will benefit from the variety of activities that will help them communicate naturally using English idioms.

In the Red

What a Group!

Last year my English class was full of characters. That's a polite way of saying it had some unusual people that I'll never forget. One student was such a hard worker that he learned all the idioms in our book **by heart**. He was always saying things like "I'm on cloud nine," or "I'm green with envy." We never knew if he meant what he said or if he was just practicing English. Another student **had a sweet tooth**. She would bake lots of breads and cakes and bring them to every class for us to share during breaks. Two students met in the class and fell **head over heels in love**. We were all invited to their wedding and had a great time. Then there was a student who was always **pulling someone's leg**. For example, one day before class, he put a long homework assignment on the board and made us think that the teacher had given it. We all had **long faces** until the teacher came in. Then we realized that someone had played a joke on us.

Idioms from Time

Reading

Read the story. Then discuss the questions.

Cat Time

My cat is an expert at waiting for things to happen. Waiting around and **killing time** is her specialty. She watches the birds in the backyard for a couple of hours at a time.

Like all cats, she never makes plans. She'll do many things **on the spur of the moment**. For example, if she suddenly feels that **the time is right**, she'll try to go fishing in my fish tank.

Her favorite hobby is tree climbing. Give her a dangerous tree and she won't hesitate. **In no time**, I'll have to call the fire department to come and get her down. When she hears the fire engine, she gets scared and jumps out of the tree. She always lands on her four feet **in the nick of time**—just before she hits the ground. Then she walks away as if there's no problem.

1. When you **kill time**, what are you doing? What do you do when you want to kill time?

- When you do something **on the spur of the moment**, do you plan it in advance? When is the last time you went somewhere on the spur of the moment?

A Big Puzzle

A while ago, I decided to put together one of those five thousand-piece jigsaw puzzles all by myself. I was sure that I could do it because I'm good at all kinds of games—from crossword puzzles to video games. But it wasn't so easy **after all**. First, I put all the pieces on the table, and I started to work on the sky part of the puzzle. But **every other** piece was blue and seemed to fit in the sky. I must have stared at the pieces for two hours. "**Take it easy**," I told myself. "**Sooner or later** you'll put some pieces together." And I was right. **Before long**, I had several pieces together. But finishing the entire puzzle was a project that took me **quite a few** months. Of course, at the end, I learned the most important fact about putting together puzzles. The last piece is always missing! Just **the other day** I found that missing piece behind the sofa. **No wonder** I hadn't found it before!
