<u>" An Introduction To WORLD LENDING LIBRARY or WLL"</u>

AND at the bottom

<u>"What are e-texts (electronic texts) & how does it help me?"</u>
Which will make you laugh

WLL - The most comprehensive fully-organized user friendly electronic library in the World. It is given here FREELY to all people for World Peace through Understanding.

NOTE: If you are thinking of getting the WLL you can save many hours of agonizing problems by reading this document, carefully, in its entirety, then it is clear and easy !
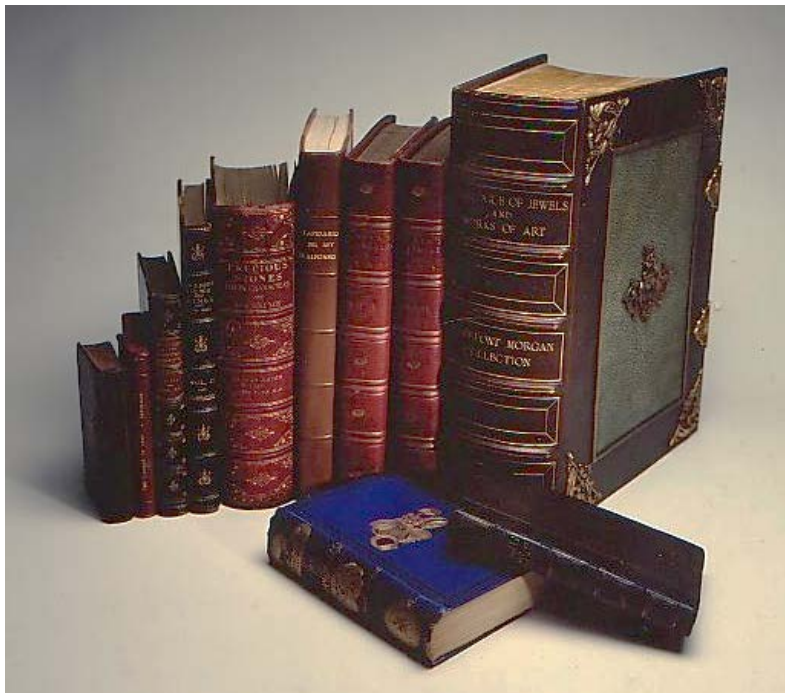

IF YOU DO NOT GET THIS LIBRARY; MOST OTHER SCHOOLS WILL - HAVING IT FOR THEIR STUDENTS (& YOURS)******* DON'T MISS OUT

THE POWER OF ANY UNIVERSITY OR SCHOOL IS NOT THE PROFESSORS; IT IS THE QUALITY OF THEIR RESEARCH LIBRARY. THERE ARE MANY THOUSANDS OF RARE AND UNUSUAL BOOKS FROM OXFORD, HARVARD, LIBRARY OF CONGRESS, NYC PUBLIC LIBRARY, YALE, PRINCETON, STANFORD, UNI. OF TORONTO, UNI. OF CALIFORNIA AND MANY OTHERS ARE INCLUDED IN WLL.........

We have seen some of these VERY EXPENSIVE data bases ($200,000 to $300,000 per one year) available to Universities in developing countries and after seeing them I can easily understand WHY students do not enjoy reading as in years past. We believe learning is a lifetime pleasure and not solely about getting a good job.   In the USA students leave universities with a $50,000 to $250,000 debt over there head. So education is now BIG business and NOT about the joy of learning and large research libraries are ONLY possible to the richest of universities and by copyright all information is controlled. Often the best and brightest students are strongly encouraged to stay in the USA after graduation and their own developing country of origin is deprived of their most valuable "Human Resources" called Brain Drain.........

