

ABSTRACT

Appropriate Technology Sourcebook, CD-ROM, 1997

This is the latest edition of the guide to practical books on village and small community technology. Over 50,000 copies of previous editions have been used in more than 130 countries, to find a wide range of published technical information that can be used by individuals and small groups. In the new edition, 1150 publications from international and U.S. sources are reviewed, covering small water supply systems, renewable energy devices such as watermills and improved cookstoves, agricultural tools and implements, intensive gardening, workshop tools and equipment, crop preservation, housing, health care, forestry, aquaculture, nonformal education, small business management, transportation, small industries and other topics. Extensive index. Price and ordering information are provided for each publication. 500 illustrations. The Sourcebook can also be used as the index for the Appropriate Technology Microfiche Library, which contains the complete text of 1000 books. Complete sets of the microfiche library are also available from the publishers at low cost.