The WLL (World Lending Library) now used by over 35 countries and three million students. An International Project produced and organized starting in 1972, by hundreds of volunteers on 5 continents and is only 4.25 TBs in size. The value of the WLL is in its total organization that is user friendly while its scope is worldwide and ever growing. WLL (World Lending Library) is the largest and most organized English library in electronic texts and includes in it over

100 other libraries from the internet, including ALL of Gutenberg Project - over 125,000 Books, Sacred Text Archive - 10,000 Books, Blackmask - 15,000 Books and many many more. It stands alone; meaning you do not need to be connected to the internet to use WLL....... A massive FREE library, contains both fiction and non-fiction on all subjects, including over 625,000 books (including over 1000 encyclopedias & 500 dictionaries) and manuscripts from 600 AD through 2016, 60,000 papers, 25,000 audios, 800,000 illustrations, over 180,000 MP3 songs from all over our World or 5 years of continuous music and 12,000 videos. Learn Languages – STUDIES in over 70 languages. If this library was in hard text books it would be worth $35 million or more, take many years to collect and would fill 40,000 feet or 13,500 meters or NEAR 3 miles of bookshelves. This is now FREE to all for copying onto a 5TB (or larger) of external or internal Hard Drive space ($140 in the USA). We only require that receiving institutions freely share this lending library with all local Schools, Libraries, Colleges and Universities.   Please place it in a folder named, "WLL". This electronic library was not organized by any university or institution, it was organized over 45 years and thousands of hours of time, dedicated to love & with the idea shared with Bacon, that "Knowledge is Power". Power belongs to all people everywhere. There is no third World, there is only one World. This electronic library is already being used by many of the national universities in countries across Asia, Africa, and Central & South America. They use it as their main electronic library and most of them have 30,000 students or more.   People need to see the worth of coping the whole library and not just the parts that interest them. We have found in our many years of putting this library together that all knowledge is related and we feel that people would see the benefit of a broader education rather than the specialization and narrow minded departmental education we are encouraged to accept today. All things fit together and are related and work together ,,,,,Socrates' was suppose to have said "Specialization is the root of stupidity and narrow mindedness" ....

<u>We have had many people offer the same comment: "Why, the WLL is better than the internet because everything is organized and you do not have to look all over the internet for what you want".   Also we find that some 40% of the books, etc. in WLL are no longer available on the internet, while the WLL is archived and will never lose a single item.</u>

Please make FULL copies of the WLL <u>ONLY</u> as the entire purpose of the library is as a research library that has ALL areas of ALL subjects represented and organized.........

**   **********There is also, the very large "Children's Library" special for Primary Schools, (also included in the full library) ***********

Enjoy Our Best "World Lending Library" - Volunteers
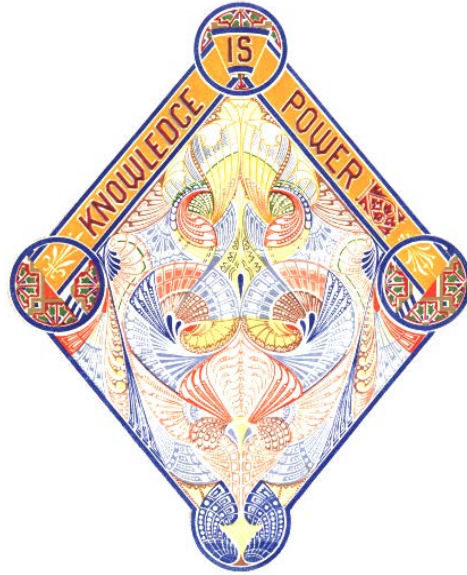

KNOWLEDGE IS POWER - Bacon
(40,000 Quotations – Charles Noel Douglas 1917, page 1058)

We love all these amazingly decadent libraries, they feel like they should belong in another time. They did once! E-texts are now; it's all searchable, copy able and you can carry a vast library in your breast pocket & no tree cutting, expensive shelves, buildings etc.. Libraries large, small and tiny are the keepers of human history, the shape of man's efforts to understand and remember, they bring perspective to human history and enable anyone to learn and keep learning.

**New York City Public Library**
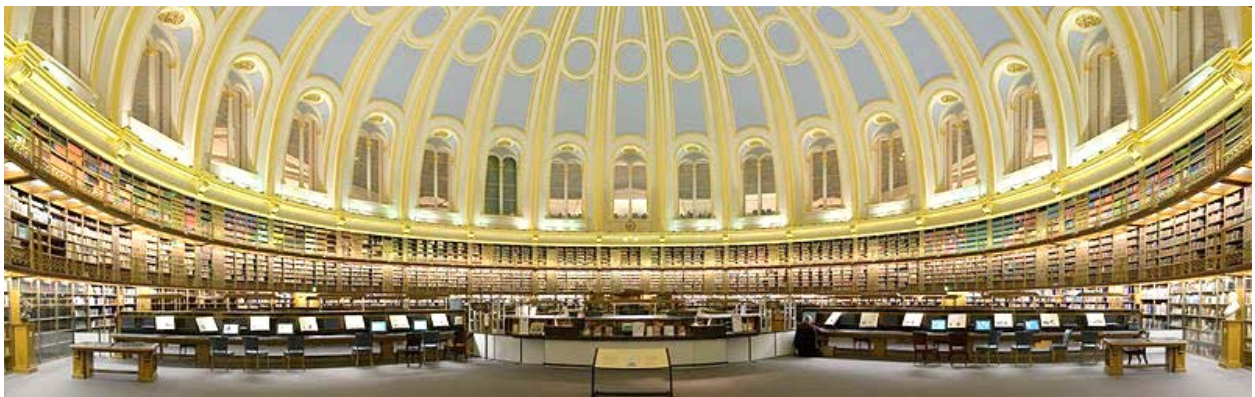

British Museum Reading Room
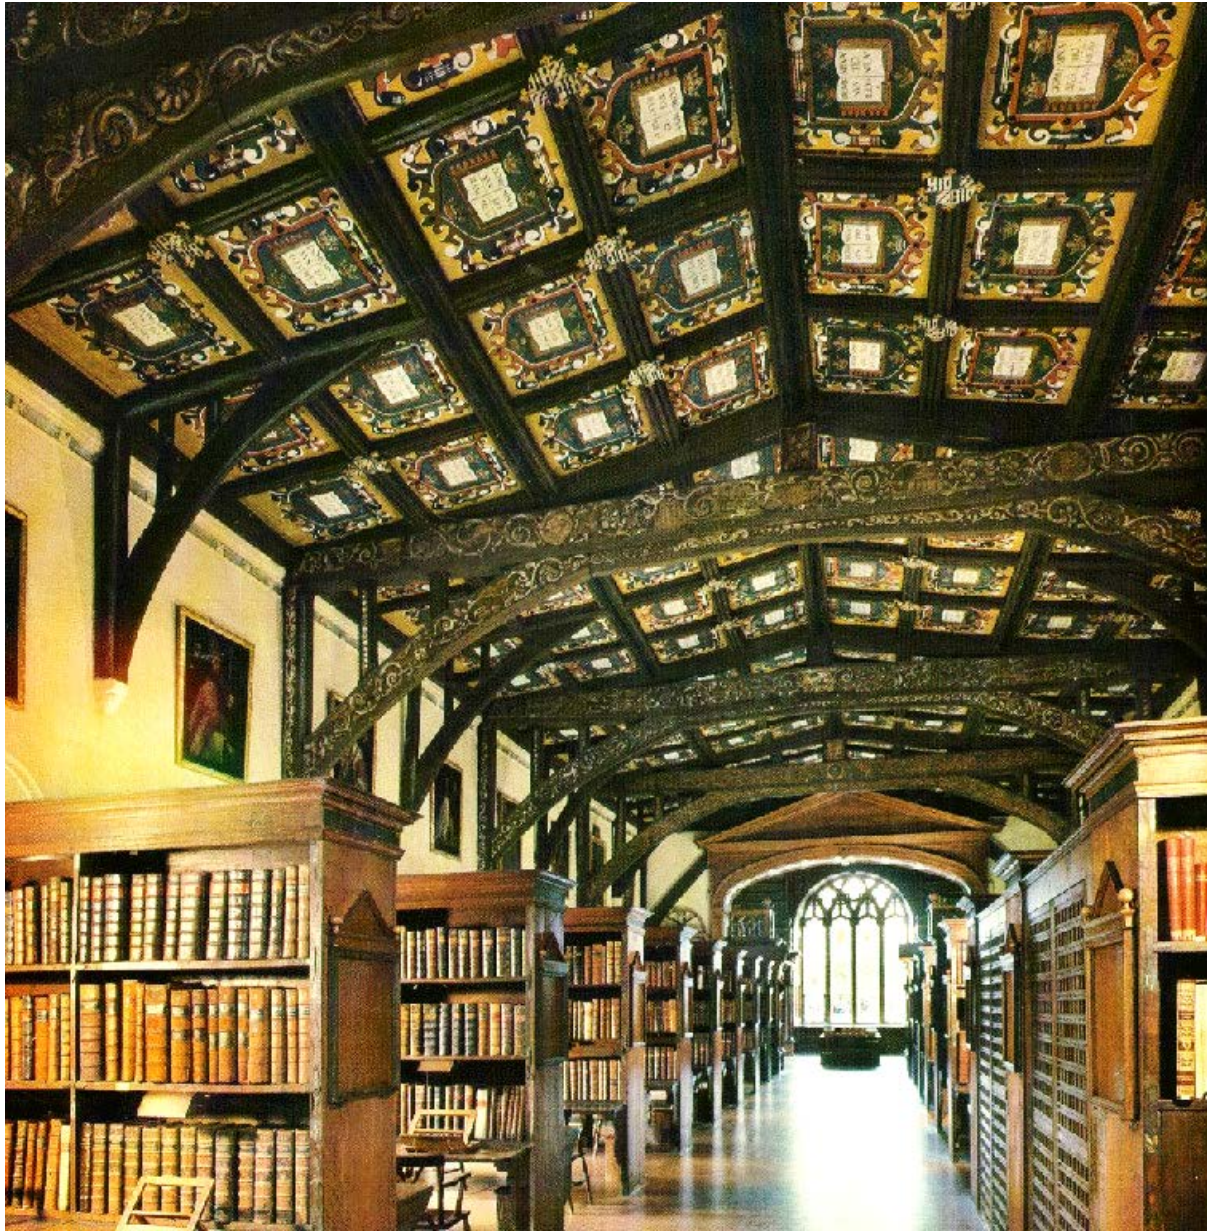

Duke of Humphrey's Library, Bodleian, Oxford University, England

The Library of Royal Site of San Lorenzo de El Escorial, Spain

----

The Library is organized by subject in a user friendly logical manner and is unlike, "public libraries" that are physical hard texts in one area, audios in another area and videos in yet another area   All medias are in single subject areas and are placed in multiple subjects when needed, i.e. "Geology of Africa" is in both the Geology file and the Africa file whereas in a physical library the item would only be in one subject area. The library is search-able and both individual
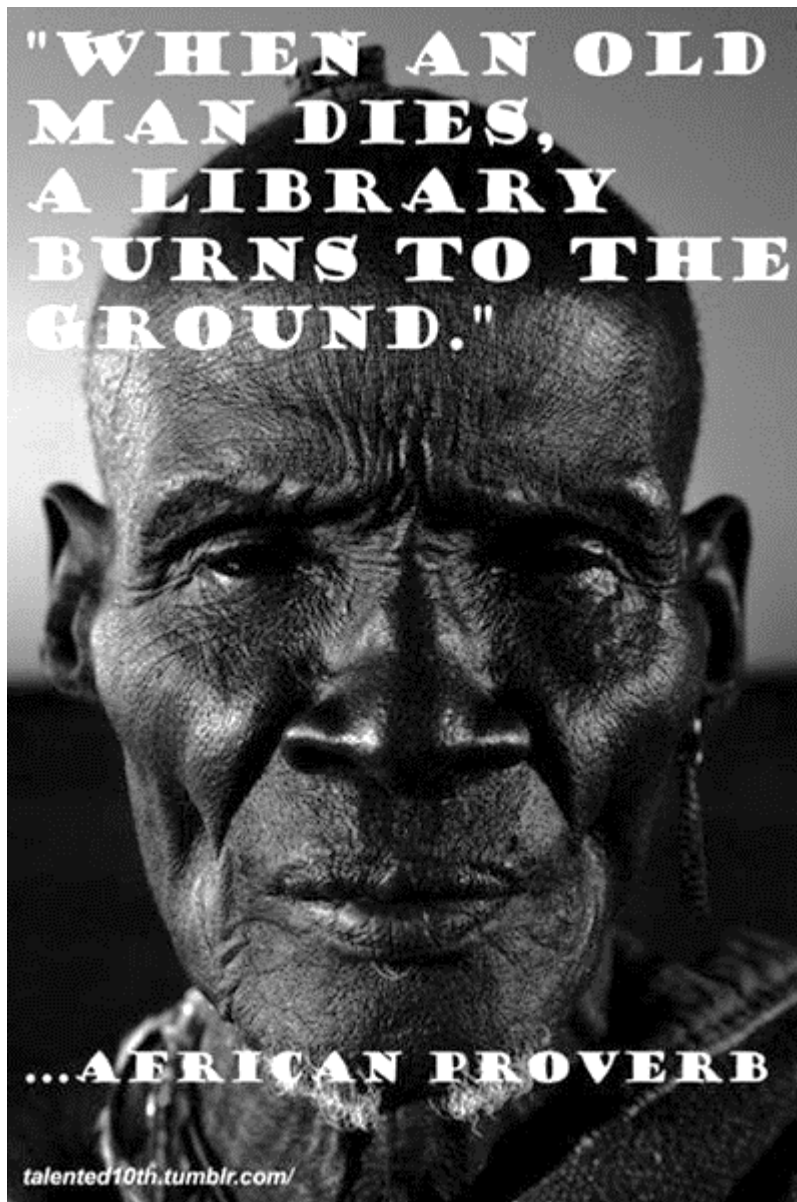

items and whole subject areas can be freely downloaded. This is truly the "library of the future" and free access to all information is here now and easily copied to protect our freedoms. There is no person to say this is correct and this needs to be banned, we can see all information and decide what we choose to believe. There are some publications in this library that you may strongly oppose, but this is a research library and therefore must contain all books representing all sides of political, scientific, theological and historical issues so feel fortunate to have such a broad base of information to review for reshaping your own opinion.   Life is getting better and so let's all enjoy the wonderful access to information that only a short time ago was available to the privileged few.

A truly great library contains something in it to offend everyone.

quote: Jo Goodwin

FB/TitleWaveforBooks

"WHEN AN OLD MAN DIES, A LIBRARY BURNS TO THE GROUND."

...AFRICAN PROVERB

talented10th.tumblr.com/

This electronic library is not a finished product but it is the foundation for a world library as future items and Medias develop. This library works best on a windows system.

This library is from the efforts of Project Gutenberg's with over 45 years of work from 1972 to the present, including over 125,000 books from the USA, Australia & Canada. There are over 18,000 books from www.archive.org incredible efforts (search A.O.pdf). Sacred-texts.com organized by John Bruno Hare 1955 - 2010 has over 8,000

books in "World Lending Library". Many hundreds of other varied sources have also been used.

You need to spend an hour or more to understand its simple organization.

When you enter "World Lending Library" there are 39 Folders representing 39 rooms for each subject library, IE, Science, Beliefs, Myths & History, Philosophy-Psychology, etc. and under that are included an extensive general reference library.   Like you walk into a very large physical library and there stands the librarian and you ask her where the Science or the Myths & History room are and she points to another room entrance.   Behind or near her in the entrance room is an extensive general reference library. Thus they are separate, FOLDERS (rooms) and then an extensive general reference library.

Then you go into the Science reading room to see the librarian standing there and you ask her where the Biology or Astronomy or Physics & Math rooms are and she points you in the proper room thus FOLDERS are at the top and then you notice that behind or near her in the entrance room is an extensive general Science reference library.

Then you go into the Biology reading room to see the librarian standing there and you ask her where the Evolution & Darwin or books by Darwin, Charles Robert 1809-1882 are and she points you in the proper room thus FOLDERS are at the top and then you notice that behind or near her in the entrance room is an extensive general Biology reference library. ETC.

Set the BEST View for all pages of WLL, AS SEEN ON THE OPENING PAGE OF WLL ABOVE

Folders (doors) at the top and all other files below.　(Use "View" – "List")

Our simple agreement with all that receive this FREE, "WORLD LENDING LIBRARY" is:

1 – By placing this electronic library in a folder named, "WLL" you will give credit to An International Project that was produced and organized over 45 years by hundreds of volunteers on 5 continents to organize this unique library.

Please make FULL copies of the WLL ONLY as the entire purpose of the library is as a research library that has ALL areas of ALL subjects represented and organized.........

2 – The general order of the library is not to be changed as it is a well thought out, user friendly simple layout and is easily searchable.　Deleting of books is not necessary as ALL points of view are represented in this library and any research needs to reflect all opinions & views.

3 – There should be a considerable effort on your and any receiver to share the total library, over 4.25 TBs, with all learning institutions Public & Private, High schools, Primary schools, teacher colleges, city libraries and all others in your country and all the other countries of Africa, Asia, Central & South America for FREE………
By doing this it will show that your first interest is in education for all who are interested.

As this library will never be a finished product but it is the foundation for an ever growing "World Lending Library", you are encouraged to add future items, e-texts, audios and any other Medias.

 (NOTE: Copy the Library, exactly like the original copy (pictured above), DIRECTLY onto the OPENING WINDOW (Screen) of any new external hard drive or the "C" drive of your computer, always make a new folder for the entire library named "WLL". Do this because book file names are often long and you will get a notice that many books cannot be copied because the file name is too long. When copying to any new external hard drive you must right click in "My Computer" on the new hard drive and do a "Quick Format". Any provided software on the new hard drive is no good, as when you rename any file it will back it up as a second copy….<u>SEE - 2 - How to Make Copies of WORLD LENDING LIBRARY</u>

If you put the "World Lending Library" on the internet you <u>MUST</u> put a password so that Google cannot do a general search and just any person can go and download the books. This would become a copyright issue and could bring you unnecessary problems. We also strongly recommend that since the library is only 4.25 TBs that you copy it on to 2 different hard drive areas of your server or 2 separate external hard drives as a backup in case one copy fails the other copy can be quickly used. I have not had any luck using the "Teracopy" program as it freezes up and you will not know how to continue. Windows copy system works fine and you can pull up to 6 or 7 different selections at the same time and as they, each selection, finishes you will select another few items to copy, always keeping it to 8 or 10 copy windows at any time. Follow to the exact order of the original hard drive layout..................not that difficult.

General Contents of – WORLD LENDING LIBRARY

Includes an extensive general reference library on English and the origins of language

----

Blackmask – 15,000 Books in 6 searchable collections 1.85 GBs

----

Gutenberg Project – April 30 2010 USA (125,000 Books) & Gutenberg – Australia (10,000 Books) – Canada (10,000 Books) (100 GBs)

Sacred-Text Archive (8,000 Books) (3GBs)

Architecture – & SEE Sustainable Development (7.7 GBs)

Beliefs   (362 GBs)

Vast libraries on ALL the World Religions, Astrology, Divination, I Ching, Runes, etc. , Magick & Witchcraft, PSI - Life After Death – OBEs, Secret Societies, Tarot & Cards, Theosophy, plus many more, includes an extensive general reference library

----

Book Collections, around the World - plus a huge general library (3. GBs)

Children's Library- Thousands of books and many videos (144 GBs)

Communication, Journalism, Media etc.   (3.3 GBs)

Documentaries   (235 GBs)

555 Documentaries here - plus many 1000s more throughout this entire Electronic Library

----

Economics

SEE Gov & Secrets - MONEY and A huge general library

Encyclopaedia Britannica 1769 - Present (23.3 GBs)

Including Encyclopaedia Britannica - 11th Edition - 44 Million Words 1910-1911 - All 33 massive volumes of this the most expansive encyclopedia ever done in the English language, 40,000 articles.

Fict-Bio   (137 GBs)

over 150,000 Fiction-Bio. - Old & new, including "Harvard Classics Shelf of Fiction", Vol. 1-20 - Charles W. Eliot 1917

Geography

SEE Myths & History, Science, AND Visual Arts - Maps

Gov & Secrets   (608 GBs)

911 - SEPT 11 2001 (250 Documentaries and many publications), CIA-NSA-DEA-Mind Control-Drugs, Psychedelics & Drugs (many Movies and hundreds of publications),   MONEY, Federal Reserve & Taxes, UFO's, Secret Technology & Many noted authors on all questions of what is the truth, from very reliable sources, and a huge general library

----

Harvard Classics, Vol 1-51 - Charles W. Eliot 1909 (3 GBs)

Learn Languages – STUDIES in over 70 languages

Spanish - Movies, Lessons & Dictionaries - English - Arabic Etc., Etc. (65.5 GBs)

Movies & Television (4 GBs)

A huge general library

Music   (781 GBs) 5 years of continuous music

A – Classical, B –Instrumental, F - Golden Oldies & Greats, H - Jazz & Rhythm & Blues, I - Country & Western & Bluegrass, J - Nature Songs over 10,000 bird, insect, frog, mammal and whale voices W - World Music, X - Audio Oddities, Scary Sound Effects, Sound Clips & Sound Effect Library, and a huge general library

----

Myths & History (366 GBs)

Africa, Alchemy, Asia & Middle East, Atlantis, Lemuria, Mu, & Lost Continents, Australia, Dragons, Serpents, & Strange Creatures, Europe (Great Britain & Ireland, Russia, USSR), Folk-Tales Library, Gypsies, North American, Bur. of Amer. Ethno. - Smithsonian Bull's A.O, Rare collections of Mayan CODICES, (American History, Black America), Oceania, South American, and a huge general library

----

Philosophy-Psychology-Sociology & SEE Self Help (23.4 GBs)

Each of the great contributors Aristotle 384-322 B.C., Freud, Sigmund 1856-1939, Hegel, Georg Wilhelm Friedrich 1770-1831, Nietzsche, Friedrich Wilhelm 1844-1900, Taylor, Thomas 1758-1835, Voltaire (François Marie Aroused) 1694-1778, Etc. Etc. Etc. & Dreams, and a huge general library

----

Science   (550 GBs)

Alternative Energies, Astronomy, Biology, (Evolution & Darwin & his works) Health , Chemistry, Computers & Artificial Intelligence, Fort, Charles Hoy (1874-1932) & The Unexplained, Gems, Minerals & Geology, Oceanography, Physics & Math, Weather & Climate, and a huge general library

----

Self Help & Investments   (61.6 GBs)

A huge general library, and many audios & videos

Sustainable Development   (32 GBs)

(over 50 years of collected PDF books by the American Peace Core on all aspects of sustainable living, Bee Keeping, Home Building, electronics, Toilets, Fisheries, Land Management, and hundreds more)   ETC. The Permaculture Book Collection and the Survival Collection.

Symbolism (the world's oldest language)   (52.6 GBs)

Color Symbolism, Engraving & Drawing, Heraldry, Surnames, Tantra & Sex Symbolism, Tattooing, Word and Alphabet origins, and a huge general library on symbolism, our first language, and a huge general library

----

Visual Arts   (58 GBs)

Over 250,000 drawings, pictures including 7500 Ancient & Modern Maps, 4200 mathematically generated pictures called Fractals, National Geographic - 3000 Photos, Old Masters Paintings, Flowers, Animals, etc., etc.,etc., and a huge general library

----

Do not print books: save paper and ink, get ecological, get modern, use searchable & easily copied e texts, be a good example for others………..

MAKE THIS WORLD LENDING LIBRARY, GROW (and back it up on an external hard drive)

For an extensive list of freely downloadable references of many thousands of books, papers and videos and many that are very rare on this subject see:

E-texts, videos, pictures, etc. on everything can be downloaded for FREE at www.archive.org Over 10 million items.
(use search words or keywords like symbolism, religion, sun worship, swastika, cross, freemasonry, author name, exact title, etc.)

You should first go to www.archive.org then Gutenberg Project http://promo.net/pg/

"What are e-texts (electronic texts) & how does it help me?"
Make yourself laugh

We live in a world that is changing fast and the information age is here.

You ask the old librarian: "Do you have that book in your library? No, it is checked out now for two weeks and there are three people waiting for it before you, shall I add you to the list?"

You ask the modern e-texts librarian: "Do you have that book in your library? Yes of course, shall I put a copy on your flash drive?"

You ask the old librarian: "Do you have that book in your library? No, but I can get it from another library in a few weeks, if it is available and not checked out at that library."

You ask the modern e-texts librarian: "Do you have that book in your library? Yes of course, shall I put a copy on your flash drive?"

You ask the old librarian: "Where will I find that book, in the section under American History or Religion or Philosophy or Psychology?   That book is rare and we only have one copy so I can check where it is now and get back to you and will tell you if it is available and not checked out."

You ask the modern e-texts librarian: "Where will I find that book, in the section under American History or Religion or Philosophy or Psychology?   Yes of course we put a copy in each section and you can search for it in a fraction of a second. Shall I put a copy on your flash drive?"

You ask the old librarian: "Do you have that book in your library? No, we have to consider our shelf space and that book was discarded because we had only a few people ask for it. We also are given books that we find offensive and politically incorrect, or not acceptable to today's scientific beliefs so we decide to discard that publication."

You ask the modern e-texts librarian: "Do you have that book in your library? Yes of course expensive shelf space is not an issue in this library and we do not have to review the importance of any book for the people visiting this library. My favorite quote of Schopenhauer is: "All truth goes through three steps: First, it is ridiculed. Second, it is violently opposed. Third, it is accepted as self-evident." Now shall I put a copy on your flash drive?"

You call the old librarian on the phone and ask: "Do you have that book in your library? Yes and because of budget cuts we are only open at, such in such, limited hours and we are located across town, be on time."

You call the modern e-texts librarian: "Do you have that book in your library? Yes of course as we do not have to build thousands of shelves and have acres of space we have a lot of money for all the e-texts we get. What is your email and I will send you a copy in a couple minutes? If you want I can also send you all the other books by that author or on your subject in the same email."

You ask the old librarian: "Where can I find, in this 500 page book, the information about "Atlantis" I need? Sorry, most books have limited indexes or no indexes at all so spend a few hours and look for it".

You ask the modern e-texts librarian: "Where can I find in this 500 page book the information about "Atlantis" I need. You can click CTRL + F and type in "Atlantis" and find any information instantly and can copy it instantly onto your own notes, so enjoy."

You ask the old librarian: "How many copies are there of that rare book and can I borrow it? No there is only one copy and you must use it after getting permission, in our library, only.

You ask the modern e-texts librarian: How many copies are there of that rare book and can I borrow it? Of course, we can make millions of copies of that rare book. Now, shall I put a copy on your flash drive?"

You ask the old librarian: "I am a slow reader, my English isn't so good and I have trouble reading or my eyes are not as good as they used to be, can someone read to me? We have a few audio books and that is all we can do for you."

You ask the modern e-texts librarian: "I am a slow reader, my English isn't so good and I have trouble reading or my eyes are not as good as they used to be, can someone read to me? You can go on the net and download Natural Reader. This will read any books or papers instantly, and even your email, anything on your computers clipboard. This program can make the font size any size, the speed can be slow or fast so you can follow along or you can listen to some beautiful piano music at the same time while being read to. We also have a wonderful slide show you can view with the music of your choice while you are being read to. You can even have the paper you just wrote read to you to hear how it sounds out loud."

You ask the old librarian: "I enjoyed that book by that author. Do you have any speeches or talks or documentaries by him or on that subject? Yes, but they are in another section of the library and I am not sure where they are or if we have them. Let me check and get back in a while. Yes, we

have only a couple but they are checked out now for two weeks and there are three people waiting for it before you, shall I add you to the list?"

You ask the modern e-texts librarian: "I enjoyed that book by that author. Do you have any speeches or talks or documentaries by him or on that subject? Yes of course they are all together in our "" E-texts Library of the Future" which is here NOW. So, shall I put a copy of all you are requesting on your flash drive?"

You ask the old librarian: "Do you have that book in your library? What is the ISBN (International Standard Book Number) number?"

You ask the modern e-texts librarian: "Do you have that book in your library and do I need the ISBN (International Standard Book Number) number? No, I can search for your book by authors name or any keyword or even the date in a couple seconds. You only need ISBN numbers for hard texts for locating them or ordering them from a bookstore. They have no need for ISBN numbers with the instant search we have on any computer today. Now, shall I put a copy on your flash drive?"

Do not print books: save paper and ink, get ecological, get modern, use searchable & easy to copy e texts, be a good example for others………..

Melk Monastery Library, Melk, Austria

END
